Translation at sight, with the aid of vocabularies, of easy passages from Greek authors.

A Paper on Greek Grammar.

MATHEMATICS.

Arithmetic. ;

Algebra. Elementary rules; easy factoring; highest common factor; lowest common multiple; square root; fractions; ratio; simple equations of one, two and three unknowns; indices; surds; easy quadratics of one and two unknowns.

Euclid, B. I, II, III.

ENGLISH.

1. Composition:—Nothing but an essay will be required; this shall be dealt with rather as a test of the Candidate's power of English Composition than as a proof of his knowledge of the subjects written upon. Legible writing and correct spelling and punctuation will be regarded as indispensable, and special attention will be paid to the structure of sentences and paragraphs. The Examiner will allow a choice of subjects, some of which must be based on the following selections, with which the Candidate is expected to familiarize himself by careful reading:—

1891. { Scott, Ivanhoe.
 { Macaulay, Warren Hastings.
 1892. { Scott, Waverley.
 { Ruskin, Sesame and Lilies.
 1893. { Scott, The Talisman.
 { Irving, The Sketch-Book.

Outlines of Roman History to the death of Augustus, and the Geography relating thereto.

Outlines of Greek History to the battle of Chaeronea, and the Geography relating thereto.

PHYSICS.

An experimental course in (a) Dynamics, (b) Heat, (c) Electricity, including an acquaintance with the metric system of units. The course is defined as follows:—

Dynamics: Definitions of velocity, acceleration, mass, momentum, force, moment, couple, energy, work, centre of inertia, statement of Newton's laws of motion, composition and resolution of forces, conditions of equilibrium of forces in one plane.

Definitions of a fluid, fluid pressure at a point, transmission of fluid pressure, resultant fluid pressure, specific gravity, Boyle's law, barometer, air pump, water pump, siphon.

Heat: Effects of heat, temperature, diffusion of heat, specific heat, latent heat, law of Charles.

Electricity: Voltaic cells, chemical action in the cell, magnetic effect of the current, chemical effect of the current, galvanometer, voltameter, Ohm's law, heating effect of the current, electric light, current induction, dynamo and motor, electric bell, telegraph, telephone.

CHEMISTRY.

Definition of the object of the Science, relations of the Physical Sciences to Biology, and of Chemistry to Physics. Chemical change, elementary composition of matter. Laws of combination of the elements, atomic theory, molecules, Avogadro's law. The determination of atomic weight, specific heat, atomic heat, nomenclature, classification. The preparation, characteristic properties, and principal compounds of the following elements: Hydrogen, Chlorine, Bromine, Iodine, Oxygen, Sulphur, Nitrogen, Phosphorus, Carbon, Silicon.

FRENCH.

Grammar,

Composition:—(a) Translation into French of short English sentences as a test of the candidate's knowledge of grammatical forms and structure, and the formation in French of sentences of similar character; and (b) translation of easy passages from English into French.

Translation of unspecified passages from easy French authors.

Greek Grammar.

MATHEMATICS.

Plane Trigonometry: Trigonometrical ratios with their relations to each other; sines, etc., of the sum and difference of angles with deduced formulas; solution of triangles; expressions for the area of triangles; radii of circumscribed, inscribed and escribed circles.

Algebra: More thorough knowledge of the pass subjects, together with Variation, Progressions, Permutations, and Combinations, Binomial Theorem, Interest forms with Annuities.

Euclid, Bb. IV, VI, and Definitions of B. V.

Note.—Mathematical teachers are recommended to make their pupils acquainted with modern geometrical nomenclature, classification and methods, and Dupuis' Synthetic Geometry is suggested for reference. No examination, however, will be exacted in this connection.

ENGLISH.

1. Grammar, Philology, Rhetoric, and Prosody:—The Examination will be chiefly on texts not prescribed, and will have relation to (1) the logical structure of the sentence, including the history of grammatical inflections; (2) the meanings and forms, both present and past, of words; (3) the elements and qualities of prose style; and (4) the structure of verse.

 HISTORY AND GEOGRAPHY.

English History from the discovery of America to the Revolution of 1688.

Geography to illustrate the History read.

CHEMISTRY.

Elementary Inorganic Chemistry: The practical study of the following elements with their most characteristic compounds, in illustration of the outlines of Mendelejeff's classification of the elements: Hydrogen, Sodium, Potassium; Magnesium, Zinc; Calcium, Strontium, Barium; Boron, Aluminium; Carbon, Silicon, Tin, Lead; Nitrogen, Phosphorus, Arsenic, Antimony, Bismuth; Oxygen, Sulphur; Fluorine, Chlorine, Bromine, Iodine, Manganese, Iron, Gold, Platinum.

BIOLOGY.

1. Elements of Botany: The Examination will test whether the Candidate has practically studied representatives of the flowering plants of the locality in which the preparatory school is situated, and representatives of the chief subdivisions of Cryptogams, such as a fern, a lycopod, a horsetail, a liverwort, a moss, a lichen, a mushroom, and a chara.

A knowledge of structure is required, such as can be obtained with the use of the compound microscope. Attention will be given in the Examination to drawing and description of parts of plants supplied, and to the classification of these. Comparison of different organs, morphology of root, stem, leaves, and hair, parts of the flower, reproduction of flowering plants, pollination, fertilisation, and the nature of fruit and seeds.

2. Elements of Zoology: Practical study of the subject as defined in *The High School Zoology*, but limited by the author's syllabus of the work.

Examiners are recommended to allow a choice of questions on each subject.

The percentage required for pass standing will be 40 per cent on the whole examination, with a minimum of 25 per cent on each subject.

UNIVERSITY COUNCIL.

The Council consists of the Chancellor, the Trustees, the Members of the Senate, and forty-one elective members.

The Chancellor is elected by the Council, except when two or more candidates are nominated, in which case the election is by registered graduates and alumni. He holds office for three years, and, as highest officer of the University, presides at meetings of Council and Convocation, and at Statutory meetings of Senate. In his absence he is represented by the Vice-Chancellor.

Of the elective members eight retire annually, except in every fifth year when nine retire. Successors are elected by registered graduates and alumni. Retiring members may be re-elected.

The Council has power to discuss all questions relating to the College and its welfare, to make representations of its views to the Senate or the Board of Trustees, to decide on proposals for affiliation and to arrange all matter pertaining to the installation of the Chancellor, its own meetings and business, the meetings and proceedings of Convocation, and the fees for membership, registration and voting.

Convocation for the conferring of degrees, etc., is held upon the last Wednesday of April in each year.

Dr. Williamson is preparing for "Doomsday Book" a history of the first fifty years of the University. He purposes giving an account of the Funds raised at different times for general or special purposes during this period, with the names of subscribers, down to the Jubilee Fund of 1887-90. This history is now being published in the Queen's College Journal, in successive instalments, with the expectation that old friends who have in their possession documents or reminiscences of interest may send them to the author, before final shape is given to his narrative in the Doomsday Book. When the history is completed, an abridgement with a sketch of the different Funds and the principal contributors will be published in the Calendar.

ENDOWMENT FUND.

In connection with the endowment scheme begun in January, 1869, and also with the building and endowment scheme begun in May, 1878, paid subscriptions secure privileges, according to the following regulations:—

1.—A donor of \$500 founds a SCHOLARSHIP bearing his own name or any other which he may give it, and acquires the privilege of naming *annually* one student to attend College for one session, free

of class fees. On the founder's death his lineal representatives become entitled to the privilege of free attendance in the order of seniority.

2.—Donors of \$100, 200, \$300 and \$400 may nominate, at any time during life, one, two, three or four students respectively, to a course in Arts, free of class fees.

GENERAL ANNOUNCEMENTS.

QUEEN'S COLLEGE has, under its Royal Charter, "the style and privileges of a University."

The Fiftieth Session will open on Wednesday, the first of October, 1890.

 A compilation of statutes and by-laws containing information for students is published separately. Copies are to be obtained from the Registrar.

BOARDING.—No student is allowed to board or lodge in any house not approved of by the Senate, except by permission of parents or guardians given in writing. Information as to approved houses may be obtained from the Registrar.

REGISTRATION.—All students are required to have their names, with other particulars, entered in the University Register. At the time of Registration they must pay the required fees, or produce the Treasurer's receipt for them. They must also present a certificate of character from their clergyman or other competent person and sign a declaration, promising due obedience to the University authorities.

ATTENDANCE AT CHURCH.—All students must attend the churches to which they profess to belong, and produce certificates of attendance from their clergymen when required.

THE LIBRARY contains about 18,000 volumes. Students are entitled to the use of it, subject to by-laws.

THE OBSERVATORY.—In 1855 an Astronomical Observatory was founded by subscribers, aided by the City Corporation, and in 1861 was transferred by deed to the University. Facilities are given to students for obtaining a knowledge of Practical Astronomy.

THE MUSEUM.—Demonstrations are given to students of Natural Science. Friendly services towards the enlargement of the Museum are solicited.

ACADEMIC COSTUME.—All graduates and undergraduates, when attending class or any college meeting, shall wear the costume prescribed by the University.

Each degree has its distinctive hood, as follows:—
 B.A., black, bordered with red silk; M.A., scarlet; D.Sc., black, lined with blue, bordered with white; M.D., scarlet, bound on the edge with white; B.D., white, with crimson plush border; D.D., black, with white lining; LL.B., black, bordered with white fur; LL.D., black silk, lined with blue silk.

FEES.—Graduation Fees must be paid before Convocation Day; examination fees before April 11th; all other fees on or before University Day, Oct. 16th. Nominations cover only class fees.

FACULTY OF ARTS.

ART I. PASS MATRICULATION.

The classes and pass examinations in the University are open to unmatriculated students, but candidates for a degree must pass the Matriculation Examination in Latin, Greek or Moderns, Mathematics and English, before being admitted to Examination on any of the work of the University Course.

Certificates of work done in other Institutions recognized by the Senate and Teachers' Certificates will be accepted *pro tanto*.

Matriculation Examinations are held annually in July and September.

Honours and Scholarships at Matriculation will be awarded on the combined results of the Pass and Honour Examinations in July.

For subjects of Matriculation see page v.

ART. II. HONOUR MATRICULATION.

Candidates who intend to pursue an Honour Course in the University are recommended to take the Honour Matriculation in Latin, Greek or Moderns, and Mathematics.

Students who take Honours at Matriculation are not required to pass the Junior classes in the same subjects in the University.

ART. III.

Teachers' Certificates, will be accepted *pro tanto* on the following schedule:

ART. III. ONTARIO TEACHERS' CERTIFICATES.

Teachers' Certificates, which are of sufficiently recent date, will be accepted *pro tanto*, according to the following scheme:

(a) Second class certificates will be accepted for Matriculation in Mathematics, English, and History and Geography.

(b) Class I, Grade *C* will be accepted:

In Mathematics, for Junior Mathematics.

In Physics, for Junior Physics.

In English, for Junior English.

In History and Geography, for Matriculation.

In Latin, Greek, French and German, for the Junior class in the subject or subjects professed.

In Chemistry, for Junior Chemistry.

(c) Class I, Grade *A* or *B* will be accepted:

I. MATHEMATICAL SIDE.

In Mathematics, for Junior and Senior Mathematics, and first Honour Mathematics, except in the subject of Modern Geometry.

In Physics, for Junior and Senior Physics, except that the candidate must pass an examination on Heat and Electricity.

In English, for Junior English.

In History and Geography, for Matriculation.

In Chemistry, for Junior Chemistry.

II. LITERATURE SIDE.

In Mathematics, for Junior and Senior Mathematics.

In Physics, for Junior and Senior Physics, except that the candidate must pass an examination on Heat, Electricity, and either Light or Sound.

In English, for Junior and Senior English.

In History and Geography, for Matriculation with Honour standing in these subjects.

In Chemistry, for Junior Chemistry.

In Latin, Greek, French or German, for the Junior class in the subject or subjects professed.

ART. IV. EXTRA-MURAL STUDENTS.

1. The Senate may for special reasons allow Extra-mural Students to come up for examination upon the work of the Pass or Honour courses without attendance upon classes ; but, if candidates for a degree, they must pass the Matriculation Examination before being registered.

2. Extra-mural students must register before University-day (Oct. 16th), and obtain from the Registrar Class tickets in the subjects upon which they propose to be examined in the following April or September. These tickets must be forwarded at once to the Professors of the respective classes.

3. The Senate may hold an Examination in any locality on application from not less than five candidates who have complied with the above regulations.

4. Extra-mural students must write the essays and exercises prescribed. (See "Subjects of study for extra-mural students,") and send them to the Professor of the subject at the dates specified.

5. Classes will be held in the University in July and August, in any subject in which at least ten candidates present themselves. The fee for each class will be \$10. Candidates must send in their names and pay the fees to the Registrar before June 1st. The University will send a Lecturer, on any subject, in May and June, to any centre in Ontario or Quebec where a sum of \$200 is guaranteed before April 15th.

ART. V. COURSE LEADING TO THE DEGREE OF B.A.

COURSE II.

Junior Latin, Junior Greek or Moderns, Junior and Senior English, Junior and Senior Philosophy, Junior and Senior Mathematics, Junior and Senior Physics, together with any four of the following :

(1) Senior Latin, (2) Senior Greek or Moderns, (3) Junior and Senior History, (4) Junior and Senior Political Science, (5) Junior and Senior Chemistry, (6) Junior and Senior Natural Science, (7) Hebrew. First year Honours in (8) Mathematics, (9) Physics, (10) Latin, (11) Greek, (12) Moderns, (13) English, or (14) Philosophy.

No student is allowed to take a Senior class before passing the Junior in the same subject.

The classes of the B.A. course may be taken in any consistent order, but students are recommended to take the classes in Classics and Mathematics in the first two years of their course.

†Only for those who have not yet taken them.

**ART. VI. COURSE OF STUDY LEADING TO THE
DEGREE OF M.A.**

Students who intend to qualify for High School Teachers are recommended to take a course leading to the degree of M. A.

The degree of M. A. is conferred upon students who take Honours in one of the following courses:—

- Course 1—Latin and Greek.
- “ 2—Latin and Moderns.
- “ 3—English and Moderns.
- “ 4—English and History.
- “ 5—History and Moderns.
- “ 6—English and Political Science.
- “ 7—History and Political Science.
- “ 8—Mental and Moral Philosophy.
- “ 9—Pure Mathematics, Physics and Prac. Astronomy.
- “ 10—Mathematics, Physics and Descriptive Astronomy.
- “ 11—Chemistry and Experimental Physics.
- “ 12—Chemistry and either Botany, Zoology or Geology.
- “ 13—General Biology (including Botany and Zoology) and Geology.
- “ 14—Chemistry, Botany, Zoology and Geology.

Course 9 comprises—All the Mathematics of the Honour course, together with 1st Honour Physics and Practical Astronomy.

Course 10 comprises—1st and 2nd Honour Mathematics, 1st and 2nd Honour Physics, and General Astronomy.

Course 11 comprises—Honour Chemistry and work in Physical Laboratory.

In addition to his Honour course, a candidate must take the following classes of the B. A. course:—

**ART. VII. DEGREES OF DOCTOR OF PHILOSOPHY (Ph.D.)
AND DOCTOR OF SCIENCE (D.Sc.)**

1. Candidates for these degrees must have previously taken the degree of M.A. in the subjects they propose to offer, or must satisfy the Senate of their ability to proceed with the course.

2. Neither of these degrees can be obtained in less than four years from the date of graduation as M.A.

3. Candidates must give notice in writing to the Senate of the course they intend to take, at least two years before they present themselves for examination.

4. All candidates must submit a thesis on some subject connected with their special course, embodying the results of original investigation.

DOCTOR OF LAWS (LL.D.)

This degree is honorary, and is awarded for literary, scientific or professional distinction.

Students who matriculate with first-class Honours in Mathematics may omit the Junior Class. But those who intend to take an Honour course in Mathematics are advised to read the Geometry of this class.

SENIOR CLASS.

Algebra—Logarithms, principle and application of Indeterminate Coefficients, Arithmetic, Geometric and Harmonic Series; and Series of squares, triangular numbers and cubes; Elementary Continued Fractions.

Geometry—Part III. of Dupuis' Synthetic Geometry; Elementary Synthetic Solid Geometry.

Trigonometry—Preceding De Moivre's theorem.

HONOURS.*1st Honour Class.*

Synthetic Solid Geometry.

Analytic Geometry of two dimensions (C. Smith's Conics).

Trigonometry following De Moivre's theorem (Locke's Higher Trigonometry).

Higher Algebra and Elementary Determinants (Hall and Knight's Higher Algebra).

Dupuis' Synthetic Geometry, Parts IV., V.

2nd Honour Class.

Differential Calculus (Edward's).

Salmon's Conics, Chaps. IV., V., IX., X., XIII. from sec. 233, XIV., XV., XVII.

Spherical Trigonometry and Geodesy.

Determinants and Theory of Equations.

3rd Honour Class.

Analytic Geometry of three dimensions (Aldis).
 Integral Calculus (Williamson).
 Differential Equations.
 Quaternions (Kelland and Tait).
 Theory of Probabilities (Hall and Knight's Higher Algebra).

The following list of books of reference upon the foregoing subjects is given:—

Conics.

W. B. Smith's Coordinate Geometry; Casey's Conic Sections; Todhunter's Conic Sections.

Trigonometry.

Johnson's Trigonometry; Todhunter's Plane Trigonometry; Todhunter's Spherical Trigonometry.

Higher Algebra, &c.

Salmon's Lessons in Higher Algebra; C. Smith's Treatise on Algebra; Crystal's Algebra; Wentworth, McLellan & Glashan's Algebraic Analysis; Hanus' Determinants; Muir's Determinants; Dostor's Determinants.

Calculus.

Todhunter's Differential Calculus, and Integral Calculus; Byrley's Differential and Integral Calculus.

Differential Equations.

Boole's Differential Equations; Forsyth's Differential Equations; Woolsey Johnson's Differential Equations.

Solid Geometry.

C. Smith's Solid Geometry; Salmon's Solid Geometry.

Quaternions.

Laisant's Quaternions; Hardy's Quaternions; Tait's Quaternions.

PHYSICS.

JUNIOR AND SENIOR CLASSES.

Lectures and Experiments are given on the following subjects:

Thermometry—Calorimetry (Specific and Latent Heats)—Hygrometry—Transference of heat (Conduction and Radiation)—Dynamical theory of heat.

Light.

General laws of Radiant Energy—Geometrical Optics—Physical Optics—Construction and Use of Optical Instruments—Spectrum analysis.

Acoustics.

Physical Theory of Music—Optical methods of studying vibratory motions.

Magnetism, with special reference to terrestrial magnetism.

Electricity.

Frictional Electricity—Voltaic Electricity—Thermo-Electricity—Magneto-Electricity—Electro-Magnetism—Diamagnetism—Electro-Dynamics.

Algebra, Geometry and Trigonometry are applied to the solution of Physical and Dynamical problems, and weekly exercises are given throughout the session.

Text-book : Marshall's *Introduction to the Science of Dynamics*, parts I. and II.

The following books should be used in connection with the lectures :

Deschanel's *Natural Philosophy* or Ganot's *Physics*.
Everett's *Units and Physical Constants*.
Chambers' *Mathematical Tables*.

Beginners will find Gage's *Elements of Physics* full of suggestive experiments, and more advanced students will consult with advantage Tait's *Recent Advances in Physical Science*, and Clerk Maxwell's *Matter and Motion*.

Students should take the class of Junior Mathematics before entering the class of Junior Physics, and the class of Senior Mathematics before entering the class of Senior Physics.

In the Junior Class the subjects principally treated will be :

1. Marshall's Dynamics, Part I. and Part II., Chaps. I. to IV.
2. Science of Heat.

In the Senior Class :

1. Marshall's Dynamics, Part II., Chaps. V. to end.
2. Light, Sound, Electricity and Magnetism.

FIRST HONOUR CLASS.

Students should take the class of First Honour Mathematics before entering this class.

The work will be a continuation of that done in the Junior and Senior, with applications of higher mathematics.

The following books are recommended :

Thomson and Tait's Natural Philosophy.
 Besant's Hydrostatics.
 Frost's Newton's Principia.
 Tait's Properties of Matter.
 Balfour Stewart's Heat.
 Clerk Maxwell's Theory of Heat.
 Tait's Thermodynamics.
 Aldis' Geometrical Optics.
 Lloyd's Wave Theory of Light.
 Taylor's Sound and Music.
 Cuming's Theory of Electricity.

Students are required to attend the class in Astronomy at the observatory. This includes :

Examinations, written and oral, on descriptive and theoretical Astronomy, with the use of instruments.

Students who may desire more extended practice in observations with the Theodolite, Sextant, Transit and Equatorial, with their reductions, will have an opportunity of attending for this purpose a class during the summer from 15th May to 12th July.

Text-books : Lockyer's Astronomy, Loomis' Practical Astronomy.

HIGHER HONOURS.

Students studying for Higher Honours will have the opportunity of reading with the Professor the applications of the Higher Mathematics to Physics. A knowledge of the Differential and Integral Calculus and of Analytical Geometry of three dimensions is necessary.

The subjects taken up will be Dynamics of a Particle and of a Rigid Body, for which the student may read the following works :

Tait and Steele's Dynamics of a Particle.
 Todhunter's or Minchin's Analytical Statics.
 Pirie's Lessons on Rigid Dynamics.

Lectures will be given on the Dynamical Theories of Heat, Light and Electricity.

PHYSICAL LABORATORY.

The Physical Laboratory is open daily during the session from 10 to 3 o'clock.

Instruction is given in experimentation ; and facilities are offered for studying the construction and use of Physical apparatus, and for doing independent or original work.

MENTAL AND MORAL PHILOSOPHY.

JUNIOR CLASS.

Lectures on the History of Greek Philosophy, with special study of Plato's Theaetetus and Aristotle's Ethics (Peter's translation).

The essays and exercises prescribed are compulsory.

SENIOR CLASS.

Lectures on the general principles of Mental and Moral Philosophy.

The essays and exercises prescribed are compulsory.

FIRST HONOUR CLASS.

Critical study of the Philosophy of Kant, as contained in Watson's Selections from Kant, and of Green's Prolegomena to Ethics. Discussion of the Principles of Psychology and Logic.

SECOND HONOUR CLASS.

This class is intended partly for the study of the work prescribed for Honours, but mainly for the independent investigation by students of philosophical systems and theories.

HONOURS.

Mental Philosophy.

Candidates will be examined on the following books :

- Plato's Republic and Theætetus.
- Aristotle's De Anima.
- Descartes' Discourse on Methods and Meditations.
- Locke's Essay on the Human Understanding.
- Berkeley's Philosophical Writings (Fraser).
- Hume's Treatise on Human Nature, Vol. I., with Green's Introduction (Green and Grose's edition).
- Kant's Critique of Pure Reason and Prolegomena.
- Mill's System of Logic.

Moral Philosophy.

Candidates will be examined on the following books :

- Aristotle's Nicomachean Ethics.
- Spinoza's Ethics and De Intellectus Emendatione.
- Hume's Treatise on Human Nature, Vol. II., with Green's Introduction (Green and Grose's edition).
- Kant's Critique of Practical Reason (Abbott).
- Hegel's Philosophy of History.
- Mill's Utilitarianism.

Candidates are expected to read such books as Herbert Spencer's First Principles and Data of Ethics, Green's Philosophical Works, Wallace's Logic of Hegel, E. Caird's Critical Philosophy of Immanuel Kant, and Social Philosophy and Religion of Comte, Bradley's Principles of Logic, and J. Caird's Spinoza.

Honours for Extra-mural Students.

The subjects of study are the same as those prescribed for intra mural students, but candidates are recommended not to attempt the examination without attendance on the class for First Year Honours.

—

POLITICAL SCIENCE.

Students are recommended to take the class of Junior Philosophy either before or during the same session as that of Junior Political Science.

JUNIOR CLASS.

The lectures will include a discussion of the general principles of Political Economy.

SENIOR CLASS.

The lectures will include a critical examination of the leading theories of the State, and a discussion of the nature of Social and Political relations.

In both classes fortnightly essays will be required. Books for reference will be announced along with the subjects of essays.

HONOURS.

First Year.

The class will meet for the discussion of Economic, Social and Political Principles, and for the critical reading of portions of the works prescribed for Honours.

Candidates will be examined on the following books:

Political Economy.

- Smith's Wealth of Nations.
Malthus' Essay on Population.
Mill's Principles of Political Economy.
Walker's Political Economy.
Cairnes' Leading Principles of Political Economy.
Ingram's History of Political Economy.

Society and the State.

- Plato's Republic.
Hobbes' Leviathan.
Locke's Treatise on Civil Government.
Maine's Ancient Law.
Carlyle's Sartor Resartus, Book III.
Montague's Limits of Individual Liberty.

Second Year.

The class will meet for a more detailed discussion of Economic, Social and Political Principles.

Candidates must show familiarity with the substance of the following books:

Political Economy.

- Cunningham's Growth of English Industry and Commerce.
List's National System of Political Economy.
Marx's Capital.

CHEMISTRY.

Candidates who intend to take an Honour Course in Chemistry should be prepared to enter the Senior Class in their second year.

JUNIOR.

The principles of Chemistry, including the laws of combination, the atomic theory, notation, equations and calculations, and the more obvious relations of elements and compounds.

The more commonly occurring elements and their compounds.—Electrolysis.—Spectrum Analysis.

SENIOR.

Study of selected examples to illustrate the laws of combination, the determination of combining, atomic and molecular weights, and of the formulas of compounds.

Classification of the elements according to the Periodic Law.

Elements of Crystallography.

An outline of Organic Chemistry.

The study of these subjects is accompanied by laboratory practice.

Books: Goodwin's Chemistry, Mixer's Elementary Chemistry, Remsen's Inorganic Chemistry (Advanced), Remsen's Organic Chemistry, Ramsay's Experimental Proofs of Chemical Theory.

HONOURS.

COURSE 12.

First Year.

General Chemistry—The rarer elements and compounds studied in relation to the Periodic Law.

Organic Chemistry.

Systematic Mineralogy.

Metallurgy.

Qualitative Analysis, including the use of the blow-pipe and the spectroscope.

Preparation of organic compounds.

- Books :* Roscoe & Schorlemmer's Text Book of Chemistry.

COURSE FOR STUDENTS OF MEDICINE.

The course extends over two sessions. The *first session's* work consists of experimental lectures on the principles of chemical science with special reference to its bearing on medicine. (N.B.—The class meets at the date set down in this Calendar for the opening of classes in Arts. See p. 28). The *second session* is devoted to the preparation and study of the more commonly occurring elements and their compounds. The student prepares and examines for himself the principal chemical substances used in medicine.

In the class of *Analytical Chemistry* systematic testing of chemical substances is taught.

In the class of *Chemical Toxicology and Urine*

Analysis the subjects are studied both practically and theoretically.

With the exception of the first year class, the classes in Chemistry may be taken during the summer session.

Books for consultation :

- Goodwin's Chemistry.
 Crum Brown's Chemistry.
 Bernthsen's Organic Chemistry, trans. by Geo. McGowan, Ph.D.
 Charles' Physiological and Pathological Chemistry.
 The Urine, the Common Poisons, and the Milk, by Prof. J. W. Holland.

NATURAL SCIENCE.

Gray's Structural Botany.

Bessey's Botany.

Packard's Zoology.

Dana's Manual of Geology.

HONOURS.

The course extends over two years and embraces Book work and Laboratory work. Essays are required on specified subjects in every department.

*First Year.**Botany :*

A practical acquaintance with the Phænogamous Plants of Canada is required of the candidates.

Books for reference and Laboratory work :

Spotton's Botany.

Gray's Manual of Botany.

Prantl and Vines, Text Book of Botany.

Candidates will also be examined on the following :

Gray's Structural Botany.

Bessey's Botany.

Zoology :

Examination and comparison of representative species from the division Invertebrata.

Animal dissection.

Books for reference and Laboratory work :

Balfour's Comparative Embryology.
 Huxley's Invertebrata.
 Huxley and Martin's Practical Biology.
 Brooks' Handbook of Zoology.
 Packard's Zoology.

Candidates will be examined on the following :

Claus and Sedgewick's Zoology.
 Foster & Balfour's Elements of Embryology.

Geology :

Outlines of Physical Geography, Geology and Palæontology.
 Examination and determination of minerals, rocks and fossils.

Books for reference :

Elisée Reclus' The Earth, The Ocean.
 Dana's Manual of Mineralogy.
 Johnstone's Physical Atlas.

Candidates will also be examined on the following :

Page's or Geikie's Physical Geography.
 Lyell's Principles of Geology.
 Dana's Manual of Geology.

*Second Year.**Botany :*

Laboratory work in the examination of Phænogamous and Cryptogamous Plants.
 Distribution of plants in time and space.
 Economic Botany.
 A practical acquaintance with the Cryptogamous Flora of Canada is required of candidates.

Books for Laboratory work and reference :

Sach's Text-book of Botany.
 Thome's Botany.

IV. COMPARATIVE GRAMMAR OF THE ROMANCE
LANGUAGES.

Books recommended :

- Gustav Körting, Encyklopaedie u. Methodologie der
romanischen Philologie, dritter Thiel.
Gröber, Grundriss der romanischen Philologie.

Candidates may omit any two periods in German and any three in French. They will be expected to show an intimate knowledge, at first hand, of the periods and works professed, and a general knowledge of the history of the language and literature.

Two essays of considerable length will be required, one written in French and the other in German, on approved subjects connected with these languages or their literature. The essays must be the candidates' unaided composition, give evidence of originality of treatment, be correct as to orthography and syntax, and show, at least, an ordinary mastery of style.

A short composition must, in addition, be written in presence of the examiner.

Candidates must also be able to converse fluently in French and German on any ordinary theme.

3. *Course for the Degree of Ph.D. in History and
English Literature.*

(a.) HISTORY.

DEGREE OF BACHELOR OF DIVINITY.

REGULATIONS.

1. Candidates for the degree of Bachelor of Divinity (B.D.) must be Graduates in Arts of this University, or of a University whose degrees are recognized by the Senate.
2. The degree shall not be conferred until the candidate has completed the theological curriculum, with a view to the ministry in the church to which he belongs, and has passed a satisfactory examination in the branches of Theology taught in the University.

3. The subjects of examination shall be in two departments: the first embracing (1) Hebrew and Chaldee, (2) the Evidences of Religion, Biblical Introduction and the Inspiration of Scripture; the second embracing—(1) Church History, (2) Biblical Criticism, (3) Systematic Theology.

4. Candidates who have completed the theological course may be examined in either of these departments, and may defer their examination in the other department, provided there be not a greater interval than two years between their two examinations.

5. Students may be admitted to examination in the first department, at the end of the second session of their theological course.

6. A candidate may, subject to the preceding regulations, appear at any University examination in Theology, provided he gives two weeks' notice of his intention to the Registrar.

Subjects of Examination:

GRADUATION IN MEDICINE.

The degree of Doctor of Medicine (M.D.) is conferred upon candidates who comply with the following regulations :

1. Except as provided in the next regulation, every candidate must pass a matriculation examination upon the following subjects :

English Language, Grammar and Composition.
Arithmetic.
Algebra, to the end of Simple Equations.
Geometry, first two books of Euclid.
Latin, as in Arts, or a full equivalent.
Options, one of which must be taken ; Stewart's Physics,
or one book in Greek, French or German.

2. Matriculants in Arts, graduates from a recognized University, and students who have passed the examination of the college of Physicians and Surgeons of Ontario, or of Quebec, are not required to pass the above examination.

NOTE.—As the Royal College of Physicians and Surgeons (England) requires Physics in matriculation, those intending to take its degree should pass in Stewart's Physics.

3. Candidates who are not graduates in Arts must furnish evidence of having attended some recognized Medical School for not less than four full sessions, and must pass all the required examinations.

Candidates who are graduates in Arts will be required to attend only three sessions.

4. All candidates must furnish evidence of having had six months' experience in dispensing medicines in a Physician's office.
