BARGAINING FOR BLOOD TO SAVE WOMAN'S LIFE

Several Men Offer Themselves For Transfusion, But Eligibles Are Narrowed Down.

NEW YORK, Aug. 19.—It was a bargain of blood that began yesterday in St. Luke's Hospital, when the cold, scientific battle to save the life of Miss Cole Kayser was started by a half-dozen surgeons, who looked over the offerings that were brought by the professor of so much money for so much blood. Miss Kayser will die unless some transfusion is found which will permit the transfusion of the life fluid into her veins.

Her own brother is willing to permit this transfusion, but the surgeons will not accept him. Therefore Miss Kayser's father has offered to pay any healthy man between the ages of 18 and 35 who will submit to the operation.

It is the hardest kind of bargain to drive, one in which the Kayser can consider sympathy but little, and one which has attracted only those to whom money means almost as much as life.

Those who apply must stand several feet, the bent old father in the Kayser apartment must be satisfied with the general appearance of the men who will sell their blood; the mother, with her tear-stained face, constantly at St. Luke's Hospital, must pass on them, after which the financial feature of the bargain will be settled. A Professional Blood Seller.

Yesterday these tests were 18 applicants down to three or four, and incidentally brought to light a man who, aside from his ordinary vocation in life, has one of the strangest callings in the world.

"This man," said Mr. Kayser, "would, I think, meet all the requirements, but of course, that remains to be seen. On several occasions he has accepted offers such as mine. He began while in England, and the doctors in the English subject for transfusions. Several times he has given his blood in similar operations in the hospitals of this city, and he declares he has absolutely no fear, in the present condition, in such that, according to his statement, the proposed transfusion would be practically no shock to him.

"Of those who came to-day, there were only four who were disinterested to the operation even if they had met the scientific test.

"Of course, it was a most delicate subject, and I did not go into the financial features with any of them. Moreover, they were all delicate enough not to raise that point prior to the examination by the surgeons," continued Mr. Kayser.

GALA DAY IN HISTORY OF PUBLIC CATERING

6000 People View Simpson Restaurant on Opening Day—2500 Sat for Luncheon.

"One of the greatest days in our history," so declared the manager of the handsome and spacious new restaurant and luncheon rooms of the Robert Simpson Co., Limited, agent the opening yesterday.

"We hardly anticipated the early rush for breakfast," he continued, "but from eight o'clock until closing time we were over busy handling the crowd—6000 people being here for dinner from 12 noon to 2 p.m., not to mention the steady stream of patrons from hour to hour throughout the day."

Great Room Attracts.

All told, the new restaurant of the Robert Simpson Co., Limited, catered to more than 6000 people during the day. The Palm and Grand rooms, in the leading hotels, and usually dine at the first-class hotels, and their pleasant surprise they found both cuisine and service equal to the best in the leading hotels and cafes. "A fair estimate," said the manager, "would be a run of 1000 at the tables in the grill room per hour."

Plunger Elevators Busy.

As always happens, a large crowd was attracted out of curiosity, especially to see "the Great White Kitchen" which is unique in the history of culinary art, as it applies to first rate modern department stores. The plunger elevators, which take patrons direct from Queen-street to the grill room, and to the Robert Simpson Co.'s sanitary kitchen, were kept more than busy all day. The World representative in his programme struck with the delight which all expressed over the great glass refrigerators for choice meats, cut and fowl, and over the electric cooking apparatus, and the help in brand new uniforms, dark blue, with checkered aprons, hung over the shoulders in "soldier straps." Everything in fact looked spick and span, and everybody was cheery, as if they were proud to be in service under modern restaurant conditions. In the kitchen operations made a hit, one had only to visit the grill and luncheon rooms to be utterly charmed; for both in perspective and in actual waiting, the really captivating—dressed as they were in black skirts and snow white aprons.

Company's Standard.

This detail shows the ambition of the management of the Robert Simpson Co., Limited. In order that the waiters and attendants in that new restaurant may excel in neat appearance, the company supplies at shortest notice the finest laundered linen aprons, etc., which the help may need. To secure proper and pleasing dress every section of the restaurant is overseen by a competent head-waiter, and the help in pure white, and among her duties none occupies her attention more than the personality and attire of her assistants at the table.

Certainly no unprejudiced manager could be so anxious to see that the waiters and attendants in that new restaurant are so well equipped as they are.

The grill and luncheon rooms are superbly appointed, the food is prepared and laid deliciously, and the service is beyond criticism.

JONES INQUEST OPENED

"No Organized Plan of Tearing Down Wall," Says Coroner.

Dr. R. J. Wilson opened an inquest at the General Hospital yesterday morning on the body of Percy Jones, who was killed on Wednesday by the collapse of a wall on University-street. After viewing the remains, the jury visited the scene of the accident.

"We found," said Dr. Wilson, "that there was no organized plan for tearing down the wall. Everyone worked according to his own way and lived very contentedly in jeopardy."

The inquest was adjourned till Monday evening at 8 o'clock at the morgue.

Two Northern Accidents.

NORTH BAY, Ont., Aug. 19.—P. Egan, laborer, of Sudbury, while walking on the C.P.R. tracks was struck by the Blind River local express and hurled violently into the ditch, breaking both legs and otherwise injuring him. William P. Hall, 20 years of age, who left Toronto this spring with his father, W. H. Hall, to clear a farm near Cochrane, was brought down last night by a train, having smashed three fish while toting in supplies on a jumper over the improvised roads.

Explosion Kills Two.

DETROIT, Mich., Aug. 19.—Engineer William Bradley and Fireman Fred L. Graves were killed about midnight when the boiler of a westbound Pere Marquette passenger train exploded, two miles east of Grand Lodge, wrecking the train. The coach was overturned and one of the two sleeping cars was derailed, but no passengers were seriously injured.

THE ONLY HOT AIR

About McLAUGHLIN'S FAMOUS TEMPERANCE BEVERAGES is the HOT AIR that makes you lusty to the nearest Drug Store, Grocery or Soda Fountain, and call for the one you like best.

The HOT AIR of the atmosphere makes you appreciate a cooling, thirst-quenching and healthful drink, made where you can see it at all stages, whenever you choose to come.

Because you pay the price of The Best and want The Best, see in ordering any of the following that you get McLaughlin's. Your dealer will supply you if you insist.

Ginger Ales, Hop Tonic, Sarsaparilla, Lemon Soda, Tona Cola, Lemon Sour, Lime Juice and Soda, Myscia Distilled Water.

IN SOCIETY

The A. F. McQuarrie Co.

Mrs. Fred Stoner and little daughter of Brunswick-avenue are spending a few weeks with Mrs. Stoner's mother, Mrs. Hancock, in Steeles, Algoma.

Mrs. W. Morgan Flood and little daughter, Margaret, are spending a few weeks at Lake of Bays, Muskoka.

Miss Hilda Rutherford of Deer Park is spending a few weeks at Indian Park, Cobourg.

Dr. and Mrs. L. F. Millar and their son, Hartney, are spending a month at Maribhead, Me.

Mrs. T. Sanderson and Mrs. W. H. Ghent are the guests of Mrs. T. Beowen, in Hanlan, Ont.

The Misses Jarvis have returned from their year-long cruise.

Miss Kate McBride, who has been visiting Mrs. Dalton, Lake Shore-road, Island Park, has returned to the city.

Miss Louise Bailey, 107 Arthur-street, is spending a few weeks at Bala, Muskoka.

Mr. and Mrs. James Gilbert and family have moved to their new residence, 232 High Park-avenue.

Dr. and Mrs. Torrington have returned to the city from Cushing, Me.

Dr. and Mrs. Murray McFarlane have returned to the city.

Lieut.-Col. Hamilton Merritt and Mrs. Merritt have left for a visit to Quebec.

Mr. Guy Irving, Staten Island, is the guest of Mrs. Amelius Jarvis on the Island.

Miss May Walton has returned from Jackson's Point.

Mr. and Mrs. C. Reaves are at Woodcut, Allandale.

Mr. and Mrs. S. J. Dixon and son have returned from their vacation at Mr. McCabe, undertaker, 22 East Queen-street, accompanied by his wife is going on a two weeks' tour to Buffalo, Rochester and New York.

Amusements

Primrose Minstrels.

George Primrose and his star minstrel company will be the opening attraction at the Grand commencing Monday night. This engagement will emphasize the fact that negro minstrelsy is not dead, as this form of entertainment is entirely an American feature which has gradually drifted away from the ideas of its originators. One of the surest signs of its popularity is the fact that every writer of comic opera and musical comedy introduces negro songs, melodies and dances in all their works, and invariably their biggest hits are drawn from these numbers. There was a time when the public would stand for a so-called minstrel show to appear in Louis XIV. costumes, powdered wigs and painted faces, which was rather charming to look upon, because it was new and in some degree true to the troubadour style of the Orient, but this style, having lost its novelty, is no longer charming, and furthermore, theatregoers now want minstrelsy that is true to nature, life and plantation days, and truly a feature of America. It is this place has come the merry dandy fun, intermingled with up-to-date songs and humor, with a program of novelty, vaudeville acts, with fifty people participating in the big fun and song festival.

Skirts

New fall styles, newest New York fashions, newest fabrics, newest color shade and pattern effect. All the newest made to sell at \$15.00 to \$17.50. For \$10.00.

Ladies' Suits

To-day \$10 For \$5.00 to \$8.00.

Linen Suits

Selling \$4.50 For \$5.00 to \$8.00.

36 Dozen of Silk Belts

on the Counters for To-Day Selling 10c at \$1.00.

25 Dozen New Neckwear Novelties

Dutch Collar, Dutch Sets, Hunting Stocks, Gibson Stocks, Bowls and Jabots, the daintiest stuff in the city. To-day for .25.

Not Murdered in Cemetery.

NEW YORK, Aug. 19.—With valuable information about the strength and operations of the Black Hand in Italy, Detectives Tony Vachey and John B. Crowley, of the New York police department, who went abroad after the assassination of Lieutenant Joseph Petrosino in Palermo in March to continue an investigation of the latter had begun, arrived here to-day on the steamer Regina de Italia.

The detectives made a long report to Commissioner Egan, who said that it might lead to the detection of the assassins of Lieut. Petrosino, and that as a result of their visit may be work in agreement with Italy which will be of great benefit in connection with Italian criminals who may in future sail for this country.

Trains Blocked in Colorado.

DENVER, Col., Aug. 19.—Trains blocked in lonely mountain passes, tracks washed away, in some instances.

HAVE YOU BLADDER TROUBLE THEN TAKE

Gold Medal Haarlem Oil Capsules AND FIND QUICK RELIEF. "Odorless and Tasteless."

This old-fashioned, time-honored remedy stands without an equal as an effective and sure remedy for all Bladder, Kidney, Liver and Stomach troubles. In use over 200 years, Gold Medal Haarlem Oil is the only genuine. Accept no other brand. The Gold Medal Haarlem Oil Company, Seranton, Pa.

Dear Sirs,—I used to suffer untold agony from kidney troubles. I believe I inherited the disease, as my mother died from it. I tried almost everything I could get to take, in a vain endeavor to cure myself. I tried Haarlem Oil capsules effected a complete and radical cure. I have used three months after I began using them. Yours truly,

C. J. BUDLONG, Phoenix, Kent County, R.I., April 8, 1909.

25c and 50c per box of capsules. 10c and 25c for the bottles—at all drug stores.

We have received instructions from RICHARD TEW Assignee to sell by

AUGUST 20 1909

KERR LAKE WORKINGS
RICH AT FIFTH LEVEL

Ore Values of 6000 to 8000 Ounces
Obtained at Greatest
Depth.

The following official statement has been issued by the Kerr Lake Mining Company: "Messrs. Julius Lewisohn, M.E., and S. S. Rosenblatt have just returned from Cobalt. The latter returned as follows: The recent new find points at the 150 foot level under the lake has been held by drifting on the level, the active distance being in ore feet, the average 4000 to 5000 ounces to the ton."

"Whilst at the property the smelter returned the assay of which was 4000 ounces to the ton. The No. 3 or Jacobs vein on the fifth level shows the deepest high grade ore in the camp, averaging 6000 to 8000 oz. to the ton."

"The wonderful showing at this depth is most encouraging. The company and disposes the Kerr Lake property, which Cobalt mines do not carry values with depth. The public is not generally aware of the fact that the 200,000 lbs. of ore produced monthly by this company is practically produced from development work only, paying all costs of production, including the cost of maintenance and development, and producing the dividend of 24 per cent. on the capital stock of \$720,000 per year."

"The great strength of the Kerr Lake property is shown by the fact that the local market, drew attention to Hargrave, which became very active and strong towards the close yesterday. Mr. O. H. Christie arrived in town yesterday after a visit to Cobalt and an inspection of Hargrave and what he says about the property will no doubt be most interesting to Hargrave shareholders."

"Mr. Christie spoke as follows: 'I was in Cobalt for over two weeks and saw all the leading properties. I spent a good deal of time in the Kerr Lake district and especially on the Hargrave, of which I made a special study. I have not only satisfied myself, but to report to my friends in New York and Brooklyn. I am strongly convinced that the Kerr Lake zone, especially the Crown Reserve, Kerr Lake, Hargrave and Lawson, is the most important in the whole Cobalt field. From what I actually saw I am convinced that this zone is destined to ship very large quantities of silver, and to return to the owners of the properties in enormous profits.'

"Everybody in Cobalt knows what Crown Reserve, Lawson and Kerr Lake have been and are accomplishing, and in the near future they will see the Hargrave as great a property as any of the other three. I saw the vein which was uncovered in the East Hargrave and can state that while it is not so large as the Lawson's big vein known as the 'silver sidewalk,' it is a most important vein and will probably become as great a producer of silver as any vein in the Lawson."

"This rich vein on the East Hargrave is there for any one to see who will take the trouble to go to Cobalt and see it and the high value of the ore there before your eyes as plain as those in the Lawson."

"Another development of great importance on the Hargrave is the 'Jacobs' vein workings. I saw the Kerr Lake bringing up very rich ore within a few feet of where the Hargrave main workings on the right vein are being sunk. The ore coming up is phenomenally rich and is brought from all the way down to the 400 foot level."

"The Hargrave main shaft, I was told, is now down over 350 feet and at the 375 foot level the celebrated 'Jacobs' vein will be tapped by the Hargrave. You therefore will understand that the Hargrave is actively working on two very important veins, one of which will be tapped by the mine. When I see what the Hargrave has actually got I wonder why its stock is at 57. I can't understand it! It is easily worth 100 or 125. I expect to see Hargrave sell at double its present price before long and in fact I believe it will look low for it at that price, considering the fact that I made a thorough examination of Kerr Lake last year and bought it at \$4.55. It seemed ridiculously cheap to me at that price, considering the fact that I saw the Kerr Lake Company had, I bought it with the strong belief that it was bound to double in value. To-day it is at \$9.45. Hargrave will double in value as Kerr Lake has done. I have unhesitatingly recommended my friends in Brooklyn and New York to depend on my judgment to buy Hargrave and hang on to it. They have invested in it largely and are buying more of it. Some of them at my suggestion have gone to Cobalt to see it for themselves. After seeing it they have bought more and will hold it for very high prices. Everyone of us is convinced that Hargrave at its present price is the most attractive investment in the camp."

"The one value I am strongly convinced that for a moral certainty Hargrave will develop into a second Kerr Lake. The way they are opening up values on the Hargrave, as I have seen in the past week, leads me to predict it as a great future dividend payer."

"Now as to management, I have investigated it and am satisfied. 'The mine is being developed and scientifically. The management is all that can be desired and that is very satisfactory; this is worthy of special mention; I consider it very important. Investors are impatient to get on with the work, but such is the case only at the expense of the proper working of the mine. The Hargrave is not making any such mistake. The work is being carried on entirely with a view to permanent results. When the mine below begins to be worked the ore can be taken out economically and with the best results for the shareholders."

"The ore values are there; the management is most capable and I confidently look for a future for Hargrave as great as for Kerr Lake. In fact it is my opinion that Hargrave stock will gradually rise and after a while will be seen selling for over \$200."

Cobalt's New Station. Tenders were opened yesterday by the Timiskaming and Northern Ontario Railway Commission for the new station at Cobalt, and the contract will be awarded to-day. The new building which is designed by John M. Lytle, architect, is of a design similar to that which is being erected at Cochrane, and will be equipped with increased facilities for handling the growing freight and passenger business at Cobalt.

ACTIVE DEVELOPMENT
IN SOUTH LORRAIN CAMP

Four Cars of Ore to Be Shipped
From the Kelley and Wett-
laufer This Week.

One of the richest and yet, probably, the least known districts of the North Ontario Silver Field is South Lorrain, situated west of Lake Timiskaming, and immediately south of Lorrain Township.

J. A. Gormally of Gormally & Tilt, brokers of this city, returned recently from a three days' visit in the north, the main object of his stay being a desire to find out for himself the real conditions in this apparently unknown district.

Mr. Gormally was very much impressed with the development work which is being done, and the showings which have so far been realized.

"There are at least twenty-five hundred men at work in the South Lorrain camp," Mr. Gormally said, "and mining work is going on actively in every direction. A shipment of four cars of ore, two of which will be high grade, from the district this week will act as a great impetus to the future success of the area. Two of these cars will be shipped from the Kelley and Wettlaufer mines, and the remainder from the Murray, the Magna Cobalt and the Harris Lorrain Syndicate, while another operating company, known as the Silver Eagle, will have a complete plant installed in a short time. Many veins have been uncovered on these claims, and such success has been realized, that there is no doubt as to their ultimate value. They are all controlled by syndicates, and have no intention of placing any stock on the market, sufficient funds being on hand to continue development work for some time."

"These are but a few instances of the high standard of success being attained in this district, and the amount of work in South Lorrain," Mr. Gormally added.

"For an area of six square miles the country has the appearance of a hive of busy bees. Individual owners and companies are spending money extensively, with the result that the amount of work being utilized in opening up opportunities it would be hard to equal anywhere in the silver belt."

Establish Cobalt Department. Messrs. Aemilius Jarvis & Company, in addition to their regular bond and stock brokerage business, have organized a special department for the handling of Cobalt and other mining shares, and are now in a position to give this class of business special attention.

FORMER NEWMARKET MAN. The death of Robert Moore, a former well-known resident of Newmarket, took place at Smith's Falls yesterday at the age of 90 years. Mr. Moore, who had a barister's profession in Toronto for 25 years, and had seen something of military service. The body was yesterday taken to Newmarket for interment on Wednesday.

Not Murdered in Cemetery. ROCHESTER, N.Y. Aug. 19.—By the drawing of an ice pond near the scene of the murder of Anna Schumacher, evidence has been found, it is believed, that she was murdered near the spot where her body was buried in a hastily made grave on Aug. 7.

A side comb and a button with portions of her clothing attached, and a bit of paper in which she wrapped a pair of shoes at her home before going to Holy Sepulchre Cemetery to decorate the family graves, found in the pond bottom, have been identified as the property of the murdered girl. This will end the question of the re-consecrating of the cemetery, as would have been necessary had the murder been placed definitely as having been accomplished in its consecrated portion.

COCHRANE THE RAILROAD
CENTRE OF THE NORTH

Reported Gold Finds in This
Vicinity Not Substantiated
by Later Reports.

COCHRANE, Aug. 19.—(Special to The World from "The Man on the Spot.")—As winter approaches and prospectors return, many wonderful discoveries will be reported. Some will be genuine and some not.

The reported gold finds along the line of the Transcontinental and a few miles from Cochrane, which stood the test of a close examination.

A cook claimed to have found gold on the banks of the Groundhog River and there was a mad rush. A few days later the contractors on that stretch of the road stood a good chance of having to hustle to the front for laborers, but their men soon returned, and six claims were staked and only two recorded.

Quartz veins in a schist formation were found, but no free gold, and the highest assay only ran one dollar to the ton. No native silver had been found.

An investigation into the rumors has, however, led to some interesting information regarding the Grand Trunk Pacific or Transcontinental in that section of territory now being opened up, and from which so much is expected.

Cochrane is 253 miles north of North Bay and the Timiskaming and Northern Ontario Railway is the connecting link between the Grand Trunk System at North Bay and the Transcontinental Railway. Cochrane is the junction point and the T. & N. O. and G. T. P. are constructing a depot and other joint terminal facilities there. Daily trains are run on the T. & N. O. between North Bay and Cochrane, leaving the bay at 11 o'clock in the morning and reaching Cochrane at about the same hour at night.

Cochrane is known as mile post 104 on the Transcontinental and rails are laid west of this junction town to a distance of eight miles. Ballasting has been done for six of these eight miles. The road is graded and ready for rails for 19 miles, or to mile post 123. Groundhog River is 58 miles from Cochrane and the supposed gold finds were about three miles down the river and north of the railway. The river empties into James Bay. William Jack was the name of the cook who gave out the news of the gold district.

Stretches of grading have been done on four-fifths of the distance between mile post 123 and Groundhog River. Poles, ties, and rails are being rushed in supplies for next winter's work. At present great difficulty is experienced in securing men.

The timber in this section is small, but there is an abundance of poplar, spruce and balsam. Which drainage the soil will be capable of growing good crops of hay, oats, wheat and all kinds of roots. There is considerable muskeg, however.

A significant feature when the Transcontinental between Cochrane and Winnipeg is completed, the distance between Toronto and Winnipeg, via Cochrane and Winnipeg, N. O., is shorter than by any other route, as the following will show:

Toronto to Winnipeg via North Bay, T. & N. O., and C.P.R., 1228 miles.
Toronto to Winnipeg via Sudbury and C.P.R., 1236 miles.
Toronto to Winnipeg via North Bay, C.P.R. and C.P.R., 1236 miles.
Toronto to Winnipeg via Sudbury, C.P.R. and C.P.R., 1231 miles.

The distance via Cochrane is only a few miles shorter than by the other route, but the country is very level and fast time can and will be made. In the 53 miles west of Cochrane and between it and Groundhog River there are only four creeks. Cochrane is already a lively town and building operations are very active. Frank Burr Mosure.

Dunnville Bylaw Defeated. DUNNVILLE, Aug. 18.—The bylaw to raise seven thousand dollars for extension of waterworks was defeated here to-day.

BIG THINGS ARE COMING

THE PROSPECTORS' EXPLORATION & DEVELOPMENT CO. LIMITED, capitalized at \$350,000, in \$1 shares, was started with the intention of giving the shareholders the square kind of a deal. Every dollar put into the company was, or is being, expended in the operations which the company started out to fulfill. Only three properties were bought by the company, and were obtained at first cost. These claims, which are in close proximity to Gowganda, have been tested and found worthy of further expenditure, but it is the intention of the company to collect several more properties before attempting to realize from the various mines what undoubtedly will result from honest and thorough development.

The prospectors of the company are now in the field, and are braving the difficulties of midsummer operations in the rich New Ontario silver belt. Under the able management of A. R. Duff, it is expected that many valuable properties, in addition to those already staked, will be located before the parties cease operations for the season.

For the purpose of prosecuting their strenuous prospecting tour during the next three months, the company has decided to make a special offer of a block of 30,000 shares of stock at the price of 15 cents per dollar share. The company's first issue of stock was made at 10 cents a share, but after the present issue none will be offered below 25 cents a share.

These shares offered tremendous investment possibilities, and we cannot too strongly advise their immediate purchase. With the return of the prospecting parties the shares should sell at a very much higher price.

REMEMBER, you are getting in on the ground floor by buying stock in the Prospectors' Exploration & Development Co. MINES to this company will cost only the expense of locating and affluence to them. A small investment consequently can easily result in affluence.

One hundred shares cost \$15, and with only one shipping mine should be worth \$100.
One thousand shares cost \$150 and with one shipping mine should be worth \$1000.

It is impossible to calculate what might be the ultimate value of the company's shares, but that they have tremendous possibilities there is no doubt.

Shares bought by wire will be reserved until receipt of cash, cheque or money order.

A. J. BARR & CO. BROKERS
Phone M. 5492, 43 Scott Street, Toronto

PETERSON LAKE SILVER COBALT MINING
COMPANY, LIMITED

The following letter has been forwarded to the shareholders of the
Peterson Lake Silver Cobalt Mining Co.

TORONTO, AUGUST 17th, 1909.

TO THE SHAREHOLDERS:

You have doubtless recently received notice of meeting of shareholders called at the request of myself and others acting as shareholders of the Company pursuant to the provisions of the Companies Act, and with the notice was enclosed a printed copy of this request and also a circular letter purporting to be issued on behalf of the Directors, from all of which you will understand that there are certain more or less serious matters of dispute outstanding between myself as President of the Company and the majority of the Board of Directors.

The circular above referred to is worded with the manifest intention of damaging my standing with the shareholders without any regard to the facts of the case as it is composed almost entirely of insinuations of dishonest dealing, none of which have been or ever can be established, but which are now being used in this unfair way to blind and mislead the shareholders for the personal advantage of the interested parties.

The result of all investigations so far, and they have been somewhat extensive, has been to vindicate myself and the management of the Company generally from all charges of dishonesty or incompetence, and I court the fullest possible investigation, feeling confident that the more complete the investigation the more complete will be my final vindication.

Much capital is being made of the fact that I am acting apparently in defiance of the majority of the Board of Directors, but my whole aim has been to prevent the use of such a course as it is considered almost entirely of insinuations of dishonest dealing, none of which have been or ever can be established, but which are now being used in this unfair way to blind and mislead the shareholders for the personal advantage of the interested parties.

The result of all investigations so far, and they have been somewhat extensive, has been to vindicate myself and the management of the Company generally from all charges of dishonesty or incompetence, and I court the fullest possible investigation, feeling confident that the more complete the investigation the more complete will be my final vindication.

The meeting then proceeded to the election of Directors. Mr. Hogg had come to the meeting armed with a certain number of proxies in favor of one S. G. Forst, most of them obtained at the last moment, claiming to have control of the meeting, but refusing to deposit his proxies with the Secretary until a vote should be called. I must therefore take this opportunity to personally thank all the shareholders who supported me in this manner. I cannot help feeling that I was entitled to this support in view of the fact that I have given my time and energy without stint for the last four years in getting the affairs of this Company on a business basis. I have been one of the two or three parties who have advanced practically all the money required by the Company for the past four years, and for the development work that has been done (about \$300,000 all told) and I am the largest shareholder of the Company. In addition to this I have had a mining experience and a business experience of an extensive and successful character acquired during the past thirty-five years of my life, the benefit of which has been honestly and freely devoted to the service of this Company during the past four years, and although voted a salary of \$2400 a year, I have waived acceptance of the same with the exception of a total payment of \$1200 all told. It is impossible therefore to conceive that I could be a party to any mismanagement or improper action of the Board of Directors, as I would certainly be the greatest sufferer from any such course. The Board also elected as Secretary-Treasurer Mr. Joseph Montgomery of the firm of Kerr, Bull, Shaw & Montgomery of Toronto, who has been honestly and competently connected with the Company from its inception, as legal adviser and otherwise, and who is thoroughly conversant with the affairs of the Company, and competent in every way to take charge of such office.

I hoped that the new board, although they were not men of any experience in mining matters, would act in harmony with me and that our troubles were at an end, subject to whatever action might be necessary as a result of the report of the investigating committee appointed by the annual meeting as above stated.

The engineer, selected by the annual meeting as a member of the Committee, Mr. Frank C. Loring, was unable to act owing to illness, but the remainder of the committee appointed Mr. Walter Segsworth to act in his place and proceeded to the Mine in my absence and without even consulting my convenience. All the books and records of the Company were, however, opened up for their inspection and they spent several days going over the records of the Company from the commencement of its operations, and in inspecting the work on the Company's property.

Mr. Hogg, who was the accountant of the Committee of Investigation, has since reported that after a thorough investigation he is unable to find any discrepancies in the books or records of the Company, although he has certain criticisms and suggestions to make which I think are reasonable, and subject to the consideration of expense connected with them will as far as practicable be carried out if I receive the support of the shareholders in the management of the Company.

Shortly after the annual meeting of the shareholders the first meeting of directors convened, and much to my surprise the three new members of the Board, who were elected to take control of my hands and absolutely refused to transact any business or even to proceed with the investigation which had been ordered by the shareholders unless a new Secretary-Treasurer were elected, nominated by themselves and all the books and funds of the Company turned over to this new official, and no reason was given for this action except to say that I ought to be prepared to trust absolutely in the good faith of this new majority who had never before had anything to do with the affairs of the Company.

Had these three directors been elected by any vote indicating that they had the support of the majority of shareholders I would have submitted without further question to their wishes, but as they had been elected simply by consent for the purpose of compromise, although representing only a minority of the shareholders, I felt it to be my duty to myself and the shareholders generally to resist until a meeting of shareholders could be convened, and I immediately took the necessary steps as a shareholder to require such meeting to be called.

The present organization of the Company and its system of handling shipments of ore and carrying on business generally, has been built up by the careful application of special knowledge and business experience during the past four years. If the present course is upheld I must withdraw from active management of the Company, and all its affairs and resources must fall into the hands of inexperienced men, not one of whom has any special knowledge of mining, and the result I am sure will be disaster for the Company. I therefore refused to submit to the dictates of the majority of the Board until I could appeal to the shareholders as a body.

The majority of the Board, not satisfied with my action and unwilling to face a meeting of shareholders, started legal proceedings to get possession of the books and documents and funds of the Company, and after several ineffectual attempts to seize the same finally got the matter before a Judge of the High Court of Justice for Ontario. The Judge was, however, impressed by the view that this was a matter to be determined by the shareholders, and simply ordered the books and documents and seal of the Company deposited in the Court until this matter should be settled by shareholders' meeting or otherwise. Had my action been entirely illegal and unwarranted or had it appeared that I was acting from personal motives solely, no such order would have been made, and the fact that the Judge saw fit to make it satisfies me that I have taken the proper course under all the circumstances.

Immediately after this order was made the majority of the Board endeavored to further protect themselves from the shareholders by repealing the bylaw which gave me authority, as President, to call a meeting of shareholders, and also repealed the bylaw giving the shareholders the right to declare vacant the office of a Director who might be acting adversely to the wishes of the shareholders. They also repealed the bylaw passed by the Directors at the request of the shareholders' meeting increasing the Board from five to seven members, and passed a new bylaw increasing the length of time required for notice of meeting, and a resolution purporting to remove me from the office of President, which I am advised is entirely illegal. They also showed their eagerness to get hold of the funds of the Company by getting a duplicate seal and certifying to the Bank that Mr. McLaren was now President, and a statutory declaration to that effect was proceeded with the appointment of salaried officials and the incurring of expenses generally in liberal fashion. They doubtless hoped in this way to make their position secure until the next annual meeting, and to carry out their own personal wishes in the meantime regardless of the will of the shareholders generally.

Mr. Segsworth's circular comments on the fact that the manager of the Nova Scotia mine was also manager of Peterson Lake, and was the only party responsible to the latter Company for proper checking of the ore, and states that the results of such an appointment to Peterson Lake matters, and does not go so far as to state that there has been any dishonest dealing by this manager in relation to the Nova Scotia mine, and does not dare do so, although it is plainly intended that the shareholders may draw that conclusion if they wish. As heretofore stated the charge was openly made at the shareholders' meeting that the manager of the Nova Scotia mine was responsible for dishonest dealing with Peterson Lake ore, and a statutory declaration to that effect was read to the meeting made by the aforesaid John Longden, and this declaration was used as a strong card in procuring the investigation which is now being made. I felt that Longden was simply a tool in the hands of the parties who were stirring up trouble, and that no action should be taken in regard to him, notwithstanding the fact that the charges made in his declaration were absolutely untrue and without any foundation.

The Manager of the Mine, however, felt that his reputation was at stake and made a complaint to the Crown authorities in regard to the matter, the result of which was that Longden was arrested and committed for trial on a charge of making false statements in a statutory declaration, and is now in jail awaiting trial; and it may not be unfair to comment that the parties who used him as a tool to accomplish their own ends have not had the decency to furnish bail to the extent of \$1000 in order to keep the poor fellow out of jail until his trial.

The circular also comments on the fact that a writ has been issued against myself and Mr. Edward Steindler for the recovery of a large amount of stock and money of the Company. This action will take care of itself and at its present stage should not be made a matter of influence votes at a stockholders' meeting, although that is the evident intention of the parties who are bringing the action, use of to influence votes at a stockholders' meeting, although that is the evident intention of the parties who are bringing the action, I can only state that all the stock issued to myself or Mr. Edward Steindler or any other parties in connection with the Company has been issued on proper and substantial consideration, and that all monies received for or on account of the Company have been accounted for with absolute correctness, and have never endeavored to manipulate the stock market in connection with the stock of this Company, and have no intention of realizing anything on the stock held by me except by having the property developed and the stock made valuable as representing actual values produced from the property.

I therefore think I am justified in asking for your support until at least some satisfactory reason is shown for the course that is being taken by the parties who are attacking my position with the Company. Had the majority of the directors not interfered with the existing bylaws of the Company the present meeting would have been held long ere this, but as they have chosen to delay the matter, I have adopted the only course open to me, namely, to demand that a meeting be called for the purpose of repudiating and repealing the actions of the present majority of the Board of Directors since they have assumed control of the Company. If I receive your support in this direction and also in the subsequent election of a Board of Directors who will act in harmony with me, I assure you that on the principle of honorable and fair business dealing for which I think I have some reputation, as well as in my own interest as the largest shareholder of the Company, that the very best action will be taken that is possible in the interest of all the shareholders, and the wishes of every shareholder will be consulted to the fullest possible extent, and as far as possible complied with. I would therefore request you to sign the enclosed proxy, and forward the same addressed to me in the enclosed envelope in care of Messrs. Kerr, Bull, Shaw & Montgomery, who will see that the proxy is properly presented at the meeting, or else forward the same to me at my office, No. 42 Broadway, New York City.

I remain, yours faithfully,
D. M. STEINDLER,
President.

OVER 500 SHOTS FIRED BY PITTSBURG STRIKERS

Steamer Bringing Strike Breakers Battered With Bullets, Woman With Babe Directing Fire

PITTSBURG, Pa., Aug. 19.—Mounted and using their hickory riot clubs, members of the Pennsylvania State Constabulary are to-day keeping strikers on the move in the Pressed Steel Car Company's strike zone at McKees Rocks. It is estimated over 500 shots were fired last night and early to-day by strikers and sympathizers, who had gathered on the O'Donovan bridge shortly after noon. Alleged strike sympathizers opened fire upon the steamer P. M. Penell, which was bringing city-imposed men across the Ohio River to the mill. Several thousand strikers were lined along the river bank and each volley was directed at the steamer. One woman with a baby, over 100 shots were directed at the steamer. No one was injured, although many of the bullets struck the boat.

By the time the steamer reached the shore near the plant a squad of state constabulary, mounted, had ridden into the crowd scattering men, women and children in all directions. A number of persons were slightly injured. Under heavy guard the imported men were taken to the works, some of them in a highly nervous condition.

REMOVE SOURCES OF EVIL

Immoral Literature and Exhibitions Should Be Restricted.

SEATTLE, Wash., Aug. 19.—The Congress of American Prisoners elected officers including: President, Amos W. Butler, Indianapolis and Vice-President, Lieut. Col. A. G. Irwin, Stony Mountain, Man. The National Prison Physicians Association elected officers as follows: President, Theodore Cook, Jr., Baltimore; Vice-presidents, John E. Brown, Clinton, N.Y.; Secretary, Daniel Pheasant, Kingston, Ont. The Indiana plan of operating upon inmates and confirmed criminals was heartily endorsed by Dr. Daniel Pheasant of Kingston, Ont. In his annual address as President of the Prison Physicians Association before the American Prison Association here to-day, Dr. Pheasant said:

"Not only do I suggest the adoption of energetic means to lessen the number of the already existing criminals and degenerates, but also the removal as much as possible of the more remote sources of the evil. Immoral literature, places, exhibitions and pictures inevitably have an evil effect upon the young mind, and especially upon naturally weak ones."

MYSTERIOUS NEW AEROPLANE

Rumored Surprise For the Aviators at Rheims.

RHEIMS, Aug. 19.—It is said that one of the surprises of aviation week will be the appearance of a mysterious aeroplane, built along the lines of the Wright machine, which has been used successfully in a number of secret flights held recently near Paris. The pilot of this machine abandoned a project to fly from Paris down to Rheims only because of the possibility of damaging his flyer. This aeroplane takes to the air immediately without running on the ground or making use of outside force. It rises aloft by varying the angle of the planes, and the strength of its propellers.

Fraternal Congress Officers.

BOSTON, Aug. 19.—Detroit was selected to-day as the next year's meeting place of the National Fraternal Congress. Those elected as follows: President, Thomas H. Cannon of Chicago; vice-president, John J. Hynes of Buffalo; secretary and treasurer, C. A. Gower, Lansing, Mich. The medical section of the congress elected Dr. W. K. Harrison of Chicago, president; George G. O'Connell of Chicago, secretary and Dr. Elizabeth M. Hooper, treasurer.

250-Foot Tower Collapsed.

BERLIN, Aug. 19.—A 250-foot tower on the building of the English Gas Co. located in the suburb of Schoenberg, collapsed to-day and fell across the tracks of the Circular Railway, crushing an unoccupied car of a passing train. Five passengers in other cars were injured.

TORONTO MARKET LITTLE CHANGED BY WALL ST.

World Office
 Thursday Evening, Aug. 19.

Some of the more speculative issues on the Toronto Stock Exchange were influenced by the Wall-street break to-day, but viewed in a broad way the list gave no evidence of any permanent change. Business was as restricted as usual, and the market was not over-burdened with selling orders. Investment securities were not affected by reactions in the speculative department, and transactions were consequently made at firm quotations. Buying all thru the list at the present time is of a good character, and such as cannot be disturbed by temporary setbacks.

HERBERT H. BALL.

Nice Clean-up Engineered By Wall Street Magnates

Margin Calls Essential to Keep Holdings Good—Toronto Market but Slightly Affected by New York Market.

World Office, Thursday Evening, Aug. 19. Considering the break in the New York stock market to-day local securities demonstrated a firmness that could only be explained by the absence of any large outstanding speculative account.

Two or three of the more speculative stocks, such as Twin City and Rio, were played against for a reaction by room traders, but whether successfully or not remains to be seen. Dealings at the local exchange were about as small as usual. Traders put out a few short lines on the assumption that a demoralized Wall-street might mean domestic liquidation. There was no evidence of this, however, during the day and a covering movement may result in advanced prices in certain stocks during the next few days.

There was nothing locally to change the trend of prices; all the call money necessary is available at reasonable rates and the London bank statement this week disclosed no weakness at the big centers.

Good buying was the feature of to-day's business, which, although small, included a definite undertone of strength to all the substantial issues.

Wall Street Pointers. Regular quarterly dividend of C. & O. 1 per cent.

Cincinnati, Hamilton and Dayton Railroad is to be taken out of receivers' hands.

Rock Island and seven other roads operating west of Chicago ask injunction restraining interstate commerce commission from enforcing order which would order affecting territory between Chicago and Des Moines.

United States revenues receipts in July this year increased \$939,326 over last year.

Special meeting of Central Leather to revise charter.

Chicago G. W. offer to stockholders expires on Aug. 20, when the first instalment of \$5 on the \$15 assessment on the "B" and common stock is due.

J. P. Morgan & Co. have deposited the required \$500,000 certified cheque to qualify as bidder for C.G.W. at auction on Aug. 21.

Republic Iron and Steel stockholders of record Aug. 7 can subscribe to offering of new preferred stock.

At 715 Standard Oil stock had advanced 322 points in low of panic.

American Woolen gross earnings for May approximate \$65,000,000 in 1909.

Pittsburg estimates that 400,000 tons of iron ore will be brought to lower lake ports before the close of navigation.

Joseph says, reading St. Paul and Baltimore & Ohio on drives. Harriman's condition is exaggerated; hold Southern Pacific and take on Pacific Mail.

At a special meeting of the stockholders of the Central Leather Co. held this afternoon in Jersey City the charter of the company was so amended that the U. S. Leather Co. can now be merged with the first named company.

A Washington special says an important conference will be held in New York city within a few weeks to consider proposed changes in the Interstate Commerce Law, and in the Sherman Anti-Trust Law. The purpose of the conference will be to suggest alterations in the laws governing railroads and corporations, which are to be submitted to President Taft in order that he may include them in his recommendations to Congress in his annual message.

If the 76 support in Steel is withdrawn, lower prices are likely. Some support is reported near 210 now in Union Pacific, but if not maintained there will be a slump further. American Car Foundry is being quietly bought on a scale down to Chesapeake and Ohio and Rock Island preferred are reported well bought. Amalgamated Copper operations are checked by the Harriman slump.—Financial Bulletin.

Further irregularity is likely on account of speculation regarding the Harriman situation. Professional sentiment is quite bearish, and the market will be probed for weak spots and the dislodgement of stop orders, especially

STATEMENT NOT OFFICIAL
 Hon. Mr. Brodeur Won't Divulge Canada's Plans.

LONDON, Aug. 19.—(C.A.P.)—Hon. L. P. Brodeur, interviewed by the Canadian Press re statement contained in the "Lengthy Statement" cables yesterday, said that to take this statement as being a result of the conference would be incorrect, but to brief extent the statement was correct. "I have been asked," said Brodeur, "several times to give information re the proceedings of the conference, but I have always declined, as the members of the conference are bound to secrecy, but I can say an official statement will shortly be issued."

SHORT CIRCUIT KILLS TEN
 Set Fire to Houses and People Ignored Danger.

LECCO, Italy, Aug. 19.—Thru the breaking of a highly charged electric light wire at Olgrate which created a short circuit and set on fire the installation in all houses supplied with the current, ten persons were killed and twenty seriously injured by ignoring the danger and attempting to extinguish the fire or cut off at the current with switches.

HAD A MILLION DOLLARS IN COUNTERFEIT BILLS.
 WASHINGTON, Aug. 19.—Secret service officers to-day arrested John Roberts of Beechdale near Louisville, Ky., with \$1,000,000 in counterfeit bank notes in his possession.

M. C. Roberts, his brother, was taken into custody yesterday with forty Mexican national bank notes of \$100 denomination, and it is gossamer will be given by the representative in charge.

ELFVEN MEN DROWNED.
 HALIFAX, N. S., Aug. 19.—A message from Lunenburg says the Gloucester and it of crew, most of them Nova Scotians, were drowned.

THROWN FROM BUGGY, MAY DIE.
 ST. CATHARINES, Aug. 19.—Mrs. William Secord and child and Miss Ada Schuchert, Cape Breton, were thrown from a buggy while out driving, the horse becoming frightened by the passing of a G.T.R. train.

Miss Scanlon may die from concussion of the brain.

Turkey and Germany Fraternize. CONSTANTINOPLE, Aug. 19.—Scheffer, Russian commander of the first and second army corps, has accepted an invitation of Emperor William to assist in the approaching German army maneuvers.

Passengers Landed in Small Boats.
 HALIFAX, N. S., Aug. 19.—The S.S. Margaret, from Halifax for St. John's, Cape Breton, struck on Thrum Cape shoal, outside the harbor, at two o'clock this morning in a heavy fog. Passengers, 35 in number, were landed by McNab's Island in boats and came up to the city on military transports. The steamer Margaret is owned here.

Many Happy Returns of the Day
 to Edward Chas. Ryott of 150 Carlaw avenue, born Aug. 19, 1863. Mr. Ryott is a son of the late Wm. Hall Ryott, M.D., F.R.C.P., and brother-in-law of the Bishop of Norwich, who was left-hand supporter for Queen Alexandra. When only 15 years old he came to Toronto and went farming with George Cooper of Davenport, an old landmark here. George Campbell, the well-known lawyer, and Ryott worked together. Ryott has great ambition and greater independence, never seeking help from his old country relations, but relying on his own ability. Mr. Ryott is a member of McKinley L.O.L. 275 and auditor of No. 1 Ward Conservative Association.

Afternoon Trips.
 Wednesday and Saturday afternoons via Niagara. Navigation Company's steamer, Niagara, Lewiston or Queensing, 75 cents and return. Excellent dining service on all steamers. 56

For five hours Raymond Hitchcock, his wife, Flora Zabelle, and her cousin, Charles Kowdzian, who arrived in America from Armenia a few days ago, were admitted to a gala in a ball canoe on Cow Bay, Long Is and Sound, on Sunday.

Week-End Trips.
 After your week's work and worry is over there is nothing more refreshing to both mind and body than a little pleasure trip. The Grand Trunk Railway System issue return tickets to a great many points in Ontario at single fare,

GOMPERS AND MITCHELL ENEMIES OF THE NATION

That's What the Manufacturers Ass'n President Says—Roosevelt's Bid For Labor Vote

BUFFALO, Aug. 19.—President Samuel Gompers of the American Federation of Labor, and John Mitchell, his associate, were condemned as actual enemies of the industrial world...

It was also declared by Mr. Kirby that President Roosevelt did his utmost to secure the passage of the Sherman anti-trust law, and an amendment to the Sherman anti-trust law, exempting labor unions from some of its provisions, solely to secure the labor vote.

Mr. Kirby, after explaining to local business men the aims of the Manufacturers' Association, said: "Few persons not actively engaged in the work of the association can realize the immense amount of good accomplished by the association's representatives at Washington in the last few years in combating vicious legislation, fathered by irresponsible labor leaders."

"First in importance was the defeat of the Peare anti-injunction bill, and, secondly, the defeat of an amendment to the Sherman anti-trust law, exempting labor organizations from some of its provisions."

"President Roosevelt was after Gompers and his mythical labor vote, and he believed the passage of these measures necessary to win them. If the measures had been brought to the floor of the house, there is every reason to believe they would have been passed and we would have had them on the statute books to-day."

"I have been reliably informed that Mr. Roosevelt sent for congressman after congressman and told them that he would go into their districts and defeat them at the next election of those who opposed the measure."

"There can be no industrial peace, no industrial independence, with such men as Samuel Gompers and John Mitchell at the head of labor organizations."

BANK DIRECTORS ON TRIAL An Alleged Fabrication of Balance Sheet Cause for Prosecution.

EDINBURGH, Scotland, Aug. 19.—The trial of five directors of the Mutual Bank, having its headquarters in Glasgow, and now in liquidation, has begun in the high court of justice, on the charge of being concerned in concocting, fabricating and issuing a false balance sheet as to the affairs of the bank on Dec. 31, 1901.

The names of the accused are: Alexander Wilson, Alexander McWhirter, Hugh Stafford, James Clelland and Duncan MacRae.

Evidence was given that Alexander Swanson, who was secretary and manager of the bank, left the bank in July, 1905, Wilson taking his place. In October, 1904, Swanson bought property in Glasgow for £650, which he got from the bank. He granted a bond conveying the property to the bank in security for £3000. The property was afterwards conveyed to a builder, and the bond for £3000 was made useless. At a meeting in May, 1905, Swanson explained the matter to the directors. At that time Swanson had an overdraft at the bank, which later amounted to £3000. Swanson promised to meet the directors, but failed to do so, and he never paid anything, and had not been seen since 1907.

Robert D. Morton, chartered accountant, who examined the books of the bank, said that he had found that Swanson held 1155 worth of shares, of which at the close of 1904 he had paid up £8 11s. The £486 due to the bank by Swanson was unsecured, and was, witness considered, a bad debt. One of Swanson's card transactions was to borrow £100 from the bank to buy a house for himself. The Golden Eagle Friendly Society, whose debt of £231 to the bank was certified as good in the balance sheet of 1904, was defunct. In the 1905 balance sheet the £231 representing Swanson's indebtedness included four debts transferred by the directors to Swanson's account. The directors knew that Swanson's account was bad, and they were simply increasing the amount of it by adding the other bad debts mentioned to it.

The Granary of the Empire Hon. Walter Scott says that Saskatchewan that "the Canadian middle west will in a comparatively few years be the only stretch of country in the world where millions of acres of cheap, rich virgin land, easily available for tillage, can be found." Saskatchewan, he believes, is destined to become the actual granary of the empire. This absorbing article appears in the Aug. 21 issue of Collier's.

ENDORSE CLEARING HOUSE Dominion Marine Association Will Bear Portion of Expense.

A meeting of the Dominion Marine Association was held at the King Edward yesterday to discuss the proposed clearing house for grain at Port Arthur and Fort William. The members met Charles Rutan, of Winnipeg, the secretary of the lately incorporated Lake Shippers' Clearing House Association. Mr. Rutan outlined the purpose of the association which in effect is to arrange for the loading of the late grain-troop ships at those ports at one or two elevators, thereby eliminating delays which have been occasioned in the past by reason of vessels sometimes having to load at 7 or 8 elevators.

The members of the marine association present heartily endorsed the proposed arrangement, and undertook to bear their pro rata proportion of the expense incurred in maintaining the clearing house so that there is a high probability that when the 1909 crop commences to move about Sept. 15, the clearing house will be a fixture, resulting in prompt loading of ships. Among those present were: G. E. Jacques, and L. L. Henderson, Montreal; H. Richardson; Francis King (sec. Kingston); Capt. Featherstonhaugh, Midland; H. H. Gildersleeve, and George Fair, Collingwood; C. H. Nicholson, Sarnia; Frank Plummer, A. A. Wright, J. T. Moore, J. J. Norcross, C. H. Plummer, J. B. Foote, Toronto.

We Close at 1 o'clock on Saturday During July and August this store closes at 1 o'clock instead of 5.30, as is our daily custom the year round, except in the two midsummer months. Shop in the morning early to-morrow.

"Sourdough" "SOURDOUGH Service" has published another book of poems. It's on sale to-morrow in this store. We take this early opportunity of announcing the fact, because there is no verse more popular in this country to-day than that of his first book—"Songs of a Sourdough"; and his second volume, "Songs of a Cheechako," should make just as big a hit. "Cheechako" means tenderfoot. Forty thousand copies of "Sourdough" were sold since it came out, and 15,000 copies of "Cheechako" have already been subscribed for.

JUST PUBLISHED. "The Ballads of a Cheechako," by Robert W. Service, author of "Songs of a Sourdough." Cloth bound, 90c; ditto, illustrated, \$1.25. (On Sale Saturday, New Book Department.)

We will want One Hundred Waitresses altogether in our New Restaurant on the Sixth Floor of the new building, and still have vacancies for twenty-five more. Applications received by Manager of Lunch Room, Sixth Floor.

Saturday in the Cloak Department

SUMMER is so nearly over in this store it makes us sad. Good thing we can come back to summer again by simply stepping outside—and will be able to do so for the best part of six weeks yet. But we are so far-sighted in this store we can think of nothing but fall. Summer goods suffer in consequence—that is, their prices do. See, for Saturday morning early we'll be offering:

\$5.00 WASH SUITS FOR \$2.95. Wash Suits, misses', small women's and women's sizes, striped and plain materials, in sky, fawn or white, all carefully tailored, and made in best selling styles. Regular \$5.00 values. Saturday \$2.95. Smart Semi-Princess Dresses, in fine washing linen-finished fabrics, in sky, mauve, linen shade and dark grey, trimmed with imitation Cluny lace and pearl buttons. A \$4.50 dress, for Saturday, \$2.95. SMART OUTING COATS, \$4.95. Outing Coats, of striped covert cloth, in semi-fitted style, single or double-breasted, trimmed with self-covered buttons, patch pockets. Clearing price, Saturday, \$4.95. GIRLS' COATS, SUITS AND DRESSES, 95c. Saturday we make a clearing of all oddments and broken lines, after a busy week in the Girls' Section; there are Coats, Suits and Dresses in all the new and most popular designs, all wash materials. Values up to \$3.50. Saturday, 95c. DAIRY WHITE LAWN WAISTS, \$1.00. Smart Tailored Waists, of fine quality white lawn, fronts of openwork embroidery in five dainty designs, finished with tucking on front, back, collar and sleeves, pointed collar and cuffs. Special Saturday, \$1.00. NEW MORBEN AND SATSEEN UNDERSKIRTS AT \$1.00. These two new styles are of exceptional value; the morben skirt is made with deep flounce of accordion pleating and frills; the satseen skirt has deep flounce of strapping and stitching; both styles are quite full, and are carefully finished. Special Saturday at \$1.00. \$3.00 MUSLIN KIMONO GOWNS AT \$1.95. New York Muslin Kimono Gowns, in empire effect, sky, champagne and lavender pattern, on white ground, in sizes 36 to 44. Regular \$3.25. Saturday, \$1.95.

Advanced Autumn Hats at \$4.50

Nearly 50 New Hats have just been trimmed up to go on sale Saturday at \$4.50 each. They are made of silk braids or moire silks, and show many of the best fall shapes. Most of them are black and trimmed with jet and fancy feathers. Very special price, \$4.50.

Satisfactory Footwear-The Countess

There is some satisfaction in being properly fitted with your exact size and width after you have selected the style you desire. This we can do now, for our "Countess" size ranges are complete. When you try them on you will probably say: "How comfortable!" Style, quality, workmanship and finish are the best yet. Better values in Ladies' High-grade Boots will not be offered in Toronto this season. Reasonable prices, \$3.00 and \$4.00.

Ladies' \$4.00 Oxfords \$2.49

200 pairs of Ladies' Oxfords, made from all the most popular leathers, including patent calf, oose calf, bronze calf and kid, ox-blood, vic kid, velours calf and tan calf leathers; not all sizes in any one style, but all sizes in the lot, 2-1/2 to 7. Regular values to \$4.00. On sale Saturday, \$2.49.

The New Queen Quality Boots Are Ready, All Popular Sizes
