OTTAWA, CANADA

BULLETIN No. 316

NATIVE WINE

OTTAWA, July 8, 1915.

J. U. VINCENT, Esq.,  
Deputy Minister Inland Revenue,

SIR.—I beg to submit herewith a report upon one hundred and eighty seven (187) samples purchased as *Native Wine*, in January, February and March of this year. These have been obtained at various points throughout the Dominion, and it may be fairly assumed that they represent the article as sold in Canada.

No extensive inspection of Native Wine has been made by this Department since 1908 (See Bulletin No. 160). Meantime the article has been tentatively and partially defined by Order in Council of February 8, 1911 as follows:

1. Wine is the product of the normal alcoholic fermentation of the juice of sound ripe grapes, neat, or variously modified, and followed by a proper cellar treatment.

2. All beverages sold or offered for sale as Wine shall be distinctly labelled to show the place of their production; and shall meet the requirements for wine, which are established by law in the place of their production.

3. Wine made in any part of Canada shall be labelled in such a way as to show the locality in which it has been produced. The specific name of such locality together with the names of the makers, shall be held to be a legal description of the article.

NOTE.—The defining of types of Canadian made Wines is postponed until sufficient data have been secured.

The present inspection has for one chief object, an attempt to secure data which might serve to classify the various types of native wines. Many of these are called ports, other evidently aim at the claret type. Most of them are merely described as *Wine*; and a few of these are fairly dry; i.e. contain but little residual sugar.

Of the samples herein reported forty (40) are received in bottles which bear labels, having the name of the manufacturer and the place of production printed thereon, thus meeting requirements of subsection 3 above. These I have indicated as properly labelled. Several samples are distinguished by a monogram or private marks, which may possess a meaning to the initiated, but cannot be held as fulfilling the requirements of the Order in Council.

Most of these samples are supplied in bottles bearing no label; or having a label on which the name of manufacturer and place of production does not appear. In this matter they fail to meet legal requirements. It is of course, quite possible that the original container (barrel or keg) in which the shipment was made, may have been labelled in such a way as to show where and by whom manufactured. This information should, however, appear upon each package sold at retail; the intention being to inform the consumer in the matter.

One sample (No. 60760) is labelled *Unfermented Port*. Such a name is, of course, a contradiction in terms. Unfermented grape juice is possible; unfermented *Port* is impossible. A port wine from which the alcohol had been removed might, correctly enough, be described as dealcoholized port.

Two other samples are grape juice and not wine. One of these is plainly labelled grape juice, and should not have been accepted by the inspector as a wine.

This report is intended to furnish information regarding native wines, and to inform the public as to the character of this article as found on our markets. Your advisory board will be able, it is hoped, in the light of the data herein placed on record, to make recommendations in the matter of classification of wines which shall serve to give greater definiteness and clearer meaning to such terms as Canadian Port, Canadian Sherry, Canadian Claret, etc.

Meantime, I would respectfully suggest its publication as Bulletin No. 316.

I have the honour to be, Sir,  
Your obedient servant,

A. MCGILL,  
*Chief Analyst.*
