British Sportsmen Will Meet Defender With Other Yachts.

Generous Comments on Tuesday's Race by London Papers.

German Army Maneuvers-Many Prostrated by the Heat-Gladstone's Letest Literary Work.

HIS RACE IS RUN. London, Sept. 11.-James Ashbury, who took the yachts Cambria and Livonia to America in 1870 and 1871 to compete for the America's cup, is dead.

LADY WOLSELEY STRANDED. London, Sept. 11.-The steamer Lady Wolseley, of Dublin, bound for London, with 100 passengers on board, stranded on Goodwin Sands today. The pas-sengers and crew were all rescued.

STEAMSHIP SYNDICATE. London, Sept. 11 .- A dispatch from the Central News correspondent at Hamburg, says it is expected that a syndicate of the German and British trans-Atlantic steamship companies will be formed this week.

FATAL STEAMSHIP COLLISION. Flushing, Holland, Sept. 10.-The Spanish steamship Manila, bound for China, and the Norwegian steamer Xania, bound for Antwerp, collided near Borselia today. The Xania sank soon afterwards, and six of those on board were drowned, including the captain. The Manila was badly dam-

PRINCESS ALEXANDRA BE-TROTHED.

Berlin, Sept. 11.—Princess Alexandra of Saxe-Coburg and Gotha, third daughter of the Duke of Saxe-Coburg and Gotha (Duke of Edinburgh), was yesterday formally betrothed to the hereditary Prince Ernest of Hohen-lohe-Langenburg. Princess Alexandra is 17 years of age and Prince Ernest 32. BRITISH COMMENT ON THE RACE.

London, Sept. 11.-The Times says men will feel that a success which can plausibly be disputed is not the sort of victory that Englishmen love to win. and pay each of you thirty shillings a week The cup committee decision will be accepted loyally by the competitors and their countrymen.

The Chronicle says we cannot consider the result of the race a clean win for the Valkyrie.

GERMAN ARMY MANEUVERS. Stettin, Sept. 11.-The day's military maneuvers ended with the retreat of both corps of the southern army to the line of Wolli, Storckow and Schwenin-The victory of the northern army was due to Gen. Von. Waldersee's unexpected forced march in the morning from the line of Pasewalk and Krugsdorf. This movement surprised the Emperor and also irritated him greatly. Waldersee had 21 battalions comprising 126 guns in action. The heat was intense, and many of the men dropped in the field from its effects. Emperor Francis Joseph and the King of Saxony followed the center movements. A remarkable feature of the maneuvers was the fact that one could ride along ten miles of battlefield without seeing anything beyond a few helmets or a rising cloud of dust betraying the location of the troops under cover, so well were their operations concealed.

A GLADSTONIAN PREFACE. London, Sept. 11.-The general introduction which Mr. Gladstone has written to the forthcoming "People's Bible History" is quite a long article. It runs to 22 large pages and was finished at Hawarden towards the end of last year. The general line underlying Mr. Gladston's contribution is the setting forth of the value of scriptural studies to the laity. At the outset he discusses the power of Christianity, touches upon the circulation of the Scriptures, and contrasts them with other sacred writings. Somewhat further on he writes of the Christian and Pagan creeds as seen side by side, of the racial history of the Orient and of the imperfections of the sacred books of the east. His next point is the Mosaic chronology, then comes an examination of the story of Genesis, and after that the subject of the origin of man is noticed. A defence of the Bible is followed by an analysis of the character of the assaults made upon it. Towards the close Mr. Gladstone alludes to the temptations and trials of public life, and sums up the Scriptures in a triumphant note as the solace of mankind.

MARVELLOUS ELECTRIC BAT-TERY.

London, Sept. 11.-The rumors which have been current here for over a year past of the invention of a marvellous electric battery have at length taken something like definite form, a syndicate having been formed to assist the inventor to bring it into practical use. It is asserted that in the new battery material will be used in place of zinc which costs only one-twentieth of the price of that metal, and that "by means of an automatic circulatory system, polarization is entirely done away with." The cost of the electrical energy produced by this battery is said to be not more than sixpence per British Board of Trade or Government unit, or fourpence per horse-power, per hour, The syndicate is, therefore, dreaming dreams of wealth, of the abolition of tramways, of light railroads, and the universal adoption of electrically propelled vehicles using ordinary roads, to say nothing of electric lighting brought within the reach of the most modest of purses. As no public demonstration of this marvellous battery has yet been given, investors are likely to restrain their enthusiasm; but there is no reaon to doubt that the syndicate has been formed and the money put down. ENGLISH COMMENTS ON THE

YACHT RACE. London, Sept. 11 .- With one excention the London evening papers today exhibit a generous and sportsmanslike spirit in commenting upon the outcome of the second race of the series be-tween Valkyrie III. and Defender for

wish that the race be not given to Valkyrie III. on a mere technicality, or as the result of an accident. The same spirit characterizes the talk among yachtsmen. Fear is expressed that the excellent showing made by Defender in her crippled condition has practically settled the contest against the British yacht. Much talk is heard today of the new yachts to be built to meet Defender if the American syndicate's boat should ever come over here to challenge for the America's cup. In addition to the cutter which is to be built for the Prince of Wales, it is reported that Lord Rosebery is likely to build a yacht, and a rich Scotch syndicate is also ready to enter the lists.

The Sun this evening says: "There is so very little true sportsmanlike feeling in America, that yesterday's cheering of the winner is charming." The Evening News says: "Englishmen cannot stomach victory tainted with unfair conditions, and would rather see Valkyrie return home with-

out a single race than flying a flag unfairly earned." The Star says: "Neither Lord Dunraven nor any other Englishman would wish to receive an advantage by a mishap. From yesterday's race it seems clear we cannot gain the cup

this year." The Pall Gazette this afternoon says: "If Defender was at a disadvantage by the accident, we shall find little satisfaction if the decision favors Val-

kyrie. The St. James Gazette observes: "It is a good thing that the race was not sailed here, as it might be difficult to persuade Americans that it was a mere accident. If Defender was on a port tack, why was the invariable rule that port tack vessels give way not followed?"

GENEROUS DUNRAVEN

Will Pension His Crew for Life If He Wins the Cup.

An Unprecedented Offer Which Involves a Fortune-The News Received with Cheers.

New York, Sept. 11.-Lord Dunraven has offered a pension of 30 shillings weekly to every member of the crew of Valkyrie should they succeed in winning the America cup. This offer he is reported to have made in an address to the sailors and their commanders, in which he said: "While I feel satisfied that every man will do his duty I am anxious to encourage you to exert maining races of the series. With that end in view, I desire to say that if the cup judges and the dog show committee. that Lord Dunraven and his country- end in view, I desire to say that if the cup goes back to England by reason of your seamanship I will pension every man for life, so long as each one of you lives."

The announcement was so unexpected that for a minute not a word was spoken. Then, actuated by a common impulse, the men of the crew broke out into cheers. Lord Dunraven again impressed them with his ambition to snatch victory from what now appears almost certain defeat, and then The men afterward held an retired. informal meeting and discussed the offer. Although they declined to talk, it was clear from their manner that they had entered into a compact to strain every nerve to win. Lord Dunraven's action is without precedent, either considered by itself or from the standpoint of generosity. It is the ambition of his life to place within the hands of his queen the trophy that passed out of the possession of England half a century

The ages of the 26 men will average 30 years. They are all strong and healthy, and their expectations of life may be set as 70 years. In that time, if the expectation be realized, they will have received 3,120 pounds sterling, r \$15,600, and in the aggregate 82,160 pc ands, or \$410,800. That the crew appreciated Lord Dunraven's inducement was shown by their

work in yesterday's race. UNCLE SAM'S GRAIN CROP.

September Report of the Department of

Agriculture. Washington, D. C., Sept. 11.-The September report of the statistician of the Department of Agriculture shows decline in the condition of the corn to 96.4 from 102.5 in the month of Aug-The general condition of wheat, considering both winter and spring varieties, when harvested, was against 83.7 last year and 74.5 in 1884. The prospects of the corn crop have suffered from drought during August in the surplus producing States of Ohio, Indiana, Illinois, Iowa, and in a portion of Nebraska. Reports from Indiana, Iowa and Ohio indicate that though there have been rains during the latter part of the month they have been generally too late to be of great benefit. Drought has also injured the crop in New York, New Jersey, Pennsylvania and Maryland. Much more encouraging reports come from the south which indicate that in that section the crop will be larger than ever before

produced. The condition of oats when harvested was 86; rye, 83.7; barley, 87.6; buckwheat, 87.5; potatoes, 90.8.

MRS LANGTRY WANTS A DIVORCE. Rumor Says the Stage Beauty Will Sue

for Her Freedom. New York, Sept. 11.-The rumor is again current that Mrs. Langtry, the actress, is seeking a divorce from her husband, from whom she has been separated many years. The applica-tion-will be filed, it is said, in the California courts, Mrs. Langtry having a residence in Lake county, that State. A. H. Hummel, her counsel, said yes-

terday: "I can say that the suit has not yet been brought. I have received a com-munication from Mrs. Langtry, dated Baden-Baden, where she is now. If the suit is brought it will be the first time that she has ever tried to be legally freed from her husband.

WOMEN AS CHURCH USHERS. New Brighton, Pa., Sept. 11.-At the Baptist Church of this place Sunday young women acted as ushers. The result was that the church was filled to overflowing with young men.

THE CANADIAN SOO CANAL. Sault Ste. Marie, Mich., Sept. 11.-At the close of the initiatory day of the new Canadian Soo Canal, it was found that nearly 50 crafts had been locked through the new waterway. The relief given the American lock was a very noticeable one. The new lock worked NEED FOR A CHANGE.

One in Montreal Did a Million Dollar How the Masses Are Discriminated Against, Business.

WEDNESDAY, SEPTEMBER 11, 1895.

A Regularly Planned Scheme of De troying Property for Money-Eight of the Band Before the Grand Jury.

A FIREBUG SYNDICATE.

Montreal, Sept. 11.—John Beiser, with the band of eight merchants who are charged with arson, were before the grand jury yesterday. For ten years, it is alleged, John Beiser has been planning fires, and has been at the head of this fire-bug syndicate. Fifteen fires that have taken place in Montreal within three years, and many more in other parts of Canada, are believed to have been of incendiary origin, and in which the syndicate were interested. It does not appear, however, that the gang had anything to do with the Boyd,

Gillies & Co. fire. The total losses to the leading fire insurance companies reach the millions, and for a long time they have had their private detectives at work, but unsucessfully.

It was noticed that the majority of the fires took place almost invariably between Saturday night and Monday morning. Judging from some of the cases already discovered, the plan of operations seems to have been that to enable him to raise another bag Beiser and the heads of the gang would of wheat. There is no raw material as wholesale merchants sell goods to except sunlight, rain, the forests, the small retail merchants, overstock them, and then force them to insure for double the value of the stock, and ultimately cause the stock to be burned out. The fires were started with the aid of an incendiary machine, in the form of a simple alarm clock. The outside case of the clock would be re- a rebate of 99 per cent on his raw mamoved, and a glass bulb containing sulphuric acid substituted for the farmer he pays the full duty. The wire metal alarm bell. This would be set to the time required, and conveniently placed, the surrounding floor being sprinkled with chlorate of potasn. When the alarm was struck, of course the bulb smashed, and the mingled chemicals did the rest.

Beiser is 55 years old, is supposed to be wealthy, and has lived in Montreal twelve years.

BIG TURNOUT OF TEUTONS. Germania Day at the Toronto Fair-Fine

Display of Fruit. Exhibition Grounds, Toronto, Sept. 11.-Yesterday was Germania Day at the exhibition, and a large number of Germans from Berlin, Waterloo and other western points were present. At luncheon were the directors, Sir Wm. Among those on the grounds were Patron Grand President Mallory, Joseph Haycock, M.P.P., who rece tent, and W. W. Buchanan, of the

Royal Templars of Temperance. An excursion of the Canadian Order of Foresters from Brantford arrived in the morning, accompanied by their band. Judging was in progress in the live stock department and also at the dog how. The exhibit of fruit was and is unusually fine. It includes a special collection from the Ontarlo Fruit Ex-perimental Farm, comprising about 600 plates, 110 varieties of grapes from one farm being shown. The Dominion Experimental Farm also sends a collecion numbering 125 plates. The atendance on Monday was considerably arger than on the corresponding day

last year.

THE PUREST OF ALL WATERS. On account of the bade state of the water at present in Toronto, those who can afford to buy water are doing so. They all seem to agree that the celebrated Mount Clemens Sprudel Mineral Water is the one to order. Every bottle is put up at the spring, and leading physicians acknowledge it one of the most healthful mineral waters sold on the continent. It is put up in cases of 50-quart bottles, and Wm. Mara, 79 Yonge street, Toronto, is now selling about 50 cases per day.

ROMANTIC MATRIMONY.

A Mountain Guide Makes Love in an Ice Cave Warmed by Subterranean Stream.

Tacoma, Wash., Sept. 12.—Henry Carter, the famous Mount Tacoma guide, has fallen in love under romantic circumstances, and will be married by the Rev. William M. Jeffries, the first preacher who delivered a sermon on the top of the mountain. There is a possibility that Carter will be married on top of the mountain, the place where he fell in love last Tuesday night, with the thermometer registering 20° below zero. He is to marry Cora Beachman, a school teacher and the belle of Lake Park, a suburb of Tacoma.

Miss Beachman, accompanied by Mr. and Mrs. F. M. Groe of Eatonville, set out Tuesday with Carter, the most trusted of all the mountain guides, to ascend Mount Tacoma. At Gibraltar Rock, which corresponds to the "Shoulder" of the Matterhorn, 1,000 feet from the summit, Mrs. Groe became exhausted. Miss Beachman 'declared her intention to reach the summit at all hazards. Carter led the way, but soon lost his ice axe, and in scaling difficult passages they were compelled to rely solely on their They did not reach the alpenstocks.

summit until 6 p.m., too late to attempt the descent that night. They had left Paradise Valley below the snow line, without wraps, and only a lemon and one sandwich each in the way of provisions. Carter selected a sheltered ice cave formed by jets of steam from the crater, and there they passed a sleepless night, discussing all sorts of topics, and before they left the summit at 9 a.m. Wednesday Miss Beachman had promised to marry

COSTLY TRIP TO TORONTO. An Excursionist Makes a Sad Mistake.

Toronto, Sept. 11.-At the police court yesterday Chief Detective Day, of the T. R., charged a German named Morris Switzer with offering for sale the return half of an excursion ticket from Sudbury to Toronto. Switzer made the mistake of offering to sell the ticket to Mr. Day himself.

The lowest possible penalty is \$20 and costs, or ten days, and as Switzer had no money he went down for the shortest term.

A Former Leading Conservative Scores Canadian Tariff Iniquities.

Mr. Lockie Wilson, who, until recently has been a leading Conservative in Glengarry, has been interviewed in regard to his present views. He is now uncompromisingly opposed to the policy of high taxation. In an interview in Toronto, speaking of the iniquities of the present tariff, Mr. Wilson points out, salt required for fishermen is admitted free, but the farmer is taxed for the salt required in his dairy. The twine required by the fishermen is free, but the farmer is taxed 12 1-2 per cent on his binder twine. Are these inequalities, the Patrons ask, because Mr. Foster and Sir Charles Hibbert Tupper represent constituencies of

fishermen? The raw material feature of the tariff, Mr. Wilson thus scores: One man's finished product is another man's raw material. The bag of wheat is the farmer's finished product. It is the miller's raw material. The barrel of flour is the miller's finished product and the baker's raw material. The loaf of bread is the baker's finished product and the farmer's raw material fish of the sea and the earth. But if one man gets his raw material free, why not another? Yet the woolen manufacturer gets his wool free, and the cotton manufacturer his cotton, while Mr. Massey, if he manufactures a binder for an Australian farmer gets manufacturer gets his wire free of duty, but when he puts a little labor on it, and makes it of use to the Canadian farmer, in barbed wire, there is a duty of 30 per cent on it!"

A LIGHTNING PACE:

A New York Central Flyer Beats the World's Record.

Travels 440 Miles in Seven Hours-From New York to Buffalo.

Albany, N. Y., Sept. 11.—The New York Central "flyer" which left Grand Central station, New York city, at 5:40:30 a.m. arrived at Albany at 7:54:55 a.m., covering the 143 miles in 134 minutes 55 seconds. She stopped at Albany, changing engines, one minute.

Rochester, N. Y., Sept. 11.-The New York flyer left Syracuse at 10:20 a.m., number of visitors at the Patron's being pulled by engine No. 903, in charge tent, and W. W. Buchanan, of the of "Charlie" Hogan, chief locomotive inspector of the Falls division. The 83 miles between Syracuse and Rochester were covered in 73 minutes. Nothing but a cloud of dust could be seen as the train plowed through the Central yards, where a arge crowd had assembled.

Buffalo, N. Y., Sept. 11.—The New York Central flyer arrived at the Central station in Buffalo at 12:40 p. m., having made the distance from New York to Buffalo, 440 miles, in seven hours. This breaks all long distance records of the world and proclaims the Central Hudson road the possessor of the championship. This beats the time of the Empire State express one hour and forty minutes, and knocks nearly three-quarters of an hour from the latest English record of 450 miles from Euston to Perth in 7:45. The flyer entered the train shed here at 12:40 flat, amid the cheers of hundreds of people, gathered to witness the actual finish

f a wonderful record-breaking performance. Charley Hogan the pilot of 903 was surcounded by a crowd eager to congratulate nim on the run from Syracuse, 149 miles in 141 minutes. Hogan modestly said that he could have done ten miles better but for a heavy head wind which he encountered in

the run in from Batavia. As it was he made the last 30 miles in 24 minutes, averaging 48 seconds to the mile. Several miles, however, were reeled off much faster than the average.

The train consisted of a combination smoking and baggage car, two coaches and the private car "Maraquita," the total weight of which is 358,310 pounds.

Sparks From the Wire.

Major McLennan, M.P. for Glengarry, is

seriously ill. Sir John Schultz will, it is reported, be appointed a member of the Alaska boundary commission.

A receiving order has been issued against George Augustus Sala, of London, the wellknown newspaper writer and author. A plot against the life of Prince Ferdin-

and, of Bulgaria, has been discovered at Rustchuk. Twenty persons have been arrested. A Sault Ste. Marie dispatch says:

ENTHUSIASTIC BRITISHERS. News of the Yacht Race in Montreal Glasgow and London-Crowds Go Wild.

Montreal, Sept. 11.-Thousands eople yellled themselves hoarse on St. James street, in front of the newspaper offices, as soon as the official result of the yacht race was announced yesterday. For some minutes when the result was in doubt the crowd groaned, but when the official notice was published it went wild. The Star issued Valkyrie badges, and so great was the rush that the crowd all but wrecked the business office. Union Jacks were carried everywhere and the whole town is in a fever of excitement.

Glasgow, Sept. 11.-Twenty thousand people assembled outside the office of the Citizen yesterday, and there was cheering and hat waving by the crowd as the bulletins were posted. Many people were seen to display Lord Dun-raven's colors. The wish is father to the thought that the race will not be awarded to Defender on the protest, but that the committee will order the

race to be resailed on Thursday. London, Sept. 11.-The bulletins of the race which were posted in various public places last evening, attracted great crowds, and at the clubs the interest manifested was most intense. As cablegrams were received announcing the approach of the yachts to the finish line, so close together that the result might be either one way or the other, the crowds became fairly wild with excitement, and finally when it was announced that the Valkyrie had crossed the line a victor, the enthusiasm of the waiting multitude knew no bounds.

ROBINSON "GUZZLED" JOHNSTON

William and Benjamin Have a Slight Disagreement.

Johnston Was Black in the Face—Huckster Rawling ' Case Again-The Magistrate Getting Tired.

Benjamin Johnston, of Cartwright street, is foreman of the Barber Company's men at the stone crusher on York street, and among the gang under his charge was Wm. Robinson, a teamster. Johnston and Robinson had a little difference recently, which ended the preparatory course. in the latter's appearance at police headquarters this morning on a charge of assault, Johnston alleging that he struck him in the face and choked, too. The trouble arose over some teaming, and the only witness to the affair was

a teamster. "Robinson was guzzling Johnston," said the teamster to the magistrate, when he ceased laughing sufficiently to allow himself to speak.

"What do you mean by guzzling?" queried the court. "Well, choking him, and he looked as though he meant business, too," rejoined the teamster, after he had enjoyed another laugh. "Johnston was leaning against a fence, his face as black as a stovepipe and his tongue protruding." Robinson denied hitting Johnston, but admitted grabbing him by the throat. 'After the row Johnston laid in wait for me behind a fence with a binding pole about three feet long," Robinson said in defense.

The P. M. -But you couldn't blame him after what you had done. Five dollars or a week.

Robinson paid. The adjourned case of Huckster Geo. Rawlings, charged by Market Clerk Wilson with refusing to act according to instructions, was next heard. In going to the square the other morning. Rawlings took a stand at the sidewalk near the market house, while Wilson alleged that he was directed to the walk on the north side. John Eggett, another gardener, backed Wilson, and they were contradicted by the defendant and his wife. Judgment was re-

served for a week.

Mr. Wilson offered to withdraw another charge if Rawlings would consent to create no trouble in the future. "That is fair," said the magistrate.

"I am getting tired of seeing Rawlings in the Police Court." Mr. Wilson said he could also have Rawlings summoned for abusive language. He did not like to, however, as his (Wilson's) father was an old Irishman and had always told him never to be afraid of any man.

A similar charge against Mrs. Jane Keyes was withdrawn by Mr. Wilson.
The charge of robbing the Royat Hotel, which has hung over Matthew Gould's head for several weeks, was dismissed. The police have been unable to secure John White, the barber, who is wanted, and the crown offered no evidence against Mr. Gould, who has all along protested his innocence.

James Fox, drunk, was sent down for twenty days in default of a \$5 fine. George Wilson, vagrant, was further remanded for a week, awaiting the arrival of an officer from Clinton, Iowa. Wilson was arrested with William Stewart, held on suspicion of being a jail breaker and firebug from Clinton.

AH ARMY INVASION.

Largest Salvation Army Gathering on Record Coming.

Commencing Saturday and Concluding Wednesday-Overflow Tent Provided-Full Programme.

The Presbytery adjourned, to meet in Knox Church, St. Thomas, on the second Tuesday in November, at 11 a.m., for conference, and at 7:30 p.m. for business.

A PECULIAR WAGER.

A Man Dies From Whisky Which He

Drank on a Bet. Cleveland, Sept. 11.-Joseph Bezarts who boarded with his cousin, Louis Bezart, at No. 53 James street, died last night under rather peculiar circum-

stances. It is said that while in the saloon kept by Frank Jabubusky, on South Woodland avenue, yesterday afternoon, Bezart drank \$1 60 worth of whisky on a wager.

Last night his cousin, with whom he boards, found him lying on the side it is shown that the receipts for the porch of the house in an alarming condition. She has put the sign of a later date, "You and I both belong to the have-beens now." The classification was acknowledged in the same cheery spirit, and there followed a little confidential interchange of the reminiscences which are so precious to those "who have looked on better days" -recollections which neither could ever talk over in general society, as they have the proper pride which abstains from posing as victims of undeserved misfortune.

The have-beens are indeed to be pitied, but not so much as those who "might have been," those who have never tasted the sweets of life nor known its brighter hours. The aphorisms are fallacies; the great poet is

One sunburned maidn there is among the Berkshire hills, through whose veins the blood of colonial dames flows and throbs. Her face has the stern lines and the strong character of her forefathers, and very proud she is of the fact. For this autumn she has selected a gown of muslin. The skirt is striped with blue. Sleeves are of lawn, with stiff bunches of flowers in old-fashioned colors.

A beruffled fichu crosses the bodice, and a full ruche encircles the pretty

With modifications, however, madame declared that the old modes gave valuable suggestions for early autumn house gowns, and showed by way of illustration an adorable frock she has just imported for a New Orleans belle. The gown was a Doucet confection in ivory tinted barege, trimmed with "Hash!" answered Johnny, confident- dull gilt braid, and to be worn with an enermous fichu of oriental gauze. The fichu was unfigured and trimmed com-"Have you any cheese?" asked a pletely round with a kilt pleating of the same; it had very low scarf ends, widely rounded at the bottom, that were to be worn either slipped under the belt or tied round the waist in a big bow at the back.

As for the gown itself, it was cut en princess, slightly trained, and lined throughout with soft silk, with the neck just square enough to show those adorable curves at the sides and back of young throats.

The stuff of the bodice, which was very brother Willie to bring you a pail of short in the waist, necessitating wearing the belt high, was stretched over the bust without a wrinkle, the corsage fastening in the back; sleeves, round puffs, barely covering six inches of the arm, which, however, when occasion demanded, could be entirely hidden cape-wise by the voluminous fichu.

One thing to be remembered-the gilt braid mentioned, and which was an inch in width, was used only in the way of a facing. A single row, sewed flat at the

taken with the waist perfectly free, and when vigorous out-of-door sports are indulged in no stays should be worn; but when in the street or at home or at social functions the corset worn sensibly is a necessity of all women who claim any degree of that intangible something called style. The rules for health and beauty are really very simple. This should be done four or five times. Then the position should be taken for the exercises-legs together, hands on the hips and chin held up. Then a rotation of the body, throwing it back and twisting forward again. The other exercises to be taken are made according to the wellknown routine: hands from shoulder up ten times, then down, then from the shoulder straight out in front the same number of times. All these should be done briskly. After the exercise a cold sponge bath should be taken, accompanied by vigorous rubbing, and every other week a cupful of common salt should be thrown into the water each day, and when this is used it must be remembered that soap cannot be used, as the two do not agree. After dressing slowly, a breakfast should be eaten of fresh fruit. grain foods and eggs or chops, according to one's taste. To give a woman an erect and beautiful figure there is no surer way than to stand with the hands on the hips as often as possible, with the abdomen in, and the chest thrown well out. When one is at home it is easy to stand in this way for several minutes at a time, or to walk about the house so. It works like magic, too, for giving one a

IT COST \$300. Treatment of the London Girl Who

Was Bitten by a Mad Dog.

Council Will be Recommended to Stand \$250 of the Expense-A General System of Sewerage Needed.

The Board of Health held a meeting last night after an interval of several months, and made up for lost time by disposing of everything in the form of business which was laid on the table. Dr. Cl. T. Campbell was in the chair, the other members present being Ald. Skinner, Dr. Mitchell, ex-Ald. F. J. Fitzgerald, Ald. John Heaman, Mayor Little, Ald. Callahan, ex-Ald. John W. McCallum, Medical Health Officer Hutchinson, Inspector Bell and Secretary Bell. Among the communications read was

one from Mr. Thomas Evans, of 152 William street, whose little daughter of 4 1-2 years, was bitten by a mad dog about a month ago, and was sent to the Pasteur Institute, New York, for treatment. Mr. Evans entailed an expenditure of \$300 through this step, which was considered necessary to save the girl's life, and he asked the city to reimburse him, as he was not in a position to bear the heavy outlay. This is the first case of the kind in the experience of the Health Board, and the question arose whether or not the city was liable for any portion of the expense. Mayor Little moved that the communication be referred to the city solicitor, as he considered it would be unwise to establish a precedent without first receiving legal advice. An amendment by Dr. Mitchell, recommending the council to grant Mr. Evans \$250, was carried by a vote of 4 to 3. Medical Health Officer Hutchinson reported that a public sewer was badiy needed on Fullarton street, between Talbot and Richmond.

"I think it is time the Board of Health took action with regard to obtaining a general sewerage system," said Chairman Campbell, as the report was read. "The city is being besieged with law suits. There are two from London South, and some of the residents on the line of Carling's Creek have been making threats. All these go to prove that a general sewerage system is needed. I think it would be within the province of the board to recommend the council to consider the matter."

And a motion to that effect was passed. The health or the city is extremely good. "With the exception of those in the hospital, there is not a case of contagious disease," said Dr. Hutchin-

Minister of Militia Dickey wrote regarding the Carling Creek difficulty, and stating that his department was anxious to meet the wishes of the city, and would, if it was considered absolutely necessary, dispose of the water closet sewage from Wolseley Barracks by a system of cesspools on the premises. He considered it better to deal with the question finally by some arrangement for connecting with the main sewers of the city. The Minister said he would be glad to appoint one or more officers of his department to meet the council with the object of ascertaining the cheapest method and the smallest contribution from his department which the council would consider fair.

A communication from the London Township Council prohibiting the dumping of night soil in the municipality elicited the information from the chairman that the case of Mr. Coursey. who was recently fined for depositing night soil in the township, was to be appealed, and the board would support the appeal. If they did not, the city would be without a dumpingground in the township. The action supporting the appeal was confirmed. The complaint of Thomas Allan and others against a water closet in Queen's Park was referred to the Fair Board. Dr. Hutchinson presented a report on the meeting of the health officers

WEST HURON AND THE AP-

PROACHING GREAT CHANGE. The day after the appointment of Hon. Mr. Patterson to the Lieutenant-Governorship of Manitoba, the high tax newspaper correspondents at Ottawa unanimously united in declaring that "there will not likely be any byeelection in West Huron." After several days of reflection, the explanation is now made that what the inspired ones meant to convey to the public was that there would be no bye-election if there was not another session of Parliament.

This view of the question did not present itself to the Administration in the case of Westmoreland, N. B. There was no waiting then to see if there would or would not be another session. The election was rushed on with a hurry that betokened a courage which seems to have oozed out of the Ministerial fingertips. On Aug. 6 last, the newspapers in the confidence of the men in power at Ottawa announced Josiah Wood's elevation to the Senate. This rendered a vacancy in the representation of the constituency in Parliament. Not an hour was wasted. Nomination was fixed for Aug. 17, just eleven days after it was advertised that Mr. Wood had been appointed, and everything was over on the 24th.

In the case of West Huron, the constituency has been virtually misrepresented for a year, and all this summer Mr. Patterson has been going around with the promise of his new job in his pocket. But the men in power have given notice that the same course will not be pursued in West Huron. It is not difficult to show why. They were pot valiant in Westmoreland, cent in the last 50 years, or since the where Mr. Wood, when last elected, inauguration of trade freedom. had a majority of 2,148, and his successor came out of it with a reduction in the Conservative majority of 1,500, Where would a Government candidate be in West Huron if an election were to take place today? It would not require a reduction of the high tax majority of 1,500 or a quarter of that honestly and economically administernumber to place the constituency in its rightful position as a supporter of progressive principles and trade freedom. There can be no snap verdict in West Huron, such as the high tax managers hoped for when they rushed on the Westmoreland election-without regard to the public interest, if their argument in regard to delay in West Huron is well-founded. With but a majority of sixteen to turn, we believe the Liberal and independent electors of West Huron are waiting for an opportunity to place themselves on record with Antigonish, Winnipeg, Vercheres, and Vaudreuil, each of which constituencies, within the last three years, has been captured from the high tax defenders, and placed on the side which is now in the ascendant.

Whether or not a bye-election is held, there can be no doubt that West Huron will reverse the verdict which it gave in the bye-elections of 1892, under circumstances which are discreditable to the politicians who engineered the defeat of that stalwart representative of the populace, M. C. Cameron, With the turn of the tide in his favor, Hon. Wilfrid Laurier will doubtless secure a majority in the new Parliament. Many of the high tax candidates now hold their seats by a slim majority, and as the feeling in the constituencies that the time for a change for the better has arrived, it should not be a difficult task to turn these majorities into minorities. In Albert, N. B., as the Montreal Herald points out, Dr. Weldon had a majority of 76; in Bagot, Mr. Dupont had a majority of 53; in Brome, Mr. Dyer had a majority of 3; in North Bruce, Mr. McNeill had a majority of 30; in Carleton, Mr. Hodgins had a majority of 43; in Champlain, Mr. Carignan had a majority of 77; in Dundas, Mr. Ross had a majority of 60; in East Grey, Dr. Sproule had a majority of 19; in West Huron, Mr. Patterson had a majority of 16; In Joliet, Mr. Lippe had a majority of 60; in King's, Mr. Foster had a malority of 73; in La Prairie, Mr. Pelletier had a majority of 54; in North Middlesex, Mr. Hutchins had a majority of 6; in West Northumberland, Mr. Guillet had a majority of 55; in South Perth, Mr. Pridham had a majority of 12; in East Peterborough, Mr. Burnham had a majority of 29; in Prince Edward, Mr. Miller had a majority of 29; in North Renfrew, Mr. Peter White had a majority of 79; in Shelburne, Mr. N. W. White had a majority of 19; in East Simcce, Mr. Bennett had a majority of 16; in Soulanges, Mr. Bain had a majority of 41; in Victoria, Cape Breton, Mr. McDonald had a majority of 52; in South Victoria, Ontarlo, Mr. Fairbairn had a majority of 28; in South Wentworth, Mr. Car-penter had a majority of 1, and in East a protective tariff.—Montreal Herald

The tremendous turn-over in Westmoreland, following after a clear gain of four seats by Mr. Laurier, accounts for the extreme caution of the high tax managers in dealing with the vacancy in West Huron, and presages a great change when the men in power finally summon courage to meet their opponents in every constituency.

"St. Paul never did a better stroke of business for itself," says the Pioneer Press of that city, "than when it stripped off the rags and squalor of the rotten wooden pavements on its principal business streets, and arrayed them in a new dress of asphalt." Londoners expect to say the same thing when the new dress, now in preparation, is worn.

Yes, and there soon will come a happy time in Canada when a political party which will let trade and commerce alone, and allow them to flow in their natural channels, will be returned by a triumphant and satisfied whoop.

Petroleum has been searched for in India, but so far the work has been singularly unprofitable, most of the sources being too small in yield to pay for working, while the richer deposits are for the present too far removed from the means of transport to be commercially valuable, except in Burmah, where large quantities are now being marketed, If Canada could only discover petroleum in paying quantities in the far Northwest, there would be a good trans-Pacific demand for

LOVE FOR THE WORKINGMAN. The Dominion Trades and Labor Congress which has just adjourned, has adopted a great many resolutions which are to be submitted to the Ottawa Government. These inclue the restriction of Chinese and pauper immigration; the adoption of means to facilitate the colonization of public lands by the city unemployed; the appointment of boards of arbitration; the payment of union wages by Government contractors, etc. For many years past the workingmen of the country have been making the same demands. Their representatives, however, have been received with scant courtesy and their petitions have uniformly been thrown into the waste basket. The Ottawa Government knows only one way of showing its love for the workingman, that is by enabling

A Trip From Windsor on the C. P. R. Steamship.

How the C. P. R. Company Gets Salt From its Wells.

Wonderful Development of Upper Lake Traffic.

Savanne (72 miles west of Port Arthur, on the Canadian Pacific Railway), Sept. 4.—There is a variety of climate as well as variety of scenery in a sail from Windsor to Fort William. Essex is the farthest south county in Ontario, and its temperature is semitropical at this time of year. It certainly was so at the end of last week, and a car ride over its reach of black land made one feel and the land breeze was blowing. The Allook like a stoker. You may keep your own window down in a passenger car on a hot day, but you can't control the lady or the little boy or girl in the seat in front of you; and I always notice that when coal smoke and prairie dust fill the air the lady and the little folk are most determined on keeping their windows wide open. So at the end of your ride you look and feel like a stoker, and the best you can do is smile and bear it-hoping that the waters and the breezes of lake and river will clean and cool you before the week is out.

If you are curious to see how salt

is made you may step into the works just across the street from the station while waiting for the transfer of baggage from car to steamer at Windsor dock; but if you do it will be at the cost of being heated seven times hotter than before. Those are large salt works which the C. P. R. is carry. ing on at Windsor. The salt beds are 1,200 feet under ground, and at least 100 feet in thickness; two wells have been bored to tap them, and fresh water pumped down a pipe in one well comes up strong brine through the After standing for a day in great salting tanks, this brine is drawn off to vacuum evaporators, in which heat is applied through steam coils: and as quickly as the crystals of salt are formed they fall through a long stand pipe to be lifted by elevators to the drying kilns. From there it goes to the drum seives to be graded as cheese, dairy and table salt, and comes out through spouts ready for the packing. It is put up in paper boxes and bags of many sizes, as well as in standard barrels, and the average daily output is said to be 600 barrels, which is supplied to both seaboards over our great trans-continental line. How the employes stand the air, is a thing I cannot well understand. Twenty minutes was enough for me, and I did not cool to my comfort before Lake Huron was reached.

But I never felt the rivers and lakes from Windsor to Sault Ste. Marie as warm as they were on this trip. There was no need of wrap or overcoat; indeed the lightest of summer clothes were warm enough. Once we got into Lake Superior, however, and even before passing Whitefish Point into the wide expanse of this great inland sea. the chilling breath of the north wind was felt, wraps were in request, and the hurricane deck was deserted by all but those of warmest and richest blood.

Our good ship Alberta has every comfort, and when one considers the attractions of a sail up the lakes in a boat so speedy and so well appointed, he can but wonder that the list of passengers is so short. Yet this was her first season from Windsor to Fort William, and she may be more favored next year. If she touched at Detroit in starting she would no doubt take many, for it is an astonishment how little a man or woman living in Detroit knows of what is going on or being done across the river. But that is C. P. R. business, not mine. There may be another reason. The greyhounds of the lakes now running from Buffalo to Duluth may better suit the taste of fast American life. One of these clippers overtook us at Sarnia, although she left Detroit two hours after us, and she was seven hours ahead of us at Mackinac. Still, with all her attractions, she carried up only 200 passengers. I believe it is the fact that there are not many people out for pleasure this year, and that steamers, railways and summer hotels are all

alike complaining of a dull season. I would like to give the reader some impressions of Detroit's Island park in the river; of the canal in Lake St. Clair, with its long Venetian row of elegant cottages and club houses; of the St. Clair River, with its swift flowing waters and sloping banks; of Stag Island, Sarnia's charming park; of Mackinac Island and its white fortress on the escarpment, giving one a touch of Quebec-but I must hurry on. He might like to know something of the Sault, with its rival towns on opposing sides of the river, and of the two great national canals, now so near completion. The towns are dull enough. and are living in the hope of better

When I first saw the Sault, now 31 years ago, the towns were almost as important as they are today, I am not sure that they did not do as much business. But there was then only one canal, and it was a little one. In less than twenty years a lock then thought to be very large was built to meet the shipping wants of the lake trade, and it is said that the tonnage going through this lock from May to November is more than goes through the Suez Canal in the year of twelve months. But much larger facilities are required, for boats have sometimes to wait eight or twelve hours for their turn to pass up or down, and soon the canal capacity of the river will be more than quadrupled. The new lock on the American side, which will be finished in 1897, is 600 feet long and

80 wide. The latter will take three of the largest boats on the lakes up or down at one time, and the former will

Then on the Canadian side a great water power is being developed, and among the works which it is intended to supply is one of the largest paper pulp mills on the continent. It is astonishing how much paper pulp is being made now from the wood of our forests, and the business is increasing fast every year. But there is enough birch, poplar and spruce on the Canadian side of Lake Superior and its tributary rivers to supply the largest pulp mill in the world for many years; and when the business of grinding wood into pulp is finished there are other industries which the natural resources of this great lake region will sustain for a long time to come, giving employment to all the water power of the St. Mary's.

I have little space left to say anything of the sail across Lake Superior, and as we slept most of the way there is not much to be said. The cool night was succeeded by a warm morning, for Thunder Cape was at hand and berta reached her dock in the Kaministiquia on time, and there was a wait of twelve hours to take the train for the west. This thing might be better done, for though Fort William is a town of magnificent distances, and is joined to Port Arthur by an electric tramway, and Mount Mackay is there bald and unfinished, one doesn't find in one or all of them recreation enough for ten hours of daylight.

Concerning the ride to Savanne, I can say nothing, for it was taken in the night; but of Savanne itself and its people and the region round about it, may have much to say another time.

American Reasons for the Valkyrie's Victory.

The Defender's Defeat Attributed to "Jockeying" and an "Accident."

Fifteen Thousand Yankee Groans of Disappointment Smote the Air Because the Britisher Crossed the Finishing Line First-The Valkyrie Wins by Forty-Nine Seconds-Other Sporting Events.

YACHTING.

THE DEFENDER'S DEFEAT. New York, Sept. 11,-Close jockeying between the British and American combatants for the America's cup in the race off Sandy Hook yesterday resulted in an accident to the American boat which spoiled the race. Fifteen thousand persons on steamboats, tugs, steam yachts, and ocean steamers, sent up a groan of disappointment when the Defender was crippled before their eyes. While no one suspects the owner of the visiting yacht of such unsportsmanlike conduct as intentionally fouling the Yankee yacht, yet the way he raked his great steel boom over the deck and tere down the other fellow's rigging and then sailed away at his best pace over the course was not pleasant to patriotic Americans to contemplate. The boats, in jockeying for the line had shown some of the prettiest work that has been seen here, which resulted in the Valkyrie obtaining the windward position. As the two boats head-'ed for the line there were murmurs of disappointment in the crowd when it was discovered that the Valkyrie had the lead. Both finally approached the starting line with Valkyrie leading and to the windward of the De-Had both held their course there would have been no trouble, but the anxiety of the British skipper to get his boat over the line first and to the windward of the enemy made it a question whether he would not cross before the starting gun sounded. To prevent such a predicament the Valkyrie broke away a trifle and eased out her sheets. The main boom of the Britisher swept over the deck of th Defender, carrying away the topmost shrouds on the starboard side and tearing out the jaws of the spreader. The topmast cracked and was badly sprung. Just as the crash came the starting signal was given, and the Valkyrle sped away like a rocket. The Defender was luffed in the wind. The jib topsail lowered and the wreckage removed and Mr. Iselin decided to continue the race. Probably a couple of minutes were wasted making the repairs before the boat continued on her course. A protest flag was displayed and the committee boat showed an answering pennant. Then the Defender and crew went in pursuit of the British cut-

There was a good sailing breeze. It was a good day for the Valkyrie, but it would have been a better one for the Defender had she not met with the accident. The weakened topmast of the Defender prevented her from carrying the sail that the Valkyrie carried, and she could not keep the pace set by the Dunraven boat.

In the beat of ten miles to windward of the first turn the Valkyrie gained an advantage of two minutes and fifty-two seconds. At one time she led by fully a mile, but as the wind freshened from the six knots at the start to fifteen at the first turn and eighteen shortly afterwards the Defender, crippled though she was, began to gain.

The second leg of the race was a broad reach, and the Valkyrie used a balloon jib topsail, while the people on the Defender had to be content with a bay jib topsail. In spite of her handicap the Defender gained seventeen seconds on the second leg.

On the run home the Defender increased her speed, gaining one minute and seventeen seconds. The time allowance of the Valkyrie to the Defendor is twenty-nine seconds, and allowing for this the difference between the Valkyrie's time over the course and the Defender's time was only 47 seconds. The course was 30 miles and triangular in form-ten miles to each "leg." On the Valkyrie with Lord Dunrayen were Arthur Glennie, H. Maitland Kersey and J. R. Bush, of the America's cup committee. Lord Dunraven's daughters did not sail on the yacht. They saw the race from the deck of a steam yacht. On the Defender were

At the turns and during the race the attendant fleet gave the yachts plenty of room. The warning whistles of the patrol vessels were heeded and no serious interference with the yachts occurred at any time. At the finish there was the usual scene of excite-ment, with Americans for once saluting a British yacht. The Defender received the greater ovation of the two. Her plucky fight elicited much praise from yachtsmen. Tomorrow a new topmast will be put

into the Defender. The regatta committee stopped their boat on the way to the city, and Mr. Iselin made a verbal protest in regard to the fouling. Mr. Rush, the club representative, on the British boat, was asked by the committee to present his version of the affair. At 10:30 the folfollowing notice was posted on the bul-letin board of the New York Yacht

"The Defender protests the Valkyrie on the ground that she bore down on her just before reaching the starting line, thereby causing a foul which resulted in the carrying away of her spreader and the springing of her top-

The Valkyrle finished first at 2:55:22. The Defender was two minutes, eighteen seconds behind at 2:57:40. The elapsed times were: Valkyrie, 2:55:10; Defender, 3:56:25. The Valkyrie allows the Defender 29 1-10 seconds, and the Valkyrie started one minute, two seconds ahead.

The corrected times are: Valkyrie, 3:55:09; Defender, 3:55:56. The Valkyrle won by 47 seconds, corrected time.

NOT A BETTING MAN. New York Herald: As the statement has gone the rounds that Lord Dunraven has offered to bet \$10,000 to \$15,-000 on the Valkyrie, he was asked if it was true.

"No, it is not," he replied, emphatically. "I'm not a betting man. Why should I bet, when I know but little about my own boat, and nothing at all about the Defender? People are asking me quite frequently what my chances are, and what I think of the race. In other words, I am asked what are the relative merits of the two boats. That is an absurd question. How can I tell with my present imperfect knowledge of my own ship and my entire lack of knowledge of the Defender?" "Then the report that you were willing to wager the Valkyrie on the result of the cup races, is equally false?"

"It certainly is. As I told you, I am not a betting man. Consequently I have made no offer to wager anything." BASEBALL.

(Special to the "Advertiser.") Port Stanley, Sept. 11.-Sunday passed off nice and quiet. In the afternoon the men, off duty, dressed up and went out walking, and artillery uniforms could be seen in almost any direction, for it seemed that the men were anxious to know the geography of the country thoroughly so as to make use of it if occasion demanded. Ex-Mayor George Taylor is one of the excurds and everybody was in camp.

Monday came in cool and cloudy and

looking very much like rain, but by 10 under his personal supervision the place clock the sun shone out and gave promise of a fine day, but after dinner it clouded up again and started to rain in a way which looked like business and the afternoon mounted parade had to be canceled; but mounted parade had to be canceled; but the most successful in the history of about 4 o'clock it cleared up and the men were turned out for standing gun drill, gun the institution, so far as the exhibits are concerned. All that is now wanted the first week to be a successful in the history of the institution, so far as the exhibits are concerned. All that is now wanted laying and fuse boring exercises,

During the afternoon a large hawk flew over the camp and lit in a tree a short distance away, it caused quite a few remarks to be passed as to whether it could be shot with a rifle at the distance, when Sergt.-Major Taylor settled the dispute by taking a carbine and killing it. Quite a cheer was raised when it fell to the ground, and when picked up it was found that the bullet had passed fairly through the body, distance between 150 and 200 yards. If the gunlayers do as well as this at ranging it will go rather hard with the targets.

Inspection is expected on Wednesday and will consist of marching past, field maneuvers, question to officers, non-commissioned officers and men, and shell practice at targets out in the lakes.

The men are enjoying splendid health. Not one has yet reported sick, nor has their been any complaint as to rations. It is quite apparent that Lieut. Shaw-Wood has lost no time, while at the School of Gunnery, by the easy manner in which he

handles the battery, when in command. He keeps them good and busy on the field and shows everybody that field artillery exercise is no play. A cooks' parade was organized this evening and Sergt. Grant was elected Cooks' General-in-Chief. Several musical instruments were produced. The cooks dressed up in fancy costume and a regular concert

and side show was given. After a short march they were entertained by Dr. C. S. Tamlin, V. S., who supplied them with a cordial for their broken wind and by the colonel who wet their whistles. They were dismissed after three cheers for the officers.

TOO MUCH FOR METHODISTS. Kier Hardie's Defense of the Chicago Anarchists Creates a Storm of Disaperoval.

Chicago, Sept. 9.—Kier Hardie, the English labor leader, disturbed the usually sedate weekly meeting of the Methodist clergymen yesterday by redhot Socialistic appeals. Hardie had been invited to address the ministers, and with several local Socialists attended the meeting, The Englishman proceeded to air his views, loudly applauded by his friends, and finally bitterly denounced the execution of the Chicago Anarchists and eulogized them as pioneers in the new religion.

The storm which greeted this statement almost carried Hardie off his feet. Half a dozen ministers at a time bitterly denounced the sentiments expressed and the speaker was compelled to sit down. The ministers then proceeded with a scathing denunciation of tht sptech and the speaker and Hardie left much offended.

STEERS ON A DRUNK.

A Herd of Kansas Cattle Eat Rotten Apples and Cut Up High Jinks.

Fort Scott, Kan., Sept. 11 .- A herd of Texas steers, literally intoxicated on the fermented juice of rotten apples, is an emergency not contemplated by the authors of the Kansas prohibition law and its several amendments; yet such a spectacle was recently witnessed by the chief of the metropolitan police force of this city and the sheriff of Bourbon county, who have explicit instructions from the executive department of the State to rigidly suppress the use of intoxicating liquor by the people of their respective jurisdictions.

Patrick German, an extensive stock feeder, a few days ago shipped to his ranch, ten miles northwest of this city, a herd of wild steers from the plains of Texas. During their first night on a Kansas ranch they stampeded through the line fence of the pasture into an orchard on the Alf. Cleal farm. The prolific fruit season had made it unprofitable for Mr. Cleal to gather but a small per cent of his early apples, and the burdened trees had dropped their ripened fruit to the ground full three layers deep. The apples had rotted and were in a state of fermentation that makes them a most intoxicating feast for cattle. Until the next morning the beasts glutted themselves, and were found in a condition of inebriety that caused them to conduct themselves in that boisterous hilarity in which a man wont to indulge when overcome by

the effects of Kansas "applejack." The effect of the fermented apple juice was as various in the cattle as it would have been in as many men. Some of them bellowed and contorted in drunken debauchery, others were on their muscle and dangerously victous, while some of them lay helpless and harmless. Their demonstrations atconsists of a yoke shape or arch bar fastened | tracted the neighbors for miles about,

and when the facts became known in town crowds of people drove out to witness the revelry of a "steer beer garden." They were rounded up and corraled with much difficulty by a score of experienced cattlemen. Not unlike human drunkards, the effects of the dissipation on some passed off soon, while others were in the "sobering up"

Process for two days."

Western Fair of 1895 Will Soon be Under Way.

Radical Change Promised in the Main Building.

The Grounds Never Looked Prettier-Exhibits Promise to be Unrivaled -Ferris Wheel-Notes.

Tomorrow (Thursday) the Western Fair will be nominally opened by a meeting of the directors of the Fair Board at the offices on the grounds at 10 a.m. From that time until after the close of the Fair the down-town office will be vacated, and the large staff of clerks, under Thos. A. Browne, transferred to the grounds. The opening tomorrow will only be formal, and the day will be principally spent in getting the exhibits in shape. By Saturday, however, it is expected that the oldest Fair in Canada will be in running order. Children will be admitted to the grounds and stands on this

day for 10 cents. For several days past a large gang of men have been busily engaged under the direction of Superintendent Hook putting the grounds in shape. Today the influx of a small army of exhibit-ors and exhibitors' builders make the scene a most animated one. Hardly ever have the grounds presented a cleaner, neater, appearance, and the horse and cattle stalls fairly glimmer in a shine of white. Paint has been administered with a liberal hand, and

the busiest men on the grounds, and is rapidly assuming a Western Fair

appearance.
Things have reached the stage when the secretary is able to state with accuracy that the Fair will be one of

is fine weather. There have been many radical changes in the allotment of space in the main building, and as a result the appearance will be varied considerably this year. Every inch of space is taken. The Agricultural Hall and Horticultural Hall will afford magnificent displays. Both have been filled up completely with the choicest products Mother Earth has afforded this season. The cheese exhibit is easily in advance

of previous displays. Secretary Browne has sent away \$400 worth of railway tickets to the various people and organizations who are to afford special amusement in the horse after visitors have inspected the main departments.

The specialties are numerous. The Wild East combination, which is said to include 50 artists, together with horses, camels and donkeys, will give decidedly unique performances, and is described as "Arabia transported to London." In the way of balloon ascensions something new is offered. Alvini, the balloonist, will allow himself to be fired from a canon in mid-air, when by a daring leap he grasps the parachute that is to bear him safely back to terra firma. In the way of the comic the Partellos promise plenty in "Celestial pastimes in a laundry." Ajax, the champion high diver of America, will repeat performances that were the wonder of thousands at Barnum & Bailey's circus. Samson, the strong man, and Martella, a swinging wire artist, are also included. On Tuesday, Wednesday and Thursday evenings magnificent pyrotechnic displays will be given under the direction of Prof.

NOTES. A large ferris wheel is being erected at the southwest corner of the main building. From the cages people will be able to look over the roof of the main

building. The barber shop and telegraph offices will be again found south of the main building.

The fish pond has been cleaned, the

fish given a bath and the teeth of the wooden alligator repainted to give it a ferocious aspect. Capital arrangements have been made for the provision of band music.
The pony race, in half mile trots, will

be a feature of the speed department. At present the Grove Methodist Church is the only religious establishment which has arranged to run an eating booth.

Friday will be the first day on which

an admission fee to the grounds will be The buildings will be lighted with electricity Wednesday evening to allow exhibitors to get their goods in shape. The buildings and grounds will

be lighted by 112 electric lamps. The turnstiles are being placed in position today. A fence has been built around the electric car loop that runs into the grounds, and wickets and turnstiles placed in position there also. Superintendent Hook threatens to

summons a man named Martin who is alleged to have broken open a gate, destroying the lock and staple, for the purpose of taking a short cut through the grounds.

The work about the grounds has been a boon to many of the laid-off car shop

Important Meetings of Ontario Bodies and Resolutions Passed. WESTERN DAIRYMEN.

The Board of Directors of the Western Dairymen's Association met in To-ronto on Tuesday. There were present: A. F. Maclaren and Hon. T. Ballantyne, Stratford; J. S. Pearce, London; Harold Eagle, Attercliffe Station; J. N. Paget, Canborough; John Cram, Harriston; H. White, Hawkesville; George L. Robertson, Lucknow; and J. W. Wheaton, secretary, London. In the absence of the president, Andrew Pattullo, Woodstock, A. F. Maclaren, first vice-president, occupied the chair.

Messrs. Duke and Gibbons, of East Parry Sound, addressed the board in reference to dairying in that section of the Province, and requested that the association would endeavor to supply them with information regarding the best method's of carrying on home dairying. Help will be given.

Arrangements will be made for holding a joint meeting with the Sheep and Swine Breeders' Association, in connection with the fat stock show at Guelph in December next.

Arrangements will be made for more

At a meeting of the Ontario Creameries' Association and of the Eastern and Western Dairymen's Associations the following resolution was adopted on the motion of Mr. T. Ballantyne, Stratford, seconded by Mr. E. Kidd, North Gower, president of the Eastern Dairymen's Association, strongly denying the truthfulness of the statement circulated in England to the effect that Canadian cheese are adulter-

An interesting discussion took place on a motion by Mr. A. F. MacLaren, Stratford, seconded by Mr. Kidd, North Gower, in favor of a union of the Creameries Association with the two Dairymen's Associations. The resolu-

tion was withdrawn. THE BUTTER TRADE. The Ontario Creameries' Association unanimously passed this resolution: "That this association strongly urges all creamery men to put their butter on the market while fresh and in its best condition. We find that great injury has been done to our Canadian creamery butter by persistent holding in imperfect and unsuitable places for its storage, which has been amply de-monstrated by account sales received, and by the most satisfactory reports of the quality of fresh butter forwarded in refrigerator cars and refrigerator compartments on steamers, generously provided by the Dominion Government during the past season."
It was resolved that the annual convention should be held at Cornwall on

Jan. 14, 15 and 16. FRUIT. At the annual convention of the Fruit Buyers' and Exporters' Association yesterday, A. E. Peterson, Toronto, was elected president. Mr. Shuttleworth, city, is a member of the executive. A committee was appointed to wait upon the general district freight agent of the Grand Trunk with regard to freights on apples shipped for storage. In consequence of a discussion over a communication from Mr. L. Woolverton, of Grimsby, suggesting that

apples should be graded, a committee was appointed to consider the question and the probability of obtaining from the Dominion Government powers compelling the grading of the fruit. THERE IS NOT a more dangerous class of disorders than those which affect the breathing organs. Nullify this

danger with Dr. Thomas' Eclectric Oila pulmonic of acknowledged efficacy. It cures soreness and lameness when applied externally, as well as swelled neck and crick in the back; and, as an inward specific, possesses most substantial claims to public confidence. Prof. Saunders reports that the fruit growing industry of British Columbia has developed rapidly. The cultivation of plums has extended there more than any other kind of fruit, and the apple crop is very good.

DYSPEPSIA AND INDIGESTION. C. W. Snow & Co., Syracuse, N.Y., write: "Please send us ten gross of Pills. We are selling more of Parmelee's Pills than any other pill we keep. They have a great reputation for the cure of Dyspepsia and Liver Complaint." Mr. Charles A. Smith, Lindsay, writes: "Parmelee's Pills are an excellent medicine. My sister has been troubled with severe headache, but these Pills have cured her."

A HORRIBLE ACCIDENT.

Caisson Explodes in a Louisville Street -Six Soldiers Killed.

Louisville, Ky., Sept. 11 .- A horrible accident, resulting in the death of six and the wounding of several members of the Louisville Legion, occurred shortly after 5:30 this morning by the explosion of a caisson. The accident occurred on Broadway between Third and Fourth strets where the First and Fourth strets, where the First Kentucy Artillery were stationed for the purpose of firing the morning sa-

Eye-witnesses to the shocking accident say that the explosion was caused by dropping the caps on the friction primer of the piece. The gun wal mounted directly in the center of the street, pointing towards Fourth ave-nue. Two of the bodies were blown over the house tops and were horribly mangled. The wounded have been removed to the hospitals. Their names are not obtainable at this hour. Two horses attached to the canon were horribly mangled, and they will be killed. All the killed were members of the First Kentucky Artillery of Louisville, which has always been considered the finest

A LIFE SAVED .- Mr. James Bryson Cameron, states: "I was confined to my bed with inflammation of the lungs, and was given up by physicians. A neighbor advised me to try Dr. Thomas' Eclectric Oil, stating that his wife had used it for a throat trouble with the best results. Acting on this advice, I procured the medicine, and less than a half-bottle cured me; I certainly believe it saved my life. It was with reluctance that I consented to a trial, as I was reduced to such a state that I doubted the power of any remedy to do me any good,"

LOOK OUT FOR THE TROLLEY. The question that is agitating the mind of Manager Carr of the street railway company just now is when he will be permitted to operate the first electric car. The question which is agitating the mind of the city engineer is what shape the road should be in before the permission is granted. "It all rests with the city engineer now," said Manager Carr today.

"I intend to inspect the line tonight in company with Mr. Carr," said Engineer Graydon. "I will go over it again in the morning, but it is not likely that any cars will be operated in the marning." If the company can clear the sides of the street and pave the approaches to

the track by tomorrow noon the clang of the gong will probably be heard tomorrow afternoon. The steam barge Dominion arrived

The anniversary of the Colborne Street Methodist Sunday school was observed on Monday evening. A splendid programme was provided and among those who took part were: Mr. H. R. and Mrs. Macdonald, Walter Crawford, Frank Harris, Vera Scarrow, Florence Gaze, Lena Hance, Ella Stephenson, Mildred Garner, Bertha Flemming, Edith Stratton, Mabel Elms, Georgina Hance, Amelia Martin, Florence Haystead and May Gardhouse, Dialogues by Miss Pratt's and Miss Woonton's classes, with floral decorations and the kindergarten selections, under the superintendence of Miss Alva Boyd, were much admired. The secretary's report disclosed a very floroushing state of affairs. The largest attendance was on Feb. 17, being 305; average attendance of Sabbath officers, 5; teachers, 24; girls, 118; boys, 94; visitors, 12. Total 253. Average gain over last year, 9; average recitation of verses, girls, 157; boys, 87. Total 244. Officers' collection during the year, \$11 75; general, \$144 50. Total \$156 25. Increase over last year of \$37 43. In order to accommodate the increased attendance six new class rooms have been constructed in the galleries, at a cost of about \$200. This expense will be repaid by the Epworth League and Sabbath school. During the evening subscriptions to the amount of \$30 were secured in aid of this much-needed improvement.

HON GEORGE ROSS

Visit of the Minister of Education to the London Separate Schools.

Interesting Account of What He Saw and Heard.

The Catholic Record of this week gives an interestitng account of the vîsit of Hon. George W. Ross, Minister of Education, to the separate schools of this city, while he was here the other day. The report says: "He was accompanied in his visita-

tion by Rev. M. J. Tiernan, chairman of the separate school board, and Rev. Fathers Noonan, McCormack, Valentine and Mckeon. There were also present, School Trustees McNeil, Pocock, Hanavan, LeBel, High School Trustee Murphy, Thomas Coffey, John Pocock and H. Beaton. The honorable Minister first visited the senior boys' room of St. Peter's school, where he was warmly welcomed, on behalf of the teachers and trustees, by Rev. Father Tiernan, and a few well chosen words were spoken by Master Fred Bricklin on behalf of the school children. He also presented a bouquet. Hon. Mr. Ross spoke to the boys about fifteen minutes, his remarks being most appropriate, practical and pleasant. The replies of the pupils to the questions of the honorable Minister were for the gently. The remainder of the children were grouped in another large room which the honorable Minister afterwards visited. Little Edna Pocock presented the distinguished guest with bouquet, and Violet LeClear recited appropriate words of welcome, in the name of their companions. Here, also, was given evidence of efficient work. The party then drove to the Sacred self in the warmest terms as to the efficiency of the separate school pupils. He was likewise much pleased to note the first-class condition of the schools; they are commodious, well lighted and well ventilated.

"When so much is now said by opponents of the separate schools in regard to their inefficiency it is pleasant to note from time to time, as in this instance, that the accusation is without foundation in fact, and we have no doubt that the London separate schools will be found equal to any of the public schools in the Province in the matter of efficiency. The nuns, who have complete control of our schools, deserve much credit for their earnest and painstaking endeavors. Their hearts are in their work, and evi-dences of its efficiency are to be seen

in every school in the city.

Having concluded his visit to the eparate school in connection with the Sacred Heart Convent, the Hon. Mr. Ross and the party accompanying him were escorted through the acad-emy by the lady superior. Here was found evidence of a first-class educational institution for young ladies."

The Record highly praises this insti-A very determined fire broke out last tution of learning, and concludes: "We evening in an old story and a half frame feel that it were superfluous to say aught of the superior educational advantages given young ladies by the and St. James streets, owned by Mr. Wm. nuns of the Sacred Heart. I seemed to think could, but O, the horror of leaving her there with her tell-tale face and open, accusing eyes! That was too dreadful. I must hide this awful picture of myself somewhere; but where? Glancing towards the alcove, my eye fell on a heap of clothing I had torn down from the closet-pegs in my hurry in dressing. I would bury her under those, and I did. For I was sure I heard steps bove me, and if this were true, then Genevieve had come to life again, for no one else could be there since I had locked the door when I came out, and had the key concealed in my bosom, "So intent was I upon leaving my post, that I had turned partly around, when I saw, crossing the doorway from the front vestibule, the form and face of a man whose presence at once awoke in my terrified heart a distinct feeling hope. They were those of Julius Molesworth.

"He was heavily muined, and his coat collar was drawn up about his ears, but I knew him at once, and without stopping to ask what errand had brought him to this fatal spot, I hurried away from my bridegrom, and accosted the intruder just as he was about to enter where I was.

A Beautiful and Brilliant Girl.

Beauty, robust health, social prominence and all that makes life bright on street. Her nearest friends could not imagine what caused the tokens of anguish that furrowed o'er the once smooth and roseate countenance, When almost in despair she happened to see one of those "horrid newspaper advertisements" of Dr. Pierce's Favorite Prescription, which said it was a remedy suitable to her case. Without consulting her physician or anybody else she got the medicine of a druggist, took it, and in three months' time she was well of all her troubles. All pains had ceased, she was herself again, and shortly resumed her place as leader of her chosen circle. Her experience is that of thousands. Why may it not be yours?

The Marquis of Lorne, in his new guide to Windsor Castle, says there are several underground passages leading into the castle, but their where-

abouts is a state secret. Worms cause feverishness, moaning and restlessness during leep. Mother Graves' Worm Exterminator is pleasant, sure and effectual. If your druggist has none in stock, get his to procure it for you.

The observatory at Pekin is said to be the oldest in the world, having been founded in 1279 by Kubla Khan, the first emperor of the Mogul dynasty. No one need fear cholera or any sum-

mer complaint if they have a bottle of Dr. J. D. Kellogg's Dysentery Cordial ready for use. It corrects all looseness of the bowels promptly, and causes a healthy and natural action. This is a medicine adapted for the young and old, rich and poor, and is rapidly be-coming the most popular medicine for cholera, dysentery, etc., in the market. Interesting Visit of the Canadian Divine in the Isle of Wight. The many friends in Western Ontario of Rev. Dr. and Mrs. Dewart will be glad to hear that their health has been greatly improved by their trip to Britain, whither Dr.

Dewart went as the delegate of the Canadian

Methodist General Conference to the Methodist Conferences in the Motherland. Of an interesting episode in their stay in the Isle of Wight, Dr. Dewart thus writes to Rev. Mr. Courtice, editor of the Christian Guardian: "While in Sandown we had a pleasant surprise by a visit from Mr. Geo. Cox and Mrs. Cox, who spent three days with us. We went with them to several points of interest, such as Blackgang Chine, East Cowes, near which Osborne Castle is situated, and also Whippingham Church, where the Queen goes to church during her residence at Osborne, when she goes any place out of the castle. But the greatest interest attaches to our visit to a bazar that was opened by Princess Beatrice in that historic old ruin, Carisbrooke Castle, where Charles I, was for a time a prisoner. We found out at Newport that Her Majesty the Queen would leave Osborne at five o'clock to visit the bazar. Sure enough, about six 'clock, her carriage, drawn by gray horses, came slowly up from the castle gate, passing up through the lane which the people left open. The carriage stopped just opposite Princess Beatrice's stall, where Mr. Cox and I had taken up our position (our good ladies were not far off). As the carriage stopped she raised her veil. She spoke some words of praise of the articles shown her, and purchased some. We were near enough to have shaken hands with her, had she thought proper to extend "the right hand of fellowship" to two loyal Canadians. But even without this favor, it was quite an event to look in the face and hear the words spoken in conversation by the Queen of England and Empress of India. The Princess of Wales sat beside Her Majesty, and the Princess Victoria occupied the front seat; but all our interest was centered in the grand old lady who for 57 years has swayed the scepter over the mightiest empire on the face of the earth. The historic associations of Carisbrooke Castle, the brilliant gathering of distinguished people at the bazar, and especially the gratification of such a

near view of Her Majesty and other members of the royal family, made the occasion a red-letter day for the Canadian visitors."

Canadian Millers Condemn the Action of the Dominion Government.

A BAD MIX.

Toronto, Sept. 11.—At yesterday's meeting of the Dominion Millers' Assosiation the most important question that came up was the question of mixing inferior wheat with No. 1 hard at the Fort William elevators, and emphatic opinions were expressed on the subject. The recent action of the Dominion Government in rescinding the order in council prohibiting this mixing was condemned very vigorously, both by speech and resolution. It was claimed it would mean ruin to Manitoba and to the reputation of Manitoba wheat with the English millers, as well as great injury to the millers and exporters in Ontario. Charges were freely made that the change had been made purely to please certain influential parties, in reckless disregard to the interest of the country farmers, millers and exporters. None of the numerous speakers offered any defense of the course taken, and the reso-

Hamilton, Sept. 9 .- A very large increase has taken place in the sale of the scientific remedy for complaints of the liver, and Dodd's Kidney Pills are in great demand. There are no complaints either from druggists or the public. The druggists being so near Toronto, the headquarters for distributing, are never in any danger of running out of the medicine for long no matter how large the demand may be, and the public has long been thor-oughly satisfied as to the valuable qualities of the pills, and the manner in which they invariably effect a cure.

Reputable medical men will rarely allow their names to be published, indorsing any special form of medical treatment. Often, however, there may be found at Lakehurst Institute, Oakville, members of the "noblest of the professions" who, being but human, have themselves fallen victims to alcohol. One of these recounts his experience and observation thus: "From my own case and others I have observed, I have no hesitation in saying that your method of treatment is eminently successful. I was greatly surprised to see men of 50 years and over who had been for many years addicted to the excessive use of alcohol, in the course of five or six days eating heartily, sleeping well, with no more desire for alcohol, and with a feeling of mental and bodily vigor not experienced for years—this I consider really wonderful." We might add that these results are mainly due to the care and udgment exercised in each individual case intrusted to us—features seldom discoverable in other institutions having similar objects. What is

CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhœa and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Case toria is the Children's Panacea-the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children." Dr. G. C. OSGOOD,

Lowell, Mass. " Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium,

agents down their throats, thereby sending them to premature graves." DR. J. F. KINCHELOE.

Castoria.

"Castoria is so well adapted to children the I recommend it as superior to any prescription

> H. A. ARCHER, M. D. 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."

RESULTS PROVE MORE THAN ES-Mr. A. N. Udy, well known in Lon-

don as a most reliable and painstak-ing insurance agent, has been appointed city agent for the Ontario Mutual Life Assurance Company, and now occupies their office in the C.P.R. building. As those procuring life or endowment policies wish to select the company which gives the best returns to policy-holders, it will be to the interest of intending insurers to consult Mr. Udy before placing their ap-

plications elsewhere.

The following letter is appended to support the claim that the Ontario gives the best returns of all the companies doing business in Canada. Mr. Dell's reputation as a successful man-ufacturer of organs and pianos, and as a shrewd business manager, gives

the more importance to his letter. In the comparison of Mr. Bell's let-ter, it should have been stated that the Equitable's premium was \$220 98, and the Ontario's \$196 92. No account was taken of the interest on the annual difference in premium, which would make the result still more favorabe to the Ontario.

Guelph, March 26, 1895. Wm. Hendry, Esq., manager the On-tario Mutual Life Assurance Company, Waterloo, Ont .:

Dear Sir,—I beg to express my en-tire satisfaction with policy No. 5,625, issued by your company in 1880 for \$3,-000, on the fifteen-year endowment plan, at age 47, annual premium \$196 92.

The premiums paid, less dividends, amount to \$2,472 39, so that I have received \$527 61 more than I paid, besides fifteen years' insurance.
It may be interesting for you to know that I had an exactly similar policy in

the Equitable, of New York. The result of that policy is as follows: Value of policy and bonus ad-Value over cost\$ 313 30

Your company's policy was worth over cost 527 61 Difference in your favor\$ 214 31 Yours truly.

That's what the boys of London and vicinity are doing now, and during the rainy weather and munny streets at this time of the year, they need a first-class article in footwear to meet the emergency. Bad shoes and wet feet go together, with sickness treading on their heels and the toys making tracks for home instead of school. Our school shoes are durable, waterproof, well fitting, warm and comfortable. Keep his mouth wet and his feet dry and a boy will always thrive. This latter end will be provided for by buying a pair of these shoes; they will cost less and wear longer than any other shoe offered this season. Secures the harmonious action of each of the organs. It establishes throughout the entire system functional harmony, and supplies the blood vessels with a pure and healthy current of new life. The skin, after a few days' use of the Crown Remedy becomes clear and heautiful—pimples, blotches, black spots and skin eruptions are removed, sores and ulcers soon cured. Persons suffering from scrofula, eruptive diseases of the eyes, mouth, ears, legs, throat and glands, that have accumulated and spread, either from uncured diseases or mercury, or from the use of corrosive sublimate, may rely on a cure if the Royal Crown Remedy is continued a sufficient time to make its impression on the system. \$1, pills 25c., or 5 bottles of Remedy and 5 boxes of Pills for \$5, from druggists, or sent by Isaac Williams Company, London, Ont.

LONDON'S TRADE PROSPECTS. Trade prospects for the western part of the Province seem to be very fair. Crops have been better than was expected, and though apples and a few other products have been low in the average, the bulk of what is grown has not been disappointing. The London wholesale houses have been reasonably busy, and state that collections are better than was expected, and that the volume of trade will equal or exceed that of last year. The retail trade, however, of the city has been rather demoralized during the past month, and will be for the next two, owing to the street railway system being

electrified and extended, and the asphalting of eight or ten of the principal blocks of the city. These needed improvements will bring London well abreast of its eastern competitors for commercial position, as it is the natural distributing center for a wealthy contiguous agricultural district .-R. G. Dun & Co.'s Daily Bulletin, Sept. 10.

OFFICERS OF THE SANGERBUND. Toronto, Sept. 11 .- At the second day's meeting of the great Sangerbund they revised the constitution, settled the next place of meeting and elected the following officers: President, Karl Muller, Berlin; first vice-president, C. Zeidler, Toronto; second vice-president, W. Kroft, Hamilton; third vice-president, C. Ritterhause; secretary, Adolph Glasser; treasurer, M. Grebenstein, Berlin. Berlin was selected as the next place of meeting.
