JOHN T. G. CARR

CALDWELL URGES MORE SPEED

Takes up in the House Matter of
Wanted Railway Bridge-Com-
demns Bad Service

In Parliament on June 7 T. W. Caldwell, M.P., when railway matters were being discussed said: "Before we leave this vote there is a condition to which I would like to draw attention in connection with the St. John and Quebec railway which the Dominion government is operating at the present time. As you possibly know we had floods in April and the bridge was washed away on the St. John and Quebec railway just above Woodstock. There were several washouts on the Canadian Pacific which runs up through nearly the same territory, at the same time. The Canadian Pacific Railway Company, however, were able to restore their service within a week anyway. The Canadian National Railway bridge is still down. I understand there was a lapse of thirty days from the time the bridge went out before operations were begun to replace it. The latest information I have is that they expect it will be the first of July before they will have that road in operation."

An hon. MEMBER: Where is the bridge to which you refer?
Mr. CALDWELL: It is a bridge across the Meduxnekeas just above Woodstock. This creates a very serious situation on that road just north of Woodstock where it runs through the potato belt. The potato shippers, who have warehouses on every siding along that road north of Woodstock, bought large quantities of potatoes and stored them there expecting to ship them out but potatoes being a perishable article they cannot wait until the first of July when the road will be completed. The growers have been under the necessity of hiring trucks and trucking those potatoes to the shipper at some point. In addition to that the farmers nearly all have more or less potatoes, some quite large quantities, on their hands. We had sworn evidence before a parliamentary committee this year that the farmers in New Brunswick had not less than 50 per cent of the actual cost of growing their potatoes last year, and they are still marketing them at that loss. Now they are in the position of having no railway facilities in the best potato producing section of New Brunswick. With large quantities on their hands their potatoes will be an absolute loss by the first of July when this road is to be completed. I have it on very good authority—in fact I was talking to a gentleman this very evening in the House who had just come in from there—that the Canadian Pacific Railway Company had trains running over their road in at least a week after the flood, but it was thirty days before the Canadian National Company commenced operations on this bridge. If permanent bridges could not have been put up a temporary structure might have been erected to meet the emergency. I believe the trains could have been running on that road long before this had the proper measures been taken."

Then I see this vote covers the deficits when they are ascertained. I imagine the minister has ascertained the operating deficit on the St. John and Quebec Railway. There has been a deficit every year since it has been operated, due to no fault of the railway, but owing to the fact that it has never been completed. From Grand Falls and made a through route, as first intended. The operating deficit is due to two or three facts: one is that it is a branch line, when it should be a through line, and another, the fact that it has not been completed. I want to acknowledge my gratitude to the minister for extending the time for the completion of the road and for paying the Dominion subsidy for the balance of the construction of the road. But I do not think it is going far enough. I think it would pay the Dominion government to complete the link up with the Canadian National at Grand Falls, and turn it into a revenue producer, instead of a producer of deficits. That is another reason for the deficit, and this condition should have been remedied."

On the road north of Woodstock there is a great deal of local traffic. There are several mills on that line of road, as well as a large amount of farm produce. I know one saw and lath mill owner who has been unable to procure cars for years when he needed them. He has applied for cars and told that there were none to be had. He has put on teams, hauled the stuff ten or twelve miles to the Canadian Pacific Railway, and loaded it in Canadian National cars on the Canadian Pacific track. These cars could have been switched with proper management to the Canadian National and the Canadian National would have got the freight. The result has been that the profit has been eaten up by the Canadian Pacific Railway, when the stuff was hauled in Canadian National cars but carried on the Canadian Pacific road. The management said that they could not get cars. The same thing occurred in regard to potato and hay, farmers hauling their produce from alongside the St. John and Quebec road, and loading on the Canadian Pacific siding in Canadian National cars, having been told by the management that they could not provide Canadian National cars for their own road."

There is still another condition. This road is not built to its northern extremity and connected with the Transcontinental. Neither is it built into the port of St. John. It runs for the last ten miles to St. John over the C. P. R. down the west side of the river. Potatoes and hay shipped to St. John for export are loaded on the boats at West St. John, but owing to the fact that no sidings were provided

at West St. John for switching cars of freight for the docks to be loaded on the boats, it is taken to East St. John across the bridge at the reversible falls. I believe there is a toll on that bridge of 1 1/2 cents per 100 pounds. This toll has to be paid both ways. It goes to the yard in East St. John in the first place, and later, owing to the fact that the Canadian National Railways have no facilities for switching at West St. John, they pay the Canadian Pacific 3 cents a hundred for switching the cars back to the port of West St. John. They pay the Canadian Pacific Railway 3 cents terminal charges, because the Canadian Pacific does the switching and unloading."

I want to cite a concrete instance. Let us take a car of potatoes from Woodstock. The freight is 16 1/2 cents per 100 pounds from Woodstock to St. John, you have to pay the bridge toll of 1 1/2 cents a hundred each way, making a total of 30; 3c for switching, and then there is 3 cents for terminal charges. That brings the charges up to 36 1/2 cents, to be taken out of the 16 1/2, which leaves the St. John and Quebec Railway 7 1/2 cents, although they do all the hauling, except the switching on to the docks. They pay over to the Canadian Pacific 9 cents a hundred out of the 16 1/2 cents on every car of potatoes which goes to West St. John for shipment. These are things which should be remedied and could be remedied. I hope the minister will bring this matter to the attention of the management of the road."

We will admit they have taken this road out of politics. A private citizen cannot go to the management of this road and get them to do anything. For instance, a mill man who could not get cars on the St. John and Quebec Railway, on going to the Canadian National management, was curtly informed that there were no cars, although at the time Canadian National cars were being loaded on the Canadian Pacific track. I hope this matter will be brought to the attention of the management, and some effort made to have the bridge replaced north of Woodstock, so that the farmers and shippers who have potatoes that are perishable in storage may be able to get them shipped out before they are spoiled, because they will not be worth shipping by the 1st of July."

Mr. GRAHAM: I will bring the remarks of my hon. friend to the attention of the management tomorrow."

DELEGATION OFF TO FREDERICTON

Hartland, Woodstock, Florenceville,
Bristol, Bath all Send Representatives to Urge Government
to Build Electric Line

Today a large delegation of business men including representatives of the Hartland, Woodstock, Florenceville, Bristol, Bath and Fredericton, went to Fredericton to urge upon the government, which is in session, the building of a transmission line from Bridgewater to Woodstock by the New Brunswick Power Commission, the line to connect and take current from the plant of the New Brunswick Electric Co. to purchase its transmission line under arbitration."

The towns and villages of Carleton are in dead earnest in the matter and will strongly urge their claims. The people will endeavor to make as great use of electricity as possible if the current is supplied. The Woodstock Electric Power & Light Company is also much interested in the project, but until a few days ago the town of Woodstock as represented by its Council has not appeared to be very favorable. The Press said yesterday: "The Woodstock Council, by resolution, decided to send the members of the board, supplemented by a delegation from the Board of Trade, to protest against the proposed line, but protesting against the distribution of the current in the town by any private company, inasmuch as the town desires to distribute the power itself and has accepted the offer of the power Co. to purchase its transmission line under arbitration."

It is understood that the Woodstock Power Company is agreeable to selling out its plant to the town, and it is also the policy of the government, through the Power Commission, to distribute current only to municipalities and electrical districts and not to private companies."

It does not matter to the county at large how Woodstock's needs are met in the manner of local distribution, but the whole county is surely rejoicing in having the current brought down the river, whether by direct line from Aroostook Falls or by a connection at Bridgewater."

It is understood, of course, that the line when built will be a step towards distribution of Grand Falls current when power from there is available."

The Observer is sure that the government will give very favorable consideration to the proposal."

FOREST FIRES WORKING HAVOC

The Province Shrouded in Dense Pall
of Smoke by Fires Relentlessly
Fanned by Strong Winds

For three days the air has been heavy with dense smoke from forest fires in Maine, northern New Brunswick and Quebec. The long drought has made everything like tinder and high winds fan the flames beyond any possibility of control."

On Tuesday the buildings on the two old McGrath farms at Sixth Tier were destroyed and the woods were set afire. Also on Tuesday 43 buildings were burned at Red Bank near Newcastle."

There are no serious fires in Carleton County, but there are dangerous woods fires in different parts of Victoria and Madawaska."

Fredericton, N. B., June 11.—The federal authorities have been appealed to send a detail of Royal Canadian Mounted Police to Northern New Brunswick in an effort to stop the setting of fires by settlers along the inter-provincial boundary of New Brunswick and Quebec."

Edmundston, June 11.—A general spread of forest fires has occurred since last evening owing in part to a high wind which began this morning. The fire at Trout River has advanced about a mile, that on the Crochu has been spreading through, but to what extent is not known. A heavy smoke has been blown from the adjacent part of Maine and the fire was reported between Carleton and Van Buren. It was reported at the Canadian National office that the villages of Bluebell and St. Quentin were in danger of being wiped out."

Carleton, June 11.—Serious forest fire conditions existed tonight throughout the northern part of Aroostook county and the New Brunswick border country. Fanned by strong winds fires are spreading through the woods, dry as tinder after a prolonged drought. Almost hourly reports of new fires are being brought here. A force of twenty-five men was sent out from Stockholm late today to fight a fire in the woods at Blackstone Siding, Westmain and plantation. A call for help was received for a big fire that started at noon at Dalgie Brook, at the head of Cross Lake. Section men on the Bangor and Aroostook railroad are battling with a blaze at Mud Brook, half way between Van Buren and Stockholm, along the railway line."

The Presque Isle fire department has been called from country districts for help today. Fires are burning in Chapman and Marysville. Dangerous fires are reported at Kedgewick, between St. Leonards and Edmundston, N. B. Men have been sent from both places to fight the flames. Owing to dense smoke the men out lookout stations can see but short distances. They report fires everywhere. The fire at Blackstone Siding has burned through to Tangle Ridge and into the town of Periham. Men are working there tonight to save farm buildings."

Carleton, June 11.—Several calls from outlying districts and the entire force has been out all day."

Presque Isle, June 11.—Presque Isle was surrounded by forest fires tonight. Houses and farm buildings in the path of the fires were destroyed. The farm buildings of Hazel Kairstead and his son near here were burned today. The loss was estimated at \$20,000. Fires in Spragueville burned over 500 acres of times land and several houses in that section were destroyed. Farm buildings owned by Frank Moran were also burned. Fires are burning at Part Hurst six miles from here. A heavy wind all day fanned the flames and hampered the efforts of the fire fighters. The Presque Isle department answered five calls for help today. Bird Macey, driver of a fire engine, was badly burned about the face and hands while fighting one of the fires."

McMULLIN-DICKINSON

On Tuesday, June 5, Miss Mary Ruth MacMullin, youngest daughter of Mr. and Mrs. W. P. MacMullin of Hartland, was married to H. Bradford Dickinson, formerly of Hartland, and the Baptist parsonage, Detroit, Mich., by Rev. G. E. Dawkins. Many Hartland friends, among them The Observer staff, in the office of which the bride held a responsible position, wish the young couple much happiness."

How many days might lose their gloom,
How many nights their sorrow,
If we should wait to criticize,<
Until a kinder tomorrow?

A night of changes hate to love;
A taunt, if let unspoken,
May change to sympathy and cheer,
And keep a heart unbroken.

Tenting To-Night

We have been tenting a lot of nights on the old camp ground, that is at the old home, sweet home, waiting for winter to come and it seems that the waiting is about over for the present. Many of our good people will be tenting on that other old camp ground along the banks of our beautiful cool streams. They are still cool and, as you know, the fish are all the better for that. If the fishermen wish to keep cool they should take along a case of Sussex Beverages, Grape Juice or Fruit Syrup and we will refund for all cases and bottles, full or empty, returned. We can also supply you with ice going or coming. The beer is guaranteed to keep any length of time, but that guarantee is off the ice.

Don't forget to register and don't think too hard of the Government for asking you to register. They are only trying to protect the forest and the fish for your use and for my use and those to come after us.

LOCAL AND PERSONAL ITEMS

"Concert", a film story, completely showing up the vanity and vexation of spirit, according from the over-development of the particular phrenological bump of that designation, was enjoyed by patrons of the theatre on Tuesday evening. William Davidson in the leading role played through the first three reels, the part of a convicted man whose main fort was an air of braggadocio which he cultivated. After submitting to several scornful insults he was brought back to a real human, possessing genuine re-taliating, fighting blood, by a clever ruse on the part of a friend, and the last reel was full of bonny fights, when he got back in good measure on all his former battles. A Fox news added to the show. Saturday evening a Goldwyn super-special "The Sin Flood" was shown. The presence of such stars as Helena Chadwick, Richard Dix, James Kirkwood, Ralph Lewis, and others was proof enough of the worth of the picture. This film was well outlined in the advertising columns of this paper before. Suffice it that the flood scenes, were most excellent, and the human touch, when all men's thoughts turn to good in times of extreme danger, was well brought out. A recent Pathé news reel was also shown. Read the advertising for this week's films elsewhere in the Observer.

"It is an ill wind, that blows nobody good," but the only people we see making much out of the manifest slothfulness, are those who are running motor trucks at so much per.

The good people are hoping however that the road won't be as many years getting through as it was the first time.

PUPILS MAY COM-
PETE FOR MEDAL

The Editor of The Observer expects to be absent from the office until June 25. For next week's issue the pupils of the high school are given the opportunity for practical work in newspaper making by contributing items to our local page. Any pupil may contribute. Copy paper will be supplied at the office and items should be handed in before six o'clock each day, commencing tomorrow. Every page of copy should have writer's name on the back of it. Next Wednesday the locals may be handed in not later than nine o'clock in the morning. All of the copy will be preserved for examination by the editor upon his return, and to the one who in his judgment shows the best news writing talent, he will award the annual Observer Silver Medal.

A similar contest was carried on last year and Carl Rigby was the winner. We would suggest to the public that the news items we particularly desire and a record of those who go elsewhere for a visit or to stay; or of those who come from elsewhere for a short or long visit or to stay; marriages, births, deaths, serious illnesses, fires, accidents, town improvements noticed, etc.

Of course the same events may be reported by several contestants, in which case the best will be chosen. It is not necessary that a contestant hand in copy every day, but they should hand it in the day they get it and always before six o'clock. Remember the office is closed every noon hour.

GRAND FALLS HYDRO

Not only will hydro-electric development save coal, which needs to be conserved, but the cheaper power will increase the number of industries, perform many arduous tasks for the farmer as well as the urban dweller, and add immensely to the comfort of all the people. It is said by some that we in New Brunswick cannot afford to develop Grand Falls. Did Canada, in the old days, say it could not afford to build the Canadian Pacific Railway across the unsettled prairies? She knew the business would come—and the railway made it possible. Let us have continuous development in New Brunswick. It means industry and wealth.—St. John Times.

USE CARE IN
BURNING SLASH

The customary spring burning of slash in New Brunswick may soon become a thing of the past. Forestry officials, to whom the safety of the province's forest resources are entrusted, are seriously considering the necessity of thus reducing a serious fire hazard which has recently been again brought to the attention of the entire province in the destructive fires which have been largely attributed to this source in northern New Brunswick.

While spring burning is conducted now under restricted regulations requiring permits after May 15th, those in close touch with the situation claim that carelessness is still in evidence, while there are those who are always ready to "take a chance" in evading the law. The most recent example of this has been brought to the attention of the Department of Lands and Mines in connection with the fires of last week which have been concentrated in Madawaska, Restigouche and Gloucester counties.

An investigation of the causes of these fires show that in many instances slash burning and clearing fires were started without the permits required, while one prosecution under the Criminal Code has already been instituted for wilfully setting a fire. This is the first prosecution of this nature, the maximum penalty for a conviction being 14 years imprisonment.

Burning in the fall under conditions which reduce the fire hazard and also under the proper supervision is considered as the only proper solution of this subject.

MRS. EDWIN LIPSETT

The death occurred last evening of Mrs. Edwin Lipsett at her home at Waterville. She was stricken with paralysis on Friday morning and never regained speech or full consciousness. She was 55 years old and before her marriage was Helen Gray, a sister of Charles Gray of Waterville. She is survived by her husband and four children—Mrs. Harry Birmingham (Beatrice) of Victoria, Frank and Gerald at home, and Mrs. Kenneth McLean (Thelma) of Woodstock. Mr. Lipsett was in Massachusetts at the time his wife was taken ill but arrived home the next day. Many friends will feel deep sympathy for the afflicted family.

WOODSTOCK YOUTH
DIES WHILE WORKING

Woodstock, June 11.—Ralph True, aged 19 years, while working on the C. P. R. section under Thomas Abbott six miles south of Hartland dropped dead at 3 o'clock this afternoon. The body was brought to Woodstock by the express and Coroner Foster held an inquest.

He is survived by his mother, Mrs. Charles True, two sisters, Mrs. Murray Reynolds, and Miss Pearl True, four brothers, Geo. B. Ellis, Lewis and Herb True all of Woodstock.

SUMMER SCHOOL

Remember and plan for Woodstock Summer School, August 20 to 27.

There is no development of the modern vacation more welcome or delightful than the provision of Summer Conferences which allow one to put a heart into one's holiday. They give young people an opportunity for the maximum of fun and social pleasure, combined with the maximum of profit and inspiring memories. Woodstock has no bigger event this season than this Summer School, in the last week of August. There are only three of the same kind in Eastern Canada, and it is for all the Protestant churches of central and western New Brunswick, including Fredericton and St. Stephen.

For eight days some of the greatest leaders and experts in the field of religious education and activities will conduct an intense course of lecture and conference in the morning, social recreation in the afternoon, with picnic tea on the island given by all the different churches of the town, and inspirational addresses each evening. The fee is only \$3.00 and local hostesses are entertaining all visiting delegates with the additional nominal charge of \$1.00 a day.

There should be delegates and especially young people from every Sunday School in the four counties. Morning and evening sessions will be held in Woodstock Methodist church. Further information can be obtained from C. W. Manser, Woodstock, N. B. or Rev. W. C. Macdonald, Fredericton, N. B.

CHILDREN'S DAY

At the Hartland United Baptist Church

The observance of Children's Day by the Christian church has come to be an important day in the calendar of the church. The origin of the day is shrouded in uncertainty. The purpose of the day is to emphasize anew the importance of the child in the work of the church. Our Lord put special emphasis upon the child when He set him in the midst of the disciples and asserted that the interests of that life were so sacred that in the realm of moral values the forces which have to do with the child's well-being stand in the very forefront of divine interests. From that day to this there has been, in the church, a growing consciousness of the value of the child. The march of Christian progress is seen in the increasing and rational attention paid to the spiritual well-being of the child.

On Sunday morning a special Children's Day service will be held at the Hartland Baptist church. The main body of the church will be reserved for the Sunday school. The pastor, Rev. G. F. Bolster, will give a special illustrated sermon entitled "The World's Bread Market" and the junior choir will provide special music. At 2:30 a Children's Day program will begin in the auditorium to which the public is invited. In the evening the pastor will preach on the subject, "Sodom, Gomorrah and Hartland."

CORRECTING A FALSE
ACCUSATION

Editor Observer: Some statements have been made to the effect that I have attempted to beat one William Cummings in reference to the Boyer property bought by him. I desire to place the facts before the public as I have done business in this town too long to lie under an unjust accusation.

I held a mortgage on this property and several years before the property was bought by Cummings a discharge of the mortgage was drawn by Mr. Hayward, my Solicitor, and left with him to be handed to the Boyers whenever it should be required by them. When Mr. Cummings bought the property from the Boyers, but the fact that the discharge had been given was overlooked at that time, as it had been executed several years before.

On Mr. Cummings' inquiry as to the title he was advised by Mr. Hayward to have it searched. The mortgage was discovered, whereupon I immediately signed the Boyer deed so as to give Cummings a clear title on the records, and the discharge in question was in Mr. L. Hayward's safe at that time with other papers belonging to Mrs. Boyer. I did not think I was signing the deed to discharge the mortgage as I had discharged it years ago and felt that I had no more claim on the property. If I had known at the time I signed the deed it was to give a clear title I could have told Mr. Hayward that the discharge was in his safe. I have Mr. Hayward's authority for referring to him for proof of the matters stated herein.

Yours very truly,
Allen Bradley

Insomnia

"Nothing seems more wonderful to me than Tanlac," is the high tribute paid the medicine a few days ago by Mrs. Jeannette Ganey of 25 Ontario St., W. Montreal.

"For five or six years I had been in bad health, suffering from indigestion, palpitation of the heart and extreme nervousness. I could get no restful sleep, and was in such a deplorable condition I was absolutely discouraged.

"Seeing what others had to say about Tanlac I decided to try the medicine myself, and it was one of the best decisions I ever made. Why, the treatment has relieved me entirely of indigestion and palpitation, and has made my nerves perfectly calm and my sleep sound and restful. My health is just splendid now, and I have as much strength as I ever did in my life. It's a pleasure to recommend Tanlac after all it has done for me."

"Just Around the Corner," shown at the Neighborhood Theatre on Saturday night was a powerful, sentimental with a heart appeal as powerful as that of "The Old Nest." Such things happen in Hartland—happen everywhere every day. To see it portrayed as it was on Saturday evening is sobering.

A BOYS' PILGRIMAGE TO ALASKA

George E. Buchanan and the fifty boys he will take to Alaska.

S.S. "Princess Louise"

Between Vancouver and Skagway the Canadian Pacific steamer "Princess Louise" passes through hundreds of miles of such beautiful sheltered waterways as this.

The wonderful totem poles of an Alaskan Indian village.

GEORGE E. BUCHANAN, a Chatham, Ont., boy who is now a prosperous coal dealer in Detroit, attributes his success largely to an offer made him when he was a boy that he would have a trip to Europe if he saved up a third of the cost. The offer was made by a friend who promised to lend a third provided George's father lent the other third, the loans to be repaid when George could afford to do so. Here was a real incentive for saving, and when the trip was made it proved of an educational value that has stood him in good stead all his life. Last year Mr. Buchanan made a trip to Alaska, and the idea occurred to him of making the same kind of offer to other boys that he had himself enjoyed in his own youth. But the trip should be to Alaska and not to Europe. As soon as he made the announcement, he was inundated with applications, and a large party of Detroit boys has already been booked to sail from Vancouver on the Canadian Pacific steamer "Princess Louise" on July 14th. Mr. Buchanan will personally conduct the tour which he is thus helping to finance. He says that such a trip would have been worth \$50,000 to him if he had taken it him-

self in his own boyhood because of its educational and broadening influences. The Rev. Lynn Harold Hough, pastor of the Central Methodist Church, William Livingston, president of the Dime Savings Bank, and Circuit Judge Joseph A. Moynihan have endorsed Buchanan's scheme as an unusual opportunity for boys to learn the value of thrift and industry. But the trip will have still other benefits, as Mr. Buchanan has said. These boys cannot cross the continent and take that wonderful trip up the island-sheltered waters of the Pa-

BAXTER WANT C. N. R. TO TAKE ROAD

Ottawa, June 1.—A resolution to extend until Dec. 31, 1925, the time for the completion of the St. John & Quebec Railway between Centreville and Andover, N. B., was passed in the House of Commons this afternoon and a bill based on it was put through all its stages and given a third reading. Hon. G. P. Graham, Minister of Railways, explained in committee on the resolution that this railway company was organized by an agreement of the Province of New Brunswick and the Dominion in 1916. It was owned by the province and the part of the line already completed was being operated by the Canadian National Railway.

Hon. J. B. Baxter, Conservative, St. John, asked whether the Minister had a concrete proposition from the province for the completion of the road. The province had assumed the burden of the St. John Valley Railway because the National Transcontinental had not followed the most fertile route in the province. It would be wise, Mr. Baxter believed, for the C. N. R. to take the road over and complete it, relieving the province of the burden. The completion of this road would give the C. N. R. a shorter route from Montreal to St. John than it now had from Montreal to Portland.

Mr. Baxter contended that the \$1,500,000 which would perhaps be needed for the extension would be of great benefit to the people who would be served. He asked if the National Railways Board had made any recommendation on the matter, and further if the Province of New Brunswick, which was the railway company in this case, could not be given an unlimited extension instead of having to come back time after time until it could build the road.

Mr. Graham replied that there was a tendency on the part of the provinces to urge the Dominion Government to take over railways and other properties on which there did not appear to be any hope of escaping loss. He knew of no recommendation that the Government take over this road, but since it had been operated by the Canadian Government Railways both the province and the railway company had lost money on it.

"Thank God for Tea! What did the world do without it—how did it exist? I am glad I was not born before Tea."

Thus wrote the brilliant Sydney Smith in the early days of the nineteenth century, and countless thousands have echoed his sentiments since. But if Sydney Smith could so enthuse over Tea as it was then, what would he say of it to-day, when science in growing and art in blending have brought your cup of Tea to such a high point of perfection.

And what would he think of to-day's cost? At an incomparably lower price you are able to enjoy Tea of a deliciousness Sydney Smith never knew or imagined.
