## Liberals of St. John Banquet Dr. Pugsley.

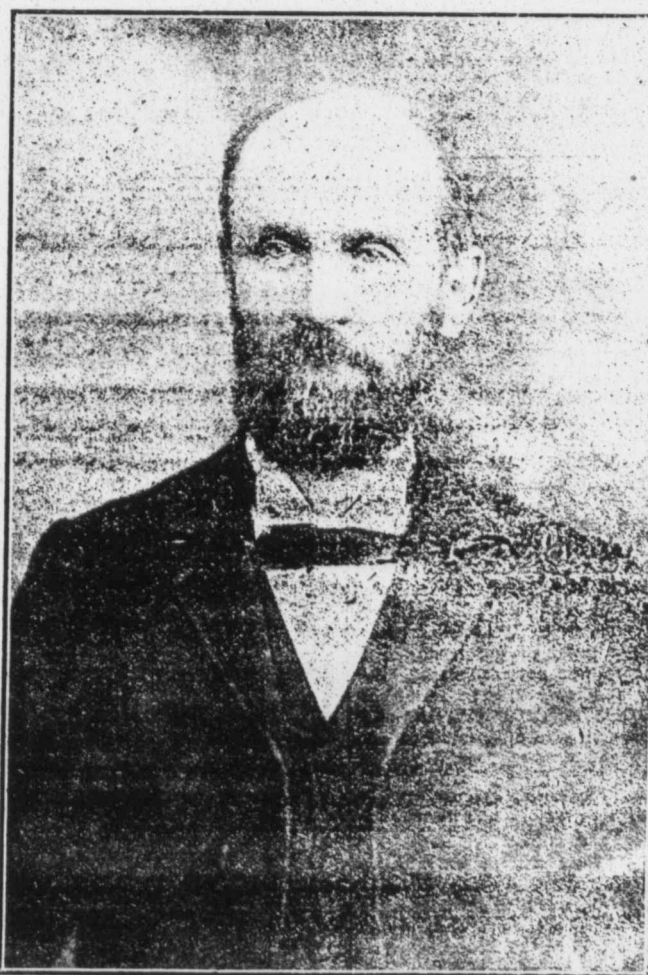

Minister of Public Works is Honored by His  
Friends and Followers.

St. John, Sept. 29th. Liberals then spoke on the needs, the progress throughout the province and in the West Indies, and possibilities of Canada and New Brunswick generally and of St. John particularly. He assured the people that he would continue to work in the interest of the province.

HON. DR. WILLIAM PUGSLEY, MINISTER OF PUBLIC WORKS.

Works. The Hon. Dr. was accompanied by two other members of the Dominion Cabinet, namely, Hon. MacKenzie King and Hon. Charles Murphy. There were about three hundred guests present, among them being representation liberals from all the Maritime Provinces. Mayor Buller presided. The Hon. Dr. Pugsley thanked those responsible for the banquet for the great honor they had conferred upon him and

W. S. LOGGIE, M. P.

J. Sweeney, A. B. Copp and others. The assembly broke up at 2:30 a.m. after a most enjoyable evening.

Among those present from the North Shore may be mentioned Governor Tweed, W. B. Snowball, W. S. Loggie, M. P. and Mayor Millex.

## FAST LINE FROM JOHN

To Various Points in the West Indies.

NECESSARY FOR TRADE.

Present Service too Slow—Fifteen Knot Steamers Would do.

To enter Sept. 27—That a faster line of steamships must be run from St. John to Halifax to various points in the West Indies and that better distributing service must be established there before Canada's trade will improve very much were the main suggestions which accompanied much information offered the West Indies royal commission this morning.

J. D. Allan, one of the Toronto board of trade commissioners, who visited the West Indies two years ago, complained of inefficient transport facilities between Canada and the West Indies. In consequence of the long delay of goods by the Halifax route Canadian shippers had either to pay extra to ship through New York or suffer owing to slow transit. At present the trip from Halifax to Barbados occupied nine days. A fleet of fifteen knot steamers could make the trip in six days.

Hon. W. S. Fielding, a member of the commission, said he understood the reason steamers did not call at all ports was in order to quickly reach more valuable ports to the south. He pointed out that a fifteen knot service was a high rate for freight service, and every knot meant a considerable increase in money.

"It would be a combined freight and passenger service. I am one of those who think Canada should not take second place in anything," replied Allan.

"I'm glad to hear you say so, for that's my belief, too, only I'm a man who has to consider those to pay the bill," rejoined Mr. Fielding. In answer to a direct question he said he believed the trade was worth struggling for, even if it had to be subsidized.

The commission left for St. John to night.

## OBITUARY.

### MISS MARY A. KELLY.

On Monday evening, Sept. 13th after a lingering illness, the death of Miss Mary A. Kelly, aged 28 years, daughter of Henry and Mary Kelly, occurred at her home in Derby. Miss Kelly was in a failing condition for some time, but was not confined to her bed until three days preceding her death. She was beloved and respected by all who knew her and leaves a large circle of friends and relatives to mourn her sad loss. Deceased leaves a kind and loving father, mother and one brother.

Her casket was covered with beautiful flowers which showed the love and respect due her by many of her kind friends.

A large number followed her remains to St. Bridget's church, Renous River, where interment took place on Wednesday, Sept. 15. Requiem High mass was sung by Rev. Father Fitzharry.

The heavy rain almost continuous since Saturday, has caused considerable damage. The trains on the Canada eastern branch were considerably delayed, the track in places being under water. Several washouts are reported. The schooner Ruff which went ashore on Tracadie coast was caught by the gale and battered to pieces.

## York Loan Claimants to Receive 25 Per Cent.

Toronto, Sept. 27—After waiting four years through liquidation proceedings, 114,000 shareholders and claimants against the defunct York Co. Loan and Savings Company are to receive the first dividend of 25 per cent.

## FALL SKIN DISEASES.

An Article for Mothers.

When the children "break out" with eruptions and skin diseases, so common in the fall, don't run to useless and nauseating medicines. Sam-Buk is what is needed. It is a skin food as well as a healing balm.

Mrs. Chas. Leverage of Prescott, North Channel, Ont., tells how Sam-Buk cured her baby. She says: "My baby's head and face was one complete mass of sores. The itching and irritation were fearful, and the little one's plight was so fearful that at one time we feared her ears would be eaten off. We had to keep her hands tied for days to prevent her rubbing and scratching. Doctor treated her in vain, until we had had five doctors. They all agreed it was a frightful case of eczema, but none of them did any permanent good. As a last resource we were advised to try Sam-Buk. The first box did so much good that we felt sure we were at last working in the right direction. We persevered with the treatment until we had used thirteen boxes, and at the end of that time I am glad to say Sam-Buk effected a cure."

Mrs. Holmes, of 31 Guise Street, Hamilton, is quite eloquent in her praises. She says: "Sam-Buk cured my boy of boils and eruptions when he was so bad that he had been unable to mix with other children. Prior to the boils breaking out he had had a bad eruption, but Sam-Buk cleared this away too, and made his skin clear and smooth. It is a wonderful preparation, and mothers throughout the land should always keep it handy."

For eczema, eruptions, itches, better itchy, ringworm, and similar skin diseases, Sam-Buk is without equal. It also cures cuts, burns, scalds, piles, abscesses, chronic sore, blood-poisoning, etc. All druggists and stores at 50 cents a box, or post free for price from Sam-Buk Co., Toronto.

## PEARY COOK, AND THE POLE CONTROVERSY

Both Explorers Give Interviews But Say Nothing Important

Before leaving Sydney Commander Peary granted an important interview to the press men. He said: "I have already made a brief report to the naval department of the United States and to the coast geographical survey. In a short time I shall make an authentic account to the Peary Arctic Club. Finally I shall report the results of our tidal and meteorological observations and soundings to O. H. Tipman, superintendent of coast surveys." Asked "Have you heard Pritchard's statement to the effect that Cook told him that he had discovered the pole when the two met at Etah?"

"I have," replied the commander. "And comments?"

"None whatever."

Pritchard was as mute as a sphinx. Peary said he knew Cook's claim before he came to Etah. He believed Whitney would get back early in October.

"What observations would it be necessary for an explorer to make in order to prove his claim to having been to the North Pole?" the explorer was asked. "I shall leave the Coast and Geological Survey to determine that point," was the reply. He admitted that this question might go to the International Polar Commission or to the Royal Geographical Society and said it would not take him long to say all he has to say.

Forty newspaper men interviewed Dr. Cook at New York on Wednesday and pumped him with questions but failed to get anything new out of him. He answered questions readily enough but declined to describe the nature and result of his observations, saying those were reserved to be given to the world when properly prepared.

Many of the workers at Bretagne, France, put in half the year as sardine fishers and the other half as makers of Irish lace. They get but 5 cents a meter for the lace, which sells for 20 cents.

## CURE SICK HEAD

Sick headache, yet Carter's Little Liver Pills are equally valuable in constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured

Ache they would be almost priceless to those who suffer from this distressing complaint; but fortunately their goodness does not end here, and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. But after all sick head

## ACHE

In the hands of so many lives that here is where we make our great boast. Our pills cure it while others do not.

Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not grip or purge, but by their gentle action please all who use them.

CARTER MEDICINE CO., NEW YORK.  
Small Pill. Small Dose. Small Price.

## WANTED IN TWO PLACES

Robert McRae Escapes From Industrial Home and Steals Bicycle.

ARRESTED AT MONCTON.

Will Probably Return to Finish His Sentence of 24 Months at St. John.

When the police nabbed Robert McRae at the corner of Main and Duke streets at twelve o'clock noon today they made a capture for two different parties, the police at Sussex and the Boys' Industrial School at St. John.

Young McRae got away from the St. John institution on September sixteenth and until this morning could not be located. Chief McLeod of Sussex arrived in the city this morning in search of a bicycle thief and it was while he was searching for the machine with Officer Atkins that he saw young McRae riding the wheel down Main street. The lad was arrested and taken to the police station where he was recognized by Chief Rideout as being the boy who escaped from the St. John school. A letter was received recently asking the police to be on the lookout for the escaped prisoner, and by this means he was recognized. The lad did not try to conceal his identity from the police here, as he answered the questions asked him correctly and promptly. He gave his name as McRae, which was the same as given by Superintendent McDonald of the Industrial School.

Since leaving St. John McRae has been in Hampton and Sussex and on Tuesday last he managed to get hold of a wheel belonging to Geo. Whitney and by this means came to Moncton. The wheel was missed and Chief McLeod asked to locate it. The chief came to Moncton with the result that both the wheel and the boy were captured. Young McRae says that after leaving St. John he walked to Sussex and was endeavoring to get back to the north shore again. He has already served three months in the Boys' Industrial School at St. John and has been twenty one months more to serve yet. Three months ago he was brought before Judge McLatchy at Dalhousie, and owing to his only being sixteen years of age, was sent to the Industrial School.

As yet it is not known just what will be done with him. The Sussex authorities may want to prosecute but it is probable McRae will be returned to St. John and not dealt with by the courts.—Transcript.

**WHEN RHEUMATISM DOUBLES**  
A MAN UP physician and sufferer alike lose heart and often despair of a cure, but here's the exception. Wm Peeg of Harwood, Ont., says: "I was nearly doubled up with rheumatism. I got three bottles of South American Rheumatic Cure and they cured me. It's the quickest acting medicine I ever saw." Sold by A. E. SHAW'S Pharmacy.—18

## Captured at Bathurst.

One Captive Jumps From Running Train—Is Captured Later.

The two young men, LeTurneau and Moore accused of taking a sum of money and some jewelry from Robt. Carlin, the St. John stowaway, were captured at Bathurst by Chief Crawford Tuesday. On the return journey Moore was sitting in a seat with the Chief and the other lad, asked to be permitted to get a drink and the Chief allowed him to do so. He went to the rear of the car, opened the door and jumped. The train was running at a high rate of speed, and although the conductor was notified a stop was not made until Pettit Rother was reached. The Chief telegraphed to Sheriff Doucet and that night Moore was also captured and was brought here by Constable Gray. Very little money was found on either of the boys and both protest they are innocent. All were more or less intoxicated, and cannot give clear statements of their actions on Monday night last.

Both were remanded until Monday. LeTurneau is out on \$900 bail, but Moore is still in the lockup.

The North Pole does not appear to have been so bad a spot after all. The weather was comparatively mild, and Peary's back followed him right to his goal. Ten hours after his arrival at the top of the earth the clouds cleared away and he was favored with weather such as that experienced in the Canadian West in February. The minimum was only 23 below, while the mercury at one time climbed as high as 12 below and the sky was cloudless.

## OUR OFFER TO ENGLAND.

What the People at Home Lost by Their Refusal.

MONTREAL, Sept. 21.—The Canadian Associated Press cables from London the following:

Henry Chaplin, a former president of the board of agriculture and member of the tariff commission of 1904, speaking today at Stourbridge, said that at present Canada required annually to purchase goods to the amount of £50,000,000 sterling, and if England had conceded her the slight preference she asked, the whole of that market would have been placed at the disposal of workers in England because duties would have been imposed upon other countries which would have prevented their interfering. That was an offer made by Canada some years ago, of which, with the greatest folly and unwisdom, we failed to avail ourselves at the time. Other nations, he feared, were now in competition with this country for similar favors from Canada.

## OUR WESTERN TREASURE.

During the past month a party of editors representing some of the most important agricultural papers in the United States have been touring Western Canada, and on reaching Winnipeg on their return trip from Edmonton over the line of the Grand Trunk Pacific Railway, wired Mr. Chas. M. Hays, President of the Grand Trunk Pacific, at Vancouver, who is also in the west on a tour of inspection of the new line in company with Sir Charles Rivers Wilson, President of the Grand Trunk Railway System and party as follows:

"We believe that every foot of the land traversed by the road is eminently adapted to grain growing, mixed farming or the keeping of live stock, and that it must soon develop into a region of prosperous homes. We also unite in expressing our admiration of the high character and the completeness in construction of the road and road-bed, which must soon give the road high rank among transcontinental railway systems."

The party consisted of the following: Prof. Thomas Shaw, of the "Orange Judd Farmer" and "Dakota Farmer," St. Paul, Minn.

Herbert Quick, editor of "Farm and Fireside," Springfield, Ohio.

John Arthur Dixon, managing editor of "Home Life," Chicago, Ill.

Philip Eastman, editor of Capper publications, including "Nebraska Farm Journal," Omaha, Neb.; "Missouri Valley Farmer," Topeka, Kan.; "Farmer's Mail and Breeze," Topeka, Kan.; "Topeka, Kan."

E. E. Faville, editor "Successful Farming," Des Moines, Iowa.

E. S. Bayard, editor "National Stockman and Farmer," Pittsburg, Pa.

C. P. Reynolds, editor of "Prairie Farmer," Chicago, Ill.

The party was also accompanied by Mr. Herbert Vanderhoof, editor of "Canada West Monthly," Winnipeg, Man., and Mr. R. C. W. Lett, Traveling Passenger and Colonization Agent, Grand Trunk Pacific Railway, Winnipeg.

**HEART RELIEF IN HALF AN HOUR.**—A Lady in New York State, writing of her cure by Dr. Agnew's Cure for the Heart, says: "I feel like one brought back from the dead, so great was my suffering from heart trouble and so almost miraculous my recovery through the agency of this powerful treatment. I owe my life to it." Sold by A. E. SHAW'S Pharmacy.—19

Admiral Lord Charles Beresford—or 'Bulldog' Beresford, as he is affectionately termed—who has recently been speaking with characteristic candor on our naval needs, is passionately fond of animals—bulldogs in particular.

## SUNLIGHT SOAP

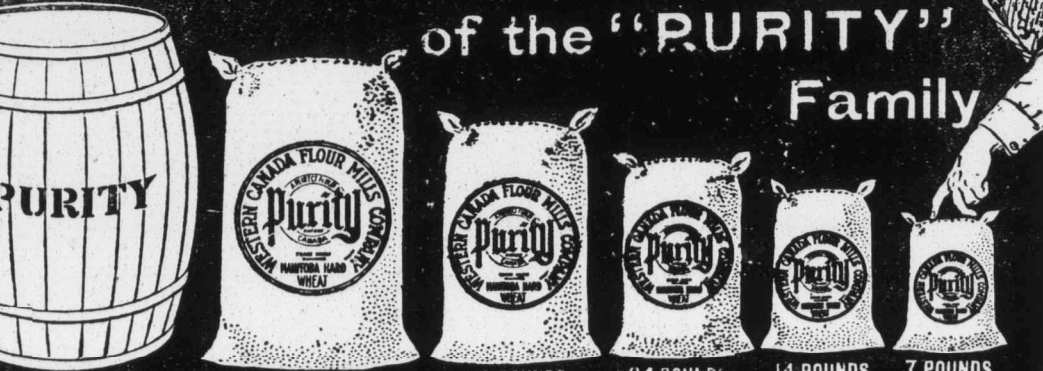

ALL OVER THE WORLD thousands of housewives use Sunlight Soap in preference to any other, because it cleanses the clothes more thoroughly, and at half the cost without injury to hands or fabric. Follow directions.

## MIRAMICHI PRESBYTERY.

The Presbytery of Miramichi met in St. James manse Newcastle on the 14th inst., and transacted considerable business. There were present Rev. C. A. Hardy Moderator, Rev. J. M. McLeod clerk, Dr. Carr, D. Henderson, J. M. McLean, A. J. Wm. Myers, R. H. Stavert, H. J. Fraser, Geo. P. Tattler, J. H. Kirk, F. C. Simpson, S. J. McArthur, Geo. Wood, and E. E. Mowatt, ministers and Messrs. Joseph Henderson and Edgar Vye, Elders.

Rev. James Ross, Supt. of missions, was nominated for the Moderatorship of the Synod, Rev. H. A. Kent M. A. was nominated for the Professorship of O. T. Exegesis in the Presbyterian college Halifax Presbytery decided to raise three bursaries of \$50 each to be given to deserving students in Arts preparing for the ministry.

Mr. Clark returned missionary from Honan was appointed to Doaktown for the winter months.

Mr. Myers tendered his resignation of the pastoral charge of Black River and Napan which was dealt with at a meeting of the Presbytery held in St. Stephen's church, Black River on the 23rd inst. Mr. Myers has done splendid work in the congregation and will be much missed.

Attention was called to objectionable methods of raising money for church purposes in certain places which led to the adoption of the following resolution:

"The Presbytery of Miramichi having learned that there is a disposition on the part of some sections of congregations within its bounds to raise money for debt and other church purposes by means of dances and lotteries in connection with social gatherings, hereby expresses disapproval of the use of any such questionable means and urges upon all interested in the recommendations of the Assembly's Committee on Systematic Benevolence as being in accord with the spirit and practice of the Presbyterian church in Canada."

The next quarterly meeting will be held in St. James' Hall Newcastle on the 14th of December at 11 a. m.

In the excitement of receiving Peary's story from Battle Harbor the world has overlooked the wonderful feat performed by wireless telegraph in transmitting over four thousand words of press matter from a station equipped only for marine work. It is one of the most wonderful things yet to the credit of wireless telegraph and adds another feather to the cap of Chevalier Marconi.

## A SHORT-LIVED MYSTERY.

## CHAPTER I.

W HERE is your mistress? I think she is in the drawing-room, sir.

George Douglas hurried up-stairs. That morning he and his wife had had a quarrel—not the first misunderstanding that had taken place during their ten years of married life, but by far the most serious. Mr. Douglas had ended it by going, as usual, to his office for the day. After an hour or two had elapsed, and he had had time to cool down, his natural sense of justice showed him that he had been in the wrong—not wholly, but partly so.

His first impulse was to make some excuse to return home; but, just then, someone came in on important business to which he felt himself obliged to attend. After that other things prevented the accomplishment of his purpose; and, at last, he decided to wait until his usual hour for leaving the office. Perhaps he left a little earlier than usual—he was of a generous temper and anxious to make peace with his wife he so dearly loved. As he walked quickly homewards he repeated to himself again and again the words with which he would explain what he had been in the wrong. He had no doubt of her eager desire for reconciliation; he knew her so well.

Therefore he hurried upstairs in search of her: at the drawing-room was empty, so was her bedroom, so were the other rooms he entered in the hope that she might be in one of them. Then he went downstairs again guided by the schoolroom piano, which told him that his little daughter was receiving instruction in music from the governess—Dorothy Archer. After a moment's hesitation he decided to interrupt the lesson on the chance of his wife having for once taken it into her head to be present at it—though both Mr. and Mrs. Douglas made it a practice not to interfere with the governess in any way.

Pardon my interrupting you a moment, Miss Archer, said Mr. Douglas, when a quick glance around the room had told him his wife was not there; have you seen Mrs. Douglas within the past hour? Sarah told me she was at home; but I think she must have been mistaken.

She came in here about an hour ago, Mr. Douglas. She appeared to be in a great hurry, and said she was going to London; but had no time to explain; you would tell us all there was to tell.

If I know nothing about it! He spoke and felt like a man mystified.

Mrs. Wyndham was going to drive her to the station, papa, said nine-year-old Mary.

Mrs. Wyndham had called—Miss Archer was saying when there was a knock at the door.

Mr. Douglas himself opened the door. Sarah, the housemaid, was outside.

Please, sir, I made a mistake. Misses is out. I'd been on an errand, and don't know. Cook says that missis and Mrs. Wynham left the house together so quick, that when cook got upstairs to open the front door, Mrs. Wyndham's carriage was some way down the road.

Very good! said Mr. Douglas; but the words did not express his thoughts.

Could his wife have been so imprudent as to tell Mrs. Wyndham of the quarrel that had taken place? And had that rather severe-minded old lady persuaded Edith Douglas that it was her duty to leave her home? Hardly. Yet the poor man felt very uneasy.

I will just step round and see what Mrs. Wyndham has to say about it, he remarked. It would

be as well—he hesitated; then went on boldly—it would be as well to encourage no remarks from the servants until I return, Miss Archer.

Dorothy raised her head, and looked at him. She had heard something of the quarrel, and she knew what he was thinking of. For a moment her heart sank; but she quickly rallied, and replied, confidently:

Mrs. Wyndham will be able to tell you all about it.

I hope so!

Then he went away, and Miss Archer continued the lesson. She counted systematically, and corrected every fault; nothing escaped her disciplined attention, but her thoughts were not on the music.

She had been the little fair-haired Mary's governess for two years. From the first day of her arrival Mr. and Mrs. Douglas had made her feel that her position as paid dependent was changed when she left the schoolroom for that of friend and equal.

Subsequent months of close companionship showed the employers that their child's governess was deserving of perfect trust; and no one could help liking the high-spirited, merry girl. She, on her part, fresh from a situation differing in every respect to the one she now filled, set her pupils handsome parents on a pedestal in her romantic young mind and felt there were few things she would not do for them. Therefore, her heart was heavy, now, at the thought of the trouble that might be at hand.

Mr. Douglas was so wrapped in his own anxious thought that he did not notice the gloomy appearance of Mrs. Wyndham's house as he approached it. Every blind was down though it was still the broad daylight of a midsummer evening, and there was no sign of life anywhere.

His loud peal and knock were answered by the coachman, who, when in the house, acted as butler, footman, and general factotum.

Is Mrs. Wyndham at home? asked Mr. Douglas, with all the carelessness he could assume.

Haven't you heard, sir! said the man, in a low tone. There was an accident this afternoon, and my poor mistress was killed!

Killed! Good heavens! Is Mrs. Douglas here still?

Horried as he felt at the news he had just heard, he, with a strong sense of relief, caught at the conviction that his wife had accompanied Mrs. Wyndham home, in the hope of being of use.

Mrs. Douglas has not been here, sir; we dropped her at the railway station.

Try as he would to control his features, the anxious husband turned very white.

At the railway station? he repeated, vaguely; then, remembering that the runaway must be shielded at all costs, he continued: I shall find a note awaiting me at home no doubt. I was told Mrs. Douglas had gone for a drive with Mrs. Wyndham, so just called on the chance of finding her still here.

How did this terrible affair happen?

Please to step in, sir, and I'll tell you how it was.

Mr. Douglas followed him into a front room, but refused to sit down. He stood fidgeting restlessly while the man Walters told his story.

I feel just awful about it, sir; not that I was to blame, as everyone agreed, and there was plenty to see it; but still, I was driving, and for my poor mistress to be killed like that, and all so sudden! I don't feel as if I could get over it. I think the horse had been troubled a bit by the heat, sir; though, when I had seen my mistress safe inside your house, I drove on a bit to the gardens. I suppose I had waited about half-an-hour, when I saw

Mrs. Douglas beckoning to me. I drove back quick; both ladies got into the carriage, and my poor mistress says, Drive to the station.

We just caught it, sir. Mrs. Douglas, I may say, flew into the station; she had only a small travelling bag and no other luggage. I heard her ask the porter who opened the carriage door, to get her a ticket for Paddington. Mrs. Wyndham waited to see that the train didn't go without her and then she said, Mr. Douglas's office, Walters; but you needn't drive so quick now.

I think the horse had thought he was going home, for I had trouble to make him turn to the right way. We hadn't gone far when we met some cattle being driven towards the station. They were restive, and at the sight of them of 'em the horse grew restive too, and began to kick all ways. The cattle rushed by, and that made him worse. I did what I could to quiet him, but 'twas no use. He first plunged forward, then he reared, then he backed on to the pavement. I heard someone call out, Sit still, ma'am; and I managed to glance round a minute, and saw my poor mistress just going to jump out. I, too, shouted then, but she wouldn't take no heed. The horse stood still for an instant, and she jumped. Of course she fell—that was to be expected—and no one could pick her up before the horse began his tantrums again. I don't rightly know how 'twas done, sir; but my mistress was killed as dead as could be.

Another man had to drive the brute to the stable; I turned sick when I knew what he'd done. As we was so near home they brought the body here at once; and that is all I can tell you, sir.

Did it happen in the street, or in the road leading from the station?

In the road, sir, just afore we got to the street. I half hoped the horse would try to climb the hedge and cool him himself with some of that thorny shrub stuff. It have shook me awful, Mr. Douglas.

Of course it has. It is a very terrible affair, Walters. I am exceedingly shocked at poor Mrs. Wyndham's fate. You have sent for her relatives?

She only has one sir, that ever I heard of; and that was her nephew—Mr. Arthur Hastings. Dr. Short telegraphed for him at once.

There will be an inquest of course. At three o'clock to-morrow, Mr. Hastings will be here by then, he only has to come from London.

I should like to be present at the inquest. Mr. Douglas felt bound to say as much having been intimately acquainted with the late Mrs. Wyndham; but all the time Walters has been telling his short story the distracted husband has been saying to himself over and over again: Why did Edith go to London?

At three o'clock, sir, to-morrow, repeated Walters.

If I can be of any use you know where to send; there must be much to be done; said Mr. Douglas, with a further sense of what might be expected of him. But why had Edith gone to London?

Thank you, sir. We are at a stand-still until Mr. Hastings arrives. I'll tell him what you say, sir.

Mr. Douglas returned home with a heavy heart.

The cook was listening most anxiously for his coming. Dinner was ready, the fear lest all should be overdone, kept her mind from dwelling on her mistress's prolonged absence. But Sarah's mind was free to dwell where it would; the result being that she was very curious to know if Mrs. Douglas was likely to be back for dinner. She took care to be in the hall when her master arrived; and she ventured to inform him that dinner was ready to be served.

Serve it, then! commanded Mr. Douglas.

But my mistress is not in, sir. Mrs. Douglas has gone to London. She may not return to-night.

Sarah's curiosity was baffled. It would have taken keener eyes and ears than hers to detect anything amiss in George Douglas's face and voice. He looked tired; that was all.

Directly dinner was served the master of the house was free to say what he wished to Miss Archer. He never would have a servant

lingering about the room—presumably waiting at table—during meals; so that Sarah had no excuse to loiter when she had removed the covers. Her duty then was to go to the schoolroom and amuse Miss Mary until that young lady's bedtime.

Mr. Douglas had chosen to tell, while Sarah was present, of the sad calamity that had taken place; concluding with:

I can only feel too thankful that Mrs. Douglas was not also in the carriage. Her summons to town has perhaps saved her life.

But no sooner had the sound of Sarah's footsteps died away in the distance, than the unhappy man laid down his knife and fork, and looked across at Dorothy Archer with a haggard face.

I know no more than that she has gone to London; Mrs. Wyndham's coachman told me that she caught the express.

Why has she gone? It is not like her to take such a revenge.

Dorothy knew he was thinking of the quarrel.

It is not at all like her, Mr. Douglas. Depend upon it there is a mistake somewhere. I feel certain poor Mrs. Wyndham could have explained it all. You see she was going in search of you when the accident happened.

But—you don't understand, Miss Archer. Edith and I quarrelled this morning; I was in the wrong, and I came home early to make it up.

I understand perfectly, Mr. Douglas. I knew there was something wrong. You have trusted me with your confidence, so I shall presume to tell you just what I think. I am quite sure Mrs. Douglas bore no malice. She was talking of you at lunch quite as usual. If she had thought of running away she would have gone earlier in the day.

I don't know that. Something Mrs. Wyndham said influenced her to do as she has done—that is my idea. No doubt Mrs. Wyndham saw I had been in the wrong—I am taking it for granted Edith told her all—and advised her to punish me by going away for a time; and after seeing her off, the poor old lady was, evidently, on her way to my office to give me a bit of her mind. I decided, as I walked home just now, to make the servants think I know all about it. I cannot have idle tongues busy themselves about my wife. Will you help me to keep up the fiction, Miss Archer? To-morrow, perhaps we shall hear from her.

You know that I will help you in anyway I can, Mr. Douglas. No doubt we shall, as you say, here to-morrow, and find that you have alarmed yourself for nothing.

Yes, of course, he assented, eagerly; and tried to hope continuously, but waiting for the morning was weary—very weary.

## CHAPTER II.

P. C. LLOYD'S beat took in the station road. He had heard of the accident, but was not on duty at the time. An hour later he started, he naturally paused near the scene of the tragedy to look about him. All the loiterers—brought to the spot by the curiosity common to human nature on such occasions—had gone. No trains were passing through just then, and the road was deserted. P. C. Lloyd was quite alone. He felt a peculiar interest in what was taking place. His wife was ill; and Mrs. Wyndham—knowing her to be a worthy subject for benevolence—had been exceedingly kind to her. That very afternoon on her way to the Douglas's, had the poor lady stopped her carriage at Mrs. Lloyd's little dwelling to enquire as to her progress, and to promise that a bottle of port wine should be sent her—the doctor having said that all she required to bring back her strength was just what the Lloyds could not honestly obtain.

And now the sick woman would have to go without the wine, because her benefactress was dead. Dead! it seemed incredible. As P. C. Lloyd set himself to grasp the fact he found it necessary to rub the back of his hand across his eyes, and, even then, his eyelashes were quite wet. He looked about him blinking, trying to get rid of the mist that would gather in those troublesome eyes.

Poor soul! 'Tis a bad job to be took off sudden like that, though if I had the orderin' of it she'd go to 'eaven straight. What's to become of Ruth now? Doctor Pertieler said best port; and that don't come no'ow within my power with so many mouths to feed; but Ruth brought em all into the world; and it don't seem fair that they

should be the reason of her dyin'! Such thoughts did not help to get rid of the mist. P. C. Lloyd decided to turn his back on the spot and try not to look at it when he next had to pass that way.

He resumed his resolute tramp and a few more steps would have taken him to the end of the road. But he had only taken three when he thought he saw something glistening in the hedge. He stepped across, and found it was the steel clasp of a tiny plush bag, which he recognised at once at having belonged to the deceased lady. She must have had it in her hand as she jumped from the carriage. (Lloyd knew she had opened the door furthest from the foot-path) and it had fallen into the dusty hedge; perhaps she had, unconsciously, flung it from her in her terror. At any rate, there it was in the policeman's great brown hand. It looked like a little toy to him, and, with no particular reason for doing so, he opened it and looked inside. Mrs. Wyndham's purse was there. He took it out, and—still for no particular reason—he opened that also. He saw ten sovereigns in gold and four bank notes. Now, if the sovereigns were his—aye, only one of them—Ruth's life might be saved.

(To be continued.)

## YOU CAN CURE CATARRH.

J. H. Taylor, 54 Bond St., Toronto—to, Breathed Hyomei and cured a Long-Standing Case of Chronic Catarrh That Defied all Other Remedies, Also Toronto and New York Specialists.

Without taking a drop of medicine into the stomach, J. H. Taylor, 54 Bond Street, Toronto, tells how the distressing troubles of Catarrh were overcome by simply inhaling Hyomei air. It's the history of tens of thousands of similar cases on record, proving that Hyomei can be depended upon to cure Catarrh, Bronchitis, Coughs, Colds and Croup. It has no equal for any distress of the breathing organs.

Mr. Taylor says: "Some years ago while on a hunting trip in Northern Canada, I contracted a severe cold that settled in my head and finally affected my throat. It rapidly developed into catarrh and caused a miserable throat weakness. My head would become clogged during the night and there was a catarrhal dripping from the nose into the throat. Many days I had been unable to breathe other than through my mouth, and the constant hawking and spitting was almost unbearable. I had been treated by the best throat specialists here and in New York, but nothing benefited my condition. I obtained Hyomei at T. J. Durick's and soon found relief, the throat dripping ceased and my head began to clear. I continued with Hyomei for six weeks and after that time I was well in every detail. There has been no return of the trouble since, and I feel grateful in speaking well of Hyomei, as it cured me when all else failed."

## UPPER BLACKVILLE.

Harvesting in this section is pretty well finished. Mr. James Duncan is busy threshing.

Miss Mary Danphy, Mrs. Jane Dunphy and Mrs. Chas. Donald spent Thursday at the Fredericton Exhibition.

Mrs. Martha Donald accompanied by Mrs. B. A. Donnelly of Quartz, Mont., are spending a few days in Blissfield.

Mrs. Wm. Donald returned from Blackville on Wednesday morning.

Mrs. Elijah Donald spent Tuesday in Fredericton.

Miss Nellie M. Coughlan is visiting friends in Blackville.

Miss Katie Menzies of Whitneyville returned on Monday.

Mr. Chas. Coughlan has returned from Fredericton where he has been working for some time.

Miss Mabel Donald spent Saturday in Fredericton.

J. Ananias writes as follows: In reference to Dr. Cook's discovery of the North Pole, beg to state I found it two years ago. If you don't believe me, go up and see where I cut my name on it with a penknife.

One Packet of WILSON'S FLY PADS Has actually killed a Bushel of Flies! SOLD BY ALL GROCERS

Don't let an unscrupulous dealer force on you an imitation of the "D. & L." Menthol Plaster. Look for the "D. & L." trade-mark on the tin. It guarantees the genuine and the most effective remedy for Rheumatic aches and pains, Lumbago, Sciatica, Backache, etc. 25c. each. Yard rolls equaling seven of the regular size \$1.00.

## I.R.C. TIME TABLE

The I.R.C. change of time table will go into effect next Sunday, June 27th. The departure of trains from Newcastle will be as follows:

DEPARTURE—NORTH	
Night freight, No. 39,	4.05
Maritime, No. 33,	24.00
Ocean Limited, No. 190,	16.25
Fast freight, No. 75,	18.20
Local express, No. 35,	14.10
Way freight, No. 37,	12.00

DEPARTURE—SOUTH	
Maritime, No. 34,	5.10
Way freight, No. 38,	14.40
Fast freight, No. 76,	11.45
Local express, No. 36,	10.45
Ocean Limited, No. 200,	12.45
Night freight, No. 40,	2.10

INDIAN TOWN BRANCH	
Leave Indian town,	8.55
Arrive at Newcastle,	10.20
Leave Newcastle,	16.35
Arrive at Indian town,	17.55

## The splendid reputation the FREDERICTON BUSINESS COLLEGE

has gained for itself among business men, means a great deal to the young Man or Woman who secures its Diploma.

Large numbers will be entering in September, but if you cannot come then, come when you can.

Send for free catalogue. Address, W. J. Osborne, Fredericton, N. B.

## We Expect As a matter of course

Our usual rush the first of September. No need of waiting till then. There is a better time for entering than just now. A seat in our rooms these hot days is a positive luxury. Call, or send for Catalogue containing terms and courses of study.

S. Kerr

Principal

We are BUYING South Africa Veteran Scrip.

BLANK ASSIGNMENT.

W. J. Higgins & CO., TAILORS.

ST. JOHN, N. B.

## Not Coughing Today?

Yet you may cough tomorrow! Betise be prepared for it when it comes. Ask your dealer about keeping Ayer's Cherry Pectoral in the house. Then when the hard cold or cough first appears you have a doctor's medicine at hand. Your doctor's approval of its use will certainly set all doubt at rest. Do as he says. He knows. No alcohol in this cough medicine. J. C. Ayer Co., Lowell, Mass.

Robust health is a great safeguard against attacks of throat and lung troubles, but constipation will destroy the best of health. Ask your doctor about Ayer's Pills.

## THE UNION ADVOCATE.

ESTABLISHED 1887.

Issued Every Wednesday morning by The Advocate Publishing Co., Ltd.

## TERMS:

If paid in Advance, \$1.00  
At End of Year, \$1.25  
American Subscriptions, \$1.50  
(in advance.)

Subscribers are requested to take notice of the date printed on the paper for their name. For instance, "May 1909" means that the subscription is paid up to May 31st, 1909. When a new payment is made the date will be changed to correspond. SUBSCRIBERS ARE REQUESTED TO SEE THAT THEIR DATES ARE CORRECT.

Subscribers are requested to notify the proprietors of any failure to receive the paper promptly. No paper will be discontinued until all arrears are paid, except at the option of the proprietors.

## LAST NIGHTS BANQUET

Liberals who met last night at the banquet table to do honor to the Minister of Public Works had much reason to be in smiling humor.

It is a season of fair weather with the Liberal party. The long and admirable reign of Sir Wilfrid Laurier bids fair to continue for many years. The country gives its confidence in an unusual measure to the progressive Liberal administration which has done so much for Canada and which plans yet to do so much more.

Hon. Mr. Pugsley was there as the trusted and accredited spokesman of that administration, as an influential minister who for several years has most satisfactorily administered a great department, and as the victorious leader of the New Brunswick Liberals who hold eleven of the thirteen seats in this province. The Department of Public Works has long been one of the highest importance, but never in Canada's history has its head been called upon to deal with so many great projects as come within the scope of the department in these days of the Dominion's expansion and prosperity. We say prosperity advisedly, for while Canada felt the world-wide depression of 1907-8 to some extent, it affected this country much more lightly than most, and today the buoyant revenue gives proof that the country has once more entered upon a period of business expansion and general development. New Brunswick will share in the development that is coming. It is a matter for congratulation that one of its sons, whose friends now meet to do him honor, is one of the Liberal leaders to whom the management of Canada's affairs is entrusted during a term when so much will be done to promote the country's growth and welfare.

## OUR ROADS.

As we watch the crowds of sportsmen getting off trains here to spend a fortnight or so in the Miramichi woods, few stop to consider the condition of the roads over which they have to pass for the greater part of their journey to the hunting ground. The Hazen Government is ready to boast of any good patch of road which remains, the relics of the last government, but it never turns its attention to those back woods roads where traffic at this time of year is considerable. People coming from afar off go over our roads (?) in remote sections, and ask "What kind of a government have we?" We hate to tell the stranger that our government has forgotten us since election day, and yet there is the ocular proof, forcibly impressed upon us with every jolt of the wagon. Driving up the north side of Renous River we leave civilization where a road branches to the left to go up the Dungarvon. Continuing up Renous there is a highway (if eideroy alternated with high boulders of rock can be called a highway) over which the traveller passes with considerable danger to himself and his conveyance. It is seldom one finds ten miles of a decent logging road in such a condition as is the ten miles of "Kings

Highway" in question. The "Kings" would certainly feel proud of his thoroughfare, could he but take a trip over it in his auto. At the end of these ten miles, like the Monks of St. Bernard, the kind-hearted and highly respected Chas. E. Colepaugh, has his abode. With the advent of the new government Mr. Colepaugh began to urge his claim for some repairs to the highway. Up to the present nothing has been done, and this road, so much frequented by sportsmen at all seasons of the year remains an eyesore and a disgrace to the country. How long will it remain in this condition?

## AUSTRALIAN MILITARY DEFENCE.

The Australian scheme of military defence contemplates that in six years there will be available a first line of 50,000 men ready to go anywhere, a second line of 50,000 ready to act as garrisons, and the third line of 140,000 composed partly of men who have had citizen training, and partly of older trained reservists. The cost is put at only £2,500,000 a year, or about double what Canada pays for a force that drills only some 35,000 men a year, and that does not have 10,000 men ready for service outside their local districts. The Australians must have made a miscalculation, or there is more waste in the Canadian Militia than people know of.—Gleaner.

## THE PULPWOOD QUESTION.

American pulp and paper interests are still anxiously enquiring what Canada intends to do on the pulpwood question in view of the situation created by the Aldrich tariff. There are many Americans who are still in doubt as to the exact meaning of the new tariff provisions affecting Canadian pulp and paper. The New York Journal of Commerce says of the matter: "It is reported from Montreal to be certain that the province of Quebec will assimilate its policy to that of Ontario in regard to the exportation of wood for pulp-making grown on the crown lands, which are leased for the cutting. This means an absolute prohibition of the export, doing away with the export tax, which now distinguishes the Quebec policy from that of Ontario. That will simplify the application of the countervailing duty provided for in our new tariff, so far as those provinces are concerned, and they are the only ones affected. It will simply result in imposing a duty of one twentieth of a cent a pound, dry weight, upon mechanically ground wood for pulp from those provinces. Instead of leaving it free from duty as from other sources, and will add one tenth of a cent a pound to the duty on printing paper from there, when valued at three cents a pound or less. There will be no equivalent of an export tax to be added."

The provision for the countervailing duty makes no distinction between pulp wood, wood pulp or paper derived from material from crown lands and from other sources, but the instructions lately given by the Commissioner of Internal Revenue to the Collector of Customs at Ogdensburg made that distinction and directed that the duty be collected only from pulp or paper made from wood from the Crown lands. If that is the proper construction of the law, it will affect only the smaller part of those articles imported from the two provinces, for it is said that somewhere from fifty to seventy per cent, of those imported come from material grown on private property. The provinces cannot prohibit the export of those or impose a tax upon it. That can only be done by the Dominion Government, and it is understood that it is not disposed to adopt any such policy.

It is said, however, in the despatch from Montreal, that the Canadian press is almost unanimously in favor of Provincial and Federal prohibition of the export of pulp wood. It is argued that American paper makers are dependent upon Canada for their supply of this material, and if it is cut off, not only the grinding of the pulp, but the making of the paper, will have to be largely transferred to Canadian soil, building up the industries there. While that policy does not seem likely to be adopted by the Canadian Government, it is an interesting question what the consequences would be if it should be so.

"Would it be 'unduly' discriminating against the United States and lead

to imposing the additional twenty-five per cent. ad valorem to the minimum tariff upon all imports from Canada? If there should be a general prohibition of the exportation of wood for pulp-making from Canada it would cover all the provinces and all the material, whether from public or private lands; but it would apply to exportation to any and all countries, and not to the United States alone. Would the fact that the United States affords practically the only available market for the material make this constitute a discrimination against it, 'undue' or otherwise?"—Quebec Telegraph.

## TWO MEN ARRESTED FOR THEFT

Paint Thieves get the Surprise of Their Lives.

## SHIPPER DRAWS REVOLVER

And the Would be Paint Dealers Yield to its Shining Influence.

Two young men belonging to the North West were arrested Wednesday night and placed in gaol charged with attempting to steal paint from the barque Altavella, which is discharging ballast at the Anderson wharf.

According to Captain Milton's story the two young men arrested went aboard his ship Wednesday and offered the cabin boy \$1.00 for every hundred pounds of paint or lead that he (the cabin boy) would give them, and on leaving the ship told the boy they would call that night about ten o'clock. About 9.30 in the evening, half an hour before the appointed hour, the two young men arrived in a boat at the side of the ship, and asked the boy to hand them down the paint, but he refused. They then went aboard and asked the cabin boy for an iron to open the paint closet, but instead of going for the iron bar, the boy went and informed the captain that they were aboard. When the captain and mate made appearance the alleged thieves made over the rail into their boat; the captain then pulled his revolver and forced the men to return aboard his ship, and had them taken to the lockup.

The case came up before Police Magistrate Maltby on Monday and was adjourned until today.

## CHURCH SERVICES.

Mr. Thos. Roy occupied the pulpit of the Baptist Church on Sunday evening and preached a most eloquent sermon which was listened to with rapt attention by a very large congregation. The music was of a high order. A duet by Mrs. Atkinson and Mrs. Wm. O'Donnell, was very much enjoyed. Mr. Roy is a Newcastle boy, and has hosts of friends, who wish him every success in his chosen profession. He returns this week to resume his studies at Acadia College.

St. Peter's church, Derby. The annual harvest thanksgiving services of this church were held on Sunday last. The church was very tastefully decorated; flowers and fruits predominating. Among those who assisted in adorning the church may be mentioned the following—Misses Flett, Gillis, Saunders, Crocker, Mrs. Cuthbert, Messrs. Allison and Betts. The attendance was about the average, the rain preventing many from attending who would have been present. The singing was hearty. The choir, assisted by Mr. John Vanderbeck with cello, rendered their part of the service in a creditable manner. Sermons appropriate to the season were preached by the rector.

The Rev. F. T. Snell who has been pastor of the Baptist churches at Underhill and Upper Blackville for the past two years is removing to the charge of the church at Alma, Albert Co. Mr. Snell will carry away with him the good wishes of a large circle of friends in all denominations and sincere wishes for a happy and prosperous pastorate in his new charge. He is a broad minded, catholic gentleman and will command respect and esteem in any community. Mrs. Snell a most estimable christian lady, and joyfully shares the labors of her husband in church work.

Harvest Thanksgiving services will be held in Trinity church, Blackville on Tuesday evening Oct. 5th and in St. Agnes church, Grey Rapids on Wednesday evening the 6th. The Rev. M. Shewen, rector of Kings clear will preach at both services.

## NEW FALL HATS.

The late fall styles of Hard Hats have arrived. They are graceful in outline, and possess that "INDIVIDUALITY" WHICH CAN ONLY BE HAD IN A "CREAGHAN" HAT. They are here to FIT EVERY HEAD, and to SUIT BOTH YOUNG and OLD. The Brims are still quite flat, with a very slight dip in Front and Back, and a shade curved. We have picked out the best shapes from the BEST AMERICAN and ENGLISH MAKES. The one you want is CERTAINLY among them.

"Wilkinson" Hats .... \$2.00 up  
"Carter" Hats .... \$2.50  
"Suffolk" Hats .... \$3.00  
"Stetson" Hats .... \$4.00

# Home Course In Modern Agriculture

## X.—Some Insect Pests

By A. B. GREGORY,  
Agricultural Extension, Scotch State College  
Glasgow, Scotland, and formerly from Australia.

**A**MONG the insects which the farmer has to contend with, none are so troublesome as the corn pests. Nothing is more annoying than to have a growing crop of corn or grain attacked by a host of "bugs" and grubs, and to find it not only ruined.

Insects, like weeds, are very difficult to deal with if you go at them one at a time, but if properly managed they can be easily held in check. From the standpoint of the damage they do, insects may be divided into two classes—those which attack field crops and those which are dangerous to fruit and garden crops.

There are a number of insects which attack corn. While these are seldom present in large enough numbers to destroy any considerable part of the entire crop, the money value of the damage they inflict on the corn grown on a quarter section each year amounts to no small sum.

One of the most important of these pests is the corn root worm. The eggs, which are laid in the cornfield during August or September, hatch during the next June or July. The worms when full grown are about one-third of an inch long and as big around as a pin. They bore up inside the roots, inflicting a bad injury to the growth of the plant as seriously checked. Often, too, the roots are so weakened that the corn blows down badly. Some times during August the worm goes through a transformation called pupation, which changes it into a small light green beetle. This beetle feeds on the silks and tips of ears and lays eggs for the next year's crop of worms.

Another insect which lives on the roots of corn is the root louse. These lice are very small and helpless. They are kept through the winter in the egg stage in ant hills. In the spring after they hatch they are placed on the corn roots by the ants. The ants are very fond of a sweet fluid which is secreted by the lice, and they take care of them for this purpose.

Other insects which do more or less damage to the corn crop are the stalk borer, wireworm, white grub, bill bug, cutworm, etc. These insects live and multiply in grass land and from there find their way into the adjoining cornfields. They do the greatest damage, however, when the grass land is plowed up and put into corn.

The damage from nearly all insects affecting corn, small grain or grass can be readily prevented by a good system of rotation. This is especially true if clover is used, since such insects as cutworms and grubs do not work to any extent on clover. The frequent plowing of the ground and change of crops where a rotation is followed are fatal to most insects. Damage from these pests will be still further reduced if the soil is kept so well supplied with plant food that the plants can get a quick start in the spring. Treated in this way, they are more vigorous and better able to withstand insect attacks.

These remedies, with the exception of the last, cannot be applied to or-

minis appears about the middle of July. It is this breed which does the most damage. It is the worms which hatch from the eggs laid by them that are so often found in soil and water.

Many poisons, of which Paris green is the one most commonly used, are effective in destroying the feeding moth. Paris green is usually used in connection with bordeaux mixture, which is a remedy for the various fungous diseases which affect the leaves and fruit.

To make this mixture effective five pounds of copper sulphate and five pounds of lime separately in twenty-five gallons of water each. When they are thoroughly dissolved mix the two solutions and add four ounces of Paris green. The time in this solution is added to prevent the chemicals from injuring the leaves and to make the mixture stick better.

Three sprayings are sufficient under the feeding moth. The first should be given immediately after the blossoms fall, the second from ten to twenty days later and the third about the first of July.

One of the chief insect enemies of the plum and one which also attacks many of the other fruits is the curcul-

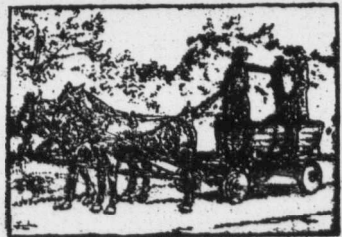

FIG. 11.—A CURCULIONID BEETLE.

lion. The curculionid beetle lays its eggs in the young fruit shortly after it sets. In doing so it leaves a half moon shaped scar which is its trademark. One of the worst ways of getting rid of this insect is to let the beetles from the tree at this time.

Spraying is also an effective remedy. The bordeaux mixture may be used, but it is not so effective as Paris green. It is applied at the rate of three pounds to fifty gallons of water. The spray should be applied just before the blossoms open, just after they fall and again about fifteen days later. Parasitic sprays should never be applied to fruit trees while they are in blossom. It is not necessary to destroy the insects and will kill many of the honeybees, upon which the blossoms are so dependent for pollination.

The insects that have been mentioned so far live by eating the leaves and fruit and in doing so take up enough of the poison to put an end to their destructive work. There is another class of insects, however, for which such remedies are not effective. These are the sucking insects, of which plant lice are the most common examples. Insects of this kind feed by sucking through the outer layer of the leaf or bark and sucking the plant juices. They thus cause damage from any poison which may be on the surface.

To get rid of sucking insects some substance which will kill by coming in contact with them must be used. There is nothing better for this purpose than kerosene emulsion. This is made by dissolving half a pound of soap in a gallon of boiling water. This mixture is then taken from the stove and two gallons of kerosene added. The compound should be shaken violently for a few moments by pumping it up with the spray pump and back into the pail. This causes the oil to mix thoroughly with the water. Before using, this original mixture is diluted with six to ten parts of water.

A common insect affecting garden crops and one that is hard to handle is the striped cucumber beetle. This is a serious enemy of cucumbers, squashes, melons and other plants of like nature. Spraying does little good and is liable to injure the tender plants as well. Where but a few hills are raised, covering them for the first two weeks with a small box with mosquito bar stretched across the top is a good preventive measure. Another effective plan is to go over the patch in the morning while the dew is on and the beetles cannot fly, knock them to the ground by giving the plant a slight blow and put a drop of kerosene on each one.

Where any of these crops are raised on a large scale the most effective remedy is the use of "trap plants." Plant the field to squashes a week or ten days before time to plant the main crop. The beetles are especially fond of squash plants and will gather on them in large numbers as soon as they come up. Just about the time the other plants begin to peep through the ground the squashes can be sprayed with very strong kerosene emulsion. This will destroy both the squashes and the beetles. The beetles usually do not move to the neighbor-

## FIRE AND INSURANCE

What Being Burned Out May Mean to a Business.

DAMAGE ONE CANNOT COVER.

Excesses have caused by the thousands of Speculations and the Swiftness of Trade that has been Accompanied by the General Public.

"I suppose you heard that Black & Co. were burned out from the seed to the basement last night?" remarks the man in the bar.

"Not," exclaims the friend who doesn't see the morning paper. "I suppose they carried insurance?"

"Oh, yes—a hundred thousand of it," returns the first speaker, at which his friend settles back with the comment that everything is all right then.

This is the layman's conclusion almost invariably. Some big concern burns out, but with insurance to an amount amounting to cover the loss the average man is disposed to feel that it is all right. He doesn't stop to think of the enormous sums of a business which cannot be covered by insurance and which for weeks, months or years after a fire are crippling and perhaps ruinous to the fire victim.

Take, for example, a highly organized factory plant in a prosperous town which has been burning out a vast specialized product from the hands of thousands of expert workmen. The plant, fitted with costly machinery, is covered by insurance upon its visible material assets. Fire sweeps it and lays everything in hopeless ruin. If every piece of machinery, every building and all material adjuncts of the plant have been covered to full value in such a plant, will the reader dare make a rough guess as to what the ramifications of loss may be?

Only the other day I stepped into a bookbindery, unostentatious in its street signs and occupying a fifth floor in an obscure street. In the elevator shaft was that peculiar odor which marks the track of fire and firemen days and weeks after such an accident.

"Most of the fire was next door," explained the proprietor, "but I guess the smoke and the water were about as bad for us. Sometimes it is almost better to have the fire yourself than to have it next door to you."

Which seemed to be especially true of book material. When every book and every bookcase in the building had been soaked in water from the engine in the street had flooded it until raw steel was decomposed. Everything had been closed down, workmen in the plant were idle, and the proprietor was awaiting the adjustment of the insurance which he had been changing. But in the event of this insurance he was a lucky fellow.

Ordinarily the house that contains pictures which would have lost it the millions of risk on the machinery, stock and materials. Ordinarily a still further blanket policy was needed for the purpose of covering the normal amount of book material on hand owned by others and committed for rebinding. But only a few days before the fire the house had secured a commitment of \$5000 worth of book material to be bound. These volumes, aside from intrinsic value, represented so much of other value as to make the risk almost for almost any reason. And these books were insured.

Before reaching from the library had asked the owners to take out a policy for themselves protecting them against such fire loss. The firm had not done so, and when the fire damage came the disposition of the owners was to hold the binder for them under one of the binder's blanket policies.

On this one disputed point, taking it into court, will some one make a guess as to what this one feature of the insurance was "insured," if it should be settled in the supreme court after five or seven years, for example?

But in the case of the big manufacturing, with its imported special machinery, its season of rush work and its enormous and fluctuating stock of material—of on the morning after the fire the assuring companies settle in full for the visible losses, how much has the company been damaged?

Of first consideration, perhaps, is the enormous payroll of the concern. If most of the mechanical work of the plant has been done by piece-workmen, still the necessary force of assembling employees on salary is a problem. The determination of the owners is to start up anew. Tried and proved employees must be retained while the work of rehabilitation goes on. They must be paid even if they are to do no more than wait. Settlement of some kind must be made with contractors who have been supplying raw materials from the hands of other thousands of workers. No matter what the clauses in contracts providing immunity in case of fire, strikes and acts of God, every line of business affecting the welfare of the manufacturing has been affected.

The plant is a total loss. Before it can be rebuilt the ruins of the old factory must be cleared away.

In the meantime all these employees of the manufacturing who have been pressing for the filling of contract orders find themselves shut out of any chance for receiving them. They turn at once to other competing establishments for the work. Not only does the burned out firm lose all chance of profits from this work, but it is losing a long chance of losing some of its oldest and best customers of years standing.

## THE FUR SEAL.

A Sea Animal With Heart, Liver and Kidneys Like a Sheep.

The fur seal is a land animal of perverted tastes, who, living at sea, has had his paws changed into flippers very like the long black kid gloves of a woman. His heart, liver and kidneys are exactly the same as those of a sheep and just as good to eat, but his flesh, although just like fat mutton to look at, is rank and distasteful from his habit of eating fish. The whole package is put up in a parcel of thick white fat to keep the body warm, while from the skin grows a heavy crop of beautiful brown fur, protected with large flat oil bearing hairs, making a glossy surface which slides through the water without friction.

Perfectly fearless, overflowing with fun, a perfect little athlete, marvelous strops, the fur seal is the most delightful of all wild creatures. But, although they live at sea, the seals, being heavily clothed in fat, skin and hair, find the temperate latitudes much too warm for comfort during the summer months. Since they cannot shed their garments like ourselves, they migrate to a subarctic climate, gathering in immense multitudes where there are fisheries to support them. Their ration is fifty pounds of cod every day, which for a creature the size of a sheep is considerable.—Exchange.

## A STORY OF THE SEA.

The Man Who Braved the Storm and the Sailor He Rescued.

Off the coast of Ireland there was a terrible storm, and a crowd gathered on the shore to see a storm tossed vessel not far away being pounded on the rocks.

Sturdy men launched a boat and pulled away at the oars to rescue the imperiled ones.

As the boat came back the watchers on the shore cried, "Did you get them?" and they answered: "All but one. We had to leave him or risk the lives of all." And when they were landed a stalwart fellow stepped from the group and said, "Who will join me in the rescue of the remaining one?"

Then an aged woman cried out: "Oh, my son, don't go; don't go! You are all I have left. Your father was drowned at sea, and your brother William sailed away, and we never heard from him, and now if you are lost I will be left in sorrow alone."

But the man replied: "I must go, mother. Duty calls me." Then he and other brave hearts launched the boat and pulled for the wreck.

Assuredly the mother waited in tears and prayers. At last they saw the lifeboat coming nearer and nearer, and when it was in hailing distance they called, "Have you got your man?"

And the answer rang out clear above the storm, "Yes, and tell mother it's brother William!"

Nests of the Golden Eagle.

Every pair of eagles whose habit is to have an opportunity of watching over a period of a few years would seem to have invariably at least two alternative sites for their nests. Some have three, and I know of one with four sites. In fact, I only know of one pair out of many which habitually resort to but one place and only one. The reason for this is, however, apparent, for owing to its situation it has never been disturbed. The nest is in a small cavern on the face of an absolute wall of limestone rock some 800 feet high, at about 400 feet from the summit. Above the cliff is a talus of loose stone at an angle of forty-five degrees or so, above which again rise other precipices. To reach the nearest point above this nest would be a long day's work.—London Saturday Review.

University of Paris.

The doctor's degree in the University of Paris is so entitled as to designate the faculty under which the work was done, as those who do literary work would receive the degree doctor of letters, etc. To obtain the doctor's degree the candidate must possess the lower degree of the corresponding division of work, submit two theses on different questions, reply to questions or objections concerning them, pay a fee of 140 francs and present 100 printed copies of one of his theses to the university. The candidate for the degree doctor of letters must write one thesis in Latin, the other in French. If in the scientific department, the theses must be on some original investigation; if in theology, the examinations are both oral and written.—School Bulletin.

Left Out in the Cold.

Elder (discussing the new man's probation discourse)—In my opinion he was justified in dividing folk into the sheep and the goats. I would just say, Jamie, that I was among the goats, and I would say that you were among the sheep. He said do we come in? He'll no do for us, Jamie. We'll no vote for him.

An Estimate and a Hope.

"You've heard her, you say?" remarked Mr. Duxley. "Ah, she certainly has the gift of song."

"Well, I hope that's what it is," replied Miss Knox. "I should like to think she said anything for me."

Same Old Misery.

"Spose dar wuz a turkey for every man in de country?"

"Wouldn't make any difference, for dey'd have wings enough to fly out o' reach."

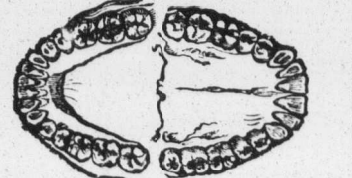

A man's misfortune is like a shoe—if too large, it trips him up; if too small, it pinches him.—Horne.

## MAKES ASTONISH- ING CURES.

Mi-o-na Tablets Cure Dyspepsia  
by Promptly Removing the  
Cause, or Money Back.

There is just one way to cure dyspepsia and stomach disorders, trivial or serious and that is to tone up or put energy into the stomach walls, so that they will be able to properly mix or churn the food.

Mi-o-na tablets quickly arouse the stomach from its inaction and in a short time it is able to do its work properly.

Harry Dodd of Bridge street, Hastings, Ont., says:—"For seven years I had suffered and spent much money doctoring, but all to no avail. I could eat but very little, as the food would ferment and sour, making gas, which caused serious heart oppression. I was languid and weak and had no ambition. I did not feel like going anywhere or seeing anyone. There was a constant dull pain in the pit of the stomach. I was unable to sleep, was nervous, restless and would awake more tired than on going to bed. I tried Mi-o-na and soon found relief, and in less than six weeks Mi-o-na had completely cured me."

T. J. Durick the druggist, sells Mi-o-na tablets at 50 cents a large box, under a rigid guarantee to do all that is claimed for them or money back.

### SPRING LAMB

They went into a restaurant—  
John Jones and Mary Drew;  
Oleary had a little lamb,  
And John had his lamb, too.

**THAT CUTTING ACID** that arises from the stomach and almost strangles, is caused by fermentation of the food in the stomach. It is a foretaste of indigestion and dyspepsia. Take one of Dr. Von Stan's Pineapple Tablets immediately after eating, and it will prevent this distress and aid digestion. 60 in a box, 35 cents. Sold by A. E. SHAW'S Pharmacy.—16

The fall that comes after "ride gives it an awful bump."

An accommodation train has as many stops as a pipe organ.

In the last half century Japan has recorded more than 27,000 earthquakes.

One of the motorist's chief delight is to crawl under his car when something goes wrong. But just think of crawling out of it and under an airship about a thousand feet up in the air if something went wrong.

In the United States about 16 per cent. of the divorces are granted after three or four years of married life.

After reading Dr. Cook's description of the trip to the North Pole, the wonder is that anybody failed to reach the coveted spot.

Of course the North Pole may have been discovered, but the discoverer carelessly neglected to saw a piece of the end and bring it back to show us.

During the past seven years the postal system in China has expanded largely. The postal routes now cover 88,000 miles and there are 3,493 post offices.

There is nothing apparently to show that the North Pole is any different from any other spot in all the countless miles of eternal ice and snow. But it is the Pole.

That man who eloped with his former wife probably wished they had all the money they had wasted on divorce lawyers so that they might use it to buy their second crop of furniture.

**EYES AND NOSE RAN WATER.**—G. G. Archer, of Brewer, Maine, says: "I have had Catarrh for several years. Water would run from my eyes and nose for days at a time. About four months ago I was induced to try Dr. Agnew's Catarrhal Powder, and since used the wonderful remedy I have not had an attack. It relieves in ten minutes." 50 cents. Sold by A. E. SHAW'S Pharmacy.—17

Right  
Styles at  
the Right  
Price

**FIND** the right hatter and examine, carefully, the right hat for your head—you'll know it by that label of Wakefield's. Note its silky nap, its graceful lines, its fine binding and finish. Try it on. Then enquire the price. You'll know then why these hats are favorite in Canada—as in London—with men who must dress well and won't waste money. Buy by the label—it warrants the value.

## Reports of the Micmac Agents

Of Point La Garde and Grand Cas-  
capedia Show that the Tribes  
of these places are Pro-  
gressing Favorably.

Province of Quebec,  
Micmacs of Restigouche,  
Pointe la Garde, May 1, 1909  
Frank Pedley, Esq.,  
Deputy Supt. General  
of Indian Affairs,  
Ottawa

Sir,—I have the honor to submit my annual report for the fiscal year ending March 31, 1909.

Reserve—This reserve is situated on the northern side of the Restigouche river, in the township of Manicouche, in the province of Bonaventure, in the province of Quebec, opposite the town of Campbellton, N. B.

Tribes—All the Indians of this agency belong to the Micmac tribe.

Population—The population of this agency is 498, an increase of 5. There were 24 births and 19 deaths during the past year.

Health and Sanitation—The health of these Indians has been fairly good, excepting for smallpox, which broke out among them during this winter. The sanitary precautions have been well carried out, and the disease appears to be well stamped out now.

Occupations—These Indians devote themselves to farming, lumbering, river-driving, ship-loading, acting as guides for tourists; a few make baskets, axe and peeler handles. They are generally active and command good wages when hired out.

Buildings—Though small, their houses are fairly good and some of them well furnished, such as those of Peter Gray, Mrs. I. Isaac, Thomas Metcalfe, Sr., Frank Metcalfe, Sam Gray, Louis Michel, Polycompe, Martin and James Ritchie, and others. The houses are generally well kept. They have also good barns.

Education—Their school is kept by the Sisters of the Holy Rosary, who take great pains for the advancement of their pupils. Unfortunately the attendance is not as good as it should be, but I am happy to say there is an improvement since last year.

Characteristics and progress—Nearly all these Indians are industrious. A good many are progressing, though very few have laid away anything for a rainy day.

Temperance and Morality—I am sorry to say that a great many of our Indians are still addicted to strong drink, and they can procure the same very easily from the neighboring county in spite of our watching

and prosecution. Their morality is not as good as one would desire; nevertheless, I am pleased to say that there is improvement.

I am, J. FITZGERALD,  
Indian Agent

Province of Quebec,  
Micmacs of Maria,  
Grand Cascapedia, March 31, 1909  
Frank Pedley, Esq.,  
Deputy Supt. General  
of Indian Affairs,  
Ottawa

Sir,—I have the honor to submit my report, with statistical statement for the year ended March 31, 1909.

Reserve—The reserve is situated on the shores of the Grand Cascapedia river and of Chaleur Bay. This reserve has a splendid aspect. It contains 416 acres, 136 of which are cultivated, and has a good fertile soil.

Population—The population this year is 103.

Health and Sanitation—The health of the Indians has been fairly good. Occupations—The Micmacs of Maria have many ways of making money for their living. There is little farming done and some hunting and fishing. In summer sportsmen employ them as guides and canoeists on the Grand Cascapedia river. Some also work in the plantations and at stream-driving in the spring; others are employed by farmers or work at home, making snow-shoes, snow-shovels and baskets. They also tan green skins, with which they make many shoe-packs for winter wear. These articles afford them their chief income.

Buildings—These buildings are small, with the exception of four or five, which are passable.

Education—There is a good school house in the centre of the reserve, where the children can receive a good Christian education. They learn English, French and Micmac.

Characteristics—The Micmacs are generally skillful and industrious, but they are always poor, owing to their lack of economy and their improvidence.

Temperance and Morality—The Indians are generally addicted to the use of intoxicants. Their morality is good and they observe the laws of a Christian morality.

I am, J. D. MORIN,  
Indian Agent

### To Investigate Charges Against The Police.

At the meeting of the town council held Tuesday evening the Police Committee was given authority to hire a stenographer to take the evidence in the investigation of the charges against Chief of Police Crawford. At present there are two charges against the Chief, one from Mr. Blair, and the other from Mr. Storey, and both are for using profane language and for action unbecoming a police officer. Mr. H. M. McLennan, Chairman of the Police Committee stated that the investigation would sift these charges, and any others which were properly laid before the council. He understood from an article appearing in a local paper that there were to be fifteen charges laid, but they have dwindled down to two.

The investigation will be held just as soon as it is possible. This will not be possible next week as the Circuit Court will be in session at Dalhousie and interested parties will be in attendance there, but will likely be held the following week.

So your boy Hiram went up to Chicago to get a job as street-car conductor? Inquired Mrs. Hardapple, as she came over to borrow some eggs. "Yes, indeed," replied Mrs. Crygfoot, from over the ohurn, but he writes that they put him to work in the barn. In the barn? "Gracious, what doing—milking cows?"

It is reported in trade circulars that high price in shoes and rubbers will soon obtain, on account of advance in prices of leather and rubber.

A summer hotel was burned in Ontario and the guests were in swimming the other day at the time and did not have a thing to wear but their bathing suits afterwards.

### Bishop Casey Preaches Before Plenary Council.

In connection with the second solemn session of the plenary council in Quebec, on Sunday, His Lordship Bishop Casey, of St. John, delivered a powerful sermon on the Episcopate. His text was:—"I have chosen you, and have appointed you, that you should go, and should bring forth fruit; and that your fruit should remain."—John XIV, 16.

His Lordship showed the commission to the apostles to be a divine one, and he traced from them the teaching and government of the church to the bishops, sharing it with the Sovereign Pontiff.

His Lordship spoke of the functions of the bishop in relation to those of the priest and in relation to the country, and closed with an eloquent exhortation to the work of salvation of souls in Canadian life.

**DEATH OR LUNACY** seemed the only alternative for a well-known and highly respected lady of Wingham, Ont., who had travelled over two continents in a vain search for a cure for nervous debility and dyspepsia. A friend recommended South American Nerve. One bottle helped, six bottles cured, and her own written testimony closes with these words: "It has saved my life." Sold by A. E. SHAW'S Pharmacy.—20

Rodrick—Man at the seashore discovered diamonds in the surf. Did you ever discover any jewels when you were there?

Van Albert—I thought I discovered a jewel last summer, but after she jilted me I came to the conclusion that she was only an imitation.

"BABY IS EASILY HUSHED  
TO SLEEP IN A  
**GENDRON**  
BABY CARRIAGE"

"When we visit other ladies I always know if they are particular mothers—because particular mothers know all about the soothing swing of a GENDRON."

"The arrows point to the points I want to make here."

"The springs are triple-curved, finely tempered steel, guaranteed to absorb every jar."

"The hubs on GENDRON wheels are covered with rubber caps."

"There's no danger of scratching the furniture when you drive the baby around the house in a GENDRON. It's easy to understand why good mothers insist on a GENDRON carriage for baby."

Sold by all first-class dealers.  
Write to us if your dealer doesn't carry them.

Gendron Manufacturing Co.  
Limited 1759 Toronto

### CONV GTS RECAPTURED.

Larsen and Kennedy Return to  
Dorchester.

Moncton, N. B., Sept. 27.—Larsen and Kennedy, two prisoners who escaped from Dorchester penitentiary on Friday the 17th inst., were recaptured at Woodside, about two miles from Port Elgin, about 3 o'clock this afternoon.

The prisoners were on foot. Their capture was effected by Judson Trenholm.

While at large Larsen and Kennedy had stolen two horses, one at Memramcook, the other one at Dorchester road, but one horse was recovered. The prisoners were almost completely exhausted from exposure and lack of food. They say they had nothing to eat, except a few vegetables taken from the fields, for three days, and when food was given them they ate ravenously. They were lodged in Port Elgin jail, and later were conveyed to prison by two guards.

Kennedy, who was sentenced from Hampton to three years, would have been liberated in three months. Larsen, who was sent from Moncton, was charged with stealing harness, etc., from barns in this vicinity, had only a few months more to serve.

### AFTER SIX YEARS OF INDIGESTION.

Dr. Williams' Pink Pills Made a  
Permanent Cure.

There are many medicines that will relieve indigestion for a time—there are few that will make a permanent cure. But there is one medicine that is a sure cure—that medicine is Dr. Williams' Pink Pills. They have cured thousands of cases—many of them of years standing. Cases like that of Mr. John E. Seale of Montreal, Que., after many other medicines have been tried and found worthless, Mr. Seale says:—"For nearly six years I suffered with indigestion. During all that time I was constantly taking medicine for the trouble, but never got more than temporary relief. Finally I decided to try Dr. Williams' Pink Pills and after using them for some time the trouble disappeared and I am now able to eat heartily without the least trace of the suffering I formerly endured. I can from my own experience, strongly recommend Dr. Williams' Pink Pills as a permanent cure for indigestion."

Dr. Williams' Pink Pills for Pale People are good for every disease that good blood is good for, simply because they make good blood—that is why they cure rheumatism, heart palpitation, indigestion, neuralgia, St. Vitus dance and the ailments of girlhood and womanhood. Dr. Williams' Pink Pills for Pale People are sold by all medicine dealers or direct by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

### WEALTH IN A HOVEL.

Boston, Sept. 27.—If Emilie Williams, sixty-eight years old, who died here yesterday apparently in dire poverty is survived by any relatives in the provinces, where she came from, they have but to come here and prove the relationship to be enriched by a considerable horde of money, diamonds and other valuables discovered hidden away in the supposed poverty stricken woman's lodgings.

The woman was taken ill Saturday night and was without medical attention until early on Sunday morning when neighbors summoned a nearby physician.

He ordered her removal to the city hospital where she died at noon.

It is understood that her birth place was in Prince Edward Island.

**Cured His Rheumatism  
In Three Weeks.**

James LeB. Johnstone, a prominent member of the Citizens' Band, of Chatham, writes:

"I contracted Rheumatism by exposure, five years ago, and was ailing for two months and in great pain all the time. I got Father Morrissey's No. 7 Tablets and took them for about three weeks, when the Rheumatism all left me and I have had no return of the pain since."

**Father Morrissey's  
"No. 7" Tablets**

have cured thousands of this terribly painful disease.

Rheumatism is generally brought on by exposure, but is really caused by Uric Acid in the blood. This Uric Acid is an irritating poison, formed from the waste matter of the body. The kidneys should remove it, but when they fail it poisons the blood, and, settling in the joints, causes Rheumatism.

"No. 7" Tablets clear out the clogged-up Kidneys and stimulate them to perform their task of filtering the Uric Acid out of the blood. When this is done the Rheumatism simply and naturally vanishes.

"No. 7" Tablets cost 50c. At your dealer's. 28

Father Morrissey Medicine Co. Ltd. - Chatham, N.B.

## Ladies' Cash Store.

Mrs. S. McLEOD.

### ELSIE SIGEL CASE AGAIN, THE INQUEST.

New York, Sept. 27.—Leon Ling was formally charged with the murder of Elsie Sigel on Friday by a jury before Coroner Harburger at the long delayed inquest to determine the cause of the girl's death.

The jury, after the examination of several witnesses, rendered a verdict that she died from asphyxia, due to strangulation.

Professor Ferguson, of the College of Physicians and Surgeons, testified that he had found a considerable quantity of ergot in the stomach, but this did not effect his opinion as to the cause of death.

One of the jury wanted to hold Chang Sing as an accomplice, but was outvoted.

Captain Carey has not abandoned the hunt for Leon Ling.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.  
Take Hall's Family Pills for constipation

## Kidney Disease For Years

This Well Known Gentleman Strongly Recommends "Fruit-a-tives" to all Sufferers.

JAMES DINGWALL, Esq.

"I have much pleasure in testifying to the almost marvellous benefit I have derived from taking 'Fruit-a-tives.' I was a lifelong sufferer from Chronic Constipation, and the only medicine I ever secured to do me any real good was 'Fruit-a-tives.' This medicine cured me when everything else failed. Also, last spring I had a severe ATTACK OF BLADDER TROUBLE, and 'Fruit-a-tives' cured these complaints for me, when the physician attending me had practically given me up.

I am now over eighty years of age and I can strongly recommend 'Fruit-a-tives' for chronic constipation and bladder and kidney trouble. This medicine is very mild like fruit, is easy to take, but most effective in action."

(Signed) JAMES DINGWALL, Williamstown, Ont., July 27th, 1908. 50c a box, 6 for \$2.50—or trial box, 25c at dealers or from Fruit-a-tives Limited, Ottawa.

## BATHURST

BATHURST, Sept. 23.—Mr. Walter Veniot and bride arrived on the Ocean Limited from Edmundston on Tuesday morning and are making a visit to Mr. and Mrs. P. J. Veniot.

Mrs. Malcolm and Miss Malcolm of Campbellton, have been guests this week of Mrs. E. P. McKay.

The marriage of Mr. F. H. Eaton, manager of the Royal Bank of Canada here, to Miss McKinnon of Amherst, is announced to take place on the 28th inst. at Amherst.

The ladies of the R. C. congregation have resumed the sewing circles on Wednesday evenings, which were discontinued during the warm weather. The circles meet at the convent.

Mr. and Mrs. H. White have returned from a visit to Montreal.

A very good audience greeted 'The Volunteer Organist' in the Opera House on Wednesday evening.

Miss Harrington entertained a number of young friends at a dancing party for her guest, Miss Troy of Dalhousie.

Mrs. S. Melanson has returned from a visit to Fredericton.

Miss Clark who has been visiting friends here, has returned to Halifax.

**THOSE WORRYING PILES!**—One application of Dr. Agnew's Ointment will give you comfort. Applied every night for three to six nights and a cure is effected in the most stubborn cases of Blind, Bleeding, or Itching Piles. Dr. Agnew's Ointment cures Eczema and all itching and burning skin diseases. It acts like magic. 35 cents. Sold by A. E. SHAW'S Pharmacy.—16

Could I paint your old cow, ventured the city artist.

Sartini, stranger, laughed the old farmer, as he mopped his brow with a handkerchief. Paint her green and she will look so much like the grass that the tramps can't see her and milk her on the sly.

According to the report of Kent, Eng. education committee, 140 schools in the county have taken up the scheme of savings banks, and in all now there are 7,500 scholars who are members with savings totalling \$3,700.

Invest 25 cents in a box of Davis' Menthol Salve ("The D. & L.") and be prepared for a hundred ailments, which may not be dangerous but are very annoying and painful, like neuralgia, earache, sprains, burns, bruises, insect stings, cuts, piles, etc. It is a household remedy always useful for some trouble, and should be kept in the family medicine closet.

WILL MAKE HAIR GROW

## BEARINE

Prepared from the grease of the Canadian Bear. Delicately perfumed.

The Standard Pomade for 40 Years. All Dealers 50c. per Jar. Davis & Lawrence Co., Montreal.

## DORCHESTER MINE SOLD.

Great Development Promised. Will Employ 500 Men.

NEW YORK CO., BUYS.

Expect to Handle 1,000 Tons a Day in Near Future.

St. John, Sept. 25.—The Westmorland mine, at Dorchester, N. B., one of the richest copper mines in the province was sold this week by the present owners, the Maritime Exploration Co., Ltd., to the firm of L. Vagelstein & Company of New York, one of the largest copper dealers in the world. The new owners announce their intention of beginning work at once on a large scale for the development of the mine and expect in the near future should results prove satisfactory to erect a concentration mill with a capacity of 1,000 tons of ore daily. This industry will afford work for in the vicinity of 500 men says The Sun today.

The mine has been in prospect of development for over 20 years past, and though considerable test work has been done, has never been operated commercially. It was first taken up by a provincial syndicate in 1886 who did little with it and finally transferred their property in 1903 to the Westmorland Mining Company, composed of several prominent Americans, including H. M. Whitney, of Boston, Darius L. Goff of Pawtucket and several others. Under their ownership considerable development work was done and some ore shipped, but not as a commercial proposition. Last year the Maritime Exploration Company of New Glasgow, N. S., took hold of the mine and have now succeeded in interesting the Vogelstein people, whose purchase means certain and great development if the property is of value.

The proposition under consideration is to erect a plant to concentrate the ore to a refined product, about 85 per cent, pure copper, which will probably be manufactured in the Vogelstein works at Newark, New Jersey. This plant will cost about \$175,000. On the property there are at present 27 inclines opened and about the same number of trial pits which will now be operated. The mine is about a mile from the town of Dorchester.

## HARCOURT.

Dr. and Mrs. R. G. Girvan gave a most enjoyable bridge party to a number of friends on Monday evening last, for the entertainment of their guest Dr. Loggie, who on Tuesday returned to his home in Chatham.

Miss Augusta Campbell left this week for Oldtown, Me., to spend the winter with her brother.

Miss Margaret Curran of Grangeville was a guest for the week end of Miss Ruth Thurber.

Mr. James Wathen left on Monday for Montreal to enter McGill College for the dental course.

Mr. Robert Brown, accompanied by Mrs. Hutchinson rode through from Buctouche by automobile on Saturday and are guests of Mr. Brown's sister, Mrs. E. B. Buckner field.

Miss Helen Bucknerfield and Mr. Ernest Bucknerfield came from Moncton on Saturday to spend the week end at home.

Mr. James McCleave spent Saturday in Moncton.

Mr. Robert Smallwood spent part of the week at his home here, returning to Moncton on Saturday.

Mrs. A. H. Ingram and children of Campbellton are guests this week of Mr. and Mrs. Thomas Ingram.

Mr. Harry Manaton of Wymouth is spending his vacation with home friends.

Mrs. Joseph Reid left on Tuesday for Boston where she will spend the winter with her daughter Mrs. Horne.

The largest moose captured this season and probably the largest ever shot in Kent Co., was brought into the village on Saturday. It had an antler spread of sixty-four inches.

## BEAVER FLOUR

is a blend of Ontario Fall

Wheat and Manitoba Spring Wheat.

It is thus a

"Bread" Flour and a "Pastry" Flour.

Best for either.

Best for both.

## AT YOUR GROCER'S

DEALERS—write us for prices on Feed, Coarse Grains and Cereals. The T. H. Taylor Co. Limited, Chatham, Ont.

## WIT AND HUMOR.

Bess—She never said one sweet thing in her life.  
Belle—No, she says so many sour things, she must have a pickled tongue.

At School—Now, my little dear, who can tell me the plural of child? Youngster (frantically raising his arm)—Yes, sir, I can. Twins.

What if I were one of those husbands, my dear, who get up cross in the morning and bang things about and scold like anything just because the coffee is cold? John, replied his wife. I would make it hot for you. John is still engaged in wondering whether she meant him or the coffee.

Teacher—Will some member of the class explain how we hear things? Bright Boy—Somebody tells us something down town, then he tells it to us as a profound secret, then he tells it at the sewing society meeting, and then we all hear it.

A man went home the other night and found his house locked up. After infinite trouble he managed to gain an entrance through a back window, and then discovered on the parlor table a note from his wife reading, I have gone out, you will find the key on the side of the step. What a thoughtful woman.

Strength and Vitality are combined in the invigorating tonic Ferrovim, which consists of fresh lean beef, Citrate of Iron and pure old Spanish Sherry Wine. Nothing could be more beneficial for anemic women and children, elderly people whose strength is failing and all persons run-down and debilitated. \$1.00 bottles.

Miss Kathleen Gillen, teacher of West street school, Moncton, and a former teacher in St. Mary's Academy here, was pleasantly surprised Monday afternoon when a number of her little pupils assembled at her residence on Wesley street on the eve of her departure for Montreal, and presented her with an address accompanied with a dressing case. Miss Gillen thanked the children and in reply gave them a few encouraging words and said during her absence she hoped her little pupils would study hard as in the past and be obedient to her successor, Miss Flanagan. After the presentation, the children sat down to five o'clock tea and during the remainder of the evening played games on the lawn.

The scrappy little Jappy is said to be building a battleship as big as two Dreadnoughts. Of course the Pacific is a large ocean.

## Why We Are Stronger.

The old Greeks and Romans were great admirers of health and strength; their pictures and statuary made the muscles of the men stand out like cords.

As a matter of fact we have athletes and strong men—men fed on fine strength making foods such as Quaker Oats—that would win in any contest with the old Roman or Greek champions.

It's a matter of food. The finest food for making strength of bone, muscle and nerve is fine oatmeal. Quaker Oats is the best because it is pure, no husks or stems or black specks. Farmers' wives are finding that by feeding the farm hands plentifully on Quaker Oats they accomplish a double result; the men go to their work with greater vigor and the expense of such feeding is less than with other foods.

Mrs. Stubb—John, how about the new shades?  
Mr. Stubb (pettishly)—Oh, hang the shades.

Mrs. Stubb (sweetly)—Why, John, that is just what I have been trying to get you to do for a week.

Young Wife (at the theatre)—Now, John, what did you go out for? Husband—To get a breath of air, dear, Young Wife (after considering the matter awhile)—Well, John, there wasn't any air on my father's farm that smells like that.

A good old man went to prayer meeting the other night, and unwittingly fell asleep. He was called upon to offer up prayer, and, being dutifully punched by his better half, belittled out: Goldarn it, kindle it yourself.

Consolation—I wouldn't cry, little boy said a kind old gentleman consolingly, you may be unhappy for the moment, but it will soon pass away. You wouldn't expect me to cry, would you, every time I'm a little unhappy? No, sir, responded the tearful lad, you'd go an' get a drink.

## HUNTING FOR BIG GAME.

The Highlands of Ontario is an ideal spot for the sportsman during the open hunting season for big game. In the Temagami region moose are plentiful and may be killed during the period from October 15th to November 15th. This territory is a forest preserve of vast expanse, and in addition to being the hunter's paradise, its waters abound with game fish of many species. The home of the red deer is located somewhat to the south of Temagami, particularly in the districts known as "Muskoka Lakes," "Lake of Bays," "Maganetawan River," "Lake Nepissing," and "Kawartha Lakes" territories.

Write to J. Quinlan D. P. A. Montreal for a copy of "Haunts of Fish and Game" issued by the Grand Trunk Railway System which fully describes the hunting territories reached by this line, giving game laws, maps and all information.

Everybody interested in football are cordially invited to attend the meeting to be held in Messereau's Studio at 7.30 this evening.

Messrs. Hickson's and Ritchie's mills were down Monday and Tuesday on account of the heavy rains.

Poor Spain feels like the fellow who helped himself to a wasps' nest under the impression that he was picking a new kind of fruit.

The woman who wants to be beautiful shouldn't talk too much, said the beauty specialist. Too much use of the facial muscles produces untimely wrinkles.

Hill and Morgan, it is said, have made arrangements to humble Harri-man. The great railroad man is in the clutches of a foe that will in due time humble all three.

According to a certain Dr. Wiley, the human race ought to have become extinct at about the second generation. It is the miracle of miracles that we are on earth at all.

## FARMER'S COLUMN. OWES HER LIFE TO

The term "Scientific Farming" is in pretty general use, but the meaning of the term is not always clear. However, if we study the matter closely it seems that a man is farming scientifically when he does four things, viz measures, records, studies and experiments. As for measurement, it is the basis of all the sciences, and seems to be also the basis of scientific farming. Consider the case of two dairy farmers for example: the first keeps a number of cows cares for them to the best of his ability, and sells his milk to the creamery, cheese factory, or to the city; the second keeps the same number of cows cares for them equally well and sells his milk in the same way but in addition he measures the milk given by each cow, by weighing it at every milking. He measures the food given and the labor used, so that at the end of the season he knows exactly the profit from each cow, or whether some of them have been a loss to him. He knows which cows are yielding a profit, and to what extent also which cows, if any, are living at his expense. We will all agree that the second farmer is the more scientific of the two. Again in growing field crops, the scientific farmer will measure the size of each field, the amount of grain planted, the amount of labor expended on each crop, the amount of harvest in grain and straw, thus is in position to know exactly the profit obtained from each crop. Measurement then is the first step in scientific farming.

The second is to keep an orderly record in which the measurements for each cow and each field are entered when made. These records give the scientific farmer an exact knowledge of the results he is obtaining from his farm, and his exact knowledge is the starting point in the search for improvement.

In looking for improved methods the scientific farmer compares his own methods and results with those of successful farmers in his locality, and in all parts of the country. He studies the methods used and the results obtained along its lines, by the scientific experts of the government, and of the Agricultural Colleges. He tries to learn why these methods give the results they do, so that he may be in a position to judge of their applicability to his own case.

If, as a result of this study, he decides to try certain new methods to see if they will produce improved results, he does not apply them to his whole farm, or whole herd, but to one field or one or two cows; that is, he makes an experiment that has a bearing on the result. If the experiment shows that the new method gives increased results, he applies it to his whole farm or herd, keeping up his measuring and recording of measurements, to see what the results are on a large scale. These new measurements are then studied for further improvement. The scientific farmer then, is one who measures, records, studies to throw out the bad and keep the good and to bring in more good, and experiments.—C. J. Lynde.

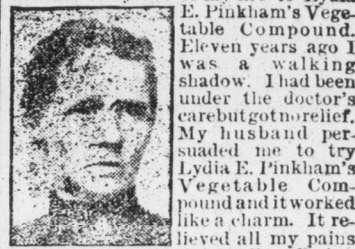

It is said that more than five million women are earning their living as well as that of others dependent upon them, in the United States today.

## CHILDHOOD AILMENTS.

Most of the troubles that afflict little ones may be traced to the stomach and bowels, and if these are put right the child will get well and thrive well. Baby's Own Tablets cure all stomach and bowel troubles and all the other minor ailments of babyhood and childhood. The Tablets are easy to take and are guaranteed free from opiates. Mrs. H. Matthews, Canfield, Ont., says: "I have used Baby's Own Tablets for my little girl who had a weak stomach and was badly constipated. The Tablets cured her of both troubles, and I really feel as if they had saved her life." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Lydia E. Pinkham's Vegetable Compound

Vienna, W. Va.—"I feel that I owe the last ten years of my life to Lydia E. Pinkham's Vegetable Compound."

Eleven years ago I was a walking shadow. I had been under the doctor's care but got no relief. My husband persuaded me to try Lydia E. Pinkham's Vegetable Compound and it worked like a charm. It relieved all my pains and misery. I advise all suffering women to take Lydia E. Pinkham's Vegetable Compound."—Mrs. EMMA WHITEATON, Vienna, W. Va.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and today holds the record for the largest number of actual cures of female diseases of any similar medicine in the country, and thousands of voluntary testimonials are on file in the Pinkham laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaints, inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. Every such suffering woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

QUEBEC, Sept. 21.—The following messages were exchanged between the Plenary Congress in session here and King Edward VII. today:—  
His Majesty King Edward VII, London.

"The apostolic delegate and the Catholic archbishops and bishops of Canada in plenary council assembled in the city of Quebec, desire to convey to your majesty the expression of their loyalty and that of all your other Catholic subjects in this dominion, as well as their grateful appreciation of the religious and civil liberty which they enjoy under your gracious rule. All pray that your reign may be long and peaceful."

(Sgd) MONSIGNOR SBARETTI, Apostolic Delegate.

The reply from His Majesty was as follows:—  
Monsignor Sbaretti, Apostolic Delegate, Quebec.

"I thank your excellency and the archbishops and bishops associated with you for your telegram of loyalty, which is in all the best traditions of the church of which you are the hierarchy and of the dominion where you are assembled. It is my constant desire that religious and civil liberty should always be enjoyed by my subjects in all parts of the empire."

(Sgd) EDWARD R. AND I.

The fathers of the plenary council met in secret conclave this morning and this afternoon were the guests of Lieut. Governor Pelletier at luncheon at Spencerwood. Only one toast was proposed and that was a joint one. The King and Pope. The lieutenant governor and Mgr. Sbaretti spoke in the name of the church and state and the harmony and peace to be desired therefrom. While the toast was drunk the R. C. E. A. band played the national anthem and the papal air.

Catherhall, Nfld.

MINARD'S LINIMENT CO., LIMITED.  
Dear Sirs,—While in the country last summer I was badly bitten by mosquitoes, so badly that I thought I would be disfigured for a couple of weeks. I was advised to try your Liniment to allay the irritation, and did so. The effect was more than I expected, a few applications completely curing the irritation, and preventing the bites from becoming sore. MINARD'S LINIMENT is also a good article to keep off the mosquitoes.

Yours truly,  
W. A. V. R.

The Misses Davidson gave a most enjoyable little drawing room tea last Friday. Mrs. J. W. Davidson presided at the tea table, assisted by Miss Florence and Miss Hazel Hickson. Those present included Mrs. Watt, Mrs. Harley, Mrs. Sinclair, Mrs. Hubert Sinclair, Mrs. Miller, Mrs. Fleming, Mrs. Hickson, Mrs. Nicholson, Mrs. Nichols, Miss Ritchie, Miss Parker, and Miss Fleming. During the afternoon Mrs. Miller sang and Miss Hickson gave a short reading.

Does your back ache?—Don't experiment with liniments but get the genuine, "The D. & L." Menthol Plaster. It cures. Davis & Lawrence Co., makers.

On Wednesday evening next, Sept. 29th, the Rev. C. T. Phillips, D. D., Special Missioner of the Baptist Board of N. B., will preach in the United Baptist Church Newcastle. Service will commence at 7.30. All are cordially invited.

## LOCAL NEWS.

The schooner Rolf, on the rocks at Tracadie is reported a total wreck and is beating to pieces.

Those who wish to spend a pleasant evening should visit the Dime. Latest moving pictures and songs.

Everybody interested in football are cordially invited to attend the meeting to be held in Mercereau's Studio at 7.30 this evening.

When you go to the country take a tin of Davis' Menthol Salve along. It is unequalled to relieve earache, sprains, burns, cuts and bruises. 25c.

Mr. William Smallwood has returned from a successful hunting trip in the Bartibogue woods, bringing with him a fine specimen of the antlered monarch. He was accompanied by Mr. H. J. Leaman, who also got a moose.—Transcript.

On Wednesday evening next, Sept. 29th, the Rev. C. T. Phillips, D. D., Special Missioner of the Baptist Board of N. B., will preach in the United Baptist Church Newcastle. Service will commence at 7.30. All are cordially invited.

The management of the moving picture house have procured Jack Taylor the well-known bag puncher, to play in the Opera House next week commencing Monday, Oct. 4th. All lovers of sport should see Mr. Taylor. Same price as usual.

Miss Kathleen Gillen, teacher of Westly street school, Moncton, and a former teacher in St. Mary's Academy here, was pleasantly surprised Monday afternoon when a number of her little pupils assembled at her residence on Wesley street on the eve of her departure for Montreal, and presented her with an address accompanied with a dressing case. Miss Gillen thanked the children and in reply gave them a few encouraging words and said during her absence she hoped her little pupils would study hard as in the past and be obedient to her successor, Miss Flanagan. After the presentation, the children sat down to five o'clock tea and during the remainder of the evening played games on the lawn.

Messrs. Hic. and Kitchie's mills were down Monday and Tuesday on account of the heavy rains.

Canadian Bear grease is in Bearine, with other valuable agents, making it the best pomade. 50c. a jar.

Our enterprising Merchant L. B. McMurdo has received a large consignment of fall and winter goods, some of which are displayed in his store windows. It costs nothing to go inside and examine them.

The engagement is announced of J. Ad. Morrison, I. C. R., operator at Bathurst to Miss Evangeline A. Losier, daughter of Mr. and Mrs. Edward Losier of Tracadie, N. B. The marriage will take place October 18th.

Mr. Fleigher wishes us to correct an article which appeared in The Leader stating that he had Typhoid Fever. Mr. Fleigher has been considerably annoyed by the article as many of his friends were afraid to come to his house. Mr. Fleigher never had the fever and hopes he never will.

## COUNCIL ELECTION.

The returns for the Councilors election for the Parish of North Esk, which appeared in the Advocate last week, gave only the result of two polls. The total figures are:

P. A. Forsythe	135
J. S. Mullins	127
Paul Kingston	117
Ed. Menzies	92

A party of Pittsburg, Pa., sportsmen who were mixed up with the famous investigation held last winter by the Crown Land Department, are again in the province and found their visit a pretty expensive one. They went from Fredericton to Boiestown, in company with a well-known guide and then sought a hunting license from the local vender at Boiestown, who refused to sell to them, and they then started into the woods without a license, thinking better of this, however, they returned to Boiestown and sought to arrange for a special train to take them back to Fredericton, but this could not be secured. A telephone message to Fredericton secured an auto and in this they journeyed back to the capital, and there learned that no license would be issued until the end of season, which was proved against them in the Braithwaite-Robinson inquiry. This additional expense to the trip was not relished, but as the party realized it was pay up on-stay away from the woods they paid and so secured their licenses.

The annual treat to the pupils of Douglastown school from Samuel Adams of New York was received on Saturday. Sixty-four dollars worth of nuts and fruit arrived and was distributed amongst the children. It was general feast day.

Dr. Sproul has in the course of construction a house which is being built of concrete blocks. The builder claims that concrete blocks can be manufactured as cheaply as brick and that they are far more durable. The construction of Dr. Sproul's house will be followed with interest. James T. Forest is in charge of the work. Should his efforts in this construction prove successful, and we trust it may, a concrete brick and block industry on a large scale in the upper end of town may be the result.

## QUICK RETURNS FOR LOCAL SPORT.

Mr. George Whalen of Sussex left Newcastle on Wednesday last for Portage River in quest of big game, accompanied by guide Samuel Kingston of Chaplin Island Road. On the way up they met two sports with their guides, returning from that place after a ten days unsuccessful hunt. Nothing daunted, Mr. Kingston drove to his old hunting ground, reaching there about dark. Next morning they went out to where the tracks of the former sportsmen were still fresh in the mud, and before six o'clock a.m. had called up an antlered monarch to within fifty yards of their position when Mr. Whalen shot it. The antlers had a spread of 57 inches. The most peculiar thing was that one ear of the moose had, on some former occasion, been pierced with a bullet and the guide was of the opinion that it had been done by a bullet from the rifle of one of the sportsmen whom he had accompanied last year and who shot at a moose from this same spot.

The head is being mounted by Enack Bros. of Fredericton.

**N. A. RHODE**  
**SERIOUSLY ILL.**  
President of Rhodes Curry Co., Operated on for Appendicitis.

Amherst, Sept. 27.—N. A. Rhodes, vice-president of the Rhodes, Curry Co., was taken seriously ill on last Wednesday when returning from Sydney. He was operated on Saturday for appendicitis. He is doing as well as can be expected. His son, E. N. Rhodes, M. P., is at present in the West.

KINGS CO. HUNTERS  
KILLED CATTLE.

Heifers at Plumwaseep Were Mistaken for Deer and Shot Down by Amateurs

Sussex, Sept. 25.—John O'Leary, Plumwaseep, has good cause to fight shy of amateur woodsmen. On Sunday last some parties who managed to secure a hunting license butchered two valuable heifers belonging to Mr. O'Leary. The animals have been companions all summer and excited the curiosity of unknown nimrods who made short work of both animals. One of the animals was shot dead, and the other brought home two bullets in its body, dying shortly after reaching the barn. The heifers had evidently been mistaken for deer and got the full benefit of the doubt. An effort is being made to locate the perpetrators of the outrage, who made no attempt to recompense the owner for his loss. In addition to destroying private property, the hunters were guilty of a violation of the game law, in shooting on Sunday.

## When the Harvest Days Are Over.

The Coming Attraction.

And Manager E. A. Jenkin must be congratulated for securing such a good production. The Company is an excellent one, and includes many well-known performers. A complete equipment of special scenery serves to frame a series of stage pictures of great beauty and naturalness. When the Harvest Days are Over keeps the audience convulsed with laughter, and as sweetly natural as the breath of the fields. All who have been farmer boys and girls should see this beautiful Down East play, for it will revive pleasant recollections. The City bred should see it to realize what they have missed. The Company carries an excellent Band and Orchestra, which strengthens the musical portion of the play. Mr. Perry, the Manager, is very well known, and guarantees this attraction to be first class.

According to a certain Dr. Wilely, the human race ought to have become extinct at about the second generation. It is the miracle of miracles that we are on earth at all.

THE STANDARD'S  
SOUVENIR

The Montreal Standard's Special Number has come to hand, and is a most creditable production. It has a magnificent cover in colors, painted by one of America's best known artists. The Number contains nearly 150 half-tone plates devoted to subjects of general interest, and has two superb panoramic views of Montreal suitable for framing. The printing is first class, and we understand that many thousands of the issue have been sent to friends abroad.
