park committee, and from its beginning has been the president of the park com-His Devotion to the Park Idea

is well known, and his labors in this direction have been, and still are untiring. Mr. Yerxa was born in 1847, in York county, New Brunswick. His family were land owners and farmers, and were among the original settlers of that part of the province, having migrated from the Hudson River valley during the Revolutionary war. When 19 years of age he left home, came to Boston, and obtained employment in the grocery business of C. D. Cobb and Brothers. In four years he was admitted as a partner. In 1871 he firm of Cobb, Bates & Yerxa was organized at its present location, and the success attending this enterprise from its

beginning is well known. Mr. Yerxa is a director in the Faneuil Hall bank and also in the Mercantile Loan and Trust Co. He is a member of the Cambridge Citizens' Trade association, and represents that body in the State Board of Trade. He is a member of the North Avenue Baptist church. He also holds membership in the Colonial club the Cambridge club, the Newtowne club and the Library Hall association.

THE REPAIRS TO ST. PAULS. Was done for \$1610-The Interior of The Church To Be Painted At Once.

A meeting of the trustees of St. Paul's Church was held Friday for the purpose of receiving the report of the building committee who had charge of the work of repairing the tower of the church. All except three of the trustees were in at-

A Pertinent Enquiry. To the Editor of the DAIL HERALD:

DEAR SIR,-Why Mr. Hunter in this city should give so much attention to Christian Science, seems to be a pertinent question If it be an evil, is it one of so much magni tude as to merit two or three separate attacks in so short a revival campaign? It presumably would be only the greater evils be very great evils in this community, especially Episcopalianism and Presbyterian, life received so many blessings as from number of individuals representing them, but Christian Science as estimated, does not seem worthy to be classed with them. Abuse is, according to W. T. Stead, merely an inverted compliment. But why should Mr. Hunter invert his compliments to Christian Science and be so profuse in his inversion? Really, Mr. Editor, what is there in this new cult to kick up so much ado?

Fredericton, Nov. 15th.

officers were present: Regent J. M. Wiley vice regent H. Mackay, treasurer H. Chestnut collector Wm. Crewdson, Secretary F I McCausland, orator W.B. Coulthard, chaplain O. S. Osgood. vation Army Barracks.

A very large and expectant audience embled at the Salvation Army barracks Thursday night for purpose of witnessing the embarkation on the sea of matrimony of William J. Lyons of this city and Miss

Alice McKinney of Woodstock. Every seat in the building was occupied those on the platform being filled by the officers and soldiers of the Salvation Army. The proceedings were of a very interesting and entertaining character, as Salvation Army gatherings usually are. Everyone on the platform appeared to be boiling over with enthusiasm, and seemed deter- tire at the end of the year. mined to give the young couple a rousing send off. Just over the platform was a Bless the Bride and Bridegroom," and beneath this was suspended a circlet of

flowers. Adjutant McGillvray, the new district officer of the Maritime Provinces, and bride were present. They were married in Kingston, Ont., a few days ago, and are now on their bridal tour. It is needless to say they were given a rousing welcome by the local corps. After a number of afternoon. He was a native of Miramichi, volleys had been fired, and the usual for. N. B. malities peculiar to a salvation army gathering had been gone through with, a door

to the right of the platform opened, and In Walked Brigadier Scott,

followed by the bridal party, with Mrs. Scott and Mrs. McGillvray bringing up the rear. Their entrance was greeted by lusty cheering, and several spirited volleys were poured into their ranks, but doing no apparent damage other than to cause the prospective bride and bridegroom to change color slightly. They all took seats in a line along the front of the platform.

After the cheering had subsided, Brigadier Scott addressed the meeting. He said he was present to perform a ceremony the same as any of the ordained ministers. It was very kind of the government to do their work. He said this was to be the first wedding performed in Fredericton under the new law, and the second in the province. He was going to tie the knot so tight that they would have a very hard

time to untie it. Adjutant McGillvray then rendered a song, the army joining in the chorus. Mrs. McGillvray also sang a solo very sweetly and read a chapter from the Bible. after which preparations for the great event were commenced. Sergt. Donovan stepped to the front, carrying the banner,

standard, but the company were quick to face the whole electorate of Canada, and After referring to the fact that little remedy the defects, to secure improved answer to the people for their miserable information can be gained from these lamps, and during the past eighteen shuffling and time serving, not only on scattered relics as to their probable anmonths there has been no reasonable the Manitoba school question, but on the tiquity, and showing by reference to a ground of complaint against the service. tariff, their black record of corruption copper kettle containing human teeth We do not hesitate to say that if the gen- and scandal, and all the long catalogue of associated with the stone relics at Grand tlemen we have named, who happen to misgovernment and dishonesty written Lake, and indicating a contact of the two be opposed to the vicious politics of the against them during their eighteen years historic, at this point, the lecturer next referred to the occurrence at numerous points along our coast of what are elsewhere known as kitchen middens or kitchen refuse heaps, in reality old garbage heaps, but from which, as from other gar-

Curious Information May Be Unearthed In them, for example, we have direct evidence of the food of these primitive people, consisting very largely of clams, whose shells now make up the larger part of the "middens", (and which may cover an acre of surface to a depth of two or three feet), but with these the bones of a variety of other animals, such as the dog, cat, otter, mink sable, seal and skunk, also the great auk (now extinct), the wild turkey and the heron, abundant variety no doubt, thought in some instances hardly likely to commend itself to civilized people. In one instance, found near the mouth of the Bocabec River, in Charlotte county, the "middens" are in evident relation to to an old Indian vil-

lage, of which the but bottoms are

and about which, mingled with the shells and bones of these ancient feasts, in all probability in part accompanied by cannibalism, are found harpoons, needles, bodkins, etc., constructed of bone, as well | ly the same. as numerous stone implements, similar to those of Grand Lake.

The fact that these shell heaps are now in part below tide level, indicating a subsidence of the land, that they were in some instances covered originally with a vigorous and upland hardwood growth, not heard the gospel preached. where now is only a stunted assemblag of softwood trees, and finally that they contain the remains of animals, like the great auk, now virtually extinct, were alluded to as evidences of considerable antiquity, though no attempt was made to fix their age with certainty. Reference was next made to the picto-

graphs or pictorial representations

of some of the inland lakes of Nova Scotia, and the reported occurrence of similar pre-historic inscriptions to be seen in very low water, upon some rocks in the

bed of the Oromocto river.

The lecturer next passed to the discussion of Prehistoric monumeuts in other parts of the continent, and referred particularly to the occurrence over many parts of the Mississippi valley, of what are known collectively as "The Mounds." They are of all sizes, covering in some instances several acres, and are equally various in form, some being simple mounds 20 to 30 feet high, while others are enclosures of square, round, and octagonal forms. Many of the latter were undoubtedly designed for purposes of defence, while others, as judged from the skeletons found upon or within them. were probably used for sacrifice or for sepulture. Still others were of the nature of "totems," having a religious and symbolic signification. These latter have

The Form of Some Animal.

of them abound in Prehistoric relics. The origin of these mounds has been a subject of much debate, and is still unsettled, one party maintaining that they are probably the work of races migrating of wearing the hair, which is similar to that of the Aztecs, their habits of sun worship, etc., as indicated by rock painteven to oblige his friends at Ottawa. ings, and rock inscriptions, which leave Meantime Mr. Charbonneau, the Liberal | little doubt upon this point, and finally struction of the mounds, and their mathe-

PROF. ROBERTSON'S LECTURE. NEWS OF THE DAY.

The Natural Resoures of Canada From

The second of the course of lectures on 'Our National Resources," given under the auspices of the Montreal Young Men's Christian Association, was delivered Friday evening by Prof. Robertson, Dominion Dairy Commissioner, Ottawa, who spoke on the subject of "Agriculture."

Prof. Robertson stated that the agriculturist was, in the nature of his occupa tion, a great producer of wealth, not an accumulator; but he was a producer in realize upon the unrealized resources of speak of seed germination and plant growth, and of the nature of agriculture Macintosh were admitted as new mem- commerce, he pointed out, subsisted

On the Surplus Products. of the farm, the mine and the sea. In Canada we cultivated 28,500,000 acres and if the farmers used the resources of these said that in Canada we were only a few people, but admitting such to be the case, even then we had better prospects than had the people of England in Queen Elizabeth's time. In fact, if Canada were half true to her opportunities, even in agriculture, she would have so many people in the country of such robust character that her civilization would be the telling one in humanity in years to come when it would be harder to live than it was now. It was because we had hardships to meet that we would become a hardy people. The Canadian half of this continent, said the lecturer, peopled with well-fed men, would give her citizens an to-day. influence that would dominate peacefully

Falls, never seen before, are plainly visible | taining the human body, Prof. Robertson | liament for over thirty-five years, and is together they could live well within them. of seventy. selves, exchange between themselves, make the most of twe resources of our own country, and realize on them to the

Speaking of the magnitude of agriculture in Canada, he said that in our central territory we had the the great basin of Hudson Bay, which gave the largest area of agricultural land. Then there was the great basin of the St. Lawrence, the basin of the St. John River, and the Atlantic slope, whilst West the great basin of the Peace and Mackenzie Rivers, and the whole of the Pacific slope, which was

Admirably Adapted for Growing Wheat and barley, as well as fruit, of rich flavor and excellent quality. Of the population of the Cominion, forty-five per cent were engaged in agricultural pursuits, and their prosperity very materially affected the prosperity of the other fifty-five per cent, as well as that of the carrying companies ships and coast defences, he declared, are of the country. The more that agriculture was developed, the larger the population that would be employed, and we should have a diversified style of produc- White tion which would make us a self-sustain-

In conclusion, he spoke of the beneficial influence which farmers' meetings were having upon the agricultural community, and, through it, on the country

A vote of thanks was tendered to Prof. Robertson at the conclusion of his address,

THE BARK BUSINESS.

Herring, Intresting Interview with D. F. George.

D. F. George returned on Friday from business trip to Boston and Providence. He reports that the outlook for the tan bark trade is not very bright at present. The United States Leather Trust Company

have decided to place no hides in their vats for a period of two months from the first of November, and they have also lowered the price of bark fifty cents per cord. This gigantic corporation controls the entire leather tanning business of New England where our bark is principally used, and naturally their action has had a Depressing Effect on the Bark Trade. As the stock is now very plentiful, there is no prospect of the price advancing in

The only persons in this province who will feel the depression, are the men who in a boat. The judge charged strongly is peeled in the months of June and July and is at once bought up by the shippers. nounced. The prisoner started to shake of bark in this province now in the hands of operators, so it will be seen that the drop in price does not affect the producers to any great extent. Nearly all the bark in New Brunswick is owned by three persons, of whom Mr. George is one, and the Montefiore Home, N.Y. In the seven | they alone will suffer by the recent action of the Leather Trust Company. There is every prospect of a change in price before Mr. George is now shipping bark at the

rate of Twelve Car Loads per week and he has enough of last season's stock well, but the doctors say the disease must end tatally.

There were several casualties in and near Montreal yesterday: John Loyd, aged 23 who had be will form the principle, apaying one or not. The bark which he aged 23, who had been ill for some time, blew his brains out in a back shed.

THE CITY COUNCIL.

Discussed the Sewerage Questhree of his chilren had a very narrow tion Monday Night.

An informal meeting of the city council was held Monday night for the purpose of awarding the contract for snow plowing for the coming winter, and also to take into consideration the applications which had been received from different enginers for the work of preparing preliminary plans together with an estimate of the probable cost of a system of sewerage. There were present His Worship, the Mayor, and Alds. Anderson, Adams, Gilman, Golding, Limerick, Lemont and who was driving along a short distance

The Mayor announced that only two tenders had been received for the work of keeping the sidewalks free from snow the oming winter as follows:

Nathaniel Smith, No. 1 division \$41 No. 2 division \$31, William Smith, No. 1 division, \$37; No. 2 division \$42.25. The Contract Awarded

After considerable discussion it was decided to award the uptown division to Nathaniel Smith, and the down town division to William Smith. It was not thought prudent to give the contract for all the work to one person. The work is to be performed under the superintendece of the road master.

The Mayor announced that two applications had been received for the work of preparing preliminary plans for a system of sewerage, one from Mr. Porter of New York for \$550, and the other from Mr. Coffin of Boston for \$500. Some correscondence had been had with Mr. Chip man, a Toronto engineer, and though the city clerk had written him asking for figures, no reply had been received, so they had only the two offers to deal with. Ald Gilman thought that before taking any action they should try and get Mr. Chipman's figures. This view was

Shared in by the Mayor. Ald Golding thought it would be a good plan to bring a man here in whom the council had confidence to look over the situation, and give an estimate of the

EVANGELISTIC SERVICES. Interesting Union Meeting at the Free Baptist Church Last Night.

The Free Baptist church was too small o hold the crowd that sought admission to the service held there Tuesday night. The service was the first of a series of three to be held in the churches lately united in evangelistic services under the leadership of Messrs. Hunter and Crossley. Rev. F. C. Hartley had charge of the | The Subject Treated from many Stand-

service and the music was under the management of the church choirster, M. Tennant, the church choirs uniting for the services. Rev. Mr. Young offered the opening prayer, and Rev. Dr. Brecken read the

lesson, the parable of the sower, making offered to do this for \$550 and Mr. Coffin some pointed and forcible remarks as he Rev. J. D. Freeman preached a very earnest and practical sermon. It was well received by the people and could not fail to make a lasting impression. He took for his subject "The outstretched hands to get a first class man to come for much of Jesus," from the text Rom. 10-21. Many people claim to be able to read proved themselves able to look after their character from the hand; be this so or own interests. Our province can attain t, we surely can read somewhat of God's.

character from the hands of Christ. Let us that no offer had been received from look for a moment at the hands of Christ. (1) They are healing hands. Christ His touch there is always healing. Jesus has power to heal the soul. (2) Comforting hands. As the hand of

a mother soothes the fevered brow of the sick child, so does Christ's touch bring peace and quiet. (3) Powerful hands. Nothing to great for those hands to do. God is not passive; he is incensely active and this activity is

(4) Pierced hands. They were nailed to the cross. If you could only get a vision of the wounds of Christ surely your heart would be melted. Who can be so hard hearted as not to be touched by the love of Christ.

(5) Intercessory hands. They are held up before the Father for us and surely they will avail. (6) Patient hands. Oh, how long has Jesus stretched out His hands for you?

Will you not put your hand in His tonight? Mr. Hartley conducted the after service in the vestry. It was a powerful meeting. and at the close a number manifested a desire for prayer and remained to talk

with the Christian workers. Taken altogether the service was very nteresting and much good was done.

COMMON SCHOOL EDUCATION.

Mr. Brittain's Clever Lecture in the University Course Tuesday Night.

points in an Original Manner.

The second lecture in the University ourse was delivered in the college library Tuesday night by John Brittain of the Normal School. There was quite a large attendance, Dr. Harrison occupying the

Mr. Brittain in opening said: We shall limit our attention this evening to the consideration of Common School Education. The education of the masses in our chief concern; the classes have usually to an eminent degree of prosperity and influence by developing a highly virtuous, intelligent, and effective people. To

The school is the chief agency through which both government and people must act. In religion and politics we are divided, the Public School affords a field

United National Effort. Our public school system is a remark-

ably well planned one, and is quite generously aided by government grants and But we depend too much upon our system. Our state is somewhat like that of the inhabitant of the "Happy Valley" of Rasselas. "To brighten their opinion of their own felicity, they were daily entertained with songs, the subject of which was the Happy Valley. The sages who nstructed them described all beyond the ountains as regions of calamity, where discord is always raging." And "these nethods" we are told were generally successful." We forget that a good system does not necessarily imply good teachers or good schools. There are fewer people now who cannot read or write, than under the former system; but there

are many thousands who have No Taste For Solid Reading,

and in other respects the progress made has been equally unsatisfactory. We excel in theory, we flourish in generalities, but we fail in working out details. While in some localities fair progress has been made, there are districts in our province where the present occupiers of published a letter signed by Mrs. D. L. the homesteads are not at all superior in Kelly, attacking the postmaster of Stanley, mental power and general intelligence to I have no intention of replying through their immediate predecessors; and there those engineers that did not have to seek | the press to the statements made therein, | are districts where parents, whose intelwork, but work sought him. Mr. Coffin but I am sorry Mrs. Kelly feels obliged to lectual life is of a higher order than that resort to another office "at a sacrifice of of their neighbors, who are compelled to make a plan of the work, which would be time and convenience," and I wish to send their children to a school where any will entail no such sacrifice, namely, an quenched, or perish for want of fuel. The could himself. He thought a suitable man application to the proper authorities for great majority of our common schools are could be got to superintend the work of my removal from office. This will be miscellaneous schools, where a single construction for \$4 per day. His Worship easily and speedily brought about, if, as teacher, generally quite young and inexchildren in the district between the ages

Such application may be made either satisfactory general work in such a school administration on the school question. Unless It Be a Very Small One. The mixed school must be got rid of before we can hope for anything like good results. This can be done without adding to the expense, by dividing the country into districts two or three times as large as the present ones. Every district would then be able to support a graded school of at least two departments. This would make it necessary to provide for the convevance to and from school of the childen dwelling in the remote parts of the districts. But in each county a commission would carefully determine the boundaries of the districts with special reference to this necessity. The schoolhouse would not usually be located in the central part of the district, but in or near the most populous part which would be within walking distance of one extremity of the district, so that the pupils would only need to be conveyed from one direction. These large districts would be more likely

The Services of Men of Education and public spirit as secretaries and members of school boards. Better school buildings would be constructed, with better sanitary arrangements, and more spacious grounds. Every school would be able to maintain a good library, and equip a modest laboratory. The improved conditions would encourage a greater proportion of capable young people to seek the teaching profession, and would enable them to reach a higher standard of scholarship. More young men would be attracted into the professions, a result greatly to be desired. Every school needs upon its staff at least one good man, as well as one or more good women.

The County Fund might be administered in such a way as to stimulate improvement by making the amount allotted to each district depend partly upon

The Class of Teachers Employed, and partly upon the amount of local assessment voted by the district upon its staff at least one for local assessment voted by the district upon its staff at least one good man, as well as one or more good women.

The Class of Teachers Employed, and partly upon the district upon its staff at least one for local assessment voted by the district upon its staff at least one for local and partly upon the amount of local assessment voted by the district upon its staff at least one good man, as well as one or more good women.

The Class of Teachers Employed, and partly upon the district upon its least of the least part of the least part of the least part of the least part of local and profession, and would enable in the Haylaeville Settlement, in the Particular of Queenstury, in the County stores and New Brunswick land Company, and bounded as follows: Beginning at a stake placed at the northwest angle of a lot of land owned by Charles Crabbe, thence running by the magnet of the year one thousand eight hundred and fifty-two, south forty-one degrees and twenty minutes, east one hundred chains, thence south, sixty-nine degrees and twenty minutes east, twenty-one chains and thirty-eight links to the place of the Haylaeville Settlement, in the Particular at stake placed at the northwest angle of a lot of land owned by Charles Crabbe, thence running that a stake placed at the northwest angle of a lot of land owned by Charles Crabbe, thence running that a stake placed at the northwest angle of the very loca ditions would encourage a greater proporschool at Toronto after the Xmas holidays. greatly to be desired. Every school needs

J. B. Forgan, president of one of the and partly upon the amount of local national banks of Chicago, is very low assessment voted by the district upon with typhoid fever, Mr. Forgan was the each \$100 worth of property, and not sole-Four new members were admitted to Charles Burpee, Hon. The speaker urged the need of a greater nterest in the public schools on the part of people of education and culture, and of a more through system of inspection. Means should be employed to attract into the teaching profession, young people who excel in character, scholarship and executive ability. Those who are intellectually unfit should be excluded by carefully prepared and carefully read examination papers. These will pass

Quite Formidable Looking

examinations if the questions are taken from their text books or are so closely similar to them or to those works in clas as to render it possible to answer them mechanically or from memory, or if the examiners estimate the paper in such a judicious manner that the candidate will not fall below a pass mark. The principles of method may be included in four comprehensive ones, adaption and co-relation of studies, and self-activity and selfdirection on the part of the student. The adaptation of studies require that the several subjects of instruction shall be carefully adapted to the age, abilities and | Etoffe and Tweed Pants,

The co-relation of studies implies that the various subjects

destinies of the child.

Shall be Taught in Groups. direct and encourage this development is based not on the similiarity of the subhealed the sick, the blind, the halt. In the highest function of our government; jects, but on their natural independence. to aid and support it our highest duty as | Self-activity simply means that the pupil is to do his own work, his own

observing, his own thinking. Self-direction requires that the pupils be encouraged to look forward as they advance to peer into the twllight before them, and pick their steps. They are to be required as far as possible to ask their own questions, to indicate the next step to be taken. This will compel them to organize their knowledge as they proceed. Their mental attitude at the end of each step will not be one of passive expectation

but of active enquiry. In touching on the principal subjects of instruction, the speaker dwelt upon the

importance of instilling A Taste for Good Reading, and of giving our young people an elementary knowledge of the physical science by the laboratory method. The various industrial arts are applications of these sciences. We need a people who are close observers of their natural surroundings, who like to work with their hands, and can use them with precision: a people who think about their work as they work; who are not mere imitators but originators; not possessed merely of receptive capacity, but also of executive

The foremost place of the future will be held by that people who, by a wise and well administered course of self-development attain the highest point in character, intelligence and effectiveness. A discussion followed the reading of Mr. Brittian's paper, and was participated in by Prof. Davison of the University. Geo. S. Inch of the Normal school. Burton C. Foster of the High school, and by Messrs. W. A. Alward, Joseph Mills, and WILLARD KITCHEN Mr. Kierstead, University students. A hearty vote of thanks, moved by Prof.

PARTED ON THEIR BRIDAL TOUR.

By the author of 'A Forbidden Marriage,'

' That Pretty Young Girl,' etc. CHAPTER X.

WITH THEE CONVERSING I FORGET ALL TIME CONTINUED.

The rooms were well crowded when Esmond arrived. The duchess received him with the greatest empressment. He could not help feeling a little flattered. At a little distance he saw his friend Ross,

standing by an arched doorway, looking unhappy enough. "Why are you not dancing, my dear fellow,

while so many bright eyes are challenging you from all quarters '

"I will tell you what I am doing," said Ross, frowning darkly. "I am keeping watch. You remember that young lady I was speaking to you about. Well, I have just seen her go into the conservatory with that jackanapes of a French count, Monsieur Ballou, I believe they call him. He's a despicable fellow, always hanging around after her. If he wasn't such an expert shot, by the Lord Harry, I'd challenge him to a duel on the spot for persistently annoying that girl. I am sure he annoys her."

"I shall stay here until they come out," declared Ross, determinedly; "they must come out soon; why they have been long enough in there to have examined every plant in the conservatory twice over. Ah, they are coming at last," said Ross, with a great sigh of relief, as he clutched his friend's arm.

"Come, let me present you." Esmond had not the least desire to be presented to this houri with whom his friend was so desperately in love, but he allowed himself to be drawn forward.

"See how that miserable French count bends over her, smiling like a hyena," cried Ross, savagely, crushing something very like an imprecation through his white, set teeth. "Can't you see how bored she looks?"

"Where are they?" asked Esmond, in no little amusement at his friend's anger. "Don't you see the two just coming ou from that green arch, the young girl stopping to caress the swaying crimson blossoms of that India plant? See, they are coming this way; you will have a full view of her face when she turns from that jacknapes to look in this direc-

Following where Ross had indicated, Esmond saw a picture that he never forgot

while he lived. There was a beautiful overhanging plant, green, with rich, crimson flowers that hung down like the tendrils of the jasmine; they formed a beautiful natural arch, and a young girl was standing underneath it. Her face was turned from him. He never saw the man to whom she was speaking, he never thought of him, every sense, every thought, was en-

grossed in her. He saw a tall, slender figure, every line and curve of which was full of grace, the draperies of palest green silk and fine white lace were looped up with s simple cluster of white rosebuds and long, shining grasses, white rosebuds was mingled with the lace on her breast, and a smalll knot of the same flowers were twined amidst her dark curls.

"She must indeed be a charming creature if her form corresponds with that face," murmured Esmond. "Come, make haste," cried Ross, fairly

dragging him forward. The next instant they were standing before her. Esmond drew back with a gasp of joy; as she turned her beautiful face, he beheld the

girl for whom he had been searching so long and so vainly, Irene Middleton. She recognized him, instantly, as he could see from the sudden paling and flushing of her face as their eyes met. He never remem bered in what words Ross made that presentation: for the first time in his life Esmond los

the debonair self-possession which character-"Miss Middleton and I have met before, he stammered, and it occurred to him tha Ross did not know under what circumstanae (as he had but recently returned to London from college) that he had met this young lady. The count, with a bow, had surrendered search of Victor Ross, much to that young gentleman's intense annoyance, and Esmond's

great relief. I will return in a very few moments Miss Middleton," said Ross, "remember the next waltz is ours," and he bowed himself from her presence, inwardly chagrined at leaving her with so handsome and agreeable a man as Esmond, and mentally wondering why Esmond had not told him that he knew Irene Middleton. It had not occurred to him that he had not mentioned her name, in speaking

Left to themselves, Esmond turned to her quickly, "It is warm here," he said, "and there is some little time yet before that waltz, will you try an ice?"

"It is warm," she answered. I shall be grateful for it."

He offered her his arm; she placed her little white hand upon it and they walked off The next half hour that followed passed

like a dream to Esmond. By tacit consent neither of them made the slightest allusion to that past which both would fain forget. For the first time in months, smiles came to the lovely crimson lips as she listened to Es-

He was a young man particularly gifted, clever and quick of comprehension; he had the great gift of understanding character, and adapting himself to those with whom he was brought in contact. Never before had he exerted himself to interest and please as he did to-night. Can it be wondered that he took Irene's imagination captive, and charmed her artistic beauty-loving mind? She sat with clasped hands, looking into his noble, earnest face, drinking in each word as it fell

Suddenly the soft, sweet strains of the 'Soldaten Lieder' floated through the open doors. Esmond looked at his companion. "This is Mr. Ross' waltz with you," he said, "he will be looking for you with the utmost impatience; I sincerely beg your pardon for spiriting you away from the ball-room and keeping you away so long. If I were fond of quotations I would use one now, Miss Middleton, I could say, 'with thee conversing

I forget all time." He offered her his arm, her face flushed as she took it, and she was vaguely conscious

that her hand trembled. What did it mean? Why should her hand tremble as it touched his arm. "What is g to me," she thought, impatiently, "surely I am not growing, awkward and nervous." She tried to throw off the feeling, she looked up at him with some careless, laughing remark, and then as suddenly dropped her eyes again, while a hot flush seemed to burn her face, for he was looking at her earnestly and something in that gaze made her slumbering heart beat as it had never beaten before. They went through the long suite of brilliantly lighted rooms, coming at length face to face with Mr. Ross, who looked exceedingly perturbed as he saw her for whom he was searching, slowly advancing, leaning upon

Esmond's arm. "I owe you many thanks, Mr. Esmond." said Ross, stiffly; "you knew I would be searching for Miss Middleton, that I was to return to her; your forgot all about it."

"I am sorry, I did forget," said Esmond, flushing and smiling. "I knew you would," said Mr. Ross, driven to desperation by the state of affairs. As he looked at Esmond's handsome de-

bonair face he'said to himself, "Surely he has

not fallen in love with her too!"

"Before I relinquish you, let me ask for the waltz that follows this, Miss Middleton," said Esmond, eagerly, and Ross bit his lip with fierce vexation and jealously as he saw her hand Esmond her dainty tablet and he jotted

down his name, returning it with a low bow- the great world. The remainder of the evening passed like a dream to Irene Middleton, the homage offered knew,' thought Irene, with a shudder. her, the countless compliments that she received, the music, the lights, and the flowers, were all parts of a confused dream from which shé did hot awaken, until Frederick Esmond with that waltz, a new life-drama was began. Victor Ross stood looking after them with darkening brow and compressed lips, "If he

The way in which they waltzed together who had once been such firm friends. was simply perfection, the very poerty of graceful motion; it was rather floating to the sweetest strains of music than dancing. Ross turned away with some strong muttered words between his teeth, vowing that he hated waltzing. He had never known a waltz so long

During the remainder of the evening both gentlemen lingered by the beauty's side; each ignoring the anygry looks of the other. 'If it is to be a drawn battle between us as to which will win her, so be it,' muttered Victor Ross, 'he will find out this much, I

CHAPTER XI.

will never give her up.'

FATE SETTLES THE MATTER. The grand ball was over at last, and an our later Irene was seated before the open window in her room, her lovely dark hair all unbound, falling in dark, heavy curls around her. She had laid aside her magnificent dress, and robed in a pale blue cashmere neglige, she looked even more beautiful than in full dress. The duchess had come in to say 'good night,' and ask her how she had nioved the ball.

'I cannot tell you how much I enjoyed it,' murmured Irene; I was sorry when it was all over, it seemed like coming from Eden back to this cold, bitter world,'

'I think, Irene," said the duchess, 'that some one helped to make it very pleasant for

'I had n great many very nice partners eturned Irene, her fair face flushing. 'We will not talk about it to-night, or rather, so early in the new born day; I see we are in the 'wee sma' hours.' glancing at the ormolu clock on the marble mantel; 'you will join me at 10 o'clock breakfast, and we will talk it over then over our chocolate,' said the duchess, kissing her. 'Good night, Irene and sweet dreams,' and with these words she

Irene must have been tired; but no sleep came to those dark, brilliant eyes; she crossed over to the window, drew aside the heavy silken curtains, and looked out at the stars

gleaming in the blue sky. 'For long months the face of Mr. Esmond has haunted me,' she murmured; 'now we have met again.'

Kinging like sweetest music in her ears was the sweet sound of his voice. How was it? She had heard many voices, yet the memory of one had never lingered with her before; not one accent, not one word was lost upon her, she thought him the kindliest gentleman she had ever met.

'Well, ' said the duchess to her nephew, when she met him in the corridor the next morning, 'How do you prosper with your wooing, my dear tellow?'

Ross thrust his hands deep into his pockets and gazed gloomily from the window. 'I do not prosper at all, 'he answered

rusquely. 'How do you expect me to stand any chance of winning so much as a glance from Miss Middleton, when you invite continually such fellows here to meet her as that detestible French count and-and-Esmond, who is known as one of the wealthiest and most eligible men in London, even without the titte which he disdains to wear. How do you expect me only a poor devil of a student, o stand any chance with such men.'

'I am sure you ought to hold your own against any of them, my dear boy,' declared the duchess, looking laughingly at the handsome, disconsolate young student, 'but there is one thing I would advise, Victor,' she went on, earnestly, 'and that is, never allow your impulsive affection to get the better of your judgment. If you see plainly that Irene prefers another to yourself, abandon the field gracefully, that is the best way.'

'Do you mean, give up the field easily? Stand quietly by and see another man woo and win the only woman I can ever love Such advice coming from a sensible woman amazes me. You can depend upon it I am not likely to do anything of the kind.' When Victor Ross sought Irene in

drawing-room that afternoon, he found to his dismay, Esmond was with her. A group of ladies and gentlemen were ex amining some fine engravings that had just arrived. Esmond and Irene were at the piane

quite alone by themselves. If he thinks to monopolize Miss Middleton's society after that fashion, he will find he has much difficulty to face, thought Ross, biting his lips with vexation.

He crossed directly over to the piano, and after bowing stiffly to Esmond took his place at the other end of the instrument, and remained there with a pertinacity that was more than annoying to Esmond.

Irene tried to distribute her words and her smiles equally between the two gentlemen Neither would address one word to the other but directed his conversation directly to her. 'Will you sing to me?' asked Ross, deermined that his rival should not have one noment's conversation with her if he could prevent it; already he had begun to call Es-

mond that in his own mind. 'Certainly,' replied Irene, running her slim, white fingers over the keys, murmuring more to herself than to either of them, 'I wonder what it shall be.' "Sing 'My Queen;" that is my favorite

song," said Victor Ross. 'Sing 'I have loved thee since the day I met thee first,' 'said Esmond, in a low vibrating voice. Both gentlemen had spoken to gether, the situation was therefore embarrass ing to Irene. She was too gentle to willingly offend either.

'Suppose I sing you my own favorite,' she aid, and both eagerly assented. 'I read these beautiful words the other day. she went on, 'and they haunted me so, I set them to music and have been singing them

The song was a beautiful one and Irene ered, and his aid was of no avail as the sang in a clear sweet voice, that had an under-

tone of sadness in it: "There's an end to toiling some day, But its weary the waiting—weary! There,s a harbor, somewhere, in a peace

Where the sails will be furled and the ship will lay At anchor, somewhere, in the far away But its weary the waiting-weary!

"There's an end to the troubles of souls But its weary the waiting —weary! Sometime in the future, when God thinks

He'll lay us tenderly down to rest, And roses 'll grow from the thorns in the breast

But its weary the waiting—weary! "There's an end to the world with its stormy frown, But its weary the waiting—weary!

can drown, And where life's sad burdens are all laid down; A crown, thank God, for each cross a

There's a light somewhere that no dark

crown! But its weary the waiting-weary! 'Very beautiful, but very melancholy,' said a resolution urging the adoption of stand-Victor Ross, when the last note died away. | ard time in that town.

All music should be sad, replied Miss Midlleton, sadness is the key-note of nature, That sounds strangely from the lips of a oung girl, aaid Victor Ross. laughingly; what should you know of sorrow such as fills

The lovely face paled. 'Ah, if he but 'I have sung all my spirits away,' she said, but then, I always do.'

When she rose from the piano the two gentlemen rose with her; they could endure came to claim her for the promised waltz, and that she should leave them both together, neither would have left her first. There is nothing the world enjoys more than

a comedy of lovers. The world looked on asks her to dance again I shall hate him," with laughing eyes at the fierce dislike that was growing up in the hearts of these two, 'Which will she choose?' 'How will it end?' were the two questions people asked each other.

It was becoming a serious matter with both Esmond and Victor Ross; both loved Irene, and neither would yield in the slightest degree o the other.

Both decided on the same plan of action: to ask Irene to be his wife, thereby settling this bitter rivalry at once and forever. Both pitied his rival, being confident she would accept himself.

That very evening, fate settled the matter in a strange way for the young student, bringng his dream of love to an abrupt ending. He had gone out into the rose garden to enjoy a cigar in solitude under the trees. Tempted by the beauty of the night he sat ong after his cigar was finished, indulging in fanciful day dreams, dreaming of a bright future with dark-eyed, sweet Irene by his side. Planning how he should work for her day and night, of the name and fame he should build for himself, all for her dear sake.

It was a pity the poor fellow could not have freamt on forever thus, for those airy day dreams were destined to be his last.

He was startled at length by the sound of He did not care to be disturbed; he felt in WF Mitchell o mood to be amiable to any of the young C E Duffy adies, listening to their small talk. and being FCD Bristowe forced to pay idle compliments because they E H Murchie

Wiley. SEVERED THE JUGULAR.

A sad accident happened to little Charlotte Henverge, Wednesday at Montreal, which resulted in her death. The girl who was only about twelve years old, lived with her aunt and uncle, W. V. King. While hurrying out on an errand, she in some way fell through a glass door. Her aunt ran to her aid, but in her excitement fell downstairs with her. A boarder ran down and carried the little one across the street to a drug store, where there happened to be a doctor at the time. He found that the jugular vein had been sevgirl quickly passed away. Mrs. King was more frightened than hurt by her fall,

but she was greatly upset by the death of

There is a possibility that the fervor exhibited by all classes for the bicycle, carries with it an element of danger. Exin disease or in those cases where the muscular force is greatly reduced, the use of the wheel should be employed cautiously. The proprietors of the very well known remedy, Putnam's Corn Extractor, attribute the largeness of their sales not to the use of the bicycle by the people of Canada, but to the absolute certainty of their preparation to remove the most painful and obstinate corns in twentyfour hours. Putnam's Corn Extractor is

always certain, safe, and prinless. Try it. Word has been received at Moncton from Ottawa that the petition for a Scott Act repeal in Westmorland is passed, and

a writ for an election will be issued forth-The St. Stephen town council has passed

THE SMOKING CONCERT.

Given by the Bicycle Club Boys at their Club House Friday Night.

It was an Unqualified Success.

Boating Club, although young as an organization, have already placed the organization, have already placed the organization of the story. Mr. Kelly and his daughter finally organization of the story o public under obligation for two very in a nonchalant manner: "Why there's pleasant and successful entertainments. The club house was opened early in the autumn by one of the largest and most

The club house was opened early in the autumn by one of the largest and most

People have had \$40,000,000 left them by enjoyable balls and receptions ever given wealthy relatives." in the city, and last night the club again opened their handsome building for the exclusive enjoyment of their gentlemen friends. It was a smocking concert and fully deserved the name. Smoke, every dren were sixty-five the teething. If disturbed at the control of their children while teething. including William Kelly, were drowned. | papers. Enquiry was begun, and the son's story valued at \$15,000,000.

Some time after Peter's death, the story goes, his brother William, who had come to America before Peter's departure for Australia, learned of the existence of a will in which all the estate was bequeathed to his (William's) eldest child, Elizabeth. William's wages were enough for the support of his family and it is authoritatively asserted that when he first learned of this vast estate, he made no effort to secure it for his then infant daughter. Two years ago, however, he engaged an attorney, and it is declared that the enormous legacy will be placed The members of the Bicycling and at the disposal of the girl next week. AROOSTOOK GAME. The report of the Bangor and Aroostook Railroad relating to the amount of game shipped over their lines during the hunting season makes interesting reading. The figures, of course, relate only to such game as has been sent away, and bears no reference to the hunting doue by the "natives," which no doubt, would swell the figures to nearly double their present amount. The total number of deer shipped was 669; of moose, 24; of caribou, 10; of bears, 3; and an immense amount of small game, including ducks, partridges, etc.

I was Cured of Rheumatism in Twenty-

pan prices. It will pay you to do so. I, George English, shipbuilder, have lived in Chatham, N. S., over forty years. Last spring I took severe pains in my knee, which, combined with swelling, laid me up for six weeks, during which time I endured great suffering. I saw South American Rheumatic Cure advertised in The Chatham World and procured a bottle. Within twenty-four hours I was absolutely free from rheumatism, and have not been troubled with it since.
