

46TH. YEAR. NO. 19590

THE ADVERTISER, LONDON, ONTARIO, MONDAY, FEBRUARY 15, 1909.—TEN PAGES.

PRICE TWO CENTS.

A ROMANCE AT LAMBETH WITH BLIND MAN FOR LOVER

Alleged Elopement of a
Woman Under Strange
Circumstance.

LEFT SECOND FOR
FIRST HUSBAND

Mrs. Devine Had Been Married
in Her Youth to the Blind
Man.

A strange story of romance, re-
sulting in the elopement of a woman
with a blind man, has come to light
in Lambeth, although the fact has
been kept quiet for some time.

"Tommy" Devine, a sectionman on
the Southwestern Traction Company,
living at Lambeth, had a rather
pretty wife, and three children. He
was a quiet, hard working man, and
had secured certain property, valued
at something over \$1,000. This, at
the solicitation of his wife, he put in
her name. They lived happily to-
gether, and so far as could be seen
were as contented a couple as could
be found.

Lothario Enters.
Late last fall there came a visitor
to Lambeth, a blind man by the name
of Baker. He lived there for some
days, and as he seemed a very good
sort of chap, he was well treated by
the neighbors. He was a piano player,
and as there was a piano at
Devine's home he was invited to
spend the evenings now and then
there, where he entertained them on
the instrument.

Then he stayed a week in the
house, then two weeks, and another
week he had lived six weeks in
Devine's home.

Was Her Husband.
Finally there was some talk, which
came to Devine's ears, and he asked
his wife what it meant, and why
Baker was staying there. By some
chance or other Baker came to the
house, and immediately met Mrs. De-
vine. He then told her that they
were legally married, as the divorce
he had obtained years ago was legal.

Devine asked her if she intended to
live with Baker, and she said that as
his legal wife she intended to do so.
She offered to leave Devine if he
would give up the children, and as
the property was in her name, she
would dispose of that. But Devine
would not give up the children and he
would fight for the property.

Locked Out.
Things went from bad to worse, and
at last when Devine refused to home
one evening from his work he was
locked out.

He got a constable and was told
that he could not go into the house,
as it did not belong to him at all, but
to her.

A trace was patched up between
them, and Devine continued to live
there, although conditions were far
from satisfactory.

In the meantime Mrs. Devine had
been trying another tack. She came
to the city, and endeavored to get a
mortgage on the property. Devine
heard of it, and obtained an injunction
restraining the woman from
completing the deal.

Have They Elope?
This brought matters to a climax.
One day Mrs. Devine and Baker came
to the city on a traction car. Whether
or not they had sent their clothing
on ahead of them or not is not known,
but anyway they seemed to have no
clothes when they got on the car, and
when Devine returned at night the
woman's clothing had disappeared.
Also, since then the couple have not
been seen, and it is alleged that they
have eloped.

A Strange Story.
The three children are still with
their father, Devine, and he is caring
for them. The mortgage on the prop-
erty was not consummated.

It is a very strange story, and has
caused not a little talk in the neigh-
borhood. Devine is spoken of as a
hard-working, industrious, kind-
hearted fellow, and he has the sym-
pathy of the neighbors.

Baker had two names, but that was
the one generally used. He is a
smooth chap, and seemed to have the
woman under his power. He told
little of himself, save that he was an
American. He can play the piano re-
markably well.

A Local Case.
The following local case was in
court in Toronto Saturday: Hyman vs.
Canadian Pacific Railway, Walrond
(MacMurchy, K.C.), for defendants,
moved on consent for an order dis-
missing action, without costs. Order
made.

ENGINEER BLACK DEAD AT FERGUS

Formerly Employed on the C.
T. R. Here—One of Those
Who Went to Costa Rica.

Mr. J. E. Keenleyside, secretary of
St. John's Lodge, 208a A. E. and A.
M., has received a telegram from
Fergus, Ontario, announcing the death
of Mr. Sidney Black, a locomotive
engineer, who formerly worked in this
city.

The deceased had only been ill a
short time and his death was quite
unexpected. He was unmarried, and
resided with his mother.

Some time ago he went to Costa
Rica with a number of men from this
city, but returned broken in health.
He was about 35 years of age and
had a large circle of friends who will
deeply regret his untimely demise.

The funeral arrangements have not
been decided upon as yet.

TOY FACTORY IS IN FULL SWING

Labor Men Will Soon Be Ready
to Sell Goods.

The toy factory on Clarence street
is now well under way. All of the
machines have been received, and are
now in operation. There were six
men busily engaged this morning con-
structing the chief product, which is
the toy locomotive. They are being
turned out fast and a good stock will
soon be ready for sale purposes. It is
thought by the superintendent that
next Wednesday will witness the pro-
ject in full force. The mechanics
employed there at present are mostly
timbermen and carpenters.

TWO LADIES HAD NARROW ESCAPE

Street Car Struck Their Rig and
They Were Thrown on
the Rails.

Mrs. W. K. Newton, of Salford, had
her collarbone broken on Saturday
evening about 9 o'clock, and her
young daughter Alwilda was painfully
cut and bruised when their rig was
struck by a Dundas street car at the
corner of Maitland and Dundas streets.

That they escaped with so slight in-
juries is remarkable. Mrs. Newton
was removed to the residence of her
brother-in-law, Mr. T. L. Newton, 54
St. George street, and will be taken
to her home during the week.

Mrs. Newton's wife and daughter,
had driven east on Dundas street and
had stopped the surrey in front of the
butcher shop near Maitland street. It
went inside to make a purchase, hand-
ling the reins to his wife, who with
her daughter, was sitting on the rear
seat.

Horses Became Frightened.
A Dundas street car, driven by Motor-
man Rogers and Conductor McDonald
was going west. As the car neared the
horses they became frightened, and
commenced to back. Mr. Newton
rushed out of the door to stop them,
and although he seized them by the
bridles they had backed over the car
tracks, with the result that the car
struck the surrey.

The rig was overturned, and Mrs.
Newton and her daughter were thrown
out.

Motorman Rogers made every ef-
fort to stop, but the car hit the rig
with considerable force. Mrs. New-
ton struck on her shoulder, breaking
her collarbone.

A Narrow Escape.
Mrs. Newton, who was nearest the
trolley, was thrown out and it was
feared she would be run over and cut
to pieces, but after being dragged
some distance she was picked up and
carried into a drug store. It was
found that while she was considerably
bruised, and her face was scratched,
but no bones were broken and there
were no internal injuries.

Mrs. Newton was taken at once to
the home of her brother-in-law, Mr.
T. L. Newton, and her arm bound up.
She was very nervous from the shock,
but it is expected that no complica-
tions will set in.

The rig was damaged slightly. The
windows of the trolley car were
broken and the fender bent consid-
erably.

ENDED LIFE IN JAIL.
North Augusta Woman Found Her
Daughter in an Outhouse.

North Augusta, Feb. 14.—Mrs.
Joseph Fowler, of this place, com-
mitted suicide at noon today by hang-
ing. She had been helping her daughters to
wash dishes, but left them and went
to an outhouse. Her daughters be-
coming alarmed went to look for her
and found her suspended from a beam
head. She had been recently in the
Brookville Asylum.

LONDON PEOPLE MAY BE HEIRS

To an Immense Fortune Alleged
To Be in England.

TWO LADIES
BEING SOUGHT

Once Resided in Hamilton, But at
Present It Is Impossible to
Locate Them.

[Special to The Advertiser.]
Hamilton, Feb. 15.—The Spectator
says:

An effort is being made by Mrs. W.
G. Walton, who resides on the moun-
tain near the James street incline, to
locate two women named Page, who
the daughters of one Henry Page, who
she thinks can claim a share in an
enormous estate in England, estimat-
ed to be worth \$750,000,000. Already
about 50 persons believed to be
heirs to the vast fortune have been
located.

The Claims.
The basis on which the claims are
made is that in 1829 Henry Page died
in Marble Arch, Middlesex, England,
leaving a large and valuable tract of
real estate. The direct heirs were
widely scattered, and the estate was
never wound up. As no clear deed to
the property could be discovered, at-
tempts to dispose of the property
proved futile. Some time later, how-
ever, the land was leased for 99 years.
The lease still has 21 years to run.

The First Move.
The first move towards winding up
the estate was made a few months ago,
when an Australian laid claim to "the
whole property as the heir of Henry
Page. A Boston lawyer, who heard of
the case, unearthed about 50 more
claimants in Canada and the United
States.

As the law stands the estate will be
divided equally among all who can es-
tablish their claims. The important
point for the Canadian heirs to prove
is the Christian name of their grand-
father Page, who died in St. Thomas
and was buried in the old Engle-
bury cemetery there in 1860. Some say it
was Jonas Page, while others claim it
was William Page.

Resided in Hamilton.
The two girls named Page, who Mrs.
Walton is interested in, resided on
Hudson street, opposite the fire sta-
tion, in 1907, but they left there, and
nothing has been heard of them since.
The father of the girls was known to
her as "Late." She said that there was
only a nickname. The women are
about 40 years of age. Chisholm &
Logie are acting for Mrs. Walton and
advertisements are being placed for
information as to the whereabouts
of the Misses Page. If they are
located, their whereabouts will be
traced, and an effort made to estab-
lish a claim to the great fortune.

The Probable Heirs.
Those believed to be heirs, as now
located are: One named Page, re-
siding in Saginaw, Mich.; one in
St. Thomas and London, and quite
a few in Bothwell. The St. Thomas
heirs include Mrs. William Page, who
lives in St. Thomas, and daughter,
Valerie; Byron Knight, two sons
and a daughter. The Bothwell heirs
are: Misses Susan, Mary, and
Edith; Mrs. Charles Galloway, Wm.
Ellwood, Mrs. Minerva Sussex, Clav-
ton B. Sussex, Mrs. Samuel Marcus,
Arthur Sussex, Wesley Sussex, Alfred
Sussex, Mrs. L. McColl, Miss Ferns
Sussex, Miss Ethel Galloway, Miss De-
la Galloway, Miss Lottie Galloway,
Mrs. N. K. Cornwall of Thamesville,
Mrs. Thos. Reynolds, Chas. Galloway,
J. Geo. Galloway, Mrs. L. Galloway,
J. Geo. Young, Roy W. Young, First
Young, Miss Helena Young, Mrs. Han-
nah Burr, of Detroit; Oran Ellwood,
of Detroit; Mrs. Archie Patterson, of
Bothwell; Mrs. William Pop, Mrs.
Wesley Ellwood, Miss Hattie Ellwood,
Miss Maud Ellwood.

Other heirs are: Mrs. Wm. Frank
and Mrs. D. D. Campbell, of Filmore,
Sask.

BOARD OF HEALTH QUITE SARCASTIC

Reply Made to the Grand Jury's Pre-
sentment Regarding Smallpox
Hospital.

In acknowledging the receipt of the
grand jury's presentment regarding
the smallpox hospital the board of
health practically requested the au-
thorities to take the beam out of their
own eyes before beginning to worry
about a note in theirs. Their reply
is as follows:

"At a meeting of the board of
health, held on Feb. 9, 1909, Dr. Niven,
chairman of the board, presented the
report of the grand jury.

"The clause relating to the disgrace-
ful condition of the smallpox hospital
was read, and upon motion, the sec-
retary was instructed to forward the
following reply:

"The board of health of the city of
London thank the grand jury for their
interest in the smallpox hospital, and
in the near future the causes of
complaint will be removed.

"The board of health's attention has
been called by high officials to the in-
sanitary condition of the courthouse,
where the primitive heating and ven-
tilating is a menace to the health of
those whose duties call them to re-
main for hours in the tainted air.
This is a very serious matter, as it
deals with the health of many."

It is more than probable that the
city will carry the matter to the court
of appeal.

Mr. Justice Latchford's order re-
fused a stay of proceedings till the
hydro-electric power commission was
added as a defendant. Following the
refusal of the attorney-general to
allow the commission to be added as
a party defendant, the city of Toron-
to, and similarly the city of London,
asked to have the action dismissed.
This request has been denied, but the
refusal simply decides that the case
may go ahead without the addition
of the commission as a party, and
does not affect the merits of the cities'
cases if finally argued.

OFFERED LEADERSHIP
Alberta Conservatives Offer the Posi-
tion to M. S. McCarthy, M. P.

Ottawa, Feb. 15.—Mr. M. S. Mc-
Carthy, M. P., states that he received
by wire the offer of the Alberta Con-
servative convention of the leadership
of the party in that province, but that
he will make no reply until he re-
ceives confirmation of it by letter.
The meantime Mr. McCarthy will con-
sider whether or not he will drop out
of Federal politics to take up Pro-
vincial work.

Another Bishop Rumor
Father Hand, of Toronto, Leaves To-
morrow on Trip to Rome.

Toronto, Feb. 15.—Vicar-General Cunn
and Rev. Father Hand, of St. Paul's
Church (Roman Catholic), leave tomorrow
for Rome. The nature of their
business is not known, but it is thought
by some that it may have to do with the
reported selection of Father Hand as
Bishop of London.

NOVEL USE FOR THE GRAPHOPHONE

New York, Feb. 15.—A spe-
cial from Fairfield, Ill., to the
World says: The Rev. Daniel
Bassett Leach, an aged clergy-
man of Bone Gap, was told
yesterday that he was going to
die. He asked that his grapho-
phone be brought to his bed-
side. Into the machine the
venerable pastor talked. Be-
sides an address he spoke
prayers. When Mr. Leach had
finished he had the records
repeated. Then he asked that
they be used at his funeral.
His relatives assented, and
thus his relatives, congregation
and friends will hear his own
voice as they stand beside his
grave.

TO INVESTIGATE LOCAL CROSSINGS

Railway Commission Will Set in
London February 25.

KILLING OF PEOPLE ATTRACTS ATTENTION

Of the Dominion Body Which Regu-
lates Many Matters of
Importance.

[Special to The Advertiser.]
Ottawa, Ont., Feb. 15.—The board
of railway commissioners will go to
London on the 25th of this month, and
will there take up the Adelaide street
crossing of the C. P. R., the Grand
Trunk crossings in East London, and
the West Lorne crossing cases.

The board will sit in Guelph on the
26th, and will consider the application
for improved station accommodation.

Adelaide Street.
The sitting of the board is of great
importance to Londoners. The Ade-
laide street crossing of the C. P. R. is
a dangerous one, and there is no
watchman there. Some time ago the
company's attention was called to this
fact by the city council, but nothing
further has been done.

The city did not make an appeal to
the commission, for if they did the
cost determined by the benefits ac-
cruing would be assessed both on the
city and company.

The West Lorne crossing is an ex-
tremely dangerous one. It is crossed
by both the Pere Marquette and the
M. C. R., and several people have
been killed there, the last within two
months.

The G. T. R. Crossings.
The whole east end situation of the
Grand Trunk will be canvassed by the
commission, all the crossings east of
Adelaide street being investigated. The
Egerton street crossing and the Rec-
tory street crossing, are particularly
dangerous, and the numerous accidents
there have called the attention of the
board to them.

The city did not make an appeal to
the commission, for if they did the
cost determined by the benefits ac-
cruing would be assessed both on the
city and company.

The city did not make an appeal to
the commission, for if they did the
cost determined by the benefits ac-
cruing would be assessed both on the
city and company.

LONDON MAY GO TO APPEAL COURT

Division Court Dismisses Appeal
Against Judge Latchford's
Decision.

The action of Smith against the city
of London, to prevent the council en-
tering an agreement with the hydro-
electric commission to take Niagara
power, reached another stage on Sat-
urday when the appeal of the city
against the judgment of Mr. Justice
Latchford, refusing to grant a stay of
proceedings until the commission was
made co-defendants, was dismissed by
the division court, with Justice Ang-
lin, Magee and Clute presiding.

It is more than probable that the
city will carry the matter to the court
of appeal.

Mr. Justice Latchford's order re-
fused a stay of proceedings till the
hydro-electric power commission was
added as a defendant. Following the
refusal of the attorney-general to
allow the commission to be added as
a party defendant, the city of Toron-
to, and similarly the city of London,
asked to have the action dismissed.
This request has been denied, but the
refusal simply decides that the case
may go ahead without the addition
of the commission as a party, and
does not affect the merits of the cities'
cases if finally argued.

OFFERED LEADERSHIP
Alberta Conservatives Offer the Posi-
tion to M. S. McCarthy, M. P.

Ottawa, Feb. 15.—Mr. M. S. Mc-
Carthy, M. P., states that he received
by wire the offer of the Alberta Con-
servative convention of the leadership
of the party in that province, but that
he will make no reply until he re-
ceives confirmation of it by letter.
The meantime Mr. McCarthy will con-
sider whether or not he will drop out
of Federal politics to take up Pro-
vincial work.

Another Bishop Rumor
Father Hand, of Toronto, Leaves To-
morrow on Trip to Rome.

Toronto, Feb. 15.—Vicar-General Cunn
and Rev. Father Hand, of St. Paul's
Church (Roman Catholic), leave tomorrow
for Rome. The nature of their
business is not known, but it is thought
by some that it may have to do with the
reported selection of Father Hand as
Bishop of London.

DYING WOMAN WAS ILL TREATED

Alleged That Daniel Curtin
Turned His Wife Out of
the House.

WAS BAREFOOTED
IN THE SNOW

Tale of Frightful Cruelty Was Un-
folded in the Local Police
Court Today.

A shocking story of alleged inhuman
treatment was told this morning in the
police court in connection with a
charge laid against Daniel Curtin for
being drunk and disorderly.

In the witness-box Wm. Millet, a
neighbor of Curtin's, and the man who
saw the charge against him, stated
that on Sunday morning between 12
and 1 o'clock he had been aroused by
his neighbor, William Pring, and on
going to his house had found Curtin's
wife there.

The woman begged to be taken to
her mother's, alleging that Curtin had
driven her from the house, and was
going to poison her.

Bare Feet in Snow.
William Pring stated that he had
been awakened between 12 and 1
o'clock on Sunday morning by Mrs.
Curtin. It was freezing cold, and the
woman was in her bare feet and had
no clothes on but a night robe. He
had known that she was so seriously
ill that she was not expected to re-
cover, and was accordingly very much
surprised to see her. She stated to
him that her husband had come home
drunk and had driven her out of the
house, and begged him to take her in.

After getting Mr. Millet, they took
Mrs. Curtin back home, and when they
entered the house they found Curtin
there in a drunken condition. When
his wife started to cry, Curtin swore
at her and abused her, and pulled her
about roughly.

Drunk at the Time.
P. C. Froby, who arrested Curtin,
stated that the man was considerably
under the influence of liquor at the
time.

"I think this is a shame and
an outrage," said Magistrate
Love; "you might as well have taken
an axe and killed the poor woman out-
right," he said.

A Brutal Act.
"I know Mrs. Curtin's condition, for
I went to see her, and I want to tell
you that it is a shame the way you
have used her. I know that for years
you have been coming home drunk,
and abused her frightfully. It has
been more merciful if you had
taken her out and shot her than to
treat a dying woman in such a
manner. I will take good care that
you don't go back to the house while
she is alive, which, fortunately for her,
will not be long now."

Remanded to Jail.
Mr. Scatcherd, who appeared for
Curtin, asked that the case be laid
over until tomorrow in order that he
might produce witnesses for the de-
fence.

"That man must not go back to the
house while his wife is there," said the
court. "I will remand him to jail until
tomorrow."

Mrs. Curtin is suffering from an in-
curable disease, and also from the ex-
haustion of her husband's treatment. It is the opinion
of the physician in attendance that she
will not live more than a few days.

PENN. FLYER WRECKED
BUT NOBODY HURT

Eighteen-Hour Train Ditched While
Travelling at Top Speed.

Philadelphia, Feb. 15.—The Penn-
sylvania special, the 18-hour flyer from
Chicago to New York, struck a rock
at Newton-Hamilton, 83 miles west of
Harrisburg, shortly after 6 a.m. today,
wrecking the train.

The official report to the company
in this city says that beyond a severe
shaking-up no one was severely in-
jured. As far as can be learned, the en-
gineer of the flyer had no time to
slacken his speed before striking the
rock, which ran from the hill side.

The Pullman, the combination
smoker, baggage car and three sleep-
ers were derailed, the engine and the
first two cars turning over on their
sides. All the passengers were still in
their berths, and it is considered re-
markable that no one was killed, but
all were thrown about and badly
shaken up.

THE WEATHER.
TOMORROW—COLD.
FORECASTS.
Toronto, Feb. 15.—8 a.m.—
Today—Northeast and north winds,
with snow.

Tuesday—Northerly winds and continued
cold.

WEATHER NOTES.
The disturbance which was centred in
Arizona on Saturday moved very quickly
eastward, and by Sunday morning was
over the Middle States. It has since been
nearly stationary.

Snow has fallen in Ontario and Quebec,
and is setting in over the Maritime
Provinces.

HORTON ST. MAN DIED SUDDENLY

John Weekes Felt Pain in His
Head and Expired in a
Few Minutes.

Death came most unexpectedly to
Mr. John M. Weekes, of 180 Horton
street, at his home last night.

After having his supper Mr. Weekes
complained of a severe pain in his head,
and was advised by the members of
his family to lie down on a sofa. He
did so and shortly afterwards it was
noticed that he was breathing very
heavily.

An effort to awaken him failed, and
Dr. Stevenson, who was called as
quickly as possible, found upon his
arrival that Mr. Weekes had sustained
a paralytic stroke. He died shortly
afterwards without recovering con-
sciousness. Mr. Weekes was 59 years
old, and about three months ago had
his first paralytic stroke, but recov-
ered. Besides his wife he is survived
by a grown-up family. The funeral
will be held on Tuesday afternoon to
Woodland Cemetery.

MUST FORGET THE
FIGHTING HABIT

Magistrate Love Gives Warning
to a Regular Offender.

Richard Rose appeared in court
this morning to answer to a charge
of being drunk and disorderly.

"I was drunk," he told the magis-
trate, "but not disorderly."

"You have been up here a good
many times," said the court, "and I
think every time you were drunk you
were disorderly."

"Well I was too drunk to remem-
ber if I was," said Rose.

The evidence showed that Rose was
using bad language on the street and
wanting to fight.

Forget Mr. Johnston.
"You must resist your pugilistic in-
clination," said the court, "and must
begin to learn that your fighting days
are over. It is only a year or so ago
that you had a big fight at the corner
of Dundas and Richmond streets, with
a policeman. I will fine you \$10 of
21 days."

Joseph Smith, a vag, was remanded
for a week.

The case of Stephen Newans, who
was found guilty last week of stealing
boots, was enlarged for another week.

A "RIPPER" LOOSE IN OLD BERLIN

German Capital Aroused by the
Mysterious Stabbing on
the Street.

Berlin, Feb. 15.—The mysterious at-
tack on women upon the streets of
Berlin, recurring the notorious "Rip-
per" cases of other cities, continues.

Five women of the working class were
wounded in the city suburbs yester-
day, while this morning the wife of a
merchant was attacked by an unknown
assailant. None of the women were
seriously hurt.

The first attack occurred in Moa-
bite quarter at 9 o'clock, yesterday
morning, on the open street. The
assailant stabbed the woman in the
upper part of the arm. Another
woman was stabbed in the thigh in
the northern section of the city.

At 3 o'clock in the afternoon a girl
was attacked in the eastern section.
She warded off the blow with her
hand, which was wounded. In the
evening the "Ripper" attacked a
butcher's wife in the suburb of Hosen-
schlohausen, but the blade of the
knife broke against her. The woman
stays. The assailant then beat his
victim into unconsciousness and she
was taken to a hospital. Later in the
evening the wife of another butcher
was stabbed in the thigh in the
eastern section. The attack in the
merchant's wife occurred this morn-
ing in the southern part of the city.

The woman was injured in the thigh
and hand. In every instance the crim-
inal escaped. His method is to

"GIBRALTAR"**And Wage-Earners' Insurance****POLICY OF EXPANSION BRINGS BIG COMPANY TO CANADA**

The Prudential Insurance Company of America, Home Office Newark, N.J., whose emblem, the Rock of Gibraltar, has long been familiar to Canadians, has just extended its field of operations to the Dominion. This important news by the great company is another endorsement of the great economic and business development of Canada and is a distinct recognition of the thrift of our people.

Business Will Be Conducted in Both Industrial and Ordinary Departments.

Industrial insurance is the only scientific system of life insurance which has brought insurance protection to the great masses of the people. The Prudential was the pioneer industrial company in this continent, the plan having been introduced in the United States in 1875 by the founder and president of the company, Hon. John F. Dryden. The Prudential has over seven and one-half million policies in force, showing to what a wide extent this business has been implanted in the homes of the public.

What Industrial Insurance Is.

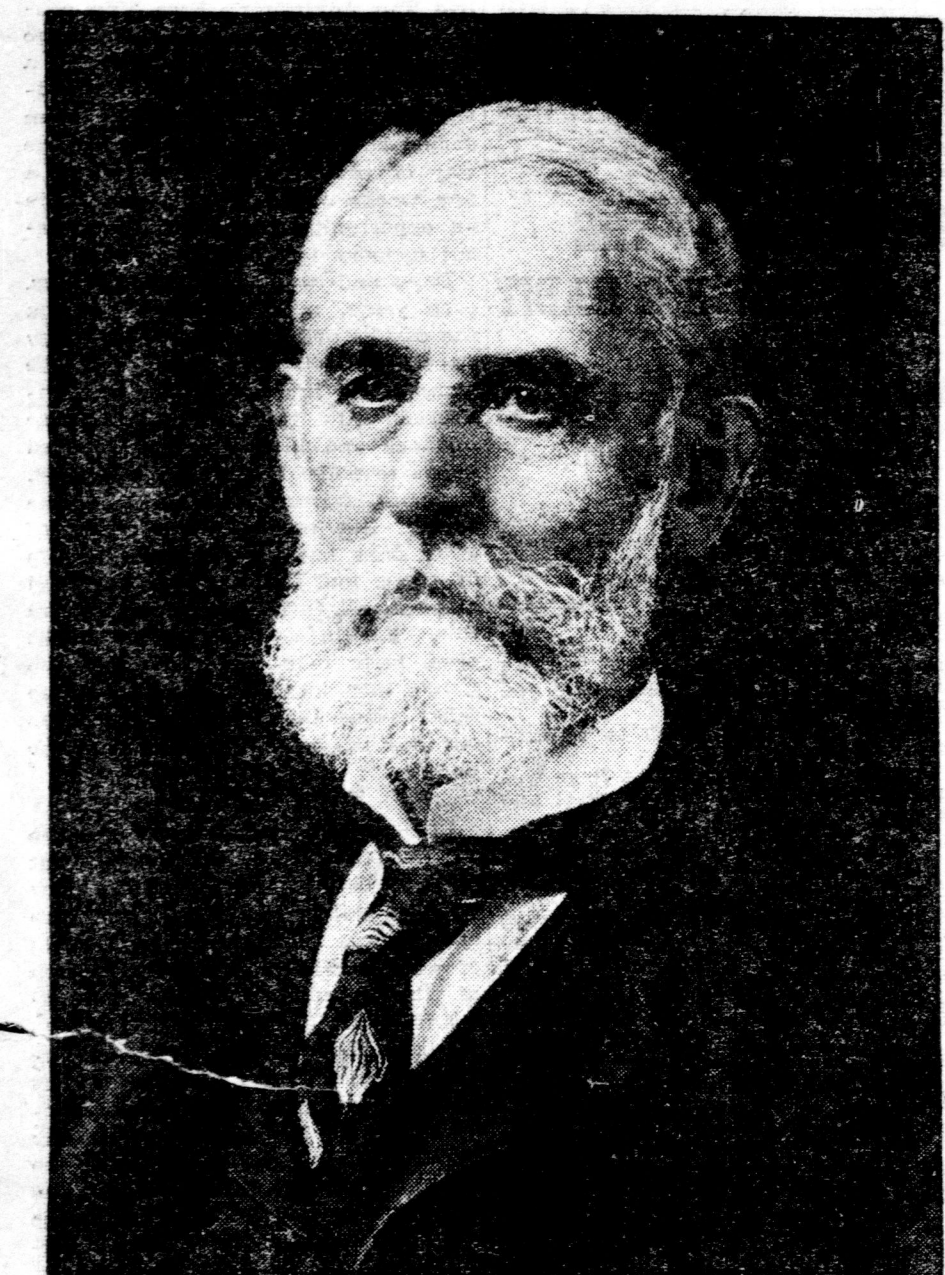

Industrial life insurance is a devel-

more policyholders than all the other companies combined. This has been due not only to the attractive features of its policies, which will compare most favorably with any in America, but also because our people have been able to familiarize themselves with the manner in which it has always been conducted and to know that it is an institution worthy of the highest esteem and confidence. There are a number of worthy concerns doing business in our state, but we know of none that is more deserving of the support of the army of wage-earners than the Prudential.

The business of the Prudential, however, is by no means confined to industrial insurance. The Prudential was the pioneer industrial company in this continent, the plan having been introduced in the United States in 1875 by the founder and president of the company, Hon. John F. Dryden. The Prudential has over seven and one-half million policies in force, showing to what a wide extent this business has been implanted in the homes of the public.

What Industrial Insurance Is.

Industrial life insurance is a devel-

FORMER UNITED STATES SENATOR JOHN F. DRYDEN, "The Father of Industrial Insurance in America," and Founder and President of the Prudential.

opment of the earlier forms of life insurance adapted to the wants and needs of the masses. It combines with every degree of absolute security the necessary value of availability, adjusted to the conditions of life, and the habits and circumstances of the general population.

A workingman, earning weekly wages, has not, as a rule, more than a week's earnings ahead of him. Unless the life insurance premiums are paid, almost at the time the wages are received, to the collector calling at the houses of the insured, the intention to keep the insurance in force will very often not be carried out. For this reason the company finds that for the benefit of the policyholder the best system of collecting premiums is weekly, and at the homes of the insured.

Industrial life insurance is applicable to every member of the family, although, as a rule, the age limit is from one to seventy. Industrial life insurance provides primarily for the expenses of burial, and since death is likely to happen to any member of the family at any time, and since the burden of the funeral expenses will fall equally heavy upon the survivors, a small policy of insurance on the life of every member of the family is undoubtedly a better provision for families in moderate circumstances than a larger sum placed upon a single life.

This system of family protection, from its great popularity with the masses, has evident merits over any other form of life insurance which has thus far been devised. As stated above, the industrial collector calls at the homes of the insured week after week for premiums falling due. To anyone familiar with educational processes it must be clear that such a constant reminder of life insurance as a duty and the necessity of foresight and self-denial must necessarily have a considerable effect in other directions. As it has properly been said, a person cannot develop thrifty habits in one direction without developing similar habits in other directions. The premium receipt book is a record of the current account between the policyholders and the company. By the most simple arithmetical process, it is evident at any time how much has been paid out and how much will be received in return.

This is life insurance "at retail"—life insurance brought down to a point where it is well within the reach of all classes of individuals.

The attitude of those who avail themselves of this great form of protection is best indicated by a recent report of the New Jersey State Federation of Labor concerning industrial insurance and the Prudential.

"A large percentage of our members fully realize that it is a duty of paramount importance to provide for the widows and orphans in the way of life insurance, as well as to provide for the present in the way of increased wages, shorter hours of toil and better sanitary conditions in factory and workshop."

The Prudential Insurance Company of America is an institution, in which we have every reason to impose the utmost confidence. There is no question, but that its numbers already among our eighty thousand members

strength and size until at present, in amount of business written, in annual income and other features, it far surpasses the majority of life insurance companies which issued ordinary business exclusively.

Today with a guaranteed policy low in cost, the ordinary department of the Prudential is advancing at a pace that is probably unequalled in the United States, and that in the face of all the conditions that have affected business generally.

Some idea of the remarkable progress which the company has shown is indicated from the growth in thirty-four years from comparatively insignificant beginnings to its present position in the field of life insurance—covering nearly a billion and a half dollars of insurance protection—giving employment to over twenty thousand individuals in field and home office, its home office staff alone numbering over 2,400, and requiring four twelve-story buildings for the proper transaction of its business.

Certainly "great oaks from little acorns grow," but in this case the oak had its roots in the hearts and consciences of a great army of people eager for self-help and self-protection for home and loved ones, and its growth has been proportionate with the importance and widespread character of its foundation.

Hitherto the Prudential has confined its operations exclusively to the United States, but the attractive opportunities offered through the general prosperity and rapidly increasing populations of Canada, coupled with the cordial treatment the company has received at the hands of the Canadian authorities, have induced the company to extend its lines for the first time beyond the borders of its own country.

The work of perfecting organization for the Canadian service is now under way actively, offices in London having already been opened.

This will open a field of new opportunity for a large number of men. It is understood that it is the intention of the company to employ native Canadians to carry on the work under proper expert supervision and instruction.

This will be an excellent field for many young men desiring to enter a business career.

The business of life insurance is recognized today as one of the foremost of the most rapid rate of the age. It is due not only to the vast size of the business and the tremendous interests involved, but from the fact that the institution of life insurance itself has grown to be recognized as an indispensable adjunct to modern civilization by all classes, kinds and conditions of men.

Subject to no violent fluctuations, of the most enduring character and growing at the most rapid rate, the administration and management of this business requires an army of men of ability, integrity and energy, and to such men life insurance offers not only adequate compensation, but more than an average remuneration. For young men entering a business career no occupation has greater inducements. Progress depends solely upon merit, advancements are made entirely upon a man's own record, and his future as well as his present depends entirely

ASSESSMENT IS ABOUT \$2,000,000

Some Interesting Facts and Figures Given Out by the Board of Education.

ALL THINGS WORK OUT FOR GOOD

Rev. W. J. Clark's Interesting Sermon in the First Presbyterian Church.

The First Presbyterian Church was crowded on both occasions yesterday, when Rev. W. J. Clark, formerly pastor of the church, but now of Westmount, Montreal, preached. In the morning Mr. Clark took as his subject "The Complexity of Life," and based his sermon on Romans, viii, 28: "For we know that all things work together for good to them that love the Lord."

The Paths of Life.

"Someone has said, let the revolutionist settle where we are from, and the theologian where we are going," said Mr. Clark, "but the fact still remains that we are here. There is no doubt whatever about that. We are all, however, try to come to some definite conclusions about the pathways we are to follow through life. The complexity of life and its apparently inexplicable confusions thrusts itself upon us at all times. We all rejoice in the light of the sun, in the splash of the rain, or in the beauty of the harvest. These are aspects of the material world that are beautiful. There are other aspects that strike us, and we are way as to cause us great agony of spirit. We cannot blind ourselves to these facts. Sometimes they present themselves to us in a spectacular way, as when a few weeks ago thousands perished at Messina. We can never forget, however, of the lingering death which came to those buried in the ruins."

Study of Humanity.

"Then, if we turn from that aspect to study humanity, we find the same thing. If we study the history of man, as it presents itself in its various forms in our every-day life, we find some things which gladden and others which sadden us. Men and women today are thinking great thoughts, and doing great works, which would seem impossible, but are carrying them through. Some are beneficial, others are not."

Robbery and Oppression.

"There are men today who are using their powers and talents to rob and oppress their fellow-men. What is true of the masses is in general true of the individual. How many of us are selfish, greedy of gain, and how small our lives look when measured up by the generous and useful life of Jesus Christ."

"Life practically resolves itself into three aspects. There is the attitude which we find only too common. That of the unthinking person who goes on his own way, eating and drinking. There is the stoic, or despairing attitude. People in this attitude say life is altogether too much for them. They find no pleasure in life, and they are not willing to stand the pains and suffering of life with firmness. There is much to be said for this attitude, but yet it seems an inferior one."

Paul's Attitude.

"Lastly, there is the attitude indicated in the apostle's words, when he says all things work together for good to them that love the Lord. Here is Paul's attitude. In Paul's attitude, all things, Faith is a word so often misused or misunderstood. Faith is a partial knowledge of such a sort that we can be sure we are right from what we know. Every man has faith of some sort or other, even he who calls himself an agnostic. In Paul's attitude, he is convinced of the unity in creation. There are so many who have a hazy idea that there is a God and a devil, and that they are fighting something out in some sort of a way. There is also the theory that we are all gods. Paul's idea is that there is no event which comes to pass, there is nothing that happens, that is not part of one great purpose, and that purpose is good."

Working for Good.

"We must all admit that it is a grand thing for all things to work together for good. The birth of the child, the young man in his strength, the old man in his feebleness—there is no wonder that is not included—and all work together for good. What a strength such a belief gives us, especially in the hour when the places that once were ours, and things we had are slipping from our hands, and we are left alone. Hold them! Such a faith enables us to see that if there is rebellion against good it must be swept away, and to understand that if we set ourselves against that which is good we must be crushed. It teaches us to love good and long for the best, and also that the way of faith is the way of effort."

Mrs. Winslow's Soothing Syrup.

has been used for over THIRTY YEARS by MILLIONS OF MOTHERS for their CHILDREN, WHILE REVEREND THE PERFECT SUCCESS, IT SOOTHES THE CHILD, SOFTENS THE GUMS, LAYS ALL PAIN, CURES WIND COLIC and is the best remedy for diarrhoea. Sold by druggists in every part of the world.

ANNUAL SEPARATE SCHOOL REPORT

Catholic Population of the City Totals 5358.

ASSESSMENT IS ABOUT \$2,000,000

Some Interesting Facts and Figures Given Out by the Board of Education.

The 51st annual report of the Catholic board of education was given out at St. Peter's Cathedral and St. Mary's Church yesterday morning, showing the financial standing of the schools, the valuation of churches, schools, hospital, and other public charities; also the assessed value of property owned by Catholics in the city, London Township and Westminster.

In commenting on the report at St. Peter's Cathedral yesterday morning Rev. Father Aylward stated that the attendance of St. Mary's school has increased to such an extent that a new school will be necessary in that section of the city within a short time. There are at present four rooms at St. Mary's school, the fourth room having been opened a few months ago. The total number on the roll is 185, some classes being over-crowded. The school is valued at \$10,000, and the grounds at \$4,000.

Catholic Institutions. Catholic institutions in London are valued at \$541,500, the Mount Hope Institute alone being worth \$134,900. The buildings at Mount Hope are valued at \$30,000, and the lands at \$54,900. St. Peter's Cathedral stands second, \$121,000 being the total valuation. The buildings are estimated to be worth \$100,000.

The valuations of other institutions are St. Mary's Church, \$42,000, and lands, \$3,000; Mount Hope House of Providence, \$23,000, and land, \$18,000; St. Joseph's Hospital, \$100,000, and lands, \$11,000; St. Martin's school, \$10,000, and lands, \$5,000; St. Nicholas school, \$10,000, and lands, \$5,000; St. Mary's school, \$10,000, and lands, \$5,000; St. John's school, \$10,000, and lands, \$5,000; St. Nicholas school, \$10,000, and lands, \$5,000; St. Nicholas school, \$10,000, and lands, \$5,000.

The recapitulation given is as follows: Churches \$178,000 Schools 107,500 Hospitals and public charities, 161,000 Academy 134,000 Total \$541,500

The Assessment. A table showing the assessment of property owned by separate school supporters is given, and shows an increase of about \$1,000,000 since 1895. The tax rate received is almost tripled. The following is the table:

Year.	Assessment.	Taxes Received.
1895	\$ 890,590	\$ 4,715 00
1896	1,044,637	4,950 00
1897	1,073,449	5,212 00
1898	1,126,450	5,592 00
1899	1,244,780	5,522 00
1900	1,234,780	6,425 00
1901	1,239,205	6,929 01
1902	1,266,364	7,388 27
1903	1,422,931	7,866 35
1904	1,446,404	8,272 40
1905	1,548,822	8,854 09
1906	1,622,230	8,821 09

To Suffer From Headaches Makes Life Miserable.

It takes a person that has had or is subject to headaches to describe the suffering which attends them.

The majority of cases are caused by constipation and dyspepsia. The dull throbbing, the intense pain, sometimes in one part, sometimes in another, and then over the whole head, varying in its severity by the cause which brings it on, purely indicates that there is something the matter with the stomach or bowels. To the fact that Burdock Blood Bitters reaches every part of the system is due its success in relieving and permanently curing headache. It has proven a specific for the malady in all its forms.

Mrs. Allison E. Brown, N.B., writes:—"I have been troubled with Constipation and Headaches for a long time. After trying different doctors to no effect, a friend asked me to try Burdock Blood Bitters. I find I am completely cured after taking three bottles. I can safely recommend it to all."

WEATHER PROBS: COLDER.

MONDAY, FEB. 15.

A Few Pieces--Not Yards

Our Cotton and Sheeting Values for this week will offer the above suggestion. Another week of Cotton selling has begun, and great things are promised for this the third week of our Cotton and Sheeting Sale. Interest has been from the start at the highest point, and if we may judge from the values which have been prepared for this week's selling the straining-point will be reached, as the values for the next few days will suggest the buying of pieces instead of a few yards. If you have not already made your purchases, your best opportunity is NOW! If you have, look over the values, at home, and consider how much more you will need of the different lines. Make sure you have your full supply. All the better if you should get a few yards over at such prices.

This is just one of our specials priced for the piece. A Fine English Long Cloth, the desirable cambric-finished kind, suitable for underwear purposes. 35 inches wide, put up in pieces of 40 yards each. Special value at 10c yard or piece of 40 yards for \$3.75. Don't miss procuring a piece or more of our Special Sheeting at February Sale price. Each piece makes in the neighborhood of one dozen sheets. Second floor.

Ribbons--10c for 25c and 40c Ribbons

These are light blue, Nile and moss green. An accumulation of odd pieces from one line and another in these colors which are not as ready sellers as the reds, pinks, whites, etc., yet good, useful colors. Pure Silk Ribbons and 5½ inches wide. 25c and 40c qualities. A few bolts of each, to clear at, per yard 10c

SOAP--2½-lb Bar, 23c

SHELL BRAND CASTILE--Large and Small Bars.

The stamp "Shell Brand" is the emblem of purity. Are you buying your Soap at the right price? Pure Castile, white or mottled, 2½-lb. bars, 23c One-third bars, 8c

MACHINE OIL, 4c a Bottle

If you have used this oil before you will certainly want another 3 bottles for 10c. This is a good sperm oil, and will not clog. Another lot now on sale, per bottle, 4c, or 3 for 10c

TOILET COUNTER--OPPOSITE STAIRWAY.

Store closes 6 p. m. daily Saturday included.

Dundas and Richmond Streets.

SHREDDED**Gives You Power to Resist the Cold and Winter Diseases.**

To serve--heat in oven, pour hot milk over it and salt to taste. Sold by all grocers, 13c. a carton; two for 25c.

WHEAT**RAILWAY CONVENTION**

Managers of Electric Lines Gathered at the Capital.

Ottawa, Feb. 14.—The moving spirits of electric railways in various parts of the Dominion were gathered on Saturday on the occasion of the quarterly meeting of the executive committee of the Canadian Street Railway Association.

Those who took part in the deliberations were: Acton Burrows, secretary of the association; Duncan MacDonald and P. Duke, of the Montreal Electric Railway; E. A. Evans, of Quebec; W. H. Hopper, of St. John, N. B.; C. B. King, London; W. McCrea, Toronto, and James Anderson, Windsor.

Details of several matters dealt with by the association in Ottawa four months ago were disposed of, and some arrangements made for the annual meeting, which takes place in Winnipeg in mid-summer.

REFORMS IN RUSSIA.

St. Petersburg, Feb. 12.—Important reforms in the marriage laws are impending. Russia is about to recognize the validity of civil marriages and to remove divorce cases from the jurisdiction of the religious to that of the civil courts.

At present a Russian who contracts a civil marriage in England, France, or Germany can, on returning home, marry again without any hindrance, his first marriage being considered invalid. Many women have been wronged through ignorance of this fact.

The Government has now presented proposals to the Duma greatly facilitating divorce cases—which will be tried before a civil judge instead of a religious synod or consistory—and also elaborating a scheme for civil marriages.

CIVIL MARRIAGE CEREMONIES ABROAD TO BE RECOGNIZED.

At present a Russian who contracts a civil marriage in England, France, or Germany can, on returning home, marry again without any hindrance, his first marriage being considered invalid. Many women have been wronged through ignorance of this fact.

The Government has now presented proposals to the Duma greatly facilitating divorce cases—which will be tried before a civil judge instead of a religious synod or consistory—and also elaborating a scheme for civil marriages.

BAILED IN \$10,000

Conductor McCallum of G. T. R. Liberated Pending Trial of Case.

Toronto, Feb. 14.—After a temporary disappointment, Conductor Frank McCallum, of the G. T. R., was able to secure his liberty on Saturday afternoon.

When his bondsmen from Brockville, Messrs. W. H. Harrison, Frank Wendling and Frank Laing, arrived in Judge Winchester's court in Toronto, they were told that the crown could not accept as bondsmen, as their property was not in the County of York, and therefore was not estreatable by the county authorities.

**Stop**

taking liquid physic or big or little pills, that which makes you worse instead of curing. Cathartics don't cure—they irritate and weaken the bowels. CASCARETS make the bowels strong, tone the muscles so they crawl and work—when they do this they are healthy, producing right results.

CASCARETS are a box for a week's treatment. All druggists, biggest seller in the world. Millions boxes a month.

DR. A. W. CHASE'S 25c CATARRH CURE . . .

is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever, Blower Modaine Co., Toronto and Buffalo, N.Y. All dealers or Dr. A. W. Chase. Two hundred and ten tons of honey worth \$60,000 come from Ireland each year.

Though the industry is still in its infancy, the honey of India give employment to 152,000 persons.

COLEMAN'S CAMPHO QUININE

FOR COLDS & LA GRIPPE

Cures colds and breaks up the fever in 24 hours. If you "feel yourself taking cold," get a box at your dealer's—25c. or send direct if your dealer does not keep them.

SMELTING BY ELECTRICITY.

The electric smelting process, which, it is announced, has been perfected by Dr. Haanel, director of mines for the Dominion, should prove of the utmost importance in the development of the iron ore deposits of this country.

A serious handicap to the smelting industry in Canada has been the distance between the coal fields and the iron ore region, which has made the fuel so costly as to greatly lessen the profits of the industry. All the while there are throughout Central Canada, where the iron deposits most abundant, water-powers in abundance, capable of providing electrical energy.

To devise a means of utilizing this natural power in the smelting of iron ore is a work to which Dr. Haanel has devoted much time and study, and his final success should serve to attract capital and enterprise.

Dr. Haanel's serious experimenting began three years ago, when the management of the smelting works at the Soo gave him permission to carry on in that immense establishment tests of the feasibility of obtaining iron by electrical smelting from the refractory ores so common to Canada, providing him with the necessary facilities for his work. He demonstrated that the electrical process could be successfully used.

Dr. Haanel recently returned from Sweden, whither he went on the invitation of capitalists, and reports that the latter, on the strength of his report of his scientific work in Canada, have installed a working plant, which meets perfectly his expectations and convinces him that the problem of electrical smelting can be successfully solved.

It is claimed that by this new process the refractory ores—those which do not readily yield to ordinary smelting processes—can be smelted without the use of coal, and as the majority of the Canadian deposits (except those in the Lake Superior region, which are easily workable ones, but which experts say will be exhausted before a great many years pass), are of this class, the value of Dr. Haanel's process can hardly be over-estimated.

WIRELESS AT SEA.

The United States Congress has a bill before it requiring all ocean-going vessels that carry five hundred or more passengers, to install a wireless apparatus. President Roosevelt has sent a message of approval, and its adoption this session is likely.

The introduction of this measure is evidence that the lessons of the Republic disaster have been taken to heart, and that society demands that every available means of increasing safety at sea be taken. In his message the President points out that the matter is one of national concern, and calls attention to the fact that the country's coasts have been equipped with a chain of shore stations, designed primarily for the national defense, but capable of receiving and transmitting messages by any of the systems of wireless telegraphy now in use.

While there appears not to be two opinions as to the advisability of all passenger-carrying ocean vessels being equipped with the wireless apparatus, there are those who maintain that the time has not yet come for compulsion; that in any event its voluntary adoption by all important vessels sooner or later is certain, as competition for passenger traffic is the best regulator in such matters, while in the case of smaller vessels a compulsory law would entail expense and inconvenience to the owners without any compensating benefit to the public and seamen. Another argument for delay is that discrimination in marine insurance rates in favor of vessels equipped with the most modern of safety devices will eventually cause voluntary action in that direction by steamship companies themselves. Then, too, there are those who argue in favor of the adoption of the submarine fog bell, contending that it is superior to wireless as an aid to navigation at times when the danger of collisions is greatest.

The preponderance of opinion seems to be in favor of the immediate enactment of a compulsory law, some going so far as to advocate its application to lake vessels. The passage of the bill by Congress would doubtless be speedily followed by other maritime nations, and it may not be going too far to predict that before many years pass the wireless equipment of ocean steamships will be universal.

CANADA AND THE EMPIRE'S WARS.

Mr. J. S. Ewart, K. C. of Ottawa, in an address to the Canadian Club, Peterboro, maintained that there should be some arrangement between the various nations of the empire for co-operation in war, having regard to the fact that no state within the em-

pire should be obliged to participate in a war of which it did not approve. Mr. Ewart was of the opinion that Canada ought to be neutral in a war between Great Britain and France, otherwise the integrity of the Dominion would be endangered. In a war between the United States and Japan, Canada would have to decline to aid Great Britain, if the latter joined forces with her Oriental ally. Neither would the United Kingdom permit Canada to involve her in war with the United States, or Australia to quarrel with Germany, Japan or China. Mr. Ewart continued:

"Let us look this matter squarely in the face, and let us understand it. Some sudden day we may have to come to a sharp decision. Let me ask you a few questions about it. Are we content to leave all decisions to others, all discussion—as to peace and war with Mr. Asquith and his colleagues and their successors? We boast our powers of self-government; we make our own laws; we know enough to frame our own fiscal policy. And we have no voice in peace and war? Are we willing to pledge ourselves that whenever called to we shall forward such money as may be demanded? Is it immaterial to us who may be the enemy, or where the contest, or what the subject of quarrel?"

Mr. Ewart did not carry his argument to the point of suggesting a solution of the problem, though the inference is that he believes it to be Canadian independence. The difficulties of which he speaks, however, may never arise. It is highly improbable that British statesmanship will ever be so foolish as to declare war in opposition to the sentiment of any of the daughter nations, or expose them to an attack which her sea power could not easily ward off. The relations of the mother country and the self-governing states of the empire have been shaped and adjusted by circumstances as they arose, like the British constitution itself. The question raised by Mr. Ewart will be decided in the same way.

Figures are supposed to tell the truth, but either Sir Henry Pellatt or Hon. Adam Beck is making fiction out of them.

The miners of Western Alberta have decided to invoke the Lameux act. The attempts to discredit the act are inspired by politicians, not by workmen.

The American Falls at Niagara went dry yesterday through a combination of wind and ice. The condition would be permanent if the power corporations had their way.

The British war secretary is planning an army of the Empire. How will it appeal to Canadians who are attacking their own Government because militia expenses have increased?

The Lincoln celebration reminds thoughtful people that although slavery has been abolished the battle against poverty, ignorance, and other forms of serfdom, has still to be won.

Toronto will derive a revenue of nearly \$600,000 from its street railway system this year—10 per cent of the gross receipts. Would the city make the same profit if it operated the service itself?

[Charles R. Barnes in New York Sun.] She broke her big platter—she dropped it—Lode.

And she should have been fired for that. She tells our affairs to the folks over the way.

And she ought to be fired for that. But if she should go what on earth could we do?

We've company here and we must see it through. She stays out at night until all hours, too. And she ought to be fired for that.

She scorchers the steak till it's brittle and black.

And she ought to be fired for that. She cooks like a person deprived of the knack.

And she ought to be fired for that. Last week she declared we would keep her no more.

But illness occurred—it has happened the same.

Then she—well, she charged things to us, at the store.

And she should have been fired for that.

She takes her day off when she can't wait to be spared.

And she ought to be fired for that. The rooms in this place are improperly aired.

And she ought to be fired for that. A month since she vowed that she's have to get out.

But there was some cleaning—that left it in doubt.

She took some loose change that was lying about.

And she should have been fired for that.

She lingers along, though she's impudent quite.

And she ought to be fired for that. She's very untidy and regular fright.

And she ought to be fired for that. But maybe the new one would be just the same.

Our last one spanked Freddie the day that she came.

And this one, last night, smashed a good picture frame.

And she—will not get fired for that!

AT THE TURN OF THE ROAD.

[Circle Magazine.]

In the perspective from the turn of the road we may now see how many times the paralyzing hand of procrastination touched the good deeds we meant to do. The golden dreams we longed to transform into actualities. We wished to do, and we wanted to do, but we did not will to do. The fault was not in conditions, but in us. We were not equal to opportunities. It is a false philosophy that teaches that opportunity calls only once at any man's house. It comes with the persistence of an importunate creditor, always in a new guise, and clamors for admission, but we may be too busy to answer the bell.

BERIBBERED FLOWERS.

[The Horticulturist.]

The use of ribbon with flowers has a great field, and enhances the beauty and value of them. A bunch or basket with an appropriate bow artistically placed makes it worth as much again, if you are not simply selling merchandise. But put the ribbon where it belongs, where the eye suggests the need of something better. To put a red necktie on an auricularia is as bad as putting an auricularia on a red necktie. It is not the ribbon, but the ribbon, which makes the difference. It is not the ribbon, but the ribbon, which makes the difference. It is not the ribbon, but the ribbon, which makes the difference.

offers an excuse to tie a bow of ribbon, and you at once have a satisfying effect on the eye.

INEVITABLE.

[Exchange.]

"I'm all in the dark about how these bills are to be paid," said Mr. Hardup to his wife.

"Well, Henry," said she, as she pulled out a colored one and laid it on the pile, "you will be if you don't pay that one, for it's the gas bill."

PILLOW TOWARD LOCOMOTIVE.

[Exchange.]

"There is only one way to sleep on a train," said the porter of a sleeping car, "and that is with the head toward the locomotive. If I should make up my berth so that the passengers would be with their feet toward the locomotive, they would sleep little, if at all. The reason is that with the head pointed right the blood runs down to the feet, and the cabin head invites sleep. But pointed the other way, the head fills up with blood, the mind becomes excited, and sleep is an impossibility. It is on this account that on sleeping cars the pillows are toward the engine."

FAR AS HE GOT.

Hein—Why, he yawned three times while I was talking to him.

Myrtle—Perhaps he wasn't yawning. He may have been trying to say something.

City and District.

John Jeffery's Condition.

The condition of John Jeffery, the Apple boy who is suffering from blood poisoning at Victoria Hospital, shows no change.

Luncheon to Mr. Daly.

Mr. Philip Pocock gave a dainty luncheon at the London Club Saturday in honor of Mr. Thomas Augustus Daly, Philadelphia, the poet and humorist. Mr. Daly addressed the Canadian Club, St. Thomas, on Saturday night, and speaks in Poughkeepsie, N. Y., today. In this city he has made a host of friends by his talent, wit and amiable personality.

Peach Crop Is All Right.

There has been a report that 90 per cent of the peach crop in the Niagara district had been killed by frost, and speaking to several of the prominent fruit men of the city, they one and all say that there is nothing to the story. The only way that it could be destroyed is by the freezing of the young shoots, and as there has been no weather warm enough to bring out the shoots, their destruction would be impossible.

Woodburn vs. G. T. R.

The case of Woodburn vs. the Grand Trunk Railway Company, which was dismissed with costs at the last session, will be heard again. The case is one involving damages to the plaintiff's property, due to there not having been sufficient protection around a certain siding at Glenora. The plaintiff has appealed to the divisional court.

Still Speechless.

The condition of James Rosenberg, who was injured at McCormick's on Friday last, shows no change, and he is still totally unable to speak. The X-ray pictures which were taken of his head and neck, and which show any fractures or derangement of the vertebrae, can say is the cause of the partial paralysis from which Rosenberg is suffering.

HAD FIT IN COURT.

Hamilton, Feb. 15.—At the police court this morning it was the intention of the crown to proceed with the cases of William and Mary Fratic, whose house was raided by the police on Saturday night, and the man and woman and four girls arrested on a charge of keeping a disorderly house. When the charge was read to him, Fratic collapsed from an epileptic fit, and the cases were adjourned. His condition is not regarded as critical.

A NEW WAREHOUSE FOR KING STREET.

Mr. John Garvey is having plans prepared for a handsome new five-story warehouse, to be built on King street, on the vacant lot across from the fire hall. The warehouse will be one of the largest in the city, and work will be commenced as early in the spring as possible. The building of the new warehouse will mark the completion of another business block in London, the lot on which it is to be built being the last unoccupied lot between Clarence and Richmond streets.

ED. MOORE WAS BADLY INJURED.

Heavy Bar of Iron Fell on His Leg and Broke It.

Edward Moore, a molder, employed at Leonard's, met with a painful accident this afternoon. While lifting a heavy bar of iron, it fell on him, breaking his leg. Mr. Moore was removed to Victoria Hospital at once in the ambulance and the fracture was set by Dr. W. J. Stevenson.

CHelsea GREEN POSTOFFICE ROBBED.

Store of W. E. Wright Was Entered, and Sum of \$100 Was Taken.

Thieves last night entered the Chelsea Green postoffice, in the store of Mr. W. E. Wright, on Adelaide street, taking over \$100 in cash from the postoffice drawer. A large quantity of stamps, jewelry and grocery stock was not touched.

Entrance was gained through the front door, the thief then thieves evidently using a skeleton key.

The burglary was committed between 7 and 9 o'clock, when Mr. Wright was visiting his wife, who is at present ill in Victoria Hospital suffering from an attack of nervous prostration.

The county police have been notified and have not yet secured any clue.

THE LATE SID BLACK.

Word was received in this city today of the death of Mr. Sid Black, a well-known railroader, who was taken ill after returning from Costa Rica some months ago.

Mr. Black was an engineer running out of this city on the Grand Trunk, and left with a party of local men for Costa Rica to go into railroading.

He returned to this city about eight months ago and resumed work on the Grand Trunk, but was forced to leave the service owing to illness.

Since that time his condition gradually became more serious and a message received this morning told of his death at Fergus, Ont.

Local railroaders speak very highly of the deceased, who was very popular.

EAST END NOTES.

Rev. Father Frank Foster, the supervisor of Assumption College at Sandwich, occupied the pulpit at St. Mary's Church last evening, preaching a very interesting and instructive sermon on "Prayer."

CARTER'S LITTLE LIVER PILLS.

CURE SICK HEADACHE.

Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Bloating, Distress after eating, Pain in the Side, &c. While their most remarkable success has been shown in curing

BRANCH OFFICE IN LONDON:

GEO. H. DAVIS, Supt., Bank of Commerce Chambers, Richmond and Dundas Sts

Ordinary and Industrial policies.
Ages 1 to 70.
Both sexes.
Amounts, \$15 to \$100,000.

Prudential Agents are now canvassing in this vicinity. They have a most vital story to tell of how Life Insurance has saved the home, protected the widow, and educated the children. Let them tell it to you.

NEW YORK HEARS FROM TWO FLEETS

Wireless Stations Pick Up Messages From Both Atlantic and Pacific.

New York, Feb. 13.—A wireless message from the tender Yankton, which is preceding the Atlantic battleship fleet now on its way to Hampton Roads after its cruise around the world, was picked up shortly after 4 o'clock this morning by the wireless station on Fire Island.

This is the first wireless communication received on this side of the Atlantic from the fleet or from any vessel accompanying it since the departure from Gibraltar. Receiving stations in this vicinity have thus achieved a remarkable record in the last 24 hours in picking up messages from both the Atlantic and the Pacific fleet, a communication from the battleship New Hampshire, somewhere in southern waters, having been picked up by the wireless station on Fire Island.

According to the longitude and latitude as given by the dispatch from the Yankton, the battleships are about 1,080 miles west of Gibraltar, with the Yankton only 440 miles east of Bermuda, and the fleet a little over 2,000 miles from Hampton Roads. The schedule as announced before the departure of the vessels from Gibraltar said that they would reach Hampton Roads about Feb. 22 or 23, but if their positions as indicated by the wireless is correct, at the present rate of speed, they should arrive on Feb. 19 or 20. They left Gibraltar Feb. 6. In longitudinal position the ships last night were about 200 miles south of the Azores, which places them a little south of a line drawn directly west from Gibraltar.

NEW LUMBER COMPANY

Capitalized for \$1,500,000 to Cut Timber in Vancouver.

Detroit, Feb. 13.—The Michigan Pacific Lumber Company, one of the largest firms ever incorporated in Michigan, was formed yesterday in Grand Rapids, with a capital of \$1,500,000. Most of the stock is held by Michigan men. The company undertakes to log and market 2,557,000,000 feet of pine, spruce, cedar and northwestern hemlock, covering 51 square miles, in the virgin forests of Vancouver. A logging road, tugs, docks, buildings, and a complete lumbering equipment are being installed in the district, which lies 30 miles west of Vancouver, and 130 from Seattle on the border of Juan de Fuca Strait, the gateway to Puget Sound.

The number of cremations in Great Britain in 1906 was 722, an increase of 125 as compared with the previous year. In 1907 there were 705. The number of cremations is 13, of which six are municipal. Cremation in Great Britain is almost wholly confined to persons of some intellectual distinction.

KING TO VISIT ALFONSO.

Political Importance Attached to Meeting of Two Sovereigns.

Madrid, Feb. 12.—King Edward and Queen Alexandra will arrive at Villagarcia shortly for the purpose of returning the visit paid them by the King and Queen of Spain. Orders have been received at Ferrol to prepare the Spanish royal yacht, which will convey King Alfonso and Queen Victoria Eugenia to Villagarcia.

Considerable political importance is attached to the meeting here. The programme of the royal visit will include a banquet in honor of King Edward and Queen Alexandra at Villagarcia, and several excursions in the neighborhood of the town, including a visit to the Island of Cortegada, where King Alfonso is having a palace erected.

On the conclusion of their visit King Edward will proceed to Biarritz.

SPANKED THE BABOONS

Mimi, the Orang-Outang, Lost Her Temper With Tormentors.

New York, Feb. 13.—Mimi, the 3-year-old orang-outang of the New York Zoo, hasn't been feeling quite well lately. She caught a bit of a cold the other day, and Dr. W. Reid Blair, the zoo physician, attended her, and gave her bitter medicine, to the great joy of Philomena and Phillander, the two baboons in the adjoining cage.

Philomena and Phillander laughed rudely every time Mimi had to take her tonic, and they gazed her unmercifully between times.

Recently Mimi lost her temper and wrenching a small wooden exercising ladder from its fastenings in her cage, she used it as a battering ram, and broke the plate glass between the cages.

Then she dropped the ladder and sailed in to indict such corporal punishment upon her rude tormentors as she thought they deserved. She spanked them soundly, and was enjoying herself very much when big Joe Riley, the keeper, came to their rescue.

Mimi merely shrugged her shoulders when she was persuaded to desist, but it was noticed that Philomena and Phillander were not in a hilarious mood thereafter, and they never even batted an eyelid when her medicine hour came around.

NEW MINING DIVISION.

Toronto, Feb. 14.—The Ontario Government has created a new mining division, consisting of the territory from the Montreal River and Temagami forest reserve mining divisions.

The new division has been laid out by Provincial Surveyor Duncan Sinclair, and includes the Townships of Gamble, Brewster, Corbitt, Lawson and Quown. It will be known as the Gowanda mining division.

The head office is to be located temporarily at the town plot of Smyth, but will be later removed to the town plot to be laid out at the foot of Lake Gowanda.

Mr. Harry Sheppard, Orillia, has been appointed mining recorder, at a salary of \$1,000 per annum.

BANDITS PLUNDER THE MAIL CAR

Sensational Hold-Up of a Denver & Rio Grande Passenger Train.

Denver, Feb. 12.—Two masked bandits held up Denver and Rio Grande train No. 4 at Military Junction, between Fort Logan and Denver, at 3:15 o'clock this morning. The train was due in Denver at 1:40 last night, but was running late. There is a very steep grade just after leaving the junction, and as the train reached the crest two men sprang into the glare of the headlights. One ran rapidly toward the engine and climbed into the cab. He had a gun in each hand, and quickly had the fireman and the engineer under subjection. As soon as the train was stopped the bandits ran to the mail car and hammered in the door.

During this time both men were shooting rapidly along the side of the train to intimidate the passengers and train crew. It is said they fired at least fifty shots. The bandit in the engine cab forced the engineer and fireman to accompany him, and while one bandit stood guard over the engineer, the other one compelled the fireman to enter the mail car and point out the registered mail.

Then, marching the engine crew back to the engine, they ordered them to proceed at full speed to Denver, threatening to shoot if they did not. The robbers fled toward Fort Logan, and the train ran to the nearest telegraph office, where the robbery was reported.

Chief of Police Armstrong ordered the police automobile, and with a squad of officers started in pursuit.

PORTER'S ART COLLECTION

Two Houses Full of Unique and Curious Pictures.

London, Feb. 12.—Although Charles Hopper, a Sunderland street porter, who died at Croft Spa, near Darlington, last week, at the age of 73, earned only 6s a week, he has left a remarkable collection of pictures and curios.

Though he worked all-day drawing travellers' samples about in Sunderland, he lived at Croft Spa, forty-three miles away. There he had two houses to hold his collection, which contains hundreds of pictures. One, a view of the Bay of Naples, was painted specially for him by Callow.

Hopper sold only two of his pictures in his life, and he went the next day to offer the buyer 25s profit to return them. Among his curios are a pair of boots presented to Captain Parry by Lady Franklin, an antique ring used by the Duke of York in opening the first Orange Lodge in Newcastle, a couple of Bewick's woodcut blocks, a crucifix which belonged to the Countess of Derwentwater, and a large collection of Crown Derby, Wedgwood, Royal Vienna and Worcester ware, and beautiful Chinese and Indian specimens.

There are cases full of old coins, shells and rare eggs, stuffed birds and animals, and about 5,000 books, many of them being rare specimens.

WOULD ABOLISH JURY IN RAILWAY CASES

Attempt Will Be Made at the Coming Session of Legislature.

Toronto, Feb. 13.—There is every probability of a lively campaign when the Provincial House opens, at the question of the abolition of juries in actions for damages following accidents where street railway and similar corporations are concerned.

A good deal of campaigning and lobbying throughout the Province will be deeply interested in the result. Some years ago juries were abolished in actions for damages brought against municipalities and similar action is now sought where corporations are concerned.

But an energetic counter-campaign may be expected. It will probably take the form of an attempt to make jury verdicts less assailable in prohibiting appeals from damage awards below a stated figure. A number of rural representatives are pledged to this. Mr. O. E. Fripp, M. P. P. of Ottawa, and P. H. Bowyer, M. P. P. of East Kent, are known advocates of this move, and have bills in preparation. Mr. Fripp having advanced some time ago that verdicts of less than \$1,000 might not be appealed against. Some hot debates are expected.

Hon. J. J. Foy would not make any statement as to the Government's probable action, confining himself to saying that it would consider all suggestions and motions from all sources.

BROTHERS DIE TOGETHER

Melting Snow Reveals Frozen Bodies of Edward and Wallace Spencer.

Winsted, Conn., Feb. 14.—Today's heavy rain, which melted four inches of snow, revealed a double tragedy in a clump of trees at Satan's Kingdom, a sparsely settled region between New Hartford and Collinsville, on the Central New England Railroad, eight miles east of here.

The crew of a passenger train saw two men lying a few rods from the track, and, on investigation, discovered that the men had been frozen to death. The victims were Edward and Wallace Spencer, brothers, twenty-six and thirty years old, employed by the Chapin-Stephen Rule Company, in Pine Meadows. They lived with two half-brothers, William and Peter Baker, a quarter of a mile from the point where they were found.

Having no work Saturday, the brothers walked to Burlington, a license town. On their way back home they fell upon the railroad tracks. Michael Roman, who lives nearby, pulled them off the track. The place where the bodies were found is but a short distance away.

Lead, when reduced to a very low temperature in liquid air, is said to act much as steel at ordinary temperatures. It will serve as a helical spring, for example. Just as iron is soft and inelastic at a high red color, so lead is dull and soft at ordinary temperatures, for it is then already well on its way to be melted.

Death duty statistics communicated to Parliament show that more than half the population of France have property to bequeath.

NORTH SEA FLEET WORLD'S FINEST

British Admiralty Makes Further Distribution of Battleships in Home Waters.

London, Feb. 13.—In the coming spring the admiralty will make a further redistribution of naval forces in home waters. Generally speaking, the change will take the form of reducing the Channel Fleet and strengthening the forces in the North Sea.

At present the Channel Fleet, the most powerful force under the White Ensign, comprises eight battleships of the King Edward class and six other battleships. The First Cruiser Squadron, attached to the fleet, comprises the Black Prince, Duke of Edinburgh, and four other armored cruisers.

The naval force in the North Sea consists of the Nore Division of the Home Fleet, which is nominally comprised of six battleships and six armored cruisers. The ships actually attached to this division are the battleships Dreadnought, Bellerophon, Lord Nelson, Agamemnon, and Victoria, and the armored cruisers Shannon, Minotaur, Natal, Warrior, Cochrane and Achilles.

The New Fleet.

As soon as the battleships Temeraire and Superb are delivered, they will be attached to this fleet, whose battle squadron will then comprise four battleships of the Dreadnought class and the two Lord Nelsons. This squadron will be remarkable as consisting entirely of battleships of over 15,000 tons. Between them they will mount 48 12-inch and 20 9.2-inch guns.

At the same time the cruiser squadron attached to the Nore Division will undergo reorganization. The Warrior's place will be taken by the Invincible. Her sister ships Natal and Cochrane will be replaced by the Indomitable and Achilles, while the place of the Achilles will be taken by the Defence, which has just been completed at Pembroke dockyard.

When all these changes have been completed the Nore Division of the Home Fleet will consist of the following ships:

Battleships.
Dreadnought, Bellerophon, Temeraire, Superb, Lord Nelson, Agamemnon.
Armored Cruisers.
Indomitable, Minotaur, Invincible, Shannon, Inflexible, Defence.
The trial speed of these vessels will be in nearly every case so far this has been exceeded—as follows:
25 knots: Indomitable, Invincible, Inflexible.
22 knots: Minotaur, Shannon, Defence.
21 knots: Dreadnought, Bellerophon, Temeraire, Superb.
18.5 knots: Lord Nelson, Agamemnon.
An entirely new force, to be called the North Sea Fleet, is to be formed and will consist of the following ships:
Battleships—King Edward VII, Africa, New Zealand, Dominion, Commonwealth, Hindustan, Hibernia, and Terminus, all of 16,500 tons.
Armored Cruisers—Achilles, Natal, Cochrane, Warrior, Black Prince, and

Duke of Edinburgh. These all have a displacement of 15,500 tons and speed of 23 knots.

This will leave for the Channel Fleet the six battleships of the Formidable class, displacing 15,000 tons, and armed with four 12-inch and twelve 6-inch guns. The First Cruiser Squadron attached to the Channel Fleet, will probably be reconstructed so as to consist of four vessels of the Devonshire class (10,850 tons).

World's Finest Fleet.

The effect of these changes will be to give us a strength in the North Sea of fourteen battleships and twelve armored cruisers, representing the two fastest, most powerful armed, and best protected fleets of warships in the world. The new North Sea Fleet will be based either upon Rosyth, on the Forth, or Cromarty, in the far north of Scotland.

CAUGHT IN OWN TRAP.

Advertiser Who Victimized Many Women Is Sent to Prison.

Paris, Feb. 13.—"Tall, dark, robust, and very energetic," were the terms in which Adolphe Grappe was in the habit of describing himself when answering advertisements of widows and spinners in quest of a husband. Whenever the would-be-bride had a little money he wooed energetically until he secured her property when he disappeared in search of another confiding woman.

A few weeks ago he duped a prepossessing widow named Richeux, and secured \$600 from her. Mme. Richeux advertised a lot again, but in a different name, and when a reply was received from "Adolphe Heane," who declared that he was "tall, dark, robust and very energetic," she sent the letter to the police.

Adolphe Grappe is now undergoing a year's imprisonment, and there are many other defrauded widows and spinners waiting to interview him when he is released.

EDNA HOPPER WEDS

Marries Broker Brown in Secret Just to Fool Reporters.

New Orleans, Feb. 14.—That he and Edna Wallace Hopper were married nearly three months ago was the announcement made here by A. O. Brown, who arrived in New Orleans from New York Saturday. Miss Hopper is appearing at a local theatre.

The wedding of Mr. Brown and Miss Hopper took place at the home of Justice James S. White in Freehold, N.J., on Nov. 25, 1908.

Miss Hopper said today: "We did not announce the marriage at the time because of the fact that both Mr. Brown and myself were getting more notorious than we wanted out of the unfortunate failure last August, and the suits which followed. We really made up our minds that we would keep the marriage a secret to fool the reporters, and have a good joke on them. And we succeeded, too, for a certainty. We consider the joke good enough now, however, and do not mind the announcement taking place."

Miss Hopper figured in the sensational failure of the firm of which Mr. Brown was the head. She had been brought into the bankruptcy by the receivers of the Brown Company because

NEW WATER CHANNEL

Will Be From Chicago to Buffalo by Way of "Soo."

Washington, Feb. 14.—A deeper water channel from Chicago to Buffalo, via the "Soo," is in contemplation. In a few days a measure will be introduced in Congress providing in brief for the complete survey and perhaps for the construction of such a water way.

Behind the project are practically all of the shipping, manufacturing and laboring interests on the great lakes. That the plan is entirely feasible is indicated by the fact that already there is a Chicago to Buffalo channel, 21 feet deep. This waterway is the growth of many years' thought, and although the depth has been increased from time to time it has not kept pace with the growth of commerce on the lakes.

Contracts already have been let for the construction of a lock at the Soo, which will accommodate three of the largest vessels on the lakes at one time. The depth of water over the sill of the new lock will be 26 feet and the cost of the project will be approximately \$7,700,000.

Thomas J. Dolan, of Chicago, general secretary of the International Brotherhood of Steam Shipmen, Men and Dredge Men, who participated in the council of labor last week at the department of commerce and labor, is vigorously urging the deepening of the Chicago to Buffalo channel.

RUSSIA AND OPEN DOOR

Czar Not Living Up to Agreement, Declare the Chinese.

London, Feb. 14.—Russian municipal administration of Harbin which China alleges constitutes the establishment of Russian territorial jurisdiction in violation of the Portsmouth treaty, is again receiving attention by the British foreign office.

The Chinese minister has made representations to Sir Edward Grey, secretary of state for foreign affairs, on this subject, but Great Britain, being without a consul at Harbin, has been unable to establish the facts. If, however, they are found to be as China alleges, foreign office officials state that Great Britain and the United States will act together to represent to Russia the necessity of observing treaty obligations.

It is understood that American Consul Fisher at Harbin has expressed dissatisfaction at the attitude of Russia, which Great Britain and the United States had hoped would be changed after the representations of last year.

This seemingly small matter is viewed as affecting the whole question of the open door in Manchuria, for if Russian ownership of the North Manchurian Railways confers the rights of territorial authority, the same will apply in the south where the Japanese are supreme, and China's sovereignty thus would become merely nominal.

ALL THE NEWS THAT IS NEWS

ANY IN THE SPORTING WORLD

SIDE LIGHTS ON MANY SPORTS

Coverpoint's Philosophy

An expert says that golf tries the temper more than any other game. We are a little equally on the try business, but we know that it has broken a few fine homegrown tempers. When a man takes a swat at the golf, perchance, and grows up a while, he is not alone, he is not pleased to hold converse with.

They bet in thousands in Cobalt and Haliburton on these nice hockey matches. Well, that is about all the excitement they have up there, and as plenty of money has gone into that game from which no dividends ever, or seldom, or ever, or once in a while or some times return, let them bet it. At least it is needed for the bank to stage a prize fight, and it will become the Goldfield of Canada.

There was a little slaughter in the Brantford-Berlin hockey game the other evening, and the rude villagers were treated to a nice exhibition of rowdiness. They are paying for it, so let them have all the fun they want. On with the slaughter, let the dividends be where they may.

J. Johnson has come through with a challenge to fight any man in captivity for a prize fight. He is not heard a noise like an answer from J. J. Jeffries up to now.

Tom Longboat states that he is tired winning races and other men getting the credit of it. He should understand why he does not get the credit for being first runner. He has a great pair of legs, nothing else.

Official statistics are not to hand, but we figure that the day's vainglorious averages of some of the baseball players are as follows: Fielder Jones 359, Frank Chance 388, Charlie Schmidt 388, Harry Wagner 599, Mike Donlin 230, Frank Evers 610, and others just average.

A New York man dropped dead when he was told he had just been left \$100,000. Likely disappointed because they figured out he was a piker. Why did they not make an even \$100,000,000.

Longboat has many troubles as an ordinary individual. One day he wants Plangan to manage him again, which means that he thinks he is getting the small end of the salary.

business, and in the next breath almost he wants nothing more to do with the Irishman. He is about as dependable as a flea.

Tom Plangan balks at the job of managing Longboat again. He figures that Jimmy DeForest, with a knock-out punch in either mitt, is the proper chap to make the Indian do what he is intended to.

Just to show that the Canucks were the thing in curling, they took the Scotchmen out of the door, and put a fine crimp into their hopes. The visitors continue to curl well, winning with great regularity. It seems that curlers, not good entertainers, went abroad.

The Yale University boxing instructor got the notion that he would be a prize fighter, and put on the mitts with a trial horse who beat him until he could not hear the alarm clock. He went back to instructing again. It is not a dangerous game.

George M. Cohan comes through with the story that he will pay part of Mike Donlin's salary to see him with the Giants. Help both parties a little, does that.

Having inveigled Longboat into a 15-mile race, Shrubbs is credited with being a strategist, while the Indian, in accepting, is supposed to possess no more brains than a private detective. Shrubbs has Longboat where he wants him, is not only the cry of the New York press, but also of remittance men from over the water.

Englishmen are naturally looking for a chance to clean the slate and purge themselves of this latest defeat. But will they? Ah, that's the question that cannot be answered by even an official handicapper. The Indian has shown that when in good shape he can navigate the high seas of athletics and develop the speed of a Mauretania.

Shrubbs may have selected a job which he will find hard to compass. Like every other great athlete Longboat will some day have his colors torn, but the day is not yet. The Englishman may find it a far cry from the mark to the tape.—Toronto Telegram.

over "Packy" McFarland, "Cyclone" Thompson, Tommy Moore, Leach Crozier, Freddie Welsh, or any other. In fact, I have placed Nelson among the greatest fighters in the world's pugilistic history. He possesses a better right hand than any other, and as much endurance as "Kid" Lavigne, and as much nerve as any pugilist that ever lived.

I have thought what a great fight "Kid" Lavigne would have made with Nelson. In many respects Lavigne was Nelson's equal and in head and brawn he was even better. Nelson, the Battler, look upon Lavigne's fight with Joe Walcott as one of the greatest in all the annals of pugilistic history. Walcott was looked upon as the greatest negro battler in the world for his inches. He was undoubtedly a more wonderful fighter than Johnson, Scotchman, out door, and put a fine crimp into their hopes. The visitors continue to curl well, winning with great regularity. It seems that curlers, not good entertainers, went abroad.

Fierce Battle Is Recalled. In the fight between Lavigne and Walcott the two men took and gave more punishment than any two fighters ever took or gave the same distance. And neither ever put up as game or great a battle after the contest was over.

If Nelson met Walcott under the same conditions today I do not believe he would be able to take what Lavigne did in that battle. Nelson is a great fighter, but he is not a battler. Nelson I will say now that he is certainly the greatest lightweight of his time.

If Joe Gans couldn't whip the Battler what show will either McFarland or Welsh have to beat him? The number in his "personally" conducted tour of the high water mark of boxing. Several of the players will take their wives, and in the party will be several guests of the master of the Soak, a corps of newspaper men and some coast, picked up en route.

A special train is to be a thing of wonder, with Turkish bathhouse aboard and all the comforts which most homes lack. Up ahead will be a composite buffet-library car, which will vie for popularity with the observation-compartment car on the rear end. Two sleepers and a diner will complete the train, which will be one of the most comfortable of the western can select from its most able trainmen.

The Sox are due to arrive in "Prisco" March 1, the route taking them through Omaha, Cheyenne, Ogden and Reno. As soon as the squad reaches "Prisco" it will split into two sections, team No. 2 going to Los Angeles to put in a couple of days at practice before playing its first game at San Diego March 4. "Dor" White will be the pitcher for the first game, but it may not be convenient for Comiskey to grant him that favor, as the team intends to boss the second team itself, at least a part of the time.

HE KNOCKS HAYES

Johnny's Fame Is Turning to Something Less Pleasant.

This question is being asked in the United States in connection with the stories circulated that the Olympic Marathon winner had been barred from racing in Madison Garden.

Harry Pollock has written a letter to the New York press as follows: "There have been several statements published recently to the effect that Johnny Hayes has been barred from taking part in any Marathon races held at the Garden, and that Dorando will not give him another race. If Hayes was barred so far as we are concerned from any Marathon, he would certainly have no one to blame but himself, and no one knows this any better than this same Mr. Hayes. The truth of the matter, however, is that from the impression that Hayes has evidently given his friends.

"Dorando" was twice since his match with Hayes in the Garden last Thanksgiving eve offered to give him a return match, once in a race to be promoted by Jim Hurt, St. Louis, and the other offer was to give him the proposition for Dorando to race there was first broached. Both times Hayes declined he was not in condition to go.

"To make a long story short, if Mr. Hayes is so anxious for a match, and so confident that he can defeat Dorando as he seems to be from his statements, he can sign up any time he wants to race the Italian, winner take all. Maybe he would be anxious for a return match along these lines. Very truly,

"Signed" HARRY POLLOCK."

GREEN SICKNESS

A DISEASE OF YOUNG GIRLS.

INTERESTING AND SUGGESTIVE ADVICE THAT ALL SHOULD READ.

Many mothers will echo the conclusion expressed in a very interesting and suggestive letter written by Mrs. Zacharia Pollard, of Grand Bay. "It is one of the illusions of motherhood that once the disease of childhood has been successfully passed a smooth road lies before their dear ones. Boys bray themselves, or perhaps break a limb, but the physical history of the young girl is subject to so many dangers, it is only when some great one has been successfully overcome that we realize how many dangers there are. My eldest child, a daughter, just as she had entered upon the sixteenth year, suddenly developed weakness, her color faded, some unpleasant heart symptoms indicated a lowered vitality of that organ, but she would not let me know. The bodily functions were obstructed, and a waxy or pallid, or yellowish skin gave her a ghastly look. The doctor's tonic failed to improve the symptoms, we decided to try Ferrozene so highly recommended in the newspapers. It was probably three weeks before any improvement was noticeable, but once that Ferrozene checked the strengthening-down process the upward advance was rapid. I suppose if I had neglected the fact that I was a mother, I would have fallen into permanent weakness as it is I am deeply thankful that Ferrozene has completely restored my daughter to vigorous health.

No tonic so nourishing, as strengthening, as Ferrozene. It gives you a grand appetite, brings fine color, a healthy glow to the cheeks. If you gain in weight, think it over. Ferrozene is just what every person in poor health requires. Sold by all druggists, 50 cents per box or six boxes for \$2.50. Try Ferrozene today.

WHITE SOX FLIGHT TO CALIFORNIA

Famous Chicago Nine Will Travel 8,000 Miles in Spring.

Chicago, Feb. 1.—Luxury and style in travelling are well known to the White Sox, who went to the City of Mexico as champions of the world two years ago, and to California last spring in one of the most special trains ever sent out of Chicago. But when they leave here a week from next Friday night at 8 o'clock, they will be taken on a physical tour to San Francisco in a de luxe edition of the Northwestern's Overland Limited.

It is great trip that the Sox are soon to undertake. They are going to cover about 8,000 miles in pursuit of physical condition and artistic skill, which are counted on to bring to Chicago the American League championship for 1909. Four solid weeks will be spent in the sunshine of the Golden State. The regulars will put in an additional week in the Southwest, and the second division of the team is returning via the Reno-Salt Lake City-Ogden route.

The Sox will be taken on a physical tour by President Comiskey, and the number in his "personally" conducted tour of the high water mark of boxing. Several of the players will take their wives, and in the party will be several guests of the master of the Soak, a corps of newspaper men and some coast, picked up en route.

A special train is to be a thing of wonder, with Turkish bathhouse aboard and all the comforts which most homes lack. Up ahead will be a composite buffet-library car, which will vie for popularity with the observation-compartment car on the rear end. Two sleepers and a diner will complete the train, which will be one of the most comfortable of the western can select from its most able trainmen.

The Sox are due to arrive in "Prisco" March 1, the route taking them through Omaha, Cheyenne, Ogden and Reno. As soon as the squad reaches "Prisco" it will split into two sections, team No. 2 going to Los Angeles to put in a couple of days at practice before playing its first game at San Diego March 4. "Dor" White will be the pitcher for the first game, but it may not be convenient for Comiskey to grant him that favor, as the team intends to boss the second team itself, at least a part of the time.

BLUE LABEL SEVEN DEFEAT WANDERERS

Cigarmakers Down the Fast London South Team 2 to 0.

The Blue Label hockey team of the Cigarmakers' Union defeated the South London Wanderers at the Sluice street rink on Saturday afternoon by 2 goals to 0. The game was fast from start to finish. Good combination throughout the game by the Blue Labels was accountable for the defeat. The Wanderers played a fine game, but they were checked close. At half time the score was 2 to 0 in favor of the Labels, and the Wanderers were in a bad way for the good work of the Blue Labels.

Forbes in goal for the good work of the Blue Labels. Macfie also played a strong game, stopping everything in sight. He was one of the best players in the rink. Homer Pearson was referee, and kept the game well in hand, which helped to make a good exhibition. The lineup: Blue Labels: Goal.....Westman; Point.....Poulton; Defence.....Evans, Stevens, Rover, Turner, Gregory, Centre.....P. Turner, Wazlawie, Right wing.....J. Clark, Left wing.....A. Turner.

JOCKEYS BADLY HURT AT TAMPA

Murphy and Griffin Pinned Beneath Their Mounts — Saturday's Winners.

Tampa, Fla., Feb. 13. — The weather was fine and the track fast, with the third race the feature, at the fair grounds today. Sixteen closed very fast at the start, but only one, Tom Roseburg II, who reduced the track record by half a second in this race. In the fifth Judge Dunbar was knocked back on Drake, which fell Wine Merchant, Lord Direct, and Washakie fell over him, and Jockeys Murphy and Griffin were badly hurt. The race was a close one, with the sixth race, forced Platt to the fence, with the result that Platt was knocked out of the race. Pickens was set down for three days and fined \$20. In the first race Klamesha II. was bid up to \$100, but protected by her owner.

ACTORS ARE INTERESTED

Theatrical people, from the nature of their profession, are compelled to guard most carefully against contracting even the slightest cold because of the effect on the voice. Probably no class of professional people are more exposed to draughts, dampness and sudden changes of temperature, inviting throat and bronchial trouble. A short time ago a company of players resided in Louisville from a one-night stand in a smaller town nearby, every member of which was suffering from hoarseness, resulting from cold. They were compelled to open the show that night, and the manager was at his wit's end. One of the chorus girls, however, had a formula for coughs and colds which had been cut from a newspaper, and, going to the nearest drug store, had the druggist mix a half ounce of Virgin Oil of Pine with two ounces of glycerine and a half pint of good whisky. Taking a teaspoonful every four hours, she had a sufficient quantity to share with the rest of the company, relieving the hoarseness in every case.

FIRST CHURCH DEFEATED

THE NEW ST. JAMES

First Presbyterian Church defeated the New St. James' Presbyterian Church on Friday afternoon at Westminster rink by a score of 2 to 1.

Mr. Parsons refereed the game and his decisions were fair at all times.

The line-up was as follows:

First Presbyterian—Allison, goal; MacKenzie, point; Hamilton, cover; Alken, rover; Drinkwater, centre; Phelps, right; Shawler, left.

New St. James—McCrinnon, goal; McClurg, point; Ferguson, cover; Keyes, rover; McCullum, centre; Culbert, right; Leckie, left.

Referee—Parsons.

TWO NEW WORLD RECORDS TO MEET

Geo. Bonhag Lowers Mike Driscoll's Mark in Two-Mile Event.

Madison Square Garden, New York, Feb. 13.—Columbia University's indoor relay hockey carnival at the Madison Square Garden tonight was productive of two new world's indoor records as well as many stirring finishes.

Harvard won the honors in the one-mile intercollegiate championship relay, leading all the way, while Yale won the first prize in the two-mile intercollegiate event with Pennsylvania second and Cornell third.

Running from scratch in the two-mile handicap, George V. Bonhag, of the Irish-American A. C., lowered Mike Driscoll's world's indoor record of 9:28 2-5 by four-fifths of a second. Bonhag's figures were made over the same track last November. Bonhag's new figures are 9:27 4-5.

In the one-mile athletic club relay the New York team finished third, but was disqualified for fouling.

McFARLAND GOING BACK

Chicago Lad Believes He Didn't Get a Square Deal.

Chicago, Feb. 14. — Packey McFarland returned from the coast yesterday, and announced he didn't care if he ever saw California again. "I am going back, however," said the little stocky fighter, "because I think I can force the coast promoters to pay some attention to me. With the fight managers and fight writers out there their idea is to hog the Welsh along and get him in on the ground floor for a battle with Nelson. Of course, they can have their favorites if they want to, but they ought to try to rob someone else to gain their ends. They wanted me to fight under conditions that would have defeated me before I entered the ring. I think I can get plenty of backing here in Chicago, and when I go out again, which I will do as close up some business deals here, I will let the money do the talking."

Saturday's Hockey

Cayuga, Feb. 13. — Waterford defeated Cayuga in a scheduled game at the Southern Counties Hockey League last night by a score of 6 to 5. The ice was soft and the play was slow.

Sepoys Lost.

Wingham, Feb. 13. — Wingham defeated the Lucknow Sepoys here tonight by a score of 6 to 2 at half-time. The game was witnessed by one of the largest crowds of the season.

Glencoe, Feb. 13. — A side bet of \$50 is to be played for by Alvinston and Glencoe at the St. Thomas rink, Monday night, Feb. 15.

Alvinston already was defeated twice by the local boys, but are evidently not satisfied. A large crowd of rooters will accompany the boys and a good hot time is assured by all.

Vics Defeat Toronto.

Montreal, Feb. 13. — In the inter-provincial union series here tonight, the Victorias defeated the Toronto A. C. team by a score of 6 to 5.

At half-time the score was 3 to 1 in favor of the locals, but in the second half the visitors loosened up, and at full time the score was a tie. The Victorias finally won out in the overtime. The game was close and fast, and great excitement prevailed throughout.

The teams were: Toronto—Archie, goal; Kidd, point; Cohen, cover; Martin, rover; H. Davidson, centre; Cosgrove, right; W. Davidson, left.

Victorias—Robinson, goal; Kennedy, point; Campbell, rover; H. Davidson, rover; Hall, centre; Payan, right; Gilbert, left.

TO ABOLISH RIVER NETTING

Angling Association Petition the Government to Help Preserve Thames Game Fish.

A very large and enthusiastic audience was present at the formal meeting at the Thames River Angling Association Branch of the Ontario Forest, Fish and Game Protective Association, held last night at the Chatham Hotel. On the platform with him was Squire W. H. Chittick, president of the London association. Mr. Marshall Graydon was the first speaker. He spoke of the phenomenal runs of fish up the river in the early days of London, while now the fish practically do not come up at all. This is due to the dam as Cashmere, and the practice of netting the river. Mr. Graydon spoke very strongly of the folly of the practice of netting the river, and of going to their natural spawning grounds in the upper reaches of the river. It is true that a law has been passed forbidding the use of nets in the river, but its operation has been something of a farce, as despite it, permits have been granted which bring back the netting to the old standard. It is a principle of law, he continued, that those living on the banks of a river cannot make such use of it as will infringe upon the rights of others dwelling by the same stream and placing nets in the river by a certain class of people for commercial purposes does distinctly interfere with the fishing rights of those living on the upper reaches of the river.

Mr. N. H. Stevens.

Mr. N. H. Stevens, president of the Chatham branch, was the next speaker. He spoke strongly against the practice of American fishermen being granted fishing permits, and taking the fish from the river. He also pointed out the disastrous results that followed the practice of netting the river. He pointed out the fact that the fish are being taken from the river, and are being sold in the market. He pointed out the fact that the fish are being taken from the river, and are being sold in the market. He pointed out the fact that the fish are being taken from the river, and are being sold in the market.

TO INLAND AUSTRALIA FOR YOUR HEALTH

ROUND TRIP ONLY \$100.

If you are a catarrh, asthma or hay fever sufferer, what would you say if the above offer was made to you?

How would you like to go to the mountainous forests of pine and eucalyptus, where catarrh and asthma have been cured by the pure air, and to have every morning, to spit out the lump of disgusting mucus which the healing, antiseptic balsams purify the air and kill all germs in the air.

You can't go to this ideal spot, of course. You haven't time, and possibly not money.

Ask W. E. Strong, 184 Dundas street, about Hymel, the Australian dry air cure. Get an outfit, which includes inhaler, for \$1, breathe the same air that you would find in Australia, and if it does not heal the raw membrane and cure you of catarrh, snuffles, cough, or asthma, you can have your money back.

THE WHISTERS

The Tecumseh Club Concludes a Successful Series of Games.

For some time past the Tecumseh Whist Club has been holding a very successful series of games. These have aroused a considerable amount of interest, and some very pleasant evenings have been spent.

Dr. J. Wyckoff presented a very handsome cut glass berry dish as a prize for the winners in the series, which was open to club members only, and was played off as a Wednesday night series. There were twelve games in the series, and it was necessary to play nine to have a winner. Dr. Wyckoff himself took the highest score of 7-2-0, but as he had only played in six games, the score, of course, was not entered in the contest. Mr. G. E. Rippe was the winner in the series, with plus 4-2-0.

The scores in the series were as follows: P. E. Rippe—Plus 4-2-0; E. J. Sanders—Plus 2-5-0; F. F. Currier—Plus 2-15-0; A. J. Doggerell—Plus 3-10-0; W. D. Benson—Plus 2-2-0.

To increase the interest in the games the Tecumseh club has decided to have an open night every Wednesday evening, when all who are interested in the game, whether members of the club or not, will be made most heartily welcome. The scores of the series will be posted on the board, and all who are interested will accept the invitation to meet with them on Wednesday evenings to enjoy a social game.

DANDRUFF GERMS MUST GO

In Canada the dandruff germs must go. The war of extermination has been declared. The battle has begun, and already thousands of intelligent Canadians have permanently rid themselves of this filthiness.

Today it is no more necessary for a man to have dandruff in his hair than to have tartar on his teeth.

Dandruff can never be cured until the cause is removed. The cause of dandruff is the dandruff germ, and dandruff germ is conquered and destroyed.

And millions of dandruff germs have been destroyed, thanks to the great scientist and dermatologist who gave to the world Parisan Sage, the only real dandruff cure and hair grower the world has ever known.

If you have dandruff, Parisan Sage will cure you in two weeks, or your money back. Ridding the scalp of dandruff, Parisan Sage is guaranteed to stop falling hair and itching of the scalp. It is not a dye. It is a prime factor in the cure of dandruff. It makes the hair soft, lustrous and beautiful, and is not sticky or greasy.

A large bottle for 50 cents at W. T. Strong's, 184 Dundas street, London, or charges prepaid from the Canadian makers, Groux Mfg. Company, Fort Erie, Ont.

BASKETBALL.

A very interesting game of basketball was played Saturday night at Westminster rink by a score of 34 to 10. The players were:

Intermediates—Quick, captain; W. Watts, G. Long, R. Skinner, and G. Clark.

Juniors—E. McKay, captain; S. Burgess, I. Hodgins, E. Harris and R. Willis.

Dr. C. W. Andrews, of the geological department of the British Museum, has started on a scientific expedition to Christmas Island, in the Indian Ocean. Ten years ago the island was uninhabited. Since then it has been favored by the natives, and there are now a number of persons there.

The Oregon State passed a bill providing that any candidate who signs a pledge to support certain bills shall be disqualified from holding office hereafter.

HOW GRANITES WON THE TANKARD

Story of the Finals in the Cup Match With the Ingersoll Rink.

Mr. Charles O. Knowles, formerly of the Advertiser staff, and now telegraph editor of the Toronto Telegram, himself one of the Granite team, gives the following vivid story of how Ingersoll lost the Ontario tankard finals to the Toronto Granites.

It was after 3:30 o'clock when Granites and Ingersoll started on the long, hard grind of 22 ends, which makes winning the tankard such a big day's work—and the losing of it so much harder. Tom Rennie took on Summer, and Tom Wilson on Ingersoll. The first shot slipped past Ingersoll's counter-three.

But Granites' fears and Ingersoll's hopes were alike short-lived. Tom came back to the good old draw game that fits him and the keen ice so well, and when you are a good player, you only get five shots in the remaining twenty ends you realize that no one on the Granite rink was missing much. To be sure, Summer and Ingersoll have curled. There's something in that Rennie name that gets to men from the rural constituencies, and it seemed to affect certain members of the Ingersoll rink. But that's not the only reason the final score was, Rennie 29, Summer 5.

On the other rink, Tom Wilson started in to make a runaway race of it with the ponies, whose lead had devoured a fit of Ingersoll's hope. With the score 9 to 2 in Granites' favor he settled away, and the whole bunch of ponies got into their nice draw game. And when the Granites tried some running shots, Ingersoll kept right on coming. They pulled down that Granite majority and even got a slight lead. Then Tom Wilson steadied his rink away. His running mate had a good lead, and it was the tankard they were both after. So if Ingersoll got one, and things looked as if there was a chance for more, Tom played safe. On more than one end both sides were guarding, the one to save the shot, and the other to cut off chances for his getting more.

But this only lasted for a time, for the Wilson rink soon came back to their game and started members of their share of the counters. The ponies curled away steadily and well to the finish, but when the returns were all in the score board showed Wilson 21, Robinson 16. And Granites were winners of the tankard by a total score of Granites 50, Ingersoll 25.

President Davie Carley, of the O. C. A., at once presented the silver cup to J. Dobson Shields, president of the Granites, who responded with a burst of eloquence, and appointed the hall rink to escort it to the Granite Club, where it was welcomed by a great protective display.

personal supervision of Geo. H. Orr.

DEMONS AND PIRATES WILL CLASH TONIGHT

The Free Press Pirates will be led to the slaughter this evening in the Princess Rink, between 6 and 7 o'clock, by The Advertiser's team. The run should be fast and furious—and it is going to be a slaughter.

DEMONS AND PIRATES WILL CLASH TONIGHT

animation which would make her no-princeless even if she were not a princess. She is a little curly haired, a little round her rosy face. Having a quick wit and a keen mind, she manages to hold her own in the lessons and she takes with her brother Albert.

Brought up almost entirely with her five brothers, she has no girl friends. She is a little bit of a tomboy, and pines and falls like a small boy. She can play good cricket also, and she

Correspondence invited regarding investments, bonds and debentures. Send for our list.

LIVE HOG PRICES DROP A NOTCH

No Great Demand for Pork at Present Time—Other Quotations.

Eleven loads of hogs, a couple of loads of straw, one of oats and one of live hogs comprised the offerings on the market this morning.
The price of hogs dropped from \$6.75 to \$6.50, as there is at present no great demand for pork. Mr. Dan McIntyre states that the packing companies are not looking for hogs and that he has few orders to fill.
One load of oats sold for \$1.17 per cwt.
Wheat is still quoted at \$1 a bushel, although the deliveries have not increased to any extent.
Hay sold this morning from \$10 to \$11 per ton, while straw was quoted at \$5.50 a ton.
The farmers, with one exception, brought their produce in on wagons, and all report heavy wheeling. The exception is not of the best as the snow is gritty. Following are today's prices:

Grain.
Wheat, per bu. \$1.00 to \$1.05
Oats, per bu. 1.17 to 1.20
Corn, per bu. 1.10 to 1.15
Barley, per bu. 1.10 to 1.15
Rye, per bu. 1.10 to 1.15
Clover, per ton 12.00 to 12.50
Timothy, per ton 12.00 to 12.50
Hays, per ton 12.00 to 12.50
Straw, per ton 5.50 to 6.00

Hides and Wool.

Mr. Furness Ill.
The many friends of Mr. W. C. Furness, manager of the Great Western Telegraph Company, will regret to learn that he is ill at his home that his condition is regarded as serious.

A Recital.
An excellent programme was furnished by Mr. W. H. Hewlett, of Hamilton (formerly of London) at his recital in the First Presbyterian Church on Saturday afternoon. A large audience was greatly pleased with the different numbers.

Well Known in London.
The death occurred in Toronto on Saturday of Mr. Thomas MacKenzie Bayne, manager of the Walker House. Mr. Bayne was 67 years old and had been ill for some time. His death occurred at the residence of his sister, Mrs. Laird, 336 Brunswick avenue. The funeral will be held in Toronto on Tuesday.

Pupils' Recital.
The pupils' recital, held on Saturday afternoon in Conservatory Hall, was largely attended and a programme of violin and piano selections was artistically rendered. Those taking part

Cyrus Bush Arrested.
Saturday evening Constables Cor-saut and Campbell arrested Cyrus Bush, a man accused of being insane, and of using threatening language to a young girl. Bush appeared before Squire Chittick, who remanded him to jail till Sunday.

Dance at Melrose.
A very enjoyable time was spent at the home of Mr. Higgs, Melrose, on Thursday evening last, when a large number of their friends from the city gathered for a dance and social evening. The evening was spent in dancing, card-playing and general sociability. The music was under the auspices of the Melrose Social Club, furnished by Mr. Lorne Nixon.

India's Millions.
J. Mahomed Ali gave an interesting address last night at the Congregational Church on "India's Millions." The speaker dealt at length with the customs and habits of the Indian people and conditions as they are at the present time. He also spoke most hopefully of the future of the country, and of the work that is being done in teaching the doctrines of Christianity there.

Buried in Woodland.
The funeral of James R. Allen, whose death occurred in Flint, Mich. on Thursday, was held yesterday afternoon from the residence of Mr. A. E. Reeves, 448 Woodmill avenue, in Woodland Cemetery, and was largely attended. The funeral services were conducted by Rev. Mr. Cox. The funeral was held under the auspices of Court Middlesex, No. 118, of the Canadian Order of Foresters, of which deceased was a member. The pall-bearers were, three brothers and three brothers-in-law of deceased.

Sovereign Bank Won.
A London case, that of the Sovereign Bank vs. Mr. Dan McIntyre, came before the divisional court at Toronto on Friday. J. M. McEvoy appearing for the defendant on appeal from the judgment of Judge J. J. B. McKillop, for plaintiff, contra. The action was on a promissory note in favor of the plaintiffs. Judgment (G.) The trial judge held that the evidence led to the inference that the defendant knew when giving the note that its proceeds would be used in payment for the ten shares of the bank stock at 140. The onus is upon defendant to show want of consideration. The circumstance that after the giving of the note the defendant received and indorsed six checks on their face appearing to be for dividends, affirm the view that the con-

**WE SELL PURE
MAPLE SYRUP**

Dundas 1866 and 317.

sideration was the allotment to the defendant of ten shares of stock. Appeal dismissed with costs. It may be that notwithstanding all that occurred the defendant did not become a shareholder in the bank, and should be at any time desire to take this attitude, this order shall be without prejudice to his rights.

Damages \$50.
The fire brigade had a run to the residence of D. J. Curran, St. George street, yesterday afternoon. A defective fire grate was the cause. The damage was about \$50.

**DEAN MAHONEY
IS NEW BISHOP**

Only the Official Announcement
Is Lacking Now.

Though there was no official announcement made in either London or Hamilton on Sunday, regarding the new bishop for London, it is as was stated in Saturday's Advertiser, taken for granted that Dean Mahoney, the brilliant Hamilton priest, is the man. In fact, it was stated to The Advertiser on Sunday that it has been known in London since the first of January that Dean Mahoney is to be the new bishop, and that for some time preparations have been going on for the changes which his appointment will necessitate in London and the diocese.

It is altogether probable that the official announcement will be made some day this week. The Dean is only 48 years of age, and was born near Hamilton, Ont. For nearly a decade he has been the present Archbishop McEvoy was rector of Hamilton, and since Bishop McEvoy left Hamilton, about nine years ago, Dean Mahoney has been rector there. He is a profound scholar, and speaks English, French and German with equal fluency.

**GEORGE JACKSON
IS DANGEROUS**

Was Allowed Out on Bail, but Was Promptly Rearrested.

George Jackson, who appeared before Magistrate Wallis on Saturday morning on the charge of his wife that he had used threatening language and was dangerous to be at large, and who for some reason was allowed out on bail, was rearrested on a second warrant on Saturday night. Jackson has been confined at the asylum at different times, and it was not thought wise to permit him to be at large when he had showed evidences of a violent tendency. He appeared before Squire Chittick, and was remanded to jail.

Many hundreds of sheep were lost in Kintyre in the recent snow storm. The loss on one farm alone is calculated at \$1,000.

**BOARD OF GOVERNORS
HELD A MEETING**

Western University Representatives Had But Little to Do Saturday.

There was little business transacted at the regular monthly meeting of the board of governors of the Western University held on Saturday afternoon. Good reports continue to come in to the governors regarding the interest the university is awakening

through Western Ontario, and the future of the institution seems assured. The question of a Government grant was discussed informally. It is expected that the Western will be given fair treatment by the Ontario Government.

The usual accounts were passed. Among those present were Mr. Justice R. M. Meredith, chairman, T. H. Purdom, K. C., J. H. Chapman, J. O. Drougale, Dr. John D. Wilson, T. H. Smallman, President James and Secretary Baker.

An Unequalled Opportunity

Stocktaking has shown us where it is advisable to make changes in the arrangement of our stock and ware-rooms. These changes demand the reduction of stock in one department, the clearing of certain lines in another; expansion in certain lines, contraction in others; and to accomplish all this in as short a time as possible we have decided on a
