AGRICULTURE

Notes and Suggestions of Practical Utility

FOR THE FARM, FIELD, GARDEN AND DAIRY.

Cleanings of Interest for Our Country Readers.

Some machinery costs more than it saves. There is no gain in close-cropping pastures. Have large fields, little fencing and long furrows.

The boys and girls must be taught to love the farm. The highest culture will soon be found on the farm.

Give the farm credit for what it furnishes for the family.

Organization is the only hope for the toiling industrial farmer.

Raise the best of everything, beginning with your own children.

There is a large field for study and improvement in the matter of feeding.

A crop of clover roots is equal to a good dressing of barnyard manure.

Every farmer should be compelled to keep his balls and his dogs at home.

All good farming has got to depend on some system of stock husbandry.

A weed seed that has just germinated is killed if mowed over so little, and this is the time when it should be attended to.

Let us be ambitious to elevate our occupation where it will command honor.

It is better to have a little leisure time than to have more work than you can do.

We all work for profit, for gain, be we farmer, merchant, laborer or mechanic.

That a well seasoned woodpile in the wood-house is a source of comfort to your wife.

Everything done toward beautifying and improving a place is enhancing its value.

Nothing will put the bloom of prosperity on a community of farmers like dairying.

The more study we put into our chosen occupation the more success we will have.

Farmers cannot be too careful about putting their money and feed into old animals.

It is important to save time and labor in the haying field, as well as in the manure field.

On the productions of the farm depend the welfare and prosperity of our entire nation.

One of the most difficult problems in dairying is to prevent a loss of fat in the butter-milk.

Education, mental strength and vigor pay as well on the farm as in any other department.

On the farm, at least, in nearly all cases, it is better to sell and regret than to keep and regret.

As soon as any of the early vegetables are over some other crop should at once be planted.

Power and superiority are the rightful attributes of the farmer, not weakness and dependence.

If haying and hoeing come together use your judgment about which to do first, and keep cool.

If farmers wish to enjoy the respect to which they are entitled, they must respect themselves.

Is there any especially rich acre upon your farm? If so, does it not pay better than any other acre?

Whenever the potatoes are dry they should be kept out of the sun or their quality will be injured.

As soon as the early peas are through, remove the vines and plant cucumbers or beans for a late crop.

A better knowledge of the dairy cow has been gained, and with this knowledge has come a better cow.

In no other department of farm management is there so much mismanagement as in the care of live stock.

The very best time to kill weeds is just before you see them, and this can only be done by constant cultivation.

Cabbages are rank feeders and need plenty of cultivation. Merely keeping down the weeds does not answer.

Let the bottom of the silo be on a level with your feeding or stable floor, with center a trifle higher than sides.

A farm so operated that all the produce sold off it reduces its fertility will in all time reach the little end of the horn.

The hoeing and haying can be carried on together better now than under the old system when work was slower.

Whether there are many weeds or not, frequent stirring up of the soil is necessary to keep the cabbage growing.

Regular hours for rising, going to work and quitting work are just as essential to success on the farm as in the store or office.

There is a vast difference between good clover hay and poor clover hay, and that difference lies mainly in the curing of it.

A good barn will much more than pay interest on its cost by protecting the animals, crops and implements from the weather.

Any crop is better than weeds, though weeds are better than bare ground, but the weeds should never be allowed to go to seed.

Square dealing pays best every time, and nowhere better than in the dairy; cheat nobody, and be sure your cows do not cheat you.

As a general rule only about one-fourth of the ground is covered with a growth of grass, leaving three-fourths of the ground unoccupied.

Give your stable a thorough cleaning occasionally. It will more than repay you in the way of appearance, and is beneficial in a sanitary way.

It is only the beginning to have the garden well planted. After this comes the care of it, and on this care depend the results to a very large degree.

One ton of hay properly cured is worth twice as much as if improperly cured, and the extra labor required to secure a good article is very slight.

Level culture of all vegetables seems now to be the universal method. Hilling causes the plants to suffer in times of drought more than does level culture.

A variety of grasses makes better pasture than one, two or three, because they give a longer season. Try to have both early and late growing sorts in the mixture when you seed.

The dried apple contains all the elements of the fresh fruit, yet the latter is far more nourishing and digestible; so with ensilage and corn fodder.

A Yankee is said to have cured a hen of unseasonable broodiness by letting her sit on egg-shaped snowballs, water-soaked and frozen into solid ice.

The observant fruit grower never has any heavy pruning to do. The growth of each tree is carefully noted, and any excessive fronds that the trees indicate as being started are literally nipped in the bud.

At the Geneva, N. Y., experiment station experiments on the subject of cheesemaking have been carefully conducted and the conditions and results are shown in tabular form. Leaving out the tables the results of the several tests may be stated as follows:

Condition of manufacture:

1. The time required for the milk to begin to thicken after the addition of rennet varied from 9 to 25 minutes, and averaged 15 minutes.

2. The time from adding rennet to cutting curd varied from 15 to 60 minutes, and averaged 29 minutes.

3. The time required to heat to 98 degree F after cutting and stirring curd varied from 30 to 81 minutes, and averaged 50 minutes.

4. The time from reaching 98 degrees to drawing whey varied from 50 to 300 minutes, and averaged 100 minutes.

In general, it can be said that the behavior of the milk rich in fat was in no way different from that of ordinary milk. No special precautions had to be observed. The curd was as firm as that made from average factory milk.

On the composition of milk:

1. The amount of solids in one hundred pounds of milk varied from 12.46 to 14.94 lbs., and averaged 14 lbs.

2. The amount of fat in one hundred pounds of milk varied from 3.65 to 5.25 lbs., and averaged 4.56 lbs.

3. The amount of casein and albumen in one hundred pounds of milk varied from 3.10 to 4.01 lbs., and averaged 3.65 lbs.

4. The amount of casein in one hundred pounds of milk varied from 2.44 to 3.18 lbs., and averaged 2.92 lbs.

5. The amount of albumen in one hundred pounds of milk varied from 0.66 to 0.85 lbs., and averaged 0.73 lbs.

6. The amount of sugar, ash, etc., in one hundred pounds of milk varied from 5.52 to 6.05 lbs., and averaged 5.79 lbs.

Ratio of casein to albumen in milk:

1. There were from 2.44 to 3.18 lbs. of casein in one hundred pounds of milk, with an average of 2.92 lbs.

2. The amount of albumen in one hundred pounds of milk varied from 0.66 to 0.85 lbs., and averaged 0.73 lbs.

3. For each pound of albumen in the milk the casein varied from 3.09 to 5.46 lbs., and averaged 4 lbs.

The general results compared with those of last season appear to suggest that in milk richer in fat there is a larger proportion of casein relative to albumen than in milk less rich in fat; that, in other words, in rich milk a larger proportion of the nitrogen compounds can be utilized for cheesemaking. Further study is needed to confirm this statement, but our results are suggestive on this point.

On the composition of green cheese:

1. The amount of water in one hundred pounds of green cheese varied from 32.82 to 48.22 lbs., and averaged 37.83 lbs.

2. The amount of fat in one hundred pounds of green cheese varied from 28.90 to 36.51 lbs., and averaged 34.35 lbs.

3. The amount of casein and albumen in one hundred pounds of cheese varied from 18.80 to 25.23 lbs., and averaged 22.52 lbs.

For each pound of casein in the cheese the amount of fat varied from 1.40 to 1.68 lbs., and averaged 1.52 lbs.

On loss of constituents in cheesemaking:

1. The solids in one hundred pounds of

G. W. PEARSON, M.D. DYSPEPSIA, Threatened Heart Failure

LIVER TROUBLE, AND SKODA'S DISCOVERY.

G. W. Pearson by occupation is a Carpenter and Builder. He is favorably known in Waldo Co. He says:-

"For years I have suffered from Indigestion, Heart and Liver Trouble. At times my Heart would beat so feebly, I would be obliged to cease work for days at a time.

"I tried physicians and remedies, without number, but got no permanent relief, until I commenced the use of SKODA'S.

"I have taken one course, and am perfectly well. My wife has also received great benefit from the use of SKODA'S DISCOVERY and SKODA'S LITTLE TABLETS."

Mr. Pearson will answer any letters or inquiries.

SKODA DISCOVERY CO., WOLFVILLE, N. S.

milk varied from 12.46 to 14.94 lbs., and averaged nearly 14 lbs.

1. The amount of solids lost in whey varied from 5.95 to 6.58 lbs., and averaged 6.27 lbs.

3. The per cent of solids in milk that was lost in whey varied from 41.88 to 49.44 and averaged 44.80.

It appears from these results and from those secured last season, that the amount of milk solids lost for a hundred pounds of milk is fairly constant, being between 6 and 6.5 lbs.

The amount of milk solids, recovered in cheese varied much more, ranging from 5.31 to 8.66 lbs. for milk containing from 3 to 5.25 per cent of fat. It appears that when the milk solids increase, the cheese-producing solids, the fat and casein, increase, while the whey solids, the albumen, sugar and ash, increase very little in comparison. It, therefore, results that in rich milk a larger proportion of the solids is utilized in cheesemaking than in the case of poorer milk; in other words, there is a smaller proportion of loss of milk-solids in making rich milk into cheese.

Will Asiatic Cholera Follow?

Mr. J. Howard's theory that, one horror of a similar nature follows another to the number of three, has a chance for confirmation this coming summer if certain predictions prove true. First it was La Grippe; "A whim" the French define it. Second came deaths by scores from its after effects, or from the many atmospheric changes of the past few months. Severe cases of pneumonia, bronchitis, intense catarrh and general loss of strength were the results, until death was almost welcomed as a relief to the sufferers. So that this epidemic and its sequence has proven to be the most terribly realistic whim that ever visited this country. And now for number three; the theory is said to be advanced that the Cholera is very likely to find fertile soil in the generally debilitated constitutions of our people resulting from the effects of such a winter and spring as has just past. Whether the theory of three will be confirmed in this case or not remains to be seen. At any rate it behooves every person still affected by any of the complaints due to these climatic changes and epidemics, such as catarrh or bronchial troubles, to look well to themselves and see that every trace of the trouble is removed this present month; before the heat of summer still more debilitates their system. For years we have found that simple old remedy, Johnson's Anodyne Liniment, used as directed, to be the most certain remedy for all forms of lingering summer colds, catarrh or bronchial affections, as well as a preventive and cure for all kinds of summer complaints. It is absolutely certain that a remedy that has survived for eighty years as Johnson's Anodyne Liniment has done, must have more than average merit. We suppose there is not a family in this country but what has this good old fashioned remedy in the house. If there is we advise them to get it at once or write the manufacturers I. S. Johnson & Co., Boston, Mass., for a pamphlet describing its various uses for the last eighty years. Now is the time. Delays are dangerous, and an ounce of prevention is worth many pounds of cure.

CANADIAN PACIFIC R.Y.

NEW BRUNSWICK DIVISION. All Rail Line to Boston, &c The Short Line to Montreal, &c.

ARRANGEMENT OF TRAINS In Effect June 26th, 1893.

DEPARTURES. EASTERN STANDARD TIME.

6.00 A.M. EXPRESS for St. John, St. Stephen, St. Andrews, Healdton, Woodstock and points North; Bangor, Portland, Boston and points South and West.

POOR DOCUMENT

HORSE NOTES.

Money is tight. Buy smooth ones. See that the bits are strong. Fast walkers are in demand. Don't buy low-headed horses. Nancy Hanks is far from good. Alma Mater has seven in the list. Josie J. is said to be a 2.15 mare. Bad breakers have had their day. Superior road horses have the call. Vermont has a "phenom" in Mack. Mystic's entries closed Thursday. Unsoundness comes quickly enough. Uncertainty is the root of speculation. C. H. Nelson has fifty horses in training. Nelson, 2.10, will parade at Old Orchard. The get of Gen. Stanton are showing fast. Breed for the Morgan type with better size. Aral, 2.25½, is located at Brasher Falls, N. Y. Five per cent. entrance failed at Providence. Dora Thorne trotted a great race at Worcester. Stockton has declared against tin cup records. Nancy Hanks is feeding on hay worth \$63 a ton. Good nursing often beats professional attention. Speedy material is being developed everywhere. Dictator's loofs are being bound and trimmed with silver. G. O. Taylor in Hicks' string is a son of Ben Franklin. Better sell at a fair price than keep expecting a long one. Kentucky's October meeting promises to be the best ever held. Glimmer is the fifth of the get of Wilkes to enter the list. Hickok has arrived at Cleveland with his stable of fast trotters. Racing, good, square, quick and hot, is what the public want to see. A tough livery horse will cause most private drivers to wilt on the road. The aluminum shoe is a factor with horses that go light, especially pacers. It is a fundamental principle in betting that a bettor may have a chance to win. Saladin broke the half-mile pacing record when he went in 2.09½ at Wilmington, Del. F. Whitney of South Boston has brought Glimmer, 2.30, by Wilkes; reported price \$1000. Good roadsters bring higher prices than they did a year ago. On the books of the Rhode Island State Fair association are the addresses of 5,000 horsemen. Narragansett park, since its establishment twenty-four years ago, has cost its owner \$220,000. Coax them back instead of cutting them loose at the start, is a good plan to observe in the long run. M. R., by Falcon, is the best green four-year-old out in New Hampshire this season. He can trot in 2.25. Sprague Superb is said to have a four-year-old that can go in 2.20 this year and a three-year-old that can enter the list. G. H. French, Attleboro, Vt., bought a yearling Sidney colt, dam by Ed Wilkes in New York last week, for \$450. Josie J., Early Bird, Vega, Fred Wilkes D. M., T. Puck and Granista came together in the 2.21 class at Old Orchard, July 5. Buffalo trainers claim that George Sherman by Sherman, is the coming side wheeler, and that he will get close to record time. The best food for a mare in foal is oats, bran, some corn, a little oil cake, carrots, corn fodder and good hay in small quantities. Tommy Foster, who used to drive Thomas Jefferson, W. H. Allen, Billy D. and other celebrities, died recently at Providence, R. I. The bicycle sulky is responsible for the fact that the horses are going almost as fast this year on the half mile as on the mile tracks. Most every first-class livery stable contains a few animals that can hold their own on the road with the best horses in their section. At the late Omaha (Neb) meeting at the close of each race the starting judge requested the winners to step into the stand and get their money. A New York veterinary is of the opinion that if Guy 2.10½ had always received gentle handling he would have trotted faster than any horse up to date. For a man to make a success of almost any branch of business or trade he must be in love with it. This is as true of the horse business as of any other. A good many of the tracks and horse-men in the east are declaring against the 5 per cent. entrance plan. They declare it impracticable in its operation. Fides Stanton by General Stanton, is

one of the cracks of the season. He traces back to the dam of Fides, a great trotter in John Murphy's hands years ago. Hy Wilkes started in the 2.20 class at Fitchburg last week, Elcho in the 2.28 Johnny Knott in the 2.23, Sylvester K. in the 2.25 class, trot and pace and Joe in the 2.35. F. A. Newell has sent five mares to Ralph Wilkes (2), 2.18 to be bred, among them Ella Jackson, full sister to Aristos, 2.27½. Mr. Newell owns Bunco, Jr., 2.12½. Park Commissioner Straus of New York has named one of his crack two-year-old thoroughbreds Joe Ripley for the old-time trotter Joe Ripley 2.25, that he used to own. Stamboul, 2.07½ is showing up in excellent form at Terre Haute. Experienced judges are delighted with his appearance and gait, and predict that he will lower the record. Arion's two-year-old record was made with the old high-wheel sulky. Last year was his first in the east. This season in Marvin's hands, he should get very close to the stallion record. The old track of the Detroit Driving club is to go down in a blaze of glory. The club will hold its last Blue Ribbon meeting on it next month, and its meeting of 1894 will be held on the new track. The chestnut pacer by Stargard, a money winner at the recent Newport, (Vt) meeting, was bred by George M. Thomas of New York city and is registered under the name of Elton. George Stevens of Lancaster, one of New Hampshire's ablest horsemen, is doing the World's Fair, and incidentally is looking over his stock in and around Lexington, Ky. It will not be many years before the uncertain driver will have to go along with the uncertain horses. Drivers must be honest and know their business if they wish people to patronize them. Richmond, Ky., is said to have a sensational green pacer that recently bought from the plover for \$125. He is doing fast quarters and halves and will be started soon in the slow classes. St. Albans is conceded to be the best market for horses in Vermont. Better prices on the average are secured here for horseflesh than anywhere else in the state and often, too, for an indifferent article. Scott McCoy has issued a challenge to trot Rylan T. against any horse in New England for \$1,000 a side over Franklin park track July 4. The challenge is especially directed at Martha Wilkes and L. son. W. B. Fasig suggests that the Cleveland association should offer a purse of \$2,500 or \$3,000, entrance free, to any trotter hitched to an old-fashioned sulky to beat Maud S.' record of 2.08½ made on that track. It is understood that Palo Alto is part of the endowment of the university which owes its existence to Senator Sanford's munificence, and its continued existence would be a worthy memorial of its late owner. Nell F., by Rex Patchen, owned by H. A. Folsom, St. Johnsbury, Vt., is a fast mare in Homer Brewster's hands this year. She drove out Charles L. at Newport in 2.19½ and was timed in the race in 2.19½. Latest advices from the kite track at Independence, Ia., state that the pacer Blue Sign, 2.08½, is going great guns. He is shod with aluminum shoes, three and a half ounces in front and three ounces behind, and has already shown quarters in 30 seconds. The promising colt trotter, Sailing Glencoe, by Glencoe Wilkes, owned by Poolseller Hathaway of New Bedford, has developed a quarter crack and will be taken out of training and sent home this week. He is in N. J. Stone's string at the Manchester track. Now and then one finds an outspoken breeder with goods to sell who will describe them right and sell them right. Dr. F. L. Gerald of Laconia, N. H., is one of these, and his announcement elsewhere is one which carries weight and argument. Consult it. Hal Ben Franklin been afforded the stud advantages of Alcantara, or any other famous sire that has had access to a high class of mares, it is doubtful if any stallion living today with the possible exception of Nutwood would outrank him as a sire of 2.30 speed. The once famous race horse Aristides, by imp. Lexington, dam Sarong, by Lexington, the property of J. J. Tompkins of Chicago, died June 22. He was twenty-one years old. Aristides was the first winner of the Kentucky Derby. As a sire he was not a great success. It is worthy of note as showing the perfect faith which the late Senator Stanford had in the correctness of his belief in the thoroughbred-in-the-trotter theory and in its verification by Palo Alto that, though often asked to do so, he would not permit any colt to be named after the farm till the son of Dame Winnie was born. At Norwalk, Conn., last week, the grey gelding Walton Boy, 2.20½, ran away, throwing out his driver and owner, W. Lockwood, who was not seriously injured. The horse broke his leg and had to be destroyed. Walton Boy was foaled in 1881, and was by Wellington, dam Eve, by Edward Everett. Fred Lowe, of Brooklyn, owner of Lowlander, winner of the Brooklyn Handicap, is a book-maker. A few years ago he was a messenger at Brighton Beach race track. Two years ago he got money enough together to buy Lowlander for \$2,100. His winnings with the horse last Tuesday were over \$20,000. Before the race he hadn't \$200 in the world. Charles Marvin has driven horses to world records for age, etc., thirty-five times; Build

Doble, his nearest competitor, twelve times; Ed Bither, eleven times; C. W. Williams, nine times; N. W. Bar of Mand S. fame, seven times; C. H. Nelson, Crit Davis, Orrin Hickok and J. D. McMann, each four times. Dan Mace earned the honor but twice, and Hiram Woodruff but once. "Snapper" Garrison won the \$60,000 Chicago Derby with Bonndless on the 24th ult. The time for the distance, one mile and a quarter, was 2.10, the fastest on record. It was the greatest derby ever run in this country, and the honors belong mostly to Garrison, who rode the race of his life. Fully 75,000 people, crushed and jammed into almost a compact mass, and screamed with excitement at the conclusion of the event. There are a number of persons, to my knowledge, who were a few years ago engaged in this vocation that are now following the plow, and more should be, as there is no business that requires more brains and tact than that of training trotters, says a writer in "Clark's Horse Review." Horses are like men; their dispositions differ and you could not expect a lunthead to quickly become familiar with their respective peculiarities. There are instances where a horse had more brains than the man who was doing the driving. He simply developed himself and the driver gets the credit of making him a trotter, but the records show that was his first and last. There are, however, men with brains and intelligence that would not make good trainers for the reason that they are not suited to the business or the business to them. The Suburban Handicap of a guaranteed value of \$25,000 was decided at Sheephead Bay in the presence of 25,000 persons, and for the fourth time in the history of this race it was won by a poor man's horse, Lowlander, the property of Fred Lowe, a young man scarcely 25 years of age, with W. C. Daly's Terrifier second and the favourite, Therie Lorillard's Lamplighter, third. The time for the mile and a quarter was 2.06 2-5. It was the fastest Suburban ever run. Lamplighter carried thousands and thousands of dollars for the talent and the holiday throng, but the cheers that greeted the winner as he flashed past the post with Terrifier at his saddle girth were genuine, and had a true ring as they reverberated across the emerald plain of picturesque Sheep's Head and were lost in the broad Atlantic. The race was worth \$18,000 to the winner, \$5,000 to the second horse and \$2,000 to the third. HOW TO GO TO SLEEP. Hints For Those Who Lie Awake Nights In Bed. The activity of the brain is in direct proportion to the amount of blood contained in the vessels of the brain, and anything that lessens the amount of blood in these vessels will induce sleepiness, while the greater the flow of blood the greater will be the flow of ideas. This is comparatively a new discovery, for it used to be held that much blood in the brain caused sleep. Dr. William Hammond has, however, demonstrated the fallacy of this latter idea by a description of the results obtained by several experiments with instruments of precision, one of which was his own invention, which showed that the flow of blood to the brain was coincident with the degree of mental activity displayed in the subject. If a person lies down, thus allowing the blood to flow more readily to the brain and cannot sleep, let him get up, sit in a rocking chair and throw his head back and he will probably go to sleep very quickly. Some people have found by experience that they can sleep better after eating, and the doctor explained this by saying that the blood not being able to be in two places at the same time and having to go to the stomach to digest the food has to leave the brain, and therefore sleep follows. Some people are more active mentally when lying down than when sitting up because of the greater flow of blood to the brain. Dr. Hammond described a machine which would produce sleep when ever desired. It is something like a pair of carpenter's pinchers with rubber balls at the end. All one has to do is to screw it to one's neck, thus stopping the flow of blood, and one can go to sleep at will or sleep off one's train of thought. Discussing the relative merits of the human and animal brain, Dr. Hammond says that so long as there is such a thing as a pair of scales the ladies will have to admit that the average weight of a woman's brain is eight ounces less than that of a man. Nevertheless a woman is far more than able to hold her own. The amount of mentality does not depend on the size of the brain. Although smaller in quantity than that of a man, the brain of a woman is often composed of thicker gray matter, making it quicker and perhaps more subtle. Aids to Digestion. The morsel of old cheese taken after dinner is decidedly digestive. A roasted rabbit, to suit a fastidious taste, must have hung until it was a little "high." A new "midnight bite" of cheese, toast, etc., answers to the name of "Scotch partridge." A peculiarly delicious sauce made in Egypt and served at hotels is said to be the "essence of grasshopper." Dyspepsics are recommended to eat of the long sticks of Italian bread. If it doesn't cure them, it will do them no harm. A Battle for Blood. Is what Hood's Sarsaparilla vigorously fights, and it is always victorious in expelling all the foul taints and giving the vital fluid the quality and quantity of perfect health. It cures scurvy, salt rheum, boils and all other troubles caused by impure blood.

RIPANS TABULES.

RIPANS TABULES are compounded from a prescription used for years by well-known physicians and endorsed by leading medical authorities everywhere. In the Tabules the standard ingredients are presented in a form that is becoming the fashion with modern physicians and modern patients everywhere.

RIPANS TABULES act gently but promptly upon the liver, stomach and intestines; cure habitual constipation, dispel colds, headaches and fevers. One Table taken at the first symptoms of a return of indigestion, or depression of spirits, will remove the whole difficulty within an hour. Persons in need of the Ripans Tabules will find the gross package most economical to buy. It is also in convenient form to divide up among friends. The above picture represents a quarter gross box, sold for 75 cents. A single bottle can be had for 15 cents.

HONEST HELP FOR MEN

NO MORE MONEY TO QUACKS.
A sufferer from Enure, Nervous Debility, and Lost Vigor, was restored to health in such a remarkable manner, after all other means failed, that he will send the means of cure FREE to all fellow sufferers. Address, with stamp, to
MR. EDWARD MARTIN, (TEACHER)
802 146. DETROIT, MICH.

OLD DR. GORDON'S REMEDY FOR MEN

ABSOLUTELY
Cures Lost Power, Nervous Debility, Night Losses, Diseases caused by Alcohol, Over Work, Indigestion, Tobacco, Opium or Stimulants, Lack of Energy, Low Memory, Headache and Weakness.
Young, middle-aged or old men suffering from the effects of follic and excesses, restored to perfect health, manhood and vigor. RELY TO THOUSANDS BY THIS MARVELOUS REMEDY.

A Cure is Guaranteed!

To everyone using this Remedy according to directions, or money cheerfully and conscientiously refunded.
PRICE \$1.00 & PACKAGES \$5.00.
Sent by mail to any point in U.S. or Canada, securely sealed free from duty or inspection.
Write for our Book "STARTLING FACTS" for men only. Tells you how to get well and cures all ailments. Address or call on QUEEN MEDICINE CO., NEW YORK LIFE BUILDING, Montreal, Que.

TEACHER'S COLUMN.

Devoted to the Interests of the Provincial Teachers.

In Which We Publish the Entrance, Monthly and Final Examination Papers Used in the Normal School.

This Column is Open for Communications, and Will Contain Articles of Special Interest to Every Teacher—Teachers Who Wish for Information on Any School Question Can Obtain the Same by Enquiring Through This Column.

TEACHERS—I prepare teachers for advancement of class at their own homes. For particulars address, W. M. McDonald, P. O. Box 129, Moncton, N. B.—Adv. 3t.

Eighty-four applicants for admission to the Normal School were examined at the Normal School this week by Inspector Bridges.

Over 400 applicants have been examined in the province this week for admission to the Normal School.

Under the new system the candidates for admission in their application state what class they wish to apply for and they are examined accordingly. On some subjects they pass their final examination, that is they will not be required to write papers on this subject again at the close of their term at the Normal School. These include the following subjects for all classes, viz.: Reading, spelling, writing, English grammar and composition, geography, history, arithmetic, (including the keeping of accounts), and elementary natural history.

A USEFUL FORMULA.

For Ascertaining the Cubic Contents of Cylindrical Vessels.

A correspondent has sent us a very useful formula which is thought to be quite new. In finding the contents of cylindrical vessels the ordinary rules call for the use of aggravating decimals or fractions. This neat little device does away with all the bother. Let the diameter of any cylindrical tank be given in feet; then take five times the square of the diameter; take off 2 per cent. and the result is gallons per foot high. This is simplicity itself. Both the simplicity of the rule and the near approach of its results to the accurate contents will appear from an example or two.

Let the tank be 10 feet diameter (inside of course).

10x10=	100
5	
500	
Take off 2 per cent.....	10

490 gallons per foot deep which is within one gallon of the accurate measurement (490.87 gallons).

Take an 11 foot tank:

11x11=	121
5	
605	
2 per cent.....	12.1

592.9 gallons per foot deep, which is only one gallon away from the accurate contents (593.96). A rule so simple and so useful almost deserves a place in the common school texts. A note by the author draws attention to the fact that the 2 per cent to be subtracted is always just one-tenth of the first term written down—10 for 100 and 12.2 for 121 and so on.

Normal School Papers.

Concluded.

Algebra.

CLASS I, F. AND II, M. Time, 1 1/2 hrs.

1. Find the highest common factor of $x^3 - x, 2x^2 - 4x + 2, x^3 + x^2 - 2x.$
2. Find the least common multiple of $5x^2 + 2x^2 - 15x - 6$ and $7x^3 - 4x^2 - 21x + 12$
3. Find the value of $\frac{4}{9(x-2)} + \frac{5}{9(-1)}$

$\frac{9(x+3)^2}{9(x+3)^2}$

4. Solve $(x+a)(x+b) = x(x+c)$

Also solve $4(10x-3) - 64(3-2x) = 3$

$(24x-4)+96$

5. Solve $\frac{x+2}{7} + \frac{y-x}{4} = 2x-8$

$\frac{2y-3x}{3} + 2y = 3x+4$

6. Find two numbers whose difference is 6, such that if 1-3 the less be added to 1-5 the greater, the sum shall be equal to 1-5 the greater diminished by 1-5 the less.

7. A after doing three fifths of a piece of work in 30 days finishes it in 10 days with the help of B. Find in what time each would do it.

8. A certain number of two digits is equal to five times the sum of its digits; and if 9 be added to the number the digits are reversed; find the number.

Domestic Economy.

CLASS I, II, III. Time, 1 1/2 hrs. (For Female Candidates only.)

PART I—THEORY.

1. Why should special care be taken of the cellar and pantry in a home?

2. Exercise and Rest—Explain fully:—

(a) What is to be aimed at in exercise?

(b) Why is competition in games often injurious? (c) How do muscles rest?

3. What hints can you give to the proper measure of heat to cook veal—a loaf of bread—old potatoes, and beef hash.

4. Give an outline lesson to your older pupils on: "Earning Spending and Saving."

5. In knitting how do you "cast on," "cast off," "widen," "decrease" "purl."

PART II—PRACTICE

(Material, 1/2 yd. unpressed white cotton.) Work the following on the cotton

finished with: 1. Cut and make a tight dress sleeve with a buttonhole in wrist-band.

Composition.

CLASS I. Time, 1 hr.

1. Define accurately (1) Composition, (2) Style. How may a good style be secured?

2. Point out the distinction between the following pairs of synonyms, and construct short sentences to illustrate the accurate use of each: custom, habit; character, reputation; strong, powerful; delay, defer.

3. Explain what is meant by figurative language. Define the following, giving at least one example of each: Metaphor, synecdoche, metonymy, hyperbole, irony.

4. Punctuate the following:— So saying her rash hand in evil hour Forth reaching to the fruit she plucked she ate

Earth felt the wound and nature from her seat

Sighing through all her works gave signs of woe

That all was lost

5. Distinguish between rhyme and rhythm. State the conditions which are essential to perfect rhyme. Give perfect rhymes for each of the following: Importance, beware, speech, united, golden.

6. Scan the following lines. Name the metre. "Many a night I saw the Pleiads, rising thro' the mellow shade, glitter like a swarm of fire-flies tangled in a silver braid."

Reading.

CLASS I. Time, 1 hr.

1. Give a definition of good reading.

2. Name what you consider the principal things to be kept in view in teaching reading.

3. What are inflections?

4. What does the rising inflection indicate? Give an example.

5. What is the use of the circumflex or double inflection? Give an example.

6. What is pitch? What are the different degrees of pitch used in reading?

Book Keeping.

CLASS I. Time, 1 hr.

1. What advantage has the double entry over the single entry method of book-keeping?

2. What is trial balance?

3. In closing a property account, on which side should you place an inventory entry showing an asset? What other entry is usually needed to close the account? To re-open the account, on which side should you bring down your balance representing the asset?

4. Write out a specimen of a negotiable note.

5. Make the proper entries (ledger only) for the following transactions:—May 1. Sold H. M. Block, mds., \$700; for which I received cash \$200, and his note at 3 months for balance.

May 4. Discounted above note at Peoples Bank, receiving cash, less 90 days' discount at 6 per cent.

May 5. Gave towards a fund for a public library, cash \$500.

Geometry.

CLASS I, F. II, M. Time 1 hr. 30 min.

1. If the side of an equilateral triangle is equal to unity find the length of the perpendicular from any vertex to the side opposite. In an isosceles right-angled triangle if each of the equal sides is equal to unity find the length of the hypotenuse.

2. Describe a parallelogram that shall be equal to a given triangle and have one of its angles equal to a given rectilinear angle.

3. On a given straight line to apply a parallelogram which shall be equal to a given triangle, and have one of its angles equal to a given rectilinear angle.

4. In a right angled triangle what is the square of the side opposite the right angle equal to? In an obtuse angled triangle what is the square of the side opposite the obtuse angle equal to? In any triangle what is the square of a side opposite an acute angle equal to?

5. If a straight line be bisected and produced to any point the rectangle contained by the whole line thus produced and the part of it produced, together with the square on half the line bisected, is equal to the square on the straight line made up of the half and the part produced.

N. B.—Female candidates for class I will omit the 3rd and 5th and work the following:

(a) Equal chords in a circle are equally distant from the centre and converse.

(b) The opposite angles of a quadrilateral inscribed in a circle are equal to two right angles. After proving this, state its converse.

Teaching and School Management.

CLASS I. Time, 2 hrs.

I. Why should a teacher have a practical knowledge of psychology as a preparation for teaching?

II. How is skill in teaching and managing a school to be acquired? What is the relation between knowledge and skill?

III. What is the distinction between the oral and the text book stages of teaching a subject? Outline a plan of oral lessons for any one year or standard, in one of the following subjects, viz.: number, color, composition, health.

IV. On what general principles would you teach the following subjects from the text book: geography, arithmetic, grammar, reading. In addition to the general answer select a topic from one of the subjects named and show, in detail, how you would give a lesson on it.

V. What do you regard as the essentials

to good medical discipline? How do you propose to secure them?

VI. How would you deal with such faults and offences as (a) inattention, tardiness, talking, noisy and careless movements, (b) falsehood, disobedience, copying at examinations, impertinence. Select one each from (a) and (b).

VII. Show, on scientific principles, the necessity for proper ventilation in school rooms.

VIII. What are the dangers of improper admission and control of light? What is the nearest approach to ideal conditions of lighting school rooms.

IX. What are the principles on which time tables should be constructed? What are the difficulties to be met in arranging a daily programme of work for a school of four or more classes, and how may these difficulties be partially overcome.

X. Write a brief historical sketch of Pestalozzi or Rousseau.

N. B.—III, and IV—VII and VIII, are alternates.

Physiology and Hygiene.

I. II. Time, 1 hr.

1. What organs fill the chest of man? How are they connected and upon what mechanical arrangements does their action depend?

2. Explain the nature of disease, and some of the causes in which they originate.

3. What simple rule should govern the taking of food as to time, quality and quantity?

4. What causes led (1) to the vitiation, (2) to the purification of the air as a medium of respiration?

5. What is the duty of glands as organs of the body? Name the chief glands and their special office.

6. What is the cause of animal heat? How does its amount differ in different groups of animals, and with what other features of structure or habits is this amount usually associated?

7. Explain the deleterious effects likely to result from the use of tobacco, alcohol or opium.

Note.—Five questions, including the last, make a full paper.

Chemistry and Agriculture.

I. II. Time, 1 hr. 30 m.

PART I.

1. How would you show the presence of carbonic acid in the air? How may it be made artificially? Its relations to animal and vegetable life? Its chief mineral compounds?

2. From what source do plants derive their nitrogen? into what vegetable products does it enter? From which is it absent? How do these differ in their relative nutritive value and why?

3. How far is the character of soil dependent (first) on its origin? (secondly) on tillage? (thirdly), on the extent and method of cropping?

4. Explain the chemical nature of wheat flour, milk, cheese, butter, eggs, salt, soap.

5. The following substances are all taken, more or less, into the body as foods, viz.: sugar, salt, lime, iron, water, oxygen. Explain the part subsequently taken by each.

6. What is fat? What kinds of food favor its formation? What part does it play in animal life?

7. State what you know of the element sodium? What is soda? Whence is it obtained? For what uses?

8. Compare the burning of hydrogen, street gas, sulphur, phosphorus and charcoal. What are the characters of the products in each case?

PART II.

1. What physical and what chemical changes are illustrated in the firing of a gun, in the ignition of a match, in the combustion of mixed H. and O?

2. What are the common acids? From what sources are they derived? What do they all contain? What takes place when they are treated with metallic elements? Illustrate in each case?

3. Give symbols for ammonia gas, ammonia water, ammonium chloride, ammonium nitrate.

4. What gaseous products result from the action of nitric acid upon copper; hydrochloric acid on zinc; sulphuric acid on chalk? If possible, formulate the reactions involved.

5. Give symbols for hydrochloric acid, water, quick lime, calcium chloride, hydrogen sulphide, ammonia gas, carbonic acid, potassium hydrate. How may the same symbols be written so as to indicate the valency of the elements involved?

6. How would you proceed to get chlorine out of common salt? To get nitrogen from air? Hydrogen from water?

7. What right have we to express chemical changes in the form of equations? What amount of matter does an equation represent? Contrast a chemical with an algebraic equation.

8. Mention the principal natural compounds of the following elements: Iodine, Sulphur, Calcium, Phosphorus, Silicon, Magnesium, Aluminium.

9. State what you know of the composition of Porcelain, Steel, Bronze, Glass, Alum, Bleaching-powder. III.

N. B. Six questions, selected at will, constitute a full paper.

Continued on page 6.

Down With High Prices For Electric Belts.

\$1.55, \$2.65, \$3.70; former prices \$5, \$7, \$10. Quality remains the same—16 different styles; dry battery and acid belts—mild or strong current. OFFICE, SHARKEY'S BLOCK, QUEEN ST.

Fredericton Globe.

A. J. MACHUM, Publisher and Proprietor
FREDERICTON, N. B. JULY 8, 1893.

THOSE CITY LEASES.

Last Tuesday evening, the City Council met for the first time since the expiration of the city leases, and passed a vote to renew them for the same length of time, at the same yearly rentals, and upon the same covenants and conditions as the old ones. The property covered by the leases consists of the ground upon which the Queen street business block from Wilnot's Avenue up to York street, is built; certain lots on the east side of Queen street above Phoenix Square and certain others on Campbell and on King street. The rental paid for the Queen street lots below York street is one hundred dollars and for those above York street thirty-two dollars per lot. On King street the rental is twenty dollars per lot. As far as these latter and those on Campbell street are concerned it will be admitted that the previous rental is as light as corporation lots of the same size in any of the rear portions of the city usually yielded, and is as much as could reasonably be expected from the leases. There may also be no disposition to grumble at the renewing of the Queen street leases above York street at the former rental of thirty two dollars per year. They are in a comparatively unfrequented section of the city, and are probably worth no more than that sum in the market. But the Queen street lots below York are in a very different position, and are apparently worth a great deal more. We say apparently, for ordinary citizens, who has merely a superficial knowledge of the conditions of business in the city, the block of business houses standing upon these lots appears to be situated in the busy centre of the mercantile section of the town, and to absorb a very large proportion of the business. The whole stream of traffic tends from the highway bridge at Carleton street, up to the market square, and this block stands directly in the line of the traffic, and to an ordinary observer, appears to collect the very cream of it all. But there is another side to the question, which appeals to those having a more intimate knowledge of the ins and outs of the city business. Alderman Farrell, before the city council, stated that nearly all the business houses established upon the lots in question are in the retail trade, and could not afford to pay any increase in the rentals. In former times, he said, the retail trade of the city, was sufficiently remunerative to allow of large expenses. But latterly, the establishment of general stores in every section of the outlying country districts, had cut up the retail trade, and diverted a large proportion of it from the city. On the other hand, he continued, the wholesale trade of the city is almost as good as ever, yet it was not proposed to increase the rental of the lot occupied by Mr. Hodge, who does an extensive and lucrative wholesale business, and could easily afford an increase. There is no doubt considerable force in the arguments used by Alderman Farrell, and they seemed to have great weight with every member of the council excepting Ald. McPherson and Walker, who were strongly in favor of raising the rentals, on the ground of the improvement and increased market value of the lots. The council has, however, with apparent wisdom, decided to maintain the former rate of rentals. The retail trade of Fredericton is without a doubt less profitable than it used to be, and a policy calculated to throw no obstacles in its way is probably the best for the interests of the city, the retail merchants, and every one concerned in the maintenance of the mercantile welfare of the city.

MANITOBA'S FEELING.

In the same issue of the Canadian Gazette is an interview held with Lieut. USE SKODA'S DISCOVERY, The Great Blood and Nerve Remedy.

Colonel the Hon. D. H. McMillan, Provincial Treasurer of Manitoba, who was then in London, and of whom the Canadian Gazette says:—

If any man is entitled to speak with authority of the affairs of the prairie province, is the Hon. D. H. McMillan. He has watched at the cradle of Manitoba from its birth. In 1874 he left his Ontario home to settle in the newer west, and there he has remained ever since, a keen partaker in all its public life. For thirteen years he has held a seat in the Legislative assembly, and since Mr. Greenways accession to power he has had charge of the finances of the province. Colonel McMillan therefore speaks of Manitoba as an expert.

After discussing the difficulties of youth in Manitobian growth, and the immigration movement from the States, Colonel McMillan speaks as follows about the tariff question:—

What about the tariff? That of course is a political question on which there are many differences of opinion. Personally I should like to see a revenue tariff throughout Canada, and I believe it will come before long. The people of the Canadian Northwest generally would, I think, welcome such a step, though old political attachments lead them to send to Ottawa, supporters of the National policy. You have seen that the Winnipeg Board of Trade sent delegates to the St. Paul convention to advocate closer trade relations with the United States. The same board sent delegates to the Congress of Chambers of Commerce of the empire to advocate a preferential tariff throughout the empire.

Colonel McMillan states what everyone believes to be true, and the very same feeling exists in other provinces of the Dominion.

KEEPING UP BRITISH CONNEXION.

The Canadian Gazette, published in London, Eng., and devoted to the interest of those concerned in Canada, Canadian Emigration and Canadian Investments, is a journal of reliable information and judgement, wide circulation, and occupies an influential position among the periodicals of the day. It is moreover, recognized as an authority upon Canadian affairs, while its comments upon our affairs are interesting because they indicate the standpoint from which the British lover of Canada looks upon Canadian affairs from his home across the ocean. It stands, moreover, indifferent between the two great political parties of the Dominion.

Nevertheless this journal has something to say in its issue of June 22nd, which the ministerial party in Canada will not relish. Referring among its Current Notes, to the loss of prestige which Canada suffers through her inadequate display at the Imperial Institute, it publishes the following remarks upon the matter from a leading Canadian newspaper:—

This is all extremely regrettable. At the opening of the institute there were at least 300,000 people present and there were probably half a million persons in the streets discussing the building and what it contained; great numbers are visiting it every day; and at the Prince of Wales' reception there were 20,000 of representative people of Great Britain present. Eminent men from every corner of the empire and of Europe were there, no doubt curiously observing the variety of products from the different and distant parts of the British realm. It was therefore very unfortunate that Canada was not well represented. The provinces in whose hands the matter lies must awake to its importance, and recognize that such an exhibition—permanent in its character, appealing especially to a vast and sympathetic market—as of greater import than even the desirable display of our products at the great but transient fair at Chicago.

This is from the tory "Empire" of Toronto, which, true to its instincts, attempts to saddle the entire blame for this regrettable condition of affairs upon the different provinces of Canada, leaving out of sight their question of the federal governments responsibility.

The Canadian Gazette goes on to say:— In the meantime might it not be well for the curators to make it known by placards and otherwise that the Canadian exhibits will not arrive till the close of the Chicago Fair? The confession that Chicago was preferred to London is an unfortunate one to come from a people professedly so anxious to promote Anglo-Canadian trade, but it is still more unfortunate that visitors should leave the justitie under the impression that the

present exhibits are the best Canada can show.

The conclusion to which the intelligent reader is forced upon perusing these extracts, is that the people of Great Britain have been deceived as the alleged anxiety of the Canadian people to promote Anglo-Canadian trade a preference to trade with the neighboring republic. The Government of Canada is responsible for this deception; and the fact that the governments of the several provinces have willfully and in face of the despairing exhortations of the ministers and the ministerial organs chosen to patronize the great fair at Chicago in preference to the Imperial Institute at London only emphasizes the contention of the Liberal party that the dominant feeling among the Canadian people is a longing for freer trade relations with the great republic at our doors. That is our natural market. To that our people look. And no matter how much the plausible but artificial reasoning of the tory party may have temporarily thrown this feeling out of its course it will still return again and point, like the needle to the pole, in the direction towards which the eternal law of natural attraction ordained that it should always turn.

CANADIAN CATTLE.

The hope held of Canadian cattle dealers that the quarantine placed by the British Government upon Canadian live cattle imported into England would be raised, has been shattered during the last week by the receipt of a telegram from Sir Charles Tupper informing the government here that the British Inspectors had found unmistakable evidences of the existence of pluno-pneumonia among certain Canadian cattle which they had been recently examining. When the restrictions operating against the importation of Canadian cattle into Great Britain were first imposed by the British Government, there was almost a feeling of indignation on the part of the Canadian shippers, at what they termed the injustice of the regulations; and they insisted that the Canadian cattle were entirely unlike American cattle, free from the obnoxious disease. But the latest news vindicates the act of British Government, and will very seriously injure the trade with Great Britain in live cattle, which was fast becoming one of the most important and lucrative branches of commerce in that direction. The whole trouble is to be traced indirectly to the United States. As is well known, during the last three years large numbers of American settlers from the Dakotas, Montana, Minnesota, and other North Western States have been migrating across the border into the large and fertile wheat and grazing districts of the Canadian Northwest. Their number was especially great during the last year. These people brought all their agricultural implements and personal effects with them—in fact everything but the land; and as a matter of course large herds of cattle were included. The regulations respecting quarantining of cattle along the international border, provided for the establishment of regular quarantine posts at considerable distances apart, and for the appointment of quarantine officers. But the difficulty is that the migrating farmers spoken of can enter Canada at almost any point along the border, taking their cattle with them; and very many of them have in this way evaded the quarantine altogether. In this way also Canadian cattle, which it must be admitted have heretofore been exceptionally healthy, have been subjected to contagion with diseased cattle from the United States, and have been contaminated with the result above stated. The injury already done will have a serious effect for the immediate future upon the Canadian cattle trade with the mother country, and this effect cannot be very well avoided. But it is in the hands of the Canadian government to prevent the re-occurrence of any such dangerous contagion, by the establishment and maintenance of numerous quarantine posts, at short distances apart, so as to form a continuous barrier along the international boundary; and the enforcement of a rigid system of quarantine examinations upon all cattle thus coming into the country. These measures aided by our intelligent and determined effort to stamp out the disease already established, will very soon bring about a better condition of health, and will place the cattle trade once more upon a profitable basis.

Or do you suffer from noises in the head. Then send your address and I will send a valuable treatise containing full particulars for home cure which cost comparatively nothing. A splendid work on deafness and the ear. Address: PROF. G. CHASE, Orillia, Ont.—131.

Found Drowned.
Mrs. Mary Fitzgerald, wife of Thomas E. Fitzgerald, of Carleton, St. John, was found drowned at the Bay Shore Thursday. The body was discovered by a lad named Willie Bettinson, who with a young companion, were searching for dulse. The coroner's jury returned a verdict to the effect that the deceased had come to her death by drowning while under mental depression and temporary insanity.

Drowned at Missonia.
Mr. J. W. McCready, of this city, received a telegram yesterday morning from Missonia conveying the sad intelligence of the drowning of Mrs. G. N. Hartley of that place. Mrs. Hartley was formerly Miss Christina Cooper, daughter of Wm. Cooper of this city. The bereaved parents have the sympathy of the whole community.

Diocesan Church Society.
The anniversary meeting of the Diocesan Church Society was held Thursday in the Church hall. There was a good attendance. The usual resolutions were passed. The speakers were Judge Fraser, Rev. Dr. Williams, Newham, McCully, Judge Wilkinson, W. M. Jarvis, Geo. A. Schofield, Judge Huntington and A. P. Tippet. Messrs. Hainington, Wilkinson, Tippet, Schofield and Dr. Williams subscribed one hundred dollars each toward a fund of two thousand dollars to open vacant missions.

Canadian Medal Winners.
Prof. Robertson has received a list of Canadian medal winners in the chess competition at the World's Fair. Ninety points and over entitled exhibitors to a medal and diploma, one hundred being the maximum. An Ontario man tops the list with 98 points; then four Canadians score 97, twelve of points, among them being Angus Cameron, of Antigonish; D. McPhree, of River John N. S.; 92 points; T. S. Dillon, New Perth; P. E. I. two medals for separate lots, one 91 points and another 90. C. L. Tilley & Son, of Waterville, Car. county, N. B.; and Allan Kennedy of Union Centre, N. S., each have 90 points.

Will Wonders Never Cease!
The Cosmopolitan Monthly Magazine of New York city has been considered for some time the brightest periodical in the list of great magazines and it has always been in the first rank of illustrated publications. Its subscription price for one year is \$3, and on this account the wonderful offer made by the publisher of Progress of St. John comes in the nature of a surprise. It is well known that Progress has built up a great circulation at a subscription price of \$2 and now it proposes to still further increase its readers by offering the Cosmopolitan for one year for 85 cents additional. To explain further, any one not now a subscriber to Progress who sends \$2.85 to the publisher of that bright weekly, will not only receive the Cosmopolitan Magazine for one year but Progress as well for the same time.—41.

Far Over Fifty Years.
Mrs Winslow's Soothing Syrup has been used by millions of mothers for their children while teething. If disturbed at night or broken of your rest by a sick child suffering and crying with pain of Cutting Teeth send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures Diarrhea, regulates the Stomach and Bowels, cures Wind-Colic, softens the Gums and reduces Inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."—Aug. 9—56—ly

Sheriff Sturdee, Col. J. R. Armstrong, F. B. Ellis of the Globe, W. G. McFarlane of the Telegraph, Judge Peters and Collector Esel, all of St. John, registered at the Queen this week.

EVENTS AROUND US.

Happenings of the Week Throughout the Province.

No picnics yet.
Have your taxes gone up!
The Fourth of July was wet.
The York Circuit Court met this week.
A circus will appear at Calais on Monday.
The late rains have greatly tickled the farmers.

The City Council granted \$500 in aid of the Gibson fire sufferers.
Teachers should read advertisement at head of teachers column.
The York Municipal Council voted \$500 to the Gibson relief fund.
The Fredericton Bicycle Club had a run to Woodstock Dominion Day.

The F O M W Club proposes holding a moonlight excursion about the 25th.
James Haney was arrested Monday, by Police Sgt. Phillips on a charge of robbery.
The Knights of Pythias are making arrangements for an excursion to St. John on the 18th inst.
Mr. and Mrs. F. S. Williams, of Marysville, celebrated the tenth anniversary of their wedding last week.
The 71st Batt. arrived home from camp Sussex yesterday. The Infantry School will return to-day.
Charles F. Wade, a former St. Andrews boy, was married to Miss Katie Coughle, of St. John, last week.

We are pleased to learn that the Canada Eastern Railway will again be under the management of Mr. Alex. Gibson.
Last month the Kingsclear creamery, under the management of Mr. W. W. Hubbard, turned out 5,500 pounds of butter.
The Truro hat works are now employing 30 hands and will pay \$10,000 in wages monthly. They have begun the manufacture of fur hats.
The four year old stallion Directum will have a sulky made with aluminum wheels which together with the tire weighs five pounds each.
Nearly twenty millions of lumber was hung up on the south-west Miramichi previous to the late rains. It is thought a good part of it will now be run out.

W. H. Canliffe, the well known lumber operator of Fort Kent, reports that all the drift lumber up to the head waters of the St. John have been abandoned.
Miss Watson was married last week to Mr. R. Good, both of Bathurst. The ceremony was performed in St. George's Episcopal Church by Rev. Mr. Smythe of Newcastle.
A number of our young ladies and gentlemen are arranging for a couple of weeks vacation at Evandale, five miles below Hamstead.
Mrs. J. C. Riesten will chaperone the party.
Mr. Alex. Sinclair, who has been a cripple for some years, died Monday at the residence of his brother-in-law, Mr. Alonso Staples, aged 30 years. He was buried with Masonic honors.

See Mr. T. A. Wilson's advertisement in this issue. Mr. Wilson is a first-class book-binder, and parties having magazines or books of any description to bind will do well to give him a call.
The Municipal Council have constituted a board of health for York Co., as follows: Dr. Morehouse, of Keswick, chairman; W. McFarlane of St. Marys, A. W. Coburn of Harvey, James Smith of Canterbury and Robert Thorburn of Stanley.
Mr. Louis McCookery, proprietor of the New Victoria Hotel, St. John, died early Thursday morning. Mr. McCookery was well and favorably known in this city, having clerked for some years in the Barker House here. The flags on the Barker and Queen were flying at half-mast out of respect to the memory of the deceased.
A musical recital under the patronage of His Lordship the Bishop of Fredericton, will be given in the Church Hall next Monday evening by Miss Sharp and a few of her pupils, assisted by Rev. Dr. Alexander on the piano. Canon Roberts and Rev. C. W. McCully will give readings, Miss Bailey, a violin solo and Misses Babbitt and Bailey a mandolin duet. Proceeds for the Church Hall fund. Tickets at McMurray's and Fenety's.

A very sad accident occurred on the Petit Rocher Road Gloucester Co., last week. A young man who was in the employ of Mr. R. Carr Harris, while driving a team of horses, was thrown from the wagon the animals having taken fright. When picked up it was found that he was very badly injured and died from the effects on Monday last. His brother, in response to a telegram, came on and took the remains to his home in Straithborne, C. B.
Frontier lodge and Frontier division of the Uniform Rank, K. of P., marched to the cemetery at St. Stephen last Sunday afternoon and performed the beautiful ceremony of decorating the graves of deceased brethren. The division was under command of Capt. Grimmer and the lodge was in charge of P. C. L. M. Robinson. The procession was headed by a band, which furnished appropriate music. A wealth of flowers had been contributed for the occasion and the nine Pythian graves in St. Stephen's city of the dead were literally covered with the floral tributes. To-morrow the lodge will decorate the grave of the late brother, W. E. McAllister, at Oak Bay, the Chancellor. Commanders being absent from town and unable to attend to the duty last Sunday.
Mr. Wm. H. Reid, who left here some ten years ago for the Western States, is home on a visit. His wife and children are here with him.
Miss Nellie Atherton left Thursday morning for St. John en route for New Mills, Restigouche Co., where she will spend the holidays, visiting Mrs. Geo. W. Hoegg.
Prof W C Murray of Dalhousie college, is in the city.

TOPICS OF THE DAY

What the Gossips have to Remark about

The Trend of Matters Political Parliamentary or Otherwise.

Some Touch-and-Go Notices of all Mentionable Matters of Things.
Montreal has failed to secure the headquarters of the Grand Trunk Railway system.
Some of the leading ladies of Winnipeg have inaugurated a crusade against the corset. As a summer reform this is undoubtedly a move in the right direction. "Of corset is."

Prince George and Princess May were made man and wife Thursday. The wedding took place at one o'clock in the Chapel Royal of St. James. The ceremony was carried out in semi-state style. Archbishop Benson, of Canterbury, assisted by sub-dean Sheppard of the Chapel Royal, officiating. All the costumes of the bridal party were of English manufacture. An English dressmaker made the wedding gown of English silver brocade and the white satin costumes for the ten bridesmaids. The "going away gown" was made by a fashionable firm of London tailors, of white Irish poplin trimmed with gold braid.
The twenty-sixth birthday of the Dominion was very quietly celebrated on Saturday last. The weather was beautiful. The majority of the stores were closed but owing to there being no public amusements, many of our citizens, spent the day out town, fishing, picnicking, etc. while those who remained in the city made it lively for lively satires.

The C. P. R. depot was broken into Sunday night but nothing of value taken. Dave Colwell's store on King street also received a visit, the parties who entered stealing \$17 in cash. Mr. Geo. E. Fenety's cellar was also visited by robbers who relieved him of a fine salmon.
Nathan Grosfield, a prisoner in Dorchester penitentiary escaped Thursday and has not yet been recaptured. He had served a year and a half of a four year sentence.
Joseph Sopiak, the popular young Indian baseball player, was foully murdered Tuesday night at 12.30 o'clock, at Pleasant Point, an Indian village a short distance from Eastport, by Capt. Ross Francis. Sopiak had just returned from Bar Harbor and was celebrating the Fourth by a dance at the house of Edmund Francis. Capt. Ross Francis, wife, 23 years old, and nearly 30 years her husband's junior, was enjoying herself dancing much of the time with Sopiak. This excited the jealousy of Francis who called Sopiak to account before the whole crowd. Hot words followed, and Francis, swinging his strong right arm, plunged his hunting knife up to the hilt in the breast of Sopiak, piercing the heart. Some of the Indians attempted to interfere, but Francis flourishing his murderous knife and a loaded revolver made his escape, and at time of going to press had not been captured. Sopiak will be remembered by a number of our boys as the heavy batter and good-natured catcher of the St. Andrews ball team, who suffered defeat at the hands of the Fredericton boys three years ago.

Commandant Gating.
Prof. Hatt is home for the holidays.
Mr. Theo. Lawson, of Andover, was in town this week.
Miss Blanche Thompson is home for the holidays.
Miss Minnie Clark is spending her vacation in the city.
Miss Agnes Barker, of Boston, is visiting in the city.
Mr. Thomas Lawson, of Andover, was in town this week.
Mr. R. A. Payne, of the St. John Sun, was here this week.
Miss L. Nicholson is home from Moncton for the holidays.
Mr. John Wetmore, of the C. P. R., was in the city this week.
Auditor General and Mrs. Beek spent Dominion Day at Hampton.
Mr. Frank Miles, of the Merchants Bank, is away on his vacation.
Mr. John P. Hudson, wife and children, are here on their annual trip.
Governor Russell, of Massachusetts, arrived here by boat Wednesday.
Mr. Enoch Lunt, of the Parish of Bright, was in town the other day.
Mrs. A. G. Edgecombe and her children are in Toronto visiting Mrs. E.'s father, Mr. Giles.
Miss Florence Armstrong is home from Boston visiting her father, Mr. Thos. Armstrong.
Mr. and Mrs. P. G. McFarlane, of St. Stephen, are visiting Mr. McFarlane's old home at Nashwaakias.
Mr. James Johnston, of Milford, Mass., who was called here by the death of his father, left for his home yesterday.
Miss McFarlane, of the St. Andrews school staff, is spending her vacation at the home of her parents at Nashwaakias.
Miss Jessie M. Purdy, of St. John, who was here attending the teachers institute, returned home Monday afternoon.
Mr. B. B. Blizard, sole agent for the safari time Province, for Taylor's Sausages, is in the city. He has just returned from Cape Breton where he sold the Dominion Coal Co., one of the largest burlar and fire proof safes to be found in the maritime provinces. The large safe in the office of Mr J A Vanwart was also put there by Mr. Blizard.

SPORTING.

D. J. Stockford captured first place in the race at Houlton in which he had entered the getting mare Helen B., and succeeded in getting second place in another race with the black mare May, owned by Mr. J. H. Fleming.
The colt stake races at Moosepath, St. John, will take place on the 16th Aug.
The Halifax Wanderers intend holding electric light sports on their grounds on the 10th of July.
There is trouble ahead for Berry, the alleged winner of the cowboy race. George Jones and "Battleaxe Pete", two of the contestants, who arrived in Chicago on Wednesday, claim that Berry and also Albright, Gillespie and Smith, the first four in, rode in cars at night and shipped their horses. Jones claims that he and "Battleaxe Pete" are the only men who rode a fair race. His statement is corroborated by a newspaper correspondent who came over the same road on a bicycle.
The Columbia also offers a purse of \$45.00 for Charley Mitchell to fight Corbett under their auspices. Mitchell has accepted.
Kirkwood, Del., Tuesday. Ayres P., with running mate went a mile in 2:05, driven by J. H. Hamlin. Mascot went a half in 59 seconds.
The following appeared in the Woodstock Press:
Geo. L. Holyoke.
I herewith hand you \$25.00 to cover the deposit made by F. M. Brown, and accept his challenge, and will not trot the stallion Louis J. against his stallion on the Woodstock track this fall.

Tenders to state power and description of light to be furnished. The lowest or any tender not necessarily accepted. By order of the Street Light Com.
CHAS. W. BECKWITH,
Secretary.

Cyclist Harry Wheeler made an eventful debut as a professional on Tuesday. He won \$400 by taking all four races at the New York Cycling Company's first meeting. He did the quarter mile in 33.7-80 seconds. His time for the mile was 2:37.1-5, and for the half mile 1m. 11.4-5 sec. The two mile race he won in 5m. 5 sec. J. S. Johnson participated in races at Sarnia, Ont., on Monday, and won three out of six events. The time was not fast, as a heavy wind was blowing. A new thousand mile record was made in England on July 1st, when T. A. Edge, the well-known English cyclist, finished a thousand mile road race which he entered for the purpose of attempting to beat the world's record for the distance. This he was successful, finishing in five hours and forty-nine minutes better time than was ever before made. He finished in fairly good condition. During the five days of the trial he had only four hours sleep.
Dominion Day.
The races at Woodstock on Dominion Day resulted as follows—

B. Mesgher.
Debec, June 29, 1893.
The Oxford and Cambridge annual races were held lately at the St. George's Baths, London, England, when the light blues won. The events were 60, 240 and 420 yards, and in all the Cantabs registered 11 to their opponents 19 points. A water polo match figured in the programme and resulted in an exciting win for Cambridge by 2 goals to 1. Details: 60 yards (2 lengths)—A. M. Langdon, Oxford, 1; H. W. Allison, Cambridge, 2. Time, 39.3-5 sec.
240 yards—L. R. G. Cohen (Cam.); 2; E. J. Scott (Cam.). Time, 3 min. 52 sec.
420 yards—H. W. Allison (Cam.); 1; H. M. King (Cam.). 2. Time, 6:34 2-5 min.
The quiet match at Belleville between Wm. Todd, of Tatamagouche, N. S., and Frank Claus, of the Belleville Quoit Club, best out of three games of 61 points each, was won by Claus by 61 to 56.
It seems that Frank Ives' recent match with champion John Roberts at English Bay, was not a financial success. This is proven by the fact that two other matches between the two, projected for other cities, have been abandoned. Ives is now located in Paris for another long stay.
Cyclist Harry Wheeler made an eventful debut as a professional on Tuesday. He won \$400 by taking all four races at the New York Cycling Company's first meeting. He did the quarter mile in 33.7-80 seconds. His time for the mile was 2:37.1-5, and for the half mile 1m. 11.4-5 sec. The two mile race he won in 5m. 5 sec. J. S. Johnson participated in races at Sarnia, Ont., on Monday, and won three out of six events. The time was not fast, as a heavy wind was blowing. This he was successful, finishing in five hours and forty-nine minutes better time than was ever before made. He finished in fairly good condition. During the five days of the trial he had only four hours sleep.

POOR DOCUMENT

Continued from page 3.
English Composition.

Time, 1 hr.
1. Define "transposition." In transposing any passage from the metrical to the prose order, what rules should be observed? Transpose the following:
"The old man rose, and with a springy mien of hopeful preparation, grasped his staff; Together casting them a farewell look Upon those silent walls, we left the shade; And, ere the stars were visible, had reached A village inn,—our evening's resting place."
2. Mention some simple rules, which should regulate the language of a sentence as composed, as regards expression.
3. Construct a complex sentence for the following elements:
A. We shall find.
1. We can only keep this in view (adv. of condition).
2. The English words are used in speaking a hundred times oftener than the Latin words (subs. obj. to find).
3. There are more Latin words in our vocabulary than English (adv. of concession).
a. We possess (attr. to words in 2a).
4. What is a paragraph? Name the three qualities which are essential to the construction of a good paragraph and briefly explain each.
5. Write a short historical paragraph on—"The Charge of the Light Brigade."

English Literature. Time, 1 hr.
1. From what poem, written by whom, has each of the following quotations been taken?
(a) "Land of brown heath and shaggy wood,
Land of the mountain and the flood."
(b) "The fisher is out on the sunny sea,
And the reindeer bounds o'er the pastures free."
(c) "To lie within the light of God, as I lie upon your breast—
And the wicked cease from troubling, and the weary are at rest."
(d) "She with all a monarch's pride,
Felt them in her bosom glow;
Rushed to battle, fought, and died—
Dying hurled them at the foe."
2. Turn the following into prose, using, as far as possible, your own words:
(a) "To thine own self be true;
And it must follow as the night the day,
Thou canst not then be false to any man."
(b) "To gild refined gold, to paint the lily,
To throw a perfume on the violet,
To smooth the ice, or add another hue
Unto the rainbow, or with taper light
To seek the beauteous eye of heaven to garnish,
Is wasteful and ridiculous excess."
3. What are the principal works of Longfellow, Byron, Walter Scott, Goldsmith, Gray?
4. Explain the difference between a Simile and a Metaphor and give examples.

Physics. Time, 1 hr.
1. What is the specific gravity of distilled water? How do you know? If the volume of a pound of distilled water is 27.7274 cu. in., what is the volume of a pound of mercury? Show work.
2. Would it require more or less force to lift a piece of lead in a vacuum than in air? How much more or less? Show why.
3. Explain the directive power of the magnetic needle, i. e., why it points north and south.
4. Explain the attraction of a pith ball by a glass rod which has been rubbed with silk. Also explain the repulsion of the pith ball immediately after it has touched the glass.
5. Define or explain: Capillary attraction; force of gravity; elasticity; valve; barometer; malleability; cohesion; molecule. Give an example or an application of each.
6. Explain the action of the common pump and show that there is a limit to the height to which water can be raised by it.
Note.—Five questions make a full paper.

Aritmetic. Time 1 hr. 30 min.
Six questions make a full paper.
[Explain the operations clearly. Questions in which the proof or explanation is required, are of greater value than the others. The explanation is reckoned as as much or greater value than the operation, but the unitary method is held to include both.]
1. A hogshead of molasses containing 120 gals. cost \$40. Twenty gallons leaked out. At how much per gallon must the remainder be sold in order to gain 20 per cent?
2. What will the carpeting required for a floor, 15 ft. 6 in. long and 12 ft. 6 in. wide, cost at \$2.40 per yard, the carpeting being 30 in. wide?
3. A and B together can do a piece of work in 3 days. A alone can do it in 5 days. In what time could B do it? Explain the operation, or work by the unitary method.
4. Find the greatest common measure of 273 and 2808 without factoring, and prove that the result must be the g. c. m.
5. Reduce 3-16 to a decimal, and divide the result by four thousand five hundred and ninety-six and eighty-seven thousand and ninety-four millionths until the quotient contains three digits. Explain the method by which you determined the place of the point in the quotient.
6. Find the difference in pints between 5-18 of a gallon and .0875 of a bushel.
7. \$56.25. Fredericton, June 12, 1891. One year after date, for value received, I promise to pay John Smith, or order, fifty-six and 25-100 dollars, with interest from date at 6 per cent.
William Jones.
Endorsement June 12, 1892, \$40.
What was due on Dec. 15, 1893?

MANGLED BY A TRAIN.

Child Cut in Two—The Mother's Leg Severed.

OTTAWA, July 3. A child was cut in two at the C. P. R. depot this morning and the mother had her right leg cut off at the thigh.
The victims are Mrs. Jeanne Martin and her six-year-old daughter, who with the father and three other children, were on their way from the north of France to settle in Manitoba. The party of emigrants were on the station platform waiting for a change of cars. The train was being shunted, and the mother seeing it going away, made a rush, with the little girl by the hand, to get on.
She threw the child on the platform of the second-class car and grabbed the railing with one hand. She was unable to get on and was dragged about one hundred feet; then her foot caught in a frog. The child whom she had dragged with one hand was pulled down and fell across the rail under the wheels of the first-class car in the rear, being cut clear in two. The mother's right limb also fell across the rail and was cut off. The woman was able to speak and told the story of the accident. She can hardly live.

Another fool leaped from the Brooklyn bridge this week. The man, Dennis McCarthy, jumped several feet higher than Steve Brodie, for he made it just about half way between the Brooklyn and New York piers. McCarthy is a muscular young Irishman, only 22 years old, and frequently boasted that he had made high jumps in Ireland. If Dennis recovers he will be arraigned in a police court, for he is now under arrest. He is the 14th man who has jumped from the Brooklyn bridge.

ST. PETERSBURG, July 4.—As the steamer Alfons, employed in the river trade on Volga, was approaching Remyany today her boilers exploded killing 26 passengers. The burning coals blown from the furnaces set fire to the wreck. The boat was burned to the water's edge and sank.
Another fatal electric car accident occurred at Springfield the other night, when a man, unidentified, was killed instantly. The entire upper portion of his head was cut off and the body and limbs terribly mangled.

The Commercial bank of Manitoba has been declared insolvent and liquidators have been appointed. The bank's bills are as good as gold under the Dominion law.

HID HER WEALTH IN A CAN.

An Old, Deceitful Woman, With a Deed to Land Worth \$100,000 Found in a Miserable Hovel.
A discovery was made by several members of the local board of health, at Atlantic City, N. J., which, if the evidence brought to light is correct, proves Mrs. Susan Smallwood, an old, decrepit woman, to be worth at least \$100,000.

Mrs. Smallwood has been familiarly known in Atlantic City, as a street mendicant for the past twenty years. She lived in a dilapidated old shanty out on the meadows, and was so surrounded by filth that the few neighbors in the vicinity appealed to the board of health to have the obnoxious hovel, as well as the old lady, removed.

She was found the other morning in the midst of her squalor, with about twenty cats as companions. She was attired in a costume of many colored and decidedly soiled rags, and was taken to the house of a friend named Ingersoll, in the vicinity, after which the clearing of the premises was begun.

On a pile of rubbish in a dark corner an old tin can was found. It was carefully wrapped in a bright-lined shawl, and the health officers found it contained a well-preserved deed and a tax receipt dated 1893. The deed applied to a valuable tract of land at Seven Mile Beach. The tract embraces about seven hundred and fifty acres. It is estimated to be worth at least \$100,000, and is said to have been willed to her by her grandfather.

Her husband was a sea captain, but has been dead for many years. The local

authorities notified her relatives at May's Landing and her two nieces took her over to the home of their father, Joseph Small, at May's Landing. On being handed the old deed, with an explanation as to its value, they were almost dumbfounded with surprise.
Seven Mile Beach is a summer resort on the New Jersey coast, between Wildwood and Cape May. It is more popularly known as Avalon.

SEVEN WOMEN MET DEATH.

Astonishing Story of the Work of Masked Assassins.

A letter from Louisville containing startling information, which has at least perplexed the police authorities, has been received by John Wanner, a butcher-shop keeper, of Louisville, from his sister, Mrs. Magdalene Wende, of Bluff Springs, a small town near Austin, Tex. Influenced by letters from his brother-in-law, Paul Wende, about the ease and rapidly with which money could be made in Texas, Wanner sold out his business here and intended to go to Texas in a few days, taking with him an unmarried sister, who possessed a neat sum in ready money. One morning, however, a letter came from his sister that chilled the blood in his veins.

Mrs. Wende begged that her brother would never show the letter, as her husband would kill her if he found out that she had written to him. She stated that her husband was the leader of a band of assassins called the Black Agents, who operated in Travis county, and had long been a terror to the peaceful residents. They had made several trips to Austin and had chloroformed seven women and murdered them. Then they robbed the houses, and at this time some of the booty was stored in their home. These were only a few of the murders they had committed. They were sworn by oath to murder anyone who betrayed them. In the role of a quiet farmer she said her husband was able to carry on his bloody work and was never suspected by his neighbors. She wrote further that when her husband learned that Wanner and his sister were coming he sent for another member of the gang, and while she was in another room with her children they deliberately laid a plan to murder and rob them. The long letter was concluded with: "For God's sake take sister and go as far north as possible and never come back here, as you value your lives. He would kill me if I were to try to leave him. He treats me and my children frightfully, and two or three times the children have had to clean the blood from his clothes when he returned from his murderous excursions." It was signed: "Your loving sister, Magdalene." General Taylor, chief of police, has telegraphed the substance of the letter to the chief of police at Austin. He regards the information as deserving of serious consideration, and thinks it is a possible clue towards clearing up some of the mysterious murders which have been committed in or near Austin.

Wilkie's play, 'A Woman of no Importance' at the London Haymarket all summer and possibly longer, but will have a new play by Henry Arthur Jones for next season, and it is this that he is said to contemplate appearing in this country.

Hood's Pills cure all liver ills. 25c. Sent by mail on receipt of price by C. I. Hood & Co., Apothecaries, Lowell, Mass.

The Toronto Home for incurables.

PARKDALE, Ont., Feb. 27th, 1888.—Gentlemen, it gives me pleasure to let you know I have derived great benefit from the use of Nerviline. I have been a great sufferer from Neuralgia in the face, and for the last two years was quite a martyr to the malady. So soon as I observed the Nerviline advertised I obtained a bottle from our druggists, Messrs. John Gray & Co., Parkdale, and the effect was marvellous; pain ceased and I can enjoy sound sleep at night, and rise refreshed. I cannot speak too highly of it and heartily recommend it. Alexander Steen.

Fashion Notes

Ladies continually scan the fashion plates for some new and becoming design in dress to enhance their beauty and charms. There is nothing more becoming than the healthy glow, bright eye and the firm elastic step of vigorous womanhood. Ladies who suffer from nervousness, sleeplessness, weakness, anaemia, tired feelings, pallor, loss of appetite, hysteria, weak heart, weak stomach, or any nervous disorder, will find in Hawker's Nerve and Stomach Tonic a certain cure for all these troubles, and a perfect health restorer and invigorator to nerves, stomach and blood. Price 50 cents a bottle, 6 bottles for \$2.50. For sale by all druggists and dealers.

HAWKER'S TOLU AND WILD CHERRY BALSAM
WILL THAT CURE COUGH
TRY IT!

IT HAS CURED HUNDREDS OF CASES considered hopeless after all other remedies had failed. Do not despair, take courage, be persuaded, and try this truly wonderful medicine.

IT WILL CURE YOU.

For sale by all Druggists and general dealers. Price 25 and 50 cts. a bottle. Manufactured by HAWKER MEDICINE CO., Ltd., St. Johns, N. B.

WANTED--A WIFE

Beautiful and with a Clear, Healthy Complexion,

Of course every man wants his wife to be beautiful; but how can she be beautiful if her face and hands are disfigured by rough skin, freckles, tan or eruptions? Nothing will throw such a damper on love as a blemished face.

By the use of "GEM CURATIVE SOAP," an article which combines the best known remedies for the cure of all cutaneous diseases, a refined healthy complexion is assured.

When GEM CURATIVE SOAP is used according to directions the effects are marvellous and gratifying. Time has proven this to be true, as thousands of the most flattering testimonials are on file from customers in England, Scotland, France and Germany, in which countries the Soap is a staple toilet article.

For Thirty Days Only

Write this sentence on a piece of paper
GEM CURATIVE SOAP.

And send to with twenty cents for a sample cake of Gem Curative Soap. To the first lady from whom a slip is received will be given a handsome Seal Skin Marbles, valued at \$3.00.00, or its equivalent in cash, less 40 per cent. To the first Gentlemen from whom a similar slip will be given an 18-Karat Gold Watch set with one karat diamonds. Appleton & Trusey's movement, valued at \$250.00. In addition to these, we have prepared five thousand sample cakes numbered 1 to 5000. Every number ending with nought (0) will receive a prize valued at not less than \$10.00. Sample cakes postpaid. All goods for the United States free of duty.

A YOUTH'S DARING DEED. HOW A STRONG FORTRESS WAS CAPTURED.

A Sixteen Year Old Nicaraguan Boy, With Thirty Men, Took the Almost Impregnable Fortress of Corilla.

Godfrey L. Carden, Lieutenant United States Revenue Marine, writes to Harper's Weekly:—The revolution in Nicaragua just ended has witnessed in the short period which marked its existence the performance of a deed of daring the like of which has probably never been excelled since the storming of Balaforz. All the more interest is centred in the event since it is known that the central figure is a boy only sixteen years of age—a mere child in years, but a giant in courage and ability. This lad, a representative of one of Spain's oldest families in Nicaragua, captured, with the assistance of but thirty men, the fortress of Corilla, which is the strongest post in Central America. The account of the capture reached New York during the present week. It was participated in by Mr. Frederick Rockwood formerly a lieutenant in the United States Revenue Marine. Mr. Rockwood is at present a wealthy planter in central Nicaragua. Prior to his departure for Nicaragua, more than six years ago, he was a prominent member of the New York Seventh Regiment. Mr. Rockwood reached New York after forty-five days of travel from his plantation. The story he tells runs as follows: "I left my plantation some two weeks before the revolution broke out. I knew as indeed we all did, that trouble was coming. I was imperturbed by my fellow-planters to take sides with the Liberal party. Had it not been for those interests which demanded that I immediately set out for New York, I am inclined to believe that I would have followed the bent of my inclination. I promised, however, that I would return to Nicaragua as soon as my business affairs were settled. With this promise given, I bade a lot of my neighbors, one bright morning, a farewell, and set out on horseback for the

Head of Lake Nicaragua.

To reach the head of the lake required a ride of two hundred and fifty miles. This portion of the journey I traversed without incident, and one bright evening not many weeks ago I reined up at a little station situated at the head of the White Lake. Here, for the first time, I learned that the revolution had broken out in force, that skirmishing was going on to the eastward and westward of the station and, worse yet, that every form of water craft on Lake Nicaragua had been seized by government forces. My chagrin was great. I debated whether I should work through to the east coast or back to the west coast. I finally concluded to wait. In the meantime I kept my eyes and ears open, particularly my ears, and not more than three days elapsed before I learned of the existence of a small tug somewhere back of the station. I will not say how I obtained possession of the tug. It is that I soon had every prospect of pushing my way on down the lake. It was while placing stores aboard, however, that I was suddenly surprised by the appearance of a young Spaniard, his sword in hand, and himself in the dress of a lieutenant in the regular army of Nicaragua. The Spaniard was a mere boy. He was about sixteen years of age; certainly not more than seventeen. As he stood there on the deck, smiling, and in the presence of Spanish requesting that I turn the craft over to him, hardly knew which to admire most, his impudence or his beauty. His face was of pure Castilian type. His eyes had all the tenderness and his skin the softness of a girl. He was a handsome chap; in fact, a handsomer boy I never saw. While eyeing him in a half quizzical manner, some thirty armed men

Burst Through the Bush

and leaped on board. The smile of the young Spaniard rapidly played round his well-shaped mouth. The men were his followers. There was nothing left for me to do but give up the boat. The youngster deemed my conclusion wise, and I could see that my discomfiture rather amused him. He was an odd little fellow; yet hardly lithe, for he was tall for a boy of his age, and strong too, while his every step showed off a lithe active form. At first it looked as if I were to be summarily tossed on o'board, but on my making known that I was an American, and a former United States officer, the boy saw an opportunity to make me of service to him. He knew I was anxious to reach the east coast, and he promised to assist me—that is, if I were willing to assist him. My function was to navigate the boat. I undertook it. The thirty men who came aboard with the young Spaniard were as fine a set of fighting-men as I have ever seen. They were all mountain men, great tall fellows who looked capable of withstanding immense fatigue. They were splendidly armed, each man carrying a breech-loading Remington rifle and two full cartridge belts. I have seen a great many soldiers in my lifetime. I have also had the honor to be a member of one of the finest national guard regiments of the United States, the New York Seventh, but I have yet to see thirty men with the word "business" more plainly stamped in their faces than in the case of those thirty Nicaraguans. I asked the youngster in command where we should go. He very quietly said "Corilla." I could hardly believe my ears. "What! Corilla!" I ejaculated. It cannot be possible that this boy means to attack that place, the strongest post in Nicaragua. But it was true that he did, and in a very short time. Off we went down the lake, the little tug carrying thirty rebels, all dressed in the regular uniform of

the Nicaraguan Army. I had not been deceived as to the true character of my companions. I recognized them as men of

The Revolutionary Forces

very shortly after they got aboard. On the way down the lake I saw a great deal of the young Spaniard. Not once did he speak of the work ahead. He talked mostly on national subjects, and inquired particularly into the relation of the States to the national government at Washington. He was fairly well posted on the form of government in vogue in the United States, but was better posted regarding existing governments in Europe. His mind seemed to possess great breadth, while at all times there was evinced that same gentleness, that same softness, which made me at times almost doubt that he was a boy. Corilla was reached in the broad break of day. The morning in Central America usually breaks suddenly. It was just the beginning of this morning when the fort loomed up ahead on a high bluff fully one hundred feet above the river. This fort is armed with modern rifled cannon, mostly Krupp guns. In addition there are several machine guns. The fort commands the entrance to Lake Nicaragua. Its guns are able to deliver a terrific plunging fire on any craft attempting to pass up without authority. As we neared Corilla I expected every moment to hear the whiz of a rifle-shot. As we drew nearer I really began to feel that perhaps, after all, we would escape a salvo. Right ahead was a wharf jutting out at the base of the bluff, alongside, we managed to secure the boat. As we did so, the young Spaniard leaped on the deck. A sentry stood three doing guard duty. The boy said something brusquely to him about his force being re-enforcements, and the sentry saluted. The lad sent him up the hill on some message, and then turned to his command. Every man of the thirty was on the dock. It needed only a nod to set them in motion, and this nod the handsome young Spaniard gave. Leading up to the gates of the fort from the wharf was a winding road. Up this road the young rebel and his men marched, the boy leading off some twenty feet in advance and swinging his

Sharp Razor-Like Sword,

much as one would a walking stick. I could hardly believe my eyes. Here was a mere boy with only a handful of men marching straight up to the gates of the strongest fort in Nicaragua. Instinctively I found myself on the dock and following them. My arms consisted simply of a revolver, and I doubt if in the excitement I realized that I might have occasion to use it. To look at that body of men swinging along up the roadway in splendid uniform, one would have fancied that it was merely a reconnoitering party in from a tramp. Surely, I said to myself, their real character will be discovered before they reach the gates. They never possibly can deceive the guard. At this moment the great, ponderous gates opened, and an officer, the officer of the day, stepped out. He had evidently just sprung out of bed, for there was a half-yawn around his mouth as he made his appearance. The sentry had told him that reinforcements were coming up the road. This was good news. It would mean lighter duty at the post, and more companionship. All this doubtless passed through the mind of the officer of the day as he stepped out to greet the commander of the re-enforcing party. As for the thought of caution, it had not entered his mind. The rebels he had heard of, but had not seen. He doubted if any really existed; and if they did, they were hundreds of miles from Corilla, while, besides, these men coming up the roadside were dressed as regulars. So with a cheery "Glad to see you. Where are you from?" he advanced some twenty feet beyond the gates. Inside the gateway the guard was drawn up prepared to receive the new arrival. The cheery hail of the officer of the fort received an indistinct reply from the young Spaniard. In another moment the two were but a few feet apart. I recall at that instant a whirl of steel in the air, a sharp agonizing cry, and the next instant the officer of the fort

Lay Writhing on the Ground.

Without so much as a look at the man he had cut down in his track, the young Spaniard, with the bound of a panther, sprang into the open doorway, and quick or than it can be told he had cut down two soldiers. Like the sudden blast of a mighty wind every man of the command rushed forward. Carried away with the excitement, I followed; and as I did, I stumbled over the bodies of the dozen men of the guard. Every man had been hazy-headed where he stood. Once on side the fort, the men of the young Spaniard spread out in skirmish order across the parade-ground and facing the quarters; until now not a shot had been fired. Suddenly, though, it came, and from the revolver of the lad ahead. The commandant of the fort, hearing some unusual noise outside, had sprung out of bed, and hastily stepped out on the veranda before his door. As he did so, the young Spaniard, at a distance of more than one hundred feet, drove a pistol-ball between his eyes. The body of the dead commandant rolled down on the walk below. This pistol-shot roused the fort and instantly men poured out from the quarters. Their appearance was the signal for every rifle in the army to open action. The scene that followed was little short of that of a slaughter-pen. The men of the fort had been cut off from their arms. They were

Now Being Butchered.

Men yelled and cursed, begged for mercy, and shrieked as they fell wounded. The young Spaniard dashed about, using a brace of re-

volvers. It looked at one time as if he proposed to slaughter the garrison, but he suddenly gave the word to cease firing. Some twenty-three men were killed. The fort contained about seventy-five men. The living were made prisoners. The first act the young Spaniard did was to slam the gates. He next inspected the ordnance, stationed men on guard, and then proceeded to wash and refresh himself. The flag of the Liberal party was soon floating over the ramparts of the fort. A little later in the day, with that same smile on his lips, and that same tenderness of expression, he fitted me out for my journey, and wishing me a pleasant passage, bade me an affectionate adieu. I reached the east coast without mishap, and took passage to Colon. From Colon I came to New York by one of the regular steamers.

The success of the revolution Mr. Rockwood first learned on reaching New York. He says, that expects to learn on his return to Nicaragua that the young Spaniard had been made an officer of high rank. If they do not promote him, he declares that the youngster will promote himself.

The Old Man in the Pansy.

Maggie Symington tells in the Dublin Warder the following pretty fancies about the pansy: I have found him and you can do so, if you follow directions. Have you ever heard the pansy story? Listen Every pansy that grows represents a whole family: father, mother, two daughters and two stepdaughters. So they say in la belle France, and for this reason the pansy is called the stepmother. When I tell you how to find the different members of this interesting family you will know, all be seeking for pansies that you may prove the truth of my words. First of all you must know that the petals are the colored leaves of the flower, and the sepals are the leaves of the calyx; the calyx is the green outer covering, or leaf-like envelope of a flower. The pansy has two plain colored leaves, these are the step-children. By looking at the back you will find that they have only one sepal between them. These are the step-daughters, who have only one chair, the sepal, to sit down upon. The two marked side petals have a sepal each these are the own daughters and each has a chair to herself. The fifth leaf 'the largest and brightest of all, is the step-mother, and she has two chairs or sepals. She cannot sit on two chairs at once, so one must be for her old man; but where is he? Ah, where! Now, do just what I tell you, and you will discover him. Carefully pull away the step-daughters, the real daughters and the step-mother, and then you will see him—a funny little old man, with a comforter round his neck, sitting huddled up with his feet in a bath-tub.

Household Hints.

Mend the torn pages of books with white tissue paper.

Save your cold tea. It is excellent for cleaning grained wood.

Clean plaster of paris ornaments with wet starch brushed off when dry.

Clear, black coffee, diluted with water and containing a little ammonia will clean and restore black clothes.

Denim is one of the best materials for dress facings. It will outlast six facings of silena and will rub your shoes white as does the canvas.

Interesting Facts.

One woman in 137 in India can read.

Philadelphia has 23,000 more girls than boys.

An English corset firm made 838 corsets on orders for men last year.

Patrick Henry, in 1776, was the first to make use of the expression "fellow citizens."

The Chinese, Japanese, Malays, Siamese, New Zealanders and North American Indians are beardless.

The first lightning conductor was invented not by Franklin, but by an obscure Bohemian monk in 1754.

In 600 the king of Northumberland gave 800 acres of land for one book containing the history of the world.

The average weight of adult Bostonians of both sexes is only 133 pounds. Western people average six pounds heavier.

To gain strength—Hood's Sarsaparilla.

For steady nerves—Hood's Sarsaparilla.

For pure blood—Hood's Sarsaparilla.

Eternal Vigilance

Is the price of health. But with all our precaution there are enemies always lurking about our systems, only waiting a favourable opportunity to assert themselves. Impurities in the blood may be hidden for year or even generations and suddenly break forth, undermining health and hastening death. For all diseases arising from impure blood Hood's Sarsaparilla is the unequalled and unapproached remedy. It is King of them all for it conquers disease.

True Philanthropy.

TO THE EDITOR:

Please inform your readers that I will mail free to all sufferers the means by which I was restored to health and manly vigor after years of suffering from Nervous Weakness. I was robbed and swindled by quacks until I nearly lost faith in mankind, but thanks to heaven, I am now well, vigorous and strong. I have nothing to sell and no scheme to extort money from anyone whomsoever, but being desirous to make this certain cure known to all, I will send free and confidential to anyone full particulars of just how I was cured. Address with stamps:

MR. EDWARD MARTIN (Teacher),

The Great Blood and Nerve Remedy

POOR DOCUMENT

JOHN A. KIMBALL.

Neuralgia of the Heart, Chronic Dyspepsia, Awful Constipation, Rheumatism cured by Groder's Syrup.

October 11, 1892.

GENTLEMEN: For twenty-three years I have never been free from suffering until now. Since I began to take Groder's Syrup, chronic neuralgia of the heart of twenty years standing has entirely disappeared. My distress from severe constipation has been removed. Rheumatism of long standing has ceased to trouble me. I am no longer a gloomy, melancholy dyspeptic. There is no ache or pain in any part of my body. My food digests readily, and causes me no distress whatever.

She had been brave before when she had to depend upon herself, but no sooner did she understand that her lover had come than this courage forsook her, and she clung to him as if in the greatest terror.

He soon soothed her, however, and a few hasty words were exchanged.

They could not stay much, for the time was limited, and there might be danger of some one overhearing them, but Jack told her to be ready and expecting him any minute. When he stood in the doorway before leaving, he called back the one encouraging word.

Remember!

He did not see the dark form that had come to a sudden halt down the passage and stepped into an alcove. It was Dr. Grim.

Remember what that worthy muttered to himself as he watched the new keeper go on down the corridor; he came out of her cell too. Besides, it seemed to her that she had missed his usual accent in that word. Yes, I shall remember to keep a watch on your movements, Lanty O'Shane and if you trip up, so much the worse for you.

Thus Jack was shadowed.

The doctor was too shrewd a man to let the other keepers know that he suspected the new man, for his influence over them would be gone. Already they feared the bogus Lanty O'Shane, who could tell such terrible stories about himself, and seemed ready to back up the argument at any time, that they instinctively acknowledged in him a leader, and were ready to give him the allegiance inspired by fear.

It chanced, however, that Jack was very circumspect in his actions. Perhaps he had caught the cunning eye of the doctor fastened upon him. At any rate, as time passed on the master of the mad-house found nothing to complain about in his actions, though he did not give up watching him entirely.

Nora Warner now lived in an agony of suspense. She feared for the safety of her lover much more than she had done for herself.

There were times when a fierce joy would sweep over her, as she realized how near he was to her, this noble man who loved her so well that he had taken sides with her against the one to whom she owed such a debt of hatred.

She watched for him continually, and yet guarded well her feelings, for unless she was careful his betrayal might come through her, and should such be the case she would die of sorrow.

Whatever plans Jack had formed, he had to be so careful in their carrying out that time passed by; but Nora, conscious of his strong presence, and the fact that he was risking all for her sake, felt her spirits buoyed up.

Twice again had she suffered the terrible torture of the falling water upon her head. Heaven alone knows what the result might have been but for that one thought ever before her—the fact of Jack's presence under the same roof.

On the second occasion she had fainted dead away, and when Jack came to visit her in the evening—he managed to have the keeper remain sick—he saw from her pale face that something was wrong.

When he finally managed to force the story from her, he was filled with the great horror and indignation, and vowed that not another night should pass without his making an attempt to save her from this place of horrors.

Fortunately for them they spoke low, for just outside crouched the mad-house doctor, and his keen ear was bent to the key-hole. He could only hear the murmur of voices, and was unable to distinguish anything that was said, but the very fact of his new keeper, the blood-thirsty fellow whom he had hired especially for any work of an extra severe nature, being engaged in a low conversation with Nora Warner, was enough to excite his suspicions.

These were partially allayed upon hearing the curses honest Jack gave vent to when he learned what torture the woman he loved had already submitted to, though, of course, the doctor was not supposed to understand what it was brought oaths from the lips uttered to swearing.

Under the circumstances Jack could not be blamed very much, and, as his anger was at a white heat, had he been aware of the fact that Dr. Grim was spying upon his movements even then, he would have made it particularly disagreeable for that worthy.

rascal, ready to obey all orders without question.

He had already been in the institution two days, and his soul was sickened by what he had seen.

The doctor had hired him for a special purpose, and as yet he had not been required to indulge in any work though he accompanied the other keepers so as to familiarize himself with the inside arrangements of the asylum.

One of the men complaining of feeling sick on this evening—the result of a powder which Jack had cunningly mixed with his supper—the latter had volunteered to visit the pa in his stead, and leave them the frugal repast that was intended to be their supper.

This it was he entered the cell in which was confined the young girl.

When Nora realized who it was that stood before her in disguise, and that love for her had been the subject to lead him on, she felt her heart fill with rapture.

Oh, Jack, you have come to save me, to take me away from this terrible place, she cried.

She had been brave before when she had to depend upon herself, but no sooner did she understand that her lover had come than this courage forsook her, and she clung to him as if in the greatest terror.

He soon soothed her, however, and a few hasty words were exchanged.

They could not stay much, for the time was limited, and there might be danger of some one overhearing them, but Jack told her to be ready and expecting him any minute. When he stood in the doorway before leaving, he called back the one encouraging word.

Remember!

He did not see the dark form that had come to a sudden halt down the passage and stepped into an alcove. It was Dr. Grim.

Remember what that worthy muttered to himself as he watched the new keeper go on down the corridor; he came out of her cell too. Besides, it seemed to her that she had missed his usual accent in that word. Yes, I shall remember to keep a watch on your movements, Lanty O'Shane and if you trip up, so much the worse for you.

Thus Jack was shadowed.

The doctor was too shrewd a man to let the other keepers know that he suspected the new man, for his influence over them would be gone. Already they feared the bogus Lanty O'Shane, who could tell such terrible stories about himself, and seemed ready to back up the argument at any time, that they instinctively acknowledged in him a leader, and were ready to give him the allegiance inspired by fear.

It chanced, however, that Jack was very circumspect in his actions. Perhaps he had caught the cunning eye of the doctor fastened upon him. At any rate, as time passed on the master of the mad-house found nothing to complain about in his actions, though he did not give up watching him entirely.

Nora Warner now lived in an agony of suspense. She feared for the safety of her lover much more than she had done for herself.

There were times when a fierce joy would sweep over her, as she realized how near he was to her, this noble man who loved her so well that he had taken sides with her against the one to whom she owed such a debt of hatred.

She watched for him continually, and yet guarded well her feelings, for unless she was careful his betrayal might come through her, and should such be the case she would die of sorrow.

Whatever plans Jack had formed, he had to be so careful in their carrying out that time passed by; but Nora, conscious of his strong presence, and the fact that he was risking all for her sake, felt her spirits buoyed up.

Twice again had she suffered the terrible torture of the falling water upon her head. Heaven alone knows what the result might have been but for that one thought ever before her—the fact of Jack's presence under the same roof.

On the second occasion she had fainted dead away, and when Jack came to visit her in the evening—he managed to have the keeper remain sick—he saw from her pale face that something was wrong.

When he finally managed to force the story from her, he was filled with the great horror and indignation, and vowed that not another night should pass without his making an attempt to save her from this place of horrors.

Fortunately for them they spoke low, for just outside crouched the mad-house doctor, and his keen ear was bent to the key-hole. He could only hear the murmur of voices, and was unable to distinguish anything that was said, but the very fact of his new keeper, the blood-thirsty fellow whom he had hired especially for any work of an extra severe nature, being engaged in a low conversation with Nora Warner, was enough to excite his suspicions.

These were partially allayed upon hearing the curses honest Jack gave vent to when he learned what torture the woman he loved had already submitted to, though, of course, the doctor was not supposed to understand what it was brought oaths from the lips uttered to swearing.

Under the circumstances Jack could not be blamed very much, and, as his anger was at a white heat, had he been aware of the fact that Dr. Grim was spying upon his movements even then, he would have made it particularly disagreeable for that worthy.

The mad-house doctor was a man far above the average in cunning, and, once his suspicions in regard to the mock keeper were aroused, he was like a tiger in the watch.

He knew nothing, only that the man's actions seemed suspicious; he might be entirely innocent, and the doctor was not the one to scare away such a promising hand simply for want of a little watching.

If he proved to be the spy suspected then the vengeance of the mad-house doctor would descend upon him like an avalanche, crushing him like a worm.

Although Jack was not fully conscious of being watched, except on general principles, he was very careful in his actions, fearful lest all might be discovered at the last minute.

The night fell.

Gradually the noises of the house died away, for the doctor was severe in his rule, and if his most unruly patients persisted in making night hideous with their wild shrieks, he quickly discovered where their particular fear lay, and treated them to a dose of it until they learned to obey.

Now and then, however, some poor wretch would break out into wild cries, as if Satan had in truth come after him, but it was the duty of the keeper to quiet these outbursts.

Silence was never of long duration in that establishment, and the doctor had seen fit to have the walls deafened by letting her heart tremble, whereas, had she but herself to depend upon, she would have been firm as a rock.

Their work was but begun.

They must how manage to leave the mad-house and grounds, and to do this would require no little boldness and ingenuity.

Jack had observed the way well and had even gained a couple of keys which would aid them in reaching the yard at least, though the great gate would still bar their way unless they could discover where the key was kept.

Softly they glided from the cell and along the corridor. Suddenly the deathlike silence was broken by a terrible shriek as some madman awoke from his awful dreams; so highly strung were her nerves that Nora could not but utter a cry.

Out the mad-house they passed, and across the yard. The moon was shining and the trees cast gaudy shadows upon the white ground. They came to the gate, but a hurried search failed to disclose the key. What was to be done?

Even while they stood there, irresolute and, making laugh noise on their ears and, turning like a flash, they saw the mad-house doctor standing within a few yards of them, an even smile on his face.

At almost the same instant the great bell in the tower clanged out its wild appeals of alarm.

All was lost!

CHAPTER XXII.

"MY SIE HAS FOUND ME OUT."

Strange things often come to pass in this queer world of ours, but never could anything happen more singular in its nature than the meeting, face to face, of Lawrence Richmond, the man of strong impulses and fierce passions, with the woman who had been his wife, and yet upon whom his eyes had never once fallen during the past fifteen years.

Between those two, though they seemed separated by but a step, lay a chasm so deep that it would have been almost impossible to have crossed it. This was the pit that had dug and over which even love had not built a bridge.

She knew him at once.

His hair, when last she looked upon the lover of her youth, had been black as the raven's wing, while now it was white as the snow, but there was that upon his face—a look that never changed. That look of deadly anger that had been the last she had seen upon his face and it had all these years haunted her, so that when she looked upon the same expression now, the knowledge of who stood before her flashed like a meteor over her mind, causing her to reel at first, although she soon regained her self-possession.

As for him, he had not the remotest suspicion of the truth as he stood there.

That this kind-looking, elderly lady from whose life his hand had driven all happiness except what she drew from within, was his wife of the past—the one whom he had once loved with all the fire of his nature—was something that did not enter his mind just then, so that he had not a glimmer of the truth, and was all unprepared for what was to come.

He was hot with anger.

Having followed Roger Darrel in the direction of the haunted mill, he knew just where his child had been hidden away, and had hurried on as fast as possible.

In common with others, Lawrence Richmond had heard of the widow who occupied the old mill, but he had never paid any attention to the gossip that was

circulated concerning her, and the fact that she never seemed to want for anything so long as money would buy it.

He was enraged at the idea of his child being carried off in the audacious manner she had been, and then kept so close to home. In his anger, he forgot that Carol was of age, and that the law could not help him in the matter.

When he found himself face to face with the mysterious widow, he saw with some satisfaction that she evidently seemed disturbed by his presence, and the fact gave him pleasure.

He also saw her lips from his name, although the sound, if any issued from between them, was not audible to him.

Yes, it is Lawrence Richmond, madame! At last I have found you out. By tracking that young imp of Satan I have struck the blow to which he carried her. Do not attempt to deny it, my child is here! he thundered.

At first she had suspected that he had recognized her, but was immediately reassured on this point by his words.

I shall not attempt to deceive you; Carol has been here. She is out for a walk now, but will be back soon when you can see her if you wish. We have nothing to fear from you, Lawrence Richmond, for the girl is of age, and no longer subject to your authority. Go your way, or remain and see her if you will.

He started at sound of her voice, as though memory had given him a stab, and yet just then he could not comprehend why he should act thus.

His keen eyes seemed to search the face of the woman, but she was so utterly changed from the one he had loved, yet sent from him, that not the faintest glimmer of the truth penetrated his brain.

To be continued.

Parsons' Pills

Make New Rich Blood!

FULL LINES of the following Departments are in stock which intending purchasers do well to examine.

NOTICE—Five good reasons why we can sell cheap and give satisfaction.

1st. We are direct importers of all foreign goods, buy in large quantities for Cash and save Importers' profits.

2nd. We import our stock for manufacturing, have all our goods made up and save Manufacturers' profits.

3rd. Having had long experience in the business we know how to buy the very best goods for the smallest possible amount of money, to suit the trade.

4th. We have connections with some of the best manufacturers in England, Austria, United States and Canada and get special prices for wholesaling and save Jobbers' profits.

CAUTION—Do not be so unwise as to purchase upholstered Furniture made up for agents to sell, who know nothing about the work and are not responsible for it. Such goods are brought to us after a few months wear for repairs; Having been badly stuffed and the covers cut too small it costs nearly the price of new goods to make them over. It is wasting money. A word to the wise is sufficient.

Respectfully yours,
J. G. McNALLY

Carol Richmond

THE MAN WITH THE BLACK GLOVE

Continued.

In stature he was rather tall, and his dress proclaimed him a ruffian, and while there was something about his language that spoke of a previous acquaintance with the "could dart," namely, the Green Isle.

His face was dirty and red, the latter probably the result of debauchery, and there was half-comical, half-devilish leer in one of his eyes that would have made some people laugh, and others shudder, according to their disposition.

Nora could not understand the trembling that seized upon her as she gazed upon this terrible-looking creature.

What did it mean?

Was intuition telling her that she was to meet her death at the hands of this villain?

He advanced toward her, and she shrank back appalled. What new system of torture was about to be applied to her?

She watched him with startled eyes as he held up his hand, pressed his finger to his lips, uttered the one word "hush!" and then, gliding to the door, bent his head in a listening attitude. Did he mean to murder her, and was listening to make sure that no one approached?

Again he turned and advanced. Was that a grin of devilish triumph on his face, or did her horror-stricken eyes deceive her? She tried to cry out, but her tongue clove to the roof of her mouth, and her limbs seemed paralyzed. He stood before her now; his arms moved. Oh, God! what sentence was he about to pronounce upon her?

Nora!

CHAPTER XXI.

HER CHAMPION.

When that one word fell from the lips of the keeper, Nora Warner uttered a low cry, in which was blended amazement and joy.

She had expected something terrible to happen, but in the place of it something wonderful had occurred. Never would she have penetrated the disguise assumed by the other; but when he spoke a light dawned upon her soul, for only one man in the world could speak her name like that.

It was Jack.

When he left the widow and Carol, the man had immediately turned his steps toward the mad-house on the Potomac, but this was not so easy to find as he had imagined, for, like many great things, the people in its vicinity knew the least about it.

After being sent off on a false scent several times, Jack finally ran the game down, and then he realized that his work had only begun.

When he gazed upon those grim walls and saw how almost impossible it would be for an inmate to escape from them without outside influence, he began to despair but, remembering what he was working for, he began his labor at once.

In the end he succeeded in being hired by the doctor in the place of a man who had been recently discharged.

Evidently it was the ferocious look of the new keeper that had been his best recommendation in the eyes of the mad-house doctor, and knowing this, the disguised Jack gave him to understand that he was by nature quite a bloody-minded

CHAPTER XXII.

"MY SIE HAS FOUND ME OUT."

Strange things often come to pass in this queer world of ours, but never could anything happen more singular in its nature than the meeting, face to face, of Lawrence Richmond, the man of strong impulses and fierce passions, with the woman who had been his wife, and yet upon whom his eyes had never once fallen during the past fifteen years.
