DISTRICT AND GENERAL

The Presbyterian General Assembly will meet at Port Arthur next year.
East Lambton Conservatives have nominated W. R. Dawson, of Inwood, for the Legislature.

Much damage by frost was reported from different parts of London township last week.
Leamington council has reduced the license fee on billiard tables from \$50 to \$30 on each table.

Purchase prices on a carload of horses shipped to Montreal from Dutton ranged from \$55 to \$150.
Miss H. Castleman and Miss C. E. Vrooman, of the Dutton high school staff, have resigned their positions.

The Haron & Erie Mortgage Corporation has taken over the Dominion Savings & Investment Society at London.
The marriage took place in London on June 14 of John McMillan, of Dunwich, and Miss Agnes McKay, formerly of Dutton.

One thousand people from all parts of the United States and Canada are expected to attend the annual rally of the Graham clan at Springbank Park, London, today.
A. E. Springstead, B.S.A., 1922 graduate of the O. A. C. Guelph, has been appointed a district representative of Middlesex county to succeed Clayton Fry.

The death occurred on Wednesday at the home of her sister, Mrs. Alex. Buchanan, Campbellton, of Miss Margaret Clark, at the age of 26 years, after a lingering illness.
Burglars looted the barber shop and pool room of Homer Lewis at Lucan a few nights ago, getting away with cigarettes and tobacco valued at \$60 and about \$8 in cash.

A general appeal will be made by the Presbyterian Church in Canada Thanksgiving for a special offering of \$30,000 to wipe out existing deficits in the church funds.
Results of the departmental and matriculation examinations will not be furnished the daily papers this year, but will be sent to the principals of high schools, who will hand them to the local press.

All Saints' Church, Strathroy, was crowded to the doors on the morning of June 14 to witness the marriage ceremony of Miss Stella, daughter of John Gallagher, of London, to Wm. P. O'Brien, of St. Thomas.
The Ontario Government has purchased liquor to the amount of \$6,625,000 for its dispensaries in about two and a half years. There must have been more illness in the province than people were aware of.

Early potatoes in Kent county are being attacked by what is known as the blister beetle and in some localities considerable damage is being done. In the Bleunheim district much of the crop has been destroyed by the beetle.
At a big Campbell reunion at Clarendon Mrs. Margaret Campbell, of Brooklee, aged 78 years, and John D. Campbell, of Lobo, aged 90 years, were the oldest couple present.

A large number of the clan from Alvinston section attended.
While Mr. and Mrs. John Hale, of Florence, were out motoring a humber was lighted upon Mrs. Hale. Mr. Hale attempted to brush it off and in so doing lost control of the car, causing it to swerve into the ditch. Fortunately no one was seriously hurt.

One misfortune after the other has come to Clarence, son of Chas. Sifton, of Metcalfe. Three weeks ago he fell and broke his leg. This was followed a week later by pneumonia, and a few days ago a beautiful little colt, a full sister to that wonderful trotter, "Maygo," the property of Clarence, was killed by lightning.
An interesting find was made on a farm near Leamington recently when the plow turned up what has every appearance of being a small petrified musk melon about 3 1/2 inches long and 6 inches in circumference. The melon is perfect in formation, has a texture of a hard brick and shows a flesh color where the rind is broken.

During the last fiscal year the Dominion Government received from income tax returns approximately \$80,000,000, which is a considerable increase over the preceding year, when the returns only amounted to \$50,000,000. The business profits tax, back collections on which were made brought in an additional \$22,000,000.

Forty gypsies, of Serbian extraction, alleged to have committed thefts in the vicinity of Morpeth, and generally to have terrorized the residents of that section of the county, were rounded up by a posse, headed by the high constable. Several charges of theft were preferred, but the gang was allowed to go on promises to leave the community at once.

Mrs. Margaret McPherson, relict of the late Dugald McPherson, died last week at West Lorne in her 80th year. She was the youngest daughter of Colin Ferguson, one of Aldborough's early pioneers, and was born on the old homestead near Eagle. Her father was one of the first of the hardy Scotch settlers who cleared out their homes in the Talbot settlement. He landed at Port Glasgow in the summer of 1818.

U. F. O. CELEBRATION STRATHROY, JULY 1st

The championship relay race is causing intense interest. Teams are already in training in all parts of West Middlesex.
This is the biggest single-day race meet ever put on in Canada.
Big money always brings the best horses.

Remember, there will be three baseball games! Strathroy, Appin, Lobo and Walkers, old-time rivals, will struggle for supremacy.
The ladies of St. Paul's church, Kerwood, are determined that no one will go away hungry. Excellent meals in the horticultural buildings at moderate prices.

People stating that they are not coming to this great celebration are only joking. They simply can't stay away.
The committee have done their best. Now do yours by attending with all your family.

Three years ago we started with one cent in the treasury, but we have done many things since.
One enthusiast has stated that they will want us to tackle the national debt next.

Come early and stay late. You will be tired but satisfied.
If you have an ounce of Scotch blood in your veins come and hear Jock Ballantyne, the great Scottish tenor.

W. C. T. U. CONVENTION
The county W. C. T. U. convention, held in the Presbyterian church, Wardsville, June 14 and 15, was pronounced the best ever. Opening at 10 a.m. Wednesday, the executive committee, with Mrs. Potter, county president in the chair, (Mrs. Potter took charge of the meetings throughout.) The devotional exercises were led by Mrs. Hooper, of London. Minutes of last convention and appointment of standing committees were followed by noonday prayer, after which luncheon was served in the music hall.

At 2 p.m. devotional half-hour was led by Mrs. (Dr.) Husser; then election of officers, resulting as follows: Honorary presidents—Mrs. Gordon Wright, Mrs. May Thornley, Mrs. Jones; president, Mrs. Potter, Wardsville; vice-presidents—1st, Mrs. T. T. George, Parkton; 2nd, Mrs. Hooper, London; 3rd, Mrs. Aldred, Glencoe; cor. secretary, Mrs. D. Ellwood, Wardsville; treasurer, Mrs. R. Thomas, Mount Brydges. Then followed a selection by Mount Brydges Mrs. Longfield, Mrs. Ramsey and Miss Ramsey, Mrs. Jones, London, gave a short address on "Scientific Temperance." "The Mormon Menace" was spoken on by Mrs. Harrison, London, and Mrs. Gordon Wright gave a beautiful talk on "The Power of Prayer."

The mass meeting in the evening filled the large church. The opening was taken by Rev. C. D. Farquhar, London. Law enforcement was urged by Mrs. Wright as one of the most important attainments to be achieved, and the protection of the boys and girls should be an incentive to every mother to join the W. C. T. U. The Rodney ladies' quartette—Mrs. Bennett, Mrs. Gray, Mrs. Hillman and Miss Mistle—delighted all with a fine selection and responded to a hearty encore. Miss Phinn, soprano, London, gave two beautiful solos.

Miss Pearl Shaw, Wardsville, a splendid reading. Mrs. Harrison, head of the social service work in London, brought vividly before all the necessity of keeping our boys and girls pure, and gave examples of personal work in which youths are saved from public courts by a little motherly help. "No boy is bad," is Mrs. Harrison's belief, and she works to this end. Motions of appreciation were moved by Rev. Mr. Murphy and seconded by D. L. Purcell, brought a splendid meeting to a close.

Thursday morning sessions were opened with devotional exercises led by Mrs. Mill, Strathroy. Reports, plans of work and committees were formed for the year's work. Mrs. Potter, county president, was a popular choice for representative to the Dominion and provincial conventions.

The county convention will be held in London next year.

PROMOTION EXAMINATIONS, GLENCOE HIGH SCHOOL

Names arranged alphabetically.
Second Form.
1.—On the year's work—Lillian Campbell, Rheta Christner, Helen Gillies, Idelpha Johnson, Margaret McDonald, Florence McEachren, Marion McKelvie, May Moore, Ruby Munson, Clara Thomas, Alma Watts.
2.—By examination—Lewis Joiner (algebra), Harold Loosemore (Latin), Stanley Hyndman (Latin, French), Alex. Munro, Wm. Quick, Catharine Lawrenson, Sara Mitchell, Margaret McNabb, Elva Sutton (Latin, French), Thelma Watterworth (geometry).

Where subjects are placed after candidates' names it indicates failure to make standing in that subject, and a subsequent examination must be written, the time and place of which will be determined by the candidate's success at the departmental examinations and the course he desires to take.
First Form.
1.—On year's work—Olive Black, Isabel Cameron, Wm. Diamond, Ethel George, Hector McLean, Sherman McAlpine, Anna McRae, Fred McRae, Nuala Stuart, Alex. Sutherland, Eleanor Sutherland, Kathleen Twiss.
2.—By examination—John Allan, Marguerite Allan, Wm. Anderson, Mildred Beales, Murray Cameron, Vesta Gast, Margaret Gates, Vera Henderson, Verna Henderson, Ian McArthur, Doris McLean, Ella McLean (French), Emma Reycraft, Pearl Robinson, Gladys McEachren, Wm. Trestant, Marvin Watterworth.

The following pupils failed to make standing in algebra. Should they be successful in the departmental examinations or otherwise merit promotion, a special class in this subject will be arranged for a few weeks during the fall term, at the close of which a supplemental examination will be held.
Wm. Coultis, Oscar Eaton, Delbert Hicks, Allison Joiner, Robert McKellar, Rod Stuart, Homer McDonald, Mary Simpson, Mabel Wright, Newton Machie.

MUNRO—GRAHAM
The home of Mr. and Mrs. Dan A. Graham, Ekfrid, was the scene of a pretty wedding on Saturday afternoon at 2 o'clock, when their only daughter, Anna May, was united in marriage to Dugald W. Munro, son of William Munro, of Mosa, by Rev. D. G. Paton.
The bride was charmingly gowned in white tulle, with a white and gold veil embroidered with orange blossoms, and carried a corsage bouquet of Ophelia roses. Five pretty little flower girls—Norene Innes, Sarah Munro, Alice Watterworth, Mary and Margaret Dobbie—were becomingly attired in white and strewed roses in the path of the bride as she was about to be given in marriage by her father, Mrs. Ross Watterworth, of St. Thomas, played the wedding march.

After the ceremony the guests sat down to a sumptuous dinner. A unique feature of the wedding cake was the fact that it was crowned with the top story of the bride's mother's wedding cake, bearing date 1896.
The large number of substantial wedding gifts testified to the esteem in which the young couple are held. They left amid congratulations and good wishes, to spend their honeymoon in Muskoka. The bride's travelling costume was a suit of apple green knitted silk crepe, with hat to match. On their return they will reside on the groom's farm in Mosa.

Among the wedding guests was the bride's grandmother, Mrs. John A. Dobbie, in her 86th year, and friends from London, St. Thomas and Detroit.
DOMINION DAY
Saturday of next week is Dominion Day and a public holiday. Glencoe stores will be closed—a fact which the public will do well to remember and do their usual Saturday shopping on Friday.

FOR CARNEGIE LIBRARY
A joint meeting of the Municipal Council, the Library Board, the Board of Trade and the Daughters of the Empire on Tuesday evening was enthusiastic for the Carnegie Library for Glencoe. Suggestions having been made that the library might be combined with a memorial hall planned to be built by the Daughters of the Empire, it was stated on behalf of that society that they were not prepared to entertain the proposition. A resolution was then passed that the library board and the council secure from the Carnegie corporation the necessary plans for one of their \$5,000 buildings and submit the same to contractors for their estimate of the total cost of such a building erected in Glencoe.

WABASH TRAIN WRECKED
A serious wreck occurred on the main line of the Wabash on the diamond at Tillsonburg and the loss is estimated at \$50,000 to the company. The accident is thought to have been caused by a car jumping the track in the centre of a long refrigerator train, and before the engine could be brought to a standstill 14 cars had been piled up in the air. Fortunately no one was hurt. Butter and tobacco were strewn along the track for 300 yards.

THIRTY HORSES ENTER RACES

Sporting Event Best of its Kind Ever Held in Glencoe.
Big purses held out for the annual race meet in Glencoe Wednesday of last week attracted a field of thirty trotters and pacers—several from long distances.
The program called for three races, but owing to the large number of horses entered for the 250 class this event was divided into two sections, A and B, and the directors increased the purse by \$125, making the total for the three events \$1,025.
Every race was a clean trial of speed and the spectators were highly satisfied. Gate receipts showed only a fair attendance, considering the excellent afternoon's sport.
Winners are as follows:
2.18 class—Wm. Brino, Cummings & Martin, Chatham; Maygo C. Sifton, Cairngorm; Queen Mary, R. Smith, Glencoe; time, 2:16 1/4.
2.25 class—Hindenburg, Uri Pierce, Strathroy; Belgo, T. H. Hadley, Denfield; Jessie Bars, R. Smith, Glencoe; time, 2:24.
2.50 class, A—Dr. B. Alex. Belore, Mr. Elgin Tomico, D. Laughton, Appin; Orange Bars, Uri Pierce, Strathroy; time, 2:19 1/4.
2.50 class, B—Lady Angeline, D. Denny, Kerwood; Victory Bond, P. Campbell, Lawrence Station; Peter Mac, J. McDonald, Sarnia; time, 2:29 1/4.
The horse show held in connection with the races brought into the ring a fine bunch of carriage, roadster and fancy drivers.

In the evening the handsome dramatic company played "A Pair of Sixes" to a well-pleased audience at the opera house.

PROVINCIAL HIGHWAY LINK

Elgin County Council Declines Request of Deputation
St. Thomas, June 19.—The request voiced by the influential deputation from the counties of Elgin, Middlesex and Lambton, on Friday, that the Elgin county council designate the Aldborough and Dunwich townships as a provincial county highway connecting with cross-section road from Sarnia to St. Thomas, was not entertained by the council in session Saturday afternoon. The members considered the time inopportune for designating a highway of that type which would require the expenditure of a considerable amount of money for improvement. It was pointed out that the provincial government has about all the highways on its hands that it can handle for some time.

STANDING OF BALL LEAGUE

During the week the following games in the West Middlesex Baseball League have been played:
At Delaware—Glencoe 7, Delaware 11.
At Newbury—Appin 8, Newbury 2.
At Glencoe—Delaware 8, Glencoe 7.
At Appin—Newbury 4, Appin 4.
Present standing of league—Delaware, won 5, lost 1; Appin, won 3, lost 3; Glencoe, won 3, lost 4; Newbury, won 1, lost 4.

Hear Miss Agnes McPhail, Canada's first lady federal member of parliament, on Webster's lawn, at Strathburn, on August 10th. Good program and booth. Harold Currie, Strathroy, chairman. Watch for further particulars.

DIED IN 104th YEAR

After a short illness, there passed away on Friday, June 9th, probably the oldest resident of this part of Ontario, in the person of Mrs. Thos. Foster, of Metcalfe, who had passed her 103rd birthday. She was a native of Ireland, being born in Monaghan county in 1819. Her maiden name was Margaret Whitcraft and she was married in Ireland to the late Thomas Foster. Several years afterwards she came to Canada, settling with her husband in Hog's Hollow, Little York, now part of the city of Toronto, coming to Metcalfe about 70 years ago, when the township was largely brush. Her husband died in 1876 and she leaves one daughter, Mrs. J. W. Smith, of Alvinston, and two sons, Isaac J., of Brooke, and J. T., who lives on the homestead, also eleven grandchildren and thirteen great grandchildren. Another daughter, Mrs. James Patterson, predeceased her.

METCALFE COUNCIL

Meeting of Metcalfe council held May 29th. Members all present.
On motion of Woods and Bennett the usual orders were paid.
Moved by Woods and Bennett that any person asking to have their dog struck off the assessment roll agree that they will not keep a dog that year.
Moved by Woods and Blain that the request of Jas. Grosvenor to have the Cadman drain repaired be granted.

METCALFE COUNCIL

On motion of McNaughton and Blain the assessment roll was accepted as revised and the assessor paid.
Moved by Woods and Bennett that the usual grant of \$50 be made to the Strathroy fair for 1922.
Council adjourned to June 26th at 1 o'clock.
Harry Thompson, Clerk.

Methuselah lived to be 939, but he never dodged ants.

The Cow Puncher

BY ROBERT J. C. STEAD.

(Copyright The Mueson Book Co.)

Synopsis of Preceding Chapters.

Dr. Hardy, famous specialist, and his daughter Irene, meet with an accident while on a motoring trip in the foothills of Alberta and find a refuge in the cabin of the Elden ranch where dwell David and his dissolute father. Dr. Hardy's broken leg is mending and this is David and Irene's last evening together.

CHAPTER III.—(Cont'd.)

They reached an open space. Something black—or was it red?—lay on the ground. Dave bent over it a moment, then looked up to her white, clear face, whiter and clearer than ever since witnessing the strength of his hate.

"It's your lame calf Brownie," he said, as calmly as he could. "Half cut up. Wolves, I guess."

He saw her eyes grow slowly larger in the moonlight. Without a word she sank to her knees. He saw her fingers about her head, burrowing in her hair. Then she looked up, over the black trees, to the sky with its white moon and its few great stars.

"The poor, poor thing," she breathed. "The poor, innocent thing. Why did it have to die?"

"It's always the innocent things that suffers," he answered.

"Always the innocent things," she repeated mechanically. "Always—"

She sprang to her feet and faced him. "Then what about the justice of God?" she demanded.

"I don't know nothin' about the justice of God," he answered, bitterly.

"All I know is the critter at can't run gets caught," he said.

There was a long pause. "It doesn't seem right," she said at length.

"It ain't right," he agreed. "But I guess it's life. I see it here on the prairies with everythin' that lives."

Everything is a victim, some way or other. Even the wolves at tore this little beast 'll go down to some rancher's rifle, maybe, although they were only deen' what nature said."

He guessed it's the same way in the cities. The innocent being hunted, and the innocent they are the easier they're caught. An' then the wolves begin off, an' sayin' it was only nature."

The girl had no answer. No one had ever talked to her like this. What was this country boy knowin'? And yet it was plain he did know. He had lived among the fundamentals.

"I guess I was like that, some," he went on. "I've been caught. I guess a baby ain't responsible for anything, is it? I didn't pick my father or my mother, did I? But I got to bear it."

There was something near a break in his voice on the last words. She felt she must speak.

"I think your father is a wonderful old man," she said, "and your mother must have been wonderful, too. You should be proud of them both."

"Reenie, do you mean that?" he demanded. His eyes were looking straight into hers. Once before she had faced her with that question, and she had not forgotten.

"Absolutely," she answered. "Absolutely, I mean it."

"Then I'm goin' to say some more things to you," he went on, rapidly. "Things at I didn't know whether to say or not, but now they've got to be said, whatever happens. Reenie, I haven't ever been to school, or learned lots of things I should 'a' learned, but I ain't a fool, neither. I know at when you're home you live thousands of miles from me, but I know at in your mind you live further away than that. I know it's like all the prairies an' all the oceans were between us. But I know, too, that people cross prairies an' oceans, an' I'm wantin' to cross. I know it takes time, an' I'll be a slow traveller, but I'm a mighty persistent critter when I start out. I didn't learn to break all those bottles in a day. Well, I can learn other things, too, an' I will, if only it will take me across. I'm goin' to leave this old ranch, someway, jus' as soon as it can be arranged. I'm goin' to town, an' work. I'm strong; I can get pretty good wages. I've been thinkin' it all over, an' was askin' some questions in town to-day. I can work days an' go to school nights. An' I'll do it if—"

"I'll do it if—it'll get me across. You know what I mean. I ain't askin' no pledges, Reenie, but what's the chance? I know I don't talk right, an' I don't eat right—you tried not to notice, but you couldn't help—but, Reenie, I think right, an' I guess with a girl like you that counts more than eatin' and talkin'."

She had thought she could say yes or no to any question he could ask, but as he poured forth these plain, passionate words she found herself enveloped in a flame that found no expression in speech. She had no words. She was glad when he went on.

"I know I'm only a boy, an' you're only a girl. That's why I don't ask no pledge. I leave you free, only I want you to stay free until I have my chance. Will you promise that?"

When in Toronto visit the Royal Ontario Museum

253 Bloor St. West, near Avenue Road
Largest permanent exhibition in Canada. Archaeology, Geology, Mineralogy, Paleontology, Zoology. Open daily, 10 a.m. to 5 p.m. Sunday, 2 to 5 p.m. Bloor, Delt Line, Dupont and Avenue Rd. cars.

"Ain't we? But that's gone an' done; that old life's all busted, an' of a sudden, like a bolt, Bursell an' run cut. I got a big job on now, an' yet can't take no part. You jus' got to get out. You're gone, see?" He sold horse and saddle for sixty dollars and took a room at a cheap hotel until he should find work and still cheaper lodgings.

In the evening he walked through the streets of the little cow town. It was not altogether new to him; he had frequently visited it for business or pleasure, but he had never felt the sense of strangeness which oppressed him this night. In the past he had always been in the town as a visitor; his roots were still in the ranch; he could afford to notice the ways of the town, and smile to himself a whimsical smile, and go on. But now he was throwing in his lot with the town; he was going to be one of it, and it stretched no arms to welcome him. It snubbed him with its indifference. . . . He became aware that the gathering twilight in the great hills had never seemed so vague and empty as the dusk of this strange town. He realized that he had but one friend in the world; but one, and of her he knew not so much as her address. . . . He began to wonder whether he really had a friend at all; whether the girl would not discard him when he was of no further use to her just as he had discarded his faithful old horse. Tears of loneliness and remorse gathered in his eyes, and a mist not of the twilight blurred the street lamps now glimmering from their poles. He felt that he had

treated the horse very shabbily indeed. He wanted old Slop-eye back again. He suddenly wanted him with a terrific longing—wanted him more than anything else in the world. For a moment he forgot the girl, and all his homesickness centred about the beast which had been so long his companion and servant and friend. (To be continued.)

Engines Made From Sand.

Modern science produces all kinds of things from the most unlikely sources but, even so, one would hardly expect to see important parts of a steam engine made from sand dug up from the sea-shore.

Cast-iron of excellent quality is now being made from the iron sands that abound on the shores of New Zealand. On over a hundred miles of coast there are millions of tons of this iron sand, but it is only during the last few years that it has been utilized.

The raw material—a heavy black sand—is shovelled into an electric furnace; purifying materials, such as limestone, are added, and the electricity is turned on. The electricity flows through great carbon rods, weighing nearly half a ton each, and makes an arc, or electric flame, in the furnace.

Under this flame the sand soon melts, and the heavy, molten iron sinks to the bottom of the furnace, whilst the lighter impurities float as a scum on the surface. At intervals the electricity is shut off, the whole furnace is tilted forward, and the iron runs into a ladle, from which it is poured into the moulds.

Woman's Interests

Woman's Work at the National Exhibition.

The interior of the Women's Building at the Canadian National Exhibition will have quite a new aspect to visitors to the fair of 1922, just as the interior of the Educational Palace will offer many surprises to the needlewoman who has sufficient foresight to send to the offices in the Lumsden Building for a copy of it before planning her contribution to the various competitions.

With a view to presenting every aspect of the work of Canadian women, the upstairs room, formerly devoted to the amateur art of both men and women, has been given over to the work of Canadian women in the artistic professions. Its walls will be hung with the portraits of our musicians and composers and paintings by our artists, while the bookshelves will be lined with books by our own women writers, and the show-cases piled with handicrafts and the like.

With the same object, needlework, which has for years occupied the centre of the stage on the main floor, has had to give a turn to other phases of women's activity formerly neglected. In many new wall-cases space has been found for the linens and embroideries that formerly occupied two large cases in the middle of the central room. These cases have been removed and in their places a series of demonstration booths arranged where practical demonstrations will be in progress throughout the Exhibition fortnight, showing what Canadian women are accomplishing along lines of household science, home industry, business, handicraft, needlecraft and philanthropy.

Within the covers of the Educational Prize List, now obtainable from the offices of the Canadian National Exhibition in the Lumsden Building, will be found many other innovations, knowledge of which will be most essential to all exhibitors of women's work. Old exhibitors will be in danger of finding their work disqualified if they fail to study the changes, and new ones will find new opportunities to test the skill of their needlecraft.

Prizes for new ideas in almost every class offer scope for the inventive and the artistic.

Several entirely new classes have been added, too, including one for the civilian blind, one for Ukrainian women and children to encourage their continuance in this country of the artistic handicrafts, examples of which have been shown in the Women's Building from year to year; one in cookery for brides and one for girls of 16 to 20 years. Formerly these younger cooks had to enter into competition with seasoned housewives. Now the classes for the practical cook have been reduced in order to give the bride and the young girl a chance.

Canning Peas.
Peas for canning should be young, tender, well grown and picked when in best condition for table use. Pick in the early morning or on a cloudy day; never after the sun has shone on them for several hours. If the peas can not be canned immediately, place them in a cool, damp place where they will keep crisp. Shell from the pods and can immediately.

Blanch from five to ten minutes in boiling water (five minutes if tender, ten minutes if old). Cold dip, then pack in jars, add boiling water (equal to each quart (from one to 1/2 teaspoonful of sugar may be added, if desired). Adjust the rubber and top

and partly seal. Sterilize from two to three hours in the hot-water bath, or one and one-half hours in a water-seal outfit, or under ten pounds of steam, for forty-five minutes in pressure-cooker. Remove the jars, tighten covers and invert to cool. Examine for leaks. Store in a dark, cool place.

Blanching is done by placing the peas in a fine wire basket colander, a square of cheese-cloth, or a cloth bag, then dipping in boiling water for from five to ten minutes. This partly cooks the peas, thus shrinking them, removes some of the gluey substance which coats them, and if properly done prevents cloudy liquor. It also turns the old tough peas yellow, thereby making them easy to pick out. A small amount of bicarbonate of soda—one-fourth of a teaspoonful to a ten-quart kettle of water when blanching—will aid in retaining the green color.

Plunging the container of blanched peas into cold water for a few seconds makes the peas firmer and more easily handled. Sometimes one tablespoon of salt is added to each quart of water for cold dipping.

Pack peas firmly in the jars to within one-half inch of the top. If too full some of the peas will burst and make the liquor cloudy. Sterilize by any method for the length of time indicated. Count time after the water starts boiling, if water-bath is used.

"Cloudy peas," that is, a cloudy appearance of the liquid, does not usually mean that the peas are spoiled, but is a result of the product having been roughly handled in blanching and cold dipping, or of split or broken peas not being removed before packing. Blanching of peas that are too old may split them and cause a cloudy liquid. Frequently "cloudy peas" are caused by the use of very hard water.

"Flat sour" peas is a product having a disagreeable odor and sour taste, although showing no signs of spoiling. This is due to standing too long before canning or cooling off too slowly. Too much salt may develop a sour taste, also.

Green peas (and beans) are superior in nutritive value to other green vegetables due to large nitrogen content, which builds up bodily tissue and furnishes energy. They also contain much mineral, chiefly lime and potassium salts.

The Tired Housewife.
"You have nothing to do but housework. I don't see why you should always be so fagged at night," her husband complained.

Her overtaxed patience snapped. "I'll show you how many steps I take!" she cried. "I'll prove to you how hard 'nothing but the housework' can be."

That was how the Tired Housewife came to buy her pedometer.

A pedometer is a little watch-like machine that measures the distance you walk just as a speedometer shows the distance an automobile goes. You adjust it to the length of your stride, hook it to your belt and it registers the job of each step.

The Tired Housewife found that in one average day's work about her house, she had taken 27,840 steps, or had walked nearly eight miles! This, of course, did not count the hours of standing or the labor done with her hands. At that rate she could have gone around the world in less than ten years.

This pedometer test called the Tired Housewife's attention to the fact that she was taking a great many steps unnecessarily.

A great proportion of these steps

Get Some —energy and iron

NEVER mind the weather—get some new vitality—speed up any way. Don't be a lagger.

Vital men resist the heat. Let little raisins help. 75 per cent pure fruit sugar. 145 calories of energizing nutriment in every package—practically predigested so it gets to work almost immediately.

No tax on digestion so it doesn't heat the blood. Fatigue resisting food-iron also! All natural and good.

Try it when you're slipping—when you yawn at 3 P.M. Stiffens up your backbone and makes thoughts flow again.

Two packages and a glass of milk form greatest mid-day lunch you've ever tried.

Little Sun-Maids

Between-Meal Raisins
5c Everywhere

—in Little Red Packages

were taken in a large, badly arranged kitchen.

And so, when her husband built the long-planned addition to the house, he turned the old kitchen into a living room and built his wife a brand-new model kitchen, arranged to save steps.

A Sunny Shower for the Bride-To-Be.
The invitations are on yellow paper or cardboard, cut round to represent the sun. The guests should be instructed to bring something yellow for this miscellaneous sunny shower.

When the guests arrive, the gifts are all concealed, and the party divided into two sides for charades. After a couple of words have been acted, the bride's side chooses the word Yellow, and announces to the opposing side that it rhymes with "mellow." The other side, of course, has been previously informed of all this. They first act out "below" and "fellow" and then come in laden with all the "yellow" packages and lay them before the bride.

There are any number of yellow gifts which would appeal to an engaged girl: yellow bowls for the kitchen, yellow towels, a centrepiece done in yellow, a guest-towel or bath-towel with yellow border, a yellow cretonne luncheon set, a yellow apron, yellow bon-bon dish, yellow pitcher and sugar bowl, seeds of yellow flowers for the garden, lingerie in yellow crepe-de-Chine, even dainty yellow handkerchiefs.

The centrepiece for the table might

be either a bowl of yellow blossoms, or a large ball made of yellow crepe paper to represent the sun. For place cards, regular shower cards in the shape of parasols and umbrellas come in different colors. These should be procured in yellow if possible. If these cannot be found, get place cards with old-fashioned girls in yellow dresses, or a small yellow flower in the corner.

If light refreshments are to be served, these must also carry out the yellow idea.

Bee Supplies
Beekeepers will find, by looking up our catalog, everything needed for the production of honey.

Great Britain's winter temperatures would be 30 degrees lower but for the Gulf current.

FORGET IT!

By Dr. Frank Crane
The World-Famous Journalist, Philosopher, and Preacher.

It's over now. It's done. Forget it! Don't forever be raking it up, thinking it over, wishing you had done differently. Forget it!

What's done's done. It's down in the bottomless pit of the past. Let it be!

Look ahead, not behind! Think of tomorrow not yesterday! You can make something of to-morrow; yesterday is beyond recall!

Yesterday's as dead as a door-nail, as lifeless as a brick, as hopeless and unchangeable as wood. Turn from it!

To-morrow's alive, pregnant with beauty, radiant with power, bulging with all conceivable possibilities. Turn to it!

"Forgetting those things which are behind, and reaching forth unto those things which are before," is the way one of the greatest souls of earth described his attitude.

For the past is dead. The future is life. From the past come up despair, remorse, self-contempt, until the high star is quenched in murky cloud.

Forget it, boy! You've brought tears to the eyes of her that bore you, and anguished care to your mother, than whom none in heaven or earth has greater love. But she will thank it no more if you only come back, put your face on her blessed knees, and let her love unfold you.

Forget it, woman! You've sinned. Out of your weakness you have plucked loathing, and out of your waywardness, shame. But it's done. Look not back at it. Look forward, to where One stands, One who, though He be judge of all the earth, says: "Go, and sin no more!"

Forget it, man! Take her back into your arms. What is love worth that cannot forgive? What is love worth that is not mightier than pride? Forget it! In the streets of heaven you will never blush to think you have forgiven too much.

Forget it, wife! I know it means heartache and humiliation and dry-tipped care; but climb up, climb up the steps of grandeur, till you reach the stage of that love which "beareth all things, believeth all things—and never faileth."

Once in that mountain air of nobleness you will not regret the troubled valleys of pride.

Forget it, Everybody! Every up-springing sun brings a new chance to all the sons and daughters of men. Every swelling moon means a new month of opportunity. Every star of the innumerable stars, sand-strewn on the dusky blue of night, is a star of hope.

Electrical Energy and Our Water-Powers.

The beneficial service rendered to Canada as a whole by a centralized system of cooperation to investigate and survey our hydraulic resources, such as organized by the Department of the Interior and gradually extended during the past twelve years, is demonstrated with greater force from day to day. The intimate connection between water-power and electrical energy is recognized throughout the world, and applies to our Dominion perhaps more than to any other country. Over 90 per cent of the electricity produced in Canada is derived from water-power and, naturally, any facility or incentive afforded aimed at the sound and adequate development of water-power will reflect directly on the electrical progress of the country. The ever-growing value and absolute necessity of electricity to our present civilization are pointed out in a recent address by Dr. C. P. Steinmetz in New York:

"Just as the railroads seventy-five years ago organized the transportation of materials, so the transmission of energy, to turn our wheels and fetch and carry, is being supplied by the electrical industry. Great factories, which make electricity and supply it as other factories supply stoves or bats, have come into being. Electrical energy is the only kind that can be ducted to the centres where it is needed, whether in small quantities for the vacuum cleaner or the house lamps or in huge masses for great mills and factories."

Quaint Chinese Oratory in Prince's Welcome.

Quaintly worded was the address of welcome to the Prince of Wales from the Chinese community of Hongkong during his visit there. It spoke of him as drawing nigh in princely array, and said: "Long have we looked up to your Royal Highness and now we welcome you to this plain the rain; with one accord we spin forth our feelings of gladness and fashion our hymn of praise." Referring to the fact that the heir apparent of the British throne was on his first visit to the East, the address stated: "This meet that the streets and the lanes resound with acous; high and low, the people dance with gladness; the willows that droop their heads along the banks joyfully brush the royal banner; the nightingales that fill the earth with flying blossoms join in welcome to the princely palanquin."

IRELAND'S CONNECTION WITH CROWN ESTABLISHED ON DOMINION BASIS

Draft of New Irish Constitution Completed at Negotiations in London Between the Imperial Cabinet and Delegates from Dublin.

A despatch from London says:—The draft of the new Irish Constitution, made public on the eve of the Irish elections, gives, as the document itself states, force of law to the Anglo-Irish Treaty, and expressly declares that any provision of the Constitution or any amendment thereto or any law enacted under the Constitution which is in any respect repugnant to the treaty shall be void and inoperative.

The Constitution thus embodies connection with the British Crown, as already established in the treaty, and generally places the relations between Ireland and the Empire on the same basis as Canada and the other Dominions.

The Constitution requires every member of the Free State Parliament to subscribe faith and allegiance to the Constitution and swear to be faithful to the King in virtue of the common citizenship of Ireland and Great Britain and Ireland's membership in the British Commonwealth of Nations.

The document contains 79 articles and is considered an up-to-date instrument, not only granting female suffrage, proportional representation and a referendum to the people, but also empowering the people themselves to initiate legislation. It gives to the Chamber great powers with respect to money bills, without control from the Senate, thus duplicating the position as between the British House of Commons and the House of Lords.

It exempts the Free State from active participation in war without the consent of Parliament, except in the case of actual invasion, and gives the Irish Supreme Court the fullest powers, only stipulating for the right of citizens to appeal to the King-in-Council against the Supreme Court's decision.

It provides for freedom of religion and conscience, gives Free State citizens full protection against the arbitrary powers of courts-martial, and extends to Parliament exclusive control over the armed forces, as stipulated in the treaty.

PRESIDENT SUN OBLIGED TO FLEE

Canton Regime At An End, Says General Chen.

Amoy, China, June 18.—The President's residence in Canton has been taken by the troops of General Chen Chung-min. Dr. Sun Yat Sen is supposed to have made his escape on board a gunboat.

Canton City was bombarded Saturday afternoon by five gunboats under command of Sun Yat Sen. The residents deserted the city. There were only a few casualties. The soldiers of the invaders did considerable looting, although there was no disturbance inside the foreign concession.

Sun Yat Sen's army in Kaing-Si is reported to have been defeated. It is reported he is awaiting the arrival of his defeated army, when an attempt will be made to retake Canton. Chinwangtao, June 18.—The leaders of General Wu Pei-fan and Chang Tso-Lin's forces have signed an armistice, and the firing has stopped. General Chang's troops will withdraw outside the Great Wall. The Chinese troops will not pursue them, but they have surrounded Shanhsikwan as a precaution against treachery.

Pekin, June 18.—Gen. Chen Chung Mign, formerly Civil Governor of Kwantung Province, whose troops seized Canton Friday, announced yesterday that the South China, or Canton Government, had been terminated and that henceforth Canton would unite with the north in recognizing the old Republican Parliament.

Veterans' Bodies Unite as British Legion

A despatch from London says:—The Canadian High Commissioner has been approached by the British Empire Service League with the object of having the veterans' organizations of Canada become members of the league and appoint a permanent delegate. Canada is the only Dominion which has not joined the league, which includes all the ex-service men's organizations of Great Britain and the Empire. Lord Haig is chief organizer. All the different veterans' bodies in Britain are now uniting as the British Legion.

Canada Enters U.S.-British Pact

Washington, June 18.—Accession of Canada to the Convention of March 2, 1899, between the United States and Great Britain, providing the regulation and transfer of real and personal property, was brought about yesterday at the State Department through signature of such an agreement by Sir Auckland Geddes, the British Ambassador, and Secretary Hughes.

The United States Government, it is stated on high authority, has and will have no official observer at The Hague meeting on Russian affairs.

MARCONI INVENTS APPARATUS FOR SENDING PRIVATE RADIO MESSAGES

A despatch from New York says:—"One party" radio telephone lines are a prospect for the immediate future. "Listening in" on private wireless conversation is expected to be made impossible.

So one will be able to radio just to whom one wants to talk and the conversation will be made more secret than that of the telephone.

William Marconi, inventor of the wireless telephone and telegraph, arrived here on Friday on his yacht Elettra, with a message that, when advanced yet made in radio telephony. It will put radio on such a sound commercial basis that, it is forecasted, it will rival the telephone in common use.

Mr. Marconi announced that he had perfected a system by which radio messages can be projected in any desired direction.

At present, radio messages are being broadcasted only, scattered in all directions.

An idea of the accuracy of Mr. Marconi's new device is given in the inventor's statement that he has sent messages 100 miles straight ahead, which were not heard, except at the receiver aimed at.

In time, Mr. Marconi said, apparatus will be perfected which will project radio messages with the accuracy that marks the transmission of the telephone or telegraph messages over wires.

ROYAL WEDDING HORSES SOLD

The pair of horses that were used at the wedding of Princess Mary were sold to a firm of funeral directors and undertakers. The horses were used to draw the coach in which the King and Princess Mary travelled to the Abbey, and are claimed to be the finest pair of Belgian stallions ever exported. They are jet black. The harness, decorated with the Royal Coat of Arms, was sold with the horses.

HIMALAYAS CLIMBERS MAKE GOOD PROGRESS IN CONQUERING PEAK

A despatch from London says:—Three of the British explorers who are attempting to climb Mount Everest have established a new record. Less than a week ago it was announced that one party of three had reached a height of 26,800 feet, which was 2,200 feet better than the climb the Duke of Abruzzi accomplished. The new record now achieved by another party of three, and reported in a despatch copyrighted by the Mount Everest Committee through the London Times, is 400 feet higher and brings the climbers within 1,800 feet of the top of the world.

Mount Everest, if conquered at all, must be conquered before the end of June. At this time the southwest winds and monsoon begin to impinge on the eastern Himalayas and they are so heavily charged with moisture that in one month as much rain falls on and around Mount Everest as falls in London in ten months.

Hon. Charles Bruce, who, with George Finch, has made this wonderful record, has devoted a lifetime to mountaineering and its problems.

A New Course in Household Science.

Following out its policy of providing every course of study for which there is a reasonable demand and of providing such instruction that Canadian students will not require to go out of Canada for any part of their education, the University of Toronto announces a new course leading to the degree of Bachelor of Household Science. This new course has been designed primarily for the benefit of women teachers who wish to proceed to a degree in Household Science without discontinuing their teaching for too long a period. For this reason those who proceed for the degree of Bachelor of Household Science are to take the first two years of the course of University Extension, while the third and fourth years are to be taken in regular attendance under the Department of Household Science. The new course is a direct outcome of the special short course which was held for teachers of Household Science last winter. So great was the response to the offer of that course that it was found necessary to make more comprehensive arrangements for teachers of Household Science.

EUROPE SPENDING LARGE SUMS ON ARMS

A despatch from Geneva says:—The League of Nations Armaments Commission has come to Geneva for its meeting. M. Viviani, representing France, is Chairman. Premier Brankiewicz, representing Sweden, and Great Britain is represented by Viscount Esher and Lord Robert Cecil. A report will be submitted proving that Europe is now spending more on armaments than in 1913, and this notwithstanding that Germany, Austria-Hungary and Bulgaria are practically disarmed, and despite the Washington Disarmament Conference and all the League of Nations labors. In League circles here the allegation against America is that she is the largest vendor of arms and ammunition, and sells these especially to countries where slavery still persists, thus making it impossible for civilized countries to abolish it. As for the lessening of European armaments, France has persistently put obstacles in the way of the League's Armaments Commission.

5,000 Miners Strike in Monmouthshire

A despatch from London says:—Five thousand miners went on strike on Thursday in Monmouthshire, and 2,500 each at Blaenavon and Pontypool, owing to certain members of the Craftsmen's Union refusing to join the Miners' Federation.

Germany Pays Instalment on Reparations

A despatch from Paris says:—Germany has paid the regular monthly instalment of fifty million gold marks for reparations. Deposits aggregating that amount were made in the designated banks in Paris, London and Brussels.

IRISH ELECTION RESULTS IN DEFEAT FOR DEVALERA PARTY

Pro-Treaty Candidates Leading in Returns So Far Announced—Lord Mayor of Cork Sustains Complete Overthrow in Favor of Labor Man.

Dublin, June 18.—Results of the election in Cork are believed to sound the death knell to the hopes of the Republicans securing heavily at the polls. The complete defeat of Lord Mayor O'Callaghan amazed the de Valerians.

Returns from Cork, which is regarded as the hot-bed of extreme Republicans, are:

R. Day, Labor candidate 6,836
Alderman William Roach, pro-treaty candidate 6,147
J. J. Walsh, pro-treaty candidate 6,097
Mary MacSwiney, anti-treaty candidate 6,066
Professor Beamish, Independent candidate 4,769
Frank Daily 3,043
O'Callaghan 1,807

The first four candidates have been declared elected to the Dail Eireann. As Mr. Day favors the treaty, the sister of the martyred Lord Mayor is the only anti-treaty member returned in Cork.

It was said here to-day that the Republicans would have made no showing at all had not Michael Col-

lins agreed to form a coalition government.

The Republicans have now lost two seats to the Free Staters. The Labor party is overjoyed, declaring that it will win at least four seats in Dublin. Organizer Feran, of the Labor party, said that he regretted that Labor was not represented by more candidates. De Valera is expected to make a statement to-morrow launching a heavy broadside against the constitution.

Everybody is convinced that de Valera's pact with Collins is now dead and that a coalition government is unlikely.

Belfast, June 16.—In Monaghan County the full Sinn Fein panel was returned in the elections. Those winning seats are Commandant-General O'Duffy, for the treaty, 7,298; Earnest Blythe, for the treaty, 6,069; Dr. McCarvill, against the treaty, 5,246.

The defeated candidate, Thomas McHugh, Independent, for the treaty, polled 4,073 votes. Dr. McCarvill replaces John MacIntee, a former member of the Dail, who also opposed the treaty.

Lenin Goes to German Sanatorium for Rest Cure

A despatch from Berlin says:—Preparations are being made for Lenin to come to Germany for a six months' rest cure at a sanatorium. It is learned from the most reliable source that a group of German physicians, headed by Prof. Forester and Prof. Kiemperer of Berlin, and Prof. Flechtig of Leipzig, told Lenin that a full cure was possible only with a half-year's rest. They told Lenin there was not a single decent sanatorium in Russia, and recommended several in Germany, one of which is in an suburb of Berlin. Lenin accepted the physicians' ultimatum of a six months' rest, and negotiations for his visit to Germany are under way. The chief question is his safety, and the sanatorium will be required to keep a battalion of guards during his visit.

British Machine Impervious to Shrapnel

A despatch from London says:—In seeking to devise an airplane which will be impervious to shrapnel and machine gun bullets and yet will be speedy the Air Ministry has produced a steel fighting machine which it claims is superior to any all metal machines yet produced. Experiments have been conducted at the Royal Aircraft Establishment at Farnborough for a considerable period and the planes are now being submitted to severe practical tests. The wings as well as the fuselage are built of corrugated steel. The main difficulty was to produce a fighting plane which would not be heavier than the wood machines, but it is stated that this has been successfully accomplished without loss of power. The machines are easy to manage and can safely make a loop. Authorities regard this as a big step forward in air warfare.

Wales Pays Lloyd George Unusual Honor

A despatch from London says:—The admirers of Premier Lloyd George in his home town of Criccieth now regard him to be such an important personality in the country's affairs that they extend him a distinction accorded only to the King. When the Prime Minister stepped off the train for the week and a flag was hoisted on Castle Hill bearing the Red Dragon of Wales on a green and white background. When he departed the flag was taken down.

It is stated that in the future the flag will always fly when the Prime Minister is in his residence at Brynawelton so the people when seeing the flag will say: "The Prime Minister is here."

Prime Ministers constitutionally have every right to have a flag flown where they are stopping, but for many years the ceremony has been observed only for the King. Friends of Mr. Lloyd George say he accepts the flag ceremony as a touching tribute of friendship from the home town folk.

Shackleton's Ship Has Arrived at Capetown

Cape Town, South Africa, June 18.—Shackleton's Antarctic ship The Quest, has arrived here, with all aboard well. The Quest sailed from London to the Antarctic region September 17 last. The vessel reached Gryvicken, a whaling station of South Georgia, on January 4, and the next day Shackleton died. He was buried at that place. A few days later the expedition sailed from South Georgia in search of Enderby Land.

Sometimes we take vengeance for our evil thoughts or actions by tyrannizing those around us.

Weekly Market Report

Toronto.

Canada From Coast to Coast.

Charlottetown, P.E.I.—The increasing popularity of Prince Edward Island as a summer resort is evidenced by the fact that reservations on the part of summer tourists this year is the largest in years and indications are that the island will have an unusually successful tourist season.

Halifax, N.S.—Investigations in the utilization of fish waste have been carried on in Nova Scotia under the direction of the Council of Scientific and Industrial Research. The experiments led to the establishment of a company in this province which is now engaged in working up this hitherto discarded material into cattle food, fertilizer, fish oils, thus establishing a new industry.

Grand Falls, N.B.—Four million salmon fry were hatched this spring at the hatchery here, and are being distributed through the waters of the province depleted to an extent each year from the toll of visiting fishermen. Ten thousand speckled trout were here placed in the Nashwaakus River.

Quebec, Que.—The Provincial Department of Agriculture, acting in accordance with legislation adopted at the last session of the Legislature, has already advanced \$100,000 to farmers in colonization centres for seed grain.

Sudbury, Ont.—It is reported that an important discovery has just been made in the West Shining Tree gold area, on the Hologden mines. A vein which measures approximately 25 feet in width has been uncovered on surface, the composition being well-mineralized blue quartz. Negotiations are now under way with a view to equipping the property with a mining plant and carrying out a scheme of operation.

Winnipeg, Man.—The total quantity of dairy butter produced in 1921 in Canada was 122,776,580 pounds valued at \$45,893,082. This is an increase in quantity over the previous year of 11,084,862 pounds. Increased production is shown by all the provinces with the exception of Prince Edward Island, the largest proportionate increase, 36 per cent., being recorded by British Columbia. In order of dairying importance the provinces rank: Ontario, Quebec, Alberta, Manitoba, Saskatchewan, Nova Scotia, British Columbia, New Brunswick, and Prince Edward Island.

Regina, Sask.—A total of 12,763,040 acres has been sold to settlers in Alberta and Saskatchewan under the Dominion Lands Act, according to Hon. C. Stewart, Minister of the Interior. Of this acreage 4,155,738 has been patented and 693,134 acres are not yet patented. The amount paid in for lands pre-empted is \$14,800,067, and there is yet unpaid approximately \$12,000,000. Purchased homesteads totalling 1,322,840 acres have been sold in these two provinces, on which the revenue was \$3,274,250, and on which approximately \$500,000 is yet unpaid.

Peace River, Alta.—That the Peace River country is capable of producing more wheat than the record production to date in the whole of Western Canada, is a statement made by the managing-director of the "Edmonton Journal" who has been touring the country. He further stated he had seen vegetables and flowers at Fort Vermilion 600 miles north of Edmonton, equal to anything he had seen in the gardens of Ontario. Wheat yields of 50 and 60 bushels to the acre were common.

Nelson, B.C.—The Consolidated Mining and Smelting Company has announced the immediate commencement upon the construction of a 500 tons concentrator at Kimberley. The plant will be ten times as large as the largest concentrator in the Kootenay country with the exception of that at Trail and will cost more than \$1,250,000. It is expected it will be ready for operation early in 1923.

Greatest Musician.

Two Lancashire boys were expatiating on the relative merits of their fathers as musicians.
"My father is the greatest musician in the town," said one.
"Oh!" the other said. "When my father starts, every man stops work."
"How's that?" said the other. "What does he do?"
"He blows the whistle for meals at the mill."

A Close Margin.

A teacher found it difficult to make a boy in his class understand a point in his lesson. Finally, however, he succeeded, and, drawing a long breath, remarked:
"If it wasn't for me, you would be the greatest donkey in this town."

The Difference.

"Now," said teacher, who had been giving a grammar lesson on singular and plural nouns, "what is the difference between 'man' and 'men'?"
Up shot an eager hand.
"Please," said Jimmy Green, "man is one men, and 'men' is lots of mans!"

To The Point.

"Will you take back this engagement ring?"
"Doesn't it suit?"
"Yes; but I don't."

Charles Dickens wrote a Life of Christ for his children, and left definite instructions that it should never be published.

Semi-Annual Clearing Sale AT J. N. CURRIE & CO'S

J. N. CURRIE & CO.

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—in Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townpeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc. A. E. Sutherland, Publisher.

One-cent postage stamps of straw color are soon to be issued by the Canadian Post Office Department. Postmasters are instructed to dispose of all one-cent stamps on hand as soon as possible. The department takes occasion to remind postmasters that they are not permitted to furnish information respecting names and addresses of patrons or former patrons of their offices. The number of cases where postal notes are filed in with lead pencil is increasing and postmasters are instructed that they must use pen and ink in filling in names and addresses because names written in pencil may be easily erased and others substituted.

The population of the various municipalities in Middlesex as given by the Ontario Bureau of Municipal Affairs for 1921 is as follows:—Ade-Laide 1,500, Biddulph 1,640, Caradoc 3,036, Delaware 1,099, Dorchester North 3,065, Ekfrid 2,095, Lobo 2,137, London Township 6,875, McGillivray 2,199, Metcalfe 1,145, Mosa 1,548, Nissouri West 2,384, Westminster 5,706, East Williams 1,033, West Williams 1,066, Ailsa Craig 535, Glencoe 779, Lucan 614, Newbury 283, Wardsville 215, Parkhill 1,194, Strathroy 2,654, London City 59,281.

Item No. 10 in the Budget resolutions, which would have prohibited the brewing of beer by anyone except a regularly licensed brewer, was struck out Saturday night at the request of the Hon. W. S. Fielding, who said that, as there had been abuses in the past in connection with the home-brew industry, he had come to the conclusion that the proposed remedy would, perhaps, be worse than the disease it was meant to cure.

FRUIT PROSPECTS GOOD

The present prospects for a good crop of all fruits are excellent in Western Ontario. All varieties of early apples give indications of a full crop, but winter apples, especially Baldwin and Spy, indicate only a medium crop. The weather conditions throughout the spring have been most desirable and have given the fruit growers a splendid opportunity to complete spraying at the proper time and under most favorable conditions. There has been practically no winter injury to fruit trees.

The big barn of Douglas Crawford, 8th concession, Caradoc, was struck by lightning, and barns, pens and drive-houses were destroyed. The horses were got out in time, but five pigs and fifty hens were burned. Mr. Crawford only carried \$600 insurance, which will reimburse him for contents destroyed, but the buildings are a total loss and will take about \$5,000 to replace.

There's one good thing about being a nobody. When you make an ass of yourself the newspapers don't send reporters for the particulars. "Do you know the nature of an oath, madam?" "Well, I ought to, sir. We've just moved and my husband has been laying the carpets."

Is not the best place to build monuments for oneself not in the graveyard at the end of our journey, but in the hearts of our brother mortals as we journey through life?

Two village worthies were discussing a mooted point in grammar as to whether a hen "sits" or "sets" when she takes to her nest. "Seems to me it's a heap more important," interrupted a bystander farmer, "whether she 'lays' or 'lies' when she cackles."

DETROIT

DUNLOP

CORD TIRES FABRIC

“There's something in the Quality of Dunlop Tires that's missing from other tires. Don't know what it is, but when I make that quick stop I know instantly I have Dunlop Tires on!”

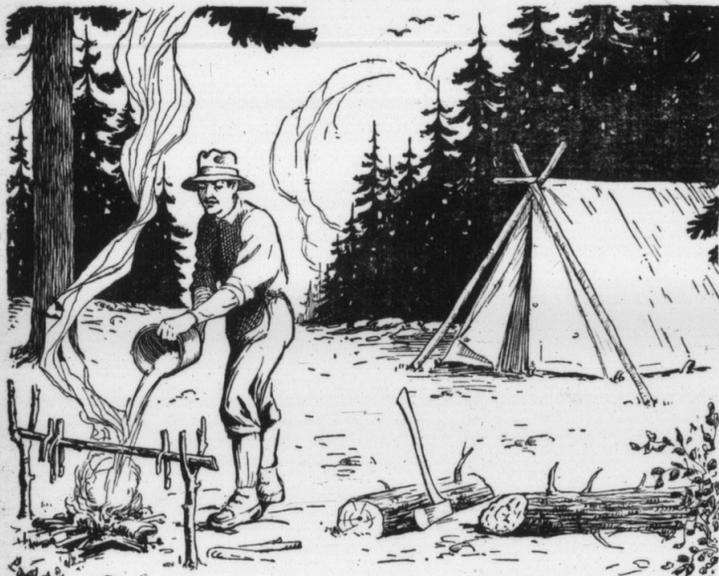

One motorist thus spoke for himself. He really was speaking for thousands of car owners.

Live Rubber and Best Egyptian Cotton go into Dunlop Cords and Fabrics. No shoddy, no skimping. The day of the short-mileage tire is gone; the day of the high-mileage tire is here; and when "tire-mileage" is up for discussion now, you find the word "remarkable" generally precedes a reference to DUNLOP.

DUNLOP CORD TIRES DELIVER THE MOST MILEAGE—ARE SAFEST TO USE

CAMPERS

ONTARIO'S forest wealth is dwindling. Every year forest fires take disastrous toll. Careless campers cause eleven per cent. of Ontario's forest fires. Last summer 112 cases of neglected camp fires were reported. This summer be careful.

Save Ontario's Forests They're Yours

DON'T

- DON'T take chances with fire in Ontario's forests.
- DON'T throw away cigarette or cigar butts, pipe "heads" or burnt matches until you are dead sure they are out.
- DON'T neglect to drown out your fire with lots of water.
- DON'T build your camp fire against a rotten log or stump nor on windy points; nor near moss patches; nor at the base of a tree.
- Build it in a former fireplace, or on a flat rock, or on a spot cleared down to the true soil below, or by the edge of the water.
- DON'T forget that the upper layer of ground in the forest consists of partially rotted wood which will burn.

When you build your fire to make tea, fry bacon or add cheer to pipe and story-telling time, use a woodsman's precautions.

The real woodsman builds his fire on an old fireplace, if there be one handy. Failing that he scrapes away all litter, moss and fibrous rotted wood down to the mineral soil, or the bare rock, and preferably some place close to the water. He knows that if fire gets into the moss or the upper woody layer of forest soil, or in a half-rotted log or stump, it "holds over," burns away unnoticed underneath, and unless followed up and carefully put out, is liable to break into a flame later. He knows how hard it is to put such deep-smouldering fire out. So he makes his cooking fire surprisingly small and compact, and chooses a spot that is absolutely safe.

It is a mark of his finished woodsmanship how thoroughly he drowns his fire out with plenty of water when he is through with it. Save the forests. You may want to camp again.

Everywhere you go in City, Town or Village, you see the Chevrolet Service Sign—The sign that means competent mechanics, low priced genuine Chevrolet parts and reasonable charges for repairs and adjustments.

"Chevrolet Service" Is Not Just A Name—It's A Fact."

CHEVROLET

N. & A. M. GRAHAM
Dealers - Glencoe

sale on the undermentioned premises, on FRIDAY, JUNE 30, A. D. 1922, at 1.30 p. m., the following real estate:—

The east half of the north half of lot number eleven in the first range south of the Longwoods Road in the township of Mosa, containing fifty acres more or less.

This property is well situated on the Longwoods Provincial Highway, about two and one-half miles east of Wardsville, and is convenient to church and school. The soil is a

sand loam. It is all cleared and has on it a frame house and frame barn and other improvements.

Terms of sale of real estate:—One-tenth of the purchase price to be paid at the time of sale and the balance within two weeks thereafter.

There will also be offered for sale at the same time and place the following personal property:—1 horse, 2 milch cows, 1 yearling steer, 1 mow, 1 binder, 1 plow, 1 two-furrow plow, 1 set iron harrows, 1 corn cultivator, 1 fanning mill, 1 hay rack,

1 set of small scales, 1 set of team harness, 1 set of light double harness, 1 lumber wagon and gravel box, 1 cream separator, about 50 bushels of oats, a quantity of corn on the ear, forks, shovels, and other articles; 1 clock, 4 tables, 1 bureau, 1 cupboard, 1 cooking range, 1 heating stove, other household articles.

Terms of sale of personal property—Cash.

Elinor Theresa.

TOWN AND VICINITY

Campbellton annual garden party
will be held on July 14.
Mr. Suttler was enjoying green
peas from his garden last week—the
earliest, we believe, on record.
Reeve McPherson was in London
on Saturday attending a meeting of
the Mother's Allowance Board.
The annual picnic of the Glencoe
Book Club will be held at Spring-
bank Park Wednesday, July 5th.
Rev. Robert Stewart, of Dutton,
was elected moderator of the London
Presbytery at its summer session
held at Fort Stanley Tuesday.
R. F. Howard & Son, formerly of
Glencoe, have sold out their business
as funeral directors in Edmonton
and will locate in Port Huron or De-
troit.
The annual installation of officers
of Glencoe Masonic Lodge will be
held on Monday, June 26. Installing
officers from Chatham will have
charge.
The wool raiser is certainly not
responsible for the high price that
is still asked for a suit of clothes, if
one considers the low price he gets
for his wool.
Miss Grace Blackburn (Fan Fan)
addressed a regular meeting of the
Glencoe Book Club held at the home
of Peter McArthur, Ekfrid, on Mon-
day afternoon.
Several local investors in oil wells
in Texas received word last week
that a 1,000 bbl. a day well had been
struck on the lease in which they
are interested.
Look out for the big orchestral
concert on July 7th in the Glencoe
skating rink—the largest orchestra
that has ever appeared in any small
town in Canada.
In the second year faculty of arts
results of Toronto University, pub-
lished last Thursday, Miss Marion
Huston, of Glencoe, was listed as re-
ceiving full pass standing.
The death occurred at his home at
Mount Bruges on Sunday of Chas.
E. Bateman, a well-known resident
of that section. The funeral was
held on Tuesday to Strathroy ceme-
tery.
Epworth League anniversary ser-
vices were held in Glencoe Methodist
church on Sunday when Rev. M. C.
Parr, of Appin, delivered two spend-
id sermons of special interest to
young people.
Lorne and Lella Haggith, of New-
bury, aged three and four years,
were seriously injured in Detroit
Sunday night when an auto in which
they were riding with their parents
was struck by a street car.
J. A. Raeburn has just completed
boring a deep well on the bowling
green property, securing an abun-
dant supply of excellent water at a
depth of 200 feet. The water rises
to within 20 feet of the surface.
W. Johnston, of Bothwell, has
bought a portion of the old Amer-
ican hotel in Glencoe, and is tearing
it down and moving the material to
that town. This is one of Glencoe's
old landmarks, built by the late Don-
ald McRae.
A largely attended meeting of the
local auxiliaries of the Women's
Missionary Society of London Pres-
bytery was held in the Glencoe
church yesterday afternoon. The
feature of the occasion was an inter-
esting address by Mrs. McEachren,
London, treasurer of the society,
who gave her impressions of the
convention recently held in Ottawa.
Estimates on unemployment cover-
ing eight of the nine provinces of
the Dominion to Saturday, June 10,
show what labor department officials
consider a remarkable decrease in
the number of men out of work at
the present time. In some parts of
the Dominion, in fact, there is stated
to be a demand for men for seasonal
work, such as small fruit picking,
which it is impossible to fill at pres-
ent. Ontario had the greatest num-
ber of unemployed, estimated at
10,511.

The Saturday night moving pic-
ture shows have been discontinued.
Mr. Cunningham, the manager, who
has been handling this attraction,
claims that the expense of operation
leaves too small a margin of profit
to warrant continuance of the shows.
This was a Saturday night attraction
that was greatly appreciated by a
large section of the community, and
at the same time produced a hand-
some revenue for the town exchequer
from rentals.
A delightful garden party was held
on the Methodist church lawn Fri-
day evening, under the auspices of
the Junior Mission Band. An inter-
esting program consisted of selec-
tions by the young folks' orchestra;
piano solo, Miss Pearl George;
reading, Miss Mayne Grant; ad-
dress, Rev. T. J. Charlton; violin
and cello selection, Misses Helen
and Virgie Clarke and Carrie Smith;
vocal duet, Misses Betty and Mayne
Grant; vocal solos, H. K. Charlton,
ice cream, strawberries and other
refreshments were served at a booth.

—Mrs. Dave McLean, of Dauphin,
Man., is visiting her aunt, Mrs. D. J.
Mitchell.
—Mrs. Donald McIntyre, of Wind-
sor, is visiting her sister, Mrs. A. E.
Sutherland.
—Mr. and Mrs. J. A. McKellar and
daughter Marjorie, of Aylmer, were
week-end visitors in Glencoe.
—Mr. and Mrs. Archie Balmer and
daughter Mary, of Thamesville,
spent Sunday at D. J. Mitchell's.
—T. A. Craig was at Owen Sound
last week attending the annual meet-
ing of the Oddfellows' Grand Lodge.
—Dr. and Mrs. Charles Treastin
and daughter Maxine, of Battle
Creek, Mich., are visiting Mr. and
Mrs. Dan Treastin.
—Mrs. P. D. McCallum and daugh-
ter Audrey left last week for their
home in Regina, after spending the
winter in Glencoe.
—Mr. and Mrs. B. F. Clarke and
daughters Helen and Virginia, ac-
companied by Miss Anna Clarke, of
Toronto, leave Friday from Windsor
on the Huronic for a trip to Duluth.
—Recent visitors at Dr. McLach-
lan's were Dr. Alfred J. Grant and
Mrs. Grant and daughters Patsy,
Betty and Nora, of London; Mr. and
Mrs. M. B. Stafford, of Sheddin, and
Mr. and Mrs. H. E. Stafford and
daughter Eileen, of St. Thomas.

PRENUPTIAL SHOWER

On Friday evening, June 9, a very
enjoyable social was held at the
home of Mr. and Mrs. Dan A.
Graham when about 75 friends and
neighbors gathered to do honor to
Miss May Graham upon her ap-
proaching marriage. During the eve-
ning a most musical program was
given, including violin selections by
Archie McFarlane and Fred McGill,
assisted by Miss Miriam Oxley, and
vocal solos by Sid Hartley and Clar-
ence Eddie. Short addresses were
also given by Lachlan Leitch and
A. Berlan. At the conclusion of the
program May was asked to come for-
ward and was presented with a mis-
cellaneous shower of beautiful and
valuable gifts. A delectable lunch was
then served by the ladies, and the
party dispersed after singing "Auld
Lang Syne."

THE WESTERN FAIR

Several thousand prize lists and a
lot of advertising material of differ-
ent kinds have just been mailed from
the Western Fair offices to exhibi-
tors and others throughout Ontario
and other points. The dates for the
big exhibition, containing 900 ex-
hibits and preparations have been in
progress for months so that every-
thing may be in readiness for the
opening day. Several new features
may be noticed in the prize list in
the infant department, one espe-
cially being a yearling feeding
competition. Any boy or girl who is
a resident of Canada, between ten
and eighteen years of age, may com-
pete with their yearlings. The calf
feeding competition will also be of
special interest. Send for prize list,
entry forms, etc., to the Secretary,
A. M. Hunt, General Offices, London.
One of the most effective vermi-
fuges on the market is Miller's Worm
Powders. They will not only clear
the stomach and bowels of worms,
but will prove a very serviceable
medicine for children in regulating
the infant's system and maintaining
it in a healthy condition. There is
nothing in their composition that will
injure the most delicate stomach
when directions are followed, and
they can be given to children in the
fullest assurance that they will utterly
destroy all worms.
Dutton council turned down all
tenders for the proposed memorial
hall in that village, for notwithstanding
the downward tendency of labor
and material, the figures presented
for the different work were consid-
ered excessive. The amount voted for
the undertaking was \$18,000, but the
building would greatly exceed this,
according to the tenders received by
the architect.
Be well and strong. Be full of life
and energy. Tanlac will do this for
you.—P. E. Lumley.

APPIN

A large number attended the gar-
den party at the Methodist church
here on Monday evening. Straw-
berries and ice cream were served,
after which there was an interesting
program consisting of vocal solos,
duets and trio, violin selections and
readings. Laughton's four-piece or-
chestra furnished excellent music
throughout.
Miss Jeanetta Lotan, nurse in
training at Victoria Hospital, Lon-
don, is spending the holidays at her
home here.
Mrs. J. A. McKellar, of Aylmer,
visited at Neil Galbraith's last week.
Mr. and Mrs. John Macfie, Mr. and
Mrs. Nichols, Mrs. Herman Galbraith
and Misses Jeanetta Lotan, Gertrude
Lotan and Helen Macfie attended the
graduation exercises at Alma Col-
lege, St. Thomas, on Tuesday even-
ing, when Misses Margaret and Mar-
ion Macfie received their graduation.
Miss Margaret Macfie received her
A.T.C.M., the highest degree that has
ever been given in Alma College.
At Appin, Methodist parsonage,
June 10th, Miss Rose Philips, eldest
daughter of Mr. and Mrs. Albert
Philips, and George Seburn, of Mel-
bourne, were united in marriage by
Rev. M. C. Parr.
The regular meeting of the Wom-
en's Institute will be held at the
home of Mrs. James Allan on Thurs-
day, June 29, at the usual hour. All
the ladies are cordially invited.

SCHOOLBOY'S FUNERAL

(From the Toronto Daily Star)
Noisy Clamor of a Thousand Child-
ren Ceases to Pay Respect for
Dead Pal
One of those little human incidents
which mark the spirit of brother-
hood which is abroad in the land
occurred yesterday afternoon just
prior to the funeral of sixteen-year-
old William Campbell, who died as
the result of being crushed by a
motor truck. At 1:30 the pupils of
the Secord school, at the foot of Har-
rington avenue, gathered in a thousand
strong, assembled in the playground,
boys on one side and girls on the
other. For the space of one minute
they stood in absolute silence, the
boys extending the virtues of the de-
ceased lad, a former pupil of the
school, and the little ceremony end-
ed.
The regular meeting of the Wom-
en's Institute will be held at the
home of Mrs. James Allan on Thurs-
day, June 29, at the usual hour. All
the ladies are cordially invited.

**EXECUTORS' SALE OF REAL AND
PERSONAL PROPERTY**

In the Village of Middlemiss, in the
County of Middlesex
The undersigned Executors under
the Will of Robert B. Campbell, late
of the Village of Middlemiss, in the
County of Middlesex, gentleman, de-
ceased, will offer for sale by Public
Auction on the premises, on SATUR-
DAY, JUNE 24, 1922, at 2 p. m., the
following Real Estate:
Village lots numbers 17 and 18 on
the south side of Main Street in the
Village of Middlemiss in George Mid-
dlemiss' survey of part of lot number
1 in the 6th range south of the Lon-
gwoods Road in the Township of Ek-
frid, in said county, containing one
half of an acre more or less.
This property has in good repair,
a small frame stable and other im-
provements, and is well situated in
the Village of Middlemiss.
Terms of sale of real estate:—One-
quarter of the purchase price to be
paid at the time of sale and the bal-
ance within two weeks thereafter.
There will also be offered for sale
at the same time and place the fol-
lowing personal property:—1 book-
case, 1 cupboard stand, 1 lounge, 6
chairs, 2 trunks, rocking chairs, 1
fall-leaf table, 1 coal oil stove, 1 air-
tight heater, 1 coal oil heater, 1
writing desk, 2 wash stands, lamps,
washing machine and wringer, pic-
tures, carpet, wash tub and board,
boiler, quantity of stovewood, 2 iron
beds, mattress and springs, weigh
scales, numerous other articles.
Terms of sale of personal property
—Cash.

"He's not in his office just now!"
How often have you put in a call for — say Mr. Brown
of the Robinson Machine Company — and when con-
nection was made, learned that he was out?
Because you asked for Mr. Brown, it cost you —
because of the extra service we rendered — about
20% more than if you had asked simply for the
Robinson Machine Company.
The majority of Long Distance users find that if they
put in a call for a firm — not for an individual — at
the lower Station-to-Station rate, they can always get
in touch at once with the particular person they pre-
fer to talk with, or with a deputy who will answer
the purpose.
Our gain will come when you appreciate the speed
and economy of Station-to-Station service. After
8:30 P.M. the evening rate on Station-to-Station calls
is only about one-half the day rate.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Cheaper Haying and Harvesting. There are three ways in which any farmer can do his haying, harvesting and threshing cheaper. He can use better methods, do away with poor management, and use the right implements or machinery.

To hitch those generalities to hard facts, take the matter of waste labor. Much labor is absolutely wasted in haying, harvesting and threshing. Many farmers believe that at haying time it is necessary to hire a bunch of extra men to get the hay into the barn. This may be true on some farms, but not always. The most successful farmer in our neighborhood never hires extra help at haying time, and he and his fifteen-year-old boy put up fifteen or twenty acres of timothy and clover every year. Sometimes hay-making is saddled on to the end of corn plowing, but that never seems to make any difference. Here's how he manages:

In the morning he cuts down several loads of hay. An hour or so later he goes over the hay with a tedder to "kick" the water out of it. By the middle of the afternoon the hay is ready to load. A hay-loader is hitched behind the wagon, the boy drives, a load is soon put on, and it is put into the barn with a hay-fork. The boy drives the team to the fork, while his father sticks the fork and trips the load in the barn. A little head-work enables them to put up in the afternoon all the hay cut in the morning. When the barn is filled, the same plan is used for cutting and tedding, but hay is drawn to the stack with a sweep-rake and thrown on the stack with a ricker. The boy runs the rake and his father does the stacking. If a stack must be left open at night, it is covered with waterproof duck.

Mowing machines that cut a wider swath will cut the cost of hay-making on some farms. The five-foot cut is a common size, but six, seven or even eight-foot mowers may be used to good advantage if time is any item. For instance, under average conditions, a five-foot mower will cut ten acres in ten hours; a six-foot mower will cut twelve acres; a seven-foot mower, fourteen acres; an eight-foot mower about sixteen acres. More power is required for the wider cuts. Many alfalfa growers are using the eight-foot cut with good success, and make a practice of mowing early in the morning before the dew is off, or even during a light rain. It is not necessary to wait until the dew is off before starting the mower, if the tedder is used. The size of mower used and the time of day it is started are important, especially when hauling is done only in the afternoon. The tedder and rake are big helps in making hay with a small crew.

In harvesting, as in haying, a great deal of labor is often lost. The biggest waste generally comes because the harvester is not put in repair until pulled into the field. Then every bearing must be oiled, the sprocket chains

Poultry

A good ration for young ducklings is a mash made of two parts cornmeal and one part bran, to which is added a sprinkling of grit and five per cent. beef scrap. They should have plenty of green food, such as lawn clippings or vegetables, and given a range where they can gather green food. Give fresh water in dishes deep enough so they can cover their nostrils with water when drinking.

Shade should be provided for ducklings. A lack of protection from the hot sun causes severe losses during the summer. The old ducks can be given a ration of equal parts of bran, cornmeal and boiled vegetables, and ten per cent. beef scrap. The mash is usually given at night and morning. A scratch grain of either cracked corn or wheat and oats can be given at noon. During the laying season a good ration for breeding ducks consists of equal parts of low-grade flour, bran, cornmeal, vegetables and twelve per cent. beef scrap.

A good range is rather essential if ducks are raised at a moderate cost. A small body of water is helpful because of the natural food of ducks, such as grasses and insects which will be found in such a place. Water is not necessary, however, except that it must be supplied abundantly for drinking purposes.

The Dairy

The easiest way to raise a calf is by feeding it whole milk. This probably will produce the best calf, but not necessarily the best dairy cow. Feeding skim-milk to the calf after it has secured a proper start may give as good a cow as the feeding of whole milk, but the process requires greater care.

For the first few days, the calf should run with its mother, after which it should be removed and fed warm fresh whole milk by hand. This should be continued for ten days or two weeks at least. The length of time it should be continued depends upon the vigor of the young animal. From ten to twelve pounds of this

School Fairs and Home Garden Contests Ontario--1922

School fairs have had a wonderful development in Ontario during the past few years. Their popularity does not seem to be waning in the least and it is a particularly encouraging sign to see the deep interest that is

By R. S. Duncan, B.S.A., Director, Agricultural Representative Branch.	Agricultural Representative Branch.		
	1909	1915	1921
Number of School Fairs held	1	234	449
Number of schools included	3	2,291	3,847
Number of children taking part	58	48,386	95,307
Number of home plots	174	116,236	193,545
Number of entries made at the fairs	80	72,860	154,831
Number of children attending fairs	170	84,406	188,728
Total attendance at fairs	250	157,266	343,259

This is truly a phenomenal growth, and it is the desire of the department to extend from time to time this form of education to all the rural schools in the province in order that all school children may enjoy its benefits.

During the past season, the Ontario Department of Agriculture, through the Agricultural Representatives, distributed to the boys and girls enrolled in the School Fair movement the following quantities of seeds and eggs:

Potatoes	1,039 bags
Oats, barley and wheat	252 bush.
Peas and corn (sweet and field)	24,100 pkgs.
Beets, carrots, onions and parsnips	42,000 "
Mangels and turnips	12,800 "
Asters, phlox, sweet peas and cosmos	30,750 "
Eggs, bred-to-lay Barred Plymouth Rock	10,852

Each School Fair is carried on by a board of directors composed of representatives from the school, the Agricultural Representative, acting as manager. In most cases the Representative is assisted by a local committee representing the teachers, trustees and parents, and where we have an active committee all pulling together, there is no weak link in the chain.

One of the greatest handicaps to better work is the annual change of teachers, but this is gradually being overcome because many teachers have had more or less experience with school fairs even before they graduate from the Normal schools. It is very gratifying to report that the quality of the exhibits is improving from year to year. The pupils are gradually learning that it does not pay to bring anything but "good stuff" to the fair. The judges are requested to point out by comparison the difference between the exhibits awarded first prize and those awarded second, third, fourth, fifth and sixth prizes. Besides giving reasons for their placements, the judges try to point out to the exhibitors and others the desirable type, what constitutes quality in the various classes called for on the prize list, and to offer hints or suggestions as to the preparation of exhibits. To my mind this is one of the greatest educational features of the school fairs.

District championship School Fairs were held during the past season in the following counties: Frontenac, Halton, Norfolk, Oxford, Welland, and Wentworth, and Rainy River and Manitoulin districts. The first, second and third prize exhibits from the various school fairs in the county or district were eligible for competition, the agricultural society supplying practically all the prize money.

Championship fairs are feasible only where it is possible to conduct the school fairs sufficiently early in the season to allow prize exhibits to compete at the place where the championship fair is held and where transportation facilities are sufficient. Boys and girls take a great pride in winning a championship ribbon, and the quality of the exhibits is reflected in the local school fair. The championship goal seems to be an added stimulus. The exhibits staged at these championship fairs were not only a credit to the pupils but also to the district from which they came. The pupils are "broadening" and they are gaining a wonderful experience which will have its effect upon the larger fairs in the future.

During the past two or three years, there has been an agitation on the part of the officers of some agricultural societies to have the school fairs linked up with fairs held under society auspices. Those favoring the holding of joint fairs put forth the argument that there would be less duplication of work and effort and the combined fair would be more successful. This scheme has had a fair trial, and about the only thing to commend itself is the fact that the gate receipts are greatly increased. The greatest objection to holding joint fairs is the fact that in the great majority of cases there are too many counter-attractions and difficulty is found in carrying out the well-arranged program for the entertainment and especially the education of the children. With this plan, the school fair would more or less lose its identity and defeat some of the objects for which it was originally formed, namely, to give inspiration and create greater interest, broadly speaking, in agriculture.

The department feels that school fairs should be held separately and distinct from county or township fairs. In some communities, however, the local people feel that the two can be combined quite nicely, and in order to guard against the objections raised, the department insisted that where

the fall fairs held under the auspices of the agricultural societies and the school fairs are conducted jointly the following conditions must be complied with—

1. Prize List.—That the list of classes for the Rural School Fair, prepared by the Agricultural Representative and the Rural School Fair Association, be included in the regular prize list of the Agricultural Society.
2. That one copy of this prize list be distributed to each pupil or one copy to each family or household in the Rural School Fair Association.
3. That the prize list be issued not later than June 1. Where it is impossible to issue the regular Agricultural Society Prize List by this date the Society should issue a separate School Fair prize list for early distribution.
4. Finances.—That the Agricultural Society supply half the prize money, such sum not to exceed \$75, for these classes and that the sum be paid in cash to the manager or secretary of the Rural School Fair Association prior to the fair.
5. Accommodation.—That the Agricultural Society supply suitable building or tent accommodation for displaying the pupils' exhibits, together with tables and poultry coops, and have same in readiness the day previous to the fair. Where this equipment is supplied by the Department of Agriculture, the Agricultural Society must pay transportation and fuel charges, and furnish help to erect the tents.
6. That suitable field accommodation, properly enclosed, be definitely assigned to the Rural School Fair for the purpose of holding sports, parades, judging of live stock.
7. That a program for the day be decided upon by the Agricultural Society officials and Agricultural Representatives to avoid clashing of events.
8. Admission.—That all pupils and teachers in the schools taking part in the Rural School Fair be given free admission to the fair.
9. Judges.—That the Agricultural Society supply judges for exhibits such as poultry, live stock, vegetables, grains, etc., satisfactory to the Department.
10. Protection. (Constables).—That the Agricultural Society supply protection for Rural School Fair exhibits.

New Features. A successful school fair must have something new and worth while each year. The pupils demand change in order to keep up interest. Sports are merely an added attraction. Last year many Representatives conducted some competition that was entirely new to the children, such as judging competitions for teams of three boys in live stock, and for three girls in sewing or darning; individual competitions in naming weeds, apples, vegetables, and live stock, the latter from pictures; chicken plucking, boys' riding, girls' hitching and driving, public speaking and singing competitions and Strathcona Drill and school fair parade. Not all of these contests can be carried out at any one fair but a few new "stunts" each year can interest and keep up the enthusiasm of the children.

The Home Garden Contests. The Home Garden contest is primarily intended for the teen-age boys and girls on the farm. Sufficient seed is given each contestant to plant a plot 30x40 ft. The crops grown are as follows: tomatoes, corn, cabbage, peas, beans, onions, radish, lettuce, parsnips, beets, carrots, Swiss chard, cucumbers, squash, citron, and spinach. A special pamphlet, showing the crop arrangement, plan of garden, and giving cultural instructions is handed each contestant. Each contest comprises 25 gardens. During the past season the competitors paid the cost, price of the seeds, namely 75 cents, and in all there were 75 Home Garden contests, including 1,875 pupils. During the months of July and August, the Agricultural Representatives inspected the gardens and awarded prizes for the best gardens. In addition, special prizes were offered at the school fair and local fair for exhibits of vegetables from the home gardens. Last year competitors were required to can products from their gardens and exhibit these at the fairs along with the fresh vegetables. This year it is planned to make canning optional. The object of these Home Gardens is to interest boys and girls in better agriculture and encourage the use of more vegetables in the farm home. It is truly surprising what can be grown in a small garden, and after allowing the family free use of the vegetables grown many of the boys managed to dispose of the surplus products and made a little "pin money." They were

SMOKE OLD CHUM

The Tobacco of Quality

1/2 LB. TINS

and in packages

thus able to thoroughly enjoy spending a little money earned by the exercise of their own skill. These early lessons in finance should stand them in good stead.

THE CHILDREN'S HOUR

A Good Set of Rules. Here is a set of rules which every girl would do well to follow:

- Be brave. Courage is the noblest of all gifts.
- Be silent while your elders are speaking, and otherwise show them deference.
- Obedience is the first duty of every girl.
- Be clean. Both yourself and the place you live in.
- Be the friend of all harmless wild life. Conserve the woods and flowers and especially be ready to fight wild fire in forest or town.
- Word of honor is sacred.
- Play fair. Foul play is treachery.
- Be reverent.
- Be kind. Do at least one act of unselfish service every day.
- Be helpful. Do your share of the work.
- Be joyful. Seek the joy of being alive.

Tested New Kinds of Grain.

Sixty-nine new varieties of grain have been tried out at the farms and stations of the Dominion Experimental Farms system. These are briefly described in Pamphlet No. 11, of the Department of Agriculture, Ottawa, by Dr. C. E. Saunders, the Dominion Cerealist. The varieties include three of winter wheat; fifteen of spring wheat, late and early ripening; twelve of oats, many crop sorts, early and six-row kinds, two-row kinds, hooded kinds, and hullless; two of winter rye; two of emmer and spelt; nine of field peas; four of field beans; three of flax for seed, two of flax for fibre, and three of buckwheat. In addition, recommendations are given to varieties best suited for the different provinces, thus greatly enhancing its value.

In his introduction, Dr. Saunders points out that while, as a rule, it is wise for growers to leave the testing of new varieties to the government farms and stations, those who have a liking for the work will find it extremely interesting, though expensive. Apart from that, there will always be plenty of scope among recommended sorts for interesting comparative trials, and these can be made at little or no loss of time or money.

No recommendations are made by the Dominion Experimental Farms and Stations until after thorough and complete tests, and until the varieties have shown some superiority over the older and better-known ones. Not only is it necessary, in order to secure profitable crops, to maintain the fertility and tilth of the soil by rotation and the application of manure or fertilizers, but thoroughly clean seed—adapted both to the soil and climatic conditions on each farm—must be sown. Growers are therefore advised not only to study the pamphlet but also to consult as to the choice of the nearest Dominion Experimental Farm.

During Vacation Days. You will doubtless have an opportunity during vacation days to scatter seeds of kindness while on your vacation by showing your interest in all animal life. Interest others in this cause of mercy, justice and kindness to every living creature. Protect dogs and cats from ill-treatment. Give them food and water and a comfortable place to sleep. Discourage nest-robbing boys among your companions. Horses and cows will enjoy better health and do better work if they are groomed every day. It is cruel to carry fowls with their heads downward and their feet tied together. Fish should be killed as soon as taken out of the water by a sharp blow on the back of the head. Such fish keep better and are better to eat.

Honor and humility belong together. The vain girl, who thinks always of herself, misses the path of leadership.

Parents as Educators

Hungry Children—By Lydia Lion Roberts

A mother was looking over a box of old photographs and her little boy was an interested watcher by her side. As one picture came into view the boy exclaimed, "Whenever I see a picture of Auntie Gertrude it makes me feel hungry." Afterwards he explained that it was because she brought him so many good things to eat. The Aunt referred to was a very busy woman, yet she always managed to find time to slip a gingerbread man or a popcorn ball, or a surprise package into her bag for the children where she visited. Another, child never forgot a basket trimmed with colored tissue paper, holding some baked cookies, that her aunt brought to her after she had been sick.

Food plays an important part in a child's life and a mother may teach by it as well as by other things. All children love surprises, and little faces brighten on stormy days when a raisin cake baked in their own little pan appears, or a lunch-box dinner is placed on the playroom table with dainty sandwiches and fruit, and maybe a bit of candy or a few nuts. Any little boy or girl likes to learn to cook when mother is cooking and though that is not an especially good time for mother in one way, yet in another way it is the best time, for children are happy when busy and learn quickly when interested. When mother makes bread the little tot should have a ball of dough and a raisin or a bit of jam to make a biscuit. If the child has dishes big enough, and this is important, for there should be a small pan or unbreakable dish to do the cooking in, the work can be done exactly as mother does it and therefrom come the first lessons in cooking. "I could turn those doughnuts," suggested a small boy to his grandmother, who was making the toothsome goodies. She started to turn him away as she was busy and a bit nervous, but thought better of it and showed the child just how carefully it must be done. Consequently he turned every single one in a most grown-up way and informed the family proudly that night, "Grandma and I made doughnuts to-day." The ten-cent store has many a small tin and enamel pan that would make a start towards a little girl's cooking set, and would give her much pleasure and profit if she learned to take care of the pans and to cook simple things in them. The best way of all is to suggest to a child that a biscuit be made for daddy's supper, or a tiny cake as a surprise for a playmate. Thus the lessons in cooking and giving, planning and unselfishness are learned together.

Education Broadens and Refines.

A certain successful business man, who was wealthy, and who might have had a great deal of enjoyment out of life because he had money enough to secure many things worth while, and who was also able to spend his time as he wished, said something like this: "When I was young my whole ambition was to be successful. I sacrificed my own comfort and concentrated all my energies on my business, thinking that when I had realized success I would be able to ease up, to enjoy life. Now, I find nothing interests me but my business. I can find no rest, no pleasure in anything else. I have tried to cultivate a liking for music. I am too old. I have tried to enjoy pictures but cannot bring myself to appreciate this form of art. My whole life is business and it is, I now see, a narrow one."

This man in youth had neglected to cultivate broad interests. He had grown in height, or intensity. He was successful in one thing. But he had not grown in breadth, and only saw his mistake when it was too late. Attendance at school and college helps make a man more valuable. Education has a money value. But that is not all. A man who would "have life, and have it abundantly," should cultivate many interests in life. And this is something that education does. It develops a man's powers for the enjoyment of life. It roots in his mind the capacity for growth along different lines.

For years I dally passed buildings of many kinds, but did not see them. One winter I went to school in the evening and learned something about the "History of Architecture. Immediately a new world of enjoyment opened to my surprised eyes, and now I see things to which I was blind previously.

Your capacity for the enjoyment of life is like a circle about you. Education widens the circle, pushes the circumference further away so that you have more room for enjoyment. It also sharpens your vision so that the quality of the pleasure of life is refined.

Flax Development.

Flax growing for fibre is developing in Canada. During the last few years, experiments have been carried on by the Dominion Experimental Farms to determine which districts in this country are suitable for flax fibre culture. It has been proven, says the interim report for 1920-21 of the officer in charge of the Division of Economic Fibre Production, Mr. R. J. Hutchinson, that the fibre obtained from the flax grown on the experimental farms in the western part of British Columbia, in Ontario, the valley of the St. Lawrence, and the Maritime Provinces, is of first class quality and compares favorably with the best grades of Irish and Belgian fibres. What is more, the results of the spinning tests show that Canadian fibre is suitable for the manufacture of the finest linen damasks. The Division has only been in existence six years, but despite the fact that in 1920 the flax building, equipment and records were destroyed by fire, it has continued and even extended its efforts. An evidence of the result is found in the fact that in the year reported upon the increase in acreage had been thirty-two to one compared with the year 1916. The Division has also been able by diligent testing of newly invented pulling, deseeding or scutching machines to furnish reliable information relative to the effectiveness of such articles. Investigation has proven that while water-bound coasts not subject to extra hard frosts are most suitable for flax cultivation, still it can be grown successfully with profit in Northern Ontario. The variety tests conducted at thirteen Dominion Experimental Stations, besides the Central Experimental Farm at Ottawa, show that while the varieties designated Novely and Premost do well, the kind known as Longstem is best adapted for fibre production in Canada.

Experiments to ascertain the suitability of the fibre for binder twine have not so far proven encouraging, but they are being continued. Retting, scutching and fertilizing experiments are also being carried on. In 1919 a grading system was established so that purchasers can now buy by merely signifying the grade required. Fibre seed is inspected and graded for export, and quite a quantity has been shipped to Ireland. Cablegrams are received weekly from the Irish Department of Agriculture outlining the conditions of the markets in Europe, and the information is supplied to flax growers, spinners, and anyone interested in the production of flax for textiles.

Swat the fly before she raises a big family. It is not cowardly to avoid unnecessary risks. Amsterdam is cut by canals into ninety islands connected by 300 bridges.

Line-sulphur glue is easier to make and to apply than self-boiled lime-sulphur, and it is said to get brown rot and seal and to color the fruit just as well. Ask the County Representative about it.

RUSSIANS CONCEAL TRAGEDY OF LIVES

HIDE MISERY BEHIND A MASK OF GAITY.

Little Evidence of Tempestuous Slavic Temperament to be Seen Among Stricken People.

In most novels and plays about Russian life written by Russians and foreigners the characters parade their tragedies, wring their hands, sob deeply, weep copiously and display a riot of emotions in every chapter or act. In real life they are not doing it now.

After eight years of war and revolution that have brought real tragedy to nearly every Russian suffering almost incomprehensible to the foreigner, the average Russian displays little emotion at anything. The fiction-famed "Slavonic temperament," overflowing with outpourings of "soul," if it ever existed at all has been deadened by the succession of shocks it has received.

Instead of talking about their tragedies, the Russians seem to be trying to forget them. If they speak at all of fathers, husbands or brothers killed in their prison experiences, or of their past wealth and present poverty, they do so casually. They do not button-hole strangers to tell them tales of woe, although some of their tales would make the shades of the most eminent tragedians or writers of fictional horrors writhe in shame at the pale stuff they turned out in their lifetime. Nor do they "swap-experiences" when chatting among themselves.

Lack Funds for Funeral.

It is only when some present day sorrow or tremendous shock invades their houses that the losses of the past are recalled. Among the correspondents' Moscow acquaintances is a young woman prominent in amateur theatricals, a student of ballet dancing, and one of the gay spirits of any party she attended. The other day she came to an American friend to ask aid to bury her father, an old man, who had died suddenly the day before. His body lay on the only table in the little two-room apartment he and his two daughters had occupied. The family had the Russian equivalent of \$175 between them when he died. Their Russian friends, members of the same circle socially and all formerly well to do, were also living from hand to mouth, and couldn't help to raise the equivalent of \$15 to pay expenses of a simple funeral.

So the daughter, appealed to the American, whom she had known for months, but to whom she had never revealed either her poverty or the past tragedies her family had undergone during the war and revolution.

Family Decimated.

Two of her brothers had been killed in the war. In the revolution, their property was confiscated and her mother died. She herself married a Lithuanian, who, a year ago, went to his native country in hope of returning to Russia with funds. He was shot at the frontier for trying to smuggle merchandise into Russia. Her sister's husband was shot as a counter-revolutionist. The two daughters obtained work, one with a Government bureau and the other with the "Cheka" or secret police. She worked for the "Cheka," because only this enabled the family, through the influence of the "Cheka" to retain two rooms to live in. The combined earnings of the two daughters was less than \$10 monthly, but on this they managed, living from hand to mouth, supporting their father, and kept smiling.

Another acquaintance of the correspondent lives now in a tiny little room on the sixth floor of an elevatorless apartment. It was evident that she had once been wealthy, but she never referred to it. The other day she was encountered at a palace-like structure, one of the biggest residences in Moscow, with carved oaken stairways and an entrance hall as big as an ordinary six-room city apartment. Some one remarked that the room was beautifully furnished.

"Yes, isn't it?" she said. And then she added casually: "I was born here. This was our home, you know."

She was the daughter of the wealthiest merchant in Moscow.

How Love Lightens Burdens.

A kindly, white-haired old gentleman, interested in a bright-eyed, bare-footed, hustling little newsboy who was plying his trade on a crowded city car, questioned him about himself and his work. According to the story, as reported by an exchange, there was a younger brother to be supported, "Jimmy," who was lame and "couldn't earn much himself."

"Ah, I see," said the sympathetic questioner. "That makes it hard; you could do better alone."

The shabby little figure was erect in a moment and the denial was prompt and somewhat indignant.

"No, I couldn't! Jim's somebody to go home to; he's lots of help. What would be the good of havin' luck if nobody was glad? Or of getting things if there was nobody to divide it with?"

"Fourteenth Street!" called the conductor, and as the newsboy jumped out into the gathering dusk the old gentleman remarked to nobody in particular: "I've heard many a poorer ser-

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood Supply is Enriched.

The urgent need of all who suffer from indigestion, and who find the stomach unable to perform its usual function, is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food taken. In this condition some people foolishly resort to purgatives, but these only further aggravate the trouble.

New strength is given weak stomachs by Dr. Williams' Pink Pills because these pills enrich and purify the blood supply. This is the natural power of giving strength and tone to the stomach, and it accounts for the speedy relief in stomach disorders that follows the use of Dr. Williams' Pink Pills. The appetite revives, food can be taken without discomfort and the lurching and pains of indigestion are dispelled. Mr. William Johnson, a prominent business man of Lequille, N.S., bears testimony to the value of these pills in cases of this kind. He says: "I was attacked with indigestion accompanied by severe cramps in the stomach. I was prescribed by the family doctor, but got very little benefit. Then I tried some of the advertised remedies but with no better result. Indeed my condition was growing worse. Then I read of the case of a man who praised Dr. Williams' Pink Pills whose condition was similar to my own, and I decided to try this medicine. The result, I think, was amazing, as the use of six boxes restored me to my former good health. I can therefore warmly recommend the use of this medicine for stomach troubles."

You can get these Pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Doing the Things I Want to Do.

School's let out, an' I'm goin' away. Over to grandpa's farm to-day. Mother an' dad I'll miss, I know—Just can't stay; I've got to go. Nothin' to do the whole day through. 'Ceptin' the things I want to do.

I'll be terribly busy, though. Always a-movin', on the go; Peedin' chickens; milkin' the cows; Stuffin' the hay up in the mows. Nothin' to do the whole day through. 'Ceptin' the things I want to do.

None of it's work; it's fun if you do. Do the things that you want to do. 'Peckin' and choosin' here an' there. 'Fidin' some fun 'most everywhere. Nothin' to do the whole day through. 'Ceptin' the things you want to do.

Wonder why all the folks I see Don't have fun the same as me. Seems as though they go it blind. Takin' anything they find. Workin' at the whole day through. Things that they don't want to do.

Betcher life! when I've growed tall, Work an' me won't hitch at all. Cause I'll look around a bit. Huntin' for the place I fit. Then I'll spend my whole life through Doin' the things that I want to do.

Never Again.

"Scientific management is here to stay. Those who oppose it are as shiftless as the old earl. The old earl, before going to his bath to dress for dinner one evening, for some reason counted his money, six five-pound notes, and laid them on his dressing-table as usual. On returning from his bath he again counted his money, and one of the five-pound notes was missing. He looked ruefully at his valet busily fastening pearl studs in his evening shirt. 'Humph,' said the old earl, 'a loss of five pounds, I never counted my money before and I never will again. It doesn't pay.'

The roof of the Crystal Palace, London, contains fourteen acres of glass.

HEALTHY CHILDREN ALWAYS SLEEP WELL

The healthy child sleeps well and during its waking hours is never cross but always happy and laughing. It is only the sickly child that is cross and peevish. Mothers, if your children do not sleep well; if they are cross and cry a great deal, give them Baby's Own Tablets and they will soon be well and happy again. The Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation, colic and indigestion and promote healthful sleep. They are absolutely guaranteed free from opiates and may be given to the newborn babe with perfect safety. They are sold by medicine dealers, or by mail at 25 cents a box from 'The Dr. Williams' Medicine Co., Brockville, Ont.

Dreams That Spell Danger.

The state of our health is revealed in our sleep to a much greater extent than we might imagine.

For instance, those who have what are known as "soft dreams," which consist of endless views of long stretches of country moving slowly past, are usually found to be subject to headaches and violent neuralgia.

Frightful dreams foretell a sudden rush of blood to the head, while dreams about blood point to inflammation in some part of the body. In this connection a person may suffer from nothing more serious than a feasted finger, and yet the spectacle of blood will form part of his dream.

Dreams about rain or water are often signs of irritation of the mucous membrane, and the dreamer should not be surprised to wake up with a sore throat.

Should you dream of people several times their normal size, it is an infallible sign that the liver is affected; while it has been noticed that when the dreams are of pain in any particular part of the body there is something wrong with that part.

Numerous forms of fever are announced by dreams of an uncommonly terrifying character; while in cases of severe neuralgia and rheumatic affections, disturbed dreams are occasionally found to be forerunners of an attack.

Indigestion gives rise to very morbid dreams, into which weeping, sorrow, death, funerals, suffocation, and strange animals enter.

All these things are due to the curious effect which the mind has over the body during periods of sleep, for dreaming is a very natural thing; and those who never dream at all are said to be mentally afflicted.

How Big is a Bean?

Tommy is fond of squeezing tooth-paste out of his shiny new tube.

"Don't take too much this time, dear," his mother said to him one morning when he was cleaning his teeth.

"How much may I have?" asked Tommy.

"Well, I should think a little bit, perhaps as big as a bean."

Tommy gave a great pinch, and out shot the paste.

"Oh, oh!" exclaimed his mother. "Not at all, Tommy. Didn't I say as big as a bean?"

"Yes," replied Tommy. "This is a string bean."

Knowledge.

If I knew you and you knew me, 'Tis seldom we would disagree; But never having yet clasped hands, Both often fail to understand. That each intends to do what's right And treat each other "honour bright." How little to complain there'd be, If I knew you and you knew me.

My Work.

I can do something others cannot do—Let me find that, and do that one thing well. I've failed at many things I've tried, 'Tis true, Have come to grief more oft than I can tell. Yet am I not prepared to own defeat And say there's naught at which I may excel. I hope and trust; and hope and faith are sweet! Some day I'll find MY work, and do it well! —Stickland Gillian.

Weak in Arithmetic.

This is a true story: An office-boy in a big business house approached one of the clerks and, with great solemnity, asked him to divide 180 by ten.

"Eighteen, of course!" was the immediate reply.

The boy looked thoughtful.

"Are you sure?" he demanded.

The clerk thought there was a catch somewhere, but was assured that the boy was in earnest.

"I've worked it out, and it comes to seventeen and ten over," said he, and it took a lot of explaining to satisfy him.

Forest Fires and Furs.

The question of forest fires has just been approached from a new angle. The trapper is the latest individual to add his testimony to the damage forest fires do to the great fur industry. The fact is forest fires injure every Canadian interest and benefit not one. Such being the case, and as 90 per cent. of all forest fires are started by human agency, is it not foolish and criminal that we allow fires to ravage our forests?

Plant That Explodes.

It is well known that you cannot grow the same crop in a field year after year. If you do so, the yield grows less and less, and the plants become feeble. Plants discovered this fact thousands of years before human beings existed, and they set out to devise ways of ensuring that their seeds always fell upon fresh ground.

Some, like the thistle and the dandelion, developed seeds provided with balloons of down, by means of which they are carried for miles. The sycamore and the lime grow little parachutes, which send their seeds twisting through the air for long distances.

The burrs resolved to make use of animals to do the work for them. They grow rows of tiny hooks designed to catch in the coats of animals, which carry them away and then rub them off against bushes. The poppy perfected an efficient form of sprinkler. When the dry heads are shaken by the wind, seeds are shot out in all directions.

The tropical sand-box tree was the first inventor of explosives. Its seed-pods are filled with gas, which expands until such a pressure is reached that the sheath bursts with a noise like a revolver shot, and the seeds are distributed over a considerable area.

Can You Make a Speech?

There are few more useful accomplishments than the ability to make a good speech, and a little knowledge will save you a great deal of discomfort when the time comes for you to "speak a few words."

Try and forget that you are making a speech. Talk in a quiet and natural manner, as if you were conversing with a friend. Restrain your emotions; beginners should avoid gestures altogether. Keep your hands still. The expression of a speaker's face is important. Practise in front of a mirror.

Say what you have to say in as few words as possible. Never speak about a subject which you do not thoroughly understand. Whenever possible, prepare your speech beforehand; but do not attempt to learn it off by heart. If you know what you want to say, the words will come to you without any trouble when the time comes.

LIVED ON LIQUIDS FOR MANY MONTHS

It was a lucky day when I bought Tanlac for it has made a new man of me," said Arthur Monette, 165A St. Elizabeth, Montreal. "My appetite was so bad I never knew what it was to be the least bit hungry. Even what little I did force down soured and bloated me so badly I had terrible smothering sensations and awful pains. For months I was unable to eat any solid food and I got in a terribly run-down condition. I became so nervous I would wake up all during the night, and got little sound sleep. I was constantly looking for something to bring me relief, but nothing seemed to reach my case until I ran across Tanlac."

"Six bottles of Tanlac completely overcame my trouble. I now eat just anything and never have an ache or pain or a sign of stomach trouble. I can't recommend Tanlac too highly."

Tanlac is sold by all good druggists.

Declares Tanlac Completely Overcame His Trouble After Everything Else Failed.

The Curse of Selfishness.

Selfishness is one of the most destructive of human attributes. There is hardly a crime or meanness that has not its root in selfishness, in the desire to get something for oneself; and one of the great temptations of wealth is to develop selfishness an utter disregard for others. Their rights, their interests, their needs, their sorrows, their sufferings, make no appeal to the selfish man or woman.

No human being has a right to a career which will satisfy only himself, which has no results to the race. Whatever he is, whatever he has acquired, is due not alone to his own efforts, but in large part to the society in which he lives and to the accomplishments of men in all preceding ages. No man can live to himself alone, and each one of us owes a debt to the world which it is our first duty to pay in service of some kind for the common good.

Selfishness and avarice have no part in the Creator's plan. We were put here to do team work; we were planned for it, and if we do anything else, if we do that which does not result in some way to the well-being of the race, we are violating the very principle of our being.

Get away from yourself; interest yourself in others; love them, help them, or you will become as cold, barren and heartless as an icicle.

MONEY ORDERS.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

You can not lift up the people upon whom you look down. Jellyfish float about in the water, but cannot direct their course. Thus they are at the mercy of whatever current takes them.

His Hearing Restored.

The invisible eardrum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York City. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth Ave., New York City, will be given promptly.

NEARLY CRAZY WITH PAINS IN BACK

Read How Lydia E. Pinkham's Vegetable Compound Helped Mrs. Beecroft

Hamilton, Ontario.—"I have suffered for three years from a female trouble and consequent weakness, pain and irregularity which kept me in bed four or five days each month. I nearly went crazy with pains in my back, and for about a week at a time I could not do a work. I saw Lydia E. Pinkham's Vegetable Compound advertised in the Hamilton Spectator and I took it. Now I have no pain and am quite regular unless I overwork or stay on my feet from early morning until late at night. I keep house and do all my own work without any trouble. I have recommended the Vegetable Compound to several friends."—Mrs. EMILY BEECROFT, 16 Douglas St., Hamilton, Ontario.

For nearly fifty years women have been telling how Lydia E. Pinkham's Vegetable Compound has restored their health when suffering with female ills. This accounts for the enormous demand for it from coast to coast.

If you are troubled with any ailment peculiar to women why don't you try Lydia E. Pinkham's Vegetable Compound? It has helped others, let it help you.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of the synthetic substance. While it is well known that Aspirin means Bayer's manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Surnames and Their Origin

SCARLETT
Racial Origin—English-French-German.
Source—A locality or a given name.

The history of this family name is a bit complex and in some respects obscure. In some instances it is true that the name may be founded upon the same word, but search through the old records fails to disclose that this is the principal source of it.

On the other hand there is every evidence that the name came into England at the time of the Norman invasion and perhaps again at later periods as a surname indicating that the bearer had come from a place in Normandy called Escarla.

The natural tendency of the English tongue would be to drop this initial "E," just as it was the tendency of the French to prefix an "e" to words beginning in "s."

Again, there is another line of development indicated, involving three languages, German, French and English. Under this explanation the name would virtually be the same as that of Charles. This given name, of Teutonic origin, came to be spelled with a "Ch" instead of a "K" in France. In some cases, being taken back into Germany, an "s" was prefixed to maintain the soft pronunciation, and it became "Scharlo." If taken into English at a still later date, probably already developed into a surname it would rather easily have become "Scharlo" and then "Scarlett" through similarity in sound to "scarlet."

MILTON
Racial Origin—English.
Source—A locality.

There is little doubt about the nationality of this family name. So frequently does it appear in lists of names from medieval English times and from localities in which English people have settled.

It is one of the most frequently occurring of English family names, ranking next only to such names as Smith, Jones and the more popular of the names made up by the addition of "son" to a given name.

The family name of MILTON, of course, comes from a place name. But in the individual case you'll find it just about hopeless to guess where the original bearers came from. There is a town named Milton in Dorset. There is one in Devon. There are Miltons in Fife and Hants, in Kent and Northants, in Oxford, Westmoreland, Yorkshire and in many other sections of England. Some of these towns, of course, do not date back to medieval times, and the name referred to in the naming of them are sometimes really factories. But the mills which gave the medieval towns their names, of course were grain mills.

Considering the number of towns which were called Milton, it is no wonder that the family name is found so often to-day and that people of this name are not necessarily even remotely related to one another, though they go as far back as twenty generations ago.

Let the Children share this mealtime beverage

NO NEED to warn the little folks away from the table beverage when Postum is served; every reason to invite every member of the family to join in the enjoyment of this wholesome, satisfying drink.

Postum is made from Nature's best wheat, and contains nothing to harm nerves or digestion.

You'll greatly relish its full-bodied flavor and aroma.

Miss Mildred Taylor has returned to Chatham after spending a week or so with her parents here.

Mrs. Weber, of London, is visiting with Mr. and Mrs. S. J. Thompson.

MELBOURNE

Melbourne, June 15.—A gloom was cast over this community today when it was learned that Mrs. Thos. Carruthers had passed away about 4 a. m. after a very short illness. Mrs. Carruthers was Miss Ethel Stevenson, daughter of Geo. Stevenson, of Ekfrid, and was a very popular woman, loved by all who knew her. She was 32 years of age and leaves to mourn her loss a devoted husband and three small children, the eldest six years of age and the youngest seven months; her father, four sisters—Mrs. Earl Beattie, Mrs. George Beattie, Mrs. Roy McCracken and Mrs. Ted. Hagerty and one brother, G. B. Stevenson, of Ekfrid, who have the sympathy of the entire community in their great sorrow.

The pupils of the continuation school are writing on their final exams, with Miss Davidson, of Mount Brydges, presiding. Miss Snell, of this school, is presiding at Mount Brydges.

The pupils of the public school are writing on their final exams, and are pleased that their teacher, Miss McNabb, has been engaged for another year. Miss McNabb is an Ekfrid girl and a graduate of the Melbourne school.

The members of the U. F. O. and U. F. W. O. gave their annual garden party on the fair grounds last night. The grounds were brilliantly illuminated by two electric plants, installed by Kerwood. The Royal Regimental Band of London, under the leadership of Capt. Ryan, gave excellent service in a band concert from 7.30 to 8.30, when the chair was taken by L. L. McTaggart and one of the best programs ever given in this district delighted the large gathering. The chief entertainers were Bob Wilson, comedian; C. LeRoy Kenney, dramatic reader; Grace Bennick, pianist; Jean Alexander, elocutionist; the Elgar male Quartette, of Toronto, and Sam and Dorothy Munro, of London. Refreshment booths of all kinds were on the grounds and were well patronized, as was also the new grandstand just built by the agricultural society, seating about 500, and which was used for the first time. The proceeds of the evening will be used in some way for the new school which is now under construction.

Melbourne, June 15.—The funeral of Mrs. Thos. Carruthers took place Sunday afternoon, 18th inst., to Longwood cemetery. The pallbearers were James Sutherland, Joseph Naegele, Charles Carruthers, Stanley Richards, Archie Carruthers and Robert Campbell. In the absence of the pastor, Rev. John Elder, the services were conducted by Rev. Dr. Stalker, of West Lorne.

Norman Meek was taken to London a few days ago, where he had an operation performed. Although he is still very ill, there is a slight improvement.

Rev. John Elder returned this afternoon from Winnipeg. George Beese left this afternoon for an ocean trip. He will spend about two months in England with relatives.

"Father's Day" will be observed in the Methodist school and at the morning church service next Sunday.

WOODGREEN

A number from here attended the Glencoe races on Wednesday.
Mr. and Mrs. Benneweis, Miss Beatrice Schellenberg and Norman Feltz spent Sunday with Mr. and Mrs. A. Daum.

Mrs. Lawrence Winger is on the sick-list.
Several from here attended the Melbourne lawn social Friday night.

Robert McConnell spent Sunday at Mr. and Mrs. A. F. Squire's.
Mr. and Mrs. Aldred and family, Mr. and Mrs. H. Weekes and family and Miss Muriel Weekes spent Sunday with Mr. and Mrs. E. Weekes.

A number from here attended the W. C. T. U. convention Wednesday and Thursday.
The first business meeting of the trustees of Simpson cemetery was held on Tuesday evening at the home of Thomas Simpson.

EKFRID STATION

Ekfrid, June 15.—The congregation of South Ekfrid met in the school house on Wednesday evening, June 7, and presented Mr. and Mrs. McCulloch, of Appin, who are leaving this week, with a well-filled purse.

Miss Jean Hull read a nicely-worded address and Miss Alice Winger made the presentation. Mr. McCulloch replied very nicely. A good program, consisting of solos, duets, readings, instrumental and addresses. Bernie Galbraith occupied the chair. At the close of the program a dainty lunch was served. The evening was much enjoyed by all.

The U. F. O. are holding a meeting in S. S. No. 4 Friday evening, June 23rd.

The annual Baptist meeting at Mayfair will be held next Sunday.
Mrs. McLean and children, of London, are visiting her sister, Mrs. W. H. Switzer.

DAVISVILLE

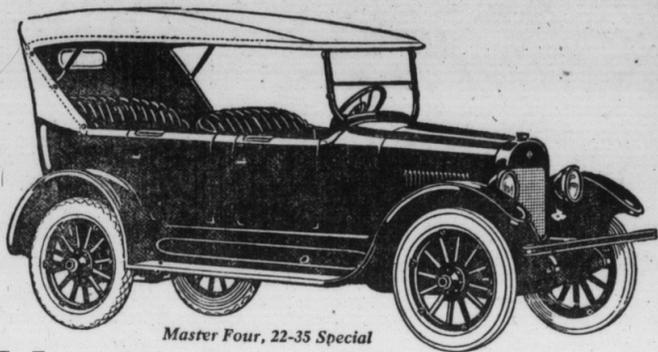

Sorry to hear that Jim Brown is on the sick-list and is not improving very fast.
Mrs. Will Stokes, from the West, is visiting her relatives around here.

Mr. and Mrs. Ralph Longley and family spent Sunday at Mr. and Mrs. R. B. Smith's.
Miss Jean Plaine has returned to St. Thomas after spending a couple of weeks at her home.

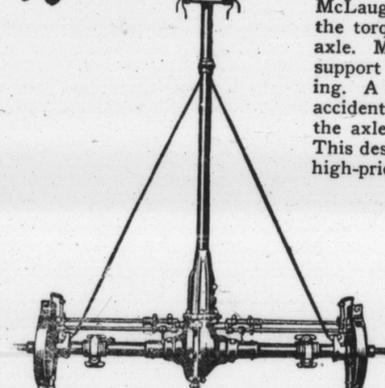

Mrs. D. McLean is visiting at the home of her son, William, Inwood.
Harvey Jiltson, of Toronto, is spending his vacation with Mr. and Mrs. Percy Shred.

Mr. and Mrs. John McLean spent Sunday at the home of Mr. and Mrs. Will Durfee.
The class of people who endorse Tanlac is a convincing guarantee of the medicine's merit. Give it a trial.

—P. E. Lantley.
Even mules can't kick while they are pulling. Neither can they pull while they are kicking.

McLaughlin-Buick "Master Four" Also Drives Through the Third Member

Whether it is a Four or a Six, every McLaughlin-Buick measures up to the same rigid McLaughlin-Buick standards of design and construction. Whatever is McLaughlin-Buick, is McLaughlin-Buick throughout.

The McLaughlin-Buick Four, like the McLaughlin-Buick Six, drives through the torque tube third member on the axle. McLaughlin-Buick springs only support the body and ensure easy riding. A McLaughlin-Buick rear spring, accidentally broken, cannot mis-align the axle and tie you up on the road. This design is generally found only on high-priced cars.

McLAUGHLIN-BUICK

THE AUTOCAR, February 11th, 1922.

A STUDEBAKER "LIGHT SIX" ON THE ROAD.

Studebaker
"Built-in-Canada"

HIGH PRAISE from a Standard Authority

Recently a week's trial trip through England was made by a member of the staff of "Autocar," one of the highest British authorities on motor matters. The results of this trip emphasize the practical points of the Light-Six for the owner-driver. A few extracts are printed below:

"It is unusual to encounter a five-seater car selling in the neighbourhood of £500 with a performance equal to . . . Its six-cylinder engine is remarkably silky in its operation, silent, flexible to a wonderful degree . . . Our first trip was through London traffic, but we soon felt thoroughly at home, since the control gear is free and easy of operation, and the engine is content to tick over on top gear at speeds even below normal walking pace without signs of distress . . . Hill-climbing is a joy on such a vehicle . . . We do not recall ever having encountered a lighter clutch operation . . . A twelve-gallon tank at the rear is ordinarily sufficient for a run of 300 miles . . . This low consumption is, of course, largely due to the light weight of the complete car, which scales little more than a ton . . . To sum up, we are bound to say that the new Studebaker is a car of remarkable all-round achievement."

Lack of space prevents us from quoting the full comments in this article. However, we will be glad to send a reprint of the article in full to anyone who is interested.
