PREFACE.

In presenting to Canadians this "Annual and Encyclopædia" it is confidently anticipated that the wealth of information it contains will secure for it a hearty reception throughout the Dominion.

In the compilation of this work, absolute accuracy has been aimed at. In view, however, of the multiplicity of statements and statistics involved, it is scarcely to be expected it will be entirely free from errors. The Editor, therefore, would feel greatly obliged if readers would acquaint him of needed corrections, so that they could be given effect to in subsequent editions. We cordially thank all those through whose courtesy we have been enabled to present such a variety of topics.

Our thanks are specially due to Mr. E. W. Bullinger for the use of "Bullinger's Postal and Shipper's Guide for Canada and the United States," and to Messrs. Hunter, Rose & Co. for the use of their "Interest Tables," which are a valuable feature of the work, also a lasting one.

In the statistics of Trade and Commerce, and other comparative reports for the years 1893-4 and 1894-5, it should be remembered that the fiscal year ending May 30th is referred to.

Trusts

The Toronto General Trusts Co'u

The Individual

Whom shall I appoint as my Executor and Trustee?

This is a question of the utmost importance to every man who has property to leave at his death, and there can be no doubt that a Trust Company, and not an individual, is in all respects best qualified for the purpose.

The Toronto General Trusts Co.

Through its organization in 1882, first inaugurated in Canada the system of a company performing such duties in place of individuals. Under its charter and letters patent the Company is authorized to assume the functions of Executor, Trustee, Administrator, Guardian, Committee, Receiver, etc., and to act as Agent for any individual who has been appointed to these offices.

Among the many special advantages which The Toronto General Trusts Company possesses, and which no individual can offer to the same extent. are (1) Continuity of Service, (2) Security, (3) Effective Management, and (4) Constant Supervision.

Continuity of Service.

A company never dies. In its hands, therefore, a trust, no matter how long its duration, is not liable to be interrupted by death, or to have the personnel of the trusteeship changed from other causes, events which are not only a very frequent cause of disastrous delay, but of loss and expense in the appointment of new trustees.

Security.

The large uncalled capital stock of the Company, its accumulated reserve funds, and invested capital, amounting together to over \$1,250,000, furnish the fullest guarantee to the public of the safety of all interests that may be entrusted to the Company.

Effective Management.

A company properly organized, as the Toronto General Trusts Company is, with a Board of Directors of the highest standing and a staff of trained officers, carrying on business on carefully considered principles, and with a special knowledge, acquired by large experience, of the best means of winding up estates and investing money, is admittedly in a better position to efficiently discharge the duties of an executor and trustee, as well as

all other positions of a kindred character, than individuals.

In the transaction of the Company's business every species of speculation is avoided, and all securities which the Company hold for each trust under its management, are kept entirely distinct and separate from all others, are registered in the books of the Company for the trust or estate to which they respectively belong, and may at once be distinguished

from any other security.

Constant Supervision and Inspection.

The affairs of the Toronto General Trusts Company are under the constant supervision of a Board of Directors, and Executive and Inspection Committees, whose duties are not only to supervise and direct, but to carefully check and inspect the securities of the Company; and, in addition, there is a quarterly inspection made of the books and securities of the Company by skilled auditors. The acts of the Company are participated in by these Directors and Inspectors, and are, therefore, open and not secret, in consequence of which any irregularity is next to impossible.

The Directorate of the Company not only embodies the combined wisdom of many experienced men, but its methods of management are more systematic than those of individuals; moreover the Company has an established reputation, which its managers are bound to uphold and increase. No better evidence could be furnished of the public appreciation of the usefulness of the Toronto General Trusts Company, than the magnitude of the interests entrusted to its care since the organization of the Company in 1882. These interests aggregate over \$15,000,000, of which there still remains under the care and management of the Company \$10,000,000, the balance, \$5,000,000, having been distributed to the parties interested.

Executors under Will.

Of all the offices which the Company is authorized to fill, none is more important than that of Executor, more particularly if the Will creates a trust extending over a long period of time. How thankless, enerous, and how disastrous often the office of Executor and Trustee is, not only to the individual charged with the trust, but to the trust itself and all interested, it is needless to say. There are cases in everyone's mind where a trusted adviser, Executor or Trustee has gone wrong, and those entitled to the funds of the estate have been ruined. No such experience has ever followed the appointment of a Trusts Company.

If a person is appointed Executor under a Will, and does not wish to act, he may renounce in favor of the Company, to whom Letters of Ad-

ministration with Will annexed can then be issued.

Administrations.

When a person dies without having left a Will it becomes necessary to take out Letters of Administration; but before such can be granted to individuals, bonds have to be furnished to double the value of the assets of the estate, and this bond remains in full force until the estate is closed and distributed. When infants are interested, as is frequently the case, this liability may extend over as long a period as twenty-one years. The appointment of the Toronto General Trusts Company entirely obviates the necessity for incurring such a serious responsibility on the part of individuals.

Care and Management of Securities.

The Company undertakes the care and custody of bonds, debentures, scrip, etc., and every description of security, and guarantees or insures them against loss by fire, theft, and accident, while in the possession of the Company. The Company also, for a very moderate charge, collects the coupons, dividends, and revenue from securities thus deposited, act as agent of the depositors generally, and pays all sums collected direct to the depositors themselves, or into their banking accounts at the various banks. The employment of the Company for these purposes obviates the necessity of entrusting the management of bonds and other securities to irresponsible persons.

Compensation.

Persons contemplating the appointment of the Company as Executor and Trustee, need have no fear of excessive charges for the performance of these duties, as its compensation is always subject to be fixed by the Court, and in no case is it greater than what is allowed to individuals. It will be quite evident, however, that the compensation can only be determined on full knowledge of the extent of the estate and the character of its assets, as well as the period it is expected to be under the care of the Company. If this information is furnished, the Company will be prepared to fix the rate of compensation before the Will is executed or the estate is assumed by the Company.

Solicitors.

The Company has, of course, its own General Solicitors, but it should be stated, for the information of the legal profession, that in all cases where a trust, estate or other business is brought to the Company by a solicitor, he is continued as the solicitor in the management of the legal work connected therewith.

Under the approval of the Ontario Government the Company is accepted by the High Court of Justice as a Trusts Company, and from its organization has been employed by the Court for the investment of Court Funds. The Company acts as Executor, Administrator, Receiver, Committee of Lunatics, Guardian of Children, Assignee of Estates, Agent, etc., and as Trustees under Deeds, Wills or Court Appointments or Substitutions; also as Agents for Executors, Trustees and others, thus relieving them from onerous and disagreeable duties. It Obviates the Need of Security for Administration. Estates Promptly and Economically Managed.

Money to loan at Lowest Current Rates, for long or short periods, and on most favorable terms, on improved Farm and City Properties.

J. W. LANGMUIR, Managing Director.

Epact 15	Solar Cycle - Roman Indiction			• •	. 9
Lunar Cycle, or Golden Number 16	Julian Period	*		 •	6609

The Year 5657 of the Jewish Era commences at sunset on September 8th. The Year 1314 of the Mohammedan era, or era of the Hegira, begins on the 12th day of June. 1896. The 60th year of Queen Victoria's reign, begins June 20th, 1896. The 121st year of the Independence of the United States begins July 4th, 1896. The first day of January, 1896, is the 2,413,560 day since the commencement of the Julian Period.

ECLIPSES.

In the year 1896 there will be four Eclipses, two of the Sun and two of the Moon.

I. An Annular Eclipse of the sun, February 13th, invisible in N. America.

II. A Partial Eclipse of the Moon, February 28th, invisible in N. America; visible generally in Europe, Asia and Africa.

III. A Total Eclipse of the Sun, August 8th, visible in N. America.

IV. A Partial Eclipse of the Moon, August 22nd, visible in N. America.

TIMES OF THE PHASES.

Moon enters penumbra	23	0	14 a.m.	Moon leaves penumbra 23 4 48 a.m	
	-		** **	A. M. J. M.	

Magnitude of the Eclipse = 0.74 (Moon's diameter = 1.00.)

MORNING AND EVENING STARS.

VENUS is a morning star to July 9th, and an evening star to end of year. MARS is a morning star to December 11th, afterwards an evening star. JUPITER is a mowning star to January 24th, an evening star to August 11th, and a morning star to end of year. SATURN is a morning star to May 5th, an evening star to November 13th, afterwards a morning star. MERCURY will be a morning star about March 5th, July 3rd and October 24th, and an evening star about January 24th, May 16th and September 13th.

The satellites of JUPITER are not visible from July 14th to September 10th, the planet being too near the sun. MARS will be in opposition to the sun December 10th.

CHRONOLOGICAL ERAS.

The year 1896 corresponds to the years 1704-05 of the Byzantine era, to 5656-57 of the Jewish era, to 2649 since the foundation of Rome, to 2672 of the Olympiads or the fourth year of the 668th Olympiad, to 2556 of the Japanese era, and to the 28th year of the Meiji, and to 1313-14, of the Mohammedan era, or the era of the Hegira.

HISTORY OF THE DOMINION OF CANADA.

According to what may be called tradi-tion, rather than history, the shores of North America were visited as early as the North America were visited as early as the 10th century by parties of Norsemen, some of whom settled in what is now the State of Massachusetts, but were eventually either killed or expelled by the natives. The earliest authentic record of the landing of Europeans on these shores is that of John and Sebastian Cabot, two navigators sent out by Henry VII. of England, who reached some part of the coast of Labrador on the 21st of June, 1497, and two or three days afterwards discovered the Island of Newfoundland. foundland.

little later a Florentine go Vespucci visited t Amerigo Vespucci visited the New World, and wrote an account of his travels; and it is from his name the continent is called America. Columbus did not reach the mainland until 1498, one year after the landing of the Cabots, who may justly claim the discovery of America.

succeeded in another w Sebastian another voyage, and succeeded in making his way into what is now called Hudson's Bay, but exploration of the mainland was not made until the expedition of Jacques Cartier in 1534, who landed in the neighborhood of Miramichi Bay on the 4th of July of that year, from which date Canadian history may properly be said to begin.

EARLY INHABITANTS.

Who the earliest inhabitants of the land thus discovered were is not clear, but it is known that the North American Indians were not the first to inhabit this continent, as many remains exist of a more civilized race. These, for want of a more definite name, are called the Mound-Builders. Heaps of earth of curious shapes are found all over North America (many of them in the over North America (many of them in the neighborhood of Lake Superior), and these "mounds," as they are called, contain the bones of men, and other animals, stone axes, copper tools and other articles, made with great skill and taste. Whence these clever and industrious people came is unknown, but it is thought they were originally from the South of Asia:

"A race that long has passed away,
A disciplined and populous race,
Heaped with long toil the earth, while yet the Greek

Was hewing the Pentelicus to forms Of symmetry, and rearing on its rock The glittering Parthenon."

NORTH AMERICAN INDIANS.

The Mound-Buildera were followed by a fiercer and ruder people, who cared for little but hunting and fishing, making war and roaming the forest. The principal tribes of these Indians, so called by Columbus (who supposed he had landed on India), were the Aigonquins, the Hurons and the Five Nations, or Iroquois. These tribes took a prominent and eventful part in the battles for prestige which took place in later years between the French and English.

COLONIZATION OF CANADA.

It was not until the year 1603, nearly fifty years after the landing and unsuccessful attempt at colonization by the French, under Jacques Cartier, that Samuel De Champlain, a distinguished naval officer, and Pontgrave, a St. Malo merchant, were sent out by the French to open a trade in furs with the Indians, and at the same time to civilize and convert them to Christianity. Their success in this attempt and subse-It was not until the year 1603, nearly

Their success in this attempt, and subsequent events of importance in Canadian history, are, in a work of this kind, best narrated in condensed form and chrono-

logical order.

1605—Founding of Port Royal (Annapolis)—
Acadia (derived from an Indian word
"Cadie," a place of abundance), by the
Baron de Poutrincourt.

1608—Secoi 1 visit of Champlain—Founding of Quetec, the first permanent settlement in Canada. The name is said to be an Indian one, "Kebec," a strait; 28 settlers wintered there, including Champlain.

1611-Establishment of a trading post at Hochelaga.

1613—St. John's, Newfoundland, founded. 1615—Champlain sailed up the Ottawa River, crossed Lake Nipissing, and descended French River into Georgian Bay and Lake Huron, returning by Lake Ontact

tario.

1620—Population of Quebec, 60 persons.

1629—In July of this year Quebec was captured by the English, under Sir Henry Kirke; 117 persons wintered there.

1632—Canada ceded to France by the St. Germain-en-Laye treaty.

1635—Death of Champlain at Quebec.

1642—May 18, Ville Marie (Montreal) founded by Maisonneuve.

1642-1667—These years were prolific of frequent and serious wars between the French and the Iroquois Indians.

1670—Hudson Bay Company founded.

1673—Count de Frontenac appointed Governor. Population 6,705. Cataraqui (Kingston) founded.

1690-Capture of Port Royal by Sir William

Phipps.
1692—Population of New France, 12,431.
1713—Treaty of Utrecht, by which Hudson's Bay and adjacent territory, Nova Scotia (Acadia), and Newfoundland, were ceded to the English.

1720—Population of New France, 24,434. 1739—Population of New France, 42,701. 1745—Louisburg, Cape Breton, taken by the English.

1748—Restoration of Louisburg, in exchange for Madras, India, by the peace treaty of Aix-la-Chapelle.

1752—Issue of the Halifax Gazette, the first

paper published in Canada. 1755—Expulsion of the Acadians from Nova Scotia.

1758-July 26: Final capture of Louisburg

by the English.

1759—The final struggle (in what is known as the Seven Years' War) for supremacy in Canada, between the French and English, commenced in 1756, but the series of events enumerated below, occurred in 1759.

[21]

Moscow first lit up with gas, Il Tay bridge disaster, 1879, 46 lir Texas admitted into the Unior Leon Gambetta died, 1882
Montgomery killed at Quebec.

228882

June 25-Capture of Fort Niagara by the English.

July 26-Commencement of the Siege of

Quebec.
Sept. 12—Battle of the Plains of Abraham. Defeat of the French by General Wolfe, who was killed on the field. Loss of the English, 700, and of the French, 1,500.

Sept. 13—Death of General Montcalm, commander of the French forces. Sept. 13—Capitulation of Quebec. 1760—April—Unsuccessful attack on Quebec

by General de Levis. Sept. 8—Capitulation of Montreal and com-

pletion of the Conquest of Canada.
Population of New France, 70,000.

1763—Treaty of Paris signed, by which
France ceded and guaranteed to England full right to "Canada and all its
dependencies."

1770—St. John's Island (Prince Edward)

1770—St. John's Island (Prince Edward Island) made into a separate Province.

1774—The Quebec Act was passed. This act gave the French-Canadians the free extended the Province of the Prince Catalogical Prince of the Prin ercise of the Roman Catholic religion, the enjoyment of their civil rights, and the protection of their own laws and customs.

1775—Outbreak of the American Revolution and invasion of Canada by the Ameri-cans, every place of importance rapidly falling into their hands, with the ex-

ception of Quebec. 1776—English reinforcements arrive,

the Americans were finally driven out.

1783—Treaty of Paris signed. In this the boundary line between Canada and the United States was clearly defined, viz.: The 45th parallel of latitude, the St. Lawrence River, the Great Lakes.

1784—Population of Canada, 113,000.

About this time began the migration of the United Empire Loyalists, the names given to settlers in the American States who had remained faithful to the mother of the Canada of er country. These were treated liberally by the British Government, and large tracts of land were granted to them in various parts of the country, particular-ly along the St. Lawrence and Lake Ontario.

This migration lasted for several years, the number coming over being probably from forty to forty-five thousand.

1791-The Province of Quebec divided two Provinces, Upper and Lower Can-Each Province to have a Lieutenant-Governor and a Legislative Assembly and Council, those of the Assembly to be elected every four years. The population of the two Provinces at this time was 161,300.

1792—First meeting of Parliament at Newark (Niagara), under Governor Simcoe. House of Assembly had 16 members. Dec. 17—Opening of Lower Canada Legislature under Gen. Clarke—50 members.

1796-The seat of Government changed from

Niagara to York (Toronto). 1806—Population of Upper Canada, 70,718, and of Lower Canada, 250,000.

1812—War declared between Great Britain and the United States. General Sir Isaac Brock being the then acting Lieut-enant-Governor of Upper Canada.

Aug. 11—Surrender of Detroit by the Am-

ericans under General Hull to Sir Isaac

Brock, assisted by Indian allies under Tecumseh.

Oct. 13—Battle of Queenston Heights. Total defeat of Americans. Death of

General Brock.
Nov.—Defeat of General Dearborn by Col. de Salaberry at Lacolle River. 1813—April 25—Capture of York by the Am-

ericans.

June 5-Battle of Stoney Creek and defeat of the Americans. ept. — Battle of Moraviantown.

Defeat Sept. — Battle of Moraviantown. Defeat of the British and death of their In-dian ally, Tecumseh.

Oct. 26-Battle of Chateauguay. Defeat of three thousand Americans under Gen. Hampton by Col. de Salaberry and four hundred French-Canadian militia.

Nov. 11—Battle of Chrysler's Farm. Defeat and rout of Gen. Wilkinson and the Americans by the Canadian militia

under Gen. Morrison.

1814—July 25—Battle of Lundy's Lane, and defeat of the Americans.

Dec. 24—War terminated by the Treaty

of Ghent.

Population of Upper Canada, 95,000, of Lower Canada, 335,000.

1818—Oct. 20—An agreement regulating the rights of Americans in the British

North American fisheries, signed in Lon-

1821--Commencement of the Lachine Canal. First vessels passed through in 1825 1831—Population of Upper Canada, 236,702, and of Lower Canada, 553,134.

1833—Aug. 5—The steamer Royal William left Quebec and arrived at Gravesend on the 12th of September. This boat was built at Quebec in 1830-31, and was the first steamer to cross the Atlantic, the entire motive power being steam.

1836-First Canadian railroad opened-from Laprairie to St. Johns.

1837-38—Outbreak of rebellion in both Pro-vinces. Causes:—In Lower Canada— The action of the Governors and the The action of the Governors and the Council in refusing to allow the Legislative Assembly to control the expenditure of revenues arising from timber and mining dues; the sale of Crown lands, and the taxes collected at the custom house. In Upper Canada—Abuses of public restrictions and more by of public positions and money by the Family Compact; discontent because the English Church clergy claimed that they alone were entitled to share in the Clergy Reserve grants.

The leaders in the Rebellion were William Lyon Mackenzie in Upper Canada and Papineau in Lower Canada. This "Patriot War," so-called, was suppressed in Upper Canada by the militia, and in Lower Canada by British troops.

1840-Death of Lord Durham, to whose wise exertions the subsequent union of the Provinces was mainly due.

1841—Union of the two Provinces, under the name of the Province of Canada, and establishment of responsible gov-ernment. The Legislature was to conernment. The Legislature was to consist of a Legislative Council and Legislative Assembly, each Province to be represented by 62 members, 42 elected by the people, and 20 appointed by the Crown

Population of Upper Canada at this time was 455,688.

his time

June 13—First united Parliament opened at Kingston by Lord Sydenham. 1842—Ashburton Treaty, which settled the boundary line between Canada and the United States.

1845—Large fires in Quebec City; 25,000 people rendered homeless.
1847—Telegraph lines established between

Montreal, Quebec and Toronto. 1848—The St. Lawrence Canals open for na-

vigation.

1849-Montreal riots over the passage of the Rebellion Losses Act, and Lurning of the

Rebellion Losses Act, and burning of the Parliament library.

1850—The Northern Rallway opened—the first locomotive railroad in operation in Upper Canada.

1851—The use of postage stamps introduced, and uniform rate of postage 3 pence per

½ ounce. 1852—Grand Trunk Railway commenced.

1853-May 9-First ocean steamer arrives at Quebec.

May 10—Canada Clergy Reserves abolished by British Parliament.

1854-Reciprocity Treaty with the United States. It provided for mutual rights of fishing in Canadian and American waters, for free interchange of the products of the mine, the forest, the soil and the sea : it allowed Americans the use of the Set. Lawrence River and Canadian canals on same terms as British subjects, and gave to Canadians the right to navigate Lake Michigan. This treaty was to last ten years.

1858—The decimal system of currency adopt-Ottawa selected as the permanent seat of the Government, and capital of the Dominion. Gold found in British

Columbia and Nova Scotia.

1860—Opening of the Victoria Tubular
Bridge by the Prince of Wales, at Mont-

This is the largest iron tubular bridge in the world, being 60 feet high in the centre and about two miles in length.

ept. 1—Corner-stone of the Parliament Buildings at Ottawa laid. Total cost of these buildings, with departmental buildings, about \$5,000,000.

1861—Population of Upper Canada, 1,396,091; of Lower Canada, 1,111,566; of New Brunswick, 252,000; of Prince Edward Island, 80,850; of Vancouver Island,

1866—Reciprocity treaty terminated by no-tice being given by the United States. March 9—Threatened Fenian invasion;

10,000 volunteers called out. June 1-Invasion of Canada by Fenians: Battle of Ridgeway, and retreat of volunteers

June 3-Fenians withdraw into the United States.

1867—The British North America Act passed by the Imperial Legislature.

July 1—Act for the union of Canada, New

Brunswick and Nova Scotia, under the Brunswick and Nova Scotia, Under the name of the Dominion of Canada. Government consists of a a Governor-General, a Senate of 72 members, and a House of Commons of 181 members. The names of Upper and Lower Canada were changed to Ontario and Quebec respectively. Lord Monck was the first Governor-General, and the first Parliament met on the 6th of November, Sir John A. Macdonald be-

ing Premier. 1868-T. D'Arcy McGee, M.P., assassinated

at Ottawa.

July 31—The Rupert's Land Act passed by Imperial Government provided for the acquisition by the Dominion of the Northwest Territories.

The Red River rebellion.

May 25—Fenian raid into Canada vigorous-

ly repelled by militia. 1869—Hudson's Bay territories purchased

for £300,000. 1870-July 15-Addition of Northwest Ter-

ritories to the Dominion, and admission of Manitoba into the Confederation.

1871—Admission of British Columbia into the Confederation.

Population of the four Provinces, 3,485,-761; of Manitoba, 18,955; of British Columbia, 36,224; and of Prince Edward Island, 94,021. Total, 3,635,001.

1873—July 1—Prince Edward Island admit-

ted into the Confederation.

1876-Opening of the Intercolonial Railway

from Quebec to Halifax.

1877—June 27—Great fire in St. John. N.B.,
Nov. 23. Award by Halifax Fisheries
Commission to be paid to the Imperial
Government by the United States of \$5,550,000.

DOMINION PARLIAMENT.

EXECUTIVE OF CANADA.

The chief authority in Canada is vested in the Queen, who has also the chief com-mand of all naval and military forces in

Her Majesty is represented by the Governor-General, who is appointed by the Queen, but paid by Canada, the salary being fixed at £10.000 sterling.

He governs under the advice of the Privy Council of Canada, which is responsible to Parliament.

The Governor-General as Executive Head summons, prorogues and dissolves the Parllament, and assents to or vetoes bills in the name of the Queen, but in the discharge of these duties acts entirely by the advice of the Privy Council, and in matters affecting the joint interests of Canada and England acts the part of Intermediary in adjusting the questions involved. The prerogative of the tive of mercy, formerly left in the hands of the Governor-General, is now administered on the advice of the Ministry. In case of the death, absence or incapa-

city of the officer comma the Dominion until another

THE PRIVY COUNCIL.

This office is not administrative, as are the various other departments. It applies

the various other departments. It applies the rules and ordinances which are put into effect by the several departments. It was created by the British North America Act, and all estimates, public bills, etc., are considered in Council before being submitted to Parliament, and all matters which are not purely departmental are first presented to this Council. presented to this Council.

Deputy Head and Clerk of the Council, J. J. McGee \$3,200 Assistant Clerk, Joseph Pope

Chief Clerk, C. J. Jones..... \$2,400

DEPARTMENT OF JUSTICE.

Known as the Crown Law Department un-

til organized, May, 1868.

The Minister of Justice is ex-officio Attorney-General of Canada, the legal adviser of his Excellency the Governor-General, and legal adviser of the Privy Council.

He superintends all matters in Canada in connection with the administration of justice which are outside the Provincial autonomy. He is entrusted with the conduct of all litigation in which Canada is involved, and also has the settlement and approval of all instruments under the Great Seal of Can-

The Minister of Justice has also the administration of the penitentiaries of the Dominion. This office was occupied by the late Sir John Thompson until his death, December 12, 1894.

CANADA'S MINERALS.

The mineral wealth of Canada is so great that an American authority has said: "To particularize the undeveloped wealth of this

1896]

According to the report of the Geological Survey, her minerals may be classified as collows

(1) Metals, which include native iron, magnetic iron ore, iron sand, hematite, ilmentite, lenionite (including bog iron ore), spathic iron ore, clay ironstone, native copper, sulphide of zinc, sulphide of lead or galena, native sliver, and ores of silver, gold, platinum, sulphide of antimony, oxysulphide of antimony, sulphide of bismuth, nickeliferous pyrrholite.

(2) Minerals used in certain chemical manufactures; iron pyrites, pyrrhotine or magnetic properties.

(2) Minerals used in certain chemical manufactures; iron pyrites, pyrrhotine or magnetic iron pyrites, aparite or phosphate of lime, magnesite or carbonate of magnesia; calcite or carbonate of lime, chromic oxide, oxides of manganese.

(3) Mineral manures: gypsum, marl.

(4) Mineral pigments and detergents:—
Iron ochres, barytes or heavy spar, soap clay etc.

clay, etc.

(5) Minerals used in the production of heat and light:—Anthracite and bituminous coal, lignite or brown coal, bituminous shale, petroleum, peat, etc.
(6) Refractory minerals:—Plumbago, soap-

stone, potstone, mica, asbestos, fire clays, sandstone and pottery clays.

(7) Minerals applicable to common and decorative construction :- Limestone, dolomites, sandstones, granites and syenite, gneiss, labradorite rock, marbles, flagstones, common lime, hydraulic lime, and brick clays.

(8) Minerals for grinding and polishing :

(8) Millerals for grinding and poising:—Stone for making whetstones, hones, bath-brick, tripoli, grindstones and millstones.
(9) Minerals applicable to fine arts and jewellery:—Lithographic stone, porphyrites, labradorites, jasper conglomerate, amethystine quartz, agates, amber and Canadian precious stones. precious stones.
(10) Miscellaneous minerals:—Sands for

glassmaking, moulding sands, carbonaceous shale, artificial stone, salt, brines and mineral water.

According to the last census, those engag-

In the museum of the Geological Survey of Canada at Ottawa, of which the Director is Alfred R. C. Selwyn, C.M.G., LL.D., F.R.S., is a collection of the economic minerals and rocks of Canada, systematically arranged by the Assistant Director and Mineralogist to the Survey. This collection affords the most ample evidence of the extent and variety of the mineral wealth of Canada,

Tons.

ed in mining numbered 13,417; in quarrying, 1,509; and of mining and quarrying officials there were 242.

The returns for the United States show that the value of the total production (mineral and metal), for 1894, was \$553,372,902, which is a decrease of \$82,473,904, or 13.37 per cent. The returns for Canada show that the total value of the mineral and metal production in 1894 was \$1,550,000 more than in 1893, or an increase of 8 per cent.

It will be seen that almost everything goes either to the United States or the United Kingdom, the proportions having, in the years named, been respectively 79 per cent., 77 per cent., 80 per cent., 86 per cent. and 83 per cent.; and 13 per cent., 15 per cent., 14 per cent., 6 per cent., and 5.63 per cent. Coal:—

The coal areas of Canada are estimated at 27,200 covers will a net transport of the coal areas of Canada are estimated.

The coal areas of Canada are estimated at 97,200 square miles, not including areas known, but as yet undeveloped, in the far

north.

There are, first, the coal fields of Nova Scotia and New Brunswick; second, those of the Northwest Territories; third, those of the Rocky Mountains, and, fourth, those of British Columbia. The coal areas of Nova Scotia cover about 635 square miles. They are divided into the Cape Breton, the Pictou and the Cumberland basins, all in Nova Scotia; New Brunswick containing, so far as known, no seams of sufficient magnitude to be worked successfully in competition with the Cumberland mines. tion with the Cumberland mines.

The workable thickness of the coal is ver

The workable thickness of the coal is very great; in Cape Breton a depth of 25 to 60 feet, in Pictou at least 70 feet, and in Cumberland at least 30 feet. If the workable area is reduced one-quarter, say, from 406, 400 acres, to 300,000 acres, and the average thickness of the workable area put at 25 feet, on the basis of 1,000 tons of coal an acre for every foot of coal, the amount of coal in the measures of Nova Scotla is 7000,000,000,000. 7,000,000,000 tons.

There are no coal measures from New

There are no coal measures from New Brunswick westward until the Province of Manitoba is reached. The coal areas of Manitoba are roughly estimated at 15,000 square miles. They yield lignites only, often of a very good quality.

The third coal area is that in the Rocky Mountains. Though small, as measured by miles, it contains much coal of the best quality. Several seams of Anthracite of excellent quality have been found.

The fourth area is that of the Pacific Coast. Dr. George M. Dawson gives the following estimate of its extent:—

Square

Nanaimo coal basin (coals), approx-	miles.
imately correct	200
Comox coal basin (coals), rough ap-	man.
proximation	700
approximation	800

Tertlary lignite-bearing rocks in different parts of British Columbia. south of the 4th parallel of latitude; very rough approximation.

In quality the Vancouver Island bituminous coals are found to be superior, for
all practical purposes, to any coals on the
Pacific Coast. They rank in San Francisco
with the West Hartley coal.
In the Comox district the production
measures show 10 seams of coal, with a

total of 29 feet 3 inches, the thickest seam being 10 feet.

The following table shows the coal produced by the principal countries of the world, according to latest available figures, in tons of 2,000 pounds:—

British Empire-	Louis.	Tone.

Great Britain heads the list in the manufacture of pig iron, and stands second in the manufacture of steel.

The year 1894 was the year of the largest production Germany ever had.

IRON.

Both geographically and geologically, the iron ores of Canada have a wide range, and they occur at varied intervals from Cape Breton Island in the east to Vancouver Island in the west

Breton Island in the east to Vancouver Island in the west.
The total production of iron ore in Canada in 1890 was 76,511 tons, valued at the mines at \$155,380. In 1891 the quantity produced was 68,979 tons, valued at \$152,005; in 1892, 103,248 tons, valued at \$254,206; in 1892, 103,248 tons, valued at \$298,018, and in 1894, 109,991 tons, valued at \$226,611.
In Nova Scotia the quantity produced in

1891 was 57,311 ton in 1893, 66,837 tons, The quantity of p 21,772 tons, value 23,891 tons, value 42,443 tons, value 55,947 tons, valued 49,967 tons, valued tity of steel produc fiscal year ended J tons.

1891 was 57,311 tons; in 1892, 75,000 tons; in 1893, 66,837 tons, and in 1894 83,512 tons.

The quantity of pig iron made in 1890 was 21,772 tons, valued at \$331,688; in 1891, 23,891 tons, valued at \$368,901; in 1892, 42,443 tons, valued at \$637,421; in 1893, 55,947 tons, valued at \$646,447. The quantity of steel produced in Canada during the fiscal year ended June 30, 1894, was 17,032 tons. The quantity of steel produced in Canada during the past fiscal year was 17,032 tons.

GOLD.

The production of gold is practically lim-The production of gold is practically limited in Canada to the Provinces of British Columbia and Nova Scotia. In the latter Province in the last fiscal year there were 33 mines, yielding 14,980 ounces of gold from 39,333 tons of quartz crushed. From 1862 to 1894 (both years included) the yield has been 580,156 ounces from 829,409 tons of stone crushed, or equal to an average of 14 dwt. to a ton of 2,000 pounds.

In British Columbia the value of the estimated wild for 1804 456,000 counces.

mated yield for 1894 is 456,066 ounces.

The production of gold in the Province of Quebec since the year 1877 when first the figures were available up to the present time has amounted to \$250,000.

The world's annual production of gold is variously estimated. The Director of the United States Mint gives it for the fiscal year ending September, 1894, as 8,780,518 ounces, of the value of \$181,510,100, against \$158,836,000 for 1893. for 1893 at \$155,522,000. Muhleman gives it

The British Empire, Russia and the United States supplied between them nearly 157 million dollars worth of gold in 1894.

COPPER.

Copper occurs in Canada in the forms of native and metallic copper and sulphuretted ores, the former being principally confined to the rocks of the upper copper-bearing cortes on Lake Swards ing series on Lake Superior, the latter being more widely diffused.

The production of copper in Canada for the fiscal year was 8,481,685 pounds, valued at \$805,760, Ontarlo exporting 741,037 pounds, Quebec 357,259, and British Columbia 95,278 pounds.

The indications are the output in copper will soon be materially increased, as cheaper and more effective methods for separating the copper and the nickel from each other have been adopted in the Sudbury District, and the result will doubtless be a large increase in the output.

NICKEL.

The first discovery of nickel in Canada was made in 1883, near Sudbury, in the District of Algoma, and since then about twenty promising deposits have been dis-

Operations at present are principally carried on by four companies—The Canadian Copper Co., H. H. Vivian & Co., the Dominion Mineral Co. and the Drury Nickel

The ore, which contains on the average about 2.25 per cent. of nickel, is roasted and smelted into a copper-nickel matte, the usual composition of which, from average analysis, is about as follows:—Copper, 26.91; Nickel, 14.14; Iron, 31.335; Sulphur. 26.95, and Cobait, .935. The matte is also said to contain some courses of platinum to the ton. contain some ounces of platinum to the ton. The amount of fine nickel in the matte produced at and shipped from the Sudbury mines in 1891 was 4,626,627 pounds, which, at 60 cents per pound was worth \$2,775,976; in 1892 the quantity was 6,057,482 pounds, valued at 58c per pound, or \$3,513,339, and in 1893, 3,992,982 pounds, valued at 52c per pound. pound, or \$2,076,351.

The world's total production of metallic nickel is estimated for last year at 5,000

PETROLEUM.

Petroleum has been found in all parts of Canada, and particularly in the Northwest Territories, but it is in the County of Lambton, Ontario, whence most of the oil has been, and is, produced. The oil is obtained at a depth of from 370 to 500 feet.

The first flowing well was struck in 1862, on the 19th of February, and in October of the same year there were 35 flowing wells. As there was no accommoda-tion for the storage of this enormous flow, there was a great waste, and it is calculated by one authority that between the dates mentioned no less than 5,000,000 barrels of oll floated off upon the water of a neighbor-ing creek. Means were taken after a time to stop this waste, and, though no

[1896

exact particulars are available, the annual output for some years has been about it is estimated there were 3,500 wells pumped.

According to the census of Ontario returns of 1890, there were twelve refineries

The following tables give the production and value for the years 1893 and 1894:-

Products.	188	93.	1894.

NATURAL GAS.

Since July, 1885, when a well was sunk at Port Colborne, Ont., numerous wells have been sunk, but the most productive gas fields, so far discovered, are situated one in Essex County and one in Welland, the daily flow of the productive gas in the letter county had 300. flow of gas in the latter county being 30,-895,000 cubic feet. In Essex County one well has a daily flow of 7,000,000 cubic feet. which gas is utilized in lighting the Town of Kingsville.

The estimated available daily flow of Natural Gas in Ontario in January, 1891, was 50,000,000 cubic feet. The gross amount received for sales of Natural Gas in 1893 was nearly \$367,000, and in 1894 \$313,754.

worked are in Ottawa County, Quebec, and north of Kingston, Ontario.

The exports of this mineral almost all go to Great Britain. The exports in 1894 were 4,947 tons, valued at \$40,400, being a decrease as compared with 1893 of 6,943 tons in quantity, and in value \$92,475.

The world's production is given below:—

	9
United Kingdom	Tons.
Germany	250,000
France	150,000
France (in the raw state) Belgium and Holland	75 000
United States	517,000
Other Countries	55,000
Total	

ASBESTOS.

There is probably no mining industry in Canada that has shown such marked progress as that of this peculiar mineral.

It principally occurs in the Eastern Town-

ships of Quebec. The production of Asbestos in Canada in 1894 amounted to 7,630 tons, having a value of \$420,825. The exports of Asbestos in 1892 amounted to 7,316 tons, valued at \$514,-412; in 1893 to 5,898 tons, valued at \$396,-718, and in 1894 to 6,229 tons, valued at

GYPSUM.

SALT.

The Salt produced in Canada is almost all manufactured in Ontario. (See Salt, 260.)

PHOSPHATE.

Phosphate in its purest form contains 92.26 per cent. of phosphate of lime. The only two places where this mineral is

This is one of the oldest worked of any of the deposits of the country. Nearly one-half of the production of Gypsum in 1894 is credited to Nova Scotia, and of the exports nearly 80 per cent. goes from Nova Scotia, the market for it being almost altogether in the United States. The production of crude gypsum for 1894 was 223,631 tons, valued at \$202,031, as compared with 192,568 tons, valued at \$196,150 in 1893.

POPULATION AND VITAL STATISTICS.

\$339,756.

The last official census of the population was taken in 1891, the results of which we subjoin.

The urban population of Canada has been divided, in the following tables, into three groups:
(1) cities and towns of population of 5,000 and upwards; (2) of 3,000 to 5,000; (3) of 1,500 to 3,000.

The object of this division is to show the growth of the cities and towns and villages separately, so that those interested may at once ascertain the development of urban life in each of the

three grades. In o that, in many cases, territory since 1881— each such instance t tables, to the popula comparision of grow

we subjoin. hree groups: ,500 to 3,000. s separately, each of the three grades. In order to prevent confusion in making comparisons, it is necessary to point out that, in many cases, additions to population have been caused by the annexation of adjacent territory since 1881—notably in the cases of Montreal, Toronto, Ottawa, London and St. John. In each such instance the population of the annexed region as it was in 1881 has been added, in the tables, to the population of that year as given in the Census volumes of 1881, in order that the comparision of growth may be exact.

Canada	506	494	509	491

The urban population of Canada in 1871 was 686,019 or 18.8 per cent of the total population; in 1881 it was 912,934 or 21.1 per cent, and in 1891 it was 1.390,910 or 28.77 per cent. The growth of the urban at the expense of the rural population is one of the features of the present age throughout the world, and it is evident, from the foregoing figures that the movement prevails in Canada as well as elsewhere. The large increase between 1881 and 1891 is caused to a considerable extent by the growth of a number of small places, which had not attained a population of 1,500 in 1881.

The population of Canada in 1881 consisted of 2,188,778 males and 2,136,032 females and in 1891 of 2,460,471 males and 2,372,768 females and the following table gives comparative particulars of the proportions of the sexes in each province in 1881 and 1891.

*Includes Dutch, Danish, French and Spanish West Indies.

Just about half our imports are from the United States, and somewhat more than half our exports go to the mother country. The imports from the United States are greatly increased by our purchasing raw cottons, raw tobacco and naval stores from them, such articles not being supplied by the United Kingdom.

Table of aggregate Trade of the Dominion by Countries, on the bases of goods exported and entered for consumption.

The total foreign trade of the Dominion during the last fiscal year was \$369,554 less than that of 1892, and \$6,638,731 less than 1893—but with the exception of these two years the foreign trade of the country was considerably larger than in any year since Confederation. The average annual value per head during the twenty-seven years of Confederation has been: of Imports \$22.03; of Exports \$22.07; and of Total Trade \$47.10.

Only once since Confederation have the Imports been exceeded by the Exports, viz., in 1880, there having been with that exception a continued excess of imports amounting on an average to \$19,539,958 annually, the excess of 1894, having been \$13,589,976 below the average.

A comparative summary of the value of the principal articles imported for home consumption in the last three years will be found in the following table, dutiable goods being distinguished from those admitted free.

Total \$113,093,983	\$4,521,000	\$4,089,000	\$8,611
	AND DESCRIPTION OF THE PARTY OF THE PARTY.		

It will be seen by the above that there was an actual decrease of the value of imports of 1894 compared with those of 1893 of \$8,611,047. Of this amount \$4,521,000 was due to decreases in volume, and \$4,089,000 to a decline in prices.

In the imports from the various foreign countries into Canada during 1894, there was an increase from twenty-three countries and a decrease from twenty-one; the largest increase being \$2,106.423 from Germany, and the largest decreases being in imports from the United States, \$4,556,976, Great Britain \$2,158,415, and from Spanish possessions and all others \$1.069,561. The aggregate decreases exceeded the increases by \$5,599,328.

The relative value of the articles (free and dutiable) imported from Great Britain and the United States into Canada are as follows:

Total dutiable goods, Great Britain	1893. \$31,869,267 11,280,064	1894. \$27,493,160 11,224,107
Grand total	\$43,149,531	\$38,717,267
Total dutiable goods from United States Total free goods from United States	1893. \$28,562,050 29,658,808	1894. \$25,823,636 27,210,464
Grand total	\$58,220,858	\$53,034,100

Many articles of import, which are really the produce of South America and the West Indies, are credited to the United States, from which country they were bought at second hand, as coffee, sugar, hides, etc.

Value of total imports entered for home consumption by Provinces. (Coin and Bullion included.)

	Total	Imports	Imports ent	ered for home	consumption		
Provinces.	Dutiable goods.	Free goods.	Dutiable goods.	Free goods.	Total.	Duty collected.	
Ontario	\$26,467,486 34,175,559 3,919,179 3,055,384 1,770,050 3,555,249 354,153 44,446	\$15,558,152 24,555,510 5,436,376 2,030,976 583,718 1,714,368 196,839 57,495	\$26,250,187 24,368,456 3,584,963 2,889,973 1,808,236 3,457,684 368,040 44,643	\$15,625,666 24,594,527 5,484,200 2,038,756 583,986 1,732,676 197,493 67,495	\$41,882,853 48,962,984 9,069,163 4,928,731 2,392,222 5,190,359 565,533 102,138	\$7,475,142 7,723,380 1,203,790 1,012,782 602,466 1,189,414 161,836 11,012	
Total	\$73,341,506	\$50,133,434	\$62,779,182	\$50,314,801	\$113,093,983	\$19,379,822	

The figures in the above table must only be taken as indicative of the channels by which goods enter the Dominion, and not as representing the individual consumption of each province. Quebec contains the principal port of entry by the St. Lawrence, and Ontario the principal ports of entry for goods from the United States, therefore a very large portion of the duty collected is really paid by the other Provinces, the same being equally applicable when applied to exports. Many products of Prince Edward Island are taken across to the mainland and thence shipped from Nova Scotia and New Brunswick ports, to which Province they are credited as exports. According to the Trade and Navigation Returns, 81.086 head of cattle were exported from the Province of Quebec in 1894, that is, from the port of Montreal, but over ninety per cent. of this number was actually from Ontario.

Value of principal exports, the produce of Canada, during the years 1892, 1893, 1894:

	Manufactures	25,145,071	24,035,488	28,462,031	27,215,691	104,858,281
	Total	\$35,712,407	\$95,612,735	\$1 01,912,798	\$100,511,526	\$383,749,466

The United States take almost all the mineral product exported from this country, and until the introduction of the McKinley tariff, the large proportion of the agricultural product. Since then this branch of trade has been largely diverted to Great Britain, which country in 1892 took 76.27 per cent., in 1893 77.64 per cent., and in 1894 80.62 per cent. of animal and agricultural

The following table shows the relative amount of goods, the produce of Canada exported to Great Britain and the United States in 1893 and 1894:

1893. Total. \$58,409,606 33,813,802 \$119,287,662 63,111,400 \$60,878,056 Articles exported to Great Britain. 29,297,598 Articles exported to the United States.

The exports of Great Britain exceeded the imports in 1894, by \$22,160,789, and were the largest in the history of the Dominion. The imports from the United States exceeded the exports to that country by \$23,736,502.

The total trade with Great Britain in 1894, amounted to \$107,286,105 and with the United States to \$98,717,371, being less than that of the previous year by \$99,613, and \$10 271,485 respectively.

The combined trade with the two countries constituted 85.5 of the aggregate trade of Canada, as compared with 874 per cent in 1893, which represents the exact per centage during the previous six years. The trade with Great Britain in 1894 was 44.5 per cent. of Canada's total trade, as against 43.36 per cent. in 1893; that with the United States was 41.0 per cent. as compared with 44.1 per cent. in 1895

Of our total exports in 1894, Great Britain and the United States took 88'79 per cent. as compared with 91'09 per cent in 1893, 91'16 per cent. in 1892, and 91'88 in 1891.

CANADA'S FISHING INDUSTRY.

Canada's fisheries are the most extensive in the world, embracing as they do an immense extent of sea coast, great inland seas, innumerable lakes, and a great number of rivers. The coast line of British Columbia alone is 7,181 miles, or more than doubling in extent that of Great Britain and Ireland. The eastern sea coast of New Brunswick, Nova Scotia, Prince Edward Island and Quebec is 5,600 miles, while the salt water area is 15,000, and the fresh water 36,350 miles.

To give an idea of the immense interests that are centred in the industry in 1894, there were engaged in fishing 70,719 men, using boats, nets, vessels, etc., valued at \$9,439,116, while the commercial values of the yield amounted to \$21,000,000.

The Government, realizing the value of this industry, has instituted laws and regulations for its protection: (1) By a large staff of officers stationed where fishing is carried on; (2) by armed cruisers on the Atlantic coast and the great lakes; (3) by the establishment of close seasons, when the fish are spawning; (4) by leasing and licensing fishing privileges; (5) by instituting and maintaining fish breeding establishments: (6) by giving fishing bounties amounting to \$160,000 per year; (7) by prizes awarded for the best models of fishing vessels; and (8) by establishing intelligence burenus, by means of which the movements of bait and of fish are ascertained and reported to the principal fishing stations. There are in all fifty-seven of these bureaus established.

In British Columbia in 1876 the value of the catch was \$104,697; in 1880, \$713,335; in 1885, \$1,978,038; in 1890, \$3,481,432; in 1893, \$4,447,083; and in 1894, \$3,950,478.

TELEGRAPH AND TELEPHONE LINES IN CANADA.

The principal telegraph lines in Canada are in private hands and the Government only own and operate those lines which have been built by them in furtherance of the public service, especially in connection with the signal and other stations established by the Marine Department along the shores of the Gulf of St. Lawrence, the Maritime Provinces and British Columbia, and also for the advancement of settlement in the North-West. In June, 1894 there were 1,254 miles of land lines and 197 miles of cable along the St. Lawrence and east coast, 698 miles of land lines in the Territories, and 475 miles in British Columbia.

The telegraph business of Canada, from Quebec to the west, is in the hands of the great North-West Felegraph Company and the Canadian Pacific Railway Company, while the Western Union Telegraph Company controls the Maritime Provinces. The following figures for the year 1893 will illustrate the relative work of the above three lines:

Great North-Western Telegraph Co., 18,165 miles of line, 34,628 miles of wire sent 2,643,318 messages, and had 1,471 offices.

The Canadian Pacific Railway Co. had 7,600 miles of line, 26,000 miles of wire sent 1,200,000 messages, and had 880 offices, the Western Union had 3,172 miles of line, 8,713 miles of wire, sent 344,919 messages, and had 214 offices—which makes a total of 28,937 miles of line, 68,741 miles of wire, 4,188,237 messages and 2,565 offices.

In addition to the above the Anglo-American Cable Co. operate the lines of the Prince Edward Island system, having 385 miles of poles, 403 miles of wire, and 32 offices.

Island system, having 385 miles of poles, 403 miles of wire, and 32 offices.

The ordinary rate for messages to places in the Dominion is twenty-five cents for ten words.

To Halifax Winnipeg and British Columbia rates vary from thirty cents to one dollar for ten words. To the United States the rate is from forty cents per ten words upwards, according to distance. The rate to the United Kingdom is 25 cents per word.

distance. The rate to the United Kingdom is 25 cents per word.

Canada has one telegraph office to every 1,9 i7 persons, and only eight countries in the world possess a greater telegraph mileage

The total length of telegraph lines in the world is 601,142 miles of land line, and 153,649 miles of cable; the length of telegraph wire is 1,500,000 miles.

The United States possess 210,000 miles open for public service, of which 190,303 miles belong to the Western Union Telegraph Company.

Since 1875 the oceans have been networked with submarine cables. In 1879 10,550 miles were laid; in 1883, 2,584 miles; in 1885, 4,382 miles, and from 1886 to 1888, 5,893 miles. The latest returns give the following as the actual situation as regards extent of submarine cable. Total, 113,084 nautical miles of cable, of which there are of single wires 110,516 miles and several wires 2,568 miles.

TELEPHONE.

The telephone system in Ontario and Quebec is largely controlled by the Bell Telephone Co.,

There are connected with the several systems 44,000 miles of wire and 33.500 instruments, and

There are connected with the several systems 44,000 miles of wire and 35,000 instruments, and that in 1894 about 73,000,000 messages were sent.

The first experimental telephone erected in Canada was from the residence of Prof. Graham Bell's father, in Brantford, Ont., to the residence of the Rev. T. Henderson, also of Brantford. The first commercial line was established at Hamilton in October, 1877. Canada is, therefore, the birthplace of the telephone, as Edison in the same year, 1877, opened up correspondence with parties in Montreal, but he admitted Bell's claim to priority in the invention and its use.

The United States in 1894 had 353,480 miles of telephone wire. Canada had 8,800 miles of wire for each million of her people; the United States 4,700 miles of telephone

for each million of her people; the United States 4,700 miles.

MERCANTILE MARINE.

The Marine interests of Canada are large, and to have a thoroughly equipped Marine Department is most essential.

This department was formed after the union of the Provinces in 1867, Hon. Peter Mitchell becoming the first Minister of Marine and Fisheries. Since Confederation 200,000.000 tons of sea-going shipping have entered the sea ports of Canada, 172,000,000 tons of shipping have crossed and re-crossed the great lakes between Canada and the United States, 360,000,000 tons having passed from Canadian ports to Canadian ports, doing the coasting trade of the country.

Last year there were 755 light houses, 621 light stations, 22 fog horns and 39 automatic fog horns. The Ontario division extending from Montreal to Manitoba, contained 222 lights, located at 180 stations. In the Quebec division are 153 lights, and 116 stations, and 8 light ships. The Nova Scotia division has 178 light houses, showing 190 lights, New Brunswick 94 light houses, and Prince Edward Island 35 light houses.

Prince Edward Island 35 light houses.

The total cost of maintaining the light houses, fog whistles, etc., in Canada, during 1891,

was \$470,549.

The total number of vessels on the Registry Books of the Dominion in 1894, was 7,245, with a

gross tonnage of 869,624 tons.

The total number of wrecks and casualties to sea-going vessels of all nations, during 1894, as reported by the Department, was 86, the tonnage involved was 36,777, and the amount of loss estimated at \$322,225. The number of lives lost was ten.

That the efforts of the Government and the people of Canada to reduce the number of the distriction of property and loss of life, by means of light houses, for

casualties, and diminish destruction of property and loss of life, by means of light houses, fog whistles, etc., have been successful, is seen in the following statement.

Average number of Casualties and Deaths.

Casualties	311	1875-79 431	1880-84 405	1885-89 329	1890-93 203	1894

There was an increase in the number of British vessels in 1894 of 110, and in the tonnage of 365,730 tons. The Foreign vessels increased 325 in number, and 162,039 in tonnage. The Canadian vessels i creased 358 in number and 144,156 in tonnage. The total tonnage of sea-going vessels carrying cargo into and from Canada in 1894, was 8,342,989 tons, into Canada 3,618,826, out of Canada 4,824,163.

Iron and steel have so completely superseded the use of wood in the construction of ships that their can be little, if any, developement in the ship building industry of Canada, till the great natural facilities of Canada are properly applied.

The Province of Nova Scotia possesses such large deposits of iron ore, coal and flux in close promimity to each other, and to ship harbors, that capital and skill should find a splendid opening for successful enterprise.

The first iron ship was built in Great Britain in 1843. The first steel ships were built on the Clyde in 1879, when 18,000 tons of shipping were constructed of the metal.

The world's shipping in 1894-95 was 30,721 vessels of 24,569,496 tons, 19,606 vessels with 7,065,555 tons were of wood, and 12,720 vessels with 15,874,382 tons were of iron and steel.

In the last three years the tonnage of wooden vessels have decreased from 30.8 per cent. of the whole to 23.7 per cent., while the tonnage of iron and steel vessels has increased from 69.2 per cent. of the whole to 76.3 per cent.

In 1894, 20,939 vessels with a tonnage of 5,917,145 tons in Canada, and 16,727 vessels with a tonnage of 3,155,400 arrived at and departed from Canadian ports on inland waters between Canada and the United States.

There was an increase in the shipping of the Dominion of 1894 as compared to 1893, in men of 42,625, in vessels of 2,825, and in registered tonnage of 1,813,547 tons, while there was a decrease in tons weight of freight of 893,490 tons, in tons measurement of freight of 76,994 tons.

The first ocean-going steamer arrived at Montreal in 1853, in which year tour arrived, of a total tonnage of 1,951 tons, and in the same year 248 ocean-going sailing vessels arrived, of a tonnage of 57,752 tons. In the next year, 1854, six steamers of 5,545 tons aggregate, 252 ocean-going sailing vessels of 65,365 tons, and 4,251 inland vessels of 335,578 tons arrived at the port, making an average tonnage of 394,488 tons, and the average tonnage of sea-going vessels 274 tons. In 1892, thirty-eight years after, the total tonnage that arrived in Montreal was 2,086,307 tons, of which 1,036,707 tons belonged to sea-going vessels, 658 of which were steamers and seventy-seven sailing vessels, the average tonnage of each sea-going vessel having increased to 1,410 tons. In 1880, 354 steamers, forty-two ships and 143 barques, sea-going vessels, arrived at Montreal. In 1892 the numbers respectively were 658, eight and twenty-one. The number of vessels that arrived at Montreal from the Maritime Provinces in 1881 was 212, with a tonnage of 99,378. In 1892 the number of vessels was 331 and the tonnage 280,958, and in 1893 the number of sea-going vessels which arrived was 871, having a tonnage of 1,174,996 tons.

The following table is a comparative statement of the total shipping of Canada, inland as well as sea-going, which arrived at and departed from Canadian ports, in the years 1893 and 1894.

	Number of	Tons	Fre	right.	Number of

GRAVING DOCKS.

There are four graving docks in Canada, three belonging to the Federal Government and one owned by a company. The following statement shows the dimensions of these graving docks:

			Width.			Rise of		
Name.	Length.	At Coping.	At Entrance.	At Bottom.	on Sills.	Spring Tide.	Neap Tide	
Esquimalt Kingston Levis Halifax	Ft. 430 280 445 585	Ft. 90 79 100 102	Ft. 65 55 62 891	Ft. 41 47 73 72	Ft. *26½ 16½ 25½ 30	Ft. 7 to 10 † 18 6	Ft. 5 to 8	

*At ordinary spring tide. Height of water varies three and one-half feet.

*At ordinary spring tide. †Height of water varies three and one-half feet.

The Halifax Graving Dock was opened September 20th, 1889, and is the largest on this continent. It can be adapted to vessels 601 feet long. The "Teutonic" and "Majestic" are 582 feet, and the "Campania" and "Lucania" are each 620 feet in length.

For twenty years from the completion, the company owning it have subsidies from the Imperial and the Canadian Government, and from the city of Halifax amounting in all to about \$30,000.

The Esquimalt Dock, in British Columbia, was the first built on the Pacific coast. It was finished in June, 1886. The Levis Dock was finished in 1887, and was the first on the St. Lawrence River. The Kingston Dock was finished in 1891, and serves the shipping of Lake Ontario and River St. Lawrence. During the year past eight vessels used the Esquimalt Docks, forty-three the Kingston Dock, and eleven the Levis Dock.

A direct mail service between Canada and the West India Islands was established in January 1890, the steamers being subsidized by the Canadian Government.

1890, the steamers being subsidized by the Canadian Government.

INSURANCE.

There were thirty companies transacting a life insurance business in Canada in 1894, viz.: 12 Canadian; 8 British and 10 United States.

The business done since 1890 was divided as follows between the several companies:

	1890.	1891.	1892.	1893.	1894.
Canadian companies		\$21,904,302 2,947,246 13,014,739	\$25,585,534 2,625,213 15,409,266	\$28,089,437 2,967,855 14,145,555	\$28,670,364 3,214,216 17,640,677
Total	\$40,523,456	\$37,866,287	\$44,620,013	\$45,202,847	\$49,525,257

By this table it will be observed that the Canadian companies do a larger business than all the other companies combined.

The following table gives the amount of life insurance allowed to lapse by non-payment of premiums each year, and the proportions of such amount lapsed in each \$1,000 of risk, and in each \$1,000 effected in each year.

The table shows that a close relation exists between the degree of prosperity experienced by the people generally, and the amount of insurance allowed to lapse through the non-payment of premiums.

AMOUNT LAPSED OUT OF EACH \$1,000 CURRENT RISK.

Years. Total in Force.	Total	Annual	Lapsed.			
		A mount Effected.	Total Lapsed.	In Cash \$1,000 at Risk.	In Each \$1,000 Effected in Year.	
1890	\$248,424,577 261,475,229 279,110,265 295,622,722 308,161,436	\$40,523,456 37,866,287 44,620,013 45,202,847 49,525,257	\$17,462,864 15,805,342 18,143,998 18,624,164 24,812,944	\$70 29 60 45 65 01 63 00 80 45	\$430 93 461 17 406 63 412 01 500 43	

The Death rate was lower in 1894 than in preceding year, as indicated in the following table:

	1894.			1893.	1892.	1891.	1890.
Companies.	Number of Lives Exposed to Risks.	Number of Deaths.	Death Rate per 1,000.		Death Rate.	Death Rate.	Death Rate.
Active companies Assessment Retired	204,023 35,798 5,142	2,107 290 136	10,327 8,101 26,449	10,176 9,407 22,574	10,676 8,946 26,512	10,8 9,345 20,109	10,340 8,475 21,417
Total	241,963	2,533	10,340	10,364	10,860	10,335	10,340

The total amount of insurance paid to policy holders in death claims, endowments, etc., during 1894 was \$5,516,929.

FIRE INSURANCE.

During the year 1894 the business of fire insurance was carried on by thirty-five active companies. Of these, 6 were Canadian, 21 British, and 8 United States.

Inland marine insurance was also transacted by six companies, 2 being Canadian, 3 British, and 1 United States.

Accident, guarantee, plate glass, steam boilers and burglary business was done by eight companies.

The following table will show business done in fire insurance in 1894:

Companies.	Paid for Losses.	Received for Premiums.	Percentage of Losses to
Canadian companies	. 3,094,861	\$1,108,294 4,602,747 1,100,328	Premiums, 72°35 67°24 69°24
Total	.\$4,589,363	\$6,711,369	68*38
The amount of property at risk in Canada on Dec	ember 31, 189	4, amounted to \$	836,067,202.

AGRICULTURE.

Agriculture is to the people of Canada a branch of industry of paramount importance. Whatever effects it prejudicially or beneficially, affects directly all other employments.

It is estimated that 45 per cent. of the population find their means of subsistence in agricultural pursuits.

According to the census of 1891, the area of improved lands in Canada was 28,537,242 acres, of which 19,904,826 acres were under crop. There were 464,462 acres in gardens and orchards and 15,284,788 acres in pasture. Relatively to the whole area of Canada the area under crop and in pasture was about 10 per cent.

Ontario has an area suitable for grape culture at least equal to half the present area of vine-yards in France. In 1893 there were in Ontario 2,223,282 vines of bearing age, and 883,430 of non-bearing age. We give below a table showing the comparison between the exports of agricultural produce of 1893 and 1894 compiled from the most authentic sources. It will be seen that there is an actual decrease of \$4,500,047; \$3,911,000 of this amount being due to a decrease in volume and the remainder \$589,000 to a fall in price. The principal articles effected by a decline in price were wheat, flour and pease, while cattle, flax and apples show an increase:—

There are great possibilities of expansion in Manitoba and in the organized districts of Assint-boia, Alberta and Saskatchewan. There is in these districts an area of 239,000,000 acres, which have been brought to the use of the farmer and the ranchers to the extent of 7,832,200 acres, In-cluded in this statement are the ranching grounds, which covered in 1894, 1,298,871 acres, distribut-

It is estimated that the real property (lands and buildings) in Ontario connected with farming was worth \$817,823,700 in 1883, and \$802,854,249 in 1893.

In the following table we give latest returns of Agricultural Produce, exported from and Im-

ported into Canada.

AGRICULTURE.

In live stock comparing 1894 with 1893, there was an increase of all kinds of cattle of 41,419, of sheep 79,867, of hogs 130,111, poultry of 438,226.

The details of the returns indicate that while working horses increased from 373,615 in 1893, to 395,686 in 1894, breeding mares decreased by 11,591, and unbroken horses by 20,890, showing a net decrease of 10,410.

Note—Under the separate headings of the different Provinces, will be found Agricultural

returns relating to each.

Viticulture in Canada has made considerable progress. There are at least 6,000 acres of land planted in vines capable of producing one million and a half gallons of wine.

Tobacco - The amount of Tobacco leaf imported annually into Canada for manufacturing purposes is one million pounds, in addition to which there are imported annually about 290,800 pounds of cut tobacco, cigarettes cigars and snuff. In 1864 there were 13,929,560 pounds of leaf imported for manufacturing purposes, and in 1894 the import was 14,253,749 pounds

Considerable attention has been given to the cultivation of flax in Manitoba for seed, and in Ontario for both seed and fibre. The price realized during the past year ranged at one dollar and upwards per bushel. Manitoba and the Northwest Territories seem to be specially adapted for growing flax for the seed. for growing flax for the seed.

DOMINION AND PROVINCIAL CROWN LANDS.

those desiring to take up land in any of the Provinces of the Dominion, we append the Dominion and Provincial Lands Regulations relating to the lands which are to be disposed of.

CROWN LANDS OF CANADA. Dominion Lands Regulations.

Under the Dominion Lands Regulations, under the Dominion Dands sections, exall surveyed even-numbered sections, exall surveyed even-numbered sections, ex-Northwest Territories, which have not been homesteaded, reserved to provide wood lots for settlers, or otherwise disposed of or reserved, are to be held exclusively for home-

Homestead entry for one quarter-section (160 acres) of surveyed agricultural land, open to such entry, may be obtained by any person who is the sole head of a family, or by any male who has attained the age of eighteen years, on application to the local agent of Dominion lands, and on

payment of an office fee of \$10.

At the time of making entry the homesteader must declare under which of the three following provisions he elects to hold his land, and on making application for patent must prove that he has fulfilled the conditions named therein:

(1) The homesteader shall perfect his entry by beginning actual residence on his homestead and cultivation of a reasonable portion thereof within six months from date

For the benefit of intending settlers, or | for at least six months out of every twelve months for three years from the date of perfecting the homestead entry.

(2) The homesteader shall perfect his entry by beginning actual residence, as above, within a radius of two miles of his homestead, and continue to make his home with-in such radius for at least six months out of every twelve months for the three years next succeeding the date of perfecting the homestead entry; and shall, within the first year from the date of perfecting the entry, break and prepare for crop ten acres of his homestead quarter-section; and shall within the second year crop the said ten acres, and break and prepare for crop fifteen acres additional-making twenty-five acres; and within the third year after the date of perfecting homestead entry he shall crop the said twenty-five acres, and break and prepare for crop fifteen acres additional, so that within three years of the date of perfecting his homestead entry he shall have not less than twenty-five acres cropped, and fifteen acres in addition broken and prepared for crop, and shall have erected on the land a habitable house in which he shall have lived for three months preceding his application for homestead patent, and subsequent to the performance of his other homestead duties.

(3) The homesteader shall perfect homestead entry by commencing the cultivation of the homestead within six months homestead and cultivation of a reasonable portion thereof within six months from date of entry, unless entry shall have been made on or after the first day of September, in which case residence need not commence until the first day of June following, and continue to live upon and cultivate the land

within the acres, and l less than te less than fif habitable ho the expiration fecting his commenceme fide reside th three years application

within the second year, crop the said five acres, and break and prepare for crop not less than ten acres in addition, making not less than fifteen acres in all; shall erect a habitable house upon his homestead before the expiration of the second year after per-fecting his homestead entry, and before the commencement of the third year shall bona fide reside therein, and cultivate the land for three years next prior to the date of his application for his patent.

Any person who, being entitled to a second homestead entry, has made, or may hereafter make, entry for his pre-emption as such second homestead, may earn patent therefor by residing on the first homestead for not less than six months in each of the

three years succeeding the perfecting of such second entry, and by bringing under cultivation an area of not less than forty acres of his second homestead, fifteen acres to be prepared for crop the first year after entry; the said fifteen acres to be cropped and an additional fifteen acres prepared for crop during the second year, and the thirty acres to be cropped during the third year, and ten acres in addition prepared for crop. In the event of a homesteader desiring to

In the event of a nomesteader desiring to secure his patent within a shorter period than the three years provided by law, he will be permitted to purchase his homestead at the Government price at the time of entry, on furnishing proof that he has resided on the land for at least twelve months from the date of his perfecting his homestead entry, and that he has brought at least thirty acres thereof under cultivation.

In connection with his homestead entry, the settler may also purchase, subject to the approval of the Minister of the Interior, the quarter-section of the same section, if available, adjoining his homestead, at the Government price, which is at the present time \$3 per acre; one-fourth of the purchase words to be in cash and the belongs in three money to be in cash, and the balance in three equal annual instalments bearing interest at

6 per cent. per annum.

The Government make no advances of money to settlers, but, for the better encouragement of bona fide settlement, in cases where any person or company is desirous of assisting intending settlers, when the sanc-tion of the Minister of the Interior to the advance has been obtained, the settler has power to create a charge upon his home-stead for a sum not exceeding six hundred dollars, and interest not exceeding 8 per cent, per annum, provided that particulars of how such an advance has been expended for his benefit be first furnished to, and acknowledged by, the settler, and verified by the local agent, homestead inspector, or other agent appointed by the Minister of the Interior, or if the charge be made pre-vious to the advance, then such charge shall only operate to the extent certified to by the local agent, homestead inspector or other agent as having been actually advanced to or expended for the benefit of the settler. The advance may be devoted to paying the the advance may be devoted to paying the cost of the passage of the settler, paying for the homestead entry, providing for the subsistence of the settler and his family, to erecting and insuring buildings on the homestead, and to breaking land and providing horses, cattle, furniture, farm implements, seed grain, etc.

For the further protection of the settler it is provided that the time for payment of the first instalment of interest on any such advance shall not be earlier than the 1st November in any year, and shall not be within less than two years from the establishment of the settler upon the homestead, and also that the settler shall not be bound to pay the capital of such advance within a less period than four years from the date of his establishment on the homestead.

The odd-numbered sections are at present reserved for the purpose of being granted as land subsidies in aid of the construction of colonization railways in Manitoba and the Northwest Territories, except in special cases otherwise ordered by the Minister of the Interior.

Payments for land may be made in cash, scrip, or police or military bounty war-

rants.

Homestead settlers, whose land is desti-Homestead settlers, whose land is destitute of timber, may, upon payment of an office fee of 25 cents, procure from the Crown Timber Agent a permit to cut the following quantities of timber free of dues: 30 cords of dry wood, 1,800 lineal feet of building timber, 2,000 poplar fence rails and 400 roof poles. Homestead settlers may also obtain a permit on payment of the same feet. obtain a permit, on payment of the same fee, to cut burnt or fallen timber of a diameter up to 7 inches, inclusive, for fuel or fencing, for their own use.
In cases where there is timbered land in

the vicinity available for the purpose, the homestead settler, whose land is without timber, may purchase a wood lot, not ex-ceeding in area twenty acres, at the price

of \$5 per acre cash.

Licenses or permits to cut timber on surveyed or unsurveyed lands are granted, after completion, to the highest tenderer.

The price per acre of coal lands is: land containing lignite or bituminous coal, \$10, and for anthracite, \$20. The land may be sold by public competition or to the applicant.

When two or more parties apply to purchase the same land, tenders may be invited between the applicants, or it may be sold at public competition by tender or auction, as may be deemed expedient, at the upset price of coal lands.

Leases of grazing lands in Manitoba and the Northwest Territories and within the railway belt in British Columbia may be Leases shall be for a period of not exceeding twenty-one years, and no single lease shall cover a greater area than

100,000 acres.

The lessee is obliged, within each of the three years from the date of granting the lease, to place upon his leasehold not less than one-third of the whole amount of stock which he is required to place upon the tract leased, namely, one head of cattle for every twenty acres of land embraced by the lease, and shall, during the rest of the term, maintain cattle thereon in that proportion.

After placing the prescribed number of cattle upon his leasehold, the lessee may purchase land within the tract leased for a

home, farm or corral.

Any portion of the lands forming a grazing tract authorized to be leased subsequent to the 12th January, 1886, unless otherwise provided in any lease thereof, is

open for homestead and pre-emption and to purchase from Government at the price obtaining in the class in which the lands are situate; and in the event of such settlement or sale the lease (if any) to be void in respect of such lands so entered or purchased.

Any person may explore vacant Dominion lands not appropriated or reserved by Government for other purposes, and may search therein, either by surface or subterranean prospecting, for mineral deposits, with a view to obtaining a mining location for the same, but no mining location shall be granted until the discovery of the vein, lode or deposit of mineral or metal within the limits of the location or claim.

On discovering a mineral deposit any person may obtain a mining location, upon marking out his location on the ground, in accordance with the regulations in that behalf, and filing with the agent of Dominion lauds for the district, within sixty days from discovery, an affidavit in form pre-scribed by mining regulations, and paying at the same time an office fee of \$5, which will entitle the person so recording his claim to enter on the land and work it for one year.

At any time before the expiration of five years from the date of recording his claim, the claimant may, upon filing proof with the local agent that he has expended \$500 in actual mining operations on the claim, and by paying to the local agent therefor \$5 per acre cash, and a further sum of \$50 to cover the cost of survey, obtain a patent for said claim, as provided in the said mining

On 3rd April, 1889, judgment was given by the Judicial Committee of the Privy Council, declaring that the right to administer the minerals within the railway belt in British Columbia was vested in the Gov ernment of that Province. In order to dispose of the anomalous condition of affairs that consequently arose, viz., that the jurisdiction over the lands was vested in the Dominion Government, and the right to administer the minerals in that of the Province, the following arrangement, ratified by Order in Council of 28th February, 1890, was agreed upon between the two Governments

No disposition of lands containing minerals (except coal lands) shall be made by the Dominion Government, other than by patent in fee simple, thereby bringing the minerals at once under the administration of the Provincial mining laws.

All lands containing minerals (except coal lands and Indian reserves) offered for sale by the Dominion Government shall be open for purchase by the Provincial Government at the price of \$5 per acre.

All lands sought to be acquired by the

Provincial Government under the last clause shall be set apart from alienation by the Dominion, upon the Provincial Government making a written application for the same. Such lands to be surveyed (if not already done) by a Dominion land surveyor, at the expense of the Provincial Government.

Nothing in the agreement shall apply to coal lands.

The agreement may be terminated at any

within Indian reserves, shall be administered by the Department of Indian Affairs.

PROVINCIAL CROWN LANDS REGULA-TIONS.

Ontario.

Commissioner of Crown Lands, Toronto, Ont.

Any head of a family, whether male or female, having children under 18 years of age, can obtain a grant of 200 acres, and a single man over 18 years of age, or a married man having no children under 18 residing with him, can obtain a grant of 100 acres. These lands are mostly covered with forest, and are situate in the northern and northwestern parts of the Province.

Such a person may also purchase an additional 100 acres at 50 cents per acre, cash. Settlement duties are-to have 15 acres on each grant cleared and under crop at the end of the first live years, of which at least two acres are to be cleared annually; to build a habitable house, at least 16 feet by 20 feet in size; and to reside on the land at least six months in each year. In the Rainy River districts to the west of

Lake Superior, consisting of well-watered, uncleared land, free grants are made of 160 acres to a head of a family having children under 18 years of age residing with him (or her); and 120 acres to a single man over 18, ner); and 120 acres to a single man over 18, or to a married man not having children under 18 residing with him; each person obtaining a free grant to have the privilege of purchasing 40 acres additional, at the rate of one dollar per acre, payable in four annual instalments. The soil of this district is a deep loam, and for an area of nearly a million acres is very fertile.

Quebec.

Commissioner of Crown Lands, Quebec, P.Q.

About 6,000,000 acres of land have been surveyed by the Provincial Government, for

Lands purchased from the Government are to be paid for in the following manner:— One-fifth of the purchase money is required to be paid the day of the sale, and the remainder in four equal yearly instalments, bearing interest at 6 per cent. But the price at which the lands are sold is so low-from 20c to 60c per acre (15d to 2s 51/2d stg.)that these conditions are not very burden-

The purchaser is required to take posses-sion of the land sold within six months of the date of the sale, and to occupy it within two years. He must clear, in the course of ten years, ten acres for every hundred held by him, and erect a habitable house of the dimensions of at least 16 ft. by 20 ft. The

the letters patent are issued free of charge.

The parts of the Province of Quebec now inviting colonization are the Lake St. John district, the valleys of the Saguenay, St. Maurice and the Ottawa Rivers, the Eastern Townships, the Lower St. Lawrence, Lake Temiscamingue and Gaspe.

Nova Scotia.

Commissioner of Crown Lands, Halifax, N.S.

ut two a conen and almost totally unfit for cultivation, but there is some land in blocks of 200 to 500 acres which is really valuable, and some of it the best in the Province, and quite accessible, being very near present settlements. The price of Crown lands is \$40 (£8 stg.) per 100 acres.

The grants of lands to the early settlers in this Province contained no systematic reservation of minerals. In some instances gold, silver and precious stones only were reserved; in other cases the gold, silver, iron, copper, lead, etc., were retained for a source of revenue to the Crown. In this connection the rates of royalties paid are:—

On the gross amount of gold obtained by amalgamation or otherwise in the mill of a licensed mill-owner, a royalty of 2 per cent.

On coal, seven and a half cents on every ton of two thousand two hundred and forty pounds of coal sold or removed from the mine.

On copper, four cents per unit.

On lead, two cents per unit.
On iron, five cents on every ton of two thousand two hundred and forty pounds of ore, solid or smelted.

ore, solid or smelted.

Tin and precious stones, five per cent of their value.

The Act of Settlement releases to the owner of the soil all gypsum, limestones, fireclay, barytes, manganese, antimony, etc., and any of the reserved minerals whenever the reservation is not specified in the original grants.

New Brunswick.

The Surveyor-General, Fredericton, N.B.

It is estimated that there are about 7,800,000 acres of ungranted land in this Province. Ten years ago the free grant system of settlement was introduced, and it was found a great success.

Crown lands may be acquired as follows:—
(1) Free grants of 100 acres, by settlers over 18 years of age, on condition of improving the land to the extent of \$20 (£4) within three months; building a house 16 by 20 feet, and cultivating two acres within one year; and continuous residence and cultivation of 10 acres within three years.

(2) One hundred acres are given to any settler over 18 years of age who pays \$20 (£4) in cash, or does work on the public roads, etc., equal to \$10 (£2) per annum for three years. Within two years a house 16 feet by 20 feet must be built and 2 acres of land cleared. Continuous residence for three years from date of entry, and 10 acres cultivated in that time, are required.

(3) Single applications may be made for not more than 200 acres of Crown lands

(3) Single applications may be made for not more than 200 acres of Crown lands without conditions of settlement. These are put up to public auction at an upset price of \$1 (4s 2d) per acre. Purchase money to be paid at once. Cost of survey to be paid by purchaser.

British Columbia.

Commissioner of Lands and Works, Victoria, B. C.

Any person being the head of a family, a ter upon widow or a single man over 18 years of age, and a British subject, or an alien purposing to become a British subject, can pre-empt 160 acres of land belonging to the Winnipeg.

Province west of Cascade Mountains, or 320 east of these mountains, at \$1 per acre. Two months' leave of absence under the Land Act, and an additional four months for sufficient cause, when applied for to the Chief Commissioner, can be had in each year till Crown deed is obtained.

A certificate of improvement, showing that the claim has been improved to the extent of \$2 50 per acre, is necessary before Crown deed can be issued. Timber and hay lands can be leased from the Government. Timber lands pay a yearly rental of 10 cents per acre, and a royalty of 50 cents per 1,000 feet on all logs cut. Leases of land for other purposes may also be granted by the Lieut.-Governor in Council.

Prince Edward Island.

Commissioner of Crown Lands, Charlottetown, P. E. I.

There are about 45,000 acres of vacant Government land available in this Province, consisting of forest lands of medium quality and averaging in price about \$1 an acre. Intending settlers are allowed ten years to pay for their holdings, the purchase money bearing interest at 5 per cent., and being payable in ten annual instalments.

Canadian Pacific Railway Company's Lands.

The company offers for sale agricultural lands in Manitoba and the Northwest of fine quality. The lands within the railway belt, extending 24 miles from each side of the main line, will be disposed of at prices ranging from \$2 (8s sterling) per acre upwards.

If paid for in full at time of purchase, a deed of conveyance of the land will be given: but the purchaser may pay one-tenth in cash and the balance in payments spread over nine years, with interest at six per cent. per annum, payable at the end of the year with each instalment.

Liberal rates for settlers and their effects will be granted by the company over its railway.

For further particulars apply to L. A. Hamilton, Land Commissioner, Canadian-Pacific Railway Co., Winnipeg, or to Archer Baker, 17 James street, Liverpool.

Southern Manitoba Lands.

The land grant of the Manitoba Southwestern Colonization Railway Company, only recently placed on the market, contains over 1,000,000 acres of land, well adapted for grain-growing and mixed farming, in a belt 21 miles wide, immediately north of the international boundary, and from range 13 westward. The terms of purchase are the same as those of the Canadian Pacific Railway Company, and applications to buy should be made to the same officers.

Hudson Bay Company's Lands.

Section No. 8 and three-quarters of section No. 26, in the greater number of townships, are Hudson Bay Company's lands, and all settlers must be careful not to enter upon them, unless they have acquired them from the company. The prices vary according to locality. Applications may be made to C. C. Chipman, Chief Commissioner, Winnipeg.

Manitoba and Northwestern Railway Company's Lands.

The lands within the grant to this railway company will be disposed of under the following regulations:

The price of land may be obtained from

The price of land may be obtained from the Land Commissioner at Winnipeg; it varies from \$2 60 to \$6 per acre, the price being regulated by the location of the parcel and the quality of the soil.

If paid for in full at the time of purchase a discount will be allowed, but the purchaser may pay one-sixth in cash and the balance in five annual instalments, with interest at 6 per cent per summ interest at 6 per cent. per annum.
All sales are subject to the following gen-

eral conditions:-

(1) All improvements placed upon the land purchased to be maintained thereon until final payment has been made.

(2) All taxes and assessments lawfully imposed upon the land or improvements to be

paid by the purchaser.
(3) The company reserves the right to take

without remuneration, a strip or strips of land 100 feet wide, to be used for right of way of the railway or any of its branches, wherever the same shall be located.

The lands of this company have been thor-

oughly examined by competent men, who made accurate diagrams of each section, and also a written description as to surface, soil,

These diagrams and written descriptions of all the railway lands can be seen at the of-fice of the company, at Winnipeg. Alberta Railway and Coal Company's Lands.

This company owns, in the District of Alberta, in the Northwest Territories, 400,000 acres of farming and grazing prairie lands. The lands are on the line of the company's railway from Dunmore (where it joins the Canadian Pacific Railway) to Lethbridge,

the site of the coal mines.

The company have for sale blocks of land from 10,000 to 33,000 acres in extent, for grazing or colonization purposes, and are also willing to lease lands on favorable and maps apply to Osler, Hammond & Nanterms. Smaller farms, from 80 acres upton, land agents, Winnipeg, Manitoba.

wards, can also be obtained. Full informa-tion may be obtained from the company's offices at Winnipeg, Dunmore and Leth-

Calgary & Edmonton Railway Company's Lands.

This company's land grant consists of 1,900,000 acres of agricultural and ranching lands in Alberta, and a report on any section can be seen at the company's land office in Winnipeg.

The rallway runs through the centre of the district in which the lands are situated, connecting with the Canadian Pacific Rail-

way at Calgary.

These lands are for sale at prices ranging from \$2 10 per acre upwards, according to location and quality. At present the majority of the lands (within easy reach of the railway) are offered at \$3 10.

Terms-One-tenth cash and balance in nine equal yearly payments, interest at 6 per

For full particulars and free pamphlets and maps apply to Osler, Hammond & Nan-ton, land agents, Winnipeg, Manitoba. Qu'Appelle, Long Lake & Saskatchewan

Railway Company's Lands.

This company's land grant consists of 1,500,000 acres of good agricultural land in the Saskatchewan district, and a report

on any section can be seen at the company's land office in Winnipeg.

The Qu'Appelle, Long Lake & Saskatchewan Railway runs through the district, connecting with the Canadian Pacific Railway at Regina.

These lands are for sale at prices ranging from \$2 10 per acre upwards, according to location and quality. At present the majority of the lands (within easy reach of the railroad) are offered at \$3 10 per acre. Terms—One-tenth cash and balance in nine

equal yearly payments, interest at 6 per

stitutes for butter. Rags from Europe, except Great Britain. Tea adulterated with spurious leaf, or with exhausted leaves, or which contains so great an admixture of chemical or other deleterious substances as to make it unfit for use.

MANCHESTER SHIP CANAL.

into Canada, or taken out of warehouse

for consumption therein.

On May 21, 1894, this canal was formally declared open to commerce by Queen Victoria, although the canal was practically completed and open to trade on January 1 preceding. Its minimum measurement in depth is 26 feet, in width 120 feet, capable of admitting vessels of 6,000 tons to Manchester docks, over forty miles from the sea. chester docks, over forty miles from the sea. The canal proper, extending from the Chesnire shore of the Mersey to the City of Manchester, is 35½ miles in length. In its bottom width it is nearly twice as wide as the Suez Canal, the average width at water level being 172 feet. The cost is placed at \$75,000,000.

THE LOFTIEST ISOLATED COLUMN IN THE WORLD.

The loftiest isolated column in the world is Like a tall bully, lifts its head, and lies,"

the Monument of London, 202 feet high, built by Sir Christopher Wren in 1671-77, to commemorate the great fire of 1666. Its erection cost about £14,500. The staircase is of black marble, consisting of 345 steps. An inscription, cut in 1681, to the effect that the "burning of this Protestant city" was "begun and carried on by ye treachery and malice of ye Popish faction," was obliterated by James II., re-cut in the reign of "pious, glorious and immortal memory" (William III.), and finally erased by order of the Common Council January 26th, 1831. The mendacity of the charge roused Pope's ire in the indignant lines:-

"Where London's column, pointing at the skies.

RAILWAY AND STEAMBOAT LINES

OF THE DOMINION.

STEAMSHIP AND STEAMBOAT LINES IN THE DOMINION OF CANADA

The numbers opposite each line of Steamboats correspond with numbers used in the following list of Post Offices and Railroads.

Owing to the frequent changes occurring in Steamboat lines, care must be taken to verify this list before using.

"i" This mark indicates that the line is subject to interruption by change of season, or other causes. "d" means daily, Sunday excepted.

RAILWAYS.

The first railway in Canada was opened on the 21st July, 1836, between La Prairie and St. John's in Quebec, its length being 16 miles, but until the year 1850, when Lady Elgin turned the first sod of the Northern Railway, there were but 71 miles in operation in the Dominion.

In January, 1854, the main line of the Great Western from Windsor to Niagara was opened for traffic, and in November, 1856, the Grand Trunk Railway was running between Montreal and Stratford.

In 1857 there were 1,428 miles of railway in Canada; in 1867 there were 2,258 miles; in 1877, 5,574 miles; in 1887, 11,691 miles; in 1892, 14,588 miles, and in 1895 the miles of track laid in the different Provinces were as follows: Ontario 6,267, Quebec 3,024, New Brunswick 1,396, Nova Scotia 825, Princ Edward Island 210, Manitoba 1,471, Territories 1,772, and British Columbia 800, or making in all a total of 15,745 miles.

The earnings in the calendar year 1894 were \$50,000,000 and the working expenses \$35,250,000. The number of passengers carried was 14,462,000.

C. P. R. system	Capital. \$306,000,000 313,000,000	Passengers, 1894. 3,153,000 6,195,000	Tons freight. 4,014,000 7,185,000

POST OFFICES AND RAILROAD STATIONS

IN THE DOMINION OF CANADA.

The Offices printed in *Italics* are authorized to grant and pay Money Orders. The Offices marked are Savings Bank Offices. Capital letters on right of the Electoral District column indicate the several Provinces of the Dominion, thus:—O, Ontario; Q, Quebec; NS, Nova Scotia; NB, New Brunswick; PEI, Prince Edward Island; M, Manitoba; BC, British Columbia; Alta, Alberta; Assa, Assiniboia; Atha, Athabasca; Sask, Saskatchewan,

The numbers and names placed opposite every place indicate the Railroad or Steamship line on which the nearest Railway or Railway Station is situated. See list of Railroads and Steamboats on pages 91 to 94.

The thanks of the publishers are due to E. W. Bullinger, Esq., for his kind permission to use "Bullinger's Postal and Shipper's Guide for the United States and Canada," in the preparation of the following list:—

Post Offices.	Electoral Districts.	Railroad on which located or nearest R.R. Station see key pages 91-94.	Post Offices.	Electoral Districts.	Railroad on which located or nearest R.R. Station see key pages 91-94.

IMPORTANT ACTS, DOMINION LEGISLATION OF 1895.

The following summary of the principal Acts passed by the Dominion Parliament during the session of 1895, assented to July 22nd:—

Chap. 3 is entitled an Act respecting commercial treaties affecting Canada. It extends to those powers having a treaty with Great Britain containing the most favored nation clause, the advantages granted to France by the Treaty sanctioned under chapter 2, 57-58 Vic. It also extends the

advantages to Great Britain and her colonies and repeals all inconsistent laws.

Chap. 4, provides for the settlement of the disputes between the Governments of Canada and British Columbia relating to titles to lands within the railway belt in the Province of British Columbia. The agreement provides that the Province shall register the titles and includes provisions for the settlement of existing controversies.

Chap. 6, authorizes the payment of a bounty of 75 cents per 100 pounds to the producers of raw beet-root sugar produced in Canada between July 1st. 1895, and July 1st, 1897.

Chap. 7. is an Act to encourage silver lead smelting, by authorizing the payment of a bounty not exceeding 50 cents per ton and not exceeding in all \$150,000 on Canadian silver lead ore, and other ores of silver and gold smelted in Canada between July 1st, 1895, and July 1st, 1900. The bounty is not to be paid on any ores smelted in works which are not established and operated be-

fore Jan. 1st, 1897.

Chap. 8, divides the annual subsidy of \$80,000 a year, for 20 years, formerly voted to the Winnipeg Great Northern Railway Co. (known as the Hudson's Bay Railway), so that the company may receive \$40,000 per annum on the completion of one-half of their line between Winnipeg and the receive \$40,000 per annum on the completion of one-half of their line between Winnipeg and the Saskatchewan River; the remaining \$40,000 to be paid from the date of the completion of the remaining half of the line, such sums to be paid in semi-annual instalments. The Company may sell the same or assign it by way of security. In the event of the contract not being entered into with the Company under the terms of this Act, the Governor-in-Council may transfer the \$40,000 per annum, applicable to the first half of the line, to a company authorized to construct a line of railway from Portage la Praire to Gladstone, to Lake Dolphin or thereabouts.

Chap. 11, amends the Northwest Territories Representation Act, by fixing the qualification of the voters at the elections for the Northwest Assembly. He must be a British subject 21 years old, and a resident of the Territories for at least 12 months, and in the electorial district for at least 3 months, immediately preceding the issue of the writs.

Chap. 12, suspends the revision of the Dominion voters' lists for the year 1895, and validates any

Chap. 12, suspends the revision of the Dominion voters' lists for the year 1895, and validates any

list of the revision of 1894 which had not been sent in in compliance with the Act

Chap. 13, further amends the Dominion Election Act. It provides that the Governor-General shall fix the day for the nomination of candidates at the election, and shall at every general election fix one and the same day in all the electorial districts, except Algoma, Nipissing, Gaspe, Chicoutimi and Saguenay. In Algoma and Nipissing the returning officers must within 20 days after receiving the writ issue a proclamation fixing the place and time for the nomination of candidates and the day of polling. There is a new clause as to the mode of voting, but it does not differ materand the day of polling.

Chap. 14, amends the Civil Service Act by dealing with irregularities of the Civil Service examination, and directs the Board of civil service examiners to examine persons under oath in cases

where they suspect fraudulent practices.

Chap. 15, further amends the Civil Service Act, providing that no person shall be appointed to the inside service except a deputy head whose age exceeds 35 years, or who is under 15 in the case of porter, messenger or sorter, or the full age of 18 years in the other cases. This does not affect any persons now employed. Third class clerkships are abolished and a class known as temporary clerks or writers substituted, who shall begin at a salary of not more than \$400 a year. A temporary messenger, porter, packer or sorter shall begin at not more than \$300 a year. Any person who was in the employ of theGovernment in 1832 may be appointed to any position in the public service without regard to age and without examination, but no appointment or promotion shall be made under this provision after July 1st, 1896. The Act comes into force Jan. 1st, 1896.

Chap. 16, authorizes the issue of Dominion notes in excess of twenty million dollars provided an equal amount is held in gold by the Minister of Finance. where they suspect fraudulent practices.

equal amount is held in gold by the Minister of Finance.

Chap. 19, authorizes the Treasury Board to exempt fraternal or benevolent societies, among Chap. 19, authorizes the Treasury Board to exempt fraternal or benevolent societies, among whose purposes is the granting of insurance to the members, from the operation of the Insurance Act, upon its being established that the occupation of the members of such society is of such a hazardous nature that it is either impossible or difficult to obtain insurance otherwise.

Chap. 20, amends the Insurance Act, with respect to the annual statements of companies, renewals of licenses and the name of company. Sec. 39, sub-sec. 2 of the Insurance Act is made to

apply to assessment companies.

Chap. 21, amends the Companies Act. by giving the company power to hold real estate necessary for its business not exceeding in yearly value \$10,000. The company must sell any real estate required in satisfaction of the debt within seven years after it has been so acquired, unless some Provin-

cial Act dealing with the matter is in force, in which case such Act shall apply.

Chap. 22, amends the Customs Act by establishing the Board of Customs as follows: The Commissioner of Customs, the Dominion Appraiser, and Assistant Dominion Appraisers and such other qualified officers as the Governor-in-Council may appoint. Three members form a quorum of whom the Commissioner of customs must be one.

Chap. 23, amends the Customs tariff of 1884 by repealing items 7, 31, 32, 55, 79, 80, 82, 15z, 392, 393, 394, 396, 397. New duties are imposed upon the articles mentioned in these items. The basis of most of the changes was an imposition of a duty on sugar of 1-14/100c. per lb. when above No. 16 Dutch Standard, and c. per lb. when not above No. 16 Dutch Standard. The duties on spirits

EDUCATIONAL INSTITUTIONS OF ON-TARIO.

School of Pedagogy, for the professional training of first-class Public School Teachers and High School Assistants:—
J. A. McLellan, M.A., LL.D., Principal;
J. M. Levan, M.A., Vice-Principal, with lecturers in the various branches.

PROVINCIAL NORMAL AND MODEL SCHOOLS FOR THE TRAINING OF TEACHERS.

Normal School, Toronto—T. Kirkland, M. A., Principal; William Scott, M.A., Vice-Principal; A. C. Casselman, Drawing Master; S. H. Preston, Teacher of Vocal Music; T. Parr, Teacher of Gymnastics and Calisterical thenics

Model School, in which the Normal School students practise the art of teaching—Angus McIntosh, Principal of the Boys' School; R. W. Murray, First Assistant; T. M. Porter, Second Assistant; Jeannie Wood, Third Assistant; S. M. Ross, Fourth Assistant; M. T. Scott, Mistress Girls' School; May K. Caulfelld, First Assistant; M. Meehan, Second Assistant; Alice Stuart, Third Assistant; C. F. Sutherland, Fourth Assistant; and the teachers of drawing, music, gymnastics and calisthenics in the Normal School; Mary E. McIntyre, Kindergarten Teacher: ten Teacher

ten Teacher.

Normal School, Ottawa—J. A. McCabe, M.A., LL.D., Principal; S. B. Sinclair, B.A., Vice-Principal; T. H. McGuiri, B.A., Drawing Master; J. Fleury, French Master; W. G. Workman, Music Master.

Model School—E. D. Parlow, Principal Boys' School; Wm. Brick, First Assistant; J. H. Putman, Second Assistant; H. S. Williams, Third Assistant; Adeline Shenick, Mistress Girls' School; M. G. Joyce, First Assistant; M. E. Butterworth, Sec-

ond Assistant; Florence Hanington, Third Assistant; Eliza Bolton, Kindergarten Teacher; E. B. Cope, Clerk and Account-ant, and Teacher of Gymnastics.

COLLEGIATE INSTITUTES AND HIGH SCHOOLS.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities), is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Council, except where there is only one school in the county. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives local rates must be raised. Every High School with two qualified teachers receives a fixed amount of \$400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises, and attendance. High Schools which have an average attendance of 60 availables are attendance. attendance. High Schools which have an average attendance of 60 pupils may be made Collegiate Institutes and receive additional grant. Pupils attending these schools are prepared for Matriculation in the Universities. There were 35 Collegiate Institutes and 94 High Schools, with 23,523 pupils, in Contact in 1504 Ontario in 1894.

PUBLIC SCHOOLS.

Each Township is divided into school sections of a suitable extent for one school; and in each of these sections three Trustees are elected to manage its school affairs. In cities towns and villages the schools are cities, towns and villages, the schools are managed by a Board of School Trustees elected from the municipality. There were 5,977 Public (including Separate) Schools, with 483,203 pupils, in Ontario in 1894.

EDUCATIONAL MUSEUM.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture; a valuable collection of Italian, Dutch and Flemish oil paintings and statuary casts and busts. The Museum is freely open to the public from 9 a.m. to 5 p.m.

TOTAL NUMBER OF EDUCATIONAL INSTITUTIONS

Of all kinds reported by the Education Department as in operation in the Province of Ontario during 1894 was 6,112, attended by 514,016 pupils, and expending \$5,291,380 in their support.

Note.—For further information of the educational institutions in Ontario, see un-

educational institutions in Ontario, see under "Education Institutions of Canada."

From the earliest settlement of Ontario, schools were established as the wants of the luhabitants required. The Legislature soon recognized the needs of the country, and made grants of land and money in aid of elementary secondary and superior educations. and made grants of land and money in ald of elementary, secondary, and superior education. Statutes were passed from time to time for the purpose of opening schools to meet the demands of the people. The sparsely settled condition of the Province delayed for a while the organization of the system. It was not until 1844 that the elementary schools were put on a comprehenmentary schools were put on a comprehensive basis. In that year the Rev. Egerton Ryerson, LL.D., was appointed Chief Super-intendent of Eudcation, and the report intendent of Eudcation, and the report which he presented to the House of Assembly sketched in an able manner the main features of the system of which he was the distinguished founder, and of which

he continued for 33 years to be the effi-cient administrator. In 1876 the office of Chief Superintendent-was abolished, and the schools of the Province placed under the control of a member of the Government, with the title of Minister of Education.

Since this time the control of education in Ontario is invested in the Minister of Education, and subject to the approval of the Provincial Government; all regulations for the Public and High Schools are made by him. The schools are under the con-trol of local Boards of Trustees, elected by the ratepayers, and are allowed to have none but certified teachers.

Education of children between the ages of seven and thirteen is compulsory, for not less than 100 days in the year.

PUBLIC SCHOOL STATISTICS.

Population of Ontario, 2,114,321; school population, 615,781; pupils registered, 491,741; average attendance (208 teaching days), 257,642; percentage of average attendance to number registered, 52.

Number of pupils in First Reader, parts I. and II., 191,454; Second Reader, 96,018; Third Reader, 100,817; Fourth Reader, 89,528; Fifth Reader, 13,924.

Total number of school houses, 5,876, of which 2,218 are brick, 549 stone, 2,490 frame, and 619 log.

and 619 log.

The number of teachers employed (male 2,755, female 5,581), 8,336; first-class teachers, 251; second-class, 2,999; third-class, and others, 5,069.

and others, 5,069.

Highest salary in a city, \$1,500; in a town, \$1,150; in rural schools and villages, \$800; average male teacher in a city, \$907; female, \$396; average of male teacher in a town, \$651; female, \$298; average male teacher in rural schools and villages, \$386; female, \$268.

Yield per acre Fall wheat in Ontario in 1894 had an average yield of 21.2 bushels per acre, and for the last en years an average of 20.1 bushels, and this was ahead of all competitors, Ohio coming next with .19 bushels for 1894 and 13.9 for the ten years, and Michigan with 15.8 for 1894 and 15.4 for the ten years. It spring wheat for 1894 Ontario stood fourth, her average being 14.6 bushels for 1894 and 15.4 for the ten years. Ontario stood fourth, her average being 14.0 bushels for 1894, and 15.2 for the past ten years. Manitoba ranks first in this, with a yield of 17 bushels for 1894 and an average of 19.5 for the ten years. Next came Wisconsin, with a yield ten years. Next came wisconsin, with a yield in 1891 of 16.5 and in the ten years of 12.8, and the third was Iowa, with 14.8 bushels in 1894 and 11.9 in the ten years. In bariey Ontario had in 1894 a yield of 22.6 bushels to the acre, and in the past ten years an average of 25.5, as compared to 28.6 for 1894, and 23.8 for the ten years. pared to 28.6 for 1894, and 23.8 for the ten years in Wisconsin, 24.9 for 1894 and 27 for the ten years in Manitoba, and 23.5 in 1894 and 23 for the ten years in Minnesota. In oats Ontario had in 1894 30 bushels per acre, and an average for the ten years of 34.2, as opposed to Illinois' 36.1 in 1894 and 32.6 for the ten years; Wisconsin's 32 3 for 1894 and 30.4 for the ten years; Indiana's 32.3 for 1894 and 27.1 for the ten years, and Ohio's 30.3 for 1894 and 29.7 for the ten years. A feature of this portion of the report is the reproduction of several pages of reports from various portions of the Province.

Ontario's Cheese Factories.

In the portion of the report dealing with the dairy interests of the Province a new feature is a table giving the statistics of the 1,011 cheese factories operated in Ontario in 1894. The figures are given by groups of counties and are estimated from returns received from the figures. estimated from returns received from 656 factories. In the Lake Erie group there were factories. In the Lake Erie group there were 77 factories, making cheese worth \$661,921, with an average of \$5,697 patrons, to whom \$542,132 were paid. In the Lake Huron group there were 57 factories, making \$482,580 worth of cheese, and with an average of 4,929 patrons, to whom \$383,751 were paid. In the Georgian Bay group there were 36 factories, making \$148,697 worth of cheese, and with an average of 1,781 patrons, to whom \$113,281 were paid. In the West Midland district there were !34 factories, making \$2,004,396 worth of cheese, and with an making \$2,004,396 worth of cheese, and with an making \$2,004.396 worth of cheese, and with an average of 10,486 patrons, to whom \$1,682,828 were paid. In the Lake Ontario group there were 96 factories, making \$778,571 worth of cheese, and with an average of 5,934 patrons, to whom \$632,425 were paid. In the St. Lawrence and Ottawa group there were 471 factories, making \$4,186,021 worth of cheese, and with an average of 20,163 patrons, to whom \$3,576,710 were paid. In the East Midland district there were 138 factories, making \$1,174,651 worth of cheese, and with an average of 5,802 patrons, to whom \$996,695 were paid. In the districts there were two factories, making \$4,410 worth of whom \$996,000 were paid. In the districts there were two factories, making \$4,410 worth of cheese, and with an average of 46 patrons, to whom \$3,200 were paid. In all there were 1,011 factories, making \$9,441,247 worth of cheese, and with an average of 54,839 patrons, to whom \$7,931,022 were paid. In the past twelve years

the average has been 799 factories, making \$7,-132,329, and with 43,763 patrons. Monthly statistics for the cheese factories are given, the remark being made that the milk is poorest for cheese-making purposes in June and gains rapidly as the season goes on. Creamery statistics are given, showing returns furnished statistics are given, showing returns furnished in 1894 by 39 public creameries, making butter worth \$224,605, the average price being 20.94 cents, and the average number of patrons 2,814. There are 115 creameries in all. A complete list is given of the creameries and cheese factories in Ontario.

Decline in Farm Values.

An important part of the report is the portion dealing with farm values. An important table gives the detailed values of farm property in the various districts, the totals being as fol-

ws:-
Lake Erie-
1894
Lake Huron-
1894
Georgian Bay—
1894
West Midland—
1894\$202,610,966 1893205,633,361

1894\$11,040,862 1893
The Province-

1893 970,361,070 There is thus a very general decline, which is remarkably general and which totals \$15,965,563; the details being decreases of \$15,418,244 in farm land and \$4,523,250 in live stock, and increases of \$3,831,678 in buildings and \$94,253 in implements. Since 1883 the value of farm lands has declined \$67,546,908, the decrease being very steady, although the cleared land increased from 10,539,557 acres to 12,292,610 acres in that period. There are increases in farm buildings and implements, but no more than in that period. There are increases in farm buildings and implements, but no more than necessary to keep pace with the progress of clearings. The average value per cleared acre for buildings, implements and live stock was \$29.86 in 1.94 as against \$28.63 in 1883. The value per acre occupied of the total farm property of the Province was \$41.42 in 1894 as against \$42.26 in 1893, the fall being general. The value per acre cleared is \$29.86 in 1894 as against \$30.31 the year before.

1894\$954,395,507

Live Stock Statistics.

as against \$50,527,472 on hand and \$4,004,524 sold in 1893. In cattle there were in 1894 a total of \$47,577,587 worth on hand and \$15,219,256 sold as \$11,517,087 WOTH OH HAND AND \$15,219,208 SOID AS against \$47,718,025 on hand and \$16,671,021 sold in 1893. In sheep there were in 1894 a total value of \$8,606,671 on hand and \$2,552,267 sold as against \$9,016,118 on hand and \$2,784,200 sold in 1893. In hogs there was a total of \$6,909,262 worth on hand and \$10,158,978 sold in 1894 as against \$6,622,129 on hand and \$10,296,828 sold in 1894 a 1893. In poultry there was on hand in 1894 a total value of \$2,208,518 and \$782,588 worth sold total value of \$2,208,518 and \$782,588 worth sold as against \$2,187,158 on hand and \$753,695 worth sold in 1893. The total value of live stock on hand was \$111,547,652 in 1894 and \$116,070,902 in 1893, and the value of the stock sold in 1894 was \$31,935,589 as against \$34,510,356 in 1893. A table on the value of live stock per head is added, showing that horses have decreased in value in snowing that horses have decreased in value in every class, while the average price paid for horses sold during the year is \$77 compared with \$84 in 1893. Cattle have also declined in value in every class, the average price per head sold being \$34.46 as against \$36.12 in the preceding year. Sheep have also gone down in value in both classes and the average price. in value in both classes, and the average price of those sold has been \$4.14 compared with \$4 52 in 1893. Hogs have not been an exception to the rule, as both classes have declined in to the rule, as both classes have declined in value, and the average price per head sold is only \$9.86 compared with \$10.56 in the year preceding. The best average price per head for horses was paid in the Lake Ontario district; cattle and sheep realized their best values in the west Midland group, while hogs compared the highest average price in the commanded the highest average price in the St. Lawrence and Ottawa counties.

LIVE STOCK.

According to the returns of the Bureau of Industries, Ontario possessed in 1894 live stock as under:—

BLOCK US	ander.	No.	Value.
Horses		674,777	\$46,245,614
Cattle		2,099,301	47,577,587

EDUCATION.

Educational matters in the Province of Quebec are under the control of the Superintendent of Public Instruction, assisted by a Council of 35 members, and divided into committees for the management of Protestant and Roman Catholic schools respective-

Schools are maintained partly by local taxation and partly by Government grants, and are individually controlled by local

As previously stated, religion is assumed as the basis of education, and the various Roman Catholic religious bodies and institu-

tions are largely interested in such matters. The first attempt to give instruction was made by the Recollets in 1616. In 1632 the Jesuits opened schools for the Indians. In 1637 a college was founded in Quebec. In 1801 the Legislature passed an act to establish for schools. lish free schools.

In 1894 there were a total number of 4,727 Roman Catholic Elementary Schools and Colleges, and 955 Protestant Schools.

There has been an increase of 57 educa-

tional institutions in the Province during the year. The number of pupils in Roman Catholic schools was 246,659 Roman Catholics and 1,291 Protestants, and in Protestant schools there were 2,699 Roman Ca-

tholics and 33,383 Protestants.

The number of Roman Catholics in Elementary Schools was 166,995, and of Protestants 24,338, and in Model Schools and Academies Roman Catholics were 75,749 and

Protestants 7,833.

The proportion of Protestants is steadily decreasing. In 1877 it was 15.1 per cent., in 1888 14.2 per cent., in 1889 13.3 per cent., in 1892 12.5 per cent., and in 1894 11.8 per cent.

RAILWAY.

There are 3,024 miles of track laid in Quebec, or an average of 75 square miles of area to one of track. Six lines of railway centre in Quebec, and seven at Montreal.

MINERALS.

The production of gold in the Province has been regular since 1862, but no figures were available until 1877, since which date the value of the quantity produced has amounted to \$250,000.

Quebec during 1894 exported 3,239,000 pounds of copper, and silver, phosphate and asbestos are found in small quantities.

GAME LAWS OF QUEBEC.

Close Seasons-Hunting.

(1) Moose and caribou, from 1st February to 1st September.

(2) Deer, from 1st January to 1st October. N.B.—The hunting of moose, carlbou or deer with dogs or by means of snares, traps, etc., is prohibited.

No person (white man or Indian) has a right, during one season's hunting, to kill or take alive—unless he has previously obtained a permit from the Commissioner of Crown Lands for that purpose-more than 2 moose, 2 caribou and 3 deer.

After the first ten days of the close season all railways and steamboat companies and public carriers are forbidden to carry the whole or any part (except the skin) of any moose, caribou or deer, without being authorized thereto by the Commissioner of

Crown Lands.
(3) Beaver, mink, otter, marten, pekan, from 1st April to 1st November.

(4) Hare, from 1st February to 1st November.

(5) Musk-rat (only in the Counties of Maskinonge, Yamaska, Richelieu and Berthier), from 1st May to 1st April following.

(8) Widgeon, t except sheldrak May to 1st Sep N.B.—Neverth Province to the ties of Bellechs inhabitants may but only for the shoot any of the And at any tir hour after suns rise, it is also during such prof

PROVINCE OF NEW BRUNSWICK.

Seat of Government, Fredericton.

Lieutenant-Governor — The Hon. James Fraser, \$9,000. Major Gordon, I.S.C., Capt. Montgomery Campbell, Henry Aides-de-Camp.

Lieutenaat-Governor the Hon. John J. Fraser is a son of the late Mr. John Fraser, a native of Inverness-shire, Scotland, who came to Nova Scotia in 1803, and in 1812 to Miramichl. He was born at Miramichl August 1, 1829, and educated at the Newcastle Grammar School; was called to the bar in 1852, created a Q. C. in 1873, and sat for York in the Local Legislature from 1865 until the general elections in 1866, when he York in the Local Legislature from 1865 until the general elections in 1866, when he was defeated. In 1870 he was given a seat in the Legislative Council, and sat there until 1872. He then resigned to contest York County, was successful, being re-elected in 1874 and 1878. He became President of the Executive Council June 2, 1871, and in July, 1872, was appointed to the offices of Provincial Secretary and Receiver-General, which he held until June, 1878, when he became Attorney-General and Premier. In 1882 he resigned political office, and became a Judge of the Supreme Court of this Province, and upon the lamented death of Lieut-Governor Boyd he was appointed to the position. Official residence, Farraline Place; residence, Fredericton.

MINERALS.

Lime.-Although limestones are found in considerable quantities in many parts of New Brunswick, and have in many in-stances been used as source of the manufacture of lime, none will at all compare in

mourn. Great interest attaches to these deposits, as they already constitute an important industry, and as affording a basis, under favorable circumstances, for an enormous development.

Plaster.—Localities from which gypsum is removed at present are about Hillsboro' and adjacent districts in Albert County, and the plaster beds of the Tobique River in Victoria County. Victoria County.

Granite.—The quarrying and manufacture of this rock continues to be, as for many years past, an important industry, and one

which appears to be upon the increase.
Gold.—Ever since the discovery of gold in Nova Scotia the possibility of the occurrence of the same metal in New Brunswick has been a matter of speculation, and there have been few years in which more or less search has not been instituted and so-called "finds" reported.

"finds" reported.

Iron.—'The only deposits of this metal which have attracted attention since the closure of the works at Woodstock are certain beds occurring on the Millstream River, in Gloucester County.

FISHERIES ACT.

As enacted by the Lieutenant-Governor Legislative Council, and Assembly, the Fisheries Act is as follows:—

(1) The Surveyor-General, or his Deputy, or other officer under him duly authorized to that effect, may grant leases of any un-granted Crown lands, situate on the banks granted Crown lands, situate on the banks of any non-tidal waters, lakes, rivers and streams of this Province, where the exclusive right of fishing is vested in the Crown, as riparian proprietor, together with the exclusive right of fishing with the rod and line, in the manner known as "surface fly-fishing," in the waters fronting or lying opposite such lands.

(2) Such lease shall be a license to, and confer, for the time being, upon the lessee the right to take and keep the exclusive possession of the lands therein described.

(3) The amount or sum at which any such

possession of the lands therein described.

(3) The amount or sum at which any such lease shall be bid in at public competition shall be the annual rental thereof, and such annual rental shall be paid in advance.

(4) No lease granted under the provisions of this act shall be assigned, or the fishery or lands therein described be sub-let, without the consent in writing of the Surveyor-General or his deputy.

General or his deputy.

(5) If in consequence of any incorrectness of survey, or in the description of the premises leased, or other error or cause whatsoever, a lease is found to comprise granted lands, or lands included in a lease of a prior date, the lease last granted shall be vold, in so far as it interferes with a previous grant or lease of prior date, and

the holder of such subsequent lease shall have no claim for indemnity or compensation by reason thereof.

(6) Each lessee shall be bound to keep and maintain one or more efficient guardians within the bounds of his lease, and for such period as the Surveyor-General shall deem necessary, for the effectual protection of such fishery.

(7) If any person, without the permission of the lessee or his representative, fishes or induces or employs any other person to fish, or assist in fishing, in any water included within the boundaries of any lands leased, he shall thereby incur a penalty of not more than \$20 and costs for each and every of-

(8) Any person trespassing upon the fishery of any riparian proprietor, or person occupying under him, shall be liable to a penalty of not less than five nor more than twenty dollars for each offence.

OPEN SEASONS FOR BASS, SALMON AND TROUT.

The open seasons for game fishes in New Brunswick (Dominion Government regulations), are as follows

Bass-Angling with hook and line for bass is permitted in New Brunswick at all

sperimeted in New Brusswick at an times of the year.
Salmon—1st February to 15th August.
Speckled Trout (Salvelinus fontinalis)—
1st April to 15th September.
Lake Trout—May 1 to September 15.
Land-locked Salmon—May 1 to September 15.

GAME LAWS OF NEW BRUNSWICE.

Be it enacted by the Lieutenant-Governor and Legislative Assembly, as follows:—
(1) From and after the passing of this act no person shall hunt, take, kill, wound or destroy within this Province, any moose, caribou, or deer, between the 31st day of December and the 30th day of September in

each and every year, under a penalty not exceeding two hundred dollars.

(2) No one person shall, during the time here-by allowed for killing, hunting or taking moose, caribou or deer, in any one year or season, kill or take more than two moose, three caribou, or three deer, and no number of persons forming a hunting party of three or more shall in any one season kill more than one moose, two caribou or two deer, for each

moose, two caribou or two deer, for each member of such hunting party, exclusive of guides, under a penalty of from \$20 to \$40.

(3) No person shall at any time or season hereafter hunt, take, kill, wound or destroy any cow moose within this Province, under a penalty of from one hundred to two hundred to red dollars.

(4) No person shall hereafter, at any time or season, within this Province, hunt, chase, pursue, wound, take, kill, or destroy any moose, caribou or deer, with a dog, or dogs, save it may be necessary to expel such moose, caribou and deer, from or out of any cultivated fields, under a penalty of fifty dollars. . . . the next preceding section mentioned, shall be liable to a penalty not exceeding twenty dollars.

dollars.

(11) The killing of robins, swallows and other small birds of song which frequent the fields and gardens, and the shooting, wounding, killing or destroying of sea gulls, within the Parish of Grand Manan, or the trapping, snaring or taking aliye of any of the birds referred to or mentioned in this section, or the taking or removing of the nests or eggs of any such bird, shall be unlawful, and any person finding any traps or spares set for of any such bird, shall be unlawful, and any person finding any traps or snares set for the taking of any such birds, may destroy the same; any person offending against any of the provisions of this section shall be cliable to a penalty of five dollars for each and every offence.

PROVINCE OF NOVA SCOTIA.

Population (1891), 450,396 Seat of Government, Halifax.

LIEUTENANT-GOVERNOR.

The Honorable Malachy Bowes Daly (ap-

pointed 11th July, 1890).
Lieutenant-Governor the Hon. Malachy
Bowes Daly is the son of Sir Dominick
Daly, formerly Colonial Secretary in the old Province of Canada, and afterwards Lieutenant-Governor of Prince Edward Island and several other Provinces. He was born at Marchmont, P.Q., on the 6th February, 1836, and was educated at the Catholic College of Oscott, near Birmingham, England. He adopted the Bar as a profession, and acted as private secretary to his father when Governor of Prince Edward Island, and afterwards filled the same position under Sir R. G. Macdonnell and Sir Hastings Doyle, in Nova Scotia. In 1878 he was elected to the House of Commons as M. P. for Halifax, and was re-elected in 1882. Appointed Lieutenant-Governor 15th July, 1890; salary, \$9,000. Government House, Halifax. Private Secretary, Lieut.-Col. H. W. Clerke, A.D.C.; salary, \$1,250.

PRESENT CABINET.

MINERALS.

The coal fields of Nova Scotia and Cape Breton are all practically on tide water.

Heretofore the shipment of coal by sea in winter has been practically impossible, resulting in loss from depreciation and in increased cost of handling and shipping.

The Dominion Coal Company, Lt'd, have undertaken a broad scheme of improvement in this matter, an important feature of which is the construction of a railway from Sydney to Louisburg.

This will give the coal of the Sydney fields a harbor all the year round, and make easy the distribution of coal during the winter season

PRODUCTION AND DISTRIBUTION OF COAL IN NOVA SCOTIA IN 1894.

Counties.	Coal Raised.	Home Consumption.	Exports from Province.	Total sold.

Total *2,000 lbs. to ton.	2,461,262	752,509	1,509,302	2,262,112

In 1873 the total coal sales amounted to 984,839 tons of 2,000 pounds; in 1883 the total sales were 1,453,126 tons; in 1894 the total sales were 2,262,112. Thus, in twenty-two years the total sales have increased 120 per cent; the amount consumed within the Province has increased 212 per cent., and the purchases of the neighboring Provinces have increased 274 per cent.

In Nova Scotia there are now 64 miles of railway owned by coal and iron mines.

FISHERIES

The development in fisheries in Nova Sco-The development in inseries in Nova Scotia in 1894, as compared to those of 1883, is as follows:—In 1883, the value was \$2,490,965; in 1894, \$3,361,372, an increase of \$871.007.

RAILWAYS.

In the Province of Nova Scotia there are 825 miles of track laid, or an average of 25 square miles of area to each mile of track.

PRINCIPAL GOVERNMENT OFFICERS.

Clerk Executive Council and Assistant Provincial Secretary-Treasurer, A. Newbery. Assistant Commissioner of Crown Lands, J. A. McDonald.

Superintendent of Education, D. J. Mc-Leod.

Educational matters in Prince Edward Island are under the control of a Board of Education appointed by the Government, and of a Chief Superintendent, and are sup-

ported partly by Government grants and partly by district assessments. The Government expenditure in 1804 was \$122.077, and that of the school boards \$37,854, making a total expenditure of \$159,931, being an increase of \$7,233 as compared with 1893,

FISHERIES.

The development of the fishing industry is seen in the following:—In 1883 the total value was \$126,314, and in 1894 it amounted to \$468,736, or an increase of \$342,422.

RAILWAYS.

The Prince Edward Island Railway runs the whole length of the Island, a distance of 154 miles, and, including extensions, has a total length of 211 miles.

The number of passengers carried in 1894 was 8,384 less than in 1893. There was a decrease of \$4,156 in the receipts, and an increase in the working expenses of \$6,469.

The annual receipts during the last seven years have averaged \$774 per mile, and the expenses \$1,181, being an average annual excess of expenditure of \$407 a mile. The average annual quantity of freight carried was 262 tons per mile, and the average number of passengers 648 per mile.

was 262 tons per mile, and the average number of passengers 648 per mile.

The total revenue of P. E. I. for 1893 was \$217.473, or \$1.99 per head. The total expenditure was \$294,201, or \$2.70 per head.

(e) Any kind of wild duck, sea duck, widgeon, teal. between 1st of May and 15th August. (f) Otter, fisher or pekan, beaver and sable, between 15th May and 1st October. Muskrat, between 15th May and 1st January following. (g) Marten, between 15th May and 1st January following. 15th April and 1st November.

None of the following birds—quail, pheasants or wild turkeys—shall be shot at, hunted, trapped, taken or killed for a period of three years from the 1st day of April, 1893.

None of the said animals or birds (except the animals in sections f and g) shall be trapped or taken by means of traps, nets, snares, gins, baited lines or other similar contrivances, nor shall such be set. Batteries, swivel guns, sunken punts, night

lights, or spring guns, shall not be used or be in the posesssion of any person, at any time, to kill or destroy any animal mentioned.

No poison or poisonous substance shall be used or exposed to kill or take any animal

or bird protected by this act.

No person shall have in his possession any of the said animals or birds, or parts thereof, no matter where procured, with the exception of the skin of animals that have not been killed during the close season, during the period in which the same is protected.

The eggs of any of the said birds shall not be taken, destroyed or had in possession at any time, nor the nests disturbed.

No person, either on his own behalf or as agent for others, shall purchase, barter or trade for any skin or pelt of any fur-bearing animal above mentioned which has been killed during close season.

The export of the said birds and animals out of the Province is prohibited-except | west Territories, and comparative table:-

only by special permit two live animals or birds for purposes of domestication.
A license fee of \$25 is required by all per-

sons not domiciled in Manitoba to hunt and shoot in the Province, to be had of the Minister of Agriculture, Winnipeg, good for the year of issue. Permission from owner, agent or occupier of land or of enclosed ground is required. Trained or sporting ground is required. Trained or sporting dogs shall not be allowed to run at large unaccompanied. Offences against the act shall be punished by summary conviction on information or complaint before a J. P. or Magistrate. A guest of a resident may obtain a permit to shoot free of charge for a period of three days.

FISH LAWS OF MANITOBA AND N. W. T.

A. McQueen, Fishery Inspector, Winnipeg; F. C. Gilchrist, Fort Qu'Appelle.

Whitefish, tullibee, salmon or lake trout may not be caught, bought, sold or had in possession between Oct. 5 and Dec. 15; pickerel, pike, gold eyes, mullets, April 15 and May 15; sturgeon, May 15 and July 15; speckled trout, not between Sept. 15 and May 1; maskinonge, 15th April and 15th May,

under penalty not exceeding \$100.
Indians can fish during close seasons for

own consumption only.

Net fishing of any kind is prohibited in public water except under leases or licenses The use of explosive or poisonous substances is illegal. Catching or killing young of any fish is prohibited. Placing sawdust or other deleterious substances in the water is prohibited.

The 24-hour system is in use on the Western and Pacific Divisions of the Canadian Pacific Railway (Port Arthur and west to Pacific coast). By this system the a.m. and p.m. are abolished, and the hours from noon to midight are from 12 to 24 o'clock. Eastern Time-East of Port Arthur and

St. Thomas Central Time-Port Arthur to Brandon

and branches in Manitoba.

Mountain Time—Brandon to Donald. Pacific to Vancouver.

Thus, when it is 12 noon at Montreal, eastern time, it is 11 at Winnipeg, central time; 10 from Brandon to Donald, mountain time, and 9 at Vancouver, Pacific time.

The returns for 1894 were taken by the N. W. Mounted Police, and show the population of Assa., Alberta and Sask. to be:—Whites, 73,506 (an increase of 40 per cent.); Indians, 13,345 (a decrease of 8 per cent.).

their Lordships gave judgment: (1) That the grounds set forth in the memorial and petitions, and asserted thereby in such an appeal, were admissible, and that the Act of Manitoba, relating to education, passed prior to 1890, did confer on a minority a right or privilege to education within the meaning of sub-section 2 of sec. 22 of the Manitoba School Act, which alone applies, and that the two acts of 1890 complained of did affect a right or privilege of a minority.

Acting upon this decision, on the 21st of March, 1895, "the Remedial Order" was

Premier of Province of Manitoba.

EDUCATION.

The control of educational matters in Manitoba was formerly in the hands of a Board of Education, divided into two sections, one Protestant and one Roman Catholic, but, by the act of 1890, this arrangement, together with the Separate School system, was abolished, and a Department of Education established, consisting of an Executive Council and an Advisory Board, composed of seven members, four appointed by the Department of Education, two by the Public and High School Teachers, and one by the Council of the University of Manitoba. The validity of the above act was carried through the courts to the Imperial Privy Council, and on the 29th of January houses in Manitoba.

made a State paper, in which the minority were granted the privileges they enjoyed before the act of 1890 was passed.

This order was transmitted to the Provincial Government of Manitoba, to which an answer was returned by the Greenway Government, setting forth the reasons why the Manitoba Government could not accede to the wishes of the Dominion Government as made known in the "Remedial Order." The question is to be settled at the next session of Parliament, in the early part of 1896.

The number of pupils attending school in 1894 was 32,680, out of a school population of 36,450. The average attendance was 16,260. In 1894 there were 744 school-houses in Manitoba.

EDUCATION.

The educational system of the Northwest Territories is under the control of a Board of Education appointed by the Lieutenant-Governor in Council, and composed of eight members, five Protestants and three Roman Catholics, of which the Bishop of Saskatchewan and Caigary is at present the Chairman.

No school district shall comprise an area

of more than 25 square miles, nor shall it contain less than four resident heads of families, or a smaller school population than 10, i.e., children between the ages of 5 and 20

No religious instruction is allowed in any Public School before 3 e'clock in the afternoon, at which time such instruction as is permitted by the trustees may be given, parents having the privilege of withdrawing their children at that hour, if desired.

GENERAL DESCRIPTION

of physical features of the Northwest Territories and Manitoba:-

Between the northern boundary of Ontario and the Rocky Mountains lie the Province of Manitoba and the southern part of the Northwest Territories. This great tract of land is remarkable for its division along lines running generally northwest and southeast, into three distinct prairie steppes, or plateaux, as they are generally called. The first of these is known as the Red River Valley and Lake Winnipeg Plateaux. The width at the boundary line is about 52 miles, and the average height about 800 feet above the sea; at the boundary line the height is about 1,000 feet. The first plateau lies entirely within the Province of Manitoba, and is estimated to contain about 7.000 square miles of the best wheat-growing land on the continent, or in the world. The second plateau, or steppe, has an average altitude of 1,600 feet, having a width of about 250 miles on the national boundary line, and an area of about 105,000 square miles. The rich, undulating, park-like country lies in this region. This section is especially favorable for settlement, and includes the Assinibolne and Qu'Appelle districts. The third plateau or steppe begins on the boundary line, at the 104th meridian, where it has an elevation of about 2,000 feet, and extends west for 465 miles to the foot of the Rocky Mountains, where it has an alitude of about 4,200 feet, making an average height above the sea of about 3,000 feet. The three plateaux, while varying considerably in character, are all most favorably adapted for agriculture of all kinds, including dairying and stock raising. Settlement is proceeding at a very rapid rate, numerous and prosperous homestends and cettle reprehead cettle reprehead and cettle reprehead and cettle reprehead and ce

cattle ranches having been established.

The northern part of the centre of the Dominion, extending from the Rocky Mountains to Hudson Bay, is very extensively wooded, and has generally been considered for the most part unfit for settlement and only useful as a preserve for fur-bearing animals. But during the session of Parliament of 1888 a committee of the Senate held an investigation into the capabilities of these regions, the result being that all previous ideas were upset. The area inquired into was about 1,260,000 square miles, and of these it was estimated that \$60,000 square miles were fit for settlement, and about 400,000 square miles were suitable for potatoes, 407,000 square miles for barley, and \$16,000 square miles for wheat. There is a river navigation of about 2,750 miles, 1,390 miles being suitable for stern-wheel steamers and 1,360 miles for light draught seagoing steamers. There are large auriferous deposits, as well as sliver, iron, graphite, ochre, brick and pottery clay, mica, gypsullime and sandstone. "while the petroleum

area is so extensive as to justify the belief that eventually it will supply the larger part of this continent." Furs are at present the chief commercial products of this region, which is the last great fur preserve of the world, and in view of the great dan-

mittee pointed out that the valuable whale fisheries of the northern coasts of Canada were being rapidly destroyed by foreign whalers, and suggested that the Government should adopt some measures for their pro-

Hon. Fred. W. G. Haultain, Premier of the Northwest Territories.

ger of the extinction of animals whose furs become fashionable it was suggested by the committee that fur districts should be leasted by the Government, and a limitation placed on the catch of certain kinds of furs. The lakes and rivers abound in fish, especially whitefish and lake trout. The com-

of Febru vided al ed to kil aforesaid for the family.

of February and the 1st of September; provided always that no person shall be allowed to kill or take more than six head of the aforesaid animals in any one season, except for the purpose of food for himself or his family.

18967

(2) No person shall fire at, hunt, take or kill, in any year, any buffalo, any grouse, partridge, pheasant or prairie chicken, between the 1st January and the 1st September; any kind of wild duck between the 15th May and the 23rd August; any plover, snipe and sandpiper between 1st January and 1st August

No person shall at any time disturb, injure, gather or take the eggs of any species of wild fowl or birds mentioned in this ordinance.

None of the contrivances for the taking or killing of the wild fowl, known as swans, geese or ducks, which are described as swivel guns, batteries, sunken punts or night lights, shall be used at any time; nor shall any person use grain, seed, or other description of food steeped in opium, alcohol or other narcotics, for the purpose of stupifying and capturing any species of wild fowl, except geese.

(3) No person shall hunt, trap or kill in any year, any mink fisher or marten between the 15th April and the 1st November; any otter or beaver between the 15th May and the 1st October; any muskrat between the 15th May and 1st November,

No bird named in the foregoing sections, except geese, shall be taken or killed at any time by means of any rope, snare, spring, cage, net or trap, nor shall such be set for. And no engine shall be at any time, for such purpose, placed, constructed, erected or set, either wholly or in part; and any person finding any rope, snare, spring, cage, net or trap, or engine so placed, constructed or set, may take possession of or destroy the same without such person thereby incurring any liabilities therefor.

The possession of any dead animals, or birds, or parts (except skins lawfully taken), is prohibited during close season. But any animal or bird lawfully taken at other times can be bought or sold.

Game guardians can seize birds or animals illegally in possession, and bring offenders before a Justice of the Peace within three months of offence. Fine — Buffalo, \$100; other game, \$50 or two months.

The export or carrying out of the Northwest Territories of grouse, partridge, pheasant, prairie chicken, elk, moose, caribou, antelope, or their fawn, is prohibited.

Permission can be granted by the Lieutenant-Governor to procure birds and eggs for scientific purposes during close season.

Persons in actual want may kill birds or animals for immediate necessicies.

No person shall at any time offer for sale, barter or exchange, any prairie chicken that has been caught or killed by any person other than himself.

Non-residents of the N. W. T. require a license from the Government (fee \$5), to hunt or shoot. License expires 15th of May yearly.

License may be granted to a guest of any

resident of the Territories free of charge for a term not exceeding five days.

THE NORTHWEST MOUNTED POLICE.

The force consists of: One Commissioner, one Assistant Commissioner, ten Superintendents, 31 Inspectors, 6 Surgeons, 2 Veterinary Surgeons, 184 Non-Commissioned Officers, 658 Constables, and 54 Scouts, making a total of 947. The horses of the force are all raised on western ranches, and purchased in the Northwest Territories.

Pay.—Constables' pay, 50 cents to 75 cents per diem; Corporals, 85 cents per diem; Sergeants, \$1 to \$1 50 per diem, with free clothing, quarters and rations. Cierks, artizans and teamsters receive extra working pay.

Constables engaged for five years and men on good behavior allowed to re-engage.

All ranks are drilled, both mounted and dismounted.

Rank and file injured on duty, or after fifteen years' service, if unfit for further duty, eligible for pensions. Commissioned ranks receive no pension, but are under the Superannuation Act.

The mounted police do all their own teaming, carpentering, painting, smithy and wheelwright work, tinsmithing, etc.

The principal duties performed are patrolling the country, the vicinity of Indian reserves, and the whole boundary line between Ridgeville, east of Emerson, Manitoba, and the Rocky Mountains in particular.

The boundary patrol extends for 850 miles, police outposts being about 40 miles apart. Along this boundary they collect customs dues, grant "let passes." etc., and enforce cattle quarantine over the whole distance.

The police have also charge of the quarantine at Gretna, Estevan, Wood Mountain and Macleod, looking after all cattle received, and delivering them safely to their owners, after expiration of the '90 days' detention required by the quarantine regula tions.

The Mounted Police look after Dominion timber, issue permits and collect dues therefor, in Southern Manitoba; collect all statistics of settlement, cattle crops, etc. and generally perform all police duties in the Territories, such as serving summonses, arresting criminals, taking charge of jails and prisoners, arresting and escorting lunatics to asylums, and act as fire guardians for the prevention of prairie fires.

In addition to the foregoing, they patrol the Athabasca River and country north of the Territories, in order to keep liquor out of the unceded territory; and perform duty in British Columbia and Keewatin when required.

The deposits by members of the force in the Government Savings Bank amounted to about \$15,000 during the year, and in addition to this a considerable amount is annually placed in other banks. Some of the men have had from \$600 to \$900 to their credit when they left the service.

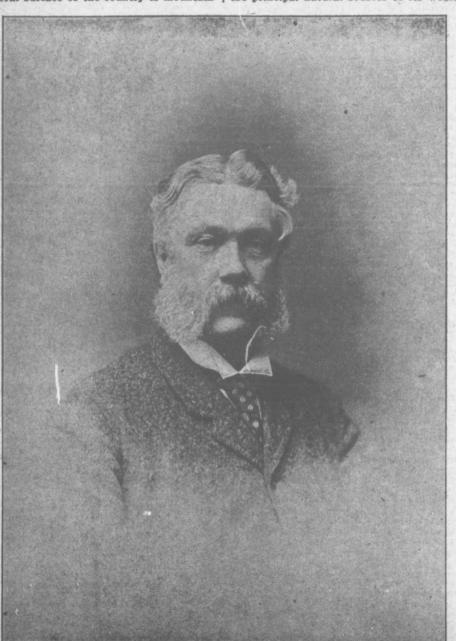

There were 849 criminal and other cases tried during 1892, principally for offences against the liquor laws and the prairie fire ordinance.

TERRITORIES. ember, 1893.)

caribou, antelope, deer tain sheep or goat, shall killed between the 1st

The Province of British Columbia occupies the mountainous or hilly region that extends to the Pacific Ocean from the western edge of the great plain or prairie country lying east of the Rocky Mountains. The general surface of the country is mountain-

ous and broken, consisting of short ranges, detached groups of mountains, elevated plateaux, and many valleys of various extent. An apparently inexhaustible supply of fish, timber and minerals of unknown value are the principal natural sources of its wealth,

Hon. Edgar Dewdney, Lieut.-Governor of British Columbia.

ng of short ranges, tains, elevated plaof various extent. ible supply of fish, unknown value are irces of its wealth,

but the climate is delightful, and extremely favorable for rapid growth, and agriculture is now making great progress.

The area of British Columbia is 382,300 square miles, and the population 98,173.

The Province of British Columbia entered Confederation 20th July, 1871.

Lieutenant-Governor the Hon. Edgar Dewdney, C.E., P.C., came to British Columbia in 1859, and entered upon his profession of civil engineer, being employed by Col. Moody in the survey of the town site of New Westminster. He subsequently laid out and Westminster. He subsequently laid out and constructed several of the heavy trails to the different mining centres. In 1868 he first entered political life as member for Kootenay, B. C., 1868 he first entered political life as member for Kootenay, B. C., in the Legislative Assembly, and remained in the Local House until Confederation. In 1872 he was returned member for the Yale and Kootenay District for the Dominion House of Commons. Re-elected in 1873 and 1878. In 1879 he accepted the Indian Commissionship for the Northwest Territories and Manitoba. He remained in charge of the Indians until 1888, having held the appointment of Indian Commissioner in conjunction with that of Lieutenant-Governor of the Northwest from December, 1881, to July, 1888. In July, 1888, he became Minister of the Interior, that office having become vacant by the death of the Hon. Thos. White. On accepting this office, he was elected for Eastern Assiniboia, and again in 1891. White. On accepting this office, he was elected for Eastern Assinibola, and again in 1891. He remained in office after Sir John Macdonald's death, under Sir John Abbott. until November, 1892, when he was appointed Lieutenant-Governor of British Columbia, his old Province, in which he spent many years, assisting in its early development whilst a Crown colony, and subsequently when it became a portion of the Dominion of Canada. Married 28th of March, 1864. Jane Shaw Moir, eldest daughter of Stratton Moir, Esq., of Colombo, Ceylon. Salary, \$9,000. Government House, Victoria, B.C. MINISTRY.

Hon. J. H. Turner, Premier and Minister of Finance, and Minister of Agriculture, Lieut.-Col. Hon. James Baker, Provincial Secretary, Minister of Mines, Education and Immigration. Hon. G. B. Martin, Chief Commissioner Lands and Works.

FISHERIES.

The total salmon pack during 1894 was 494,371 cases, valued at \$2,362,714, and for 1895, 525,516.

The Dominion Inspector of Fisheries for British Columbia reports:—"It is gratifying to note that the rivers of the Province, especially the Fraser, show no signs of depletion, or of being overfished, being in this respect unique amongst the great salmon rivers of the Pacific coast, if not of the world."

Deep sea fisheries have received greater attention during the past year, and halibut fishing is now established on a firm basis. This industry is being conducted in a vigorous and systematic manner, and gives promise of becoming of great value to the Province and profitable to its promoters.

Province and profitable to its promoters. The Fur Seal industry is yearly becoming of more importance to the Province, and especially to Victoria. During 1894 53 vesseis, averaging 66 tons each, sailed from this port, giving employment to crews numbering 867 whites and 518 Indians. The catch was large, amounting to 94,474 skins, and for 1895 72,414 skins.

AGRICULTURE.

Reports from the agricultural districts throughout the Province are encouraging.

During the fiscal year ending June 30th, 1894, 60,642 bushels of wheat were imported into the Province, on which duty was paid, \$19,096 32; and a large quantity was received from the Northwest; it is expected that this year's harvest will cause a reduction in the imports of wheat.

The area under hops has largely increased. The "Kentish" hops grown in British Columbia are favorably known in the London market.

More attention has been given to dairy farming, but, with the view of further stimulating this industry, the Board has urged the Dominion Government to extend to British Columbia aid similar to that granted to other Provinces in the establishment of co-operative dairies, which have proved a success and of great benefit to the agriculturist wherever inaugurated.

MINING.

The expectations in mining development outlined in the Board's previous report have been fully realized. The coal output during 1894 was 1,012,953 tons, the second best year on record, disposed of as follows:—Exported, 827,642 tons; consumed at home, 165,776 tons; with less than two weeks' production on hand at the end of the year. Shipments were made from Nanaimo, Departure Bay and Union ports, on Vancouver Island, to California, of 649,110 tons, the remainder being shipped to Washington State, U.S.A., Alaska.

Iron.

Rich deposits of Iron ore have been found on Vancouver and smaller islands and on the coast of the mainland of British Columbia. The best known deposits are extensive and accessible, and situated mostly near good harbors, with the necessary fluxes for smelting conveniently at hand. The ore averages from 60 to 70 per cent. of iron. There is an abundance of timber for charcoal, also coal and limestone in the vicinity of the various deposits of ore. The Canadian market for ore is protected, the duty being \$4 per ton, and there is a Dominion Government bounty of \$2 per ton on all pig iron manufactured in Canada from Canadian ore. These conditions, together with the availability of the United States, China, Japan and Australasian markets, with established steamship lines thereto, should be sufficient inducements to warrant capitalists in operating iron works in this Province.

Silver

Exports of Silver ore from Kootenay commenced in December, 1893; the exports for six months, to May 31, 1894, are valued at \$415.368. The shipments have increased from that date over 100 per cent., the exports during the month of May, 1895, being valued at \$158,014.

valued at \$158,014.

In the Kootenay District 1,215 mineral claims were recorded, and much capital has recently been invested at Cariboo.

Gold.

There were 97 placer claims recorded in the district of West Kootenay during the past year, and there are 36 mining leases in force.

In Yale district extensive work is being prosecuted. One hundred and forty mineral claims were recorded, 77 transfers made and 125 certificates of work issued during 1894.

Prospecting continues on Vancouver Is-

Prospecting continues on Vancouver Island. Assays of ore found near Alberni gave \$103 and \$135 value of gold per ton, with traces of silver.

Gold mining in the Yukon is at present restricted to workings in the creeks and gulches. This country, although known to be very rich in gold, is not yet thoroughly prospected, and is very difficult of access. As soon as these difficulties are overcome it is anticipated that gold quartz mining will be prosecuted on a large scale.

be prosecuted on a large scale.

The total Provincial output of gold during 1894 exceeded that of each of the three previous years.

During the twelve months ending June 30th, ultimo, forty mining and smelting companies were incorporated in British Columbia, to operate in precious ores, with nominal capital aggregating \$24,344,000.

The imports into British Columbia from

The imports into British Columbia from other countries of such products as can be produced in the Province amounted in 1894 to \$2,422,374, upon which duty was paid to the value of \$213,286.

The exports from British Columbia for the year ending Jan. 30th, 1894, \$82,049.

FOREST WEALTH OF BRITISH COLUMBIA.

Wooded Area.

Total area, 382,300 square miles; forest and woodland, 285,554 square miles; percentage woodland, 74.69.

The wooded area is estimated from the maps and reports of the Geological Survey and the Department of the Interior. In the central plateau of agricultural lands what wood is found is chiefly small poplar, etc., of little value.

The white pine of eastern Canada (P. stro-

bus) is not found on the Pacific coast, the Douglas fir, the yellow cedar and the spruces being the chief trees for timber and lumber.

Timber Regulations.

Leases of surveys, unpre-empted Crown timber lands may be obtained for a period not exceeding twenty-one years by those tendering the highest cash bonus, subject to the payment of an annual rental of 10 cents per acre and a royalty of 50 cents per thousand feet on the scaled measurement of the logs. The lessee, if not actually engaged in the manufacture of lumber, must. to retain his limits, erect a mill capable of cutting at least 1,000 feet a day for every 400 acres of land included in the lease, within two years, and give a guarantee equiva-lent to 10 cents an acre that he will do so before obtaining his lease.

A timber license may be granted for 1,000 acres for four years, on payment of \$10 anhemlock), and no person, not licensed, may cut timber on Crown lands except for farming and mining purposes. Only one license at one time is obtainable, and is not transferable. A special license for 1,000 acres for one year may be obtained by application in the Official Gazette and the payment of \$50 to the Chief Commissioner of Lands and Works.

NEWFOUNDLAND.

NEWFOUNDLAND.

Public attention having been once more leys, woods, lakes, ponds and marshes. directed to the question of the admission of Newfoundland into Confederation, by which means the Dominion of Canada would comprise the whole of British North America, It has been thought well to insert here a brief description of the physical and social condition of that colony. The Island of Newfoundland is situated at the entrance of the Gulf of St. Lawrence, between Lat. 46 degrees 36 seconds—51 degrees 39 seconds N., and Long. 52 degrees 37 seconds—59 degrees 25 seconds W. Its estimated area is 40,200 square miles, or about double the area of the Province of Nova Scotia. Its greatest length, Cape Ray to Cape Norman, is 316 miles, and its greatest breadth, Cape Spear to Cape Anquille, 317 miles. The coast of Labrador, from Lat. N. to Cape Chudleigh, comprising an area of about 120,000 square wiles belongs to Newfoundland, and is sense. miles, belongs to Newfoundland, and is separated from the Island by the Straits of Belle Isle. The shores of Newfoundland are generally rocky, with cliffs ranging up to 300 feet in height, but the coast line is much broken by numerous bays, some of which run nearly as far inland as 100 miles, and, while the circumterence of the Island, from headland to headland, is about 1,000 miles, its actual coast line is nearly 4,000 miles in length. Around the heads of the bays are large tracts of excellent land, gen-erally covered with fine timber and well adapted for agricultural and grazing purposes, while the interior consists of an elevated undulating plateau, traversed by low hills, the surface being diversified by val-

lakes and ponds occupy nearly one-third of the whole surface, the largest lake being Grand Lake, 56 miles in length, with an area of 192 square miles. There are no high mountains, but several ranges of hills, which attain from 1,500 to 2,000 feet in height. The principal rivers are the Exploits (200 miles in length), the Humber and the Gander. The principal bays are St. Mary's, Placentia, Fortune, Conception, Trinity and St. George's Bay. The climate is more temperate than that of Canada, the thermometer rarely falling below zero in winter or rising above 82 degrees in summer. Fogs are prevalent around the coasts, but seldom penetrate far inland. The Island generally

penetrate far inland. The Island generally is said to be very healthy

The principal industry is that of fishing, which is indeed the main element of the resources of the Island, cod, seal, herring, lobster and salmon fisheries being the most important. The annual catch of cod has been estimated at about 230 000 couldtale of 112 estimated at about 330,000 quintals of 112 pounds, but in 1891 the total was only 147, 948 quintals. The number of vessels employed in this fishery in 1891 (census) was 279, of 15,212 tonnage, and the number of men 3,719. All returns for 1882 were burnt to the country house. in the custom house, St. John's, in the great fire of that year. There were 20 great fire of that year. There were 20 steamers, aggregating 6,278 tons, engaged in the seal fishery in 1892, the crews of which numbered 4,548 men. The number of seals taken was 348,624, weighing 7,736 tons. There were also about 50 sailing vessels engaged in this fishery, the catch in which

varies very much. The seals taken are the harp-seal and hood-seal, not the fur-seal, and are valuable for their oil and for the leather made from their skins. According to the census of 1891, there were 340 lobster factories in the Island, valued at \$179,288, and employing 4,807 persons. The number of cases of lobsters turned out was 77,580, The number representing 3,723,840 pounds of fish. The total population engaged in the fisheries was 53,502. The value of the Newfoundland fisheries in 1890 and 1891 was, respectively, \$5,649,766 and \$6,679,574.

Representative government was granted to Newfoundland in 1832, and responsible gov-ernment in 1855. The Governor is appoint-ed by the Crown, and there are two chambers, a Legislative Council (not to exceed 15 members), nominated for life by the Governor in Council, and a House of Assembly, consisting of 36 members elected under man-hood suffrage. Members of the Council rehood suffrage. Members of the Council receive \$120 and those of the Assembly \$300

per annum.

CURRENCY AND BANKS.

In the early days in British North America all sorts of coin were used.

In 1705, to remedy this evil, an Act fixing the standard of value, founded upon the average intrinsic worth of gold, and silver coins, of Great Britain, France and the Unit-

ed States, was passed. In 1803 Canada adopted dollars and cents, pounds, shillings and pence, as the only

pounds, sattlings and pence, as the only moneys on account.

In 1874 the Federal Parliament passed an Act giving to the Provinces of the Dominion a uniform currency; the gold standard being that of the British sovereign, \$4 86 2-3. Silver coin was made legal tender to \$10, and when coin to 25 course. and minor coin to 25 cents.

In addition to the coin used the Canadian Government issued Government notes, first issue being made in 1866. The authority was limited to \$5,000,000 on general account

was limited to \$5,000,000 on general account and \$3,000,000 to replace notes of banks surrendering their power of issue.

In 1868 the permitted issue was enlarged to \$20,000,000. In 1895 an Act provided that the issue may exceed \$20,000,000, provided that, in addition to any amount required to be held in gold under previous acts, a further amount in gold equal to the excess of issued notes over \$20,000,000 shall excess of issued notes over \$20,000,000 shall be held.

CHARTERED BANKS.

In 1817 the first bank was established, the Bank of Montreal, followed the next year by the Bank of Quebec. These banks were

Bank of Montreal, followed the next year by the Bank of Quebec. These banks were granted charters in 1821. Between 1821 and 1836 many banks were established, among them being the Bank of British North America, organized by Scotch and English merchants, and incorporated by royal charter.

Since that time the number of banks in Canada has steadily increased, until in 1895

Canada has steadily increased, until in 1895 they number 38.

Of the 15 banks which have suspended payment since 1867, 11 have redeemed their notes in full, 1 paid 57½ per cent., and three have not yet been reported.

Of the 38 banks making returns to the Government during the past year, ten had headquarters in Ontarlo, fourteen in Quebec, eight in Nova Scotla, three in New Brunswick, two in Prince Edward Island and one in British Columbia.

The various banks in operation during the

In British Columbia.

The various banks in operation during the past year had a total paid up capital of \$62,063,371; notes in circulation, \$31,166,003; total of deposit, of Federal and Provincial Governments, \$181,743,890; total amount of discounts, \$204,124,939; liabilities of \$221,-066,724, and assets of \$307,520,020.

The year 1894 was a year of much anxiety and disturbance in financial circles, so that money was scarce and dear during a portion of it. The average rate of discount was.

The average rate of discount was, therefore, much increased, as shown in the following table :

Average rates of discount on local bills:—
1878, 7½ per cent.; 1885, 7 per cent.; 1890,
6½ per cent.; 1891, 6 to 7 per cent.; 1892,
6 to 7 per cent.; 1893, 6 to 7½ per cent.; 1894,
5½ to 7 per cent.
The chartered and incorporated banks of the Dominion are governed by the Banking Act., 53 Vic., chap. 31, the principal provisions of which are:—

lons of which are :-

(1) The capital stock of any bank here-

after incorporated shall be not less than \$500,0000, in shares of \$100 each.

(2) Five hundred thousand dollars must be subscribed, and \$250,000 paid to the Minister of Finance, who is also Receiver-General, and a certificate of permission obtained from the Traceury Peace. from the Treasury Board, before business can be commenced.

The Treasury Board consists of the Minister of Finance and any five Ministers appointed from time to time by the Governor-General in Council, with the Deputy Minister of Finance as Secretary.

(3) Bank directors must hold capital stock

(3) Bank directors must hold capital stock as follows:—On paid up capital stock of \$1,000,000 or less, stock on which \$3,000 has been paid up; on a paid up capital stock of over \$1,000,000 and not over \$3,000,000, stock on which \$4,000 has been paid up; and on a paid up capital of over \$3,000,000, stock on which \$5,000 has been paid. A majority of the directors must be British subjects.

(4) The capital stock may be increased or reduced by the shareholders, subject to the approval of the Treasury Board.

(4) The capital stock may be increased or

approval of the Treasury Board.

(4) The capital stock may be increased or cent. per annum shall be paid by any bank, unless after deducting all bad and doubtful debts it has a reserve fund equal to at least 30 per cent, of its paid-up capital.

(6) Every bank shall, subject to a penalty of \$500 for each violation, hold not less than 40 per cent. of its cash reserve in Dominion notes.

(7) The amount of notes of any bank in circulation at any time shall not exceed the amount of its unimpaired capital, subject to penalties varying with the amount of such excess.

(8) The payment of notes issued by any bank for circulation shall be the first charge on its assets in case of insolvency; any amount due to the Dominion Government shall be the second charge, and any amount due to any Provincial Government shall be the third charge.

(9) Every bank shall pay to the Minister of Finance a sum equal to 5 per cent, on the average amount of its notes in circulation, average amount of its notes in circulation, such sum to be annually adjusted according to the average amount of circulation during the preceding twelve months. Such amounts are to form a fund called "The Bank Circulation Redemption Fund," to be used, when necessary, on the suspension of any bank, for the payment of the notes issued and in circulation, and interest. All notes in circulation shall bear interest at 6 per cent, per annum from the day of suspension until redeemed. Payments from the fund are to be without regard to the amount contributed. contributed.

(10)-All notes issued for circulation shall

be payable at par throughout Canada.

(11) Any bank, when making payment, is compelled, if requested, to pay the same, or part thereof, not exceeding one hundred dollars, in Dominion notes for \$1, \$2 or \$4 each.

(12) Penalties are provided for placing anything in the shape of an advertisement on a note, and for issuing advertisements in the form of notes.

(13) No bank may lend money on its own shares, or on those of any other bank, or

upon mortgage of real estate, or on the se-curity of any goods, wares or merchandise, except as collateral security.

(14) Except as required for its own use, no bank shall hold any real estate for a longer period than seven years.

(15) Any rate of interest may be charged and allowed, but not more than 7 per cent. can be recoverable.

(16) Monthly recurs signed by the chief accountant, the acting President and the Manager shall be made to the Minister of Finance within the first fifteen days of each month, subject to a penalty of \$50 for each

day's delay, such returns to be made in the form provided in the act. Special returns may be required by the Government at any time. All Government checks are payable at par.

(17) No person may use the title "bank,"
"banking company," "banking house,"
"banking association," or "banking institution," unless authorized by this or some other act of Parliament.

The list below will show banks in Canada, with the branches tney have organized as the population of the country increased; also their foreign banking agencies:—

THE WORLD'S MONEY SUPPLY.

The Acting Director of the United States Mint prepared the following table of the monetary systems and approximate stocks of money in the aggregate and per capita in the principal countries of the world. This table shows that the aggregate stock of gold in June, 1893, was \$3,582.605.000; the aggregate stock of silver was \$4,042,700,000,

220

and the aggregate uncovered paper was \$2,-635,873,000. The stock of gold possessed by the principal countries is given as follows:—Great Britain, \$550,000,000; France, \$800,000,000; Germany, \$600,000,000; Russia, \$250,000,000; United States, \$604,000,000.

The silver stock of these same countries is given as follows:—Great Britain, \$100,000,000; France, \$700,000,000; Germany, \$211,000,000; Russia, \$60,000,000; United

States, \$615,000,000.

This stock of silver is divided into full tender and limited tender. The United States has \$538,000,000 full tender, and \$77,-States has \$538,000,000 full tender, and \$77,-000,000 limited tender; Great Britain, no silver full tender, \$100,000,000 limited tender; France, \$650,000,000 full tender, \$50,-000,000 limited tender; Germany, \$103,000,000 limited tender; Russia, \$22,000,000 full tender and \$38,-000,000 limited tender; Russia, \$22,000,000 full tender and \$38,-000,000 limited tender. The ratio prevailing in nearly all the principal countries between gold and legal tender silver is 1 to 15½. This is the ratio in France, Belgium, Italy, Spain, Netherlands, Russia, Central and South America. The ratio between gold and limited tender silver is as a rule 1 to 14.38. The respective ratios in the United States are 1 to 15.98 and 1 to 14.95. The various monetary systems, as divided among the several countries, are as follows:—

Gold and Silver—United States, France,

Gold and Silver—United States, France, Belgium, Italy, Switzerland, Greece, Spain, Netherlands, Turkey and Japan.

Gold-United Kingdom, Germany, Portugal, Austria, Scandinavian Union, Australia,

Egypt, Canada and Cuba.
Silver-Russia, Mexico, Central and South

America and India.

Of the uncovered money, South America has \$600,000,000, Russia \$500,000,000, the United States \$412,000,000, Austria \$260,000,000, Italy \$113,000,000, Germany \$107,000,000, France \$81,000,000, and Great Britain \$50,000,000.

The per capita circulation of gold is:— United Kingdom, \$14 47; France, \$20 52; Germany, \$12 12; Russia, \$2 21; United

Germany, \$1 States, \$9 01.

The per capita of all classes of money is:—France, \$40 56; Cuba, \$31; Netherlands, \$28 88; Australia, \$26 75; Belgium, \$25 33; United States, \$24 34; United Kingdom, \$13 42; Russia, \$7 16.

ORIGIN OF BANKS.

Banks existed in China, Babylon, Greece, Rome and other nations long before the Christian era, but the earliest records of European banks now in existence are those of the Bank of Venice, founded A.D. 1771; the Bank of Barcelona, in 1401; the Bank of Geneva, in 1407, and the Bank of Amsterdam, in 1609. The oldest bank notes of which we have any record were issued in China as far back as 2657 B.C. The popular name of this paper currency was "flying money," or "convenient money," and it was in form similar to that of American bank bills, over the standard to the convention of the standard to the same than in form similar to that of American bank bills, except in the addition of mottoes, such as "Produce all you can; spend with economy." They bore the name of the bank, number of the note, value, place of issue, date, and signature of the proper bank officers. The value was in some cases expressed in figures, in words, and in pictorial representations, showing coins or ingots equal in amount to the face value of the paper. They bore also a notice of the penalties of counterfeiting. A specimen of these notes, issued in 1399 B.C., is on exhialties of counterfeiting. A specimen of these notes, issued in 1399 B.C., is on exhi-bition in the Asiatic Museum, St. Petersburg. It is printed in blue luk on paper made from the fibre of the mulberry tree. In the Metropolitan Museum of Art, New York, there are Babylonian tablets of banking transactions dating back to the reign of Nebuchadnezzar. The earliest of these tab-lets belong to the year 601 B.C. The earliest known Babylonian banking house is said to be that of Egibi & Co., a house that seems to have acted as a sort of Imperial banking institution in Babylon from the time of Sennacherib (700 B.C.) down to the reign of Darius, 516 B.C., having been traced through five generations. Records of this house, on clay tablets, found in an earthen jar in the neighborhood of Hilleh, near Babylon, may be seen in the British Museum.

COMPENDIUM OF POPULAR INFORMATION REGARDING LEGAL MATTERS.

BILLS, NOTES AND CHEQUES.

Definitions of.

A Promissory Note is an unconditional promise in writing made by one person to another signed by the maker, engaging to pay on de-mand, or at a fixed or determinable future time, a sum certain in money to or to the order of a certified person, or to the bearer.

A Bill of Exchange is an unconditional order in writing, addressed by one person to another, signed by the person giving it, requiring the person to whom it is addressed to pay at a fixed or determinable future time a sum certain in money, or to the order of a specified person, or to bearer. or to bearer.

A Cheque is a Bill of Exchange drawn on a

Bank, payable on demand.

Consideration is always presumed to have been given for Bills, Notes and Cheques, and in an action between the original parties thereto,

the burden of proving that no value has in fact been given rests on the Defendant—which being satisfactorily established constitutes a good defence, but the want of consideration is never a defence to an action brought thereon by a holder in due course, that is a person who becomes the holder of it before maturity for value, and without notice or knowledge of previous dishonor, or of any defect in the title of the person who negotiated it.

The title of a person who negotiates a Bill or Note is defective, when he obtained it or the accentance thereof by fraud, duress, or force and fear, or other unlawful means, or for an illegal consideration, or when he negotiates it in breach of faith, or under such circumstance as amount to fraud.

A person who lends his name to some other person, to a Bill or Note is called an accommodation party, and is liable to a holder in due course for value, notwithstanding such holder knew such party to be an accommodation party Every person wh Bill or Note is prin come a party there er is prima facie de course, and it devo prove the contrary

It is not necessar be dated, but in or ity, the real date of inserted by the hol It is not necessar

t.
negotiates a Bill
obtained it or the
duress, or force
cans, or for an ile negotiates it in
circumstance as

ne to some other led an accommoa holder in due ding such holder mmodation party Every person whose signature appears on a Bill or Note is prima facie deemed to have become a party thereto for value, and every holder is prima facie deemed to be a holder in due course, and it devolves upon the defendant to prove the contrary.

It is not necessary that a Bill or 'Note should be dated, but in order to fix the date of maturity, the real date of issue or acceptance may be inserted by the holder.

It is not necessary that a Bill or Note should be expressed on its face as having been given for value, although the usual form contains the words "for value received."

words "for value received."
Every Bill or Note given in consideration in whole or in part of the purchase money of or an interest in a Patent right, must have written or printed prominently and legibly across the face thereof the words "given for a Patent Right."

Any person negotiating or issuing such a Bill, not having these words on it and knowing the consideration therefore, is guilty of a misdemeanor and liable to a fine of \$200 or impressment for one year.

prisonment for one year.

Cheques or Drafts or Notes payable on demand, must be presented for acceptance or payment as the case may be, within a reasonable time, in determining which regard is had to the nature of the instrument, the usage of trade and of banks and the facts of the particular case.

A Bill or Note payable on demand is deemed to be overdue when it appears on the face of it to have been in circulation an unreasonable length of time.

Cheques are sometimes made payable only through a Bank by being crossed, and persons receiving such a cheque must deposite it with, or hand it in for collection by, a Bank—as the Bank upon which such crossed Cheque is drawn will refuse to pay it, except it be presented through a Bank—if crossed generally or if crossed specially through the particular Bank to which it is crossed.

Bank to which it is crossed.

Cheques are crossed by having two parallel transverse lines ruled across their face, and they are crossed specially by having additional words written between these lines, as the name of a Bank.

Notes bear interest only when so stated on their face, but when not paid at maturity, interest may be charged at six per cent from that date.

If no time of payment is expressed on a Note

or Bill, it is payable on demand.

Where a Bill is payable at sight or at a fixed period after date or after sight, the time of payment is determined as follows:—Running from the date of acceptance or from date of noting or protest, if the Bill is noted or protested for non-acceptance, excluding the day from which the time is to run and including the day of payment with the addition of three days, called days of grace.

Bills or Notes must be duly presented when and where due and payable, and if not paid or accepted as the case may be, notice of presentment and dishonour must be sent by the holder to the drawer and the endorsers, failure to do which discharges them. Capacity to incur liability as a party to Bill or Note is co-extensive with capacity to contract, for it is in fact a contract, hence an infant or minor, or a corporation having no capacity of power to incur liability on a Bill or Note, or a named woman not possessed at the time of separate proerty (in respect of which she may contract).

cannot be rendered liable on a Bill or Note, but the holder has a right to enforce payment upon any other party thereto,

LEGAL MATTERS.

A Bill, Note or Cheque becomes ontlawed after six years shall have elapsed after maturity, or after the last payment made on account of either principle or interest, or any written acknowledgment or promise made and signed with respect thereto, and the statute of Limitations may be pleaded in defence to an action brought on such a Bill or Note.

Debts which are represented by Bills or Notes are not garnishable, during the currency thereof, they being negotiable, but after maturity this rule does not apply.

An endorser may prevent his own liability to be sued on a Bill or Note, by writing before his name "without recourse," such is called a qualified endorsement. A Note or Bill endorsed in blank (the name of the endorser only written) is transferable by delivery, as also a Note made payable to bearer, and the holder is entitled to receive and demand payment thereof from the endorsers or the maker, drawn or accepted as the case may be.

CONTRACTS GENERALLY.

There are classes of contracts distinguished by their mode of formation, 1. Simple contracts; 2. Contracts under seal; 3. Contracts of records i.e. judgments.

Simple contracts are again divided into two classes. 1. Those formed by agreement; 2. Those implied in law.

There is no special form required for simple contracts, except those which are required by the Statute of Frauds to be made or proved with writing and signature.

An agreement in order to create a legal contract must have a consideration to be binding in law.

The consideration may consist of: 1. Something performed or some value given at the time or some loss or detriment sustained, or suffered,; 2. Something promised to be performed or given at a time stated, or upon conditions to be complied with by the other party to the contract, as mutual promises between the parties inter-dependent upon each other.

The principal constituent elements of

The principal constituent elements of agreement are an offer of terms on the one side and the unqualified unconditional assent thereto or acceptance thereof on the other, and there is no contract unless and until such assent or acceptance be communicated.

An offer can only be accepted by the particular person, firm, or corporation, or class of persons to whom it is made—as "A" offers to sell a horse to "B" for \$200. "C's" acceptance of that offer cannot establish any contract between him and "A."

Contracts may be made by correspondence, and the negotiations may be traced through a series of letters—until a final agreement is arrived at—that is at the point where the last offer made, or term, variation or condition added or imposed, is assented to and accepted by the other absolutely.

In contracts so formed, the postoffice is, as between the sender of the letter and the person to whom it is addressed, as a general rule regarded as the agent of the sender, hence a contract is complete by the due posting of the letter of acceptance, prepaid and correctly addressed—whether or not such letter actually reaches its proper destination or not. And the same rule applies where the offer is made by

telegram—and may be accepted by the same mode or means of communication.

A reasonable time is allowed for the accepat any time before acceptance, even although the offer itself specifies a time within which it may be accepted, but the intention to revoke must be communicated to the other party before it has been accepted by him.

And in contracts made by correspondence or by wire—as above—the letter or advice wire of revocation must have been received before the letter or telegram of acceptance has been posted or sent, as the case may be, or otherwise it is

Contracts are implied in law in the following cases: 1. Where money has been paid by one party for the use of another: 2. Where money has been received by one party for the use of another; 3. Debts for the amount of accounts

another; 3. Debts for the amount of accounts stated between the parties.

In cases of money paid by one party for the use of the other—the law implies a promise on the part of that other that the amount so paid shall be repaid to him—where the payment has been made under compulsion and not as a

purely voluntary payment.

The Statute of Frauds (29 Car. II, C. 3) requires certain kinds of contract to be made in or to be evidenced by writing and signed by the party sought to be charged or by his agent before an action can be brought to enforce the contract.

1. Contracts or agreement for sale of land or

an interest or estate therein.

an interest or estate therein.

2. (1) Contracts of guaranty or surety—as a promise by an executor to answer damages out of his own estate; (2) A promise by the defendant to answer for the debt, default or miscarriage, of another person; (3) Agreements made in consideration of marriage; (4) Agreements not to be performed within the space of one

year.
3. Contracts for the sale of goods, wares and merchandises for the price of \$40.00 or upwards. except the buyer shall accept part of the goods so sold and actually receive the same or give something in earnest to bind the bargain

or in part of payment.
4. Promises made after full age to pay a debt or ratifying a contract made during infancy.

CONTRACTS UNDER SEAL

Certain agreements are void of legal effect unless made by deed—such as a voluntary or gratuitous promise—a conveyance of land—a mortgage or bill of sale of goods—a guarantee—a bond or covenant or indemnity.

The Statute of Limitations—limit the right of action on simple contracts to within 6 years of the recruing of the cover of action, but in

after the accruing of the cause of action, but in contracts under seal the limit is in general 20

Consideration is imported and does not require to be proved, but the other party may prove that the consideration was illegal—or that there was none—in either of which cases as between the original parties thereto, the courts will not enforce the contract.

Contracts under seal are superior to simple contracts in several respects, and the latter, where the subject matter is the same, becomes merged in the former-and is thereby extinguished-as where a bond or covenant is given to secure a simple contract debt

The doctrine of estoppel applies to rentals

and statements contained in such a contract. and statements contained in such a contract, and the party making them is estopped from denying their truth in any action thereon between the same parties suing or sued in the same right—or those claiming through them.

A contract under seal cannot be amended or varied or discharged by a simple agreement which is not under seal.

AUCTION SALES.

Where sale is advertised "without reserve" the vendor cannot bid either directly or indirectly, and the employment by him of any bidder, usually called "A Puffer," at an unreserved auction sale is fraudulent—and entitles the purchaser to avoid the sale.

In sales of land-the particulars or conditions of sale must state whether the sale is without reserve or subject to a reserve bid-or whether

a right to bid is reserved.

If without reserve or to that effect, then the seller cannot bid or employ a bidder at such sale, nor can the auctioneer knowingly receive such a bid.

A sale subject to a reserved bid enables the vendor to withdraw the property from sale unless and until such reserved price or bid is reached—but does not entitle him to bid or employ another person to bid for him up to the reserved price.

On the other hand-if a person wrongfully or fraudulently deters others from bidding, and thereby becomes the purchaser—the vendor

may avoid the sale.

Each bidding at an auction sale is an offer for the property put up for sale—and these biddings may be continued to be made until one is accepted by the fall of the hammer when the agreement is thereby complete—unless contrary to the the stipulations contained in the conditions of sale.

CONTRACTS BY MARRIED WOMEN.

By the common law, a married woman is incapable of binding herself personally by any contract—on the principle that the husband and wife are in law regarded as one personand formerly the husband was required to join in all contracts made by a wife-in order to give legal effect thereto.

A married woman could hold separate property through a trustee—and such trustee could convey or dispose of it as she might direct—

without the intervention of the husband.

Now by force of legislative enactment altering the common law in that regard—a married woman may, acquire, hold or dispose of real or personal property—as her separate property— in same manner as if she were feme-sole, exclusive of her husband and without the intervention of a trustee.

She may also make binding contracts in respect of and to the extent of her separate property—and she is capable of suing or being sued without her husband being joined with her as plaintiff or defendant. And any damages or costs recovered by her in any such action or proceeding shall be her separate property and any damages or costs recovered against her in any damages or costs recovered against her in any such action shall be payable out of her sep-

arate property.

A married woman must be possessed of separate property at the time the contract is made, and such separate properly must be free from any restraint against anticipation, as a contract made by or with a married woman not at the time so possessed of separate property

is void, and a con only her separate contract was made covered, but also she may thereafte

PRINCIPAL AND AGENT.

Caution is required on the part of a person dealing with an agent for another person, whom thereby he seeks to make liable as principal—for he must prove: 1. The existence of agency; 2. The agent's authority to make the contract.

In contracts under seal, the agent's authority must also be a sealed instrument called "A power of attorney."

In simple contracts, i.e. contracts not under seal, no particular form is required ex-cept in cases within the Statute of Frauds—relating to interests or estates in land—the agent must be "thereunto lawfully authorized by writing" writing.

Agency may be presumed from the circumstances and conduct of the parties, or from previous dealings and transactions of a similar character, or from the relation of the partiesand in case of necessity, the law implies agency as for example, a master of a ship upon an emergency happening—may pledge the credit of the owner for needed repairs—or even to sell the ship or the cargo—and a common carrier may also pledge the owner's credit for the purpose of taking proper care of the goods.

In all cases of agency—it metters not whether

In all cases of agency—it matters not whether as between the agent and third persons—the agent could himself have made the contract, but it is necessary that the professed principal should be in existence—and ascertained at the should be in existence—and account and must time of the making of the contract and must also have the power or capacity to make the contract which the agent assumed to make for him and on his behalf.

Where an agent makes a contract on behalf of a supposed principal who had not at the time authorized the making of such contract by the agent, he may afterwards ratify the contract, and though not bound before such ratification he thereby becomes bound to the same extent as if he had authorized the contract to be made in the first place-the ratification relates back to the date of the contract.

The ratification must be of the whole con-

tract as made—and is not sufficient if any variation is sought to be made or imposed—and there is then no contract until such variation is assented to and accepted by the other contract-

ing party.

The agent and the other contracting party may before the contract is ratified by the principal, rescind or alter it, by mutual agreement, in which event a ratification made after such recession or alteration is of none effect so far as the original contract is concerned,

In general an agent cannot delegate his authority to other parties, and especially is this so, where the nature of the agency involves personal trust or confidence in the integrity, discretion or skill of the agent.

A person who professes to make a contract for a principal, without authority so to do, and when the supposed principal refuses to retify

when the supposed principal refuses to ratify and repudiates the contract as having been made by him, is himself personally liable in damages to the other contracting party, the measure of damages being assessed on the loss sustained, assuming that the contract would be carried out—and in addition any costs in-

curred or sustained in an unsuccessful action upon the contract against the supposed principal, which failed on the ground of non-or insufficient authority to bind him.

In bills and notes.—If the agent signs in such a manner as to indicate that his signature is for or on behalf of another person or a company—as by adding the words "per pro" or "by procuration of "or any words to the same effect, his personal liability is excluded—and the person taking the bill or note so signed is affected son taking the bill or note so signed is affected

with notice of the agency.

A principal who has employed an agent to buy or sell goods for him or otherwise to act for him as an agent, on the termination of the agency, in order to protect himself, should give notice thereof to all parties with whom in the ordinary course of business he had previously dealt through such agent.

PARTNERSHIPS.

Partnership is:-

1. The result of an agreement to share profits and losses.

2. Prima facie the result of an agreement to share profits although nothing may be said about losses and although there may be no common stock.

3. Prima facie the result of an agreement to share profits although community of loss is specially provided against.

Parties are rendered liable as partners by holding themselves out as such or by allowing themselves to be so held out.

The doctrine of holding out only applies in favor of persons who have dealt with the firm on the faith that the person sought to be made liable as a member.

liable as a member.

Partnerships may be proved in an action between the creditor suing and the alleged partnership by evidence of: (1). Admissions of the party sought to be made liable; (2). Advertisements, prospectuses, letter or invoice headings, containing the names of the alleged partners, or by a name over the door of the firm's place of business; (3). Former conduct and mode of carrying on the business; (4). Agreements or drafts of arguments after. (4). Agreements or drafts of arguments afterwards acted on, containing admissions and re-citals of the fact of the existence of a part-

Partnerships and dissolutions of partnerships are required to be registered.

The signature of a partner in the name of

the firm to documents requiring such signa-ture in the ordinary course and conduct of the firm's business, bind the other members of the firm as well.

CRIMINAL LAW NOTES.

No infant under 7 years of age can be convicted of any crime.

An infant between 7 and 14 is presumed incapable of committing crime until the contrary is proved—that is, it must be clearly proved that he was competent to know the nature and consequences of his conduct, and to appreciate that it was wrong.

A person of 14 years of age and upwards is presumed to have capacity to commit any crime until the contrary is proved.

Drunkenness is never an excuse for crime—but where the intention of the guilty party is a necessary element of the offence itself, it is taken into consideration as to whether he had the intention necessary to constitute the the intention necessary to constitute the

Insanity, compulsion and self-defence are pleas of justification, but compulsion is not an excuse for treason, murder, rape, piracy, for-cible-abduction, robbery, causing grevious bodily harm or arson.

The following are capital offences which are or may be punishable by death:--

1. Treason.

- Levying war.
 Piracy, accompanied by murder, attempt to murder, wounding, or any act endangering
 - Practical acts endangering life.

Murder. Rape.

A person found guilty of the following offences may be imprisoned for life:—

1. Abortion.

- Arson 3. Intentionally endangering the safety of persons on railways. 4. Manslaughter.
- 5. Counterfeiting coins, or deals in and imports counterfeit coin.

6. Sodomy.

- 7. Forgery in certain cases—public docu-ments, documents of title to land, exchaquer bill, bank note or bill of exchange, promissory note or cheque, receipt, bill of lading policy of insurance, warehouse receipt, or any document used in the ordinary course of business as proof of the possession or control of goods or as authorizing either endorsement or delivery, the possessor of such document to transfer or receive any goods.
- 8. Perjury where committed in order to procure the conviction of a person for any crime punishable by death or imprisonment for seven years or more.

9. Burglary.

10. Rape. 10. Rape.

11. Riot (1). Opposes, hinders or hurts any person who begins or is about to read the Riot Act, whereby it is not done; (2). Continues together to the number of 12 for thirty minutes after the reading of the Riot Act, or if they know that its reading was hindered, within thirty minutes after such hindrance.

12. Robbery.

13. Treasonable offences.

14. Wrecking.

The numishment, of whipping cannot be in-

The punishment of whipping cannot be inflicted on any female—and a person guilty of robbery, and indecent assaults and of rape may sentenced to imprisonment and to be whipped.

Limitation of time for commencing prosecu-

tion for:
1. Treason, treasonable offences, and fraudulent marking of merchandise, 3 years.

2. Frauds on government, municipal corrup-on, unlawfully solemnizing marriage, 2 tion.

3. For opposing reading of Riot Act, refusing to deliver weapons to justice, seduction, defling or procuring defilement of females, coming armed or lying in wait near public meeting, 1

4. Unlawful drilling or being drilled, having possession of arms for dangerous purposes, publication by newspaper proprietor of an advertisement offering a reward for stolen prop-

erty, 6 months.

5. Cruelty to animals, violation by railways of provisions as to conveyance of cattle, refusing to admit peace officer to car, 3 months.

EVIDENCE.

In Civil Matters.

As a general rule contracts in writing cannot be added to or varied by extrinsic evidence of the contents of the parties, as the parties hav-ing reduced their agreement to writing, the law considers the writing as expressing the whole contract between them.

Extrinsic evidence is admissable to have the signatures to or execution of the writing, as proving that the writing produced was agreed to and accepted by the party or parties thereto

as expressing their agreement.

A deed is proved by sealing and delivery and in simple contracts not requiring signature, a writing may be proved as the agreement of the parties by evidence of acts of acceptance, as where steps are taken to carry out the terms contained in the writing, that is, the parties proceed to execute the contract according to the tenor of the writing.

The actual time of the execution of a con-tract may be proved although the writing con-

tains some other date.

Agreements and deeds are sometimes signed conditionally-not to operate until the happening of a certain event or the fulfilment of a stated condition precedent to the document going into effect. This is called delivery as an escrow, and evidence is always admissable to show that writing was signed upon such conditions.

A deed of land or a bill of sale of goods is sometimes executed as a security for a money advance, and evidence is admissable to prove this fact, and effect is only given to it as a

mortgage.

Two mortgages are sometimes executed between the same parties, for the same amounts and on the same dates but on different properies, and evidence is admissable to prove that the one was collateral to the other.

The custom of merchants, usage of trade, local usages, are sometimes admissable as evidence to explain the meaning of a written

contract.

No person is incompetent as witness by reason of alleged incapacity, from crime or interest. Husbands and wives of parties to an action, as well as the parties themselves, are competent and compellable witnesses, except that no husband and wife shall be compellable to disclose communications made during marriage.

Questions tending to incriminate the witness

need not be answered.

In actions for breach of promise of marriage corroborative testimony is required to support the alleged promised.

In actions by or against representatives of a deceased person under action by or against lunatics, the evidence of the opposite party

must be corroborated.

Evidence of contradictory written statements cannot be given unless, and until, the attention of the witness shall have been first directed to those parts of the writing which are to be used for the purpose of contradicting him, and likewise proof may be given of con-tradictory oral statements made by the witupon circumstances of the supposed statement sufficient to designate the particular occasion being mentioned to the witness, and upon his being asked whether or not he did make such statement. A party producing a witness shall not be allowed to impeach his credit by evidence of bad character, but where,

in the opinion of th adverse, such part other evidence, or b prove that at oth made statements in testimony; the circular and he being asked did or did not mak or public documents further proof of sig a general rule, an produced as evidence the existence of it ondary evidence ma the Court alone, and of contracts made are construed accord rules of construction admissible as well lated from a foreig language. in the opinion of the Court, the witness proves adverse, such party may contradict him by other evidence, or by leave of the Judge, may prove that at other times the witness had made statements inconsistent with his present testimony; the circumstances being mentioned and he being asked the question whether he did or did not make such statement. Official or public documents prove themselves without further proof of signature being required. As a general rule, an original writing must be produced as evidence of its contents, but where the existence of it is proved and its loss, secondary evidence may be given. The construction of written contracts and documents is for the Court alone, and not for the Jury. In case of contracts made in a foreign country, they are construed according to the foreign law and rules of construction, and evidence of such is admissible as well as of the meaning translated from a foreign tongue into the English language. (In Province of Quebec the French language may be used) language may be used.)

In Criminal Matters.

Evidence of a child of tender years may be received without oath in the discretion of the Court, but such testimony must be corroborated by some material evidence.

wife is now a competent but not a compellable witness against a husband

In prosecutions against alleged offenders under fourteen years of age, evidence of capacity to commit the offence charged must be proved.

No person is excused from answering any question on the ground that his or her answer may tend to incriminate or to establish liability to a civil proceeding, but where the privilege is claimed such evidence cannot afterwards be used against the witness in any proceeding thereafter instituted, except for prosecution for perjury in the giving of such evidence. The same rules apply in general to criminal

as to civil proceedings.

Corroboration is required to convict upon the evidence of one witness in prosecutions for-

Treason. Perjury Seduction. Defiling women.

Parents or guardians procuring defilement of girls.

Householders permitting defilement of girls.

Conspiracy to defile. Carnally knowing idiots.

Prostitution of Indian women. Procuring feigned marriage.

11. Forgery.

GENERAL LAW MAXIMS.

1. Common law is common sense, which is the

best guide in all ordinary cases.

2. Never sign a promissory note until after you have received the value for it.

3. Never go to law for the sake of satisfaction! You'll never get it if you do.

 Imaginary wrongs are better unredressed.
 A lawyer's highest aim should be to keep his clients out of litigation.

in a place of safety. It will not make him die

one day the sooner.

9. He who is his own lawyer has a fool for his client.

PROMISSORY NOTES.

A promissory note is an absolute promise in writing to pay a specified sum at a time therein stated or on demand, to a person named or designated, or to his order, or to the bearer.

A note payable to a person without adding bearers order is not transferable.

bearer or order, is not transferable.

A note payable to bearer may be transferred by delivery without endorsement, but if the arty transferring endorses he makes himself liable on the note.

A note payabe to order cannot be transferred without the endorsement of the person to whose

order it is made payable.

A person wishing to endorse a note without making himself liable on it should write underneath his signature the words "without re-

Presentment of an ordinary note at the place where it is made payable is not necessary to hold the maker, but both presentment and notice of dishonour are necessary to hold an

endorser.

Presentment should be made on the last of the three days of grace, or if that is a legal holi-day, then on the day following. Notice of dis-honour may be posted on the day of present-ment or the day following.

The legal holidays in the Province of Ontario are Sundays, New Year's Day, Good Friday, Christmas Day, the Birthday of the Sovereign, and special days appointed by proclamation for public holidays, fasting or thanksgiving.

An infant under the age of twenty-one years cannot make himself liable by making or endorsing a promissory note.

A note made payable with interest bears interest at the rate specified in the note from its date until payment.

A note not made payable with interest bears interest from maturity at six per cent.

A Bill of Exchange is an unconditional written order from one person to another directing the payment of a certain sum of money therein

A Bill of Exchange that has been accepted is called an acceptance, and resembles a promissory note, the acceptor occupying the same position as the maker of a note.

The signature of the acceptor must be written on the Bill of Exchange itself.

A cheque is an order on a bank for the payment of a certain sum.

LEASES.

Leases for periods of more than three years should be in writing, under seal and signed by

The transfer of all leases should be in writing. A tenancy from year to year can be terminated only by a six months' notice ending with the current year.

A monthly tenancy can be ended by a month's notice.

In the absence of an agreement to the con-trary, taxes fall upon the landlord, and if the tenant is compelled to pay them he may deduct

6. Consult your lawyer at the beginning of a trouble, not after you have made bad worse.

7. No man, however skilful, should attempt to draw his own will.

8. Every person having property should always have a will duly executed and deposited tenant is compelled to pay them he may deduct the amount from the next payment of rent.

If a tenant is compelled to pay them he may deduct the amount from the next payment of rent.

If a tenant makes an absolute covenant to repair he would be bound to repair even if the premises were burned down, and would have to pay rent for time that premises were un-

Such a covenant should except "reasonable wear and tear, and accidents by fire and tempest," and there should be an express pro-vision that the rent should be charged for time that premises are untenantable by reason of injury from fire or tempest.

Distress for rent can only be made by day-light, not sooner than the day after the rent matures, and only for the amount actually due (which the warrant to the baliff should specify), together with the charges of the distress. Goods cannot be sold until after the expiration of five days after seizure.

Distress can only be made on the premises in respect of which the rent is due, except in case of goods being fraudulently removed to avoid distress, in which case they may be followed within thirty days

An inventory of the goods seized should be made out and a copy left with the tenant, or, if absent, for him at the house with some grown person, or if there is no house on the premises, or if no person is there with whom it can be left, it must be stuck up in some prominent place on the premises.

Before sale goods must be appraised by two sworn appraisers and duly advertised.

A clause in a lease providing that in the event of the insolvency of the tenant a certain amount of future rent shall become due, is void as against the tenant's creditors, in case of insolvency.

In case of the insolvency of the tenant, the landlord is entitled to six months' arrears of rent as a privileged claim, and to rank as an ordinary creditor for any further claims that may be unpaid.

It is believed that a landlord has no right to distrain after an assignee has taken possession. though the decisions of the courts on this point are conflicting.

WILLS.

All wills must be in writing, signed by the testator in the presence of two witnesses, who must also sign the will in the presence of the testator.

A person to whom a demise or bequest is made may be a witness to the will, but by so doing forfeits all benefit under it.

A person under the age of twenty-one cannot make a valid will.

A married woman having separate estate may make a will, disposing of it in whatever manner she chooses

A lunatic is incompetent to make a will. There is no difference between the formalities necessary in a will passing real property and personal property.

Wills are of no effect until after the death of

the testator.

Executors have no right to use funds of their testator's estate for their own purposes, even temporarily, and they should keep a strict account of all their dealings.

A will is revoked by the making of a subsequent one, by marriage, or by the testator tearing up or destroying the will with the intention to revoke.

A codicil is a testamentary disposition, not revoking a former will, but altering or varying some of its provisions.

A codicil requires to be executed with the same formalities as a will.

COPYRIGHT.

Copyright may be obtained by any person domiciled in Canada or inany part of the Brit- | For every single or first folio, certified copy. \$0 50

ish possessions, or any citizen of any country which has an international copyright treaty with the United Kingdom, who is the author of any book, map, chart or musical composition, or of any original painting, drawing, statue, sculpture, or photograph, or who invents, designs, etches, engraves or causes to be made from his own design, any print or engraving, and the legal representatives of such person.

The term of copyright is twenty eight years, with a right to a further term of fourteen years.

The condition for obtaining copyright is that the work shall be printed and published, or re-printed and republished, in Canada, whether for the first time or contemporaneously with, or subsequently to, publication elsewhere. In no case can the right exist after it has ceased elsewhere.

Copyright shall not be granted in immoral licentious, irreligious, or treasonable, or seditious literary, scientific or artistic work.
Works entitled to British copyright are also entitled to Canadian copyright. Works copyright.

righted in England may be imported into Can-ada. Foreign reprints of English works may be disposed of if imported into Canada before the obtaining of Canadian copyright. The proof of establishing the regularity of the proceeding is upon the person selling.

The above are the provisions of Chapter 62 of the Revised Statutes of Canada. In 1889 another Act was passed (52 Vic., c. 29), which alters the above requirements.

This Act has not yet become law, because it has not yet been proclaimed by the Governor-General. Its main alterations are:-

1. That any citizen of any country which has an international copyright treaty with England in which Canada is included, may obtain copy-

2. The conditions of obtaining copyright are that the work shall, before publication or production elsewhere, or simultaneously with the first publication or production thereof elsewhere, be registered in the office of the Minister of Agriculture by the author or his representatives, and, further, that the work be printed and published or produced in Canada, or reprinted and republished or reproduced in Canada, withiu one month after publication or production elsewhere

3. If no copyright is taken out any person domiciled in Canada may obtain a license to print and publish the work. The person obtaining the license must pay ten per cent. on the retail price of each copy of the work, and must give security for such payment to the satisfaction of the Minister

There is no prohibition in this latter Act of importation from the United Kingdom of copies of works of which copyright exists there.

FEES.

The following fees shall be paid to the Minister before any application for any of the purposes herein mentioned is received, that is to say :-

On registering a copyright	31	00
On registering an interim copyright	0	50
On registering a temporary copyright	0	50

Every person who, after the interim registration of the title of any book, according to this Act, and within the term herein limited, or after the copyright is secured, and during the term or terms of its duration, prints, publishes, or reprints or republishes, or imports or causes to be so printed, published or imported, any copy or any translation of such book without the consent of the person lawfully entitled to the copyright thereof, first had and obtained by assignment, or who, knowing the same to be so printed or imported, publishes, sells or exposes for sale, or causes to be published, sold or exposed for sale, any copy of such book without such consent shall forfeit every copy of such book to the person then lawfully entitled to the copyright thereof; and shall forfeit and pay for every such copy which is found in his posession, either being printed or reprinted, published, imported or exposed for sale, contrary to the provisions of this Act, such sum not exceeding one dollar and not less than ten cents, as the court determines—which forfeiture shall be enforceable or recoverable in any court of competent jurisdiction; and moiety of such sum shall belong to Her Majesty for the public uses of Canada, and the other moiety shall belong to the lawful owner of such copyright.

CURRENCY AND LEGAL TENDER,

The denominations are dollars, cents and mills. Gold, silver, copper and bronze coins are authorized. Gold coins of the standard of fineness of the coins of the United Kingdom, and bearing the same proportion in weight to the British sovereign which \$5.00 bear to \$4.86.23, pass current for five dollars. Silver coins are legal tender to the extent of \$10.00 Copper or bronze coins to the extent of twenty-five cents.

Dominion notes may be issued to the amount of \$20,000,000. The Receiver-General must always hold in gold or in gold and Canada securities guaranteed by the Government of the United Kingdom, an amount equal to twenty-five per cent. of these notes. Fifteen per cent. must always be held in gold. For the other seventy-five per cent. Dominion debentures must be held. These notes are a legal tender throughout Canada, except at the office where they are payable.

INTEREST.

Throughout Canada, when no rate is stipulated for, the rate is six per cent. Parties may stipulate for a higher rate. Compound interest is not allowed unless there is a special agreement to that effect.

In Nova Scotia a creditor whose debt does not carry interest, who comes in and establishes the same before the Judge in Chambers, is entitled to interest from the date of the judgment or order out of any assets which may remain after satisfying the costs of the cause or matter, the debts established and the interest of such debts as by law carry interest. Where there is an order for an account of legacies, interest runs at five per cent. per annum from the end of one year after the testator's death, unless otherwise ordered, or unless otherwise directed by the will. Where the security is real estate or chattels real, the parties may stipulate in writing for seven per cent. interest, and when

the security consists only of personal security or personal responsibility, ten per cent. may be stipulated for by parties in like manner, as above.

Accounts bear interest from date of notice that interest will be claimed. When debts are due by virtue of some written instrument payable at a certaiu time, interest runs from that time.

JOINT STOCK COMPANIES.

The Dominion has provided legislation for the incorporation and management of joint stock companies formed for Dominion purposes. Railway companies, banks and insurance companies are not within this Act. Any number of persons not less than five, may be incorporated as a company. Letters patent are granted through the Secretary of State, declaring the name and objects of the company. The affairs of the company are managed by directors, not more than fifteen or less than three. Shareholders are liable to the amount of their shares. Calis may be paid and shares forfeited for non-payment of calls. No share is transferable until all previous calls are paid.

If a company is incorporated by a special Act and not by letters patent, then another Act applies, called the Companies Clauses Act. This is a general Act applying to all Dominion companies. Under it there may not be more than nine or less than three directors. The Act contains clauses covering the duties of directors, the capital stock and calls thereon, company books, the rights and liabilities of shareholders, the liability of directors,

the liability of directors, etc.

Provision is also made for the winding up of insolvent companies of all kinds. A company is deemed unable to pay its debts when a creditor for an amount over \$200 has not been paid his debt for ninety days after demand in case of a bank, or sixty days after demand in other cases.

NATURALIZATION.

Every person who is of the full age of twentyone years, and not an idiot, lunatic or married
woman. can become a British subject as a
Canadian. The person must have resided in
Canada not less than three years, or been in the
service of the Government of Canada or any of
the Provinces of Canada for not less than two
years. He must take the oath of allegiance,
and also an oath that he intends to remain in
Canada. If a British subject desires to throw
off his allegiance he may do so. He is also entitled to resume it. These proceedings are
called "expatriation" and "repatriation."
Aliens may hold property in all respects as British subjects, but they are not qualified for the
municipal or parliamentary franchise: nor can
an alien be an owner of a British ship.

PATENTS.

Any person who has invented any new and useful art, machine, manufacture or composition of matter, which was not known or used by any other person before his invention thereof, and which has not been in public use or on sale with the consent or allowance of the inventor thereof for more than one year previously to his application for patent therefor in Canada, may, on a petition to that effect presented to the Commissioner, and on compliance with the other requirements of this Act, obtain a patent granting to such person an exclusive property in such invention.

No patent can issue for an invention which

has an illicit object in view, or for any mere scientific principle or abstract theorem.

An inventor may obtain a patent in Canada for an invention for which a patent has been taken out in a foreign country, if he applies within one year from the date of the issue of the

first foreign patent.

If within three months after the issue of a foreign patent, the inventor gives notice to the Commissioner of his intention to apply for a patent in Canada, then any person who has commenced to manufacture in Canada within the year mentioned in the last paragraph, can, without the consent of the inventor, continue to manufacture after the Canada patent is ob-

If a foreign patent exists the Canada patent expires at the earliest day on which any foreign patent for the same invention expires.

Patents may be granted for improvements but the right to use the improvement does not give the right to use the original invention, nor does the right to use the original invention give the right to use the improvement.

The patent may be granted to any person to whom the inventor entitled under this Act to obtain a patent, has assigned or bequeathed the right or obtaining the same, or in default of such assignment or bequest, to the legal re-presentatives of the deceased inventor.

Any intending applicant for a patent who has not yet perfected his invention, and is in fear of being despoiled of his idea, may file in the Patent Office a description of his invention so far, with or without plans, at his own will; and the Commissioner, on payment of the fee in this Act prescribed, shall cause the said document, which shall be called a caveat, to be pre-served in secrecy, with the exception of de-livering copies of the same whenever required by the said applicant or by any judicial tri-bunal, but the secrecy of the document shall cease when the applicant obtains a patent for his invention.

The applicant shall, in his petition for a patent, insert the title or name of the invention, and shall, with the petition, send in a specification in duplicate of the invention.

The term limited for the duration of every patent of invention issued by the Patent Office patent of invention issued by the Patent Office shall be eighteen years; but at the time of the application therefore it shall be at the option of the applicant to pay the full fee required for the term of eighteen years, or the partial fee required for the term of six years, or the partial fee required for the term of twelve years.

The following fees shall be payable before an application for any of the purposes herein mentioned shall be required by the Commissioner:

tioned shall be required by the Commissioner:-

Full fee for 18 years	860	00
Partial fee for 12 years		
Partial fee for 6 years	20	00
Fee for further term of 12 years		
Fee for further term of 6 years

On asking to register an assignment or any other document affecting or relating to a patent..... On asking to attach a disclaimer to a

TRADE MARKS.

Every proprietor of a trade mark who applies for its registration shall state in his application whether said trade mark is intended to be used as a general trade mark or as a specific trade mark.

Before any action is taken in relation to an application for registering a trade mark, the following fee shall be paid to the Minister of Agriculture, that is to say:

On every application to register a general trade mark, including certificate... On every application to register a specific trade mark, including certi-.....\$30 00

On every application for the renewal of a specific trade mark, including

certificate... For copy of each certificate of registration, separate from the return of the duplicate.

1 00 For the recording of an assignment..

For office copies of documents not above mentioned, for every hundred 2 00 words or a fraction thereof..... 0 50

For each copy of any drawing or emblematic rade mark, the reasonable expense of prepar-

ing the same.

If the Minister of Agriculture refuses to register the trade mark for which application is made, the fee shall be returned to the applicant or his agent, less the sum of five dollars which shall be retained as compensation for office expenses.

A general trade mark once registered and destined to be the sign in trade of the proprietor thereof, shall endure without limitation.

Every person, other than the person who has registered the trade mark, who marks any goods or any article of any description whatsoever with any trade mark registered under the provisions of this Act, or with any part of such trade mark, whether by applying such trade mark or any part thereof to the article itself, or to any package or thing containing such article, or by using any package or thing so marked which has been used by the proprietor of such trade mark, or who knowingly sells or offers for sale any article marked with such trade mark or any part thereof, with intent to deceive and to induce any person to believe that such article was manufactured, produced, compounded, packed or sold by the proprietor of such trade mark, is guilty of misdemeanor, and liable, for each offence, to a fine not exceeding one hundred dollars and not less than twenty dollars which fine shall be paid to the proprietor of such trade mark, together with the costs incurred in enforcing and recovering the same.

DIVISION COURTS.

The inspection of Division Courts is a branch of the department of the Hon. Mr. Harcourt, personal actions, where the sum claimed does not exceed \$60. All claims of debt account, the department number 671, viz.:—321 clerks and 350 bailiffs, (See list of clerks and bailiffs), where the amount or balance claimed

THE SUBMARINE CABLES OF THE WORLD.

The following table sets forth the entire | Anglo-American Telegraph Co.: system of submarine cables of the world, in-cluding those along the shores and in the cluding those along the shores and in the bays, gulfs and estuaries of riwers, but excepting those in lakes and the interior watercourses of continents. The list includes all cables operated by private companies, and, in addition thereto, under the name of each nation is given the list of cables operated by the Government of that nation:-

RELIGIOUS STATISTICS.

From the census returns taken in 1891 it is learned there are in Canada 10,480 churches. Divided among the denominations the increase since 1881 is as follows: Baptists 324, Roman Catholics 301, Church of England 415, Methodist 322, Presbyterians 411. All others denominations 55.

Of the total number of churches the Methodists have nearly 32 per cent., the Presbyterians and Roman Catholics 17 per cent. each, the Church of England 16 per cent., the Baptists 12 per cent.

leaving 6 per cent. for all other

During the decade 1881-91, the Church of England appears to have been most active in providing places of worship for the people, the Presbyterians coming next, the Baptists third, the Methodist fourth, and the Roman Catholics fifth.

The Roman Catholic church in Canada has one Cardinal, seven Archbishops, twenty-three Bishops, and about 1,500 clergy. The Church of England has two metropolitans and seventeen

bisbops, and about 1,000 clergy.

The Presbyterians became united as a Presbyterian Church in Canada in 1875. The Methodists were first united in one ecclesiastical organization in 1883.

The number of clergymen of all churches according to census of 1891 was 7,164, an increase of

735 since 1881 The number of Pagans or Indians still adhering to the belief of their fathers in 1893 was 16,427

President, D. M. Robertson; Treasurer, M. Gibbs; Secretary, W. Campbell.

UNIVERSITIES AND EDUCATIONAL INSTITUTIONS.

The following table shows the educational Status of the people of Canada by provinces. The census of 1891 shows the population to have been 4,833,239, and eliminating the 55,401 Indians, respecting whom merely the general population statistics were procured, there remain 4,777,838 persons whose educational acquirements were recorded. These are divided into three groups:—1st. Those 20 years old and upwards. 2nd. Those between 10 and 10 years of age. 3rd. Those under 10 years

Of the first group there were able to read..... Of the second group there were able to read.....

Of the third group there were able to read ...

Making the total population able to read ...

This shows that 70.83 per cent, of the people of all ages can read.

From the above table it will be seen that Manitoba is the banner province in the educational status of its adult popu-

religious exe children can against the Manitoba the Roman Catho the Manitoba the session o to be non-sec to be at the of the distric schools are Pi and education ing, the Roma Protestant sc books. religious exercises are permitted, but no children can be compelled to be present against the wishes of their parents. In Manitoba the schools were Protestant and Roman Catholic, but a Bill was passed by the Manitoba House of Assembly, during the session of 1890, providing for the about lition of separate schools—all public schools to be non-sectarian, and religious exercises to be at the option of the school trustees of the district, subject to the regulations of the advisory board. In Quebec the schools are Protestant and Roman Catholic, and education is based on religious teaching, the Roman Catholic catechism, and, in Protestant schools, the Bible, being textbooks. In Ontario the schools are undenominational, but Protestants and Roman Catholics are allowed separate schools within certain limitations. Every public and high school is opened and closed with prayer and the reading of the Scriptures, but without comment or explanation. The trustees, however, and clergy of all denominations, are empowered to make special arrangements for religious instruction. By this means the fullest facilities for religious instruction are given, without the assumption by the Government of any responsibility in regard to the instruction imparted.

Educational matters in the province of Quebec are under the control of the Superintendent of Public Instruction, assisted by a council of 35 members, divided into committees, for the management of Roman Catholic and Protestant schools, respectively. The schools are maintained partly by local taxation and partly by Government grants, and are individually controlled by local boards, or by the local clergy. Religion is assumed to be the basis of education, and the worlder Boards of education. cation, and the various Roman Catholic religious bodies and institutions are largely interested in such matters.

Of 4,634 Roman Cathotic Schools in the Province, 4,316 are under control; and of Protestant schools, 976 are under control and 21 are independent. These figures include 2 Roman Catholic and 2 Protestant Universities. The total number of educational institutions in the province is 5,640.

THE Her Majesty Quee child of Edward, Du George III., by his

daughter of the Duk Majesty was born in Palace, on the 24th M Alexandrina Victori

THE UNITED KINGDOM.

THE QUEEN.

Her Majesty Queen Victoria was the only child of Edward, Duke of Kent, fourth son of George III., by his marriage with Victoria,

Her Majesty, Queen Victoria.

sec.; y-D. yaus. .. in N. o. s. d. l. l

daughter of the Duke of Saxe Cobourg. Her place in Westminster Abbey on June 28th, 1838, Majesty was born in London, at Kensington and on the 10th February, 1840, at the Chapel Palace, on the 24th May, 1819, and christened Royal, St. James' Palace, London, Her Majesty Alexandrina Victoria. At that time George was married to her Cousin Francis Albert [321]

Augustus Charles Emmanuel, of Saxe Cobourg Augustus Charles Emmanuel, of Saxe Cobourg and Gotha, Duke of Saxony, three months her junior, afterwards on the 25th June, 1857, endowed with the title of Prince Consort, who died on 14th December, 1861, at Windsor Castle. On the 1st January, 1877, at Delhi Her Majesty was pruclaimed Empress of India, and her full title is now Her Majesty Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland. Queen, Defender of the Faith, Empress of India (known in India as Kaisar-i-Hind).

THE ROYAL LINEAGE.

THE ROYAL LINEAGE.

Tracing Her Majesty's claim to the Throne back to her descent from the Tudors, it is seen that it arises from the marriage of Margaret Tudor, eldest daughter of Henry VII., with James IV., King of Scotland: their son became James V., of Scotland, who left an only child, Mary, Queen of Scots. Her marriage with Lord Darnley resulted in the birth of James VI., of Scotland and first of England. Upon the death of Queen Anne, daughter of James II., without issue, the succession to the Crown devolved upon the House of Hanover.

George I., Elector of Hanover, was the eldest son of Sophia, daughter of James I., by hermarriage with Ernest Augustus, Duke of Brunswick, Lunenburg, Elector of Hanover.

George I., was succeeded by his eldest son as George II.

George II., was succeeded by his grandson, the eldest son of the Prince of Wales (who died 31st March, 1751, in his father's lifetime).

George III., reigned from 25th October, 1760, to 29th January 1820, the longest reign in the annals of England. He was succeeded by his eldest son, who as Regent had previously ex-

eldest son, who as Regent had previously exercised the royal authority.

George IV., was the first English King since Edward III., who at his succession discontinued the title of the King of France. His only child was the much beloved Princess Charlotte, who married Prince Leopold Frederick, afterwards King of the Belgians. Her death in child-birth caused the succession to devolve upon her Uncle William Henry, Puke of Clarence, third son of George III., and next surviving brother of George IV.

William IV., succeeded on 26th June, 1830. His only two children died in infancy, and at his death the Crown went to our present Queen, who was the only daughter of Edward Duke of Kent, fourth son of George III., younger

who was the only daughter of Edward Duke of Kent, fourth son of George III., younger brother of George IV., and William IV. The Duke of Kent for a time commanded the English troops in Nova Scotia. He married her Serene Highness Victoria Maud Louisa, daughter of H. S. H. Francis Duke of Saxe Cobourg Saaifield, widow of H. S. H. Emich Charles, reigning Prince of Leiningen, their only child being Alexandrina Victoria, the Queen. Queen.

Louis IV., Grand Duke of Hesse, Five children: Victoria Alberta, born April 5, 1863; Elizabeth, born Nov. 1, 1864; Irene, born July 11, 1866; Ernest Louis, born Nov. 25, 1868; Alex. Victoria, born June 6, 1872. Princess Alice died

Dec. 14, 1878.

IV. Prince Alfred, Duke of Edinburgh, born Aug. 6, 1844; married Jan. 21, 1874, to Grand Duchess Marie of Russia, only daughter of Emperor Alexander II. Five children; Alfred, born Oct. 15, 1874; Marie, born Oct. 29, 1875; Victoria, born Nov. 25, 1876; Alexandra, born Sept. 1, 1878; Beatrice, born, April 20, 1894 lato; Victoria, born Nov. 25, 1876; Alexandra, born Sept. 1, 1878; Beatrice, born April 30, 1881. In August, 1893, upon the death of his uncle Duke Ernest, brother to the Prince Consort, the Duke of Edinburgh succeeded to the title and estates of the Hereditary Dukedom of Cobourg and Gotha, and is now known as H. R. H. Duke Alfred of Cobourg-Gotha.

V. Princess Helena, born May 25, 1846; married July 5, 1866, to Prince Christian of Schleswig Holstein. Four children: Christian, born April 14, 1867; Albert John, born Feb. 29, 1869; Victoria, born May 3, 1870; Louise, born Aug.

Victoria, born May 3, 1870; Louise, born Aug. 12, 1872.

VI. Princess Louise, born March 18, 1848; married March 21, 1871, to John, Marquis of Lorne, eldest son of the Duke of Argyll.

VII. Prince Arthur, Duke of Connaught, born May 1, 1850; married March 13, 1879; to Princess Louise of Prussia, born July 25, 1860.

Three children; Margaret Victoria, born Jan. 15, 1882; Arthur, born Jan. 13, 1883; Victoria, born March 17, 1886. born March 17, 1886.

born March 17, 1886.

VIII. Prince Leopold, Duke of Albany, born April 7, 1853; married April 27, 1882, to Princess Helen, daughter of the Prince of Waldeck. Two children; Alice Mary, born Feb. 25, 1883; Leopold Charles Edward George, Duke of Albany, posthumous, born July 19, 1884. Prince Leopold died March 28, 1894.

IX. Princess Beatrice, born April 14, 1857; married July 29, 1885, to Prince Henry, third son of Prince Alexander of Battenberg, uncle of Ludwig IV., Grand Duke of Hesse. Four children; Alexander Albert, born Nov. 23, 1886; Victoria Eugene, born Oct. 24, 1887; Leopold Arthur Louis, born May 21, 1889; Maurice Victor Donald, born Oct. 3, 1891.

THE PRINCE OF WALES.

The official title of the heir to the throne is The Most High, Most Puissant, and the Most Illustrious Prince Albert Edward, Prince of Wales, Duke of Saxony, Prince of Saxe-Cobourg and Gotha, Duke of Cornwall and Rothsay, Earl of Chester, Carrick and Dublin, Baron of Renfrew, and Lord of the Isles, Great Steward of Scotland, etc., etc.

He is the Queen's second child, the first being the present Empress Dowager of Germany, Princess Royal of Great Britain. He was born at Buckingham Palace, on the 9th November

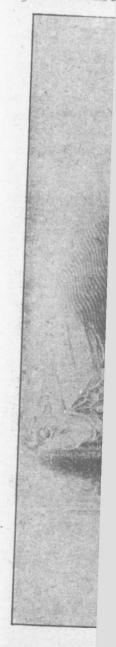

Queen.

THE CHILDREN OF HER MAJESTY
QUEEN VICTORIA.

I. Princess Victoria (Empress Dowager of Germany), born Nov. 21, 1840; married Jan. 25, 1853, to Prince Frederick Wilhelm (Frederick III., Emperor of Germany), eldest son of Wilhelm I., German Emperor and King of Prussia; widow June 15th, 1888.

II. Albert Edward, Prince of Wales, born Nov. 9th, 1841. See Prince of Wales, III. Princess Alice Maud Mary, born April 25th, 1843; married July 1, 1862, to H. R. H. 1841.

was appointed to consider the question as to what claim they would have upon the liberality of Parliament. This committe was informed that the Queen waived any claim, except as regards the family of the Heir apparent, and it was finally arranged, in order to avoid in this case repeated appeals to Parliament, that a quarterly payment of £9,000 to be paid to the Prince of Wales, out of which, subject to the assent of the Queen and the Prime Minister and Chancellor of the Exchequer for the time being, he was empowered to make such assignbeing, he was empowered to make such assignments and in such manner to his children as he in his discretion should see fit. The Prince of Wales came into about £600,000 on attaining his majority, the result of accumulated revennis majority, the result of accumulated revenues from the Duchy of Cornwall during his minority. His country estate at Sandringham, Norfolk, was purchased out of this sum. His London residence is Marlborough House.

London residence is Marlborough House.
The Prince of Wales has only one surviving son, George Frederick Ernest Albert, now Duke of York, born at Marlborough House, London, 3rd June, 1865; baptized at Windsor Castle, on 7th July, 1865; and married at the Chapel Royal, St. James', London, on July 6th, 1894, to his second cousin, the Princess Victoria Mary of Teck.

At present the next heir to the Throne, after the Duke of York is his eldest sister the

the Duke of York, is his eldest sister, the Duchess of Fife.

The last general elections in June 1895, placed the following cabinet and members in office: Prime Minister, Marquis of Salisbury. First Lord of the Treasury, A.J. Balfour. Lord Chancellor, Lord Halsbury. Lord Pres. of the Council Duke of Devonshire. LordPrivySeal, Viscount Cross. Chancellor of the Exchequer, Sir M. Hicks-Beach, Sec. of State for Foreign Affairs, Marquis of Salisbury. Sec. of State for Home Dept., Sir M. White-Ridley. Sec. of State for Colonial Affairs, J. Chamberlain. THE BRITISH PARLIAMENT.

The supreme legislative power of the British Empire is, by its constitution, vested in Parliament. This body is divided into two houses, the Lords and the Commons.

THE HOUSE OF PEERS.

The House of Peers is composed of the whole Peerage of England, and of certain represent-atives of the peerages of Scotland and Ireland,

but many members of these latter have also English titles, which give them seats in the House. The Duke of Buccleuch sits as Earl of Doncaster, and the Duke of Leinster as Vis-Peers elected for life (1 Scottish and 2 Irish Re

116 Earls, 25 Viscounts, 24 Bishops, 299 Barons, 16 Scottish representative Peers elected for each Parliament, and 28 Irish Representative

POPULATION STATISTICS.

In 1800 the first census enumeration was authorized to be made, through the agency of parish and township overseers, by personal enquiry, with no schedules for householders to fill up, and no specified date for either the making or completion of the returns. These arrangements left wide loopholes for error, incapacity and fraud, but were continued with

The population of the United Kingdom of Great Britain and Ireland in April, 1891, viz.: 37,732,922 persons, was 2,848,074, or 8.2 per cent. above the number recorded at the Census of 1881. This rate of growth was lower than that 1881. This rate of growth was lower than that of the two next preceding decennia, in which it had been successively 8.8 and 10.8 per cent. Each of the three great sub-divisions of the Kingdom contributed to bring about this slackening in the growth of the population. For both in England and Wales and in Scotland the ratio of increase in 1881-91 was smaller than it had been either in 1891-71 or 1871-81 while in it had been either in 1861-71 or 1871-81, while in treland the decrease was very much larger than in either of those two decennia, having, in the earlier of the two, been 6.7 per cent., and in the second 4.4 per cent.; whereas in 1881-91 it was no less than 9.1 per cent. of the total population in 1891, 18,608,337 were males and 19,496,638 fe-

The Counties or Shires most thickly populated are Middlesex, 11490.0 per square mile;

Surrey, 2284.1; Lancashire, 2080.9; and Durham, Surrey, 2234.1; Lancashire, 2080.9; and Durham, 1005.5 per square mile; the difference in the purely agricultural counties, where population is, in many cases, diminishing, being very marked. In Radnor there were only 46.4 per square mile; Westmoreland, 8.4, and in Rutland, 135 9 square mile. The total for England and Wales being 497.4; Scotland, 135.1; and Ireland, 144.4 per square mile.

MEASURES AND WEIGHTS OF GREAT BRITAIN.

The measures of length and the weights are nearly, practically, the same as those in use in the United States. The English ton is 2,240 lbs, avoirdupois, the same as the long ton or shipping ton of the United States. The English hundredweight is 112 lbs. avoirdupois, the same as the hundredweight of the United States. The metre has been legalized at 39.37079 inches, but the length of 39.370432 inches, as adopted by France, Germany, Belgium and Russia, is frequently

The Imperial gallon, the basis of the system of capacity, involves an error of about 1 part in 1,836: 10 bs. of water -227.123 cubic inches.

The Bank of England was the first joint stock ank established in England, and having exclute privileges, it continued so until 1834. At paid up and reserves, of the various joint stock bank established in England, and having exclusive privileges, it continued so until 1834. At this date the London and Westminster Bank was founded, and was so successful that it was

banks amount to more than £150,000,000.

THE FINANCIAL ARRANGEMENTS BETWEEN GREAT BRITAIN AND IRELAND.

From 1782, when legislative independence was accorded to Ireland, until 1801 the contribution of Ireland to the support of the Empire chiefly took the form of maintaining troops. The Irish military establishment was fixed at 15,000 men, of whom 12,000 where to be retained in Ireland, except in case of invasion or re-

in Ireland, except in case of invasion or rebellion in England, while the remainder were available for military purposes.

The Act of Union, however, provided: "That for the space of 20 years after the Union shall take place, the contribution of Great Britain and Ireland respectively toward the expenditure of the United Kingdom in each year shall be defrayed in the proportion of 15 parts for Great Britain and two parts for Ireland ... unless previous to any such period, the Parliament of the United Kingdom shall have declared, as hereinafter provided,

period, the Parliament of the United Kingdom shall have declared, as hereinafter provided, that the expenditure of the United Kingdom shall be defrayed indiscriminately by equal taxes imposed on the like articles in both countries. That if at any future day the separate debt of each country shall .

portion with the respective contribution of each country respectively; or if the amount by which the value of the larger of such debts shall vary from such proportion shall not exceed one-hundreth part of the said value;

that from the period of such declaration it shall no longer be necessary to regulate the contribution of the two countries towards the future expenditure of the United Kingdom according to any specific proportion or according to any of the rules hereinbefore prescribed.

That, in brief, was the financial bargain of the Union. Since that day the population of these kingdoms has vastly changed, and the population of Ireland, which was fully one-third of the United Kingdom at the Union, in 1891 was about one-eighth.

It was contended at the time of the Union that the proportions of 7½ to 1 were very unjust to Ireland; and certainly the result was, that during the succeeding sixteen years, Ireland was reduced to practical bankruptcy.

The United States of America consists of 44 states, 6 territories and the District of Columbia. The gross area of the United States (land and water surface) is 3,025,000 square miles, exclusive of Alaska, which has an area of 531,000 square miles.

According to the census of 1895 the total population was 69,177,707. The population was divided into urban 18,284,385 and rural 50,887,322.

The accelerated tendency of the population of the U.S. towards the cities may be gathered from the fact that the number of cities having a population of more than 8,000, increased from 6 in 1790, to 286 in 1880, whence it leaped to 448 in 1890.

According to sex the population is divided into males 35,567,880 and females 33,609,827.

Out of the whole population of the United States, the persons of African descent numbered

The total number of occupied dwellings in the United States in 1890 was 11,483,313, average num-

the total number of occupied dwellings in the United States in 1885 vas 11,885,91,414,043,693, of persons to a dwelling 5.45.

The United States have a foreign trade which aggregates for the 10 years 1885-95 \$15,446,043,693, of which \$7,357,396,610 were imports and \$8,048,647,085 were exports, showing an average foreign trade annually of \$1,540,604,370, an annual average import of \$735,739,660 and annual average export of \$808,864,708. The imports of 1894 was \$654,994,622 or 80,745,000 less than the average of the 10 years, while the exports were \$897,140,572 or \$83,275,864 more than the ten years average.

Of the total exports 72.28 per cent, were agricultural products, 2.35 per cent, were mineral products 3.22 per cent, of forests, 0.49 per cent, of fisheries, 21.14 per cent, of manufactures, and 0.52 per cent, miscellaneous.

WHITE AND NEGRO POPULATION OF THE SOUTH.

Growth of the population by decades in the Territory now covered by the sixteen Southern States of Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, South Carolina, Tennesee, Texas, Virginia, and West Virginia, and the District of Columbia.

Years.	White.	Colored.	Years.	White.	Colored.	Years.	White	Colored.
1790 1800 1810 1820	1,271,488 1,702,980 2,208,785 2,831,560	918,336	1830 1840 1850	3,660,758 4,632,530 6,222,418 8,097,462	2,187,545 2,701,901 3,442,238 4,215,614	1870 1880 1890	9,466,353 12,578,253 15,549,358	4,538,883 6,099,253 6,898,806

The table shows that the whites increased faster than the blacks in the last decade. In 1890 there were in the sixteen Southern States and the District of Columbia 6,898,806 colored inhabitants, and in 1880, 6,099,253. The colored element increased during the decade at the rate of 13.1 per cent. The white population of these States in 1890 numbered 15,549,358, and in 1880, 12,578,253. It increased during the decade at the rate of 23.6 per cent., or nearly twice as rapidly as the colored element.

THE PRESIDENTIAL SUCCESSION.

The Presidential succession is fixed by chapter 4 of the Acts of the forty-ninth Congress, first session. In case of the removal, death, resignation or inability of both the President and Vice-President, then the Secretary of State shall act as President until the disability of the President or Vice-President is removed or a President is elected. If there is no Secretary of State, then the Secretary of the Treasury will act; and the remainder of the order of succession is: The Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy and Secretary of the Interior. The acting President must, upon taking office, convene Congress, if not at the time in session, in extraordinary session, giving twenty days' notice. This Act applies only to such cabinet officers as shall have been appointed by the advice and consent of the Senate and are eligible under the Constitution to the Presidency.

The following are the dates of future retirements of generals now on the active list to the close of 1899: Paymaster-General Smith, March 26, 1895; Major-General McCook, April 22, 1895; Chief of Engineers Casey, May 10, 1895; Major-General Schofield, September 29, 1895; Quartermaster-General R. M. Batchelder, July 27, 1896; Judge Advocate-General David G. Swaim, December 22, 1896; Commissioner-General Michael R. Morgan, January 18, 1897; Brigadier-Thomas H. Ruger, April 2, 1897; Brigadier-General Frank Wheaton, May 8, 1897; Adjutant. General George D. Ruggles, September 11, 1897; Chief of Ordnance D. W. Flagler, June 24, 1899

ORGANIZATION OF THE ARMY.

The army of the United States, in 1894, consisted of the following forces, in officers and men:

Ten cavalry regiments Five artillery regiments Twenty-five infantry regiments Engineer Battalion, recruiting parties, ordnance depart-		Enlisted Men, 6,050 3,975 12,925	Aggregate. 6,482 4,255 13,802
ment, hospital service, Indian scouts, West Point, signal, and general service	556	2,862	3,418
Total	2,145	25,812	27,957

The United States are divided into eight military departments, as follows:

DEPARTMENT OF THE EAST.—New England States, New York, New Jersey, Pennsylvania,
Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Louisiana, Mississippi, Alabama, Kentucky, Tennessee, Ohio, and the District of Columbia.

DEPARTMENT OF THE MISSOURI.—Michigan, Wisconsin, Indiana, Illinois, Missouri, Kansas,
Arkansas, Indiana and Oklahoma Territories.

DEPARTMENT OF CALIFORNIA.—California and Nevada.

DEPARTMENT OF DAKOTA—Minnesoto, South Dakota (excepting so much as lies south of

DEPARTMENT OF CALIFORNIA.—California and Nevada.

DEPARTMENT OF DAKOTA.—Minnesota, South Dakota (excepting so much as lies south of the 44th parallel), North Dakota, Montana, and the post of Fort Yellowstone, Wyo.

DEPARTMENT OF TEXAS.—State of Texas.

DEPARTMENT OF THE PLATTE.—Iowa, Nebraska, and Wyoming (excepting the post of Fort Yellowstone, Wyo.) so much of Idaho as lies east of a line formed by the extension of the western boundary of Utah to the north-eastern boundary of Idaho, and so much of South Dakota as lies south of the 44th parallel.

DEPARTMENT OF THE COLORADO.-Colorado, Utah, Arizona, and New Mexico.

DEPARTMENT OF THE COLUMBIA.—Oregon, Washington, Idaho, and Alaska, excepting so Euch of Idaho as is embraced in the Department of the Platte.

UNITED STATES FOREST AREA.

Total forest area in the United States is estimated at round 495,000,000 acres, or 26 per cent. of total area, of which about 40 per cent. is in farms, while the area of land in farms unimproved or waste not in forest may be estimated at about 75,000,000 acres. Alaska and Indian reservations are not included.

The present annual requirements for consumption of forest products in the United States are, approximately, over 24,000,000,000 cubic feet, made up of the following items: Lumber market and manufactures, 5,000,000,000 cubic feet; railroad construction, 600,000,000 cubic feet; charcoal, 250,000,000 cubic feet; fences, 5,000,000 cubic feet; fuel, 18,000,000,000 cubic feet; mining timber, 150,000,000 cubic feet.

⁽b) By "spot" value is mee to value at the point of production. (c) "Long" tons are tons of 2,240 avoirdupois pounds; shore tons are tons of 2,000 avoirdupois pounds. (d) Iron ore 1892,

16,296,666; value at mines, \$22,204,896. Iron ore 1893, 11,587,629; value at mines, \$19,265,973. (e) \$1 2,929 per troy ounce. (f) \$20 6.718 per troy ounce. (g) Including copper made from imported pyrites, except in 1881, for which no returns are available for matte. (h) The product from domestic ores only. (i) The lead from foreign ores, amounting to 64,273 tons is omitted. (j) Of 76½ avoirdupois pounds net. (l) Including nickel in copper-nickel alloy, and in exported ore and matte. (m) Including brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania. (n) Of 200 pounds. (p) Of 42 gallons. (q) Estimated from Census returns. (r) Of 300 pounds for natural cement, and 400 pounds for artificial Portland. (s) Of 280 pounds net. The reduced price in 1893 is due to omitting cost of packages. (b) Including metallic paints, other, umber, Venetian red, sienna, ground soapstone, ground slate and mineral black. (x) Included in asphaltum. (y) Including building-sand, glass-sand, limestone used as flux in lead smelting, limestone in glass-making, iron ore used as flux in lead smelting, tin ore, iridosmine, nitrate of soda, carbonate of soda, sulphate of soda, bauxite, and alum clays used by paper manufacturers.

CHINESE TREATY OF 1894

The new Emigration Convention between the United States and China was signed by Yang Yu, the Chinese Minister to the United States, and W. Q. Gresham, Secretary of State, on March 17, 1894. It was ratified by the Senate on August 13, 1894, the vote standing 47 to 20 in favor of ratification. Almost all of the Northwestern Senators opposed it, but the Eastern Senators (with the exception of Messrs. Lodge and Hoar, of Massachusetts) voted for it. It was provided that the treaty should remain in force ten years after ratifications should be exchanged, with the privilege of renewal for another ten years. The Chinese government delayed approval until November, and the final action of the United States took place on Decemaction of the United States took place on December 6, so the time of its going into effect did not begin until that date.

Article I, stipulates that except under conditions subsequently specified the entrance of Chinese laborers into the United States shall be absolutely prohibited.

Article II. excepts from the provisions of the preceding article the return to the United States of every registered Chinese laborer who

states in journeying to or from other countries is continued.

By Article IV it is agreed that the Chinese of the laboring or any other class, either permanently or temporarily in the United States, shall have all the protection to their persons and property that is given to citizens of most favored nations, except the right to become naturalized citizens.

Article V.recognizes the right of China to enact and enforce similar laws and regulations, providing for the registration of all American skilled and unskilled laborers residing in China, and binds this government to report to the Government of China the full name, age, occupation and place of residence of all citizens of the United States, including missionaries, within and without the treaty ports of China. has a lawful wife, child or parent in the United | and without the treaty ports of China.

COAL PRODUCTION OF THE UNITED STATES.

Compiled from the report of the Eleventh Census, covering product of 1889. Weight express-

ed in short tons of 2,000 pounds.			
States.	Tons.	States.	Tons.
Alabama			363,301

PATENT OFFICE PROCEDURE.

Patents are issued in the name of the United States, and under the seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, not kown or used by others in this country, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof, and not in public use or sale for more than two years prior to his application, unless the same is proved to have been abandoned; and by any person who, by his own industry, genius, efforts and expense has invented and produced any new and original design for a

manufacture, bust, statue, alto-relievo, or bas-relief; any new and original design for the printing of woolen, silk, cotton, or other fabrics; any new and original impression, ornament, pattern, print, or picture to be printed, painted, cast or otherwise placed on or worked into any article of manufacture; or any new, useful, and original shape or configuration of any article of manufacture, the same not having been known nor used by others before his invention or production thereof, nor patented nor described in any printed publication, upon payment of the fees required by the law and other due proceedings had.

Every patent contains a grant to the paten-

^{*} Pounds, a Tons.

tee, his heirs or assigns for the term of seventeen years, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, if it had not been known or used in any foreign country before his invention or discovery thereof, having been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their seperate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in

such case they may become joint patentees. The receipt of letters patent from a foreign government will not prevent the inventor from obtaining a patent in the United States, unless the invention shall have been introduced into public use in the United States more than two years prior to the application. But every patent granted for an invention which has been previously patented by the same inventor in a foreign country will be so limited as to expire at the same time with the one having the shortest unexpired term, but in no case will it be in force more than seventeen years.

Applications.

Applications for a patent must be made in writing to the Commissioner of Patents. The writing to the Commissioner of Patents. The applicant must also file in the Patent Office a written description of the same, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact forms as to enable any per-son skilled in the art or science to which it ap-pertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and dis-tinctively claim the part, improvement, or combination which he claims as his invention or discovery. The specifications and claim must be signed by the inventor and attested by two witnesses.

two witnesses.

When the nature of the case admits of drawings, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact, and attested by two witnesses, to be filed in the Patent Office. In all cases which admittof representation by model, the applicant, if required by the Commissioner, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery.

tion or discovery.

The applicant shall make oath that he verily believes himself to be the original and first in-ventor or discoverer of the art, machine, manurentor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent, that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen. Such oath may be made before any person within the United States authorized by law to administer oaths, or, when the appli-

cant resides in a foreign country, before any minister, charge d'affaires, consul, or com-mercial agent holding commission under the Government of the United States.

On the filling of such application and the payment of the fees required by law, if, on such examination, it appears that the claimant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the Commissioner will issue a patent therefor.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United

Reissues.

A reissue is granted to the original patentee. his legal representatives, or the assignee of the entire interest when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a wight to claim or and the control of the patentee. more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisenffrom inadvertence, accident, or mistake, and without any fraudu-lent or deceptive intention. In the cases of patents issued and assigned prior to July 8, 1870. the applications for reissue may be made by the assignee; but in the cases of patents issued or assigned since that date, the applications must be made and the specifications sworn to by the inventors, if they be living.

Caveats.

A caveat, under the patent law, is a notice given to the office of the caveator's claim as investor, in order to prevent the grant of a pat-

investor, in order to prevent the grant of a patent to another for the same alleged invention upon an application filed during the life of caveat without notice to the caveator.

Any citizen of the United States who has made a newinvention or discovery, and desires further time to mature the same, may, on payment of a fee of ten dollars, file in the Patent Office a caveat setting forth the object and the distinguishing characteristics of the invention, and praying protection of his right until he and praying protection of his right until he shall have matured his invention. Such caveat shall be filed in the confidential archives of the office and preserved in secrecy, and shall be operative for the term of one year from the filing thereof.

The caveat must comprise a specification, oath, and, when the nature of the case admits of it, a drawing, and, like the application, must be limited to a single invention or improve-

Fees must be paid in advance, and are as fol-Fees must be paid in advance, and are as follows: On filing each original application for a patent, \$15. On issuing each original patent, \$20. In design cases: For three years and six months, \$10; for seven years, \$15; for fourteen years, \$30. On filing each caveat, \$10. On every application for reissue of a patent, \$30. On filing each disclaimer, \$10. For certified copies of printed patents, eighty-five cents; for uncertified copies of printed patents, ten cents. For recording every assignment ten cents. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, \$1; of over three hundred and under one thousand words, \$2; of over one thousand words, \$3. For copies of drawings, the reasonable cost of mak-

THE SINGLE TAX.

The following has been adopted as the official statement of the single tax principle by the ad-

vocates thereof, Henry George, Chairman: We assert as our fundamental principle the self-evident truth enunciated in the Declaration of American Independence, that all men are created equal and are endowed by their Creator with certain inalienable rights.

We hold that all men are equally entitled to the use and enjoyment of what God has created and what is gained by the general growth and improvement of the community of which they are a part. Therefore, no one should be permitted to hold natural opportunities without a fair return to all for any special privilege thus fair return to all for any special privilege thus accorded to him, and that that value which the growth and improvement of the community attaches to land should be taken for the use of the community; that each is entitled to all that his labor producess; therefore, no tax should be levied on the products of labor.

To carry out these principles, we are in favor of raising all public revenues for National, State, county, and municipal purposes by a single tax upon land values, irrespective of improvements, and all the obligations of all forms of direct and indirect taxation.

Since in all our States we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local governments, State government, and the general government, as the revenue from direct tax is now divided between the local and State governments. ernments, or by a direct assessment being made by the general government upon the States and paid by them from revenues collected in this manner

The single tax would: 1st. Take the weight of taxation off the agricultural districts where land has little or no value irrespective of improvements, and put it

on towns and cities where bare land rises to a value of millions of dollars per acre

2nd. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government and greatly reduce its cost.

3rd. Do away with the fraud, corruption and gross inequality inseparable from our present processes and a few transfer of the control of the cost o

gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor. 4th. Give us with all the world as perfect freedom of trade as now exists between the States of our Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies and corruptions which are the outgrowth of the tariff.

5th. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner, and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the il-limitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make over-production impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure and participation in the advantages of an advancing civilization.

With respect to monopolies other than monopoly of land, we hold that when free competition becomes impossible, as in telegraphs, railroads, water and gas supplies, etc., such business becomes a proper social function which should be controlled by and for the whole people concerned through their proper government, local, State or national, as may be.

SUICIDES.

In European cities the number of suicides In European cities the number of suicides per 100,000 inhabitants is as follows:—Paris. 42; Lyons, 29; St. Petersburg, 7; Moscow, 11; Berlin, 36; Vienna, 28; London, 23; Rome, 8; Milan, 6; Madrid, 3; Genoa, 31; Brussels, 15; Amsterdam, 14; Lisbon, 2; Christiania, 25; Stockholm, 27; Constantinople, 12; Geneva, 11; Dresden, 51. Madrid and Lisbon show the lowest, Dresden the highest figure. The average annual suicide rate in coun-

show the lowest, Dresden the highest figure. The average annual suicide rate in countries of the world per 100,000 persons living is given by Barker as follows:—Saxony, 31.1; Denmark, 25.8; Schleswig-Holstein, 24.0; Austria, 21.2; Switzerland, 20.2; France, 15.7; German Empire, 14.3; Hanover, 14.0; Queensland, 13.5; Prussia, 13.3; Victoria, 11.5; New South Wales, 9.3; Bavaria, 9.1; New Zealand, 9.0; South Australia, 8.9; Sweden, 8.1; Norway, 7.5; Belglum, 6.9; England and Wales, 6.9; Tasmania, 5.3; Hungary, 5.2; Scotland, 4.0; Italy, 3.7; Netherlands, 3.6; United States, 3.5; Russia, 2.9; Ireland, 1.7; Spain, 1.4.

Spain, 1.4.

The number of suicides in the United States, six years, 1882-87, was 8,226.

THE RIVER CALLED THE "FATHER OF WATERS."

The Mississippi is known as the "Father The Mississippi is known as the "Father of Waters." Its name is a corrupted form of the original Indian name Miche Sepe, meaning "Great River," or "Great Father of Waters." Well does it deserve the title, with its length of 3,716 miles, and draining, as it does, a territory considerably larger than all Central Europe. It discharges annually into the Gulf of Mexico 21 3.10 billions of cubic feet of water, with a mean dis-charge of 57,000 cubic feet per second, and it carries with it in suspension some 22 milterries with it in suspension some 22 million cubic yards of sediment annually, while its navigable branches number 1,500. The epithet "Father of Waters" is not uncommonly applied to other great rivers, among which we may mention the Irrawaddy, one of the great streams of Asia. The Thames, too, is sometimes spoken of as "Old Father Thames." Father Thames.

"Say, Father Thames, for thou hast seen Full many a sprightly race, Disporting on thy margent green, The paths of pleasure trace."

THINGS WORTH KNOWING.

Items for Daily Remembrance.

LEGAL BREVITIES. - A note dated on Sunday is void. A note obtained by fraud, or from one intoxicated, is void. If a note be lost or stolen, it does not release the maker, he must pay it. An endorser of a note is exempt from liability, if not served with notice of its dishonour within 24 hours of its non-payment. A note by a minor is void. Notes bear interest only when so stated. Principals are responsible for their agents. Each individual in partnership is responsible for the whole amount of the debts of the firm. Ignorance of the law excuses no one. It is a fraud to conceal a fraud. It is illegal to compound a felony. The law compels no one to do impossibilities. An agreement without a consideration is void. Signatures in lead pencil are good in law. A receipt for money is not legally conclusive. The acts of one partner bind all the others. Contracts made on Sunday cannot be enforced. A contract with a minor is void. A contract made with a lunatic is void. Written contracts concerning land must be under seal.

ON PROFANE SWEARING.—Let every man do his best to discountenance this abominable habit and shun it as an accursed sin in every possible way. No respectable person will allow himself to be guilty of it. Business men who make a practice of it will find themselves avoided by the best class of customers, for I know that some persons can suffer no mental punishment equal to that inflicted by being compelled to listen to profane language. Besides every man known as a profane swearer, will not be credited by those whose good opinion is worth having, even when he may be speaking the truth.

ACT WELL YOUR PART, DON'T BE SELFISH.—Remember that it is by imparting happiness to others and making ourselves useful, always keep doing something useful for the common good, doing it well, and acting sincerely. Endeavour to keep your heart in the attitude of cherishing good will to all, thinking and speaking evil of no one, and always with a kind word for every body. Selfishness is its own curse; it is a starving vice. The man who does no good gets none. He is like the heath in the desert, neither yielding fruit nor seeing when good cometh, a stunted, dwarfish, miserable shrub. Let all your influence be exerted for the purpose of doing all you can for the common good and individual welfare of every one.

MARRIED LIFE, ITS JOYS AND SORROWS.—A good wife is the greatest earthly blessing. A wife never makes a greater mistake

than when she endeavours to coerce her husband with other weapons than those of love and affection. Those weapons are a sure pull if he has any thing human left in him. Forbear mutual upbraidings. - In writing letters, during temporary separation, let nothing contrary to love and sincere affection be expressed; such letters from a wife have a most powerful emotional effect, sometimes little understood by those who write them. It is the mother who moulds the character and destiny of the child as to the exteriors, therefore, let calmness, peace, affection, and firmness rule her conduct towards her children. Children are great imitators, whether they have scolding or peaceful mothers, they are generally sure to learn from the examples set before them, and thus the consequent joy or sorrow is transferred to other families, therefore let mothers take heed to their conduct. It is not possible to exercise judgment and prudence too much before entering on the married life. Be sure that the affections on both sides are so perfectly intertwined around each other, that the two as it were, form one mind; this requires time, and a thorough mutual knowledge on both sides. Bend your whole powers to avoid deprecatory remarks, jibing and anger in every form, and specially avoid everlastingly dishing up any unsuccessful past action that was done from a good motive and with the best intentions at the time. Let nothing foreign to the spirit of love and mutual affection intervene to cause distance between husband and wife; to this end let self-denial rule over each, and reciprocal unselfishness. Avoid habitual fault-finding, scolding, &c., as you would perdition itself; many men tremble as they cross their threshold into the presence of scolding wives. Let husband and wife cultivate habits of sobriety, and specially avoid drunkenness in every form. What a dreadful spectacle it is to see a husband transformed into a demon, tottering homeward to a broken hearted wife, whose noble self-sacrificing devotion to him seems to partake more of the nature of heaven than of earth. Never part, even for a journey, without kind and endearing words, and as a kiss symbolizes union from interior affection, do not dispense with it on such occasions, repeating it when you return. In one word, let love rule supreme.

CHILDREN AND HOME CONVERSATION Children hunger perpetu-

CHILDREN AND HOME CONVERSATION—Children hunger perpetually for new ideas. They will learn with pleasure from the lips of parents what they deem drudgery to learn from books, and even if they have the misfortune to be deprived of many educational advantages they will grow up intelligent if they enjoy in childhood the privilege of listening to the conversation of intelligent people. Let them have many opportunities of learning in this way. Be kind to them, and don't think it beneath you to answer their little questions, for they proceed from an implanted faculty which every true man and woman should take a great delight in gratifying.

HOME AFTER BUSINESS HOURS.—Happy is the man who can find that solace and that poetry at home. Warm greetings from loving hearts, fond glances from bright eyes, and welcome shouts of merry hearted children, the many thousand little arrangements for comfort and enjoyment, that silently tell of thoughtful and expectant love,

these are the ministrations that reconcile us to the prose of life. Think of this ye wives and daughters of business men! Think of the toils and anxieties, the mortification and wear that fathers undergo to secure for you comfortable homes, and compensate them for their toils by making them happy by their own fireside.

Well Worthy of Impation.—A worthy Quaker thus wrote:—
"I expect to pass through this world but once. If, therefore, there be any kindness I can do to any fellow being, let me do it now, let me not defer nor neglect it, for I will not pass this way again."

The A B C Interest Tables.*

These tables are the most compact and simple ever introduced. The Interest can be found on any sum from \$1.00 to \$10,000.00, and on any larger amounts by adding the necessary ciphers.

THE APPLICATION.

In the Interest column take the figures under the same letters as are

MARRIED LIFE, ITS JOYS AND SORROWS.—A good wife is the greatest earthly blessing. A wife never makes a greater mistake

HOME AFTER BUSINESS HOURS.—Happy is the man who can find that solace and that poetry at home. these are the ministrations that reconcile us to the prose of life. Think of this ye wives and daughters of business men! Think of the toils and anxieties, the mortification and wear that fathers undergo to secure for you comfortable homes, and compensate them for their toils by making them happy by their own fireside.

WELL WORTHY OF IMPATION.—A worthy Quaker thus wrote:—
"I expect to pass through this world but once. If, therefore, there
be any kindness I can do to any fellow being, let me do it now, let
me not defer nor neglect it, for I will not pass this way again."

Were all to act thus how many would be made happy?

Table Conversation.—Instead of swallowing your food in sullen silence, or brooding over your business, or severely talking about others, let the conversation at the table be genial, kind, social and cheering. Don't bring any disagreeable subject to the table in your conversation, any more than you would in your dishes. Avoid scandalizing people, and never cherish a jubilant feeling over the infirmities or misfortunes of others. The more good company you have at your table the better. Hence the intelligence, refinement and appropriate behaviour of a family given to hospitality. Never feel that intelligent visitors can be anything but a blessing to you and yours.

KEEP THE HOUSE CLEAN AND WELL VENTILATED.—A neat, clean, fresh aired, sweet, cheerful, well arranged house, exerts a moral influence over its inmates, and makes the members of a family peaceable and considerate of each other's feelings. On the contrary, a filthy squalid, noxious dwelling, contributes to make its inhabitants selfish, sensual, and regardless of the feelings of others. Never sleep in a small close bedroom, either during summer or winter without free ventilation from door or windows, unless otherwise supplied with abundance of fresh air. It will be seen that a person's house usually corresponds with his character.

SAFE BUSINESS RULES.—Business men, in business hours, attend only to business matters. Social calls are best adapted to the social circle. Make your business known in few words, without loss of time. Let your dealings with a stranger be most carefully considered, and tried friendship duly appreciated. A mean act will soon recoil, and a man of honour will be esteemed. Leave "Tricks of Trade" to those whose education was never completed. Treat all with respect, confide in few, wrong no man. Be never afraid to say No, and always prompt to acknowledge and rectify a wrong. Leave nothing for tomorrow that should be done to-day. Because a friend is polite, do not think his time is valueless. Have a place for everything, and everything in its place. To preserve long friendship, keep a short credit, the way to get credit is to be punctual; the way to preserve it is not to use it much. Settle often; have short accounts. Trust no man's appearances, they are often deceptive, and assumed for the purpose of obtaining credit. Rogues generally dress well. The rich are generally plain men. Be well satisfied before you give a credit, that those to whom you give it are safe men to be trusted.

The A B C Interest Tables.*

These tables are the most compact and simple ever introduced. The Interest can be found on any sum from \$1.00 to \$10,000.00, and on any larger amounts by adding the necessary ciphers.

THE APPLICATION.

In the Interest column take the figures under the same letters as are over the Principal. The figures in the interest column are cents.

EXAMPLE.

Find the interest on \$1,976.00 for 58 days at 7 per cent.

1	RINCIP	AL.		1			IN	TEREST.	
\$1,000.00 900.00 70.00 6.00	under	AAA	B	Under	A	B B	0	D	10.01
\$1,976.00			-						\$21.97

The only objection, so far as we know, that can be raised against our method is that in ordinary tables the Principal would have been obtained by taking only three amounts—viz: \$1,000.00, \$900.00 and \$76.00; but this, we think, is far more than counterbalanced by the time lost in tracing the amounts over a whole page.

ADVANTAGES OF THE A B C SYSTEM.

I. Any sum can be found within the compass of 9 lines, instead of 118 lines in "Sansum's" and other tables.

II. Each page of our tables comprises 24 days, and the whole table covers 18 pages. In other tables a page contains only 5 days and the whole table occupies 73 pages. Ours being, therefore, four times more readily referred to.

III. In our tables the number of days, the Principal and the Interest are immediately under the eye at the same time. In "Sansum's" and other tables it is necessary constantly to refer to the number of days at the head of the page and follow the column to the place opposite the Principal required. This means loss of time and the risk of inaccuracy.

On the next page the table is set up in the usual way. A comparison of the two methods will, we believe, confirm our claims as to the merits of the new.

Simple Interest Rules.

FOUR PER CENT.—Multiply the principal by the number of days to run; separate the right hand figure from the product, and divide by 9.

FIVE PER CENT.-Multiply by number of days, and divide by 72.

SIX PER CENT.-Multiply by number of days; separate right hand figure, and divide by 6.

SEVEN AND THREE-TENTHS PER CENT.-Multiply by number of days, and double the amount so obtained. On \$100 the interest is just 2 cents per day.

EIGHT PER CENT.—Multiply by number of days and divide by 45. NINE PER CENT.-Multiply by number of days; separate right hand figure, and divide by 4,

TEN PER CENT.-Multiply by number of days, and divide by 86.

TWELVE PER CENT,-Multiply by number of days; separate right hand figure, and divide by 3.

To find Interest at 6 per cent, deduct one-seventh.

INTEREST at 8 per cent., 1 to 24 days.

Results of Saving Small Amounts of Money.

The following shows how easy it is to accumulate a fortune, provided proper steps are taken. The table shows what would be the result at the end of fifty years by saving a certain amount each day and putting it at interest at the rate of six per cent.:

or ary bor ocuses			-
Daily Savings.			The Result.
One cent		Sixty cents	00 500
Ten cents	9504	Seventy cents	00,028
Twenty cents	19,006	Eighty cents	
Thirty cents	28,512	Ninety cents	
Forty cents	38,015	One dollar	. 95,041
Fifty cents	47,520	Five dollars	. 475.208
E mal commo sassassassassassassassassassassassassas			

Nerrly every person wastes enough in twenty or thirty years, which, if saved and carefully invested, swould make a family quite independent; but the principle of small savings has been lost sight of in the general desire to become wealthy.

The Marks and Rules in Punctuation.

1. The Comma (,) denotes a slight pause, and divides a sentence into its component parts.

2. The Semicolon (:) indicates a longer pause, and also divides compound sentences.

3. The Colon (:) is placed between the chief divisions of a sentence, when these are but slightly connected.

The Period (.) denotes the close of a sentence.

5. The Dash (-) indicates a sudden change of subject.

The Interrogation point (?) is used when a question is asked. The Exclamation point (!) denotes wonder or astonishment.

The Parenthesis () includes something not essential to the sense.

9. Quotation marks ("") indicate a verbatum quotation. 10. The Hyphen (-) connects the syllables, or parts of a word.

11. The Caret (A) denotes that some letter, word, or phrase has been omitted.

12. Brackets ([]) are chiefly used to denote corrections.
13. The Ellipsis (***), (——) denotes the omission of letters or words. 14. The index (pcints to something of special significance.

RULES FOR PUNCTUATION.

1. A period is placed after every declarative and imperative sentence.

2. All abbreviations are followed by a period.

3. A period is placed after numbers in the Roman notation. 4. A colon is placed between the chief divisions of a sentence, when they are but slightly connected, and they are themselves di-

vided by some other mark. 5. A colon is used after a sentence which announces a distinct quo-

tation.

6. A colon is placed between clauses, when the connection is so slight that any one of them might be a distinct sentence.

7. A succession of clauses depending on one principal expression,

should be separated by a semicolon.

8. A semicolon is placed after an expression which introduces particulars. 9. When a clause especially explains the meaning of some other ex-

ression, it is separated from that expression by a semicolon. 10. A semicolon is used to divide a sentence into sections, when

the various parts are not sufficiently independent to require a colon. 11. A comma is placed between the particulars mentioned in a suc-

cession of words all in the same construction. 12. A comma is placed between each pair of words, when each nair is in the same construction.

13 A comma is placed before and one after every parenthetical exresslull.

14. A comma is used before a quotation closely connected with the preceding words.

15. Expressions repeated must be separated by a comma.

16. A phrase or clause which explains, in any degree, the meaning of any other phrase or clause is separated from it by a comma. 17. All modifying expressions unless closely connected with the

rest of the sentence, are separated by a comma.

18. A comma must be used in sentences which would otherwise be misunderstood.

19. A comma is placed where a word is understood, unless the con-

nection is close.

20. An interrogation-point is placed after every sentence, phrase, clause, or word, which denotes a direct question.

21. An interrogation-point, enclosed in a parenthesis, is often used

to denote doubt.

22. An exclamation point is placed after every exclamatory sentence, clause, phrase, or word.

23. Where special emphasis is required, several exclamation-points

may be used.

24. An exclamation-point, enclosed in parenthesis, is used to denote peculiar surprise.

25. Most interjections take an exclamation point after them. 26. A sudden turn in a sentence is shown by a dash.

27. An omission of the middle numbers in a regular series is denoted by a dash.

28. The omission of a word, or part of a word, is denoted by a

dash. 29. A dash is usually placed before the answer to a question, when they both belong to the same line.

30. A dash is often used instead of the parenthesis marks.

31. A dash is commonly used before an expression repeated for special emphasis.

32. A dash follows the sentence which introduces a quotation

when the quotation commences a new paragraph.

33. A dash is often used to avoi ' too many paragraphs. 34. Every quoted passage is enclosed in quotation-marks.

35. Quotations consisting of more than one paragraph have the first quotation-mark at the beginning of each paragraph, but the second is used only at the end of the last paragraph.

36. When a quoted passage requires special attention, the first quo-

tation-mark may be used at the commencement of each line.

37. When one quotation includes another, the latter has but half the first quotation-mark before it, and half the second mark after it. 38. The parenthesis encloses matter not actually connected with

the sentence.

39. Brackets are chiefly used to inclose corrections.

40. The hyphen is used to separate the syllables of a word.

41. The apostrophe denotes a contraction.

42. The caret is used to show the omission of letters or words.

43. The asterisk, dagger, and similar marks are used to refer to notes at the foot or side of the page.

MARKS OF ACCENT.

Accent is stress of voice laid on a certain syllable. When a word is uttered, the syllable that receives the stress is said to be accented. These marks are used by writers to denote the proper pronunciation

The Acute é is represented by a mark over a letter, or syllable, to show that it must be pronounced with the rising inflection; as, Euro-

The Grave (a) must be pronounced with a falling inflection: as, 66 Will you walk, or ride?"

The Circumflex (a) represents the union of the acute and grave accents in the same syllable : as, Montreal.

The Macron (a) placed above a letter represents a full long vowel qound: as, home.

A Breve (a) is placed over a vowel to denote its short sound; as, St.

he Diæresis (a) is placed over the latter of two vowels to show that they are to be pronounced in separate syllables; as, cooperate.

The Cedilla (c) or cerilla, placed under the letter c, shows that it has the sound of s: it is used chiefly in words derived from the French language; thus, garcon, in which the c is to be pronounced like s. The Tilde (n) placed over the letter n in Spanish words to give it

the sound of ny; as, senior, minon.

Other Marks.

The Index (invites special attention.

The stars (***) or N. B., are used for a similar purpose.

The Brace (connects several words with one common term.

The Paragraph (¶) begins a new subject. The Section (§) is used to sub-divide chapters.

Leaders (....) are used in indexes, leading the eye to the end of the line, for the completion of the sense.

Simple Rules for Spelling.

Words ending in e drop that letter before the termination able, as in move, movable; unless ending in ce or ge, when it is retained, as in change, changeable, etc.

Words of one syllable ending in a consonant, with a single vowel before it, double that consonant in derivatives; as, ship, shipping, etc. But if ending in a consonant with a double vowel before it, they do not double the consonant in derivatives; as, troop, trooper, etc.

Words of more than one syllable, ending in a consonant preceded by a single vowel, and accented on the last syllable, double that con-

sonant in derivatives; commit, committed; but except chagrin, All words of one syllable ending in l, with a single vowel before it,

have double ll at the close; as, mill, sell.

All words of one syllable ending in l, with a double vowel before

it, have only one l at the close; as mail, sail. The words foretell, distill, instill, and fulfill, retain the double l of their primitives. Derivatives of dull, skill, will and full also retain

Gummed envelopes are now in almost universal use; nevertheless, a neat little seal of red wax for a gentleman, and of gold or other fancy colour for a lady, are elegant and appropriate, and give an appearance of refinement to a note.

Letters of introduction or recommendation should never be sealed. In letters of business or ceremony, do not write on both sides of the

Letters of compliment should be written in the third person. A void all arasures and biots, even though you should have to rethe first quotation-mark before it, and half the second mark after it.

38. The parenthesis encloses matter not actually connected with
the sentence.

39. Brackets are chiefly used to inclose corrections.

40. The hyphen is used to separate the syllables of a word.

41. The apostrophe denotes a contraction.

42. The caret is used to show the omission of letters or words.

Gummed envelopes are now in almost universal use; nevertheless, a neat little seal of red wax for a gentleman, and of gold or other fancy colour for a lady, are elegant and appropriate, and give an appearance of refinement to a note.

Letters of introduction or recommendation should never be sealed. In letters of business or ceremony, do not write on both sides of the

Words of more than one syllable, ending in a consonant preceded

before it, double that consonant in derivatives; as, ship, shipping, etc.

But if ending in a consonant with a double vowel before it, they do

by a single vowel, and accented on the last syllable, double that con-

not double the consonant in derivatives; as, troop, trooper, etc.

leaf.

Letters of compliment should be written in the third person.

Avoid all erasures and biots, even though you should have to rewrite.

Never write letters of friendship on a half sheet, and always wite

with ink.

Monograms should always be in black or white—never in colours In communicating bad news, take care not to do so abrubtly.

In sending letters, don't enlarge much on your own misfortunes. Make your letters cheerful and never ill-tempered.

All letters should be civil in tone, otherwise they injure the writer more than the receiver.

No gentleman will send an anonymous letter. Only cowards and knaves do this.

Your paper may be either ruled or plain, but the latter as the more elegant.

Letters in regard to one's own affairs should always contain a stamp for return postage. A still better plan is to enclose a stamped and addressed envelope.

Every letter should be dated carefully and distinctly, and should always bear the address of the writer, and the name signed in full. Should the writer be a married lady, she should invariably, except in the most familiar missives, prefix "Mrs." to her name.

Persons in mourning usually write letters on mourning stationery, but this should not be used in writing letters of congratulation.

Your letter-paper and envelopes should correspond in colour and quality. White should be preferred, and especially when addressing a lady. Ladies use no other.

Good black ink is always to be preferred. Coloured inks are in bad taste. Take care to affix the proper stamp. Don't depend on others to do this.

Never send money or other articles of value in an unregistered

When dropping a letter or paper into a street letter box, see that it don't stick fast.

Never enclose any writing in printed matter.

When it is desired to have letters returned in case of non-delivery, the name and address of sender should be printed in upper left-hand corner, with request to that effect.

sonant in derivatives; commit, committed; but except chagrin, chagrined.

All words of one syllable ending in *l*, with a single vowel before it, have double *ll* at the close; as, mill, sell.

All words of one syllable ending in l, with a double vowel before

it, have only one l at the close; as mail, sail.

The words foretell, distill, instill, and fulfill, retain the double l of their primitives. Derivatives of dull, skill, will and full also retain the ll when the accent falls on these words; as, dullness, skillful, willful, fullness.

Words of more than one syllable ending in l have only one l at the close; as, delightful, faithful; unless the accent falls on the last syl-

lable; as in befall, etc.

Words ending in l, double that letter in the termination ly.

Participles ending in ing, from verbs ending in e, lose the final e; as, have, having; make, making, etc.; but verbs ending in ee retain both; as, see, seeing. The word dye, to colour, however, must retain the e before ing.

All adverbs ending in ly, and nouns ending in *ment*, retain the e final of the primitives; as, brave, bravely; refine, refinement; except words ending with dye; as, acknowledge, acknowledgement.

Nouns ending in y preceded by a vowel, form their plural by adding s; as, money, moneys; but if y is preceded by a consonant, it is changed to ies in the plural: as, bounty, bounties.

Compound words that end in y, change the y into i; as beauty,

beautiful.

The Use of Capitals.

1. Every entire sentence should begin with a capital.

2. Proper names and adjectives derived from these, should begin with a capital.

3. All applications of the Deity should begin with a capital.

- Official and honorary titles begin with a capital.
 Every line of poetry should begin with a capital.
- 6. Titles of books, and the heads of their chapters and divisions, are printed in capitals.
- The pronoun, I, and the exclamation, O, are always capitals.
 The days of the week, and the months of the year, begin with capitals.

9. Every quotation should begin with a capital letter.

10. Names of religious denominations begin with capitals.
11. In preparing accounts, each item should begin with a capital.
12. Any word of very special importance may begin with a capital.

Hints for Letter-Writing.

Letters should always be written in a neat and distinct chirography. The sentences should be constructed with such thoughtful care, that the mean intended will be readily understood.

Wages Table.

Antidotes for Poisons.

When the poison is unknown, give a prompt emetic of warm water and mustard, ipecac. or salt water, and then give white of eggs freely, lard, olive or other bland oil, except in case of phosphorus poisoning. If the source of poisoning is known, the following treatment will be indicated:

For Arsenic or White Precipitate.—Give a prompt emetic, followed by a mixture of chalk and castor oil, until sesquioxide of iron can be

obtained from the druggist.

For Lead Poisoning.—Corrosive Sublimate, Saltpetre, White Vitriol, Blue Vitriol, Vermilion.— prompt emetic, followed by white of egg, and fresh milk given freely.

For Lye Poisoning. - Give freely of oil or warm and and white of

egg followed by warm water and mustard, or ipecac.

Nitrate of Silver, or Lunar Caustic.—Use maderately of strong solution of common salt and then give freely of tresh milk.

For Strychnia and its salts.—An emetic, followed by tannic acid

and chlorine.

For Carbolic Acid -Olive or castor oil, given freely.

For Ammonia, Caustic Soda, Caustic Potash.—Give oil freely; and afterward give water with vinegar, or lemon juice in it.

For Opium, Laudanum, Morphine, Aconite, Belladonna, Digitalis.—A prompt emetic, followed by strong coffee; cold applica-

tions to shock the system. Lower the head to cause flow of blood to the brain; keep in motion.

A good emetic is one teaspoonful of salt mixed with one teaspoonful of mustard in a pint of warm water.

For eruptions caused by poison oak or ivy, the following prescription is most valuable. Have it filled at the draggist's:

A Woman's Chances of Marriage at Various Ages.

This curiously constructed exhibit, by Dr. Granville, is drawn up from the registered cases of 876 married women in France. Owing to the difference in our climate, it will be safe to say that French women are as mature at 18 as American women at 20. Of the 876 tabulated, there were married—

· Facts for Builders.

1000 shingles, laid 4 inches to the weather, will cover 100 square feet of sur face, and 5 lbs, of shingle nails will fasten them on.

One-fifth more siding and flooring is needed than the number of square feet

of surface to be covered, because of the lap in the siding and matching.

1000 laths will cover 70 yards of surface, and 11 lbs. of lath nails will nail
them on. 8 bushels of good lime, 16 bushels of sand, and 1 hashel of hair, will make enough good mortar to plaster 100 square yards.

A cord of stone, three bushels of lime, and a cubic yard of sand, will lay 100 cubic feet of wall.

5 courses of brick will lay 1 foot in height on a chimney, 16 bricks in a course will make a fine 4 ins. wide and 12 ins. long, and 8 bricks in a course will make a flue 8 ins. wide and 16 ins. long.

Cement 1 bush, and sand 2 bush. will cover 31 sq. yds. 1 inch thick, 41 sq. yds. ½ inch thick, and 62 sq. yds. ½ inch thick, 1 bush. cement and 1 of sand will cover 22 sq. yds. 1 inch thick, 8 sq. yds. 2 inch thick, and 42 sq. yds. ½ inch

DIVISIONS OF TIME.

The interval between two consecutive transits of a fixed star over any meridian or the interval during which the earth makes one absolute revolution on its axis is called a Sidereal Day, and is invariable, while the interval between two consecutive transits of the Sun over any meridian is called an Apparent Solar Day, and its length varies from day to day by reason of the variable motion of the earth in its orbit, and the inclination of this orbit to the equator, on which time is

Mean Solar Day is the average or mean of all the apparent solar days in a year. Mean Solar Time is that shown by a well-regulated clock or watch, while Apparent Solar Time is that shown by a well-constructed sun-dial; the difference between the two at any time is the Equation of Time, and may amount to 16 minutes and 21 seconds. The Astronomical Day begins at noon and the Civil Day at the preceding midnight. The Sidereal and Mean Solar Days are both invariable, but one day of the latter is equal to 1 day, 3 minutes and 56.555 seconds of the former.

The interval during which the earth makes one absolute revolution round the Sun is called a Sidereal Year, and consists of 365 days, 6 hours, 9 minutes, 9.6 seconds, which is invariable.

The Tropical Year is the interval between two consecutive returns of the Sun to the Vernal Equings. If this were a fixed point, the Sidereal and Tropical Years would be identical; but in consequence of the disturbing influence of the moon and planets on the spheroidal figure of the earth, the Equinox has a slow, retrogade mean motion of 50.26", annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes, 23.6 seconds; the Tropical Year, therefore consists of 365 days, 5 hours, 48 minutes and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of 595 seconds per century, but this variation will not always continue.

the Tropical Year, therefore consists of 365 days, 5 hours, 48 minutes and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of 595 seconds per century, but this variation will not always continue.

Julius Cæsar, in B.C. 45, was the first to reform the calendar by ordering that every year whose date number is exactly divisible by 4 contain 366 days, and all other years 365 days. The intercalary day was introduced by counting the sixth day before the Kalends of March twice; hence the name bissextile, from bis, twice, and sex, six. He also changed the beginning of the year from 1st of March to the 1st of January, and also changed the name of the fifth month (Quintilis) to July, after himself. The average length of the Julian Year is therefore 365; days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A.D. 1582, when the date of the beginning of the seasons occurred 10 days later than in B.C. 45, when this mode of reckoning time was introduced.

The Gregorian Year was introduced by Pope Gregory XIII, with the view of keeping the Equinox to the same day of the month. It consists of 365 days, but every year exactly divisible by 4, and the centurial years, which are exactly divisible by 400, contain 366 days; and if in addition to this arbitrary arrangement the centurial years exactly divisible by 4,000 contain 365 days, the error in the Gregorian system will amount to only one day in about 20 centuries. If, however, 31 leap years were intercalated in 128 years, instead of 32 as at present, the calendar would be practically exact and the error would not amount to more than a day in 100,000 years. The length of the mean Gregorian year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A.D

ASTRONOMICAL NOTES.

Demonstration has been made of the fact that the rings of Saturn revolve at different rates. Meteoric stones sometimes fall from the sky. Those in which iron predominates are called Siderites, those formed principally of iron and stone are 'ermed Siderolites, and Aerolites are those which are chiefly of stone.

There are 50 remarkably red stars brighter than the 9th magnitude.

As many as 53 variable stars may be seen by the unaided eye.

Orbits have been computed for over 74 binary stars—that is, those having two or more components revolving about each other.

Reflected light from earth causes the visibility of the dark part of our satellite noticed just before and shortly after "new moon."

It has been proved that meteors travel in orbits like comets; also that comets are practically

more or less dense swarms of meteors.

Perigee is that point in the Moon's orbit which is nearest to the earth; apogee is the one farthest from the earth.

Perihelion means that point in the path of a planet or of a comet which comes closest to the sun; aphelion is the point of the orbet farthest from the sun.

No celestial body moves in a true circle; all orbits are more or less acute eclipses.

Great strides have been made in astronomical science by means of the spectroscope and photo-

Passed through a prism, a beam of white light becomes lengthened in a rain-bow tinted band, due to the different rays being refracted in different degrees, which is called dispersion.

Draconids are meteors which shower down in each year about August 21st to 23rd, so-called because they appear to radiate from the constellation Draco.

The most remarkable annular or ring-shaped nebula is the constellation Lyra.

Andromedes are those meteors which fall about Nov. 27th each year. They seem to radiate from a point in the constellation Andromeda.

lay 100 bricks in 8 16 and a cubic yard a chimney, 1 make enough good mortar to plaster 100 square 3 a cort of stone, three bushels of lime, and a cu cubic feet of wall.

5 courses of brick will lay 1 foot in height on a cu will make a first a line wideand 12 ins. long, and 8 lae 8 ins. wide and 16 ins. long.

Cement 1 bush. and sand 2 bush. will cover 3 a fuch thick, and 6 as yids. \$ inch thick. 1 hull cover 3 a fuch thick, and 6 as yids. \$ inch thick. 1 hull. From a point in the constellation of Leo as hower of meteors radiates about Nov. 13th to 14th each year. These meteors are termed Leonids. They travel very swiftly. Every 33 years they are especially numerous. The last great shower of Leonids occurred in 1866, and the next will take

Sirius, Alpha Canis Majoris, or the dog-star, as it is often filed, is the brightest star in the heavens, being two magnitudes more brilliant than an ordinary first magnitude star.

The Zodiacal light is best observed after sunset in the Spring months and before sunrise in the Autumn. In the tropies it is visible early every evening, and may occasionally be well seen in more northern latitudes.

Venus and Mercury are called inferior planets because they revolve nearer to the sun than does the earth. Those planets which revolve ontside the orbit of the earth are called superior planets, and include Mars, the Planetoids or minor planets, Jupiter, Saturn, Uranus and Neptune.

Two of the most interesting celestial objects, after the moon, to be seen through a small teles-

cope are the planets of Jnpiter and Saturn. Jupiter has five attendant moons.

Reflecting telescopes are coming much into vogue. The speculum or mirror is now silver-on-

glass

The great nebula in Andromeda can be easily seen with the unassisted eye on clear evenings.

Meteors or "shooting stars" have been much studied recently. They are usually small bodies.

which become incandescent by friction with the air. Occasionally, when of considerable size, they are called fireballs. About 34 miles a second is the near velocity of meteors. Ordinary shooting stars approach within about 50 miles of the earth's surface before they are dissipated, and fireballs come as near to us as five or ten miles.

The Milky Way, Via Loctea or Galaxy, that nebulous band or zone of light which crosses the sky, consists of myriads of stars.

SHORTHAND AND TYPEWRITING. Records of Speed in Both.

Henry Mill, an Englishman, nearly two hundred years ago invented and obtained a patent for "an artificial machine or method for impressing or transcribing of letters, singly or progressively, one after another, as in writing, whereby all writings whatso-ever may be engrossed on the paper or parchment so neat and exact as not to be distinguished from print." Although this did not become a practicable writing machine, it was the first to embody an idea which after many years and many efforts, has culminated in the present efficient typewriter. In 1829 William A. Burt of Michigan, the inventor of the solar compass, carried the idea of a writing machine still farther, and in 1833 he was followed by a Frenchman, M. Prossin of Marseilles; Charles Thurber of Worther Marseilles; Charles Thurber of Worthern 1942. Oliver T. Eddy of Pal cester, Mass., in 1843; Oliver T. Eddy of Baltimore, in 1850, and John Jones in 1852 patented instruments of which no practical use was made. In 1856 A. E. Beach of The Scientific American, produced a typewriter which was in advance of anything hitherto known, and contained many of the ideas that exist in the machines of to-day. It remained for John Pratt of Alabama to patent, in 1867, an instrument which, being described in The Scientific American, proved a direct incentive to the production of the well-known Remington of the present time. This first appeared in a very crude shape, but gradual improvements were made, and success brought into the field a host of competitors, whose names are familiar to the business community in all the commercial countries of the world.

Greatest Speed of Operators.

The comparative speed attainable upon these different machines is a matter of much these different machines is a matter of much controversy, and the speed possible in actual work or for practical purposes probably cannot be stated with any degree of accuracy. As high a speed as 204 words has been attained on some of the leading machines in a single minute test, the operator writing it is a matter of much controversy, and the speed possible in actual Number of messages, 1870:—Russia, 2,716,300; Norway, 466.700; Sweden, 590,300; Denmark, 513,623; Germany, 8.207,800; Holland, 1,837,800; Belgium, 1,998,800; France, 5,663, 800; Switzerland, 1,629,235; Spain, 1,050,000; a single minute test, the operator writing it lay, 2,189,000; Austria, 3,388,249; Hungary,

from a memorized sentence. A continuous speed of 100 words per minute would probably be, however, the most that any one of these instruments and its operator would be capable of attaining in actual work. This also presupposes writing from dictation, so that the eyes of the operator may be confined entirely to the keyboard of the machine. chine.

Speed in Shorthand Work.

The rate at which shorthand can be written is also a question much in dispute, and one which has not yet been satisfactorily settled. Single minute tests have been had with faultless transcriptions reaching as high as 407 words in one minute, but for writing from new matter from continuous dictation, 252 words per minute for five minutes is the highest authenticated speed When, however, it is considered known. that the average public speaker will not ut-ter more than from 150 to a possible 175 words per minute, it will be seen that this speed is altogether unnecessary for general The occasion of writing at the rate work. named above-252 words per minute for five consecutive minutes from new matter (the matter being unknown to the writer), was at an official meeting at Lake George, N.Y., in 1888, when, for the purpose of proving his system faster and more legible (with the same rate of speed) than any other system extant, a shorthand author offered cash prizes to the amount of \$500 to writers of any and all systems of shorthand to compete. The first prize upon this occasion was awarded to Isaac S. Dement of Chicago (now known as "the champion shorthand writer of the world"), for writing 252 words per minute for five consecutive minutes.

THE OLDEST TOWN IN THE WORLD.

Damascus, with very good reason, claims to be the oldest town or city in the world. Tyre and Sidon have crumbled on the shore; Baalbec is a ruin; Palmir is buried in a desert; Nineveh and Babylon have disappear-ed from the Tigris and Euphrates—Damas-cus remains what it was before the days of Abraham, a centre of trade and travel, an island of verdure in the desert, with martial and sacred associations extending through thirty centuries. According to Josephus, Damascus was founded by Uz, the son of Aram and grandson of Shem. It is first martial and sacred associations extending of Aram, and grandson of Shem. It is first mentioned in Scripture in connection with Abraham, whose steward was a native of the place (Gen. xv., 2). It is to-day what Julian called it, "The Eye of the East," as it was in the time of Isaiah "The Head of Syria." It is still a city of flowers; the streams of Lebanon still murmur and sparkle the wilderness of the Syrian gardens. The Asiatics traditionally speak of Balking as the "Mother of Cities." Its ruins cover several square miles, but its present population is reduced to 2,000. The Hindoos claim extreme antiquity for Benares and Canora. Among other old cities may be mentioned: Argos, Athens and Thebes, in Greece; Crotona and Rome, in Italy; Cadiz and Saguntum, in Spain; Constantinople, in Turkey; and Marsellles, in France, which was founded by a colony of Greeks, 580 B.C. The age of these cities varies from twentyfour to twenty-seven centuries.

THE TOWN CALLED THE "MODERN ATHENS."

Edinburgh is the "Modern Athens." singular resemblance to Athens, approached from the Piraeus, is striking. An imitation Acropolis is commenced on the Calton Hill, and has the effect of the Parthenon. Hymettus is rather more lofty than the Pentland Hills, and Pentellous is further off and grander than Arthur's Seat; but the old Castle of Edinburgh is a noble feature, recalling the Greek Acropolis. To these resemblances in nature have been added those of art. On the Calton is the unfinished "National Monument," intended to have been a copy of the Parthenon, but more like the Temple of Minerva. Lord Dugald Stewart's monument is copied from that of Ly-sicrates at Athens. Below the Calton is the High School—an adaptation of the Temple of Theseus, and the Burns' Monument, which is also Greek.

THE FOUNDER OF SUNDAY SCHOOLS.

Cardinal St. Charles Borromeo introduced Sunday instruction of children, at Milan, about the year 1580. In the next century (1693) his example was followed in England

1,489,000; United States, 9.157,646; Great by the Rev. Joseph Alleine; by the Rev. Britain and Ireland, 9,650,000.

David Blair, at Brechin, about 1760; by the David Biair, at Brechin, about 1760; by the Rev. Theophilus Lindsey, at Catterick, Yorkshire, about 1763; and, with more special organization, by Robert Raikes, an eminent printer of Gloucester, conjointly with the Rev. Thomas Stock, in 1780. The chief place amongst the founders of these schools must be accorded to Robert Raikes, who was the originator in England of the present organized system. Like Howard, he began his career by endeavoring to mitigate the sufferings of prisoners. While thus employed, he became convinced that ignorance was one of the main causes of crime, and that persons most needing instruction could not be taught on the ordinary days of the week; he, therefore, resolved to try the experiment of collecting together on Sunday the children of the poorest classes. The result was in every way satisfactory, and in 1802, nine years before his death, he had the satisfaction of seeing the Sunday School Union founded. It is now computed by good authorities that there are in the United Kingdom alone 300,000 Sunday School teachers and three million scholars.

96—Dickens' David Copperfield.

97—Lytton's Last Days of Pompeli. 98—George Eliot's Adam Bede. 99—Kingsley's Westward Ho!

100—Scott's Novels. *Epitomized in Talboys Wheeler's His-

tory of India. Note.-In the compilation of this list Sir John Lubbock originally introduced it with these remarks:—"I have abstained, for ob-vious reasons, from mentioning works by living authors, though from many of them living authors, though from many of them—Tennyson, Ruskin and others—I have myself derived the keenest enjoyment, and I have omitted works on science, with one or two exceptions, because the subject is so progressive. I feel that the attempt is over-bold, and I must beg for indulgence, while hoping for criticism. Indeed, one object which I have had in view is to stimulate others more comptent far than I am to give us the advantage of their opinions.

Moreover. I must repeat that I suggest Moreover, I must repeat that I suggest these works rather as those which, as far as I have seen, have been most frequently recommended than as suggestions of my own,

though I have slipped in a few of my own special favorites. In any such selection much weight should, I think, be attached to the general verdict of mankind. There is a 'struggle for existence' and a 'survival of the fittest' among books as well as among animals and plants."

STATISTICS OF FECUNDITY.

Human.

In "Statisque Humaine de la France." M. In "Statisque Humaine de la France," M. J. Bertillon presents the following table, showing that the French are the least prolific and the Germans the most prolific people of Europe. Number of children born alive annually per 1,000 women of 15 to 50 years—France, 102; Ireland, 114; Belgium, 127; England, 136; Netherlands, 137; Spain, 141; Prussia, 150; Bavaria, 156. Aristotle mentions a woman who had five children at a birth four times successively: Menage one mentions a woman who had five children at a birth four times successively; Menage one who had 21 children in seven years. The Empress Catharine received a Russlan woman in 1757 (Mrs. James Kyrloff) who had had 57 children, all of whom were then living, having been born thus:—16 in four confinements, 21 in seven confinements, 20 in the confinements, or in all 57 children in 21. finements, 21 in seven confinements, 20 in ten confinements, or in all 57 children in 21 confinements. This woman's husband married again, and his second wife had 15 children in seven confinements. Fedor Vassileff of Moscow (1782), had 83 children living when pensioned by the Czar. He had 69 children by his first wife at 27 births. Lucaz Saez, who was living in Spain in 1883, then had 197 descendants. Mrs. George Hirsch of Dallas, Tex., is reported, November, 1888, as having been confined of six children, four boys and two girls. (The above was compiled from Mulhall.) Marie Juneau of Guayaquil, Ecuador, in 1892, was delivered of seven children at one birth. In 1818 in Mercer County, Pa., ten children were born of one mother within twelve months—five at each of two births. The mother died about a year after the second birth, but at each of two births. The mother died about a year after the second birth, but meantime gave birth to twins, thus producing twelve children in twenty months. She was 37 years old at her death. A Mr. Browning of Huntington, W. Va., was reported in 1892 to be the father of 67 children by 6 wives, and John Kingsley, of Lost Creek, Carter County, Tenn., had his 61st child by his sixth wife, 50 of his children then being alive. The following statement appeared in The Louisville Courier-Journal November 29, 1893:—"In the Hustonville neighborhood near Lawrenceburg, Ky., there resides a marnear Lawrenceburg, Ky., there resides a married couple, Samuel and Angeline Jeffries, ried couple, Samuel and Angeline Jeffries, aged 76 years each, whose lives are worthy of note, inasmuch as they have so strictly obeyed the Scriptural injunction to 'multiply and replenish the earth.' Mr. Jeffries furnishes the following marvellous record: 'We were married six years before a child was born, but 15 years from that day my wife was the proud mother of 19 children, 7 pairs of twins. Within 11 months 4 children were of twins. Within 11 months 4 children were born (two sets of twins), making 4 at one time not walking. There were 14 of us in my father's family—10 brothers, including myself, and 4 sisters. The 10 brothers had 34 pairs of twins, but the sisters none. Two of thes prothers were twins, who went to Misso at and married twin sisters and each had & pairs of twins born to them."

MISCELLANEOUS MEASURES.

Lengths.

A nail, used in cloth measure, is 21 inches. A hand, in horse measure, is 4 inches. A hand, in horse measure, is 4 inches.

A palm is 3 inches, and a span is 9 inches
There are 320 poles or 1,760 yards in a mile.
The fathom, 6 feet, is derived from the full
grown length of a man.

An Irish mile is 2,240 yards, or 12,727 English.
A Scotch mile is 1,984 yards, or 80 are equal to

91 English.

A nautical mile is 2,026.5 yards.
The log line is divided into spaces of 50 feet, and the way measured is by a sand glass which bears nearly the same proportion to an hour that 50 feet bears to a mile,

A surveyor's chain is 4 poles or 66 feet, divided into 100 links of 7 92 inches.

A square chain is 16 square poles, and 10 square chains are an acre.

Four roods are in an acre, each containing 1,210 square yards. Forty poles of 30.25 square yards are in each rood. A pole is 5½ yards each

Money and Coinage.

GENERAL INFORMATION.

300,000 gold leaves is an inch. 170,000 silver leaves is an inch.

The term sterling is a corruption of Easterling. The first shillings were coined by Henry VII., and were called testoons or testers.

A pound sterling if paid in gold is worth \$4.56 and '572 of a cent.

The Russian mines in the Urals, yield in 10 ears, 65,330 lbs. of gold, 412,246 of silver, and 6,067 of platina.

Silver was first coined by Phidon, King of Argos, about 860, the epoch of the building of Carthage, and about 140 years after the building of Solomon's tedfiple.

The Egyptian's did not coin till the accession of the Ptolemies, nor the Jews till the age of the Maccabees. The Britons coined before the Roman Invasion.

Jewish shekels were 1 S. 7 D. A talent was 3,000 shekels or £342, and a talent of gold

GUNTER'S CHAIN, LAND MEASURE-MENT, ETC.

MENT, ETC.

7.92 inches constitute 1 link; 100 links 1 chain, 4 rods or poles, or 66 feet, and 80 chains 1 mile. A square chain is 16 square poles, and 10 square chains are 1 acre, Four roads are an acre, each containing 1,210 square rods, or 34,785 yards, or 94 yards 28 inches each side.

Forty poles of 30.25 square yards each is a rood, and a pole is 1½ yards each way.

An acre is 4,840 square yards, or 69 yards 1 foot 8½ inches each way; and 2 acres, or 9,680 square yards are 93 yds. 1 ft., 2 inches each way; and 3 acres are 120½ yards each way. A square mile, or a U. S. section of land is 640 acres, being 1,060 yards each way; half a mile, or 880 yards each way, is 160 acres; a quarter of a mile, or 440 yards each way, is a park or farm of 40 acres; and a furlong, or 220 yards each way, is 10 acres.

Any length or breadth in yards which multi-

Any length or breadth in yards which multiplied make 4,840 is an acre; any which makes 12.10 is a rood, and 30.25 is a pole.

An English acre is a square nearly 70 yards each way; a Scotch of 77½ yards, and an Irish of 88½ yards.

BOX MEASURE.

Farmers and market gardeners will find a series of box measures very useful, and they can be readily made by anyone who understands the two-foot rule, and can handle the saw and the hammer. A box sixteen by sixteen and one-eighth inches square and eight inches deep, will contain a bushel, or 2150'4 cubic inches, each inch in depth holding one gallon.

A box twenty-four by eleven and one-fifth inches square and eight inches deep will also contain a bushel, or 2150'4 cubic inches, each inch in depth holding one gallon.

A box twelve by eleven and one-fifth inches square and eight inches deep will contain half

a bushel, or 1075'2 inches, each inch in depth holding half a gallon.

A box eight by eight and one-fourth inches square and eight inches deep will contain half a peck, or 2988 cubic inches. The gallon dry measure.

A box four by four inches square and four and one-fifth inches deep will contain one quart, or 67.2 cubic inches.

TO FIND THE NUMBER OF SHINGLES REQUIRED IN A ROOF.

Rule.—Multiply the number of sq. ft. by 8, if the shingles are exposed \$\frac{1}{2}\$ in., or by 7 1-5 if exposed 5 in. To find the number of sq. ft., multiply the length of the roof by twice the length of the rafters. To find the length of the rafters at one-fourth pitch, multiply the width of the building by '56 (hundreths); at one-third pitch, multiply it by '6 (tenths): at two-fifths pitch, by '64 (hundredths). This gives the length of the rafters from the apex to the end of the wall, and whatever projects must be taken into consideration. Note.—By \(\frac{1}{2}\) or 1-3 pitch is meant that the apex or comb of the roof is to be \(\frac{1}{2}\) or 1-3 the width of the building higher than the walls or base of the rafters.

FREEZING MIXTURES.

4 oz. of sal ammoniac dissolved in 8 oz. of water reduces the temperature 40 degrees.

A mixture of powdered ice and snow, 72 degrees.

Snow or ice, and dilute nitric acid, 46 degrees. Snow and chloride of lime, 68 degrees.

LAND PLOUGHED IN ONE DAY.

One team will turn over the number of acres set opposite the widths of the furrow, in ten hours, moving at the rate of two miles in an hour. Of course, allowance must be made for the varying conditions under which ploughing is carried on in various sections of the country.

The Happy Thought Range

Over 50,000 in use in Canada and every user pleased.

It is said that the cooking apparatus is the most important article in any household. Then why not have THE BEST? THE HAPPY THOUGHT RANGE combines perfection of operation with ease of management, it is always ready for work, and has more features of utility and convenience than were ever before combined. Other ranges may be sold for less money, not enough to make the Happy Thought extravagant, but sufficient to show its superiority. If you have any difficulty in getting particulars from your dealer, drop a card to the manufacturer.

CLEAR

HAVANA CIGARS

• MANUFACTURED from Tobacco selected from the finest Cuban Plantations, and made by skilled Spanish workmen direct from Cuba. Equal to the best brands of imported cigars. Correspondence invited.

WE make a specialty of Stereotypes, Linotypes and Typograph Metals. Once a trial is made of our metal you will use no other. It runs up sharp, giving a face unequalled by any other metal. Our Sterotype remain rigid on the press cylinders; the pressmen never complain, which speaks volumes. The following are some of the Newspapers, etc., who are using our metals:

The Globe To	ronto,	Ont.
The Star	"	66
The News	64	44
The Methodist Book Room	**	64
The Free Press Ot	tawa,	Ont.
The Journal	66	66

Truro News Truro, Nova Scotia Rogers Typograph Machine Co., Windsor, Ont. Merganthaler Linotype Machine Co., Montreal.

and Many Others.

We make an Interchangeable Metal that may be used either as Stereotype, Linotype or Typograph, i.e., either for stereotyping or use in the machines.

Tin, Lead, Brass and Copper Drosses Purchased. Dealers in All Kinds of Metals.

WE likewise have extensive lines of BABBIT AND ANTI-FRICTION METALS: Our XXX METAL has never been equalled; Our 2 x 2 METAL is equal to and better than any No. 1 on the market; Our 3 x 3 METAL is an all-round Metal, fit for any work; Our ALUMINOID is a surprise to all engineers and machinists, owing to its great tensile strength and its great bulk in comparison to its weight. The following are a few of those who have been using our metals for years:

Grapho=Phono

The Latest Development, and is the First Thoroughly Satisfactory Musical and Talking Instrument.

It is a combination of all the best parts of all Talking Machines. Words spoken in an ordinary voice are reproduced distinctly. The musical pieces are rendered loud enough to entertain an audience in a large hall.

All this has been accomplished by recent invention, and is comprised in a machine the size of a small hand satchel.

It runs by Spring Motor Power (no Electricity Required)

With it you can make records of the voices of your friends and reproduce them instantly and loudly.

The Machine can be used for home entertainment or exhibition work so satisfactorily that all who have seen it pronounce it a marvellous revolution in Talking Machines.

PRICE, \$65.00 FOR THE COMPLETE OUTFIT

Including the Instrument, Twelve Musical Records, and all attachments.

A CANADIAN ENTERPRIS

THAT PROMISES A HANDSOME DIVIDEND.

The following letter emanates from a gentleman competence speak on the subject; whom I have known well and favorably followers and who has made a specialty of Typewriters. He has condetted this line of business successfully for over ten years, and enterest the formation of a Company to manufacture the Burns' Typewror in Canada with entire confidence in the undertaking.

C. W. TAYLOR, Business Manager, Globy

DEAR SIR :-

During the past ten years of my experience in the typewriter business question has often been asked me, "Why do you not organize a company for manufacture of a typewriter in Canada?" My reply has been that I looked f ably on such a project, as the high protective duty of 272 per cent. would give Canadian market up absolutely to the machine manufactured here, provided machine had the general excellence of the leading typewriters now on the me Having this idea always prominently before my mind I have watched careful typewriters that have been placed on the market, but not until an examinat the Burns' typewriter, which is soon to be placed before the American publi I become convinced that the proper machine had arrived to control the Can market and to successfully compete with the leading typewriters in the foreign kets. I have subjected the "Burns" to a thorough investigation, and have a our it examined by disinterested experts. It has incorporated in its construction, su sirable qualities not possessed by any other machine, and is superior to appare p writer now on the market. In short, the outlook is so favorable and myou fidence is so great in the outcome that I have determined to enter activate the work of organizing a company with a capital stock of \$200,000 for ilve of facture in Canada. This Canadian Company will control all territory on ding the United States. The Inventor shews his confidence in the future of hi, now writer by his willingness to accept a moderate amount of stock assit small royalty, asking no cash whatever, but stipulating that the Ar pany give him a guarantee that it will manufacture a specified number of meg an ted a yearly, which he apportions as follows : -Dr. pa

Canada200Great Britain and Ireland1,500Foreign countries and other British Colonies800

2.500

te th

3 that

in C

ting

I consider this estimate a very moderate one, in view of the fact that tract was made recently by one of the new American Typewriter Comparison sell in Great Britain only, ten machines per day, or over three the of the machines per annum, and I do not consider the machine referred to as first the stimate of 2,500 machines per year is a very low one, and the enterprofit has been ascertained to be on the lowest wholesale price at least ise.

\$50,000

IANDSOME DIVIDEND.

LOR, Business Manager, Globy record.

perience in the typewriter business y do you not organize a company for My reply has been that I looked f tive duty of 271 per cent. would give nachine manufactured here, provided e leading typewriters now on the ma ore my mind I have watched careful market, but not until an examinat

e placed before the American publi hine had arrived to control the Can the leading type writers in the foreign

thorough investigation, and have a our calculations we have made no allowance for profits from the sales of thorough investigation, and the sales of the incorporated in its construction, such as Linen and Carbon Papers, Ribbons, Oils, Desks, Stands, etc., he outlook is so favorable and myou have had any experience in placing goods on the British market you he outlook is so laverage what a time it takes owing to the conservatism of the people. The

have determined to onto the conservatism of the people. The capital stock of \$200,000 for itse of educating these people to the use of typewriters has been borne by pany will control all territory ording manufacturers who have worked hard for many years. This important his confidence in the future of he now open and promises an extensive trade. Germany and France offer noderate amount of stock ssibilities, and the trade to be done in other countries is encouraging.
