LAW RESPECTING NEWS.

Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscriptions. If subscribers order the discontinuance of their papers, the publisher may continue to send them till all arrears are paid. If subscribers neglect or refuse to take their papers from the office to which they are directed, they are held responsible till they have settled their bill, and ordered their papers to be discontinued. If subscribers remove to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible.

The County of Charlotte to D. W. Jack, Treasurer.

D. W. JACK,
COUNTY TREASURER.

St. Andrews, 9th April, 1855.

The Belfontaine Republican says the Hoosiers on the Wabash turn "ague shakes" to some account. They climb into the top of a "shell bark" just as the chill comes on, and by the time the "personal earthquake" leaves them, there is not a hickory nut left on the tree.

SAN ACCIDENTS.—At Shippegon on the 25th ult., a woman named Lahan Duguire was killed by the accidental discharge of a gun. She leaves a husband and five small children to mourn her untimely fate.

On the 20th ult., at Sabies Mills, a boy named William Porter met with his death by being run over with a loaded sled, which crushed him in the snow and smothered him to death before assistance could be rendered.

Agricultural Missionary in the Holy Land.

In another part of this sheet will be found a very interesting letter from one of the most active and intelligent band of Americans who have founded in Palestine a mission, the ultimate object of which is the spread of Christianity, but one of the principal means of which is the introduction of the system of agriculture and husbandry practiced in our own country. If any practical demonstration were wanted of the wisdom of this method of converting the minds of men to the Christian religion, it is to be found in the success of the mission thus far. Every day seems to add to the regard in which these missionaries are held by the Mohammedan natives of the country. The old prejudices against foreigners and Christians are so far relaxed in their favour, that their enterprise is regarded as a benefaction to the country, and for the first time a foreigner and a Christian has received a conveyance in fee of land on the plains of Sharon.

This plain is one of the finest parts of Palestine. The old Hebrew poets refer to its rich fields and flowery pastures nor is its fertility at all diminished by the lapse of time. At present it gives the Arabs plentiful crops of barley where it is cultivated, and its old olive groves, planted centuries ago, yield a abundance of fruit. Its chief town, near to which the mission is situated, is Jaffa, the ancient Joppa, one of the finest cities in all Syria; and anciently, until Herod formed the harbor of Cesarea; the only port possessed by the Israelites. This place has an increasing trade, is the residence of the American and European consuls, and its site, on a bold promontory crowned by a castle and surrounded by gardens and groves of fruit trees, is thought the most beautiful of all the cities of the Syrian coast. The plain of Sharon yields three harvests a year, the first without irrigation, the two others by aid of water conducted to the roots of the growing plants.

On a former occasion we explained that the object of the missionaries was to furnish the Jews of Palestine, now supported by the alms of their brethren in various parts of the world, with the means of acquiring their own livelihood, and to induce them to embrace Christianity. Their method of making proselytes is the most direct and insinuating possible. They stand between the Jews and Arabs, by whom the Jews are despised, ill treated, excluded from the pursuit of agriculture, and obliged to live in towns where they can have no occupation; they protect this unfortunate class, giving them work and wages, and set them an example of unwearied beneficence. If after this they are not won over to the Christian faith, their benefactors are not in fault.

So successful, however, have been their efforts in softening the prejudices of the Arab inhabitants against the Jewish race, that the mission has already attracted the notice of the benevolent in England and in Germany. In England two societies have been formed on a similar basis one among the Jews and the other among the Christians. The Christian society has already selected the site of its mission in the neighborhood of Cesarea, which lies about thirty five miles to the north of Jaffa.

The Germans, before forming their society, sent out one of their countrymen to Palestine, who remained a considerable time in Jaffa and at the mission, making minute inquiries, observing carefully the proceedings of the missionaries, and watching their success. On his return he made a report which led to the formation of an association with the like objects.

The very slow progress of missions, conducted in the usual manner, has discouraged many benevolent persons who would otherwise be disposed to contribute liberally towards them. It seems to us that in assisting the Agricultural Mission at Jaffa they could not possibly commit a mistake.—N. Y. Erg Post.

Another Planet.
An astronomer named M. Chacornae discovered it the night of the 6th instant, at 55 minutes after 10, a new planet, 12 deg. 30 min. right ascension, and 7 deg. 20 min. southern declination.

Sir John Burgoyne on the Seige.
At a dinner at the Mansion house, London, on Saturday evening, this distinguished engineer officer, in acknowledging the toast of the "French and English Army," said, "Sebastopol, no doubt, presents to our arms an enterprise of great difficulty, but I take it all the better for that, (laughter,) and I only regret that I could not stay in the country to see the end of the seige, which I am sure will be favourable to the allies."

Michael L. Sullivan, an Illinois farmer, it is said, is about to plant ten thousand acres of corn. He was formerly one of the largest farmers of the State of Ohio for many years, and according to a contemporary, he could ride in a direct course fifteen miles through his own corn fields.

The Country and the Crops.

We do not recollect a season for many years, when on the first day of May the country has looked so beautiful, or the growing crops of wheat, oats and grass so thrifty, as they do now. Notwithstanding severe cold weather continued until the first week in April, and farmers were fearful of being unable to get half the grain planted that they had been calculating upon, the plowing and planting season is greatly advanced. The three or four weeks of delightful weather ending in April, were improved greatly, and probably one third more land was plowed than ever before in Northern Illinois during the same corresponding period of time. Spring wheat is all in and up so as to cover the ground with its beautiful green verdure. The amount sown is fully one fourth larger than ever before, and the prospect could not look more favourable. Oats are also generally harrowed down, and in some cases above ground. The amount put in is not probably more than was put in last year. Corn has not been planted, but farmers are rapidly plowing for it, and if the weather continues favorable, they will probably close their planting by the 15th instant. The high price of the article gives the producer a confidence in its future, as a profitable crop, and no exertions will be wanting to increase the number of acres to be cultivated.

The grass crops promise well. We have never seen clover, Timothy and the wild grasses more advanced thus early in the season. During the last few days grass has grown as if by the power of magic, and if the weather prove as favorable during the next as it has during the past four weeks, the crop will be one-half heavier than that of last year.

It is scarcely necessary to say that with such flattering prospects before them, the farmers are in the best of spirits.

REUSSIA.
The deputation of officers lately sent by the King of Hanover to express his condolence with the present Emperor of Russia, has among other things, brought the King back a sample of the granite of which the Cronstadt fortifications are built. These gentlemen, while staying in St. Peterburg, took a drive all round and about the harbour of Cronstadt in sledges, their road taking them from Jinn to time, between ships of the line and frigates, with the guns of the fortress covering them at every fresh step. Of course, the said gentlemen are perfectly convinced of the impregnability of the place. St. Petersburg is represented as having been converted into one great manufactory of arms and warlike instruments. In the place of the Guards, that were formerly always stationed in the capital, there are now thirty six battalions of the reserve of the Guard.

A pamphlet professing to contain the Russian official account of the battle of Inkermann has appeared at Berlin. One very interesting fact is contained in the introduction, but unfortunately comes to us too late to profit by. After the battle of the Alma and the march of Prince Menschikoff to Bakhchisarai, the whole garrison of Sebastopol consisted of just four battalions and the body of seamen; at that time, also, none of the present outworks existed, with the exception of the wall of the town.

A Hungry Carpet Bag.

The Buffalo Express relates an amusing incident which occurred at Erie a few days since. A gentleman left Cleveland for New York on an early hour in the morning, without his breakfast, and being very hungry, upon the arrival of the train at Erie, entered the dining room, and placing his carpet bag upon a chair, sat down beside it and commenced a valorous attack upon the viands placed before him. By and by the proprietor of the establishment came around to collect fares, and upon reaching our friend, ejaculated, "Dollar, sir!"

"A dollar!" responded the eating man, "a dollar—thought you only charged fifty cents a meal for one—eh?"

"That's true," said meanness, "but I count your carpet bag one, since it occupies a seat." (The table was far from being crowded.) Our friend expostulated, but the landlord insisted, and the dollar was reluctantly brought forth. The landlord passed on. Our friend deliberately arose, and opening his carpet bag full in its wide mouth, discoursed unto it saying "Carpet bag, it seems you're an individual—a human individual, since you eat—at least I've paid for you, and now you must eat." Upon which, he seized everything eatable within his reach, nuts, raisins, apples, cakes, pies, and amid the roars of the bystanders, the delight of his brother passengers and discomfiture of the landlord, phlegmatically went and took his seat in the cars. He said he had provisions enough to last him to New York, after a bountiful supply had been served out in the cars. There was at least

\$8 worth in the bag—upon which the landlord realised nothing in the way of profit.—So much for meanness.

The Growing Wheat Crop.

As far as can be judged from the statements of our exchanges, the growing crop of wheat in the West promises more than average yield. The snows of the winter, and weather generally, were favorable, and the young blades now look vigorous under the fostering influence of spring rains and sunshine.—St. Louis Rep.

The best accounts of the wheat crops are continually arriving. Though last winter was a pretty severe one, yet the enormous quantities of snow which have fallen have kept the ground warm, and thus preserve the wheat.—Alb. Argus.

The Legislature of Massachusetts have passed a law that no innholder, or tavern keeper, confectioner, or keeper of any shop or house, for the sale of drink or food, or any livery stable keeper for horse or carriage hire, shall give credit to any student in any incorporated academy, or other educational institution within the State. If any person shall give credit contrary to the provisions of the act, he shall forfeit a sum equal to twice the amount so unlawfully trusted or credited, whether the same shall have been paid or not.

Matrimony is a circus. Many noble creatures enter it, run round and round, and kick up a fine dust, but how few get properly trained and broken into it!

MASONIC.

The Grand Master of the Grand Lodge of the District of Columbia, has received a letter from the Grand Master of the Grand Lodge of Paris, asking that a delegate be appointed on the part of the District Grand Lodge to attend a Congress of the Masons of the World to assemble in Paris on the 1st June, to take into consideration the condition of Masonry over the globe, and to adopt for the Order, whatever might be appropriate and lawful.—Washington Star.

The £900,000 Aid to the Grand Trunk Railway Voted.—We learn by special telegraph from Quebec, that Mr. Coyle's proposition for adding £900,000 to the amount of the original guarantee to the Grand Trunk Railway, was carried this morning at two o'clock. The vote stood sixty-six against twenty-seven, making a majority of thirty-nine in favor of the proposition.—Toronto Leader, 4th.

Herrypoth's Railway Journal says that Sir Caspar Roney returns to Canada immediately after the meeting in London of the Grand Trunk shareholders.

Pea Nuts.—The Norfolk Herald states that during the last twelve months, \$20,000 worth of pea-nuts have been shipped from that city to the North.

The old Seneca Presbytery of New York has adopted the following resolution:

Resolved.—That this Presbytery express its disapprobation of the barbarous exclusion of respectable and well-behaved colored persons, and even Christian ministers, members of our own Presbytery, from our public conveniences, such as railway cars and omnibuses, especially while there is no very extraordinary care to protect the quiet passengers from the intrusion and annoyance of ill-behaved white persons.

LATER FROM CALIFORNIA.

New Orleans, May 11.
The steamship Empire City has arrived at this port from Havana with California mails of the 17th April.

The news from California is of no great importance.

The rains continued, and the mines were producing well.

In commercial circles confidence is gradually returning.

The Golden Age which left San Francisco on the 17th April, with 750 passengers and \$1,300,000 in treasure on board, struck a rock on the night of the 28th ult. off the Island of Quilo, about five miles from Panama. The passengers were safely landed at Panama, by steamship J. L. Stephens.

Travel to Europe.

The New York Herald of yesterday says: The steamships for Europe are now crowded with passengers; some to visit the Palais de l'Industrie, which is to open next month at Paris; some to make the tour of Europe, and some to visit the Crimea, to witness the grand tragico-melo-dramatic spectacle at Sevastopol. Steamers take spectators to the Mar-tilles in Balaclava for two hundred and fifty francs each. Three hundred leave today in the Baltic—the largest number ever carried across the Atlantic by one steamer.

Arrival of the "Baltic."

SEVEN DAYS LATER FROM EUROPE.

NEW YORK, May 18.

The Baltic from Liverpool, arrived to-day, dates from the Crimea are to May the 4th.

The bombardment of Sebastopol had slackened—the Allies getting short of ammunition. Some Russian outworks had been taken, but the main defences remained impregnable.

Lord Raglan admits that the bombardment is not so effective as was anticipated.

The impression in England is, that active siege operations will be abandoned for the present.

One Hundred Thousand Russians are reported to be concentrating outside of Sebastopol.

Several indignation meetings had been held in England relative to the way in which the war had been conducted.

An unsuccessful attempt had been made to assassinate the Emperor of the French.

Consols, 88½. Breadstuffs—market animated: Flour advanced, 1s. per barrel; Corn 1s. 6d. per quarter.

THE CROPS.

We have already published encouraging accounts of the growing crops, from the South and West. Our exchanges continue to bring similar accounts from their respective regions of country. The Nashville (Tenn.) Banner, announces that the fruit crop in that county was never more promising than at the present time. Peaches and strawberries are particularly promising, the latter being already nearly ready for use. The famous prices of everything eatable, which have prevailed during the past year, have had the effect to wake up farmers to more extended cultivation of the soil, and in the grain growing regions of the West, particularly, great efforts are said to have been put forth to produce a large crop. And to the success of their efforts, the deep snows of the winter grain having been carefully covered and preserved from the frost during the cold season, and brought forth this spring in the best condition; so that with the ordinary smiles of Providence, considerably more than an average crop may be reasonably expected. This with the diminution of our imports, and the spirit of carefulness in trade and of economy in families, may secure to our people—the laboring and poor classes especially—during the approaching year, a season of less anxiety and suffering than has been their lot to endure the past year.—Boston Traveller.

Gold Mine in Boston.

The laborers engaged in digging a drain in Hanover street yesterday, discovered what appeared to be gold dust. Of these Philbrick being in the vicinity, took several lumps to a jeweller for analysis, and it was ascertained that the clay contained gold dust of the purest quality, and equal to any ever brought from California.—Boston Rec.

Interesting Decision.

We think we are serving the public in calling attention to the Court of Common Pleas, in Baltimore, October, 1854. The case was one of more than usual importance, especially to all who use platform scales, as the decision of the Court established the fact, that in all matters of dispute, as to weight, the scales manufactured by the Messrs. Fairbanks & Co., of Vermont, are the standard.

The suit arose from a discrepancy of weight between one of Fairbanks' scales in use by the Baltimore and Ohio Railroad Company and one of another manufacturer.

The case occupied the Court two days—Judge Marshall delivering his decision, stated as the result of the evidence, that the accuracy of Fairbanks' scales was established beyond all question.—Daily (Phila.) Pennsylvanian.

An emigrant train went over the suspension bridge at Niagara Falls a few days since. The cars moved very slowly. A German woman in the transit over the bridge gave birth to a pair of twins. One was named *Suspension Bridge* and the other *Niagara Falls*.

The increase of all kinds of business between this Province and the States, is evidenced by the number of business advertisements forwarded from the United States for publication in our City papers. To one of these, which appears in our columns for the first time to-day, that of Messrs. Christopher Robinson & Co., we would refer the Shoe dealers in this Province. Mr. Robinson, the senior partner in the firm, is a native of this Province, having removed from St. Andrews twenty one years ago, and by his intelligence, has succeeded in placing himself at the head of one of the most extensive Ladies' Shoe factories in Lynn. He is a practical workman, oversees his work, and takes pride in filling orders for his native Province.—Courier.

Monroton.—On Monday last, the election, under the Act passed at the last Session of the Legislature, took place, and resulted in the choice of Joseph Salter, as Mayor; Messrs. J. H. Beatty, J. S. Barnaby, J. Robertson, J. Wortman, D. Robertson, and T. M. Brown, as Councilors; and Messrs. E. L. Cowling, A. Weldon, Jr., and Thomas Trueman, as Assessors. The voting was by

ballot,—the system, as usual, worked very well.

At a meeting of the Council, next day, Mr. James Robertson, lately of St. John, was chosen Common Clerk.

The Canada Supply of Breadstuffs.

Of this score the Oswego (N. Y.) Times of the 28th ult. remarks:—"Scarcely two weeks ago one of our most prominent flour dealers insisted to us that not to exceed 100,000 barrels of flour would be received in the United States from Canada, this season before harvest. Over 250,000 barrels have been received already, and on the 25th there were in the several warehouses in Toronto, awaiting shipment, 59,000 barrels of flour and about 200,000 bushels of corn. There were afloat at the same time about 10,000 bushels of wheat and 9000 barrels of flour."

Montreal Flour Market.

The receipt of some small lots from Canada West has reduced the rate from 55s. to 52s. 6d. per barrel for superfine. For delivery within three weeks sales have been made at 48s. to 50s. For all June delivery, 43s. 9d. is asked.

New York, May 16—6 P. M. Flour 12½ cents lower and prices unsettled; sales 6500 bbls; common to straight State \$10 12½ a 10 31.

A WORD OR TWO ABOUT NEWSPAPERS.

Rev. Abel Stevens, the editor of the National Magazine, an issue which stands nearly in the first place among the periodicals of the United States, says in his "table," speaking of the independence of the true editor:—

"We do not, in our editorials, hold ourselves responsible to the personal views of any individual patron. For ourselves, personally, we would not subscribe a sixpence to a periodical which should hold itself bound to recede only received views, or to bring to us from month to month, such opinions only as are admitted by common consent, or are a repetition—a rehash of our own individual thinking. We prefer something independent—something provocative of new and progressive thought—even if it challenge sometimes, our dissent. This is one of the prime rules of good editing, and he that don't like it had better clear our track as soon as possible."

Extraordinary case of Drowning.—Towards the end of last month, Mr. J. Smith, his son, and some men were engaged stream driving on the Otter brook, a little stream which runs into the north branch of the Ottawa. A headspike which young Smith was using slipped from his grasp and he fell into the stream just below a rapid, or fall, as it is usually called. The stream at this spot was very narrow and so shallow that when his father and another man ran up, the father was able to take the son's hand and grasp his hair; but strange to say such strength had the under tow that both men were unable to lift him up hard as they strove, and there the young man was drowned, his hand holding his father's, and gradually relaxing his grasp as he grew fainter, until life being extinct, the body floated on the surface, and was drawn on shore. We could hardly believe this story to be true, so strange and incredible does it seem, but that we heard it from the lips of the unfortunate father himself.—Freeman.

IMITATION PORCELAIN.—Among the novelties of the day, we have observed in the various publications devoted to the arts, in England and on the Continent, notices of a tasteful and elegant amusement for the ladies called 'Potichomanie,' or the art of converting glass into ornamental Porcelain. We have inspected several specimens of this work done at the establishment of Messrs. Potter & Co. in Gormale-street, and we are much struck at the close resemblance they bear to the finest Porcelain. Messrs. Potter & Co. furnish to their customers printed instructions, gratis, and have for sale all the materials required for this elegant art.—(Ibid.)

FIRE.—Between 11 and 12 o'clock Wednesday evening, a fire broke out in a barn in the vicinity of Peters Street, which contained a quantity of hay, and was consumed, together with a shed and cow, the names of the owners of which we have not ascertained. A house in the vicinity owned by Mr. Duffy, shoemaker, caught fire and was some what injured.

About 4 o'clock, Thursday morning, another fire occurred in the vicinity of the S one Church. This fire, which was supposed to be the work of an incendiary, originated in a barn, and was immediately communicated to a house owned and occupied by Mr. John R. Marshall, which was totally destroyed, the house adjoining owned by Mr. Holt, was also destroyed, together with a building owned by Mr. James McCaskey, which was damaged to such an extent as to be almost useless. The Church being of less perishable material was thus prevented from falling a prey to the devouring element.—Morn. News.

AN INDIAN PRINCE AND HIS RETINUE.—The Rajah of Patna, one of the protected Sikh chiefs, is about to visit England. He wanted to bring a retinue of 500 people and 8 elephants! but the British authorities reasoned him out of that natural desire. He will be well supplied with cash: he is a notable money lender. At a state ball at Calcutta he was asked how he liked the English ladies; he answered—"My heart does not incline to them."

When the Allies entered Paris after the fall of the first Napoleon, the first thing the Cossacks did was to skin up the lamp posts

and swallow the oil. The French theatre was saved from plunder by allowing them a free range of the lamp room.

The Standard.

WEDNESDAY, MAY 23, 1855.

European News.

Elsewhere we have given the telegraph news by the Steamship Baltic at New York. Dates from the seat of War are to the 4th inst., and we regret are anything but encouraging, if we except the taking of some of the Russian outworks. The bombardment of Sebastopol had slackened, from it is said shortness of ammunition. The brave Allies nevertheless held good their position, notwithstanding the main defences of the Crimean City, are considered almost impregnable.

An attempt had been made to assassinate the Emperor of the French, but happily with out success.

ST. ANDREWS & QUEBEC RAILROAD.

It is now some weeks since a notice appeared in our advertising columns by order of the Directors of the Railway, announcing that a train would run daily for the transportation of merchandise and the accommodation of passengers; and although we felt a very lively satisfaction in learning that arrangements had been made to effect so desirable an object, we purposely abstained from making any comment on the subject, fearing that it might be found impossible in face of the position of affairs between the Company and the Contractors, and the difficulty, under the existing state of pecuniary matters, to make such necessary repairs on the road, as were well known to be required; in order to put it in working condition. It was therefore with no ordinary gratification that, on Saturday last, we enjoyed the opportunity, courteously afforded us by the Railway authorities, of joining the few friends who accompanied Mr. Whitlock the Secretary as far as the Fredericton Road Store on his way to Head Quarters, whither he had been summoned to attend the Executive Council;—

personally witnessing how much has been effected towards the removal of those difficulties, considering the means at the disposal of the Board, and we earnestly hope not only for the sake of the inhabitants of this town and surrounding neighbourhood but also for the welfare of the whole Province,—what ever measures may be in contemplation in order to resume the further progress of the works;—that the Directors will be able to continue the traffic over the distance which the trains now traverse.

That many parts of the road still require ballasting and otherwise repairing was apparent enough, but still we consider it no small matter of congratulation to the town and county as well as of credit to the energy of those to whose exertions we owe the benefit that the line is, and has been really working for some weeks past bringing down large quantities of cordwood & other timber and thus affording incontestable evidence of what would be the paying qualities of the road, were it completed and furnished in an efficient manner.

The cars on their return trip were laden with several thousand feet of pine and spruce ship plank, seen at Smart's mill, Rolling Dam, for a vessel building in St. Andrews for W. Whitlock. While recording these facts we may state that had common justice been done to the Company, by the Legislature at its last Session by passing a simple act empowering class B. stockholders to transfer their facilities over to Class A. in England, we would now have been in a much more favourable position. Communications from time to time received from the English Board, we understand say, they only wait to hear of the passage of the Bill. Had it passed there would now be a large number of laborers on their way out to proceed with the work. We cannot help in this case blaming the Government, calling themselves a progressive Government, we think they should have taken the initiative and carried the Bill through, all-powerful as they are, it could have been accomplished. This being the first great public work of the kind in the Province, has an extra claim on Executive patronage.

The weather for a few days has been bleak and stormy, with heavy rain retarding in some measure farming operations; but we are happy to state that many farmers have the greater part of their sowing and planting done, and in some districts, potatoes are making their appearance above the ground.

MAIL CONTRACTOR.—We omitted to notice that our old friend Winters, of St. John has taken the contract for the conveyance of the mail daily between St. Andrews and St. John. His carriages are well fitted up, strong, and comfortable and it is unnecessary to say anything with respect to his Horses—as he is well and favourably known to have the best

horses that can be purchased. John, has long been a favorite with the travelling public, for his obliging and happy disposition, punctuality and attention. His drivers are experienced men, civil and obliging. The Stage books are kept at Bradford's hotel.

ERRATA.—In Mr. Gillmor's letter published in our last week's impression, a mistake occurred, which we exceedingly regret, the error is ours, not Mr. Gillmor's. In the 36th line from the commencement of his letter, the word "road" was printed instead of "bridge." The sentence should read "he carefully avoided making appropriations sufficient to keep the bridge in repair &c." We make the correction as an act of justice to Mr. Gillmor.

SHOULDER ARMS.—From a circular which has been received by the Colonels of Militia, it is generally believed that the Militia in this Province, will at no distant day be called out to perform garrison duty. "Brush up your swords, clean your guns, buckle on your armor, and prepare to—shoulder your crutch, and show how fields were won!"

Snow.—A considerable quantity of snow fell on Monday, but disappeared on Tuesday morning under the influence of a heavy shower of rain. The tops of the hills however still present a wintry aspect.

The paper we imported is of so thin a texture that it is difficult to print on it. We hope to remedy this shortly, and in order to enable us to do so, request delinquents to liquidate their accounts. Our bills for advertising, subscriptions, &c. are made out, and we trust that they will be paid promptly;—we do not know of any good reason why the publisher of a newspaper, should be obliged to wait for years for payment of his accounts, any more than the trader or the merchant.—To the few who have paid promptly we tender our thanks.

We understand Mr. Boyd has been in possession of that portion of the Legislative grant for the purchase of seed allotted to the County of Charlotte, (\$50) and that he has furnished those parties who have applied to him, with sums to purchase seed. This announcement is made that those persons requiring seed may apply to him.

The Packet ship "Eudora," Spurr, of the Black Ball Line, arrived at St. John on the 15th inst., with 175 steerage and 6 cabin passengers. As customary, the ship made a quick run, and no serious case of illness on board. The passengers have published a complimentary card, thanking Capt. Spurr and officers of the ship, for their kind treatment, and attention to them.

INCOME TAX ON COLONIAL STOCKS.—It will be seen from the following extract that Colonial Stocks will in future be exempt from the income tax:—

The London Times contains a statement to the effect that Moutague Leverett, Esq., solicitor of a French gentleman, entitled to dividends in Canadian stocks has succeeded in a correspondence with the Lords Commissioners of the Treasury, in obtaining an exemption of all Foreign and Colonial Stocks from the operation of the income tax, although the dividends or interest be payable through an agency in the United Kingdom.—The practice of Baring, Bros. and most other agencies, has heretofore been to deduct the tax on income passing through their hands.

ACCIDENT TO MR. HICKS. The Quebec Morning Chronicle, of the 12th inst. says:—"We regret to learn that as the Hon. Mr. Hicks was on his way to town yesterday morning, in his carriage, the horse became unmanageable and ran away, throwing him out, but he fortunately escaped with some slight injury. His son however, aged about 19, who was also in the carriage, attempted to get out of it, and, being thrown with great violence to the ground, had both his legs broken. The news of this serious accident to a promising member of the ex Premier's family, has produced universal sympathy in this city.—[Quebec Chron.]

EMIGRATION.—The Limerick Chronicle thus shows to what the Exodus has been reduced in the case of the principal emigration ports.—The tide of emigration from this port has at length been stayed. The vessels announced to sail this month for Quebec, for want of the enormous number of passengers who were wont to secure berths in the spring ships from our quays, were each delayed a week behind the time mentioned for their departure but without success. On Saturday, the Jersey, capable of accommodating 300, cleared out with only 66 passengers. Last evening, the Jane Black, with accommodation for 350, sailed from the docks with only 136; and this afternoon the Triumph left with 78 adult passengers—all for Quebec."

The cholera appears to be on the increase at St. Petersburg. The cases for several weeks have averaged 150 a day, but from the Journal of St. Petersburg of the 17th, it appears that on the 13th inst., there were as many as 220 cases recorded.

Gratuities by the Emperor of the French.

The Emperor of the French before leaving Windsor, caused to be placed in the hands of the mayor, the munificent sum of £400 for the relief of the poor of the borough. His Imperial Majesty gave £100 for the poor of Dover; and on the part of the Empress and himself, his Imperial Majesty presented the liberal sum of £500 in aid of the Societe Francaise de Secours, of which the French ambassador is president. The Lord Mayor of London and the Mayor of Dover have also received very valuable contributions from the Emperor, in remembrance of his auspicious visit to England.

FIRST ARRIVAL.—The ship Albion, Toronto, Quana and St. Lawrence, the first instalment of our Spring Fleet, came into port in the course of yesterday. Their cargoes are principally for Montreal.

The first of the steamers of the season from Montreal is the "Quebec" commanded by Capt. Rodolf, bringing down 200 passengers and a large freight.

The English and French squadrons in the Pacific are preparing for another attack on Tootopaulovski, the Sebastopol of the Pacific.

The cholera seems to have become completely domiciled in the United States.—Ninety cases have occurred at St. Louis and on the Mississippi river.

Halloway's Pills, an undoubted Remedy for Asthma.—Mr. Ellis Wilson, of Fredericton, N. B., had for five years very severe attacks of Asthma, which deprived him of bodily rest night and day; the cough at times almost choked him, and caused him continually to spit blood, he was never safe either eating or drinking, and his family were distressed beyond measure to see him gradually reduced to almost a skeleton. Halloway's Pills, in his case, were as usual efficacious. This gentleman used them for eleven weeks.

Married.

At St. Stephen, on the 14th inst., by the Rev. Dr. Thomson, Mr. James Dow, Teacher, to Kate, eldest daughter of Duncan Stewart, Esq., of that town.

Died.

At St. John on the 19th inst., William Hutchinson, Esq., Watchmaker, in the 68th year of his age.

In Fredericton, on 22nd inst., in the 44th year of his age, Mr. William Grigor, a native of Abercromby, formerly editor of the *Head Quarters*, and lately a Reporter of the Debates of the House of Assembly.

Died, in the Parish of Saint David, on the 22d inst. Mr. Wm. Connick, aged 52,—leaving a wife and ten children to mourn their bereavement.

At Pownfield on the 19th March, Mr. James Jastison, aged 78. And on the 7th inst. Susan, widow of the above, aged 80.

Shipping List.

PORT OF ST. ANDREWS.

ARRIVED.—May 18th.—Schr. Borcas, Snell, Boston, ballast. Schr. Spray, B. Leon, St. John, merchandise. Cleared at St. Stephen. 19th.—Ship Homeward Bound, Coe, Liverpool, deals.—Chippman & Bolton.

ALBION HOUSE,

ST. ANDREWS.

Messrs. Storr & Co.,

Have the honor of announcing to their patrons and the inhabitants of St. Andrews generally, that they are now prepared to meet them at the Store immediately opposite their old stand, with a more

varied & extensive stock than ever they were in a position to offer before.

Profiting by their experience, they have selected and will have ready for inspection

ON THURSDAY NEXT, an UNUSUALLY LARGE STOCK of

General Dry Goods,

suitable for the season, and replete in every department; it would be unnecessary to particularize, it is sufficient to say the assortment is complete.

The Tailoring portion comprises every novelty of the season, consisting of West of England Broadcloths, Black and Fancy Doeskins, double and single mill'd Cassimeres; Vestings in endless variety; and a full and complete assortment of every article necessary to the stock of a first class Woolen House. All orders left with them will be faithfully executed under the superintendence of a cutter of first rate talent and experience.

The Subscribers beg to return their sincere thanks for the very flattering encouragement they have received since commencing business, and to assure their customers, they will spare no endeavors to deserve a continuance of those favors so liberally bestowed.

R. STORR & CO.

April 11, 1855.

Farm for Sale.

The Subscriber offers for sale a valuable
Farm, situated on Murphy's Ridge, Parish
of St. Patrick, formerly known as the Wil-
son farm, and adjoining E. McElroy's, con-
taining 60 Acres more or less, about 8
acres of which are cleared, and under cul-
tivation, and cuts 4 tons of hay. On the
premises are a frame House and log Barn—
the land contains a good growth of hard
and softwood mixed. If not disposed of
previous to the 10th April next, it will then
be sold at Public Auction, in St. Andrews.
D. McNAB.
November 1, 1854—Amp

AYER'S PILLS.

FOR ALL THE PURPOSES OF A
FAMILY PHYSIC.

THERE has long existed a public demand for an
effective purgative pill which could be relied on as
a safe and healthy remedy in its operation. This has
been prepared to meet that demand, and it is a
simple trial of its virtues which conclusively shows with
what success it accomplishes the purpose designed.
It is easy to make a purgative pill, but not easy to
make the best of all purgatives which should have
none of the objectionable qualities of cathartics,
and every other. This has been attempted here, and
with what success we would respectfully submit to
the public. It has been found that almost every
purgative medicine is irritating and injurious to the
bowels. This is not. Many of them produce a
gripping pain and revulsion in the system as to more
than counterbalance the good to be derived from
them. These pills produce no irritation or pain,
unless it arise from a previously existing obstruc-
tion or derangement in the bowels. Being purely
vegetable, they can be taken from their use in any
quantity; but it is better that any medicine should
be taken judiciously. Minute directions for their
use in the several cases to which they are ap-
plicable are given to the box. Among the com-
plaints which have been speedily cured by them, we
may mention Liver Complaint, in its various forms
of jaundice, indigestion, Languor and Loss of Ap-
petite, Constipation, Irritability, Bilious Headache,
Bilious Fever, Fever and Ague, Pains in the
Stomach and Lungs, &c. &c. It has been found that the
consequence of diseased action in the Liver, as an
aperient, they speedily remove and give relief in Gas-
tritis, Pleurisy, Peritonitis, Hepatitis, Scirrhus
and Scrophulous Colic with soreness of the body,
Fluor and Impurity of the blood, in short, any
and every case where a purgative is required.
They have also produced some singularly suc-
cessful cures in Rheumatism, Gout, Dropsy, Gravel,
Erysipelas, Prolapsus of the Heart, Pains in the
Back, Stomach, and Side. They should be freely
taken in the spring of the year, to purify the blood
and prepare the system for the change of seasons.
Hence an occasional dose is advantageous, even
though no serious derangement exists, but un-
necessary doses should never be carried too far,
as every purgative medicine reduces the strength
when taken to excess. A thousand cases in which
a physic is required cannot be enumerated here, but
everybody is sensible of the reason of every
body; and it is confidently believed this pill will
know a better purpose than any thing which has
heretofore been available to mankind. When their
virtues are once known, the public will no longer
doubt what remedy to employ when in need of a
cathartic medicine.

ince are to be offered for sale.
Book-ellers and others can learn the
terms, and will be supplied with Copies, on
application to Mr. Henry S. Beck, Book-
seller and Stationer, Fredericton.
By Command
Secretary's Office,
2nd January, 1855. 41

For the rapid Cure of
COUGHS, COLDS, HOARSENESS,
BRONCHITIS, WHOOPING-COUGH,
CROUP, ASTHMA, AND
CONSUMPTION.

We invite the attention of the public to the
Certificates appended below, and bespeak for
them that candid consideration which their honest
frankness deserves.
Jackson C. H., Jackson Cove, O., 29th Nov. '52.
Dr. J. C. Ayer & Co. The Cherry Pectoral
is much improved. Several of our best Phy-
sicians have used it three of them in their own
case, and always with the happiest effects. The
numerous patent medicines always before them,
lead to circulate in regard to every new remedy;
and it is only after undoubted evidence of value
in any article, that any thing like a general con-
fidence can be excited.
The unrivaled excellence of this combination
of agents (in the Cherry Pectoral) provide
you rapid relief by repeated trial and their own ob-
servations, has compelled medical men to proclaim
its usefulness. Its broad all-doubt the
best remedy, we have for Pulmonary Af-
fections of this climate, at the same time sedate
and expectorant—a rare combination of prop-
erties.
In the hope that it will prove its own reward
I subscribe myself,
Jas. H. C. MILLER, M. D.
Allegan Mich. 19th Jan. 1853.
DEAR SIR,—No one, no, not one—man, wo-
man or child—can be found to deny that the
Cherry Pectoral is all that it claims to be. There
is much need in this vicinity, although it
is known until recently. The community should
know its virtues.

IN STORE,
And for sale by the Undersigned,
MARCH 31, 1855.

10 HDS. BROWN MUSCOVADO SU- GARS (in bond)

22 Chests, 1st London and Souchong
8 Boxes, 1st TEAS
4 Bbls. refined crushed Sugar
3 Boxes, 1 cut, best Poland Starch
3 Hds. best bottled and raw Linned Oil
2 Tons No. 1 & 2 London and L'p-oi
White Paint, 14 and 28 lb. kegs
20 Kegs black and yellow Paint
1000 Feet Window Glass—assorted sizes
2 Casks Whiting
20 Boxes Glasgow & Woodstock Pipes,
10 gross each
24 Boxes Moulds and Dip Candles
20 Do com. and p. y Soap
2 Do Sperm Candles
1 Qr. Cask best White Wine Vinegar
2 Hds.
5 Bbls. best Cider Vinegar
100 Gross Beet and Wine Corks
70 Bbls. Byas' London bottled Porter, and
P. Ale—quarts and pints.

IN BOND, and Duty paid:—

15 Hds. best Rotterdam Geneva
2 Pip-s
16 Hds. Hennessy & Martell
2 Qr. Casks Brandy, vin. 1851.
2 Hds. Pale Brandy
4 Qr. Casks
3 Pans, old Jamaica and Demerara Rum
6 Pans Alcohol, 90 to O. P.
1 Do best Malt Aqua
2 Hds.
2 Qr. Casks Old Port Wine
1 Qr. Cask fine old brown Sherry
1 Do O. L. P. Madeira
11 Baskets first quality Champagne—q'ts
and pints,
14 Bbls.
12 Half
180 Qrs.
C and FF Gunpowder.

HARD WARE:—

10 Tons Pig Iron
19 Boxes Tin Plates
2 Tons Sheet Iron
7 Bags, 100 lbs. each, Horse and Ox
Nails
46 Do Deck Spikes, assorted sizes
5 Do Cut do
22 Do fine Cut Nails
40 Stones Iron Wire, assorted
1 Roll Sheet Lead, &c. &c.
J. W. STREET.

PACKET,

BETWEEN ST. ANDREWS AND ST. JOHN FOR THE WINTER.

The Subscribers respectfully intimate
to the merchants and traveling pub-
lic, that their fast sailing Pilot Boat
"JOHN CONLEY"
has commenced running once a week,
between the above mentioned places, touching at
Eastport when required, for the accommodation
of Passengers and freight. The vessel is well
found, and under the charge of the Subscribers.
Will leave St. Andrews every WEDNESDAY
and St. John every SATURDAY, wind and wea-
ther permitting. For passage &c., apply to either
of the subscribers.

THE INFALLIBLE REMEDY!!!

Holloway's Ointment.

ERYSIPELAS of eight years cured!
Copy of a Letter from Gen. Sinclair, Esq.,
of Paris, Canada, dated the 18th July
1854.

To Professor Holloway.

Sir,—I feel a pleasure and a pride in
bearing witness to the wonderful benefit I
have derived by the use of your infesma-
ble Ointment and Pills. For eight years I
suffered unceasingly from attacks of erysi-
peas; large purple blotches came all over
my body; in addition to the unpleasant
feeling of itching and burning, which af-
fected me both night and day, rendering
life a misery to me, as well as to all around
—so severe was the attack. I used several
reputable remedies without deriving the least
cessation to my misery. At last I de-
termined to try your Ointment and Pills;
after taking them for a few weeks, a visible
improvement took place, and I feel con-
siderably better—in three months, by con-
tinuing with your medicines, I was com-
pletely cured, and now enjoy the best of
health. The truth of this statement is well
known here, hence there is no necessity
for me to request secrecy.

I am, Sir, yours respectfully,
(Signed) Geo. Sinclair.

ULCERS in the Leg.—Remarkable Cure!
Copy of a Letter from Mr. Edward Tomkin-
son, of Cape Breton, Nova Scotia, dated
the 4th May, 1854.

To Professor Holloway.

Sir,—My sister, Miss Jane Tomkinson,
suffered for a great number of years from a
bad leg in which there were several deeply
seated and old wounds, defying the skill
of some of the most eminent of the medical
faculty; a variety of remedies were also
used unsuccessfully; and it seemed to me
that there was not any thing capable of
mitigating the agonies she endured. At
length, she had recourse to your Ointment
and pills, and after using them for about five
weeks, she was completely cured, after all
other means had failed to afford her the
slightest relief. I have no objection to these
facts being published, if you feel disposed
to make them known.

I remain, Sir, your most obdt. Servt.
(Signed) EDWARD TOMKINSON.

A BAD BREAST CURED WHEN AT DEATH'S DOOR!!!

Copy of a Letter from Mr. Henry Malden
of Three Rivers, Canada West, dated
July 9th, 1854.

To Professor Holloway.

Sir,—My wife suffered most severely after
the birth of our last child with a bad breast.
There were several boils in it, one as large
as a hand; all the devices and strategies I
tried would not heal them, but assumed an
aspect more frightful than before, and hor-
rible to behold. As a last resource I tried
your ointment and pills, which she perse-
vered with for seven weeks, at the expiration
of that time her breast was almost well; by
continuing with your remedies for two more
weeks, she was entirely cured, and we offer
you our united thanks for the cure effected.

I am, Sir, yours truly,
(Signed) HENRY MALDEN.

The Pills should be used conjointly with the
Ointment in most of the following cases:
Bad Legs Chicago-foot
Bad Breasts Chilblains
Buns Chapped hands
Bunions Corns (soft)
Bite of Mosquitoes Glanders
and Sand Flies Contracted and Stiff
Coco-bay Joints
Elephantiasis Piles
Gout Glandular Swelling
Scoury Lumbago
Sore Heads Piles
Painful Rheumatism
Ulcers Scalds
Wounds Sore Nipples
Yaws

Sold at the Establishment of Professor
Holloway, 244, Strand, (near Temple Bar)
London, and by all respectable Druggists
and Dealers in Medicines throughout the
Civilized World, at 1s. 3d., 3s. 3d.,
and 5s. sterling, each Pot.

There is a considerable saving by
taking the larger sizes.

N.B.—Directions for the guidance of
patients in every disorder, are affixed to
each Pot.

Sold by all Vendors of Medicines through-
out New Brunswick, and by A. H. Thomp-
son, St. Stephen; Billings & Dyer, Eastport,
and

ODELL & TURNER,
Of St. Andrews,
Wholesale Agents for the County Charlotte,
March 28, 1855.

Ica, FLOUR and Molasses.

Ex "UTICA" from Boston.

20 Chests Superior Congo TEA.

15 half Chests Souchong do.

7th March 1854.

AYER'S PILLS.

A new and thoroughly successful remedy for the
cure of all bilious diseases.—Constipation, Indi-
gestion, Jaundice, Dropsy, Rheumatism, Fevers,
Gout, Hæmorrhoids, Nervousness, Irritability, Inflam-
mations, Headache, Pains in the Breast, Side, Back,
and Limbs, Female complaints, &c., &c. Indeed,
very few of the diseases in which a Purgative Medi-
cine is not more or less required, and which sick-
ness and suffering might be prevented, if a harm-
less but effective Cathartic were more freely used.
No person can feel well while a cative habit of
body prevails; besides it soon generates serious and
often fatal diseases, which might have been avoid-
ed by the timely and judicious use of a good purgative.
This is the true of Colic, Feverish symptoms, and
Bilious derangements. They all tend to become or
produce the deep seated and formidable dyspepsia
which leads the horses all over the land. Hence a
reliable family physic is the first thing to see in
the public health, and this Pill has been perfectly
with consummate skill to meet that demand. An
extensive trial of its virtues by Physicians, Profes-
sors, and Patients, has shown results surpassing
anything hitherto known of any medicine. Cures
have been effected beyond belief, were they not sub-
stantiated by persons of such exalted position and
character as to forbid the suspicion of untruth.

Among the eminent gentlemen to whom we are
allowed to refer for these facts, are

PROF. VALENTINE MOTT, the distinguished Sur-
geon of New York City.

C. A. DAVIS, M. D., Sup't and Surgeon of the
United States Marine Hospital, at Chelsea, Mass.

Did space permit, we could give many hundred
such names, from all parts where the Pills have
been used, but evidence even more convincing than
the certificates of these eminent public men is
shown in their effects upon trial.

These Pills, the result of long investigation and
study, are offered to the public as the best and
most complete in the present state of medical
science can afford. They are compounded not of
the drugs themselves, but of the medicinal virtues
only of Vegetable remedies, extracted by chemical
process, in a state of purity and combined together
in such a manner as to insure the best results. This
system of compounding for medicines has been found
to be the Cherry Pectoral and Pills both, to produce a
more efficient remedy than had hitherto been ob-
tained by any process. The reason is perfectly ob-
vious. While by the old mode of composition, every
medicine is burdened with more or less of accu-
mulated impurities, by this, each ingredi-
ent is purified, and the medicinal virtues only being
retained, the effect is more rapid and efficient. Hence it
is self-evident the effect should prove as they have
proved more purely remedial, and the Pills a sure,
more powerful antidote to disease than any other
medicine known to the world.

As it is frequently reported that my medicine
should be taken under the counsel of an attending
Physician, and as he could not properly judge of a
remedy without knowing its composition, I have
supplied the accurate formula by which both my
Pectoral and Pills are made to the whole body of
Practitioners in the United States and British Amer-
ican Provinces. If however there should be any
one who has not received them, they will be
promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how
few would be taken if their composition was known! Their
life consists in their mystery. I have no
objection to their being made known.

The composition of my preparations is laid open
to all men, and all who are competent to judge on
the subject, freely acknowledge their superiority
over their rivals. The Cherry Pectoral was
pronounced by scientific men to be a wonderful
remedy for the diseases of the chest, and the
Pills have been pronounced by the same men to be
the best of all the old mode of composition, every
medicine is burdened with more or less of accu-
mulated impurities, by this, each ingredi-
ent is purified, and the medicinal virtues only being
retained, the effect is more rapid and efficient. Hence it
is self-evident the effect should prove as they have
proved more purely remedial, and the Pills a sure,
more powerful antidote to disease than any other
medicine known to the world.

ent is purified, and the medicinal virtues only being
retained, the effect is more rapid and efficient. Hence it
is self-evident the effect should prove as they have
proved more purely remedial, and the Pills a sure,
more powerful antidote to disease than any other
medicine known to the world.

As it is frequently reported that my medicine
should be taken under the counsel of an attending
Physician, and as he could not properly judge of a
remedy without knowing its composition, I have
supplied the accurate formula by which both my
Pectoral and Pills are made to the whole body of
Practitioners in the United States and British Amer-
ican Provinces. If however there should be any
one who has not received them, they will be
promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how
few would be taken if their composition was known! Their
life consists in their mystery. I have no
objection to their being made known.

The composition of my preparations is laid open
to all men, and all who are competent to judge on
the subject, freely acknowledge their superiority
over their rivals. The Cherry Pectoral was
pronounced by scientific men to be a wonderful
remedy for the diseases of the chest, and the
Pills have been pronounced by the same men to be
the best of all the old mode of composition, every
medicine is burdened with more or less of accu-
mulated impurities, by this, each ingredi-
ent is purified, and the medicinal virtues only being
retained, the effect is more rapid and efficient. Hence it
is self-evident the effect should prove as they have
proved more purely remedial, and the Pills a sure,
more powerful antidote to disease than any other
medicine known to the world.
