In The Sunday World last week there appeared a letter signed "Hazel", containing the name and address of a man she thought should be in the Bantams' Battalion. The name and the address were cut out of the letter. Yesterday The World received a letter from a man who lives on Mechanics avenue, men-tioned in the letter, which follows:

Toronto, May 4.

Editor World: In reference to that letter about a likely recruit for the Bantams you published in last Saturday's Sunday World from Hazel, you said he lived on Mechanics avenue, but you did not state what number. Now I live on Mechanics avenue and have a bet on with a fellow that I work with. He seems to think it is me, and I say it is not. Now to settle this bet, which is, if it is me I will enlist with the 204th Battalion on Friday night. Now will you kindly publish the address of the likely recruit on Mechanics avenue in Friday morning's World, please?

I am a constant reader of your paper.

I remain yours truly.

The writer asks The World to give the name and address. The name was J. A. Bartiett, and the address, 26 Mechanics avenue. From the initials signed to the letter it looks as if "J. A. B." must enlist tonight.

As shown by the defenders of the measure, the allies will come in for a period of hard fighting in the west during the wait for Russia to develop her full strength by arming vast hordes of men, a process that has been much facilitated by the opening of her northern ports and the completion of additional railway facilities to these outlets and inlets.

In the meanwhile, while Russia is getting fully ready, the allies plan to hold the fort in the west by the defensive or offensive, as events may determine. Russian soldiers continue to pour into France; and they will be armed and equipped for the fighting of the summer. Conscription in Great Britain will have great moral effect.

Mr. Lloyd George, pointing out that all the allies were defending their countries by compulsory service, argued that if Great Britain had summoned men to her colors thruout the empire in the same proportion as as many men in service. He appreciated fully Great Britain's responsibilities in financing allies and in maintaining allies and in maintaining the trade as well as the transport difficulties, but, taking everything into account, Great Britain had still a substantial magnification. stantial margin of available men, and he wanted both Germany and the en-tente allies to know that if it would constitute the difference between vic-tory and defeat, between liberty and mon the whole of that margin to the colors to defend itself.

The official investigation of the working conditions that exist in munition plants here was concluded yesterday. The evidence obtained during the three days of the inquiry will be compiled and forwarded to the department of labor at Ottawa.

Today the members of the board will make an inspection of the local plants for the purpose of viewing the actual conditions of the workers.

WOODSTOCK INSPECTION POST-

Coroner Dr. Rickard last night conducted an inquest at Mimico into the death of William Blevins, the Grand Trunk employe, who met his death on the night of Wednesday, April 27, while walking on the Toronto-Mimico Suburban line by being struck by a car. The accident occurred about 9 o'clock in the evening. A number of witnesses were examined, and a verdict of accidental death was returned.

WOODSTOCK, May 4.—The big military parade of the 168th Battalion, arranged for Saturday, has been postponed for one week. Lieut.-Col. McMullen received word from military headquarters at London, refusing to the companies stationed at Ingersoil and Tilisonburg. They will come by foot, and the same program as previously arranged will be carried out. WOODSTOCK, May 4.—The big military parade of the 168th Battalion,

CHARITABLE WORK

Suffering Women Receive Medical Attention by Female Physicians.

Very few people in Toronto are aware that there is an institution in he city where women who are too poor to pay for medical services can be treated free by duly qualified physicians of their own sex.

Ten months ago a hospital was commenced at 125 Rusholme road by a number of public spirited men and wo-men, which was to be maintained solely for poor people. Gradually the number of applicants has increased until the officials are unable to cope with the great number of women seek-

ing medical attention from female physicians, and an appeal is being made to the citizens of Toronto to raise \$120,000 for the establishment of a larger institution. This amount will provide for a hospital with 60 beds. of which 30 will be public ward beds It will also pay off the debt on the present building, which will then be available for nurses' quarters.

The present building is absolutely inadequate to provide for the great number who seek attention, as it has only 22 beds in all. It has been re-cognized by the Ontario Government and the city council as a general hospital, and patients are sent there by the medical offcer of health. There

are 12 public ward beds in this little building on Rusholme road, and since the hospital was established no less than 199 patients have been accommodated. Since January it has been necessary to turn away 23 women who sought admission

sought admission,
It is quite possible for women to obtain excellent treatment at other hospitais, but it is a well-known fact there are thousands of women who, in preference to confiding their troubles to strange physicians of the opposite sex at public clinics, will suffer for years in silence. It is for these people that the \$120,000 is required. The hospital in Toronto is the only one in Canada where such treatment can be obtained.

The committee in charge of the cam-aign are confident that the amount asked for will be raised within a very short time, when the citizens know for what purpose the money is intend-

Film Drama of Immortal Sacrifice to Be Shown in Aid of Irish Battalion.

In praising General Townshend for his gallant defence of Kut-el-Amara, Earl Kitchener, speaking in the house of lords yesterday, said that the surrender was made only as a result of starvation and that adverse elements alone denied success to the relief force. The floods had made relieving force to attack the Turks upon an impossibly narrow front. The dispositions for the defence of Kut-el-Amara were such that the Turks, tho numerically superior, were unable to penetrate the line of General Townshend.

Weather conditions in Armenia are now such as to preclude active Russian operations against Balburt and Erzinjan, excepting the capture of a series of trenches now and then. The Russians reported yesterday that they had beaten off Turkish attacks on both these wings, west of Trebizond, but as the Turks speak of submarine attacks on Russian ships laden with troops and supplies, it is supposed that the Grand Duke Nicholas is amassing a fresh army at this port for the coming campaign.

at the armorles next Thursday night, May 11. In preparation for this the 9th M.H. paraded over 400 strong last night under command of Lieut.-Col. J. H. Moss, O.C. The regiment practiced the march-past and presented a fine appearance. A route march, with brass and trumpet bands, was also held.

Artillery Practice.

Live shell srillery practice of the 48th and 54th Batteries featured the training activities at Exhibition camp yesterday. The targets were floating ones, placed 3000 yards distant in the lake. Two series of "indirect" rounds were fired by the 48th Battery, the shells being fired from behind the rifle butts, the obstruction preventing the sunners from seeing the targets. Lieut. H. W. Lärkin acted as battery commander during the first series, and Lieut. G. Crowther during the second. Fifty per cent. of the shots were effective. In the afternoon the 54th Battery, under Capt. W. Henderson of Brantford, held live shell practice for the first time since starting its training. The firing was "direct."

Then it would be within the competence of private members to suggest amendments, propose conditions or move for some declaration of principle. As it was, private members could do nothing but move to reduce or strike out the estimates. The novel procedure adopted by the government, he said, had been adopted for the purpose of choking off debate in the house of commons and preventing any considerations of the measures by the senate. The appropriations for the two roads would be incorporated as items in the general supply bill, concerning which the senate had no power of amendment. The senate, Mr. Graham said, would thus be compelled either to vote the money to the roads or disorganize the business of the country by throwing out the general supply bill and leaving the government without any money for public service.

leature in the spectacle of the closing hours of Kitchener Day campaign. Girls with smiling faces passed them out to the waiting men in khaki, who carried them to the counting quarters at the city hall, where tellers and bankers were waiting to tally the total and announce the returns.

Optimism had run high thruout the day and among the workers no discordant note was heard.

"I'm going to stick to my job till I sell my last button" was the stafement of a worker near the corner of Yonge and Richmond streets, and this sentiment was typical of the spirit that prevailed in every district of the city.

Downtown passengers found themselves greeted early in the day by pretty girls wearing the red scarf over their shoulder, which was their credential of office.

"Buy a button," said the fair seller as she stood at the corner or passed thru the car, and few were found with will or hardihood to refuse. "We sold out 2500 buttons before 2 o'clock," said Mrs. W. J. Lindsey, smiling broadly at the good news she had to communicate. This was at the corner of Queen and Yonge, and the bustiling campaigners were everywhere in evidence. All wore the decorations of

"Not for recruiting," said one man

"Not for recruiting," said one man with a grouch, but he was only the bad weather that made the springtime look more fair! He had his affinity, too, in the woman with the sharp tongue, who told a nice girl who held up a button, "You ought to be home knitting socks instead of out here before the public ust to get your name in the paper!" But the little girl didn't get her name in the paper, and neither did she mind the opinion of the grouch's affinity.
She just smiled and held up her tag if catalogs were interchanged the states and the province.

## The Women's College Hospital Has to Turn Away Many Patients

LREADY overcrowded and turning away ailing women who seek in vain for admittance—that is the pressing situation of the Women's College Hospital within ten months of its opening! In this highly-civilized community of Toronto no woman asks in vain for aid, however penniless she may be! The little band of women who started so modestly their little dispensary and hospital at Seaton Street-and were forced to enlarge the work—are to-day faced with a crisis they did not seek. Would that there were so little demand for its services that the call on behalf of the hospital could be postponed until after the war! But the NEED is here and NOW. And you may be very sure it will not be lessened when tens of thousands of soldiers return from the battlefields of the war,

## New Buildings Must Be Begun at Once

The Women's College Hospital is situated at 125 Rusholme Road, Toronto, and was opened July 17th, 1915; it has 22 beds in all. It has been recognized by the Ontario Government and City Council as a general hospital, and patients are sent there by the Medical Officer of Health-women too poor to pay for a doctor's services. This is the only women's hospital in Canada where poor women may be attended by physicians of their own sex.

There are 12 public ward beds in this tidy little hospital, but they have accommodated no less than 199 patients during the past 10 months. Since Jan. 1st, 1916, however, it has been regretfully found necessary to turn away twenty-three poor suffering women who applied for admission. And remember, that nowhere else in all Canada could these disappointed women secure that special attention by their own sex in a public ward which meant so much to them.

Dispensary at 18 Seaton Street.

One woman waited many hours at a critical time for a bed to be vacated for her.

Doubtless these poor women could turn to the public wards of other hospitals, where efficient treatment may be had. But at what a cost of mental agony even to those who are brave! For it is well known that many suffering women, through inherent timidity, will endure their troubles in silence rather than confide them to a strange physician of the opposite sex at a public clinic. There are cases on record of women who have suffered for twenty years until this women's own hospital released them from their

Think of the poor nervous women who simply cannot face that which, to them, is an ordeal more terrible than the ailment that is dragging them down. They cannot summon to their aid a courage which Nature did not provide them with. They are helpless.

Silence is sometimes more eloquent than Demos-thenes! These women suffer in silence for years how often until it is too late.

## \$120,000 to be Raised-Will YOU Help?

\$120,000 will provide for a hospital with 60 beds, of which 30 will be public ward beds. It will also pay off the debt on the present building and leave the present building available for use as nurses' quarters.

No matter whether you are in sympathy with women's hospitals, or not, you will help, will you not? for the Women's College Hospital will release namy beds in other hospitals on which the pressure at times very great.

The women who come to the public wards of the Women's College Hospital to-day, too often in vain, are those who have given us more soldiers than any other class. What are we doing for them? They are people who have nothing left over to pay for hospital treatment after providing living expenses. They must not be refused that hospital accommodation in the public wards of the Women's-College Hospital which means everything to so many women. Does chivalrous Toronto manhood think that a dozen hospital beds in all Toronto-in all Canada-are sufficient for the needs of women whose natural timidity demands this special service?

The late Dr. Bruce Smith, Inspector of Hospitals—the greatest authority on hospitals that Ontario has had for many years, was heartily in accord with the aims and objects of The Women's College Hospital. He had no hesitation in saying: "It is time that a city the size of Toronto had a women's hospital."

On the occasion of his personal inspection of the house and grounds at 125 Rusholme Road, Toronto, he said: "Although I would much rather

see you begin with a new building, this will do for a start, but I hope it will not be long until you have a new fireproof building. There is ample room here for it on the rear of the lot."

The directors of the Women's College Hospital appeal with confidence. The most careful and conservative estimate of the needs for the next few years show that the extension of the present buildings must be begun at once. But this does not mean that your generous subscription must necessarily be paid in full at this moment. Give all you can now-for it is needed-the balance can be distributed over two years.

The three-day whirlwind campaign to raise \$120,000 begins on Wednesday, May 10th. Teams of canvassers are now being organized, and will call upon you.

He would hold himself in readiness, however, to come to Ottawa whenever wanted Moved Adjournment.

When the commission adjourned

When the commission adjourned for lunch, Mr. Carvell proceeded to the parliament building and, as soon as the house of commons was summoned, at 2 o'clock, he moved the adjournment of the house for the purpose of discussing the question of enlarging the scope of the investigation. He said: "My reason for bringing the matter up is an incident that occurred this morning at the royal commission, when Mr. Johnston was prevented from cross-examining a witmission, when Mr. Johnston was prevented from cross-examining a witness because the scope of the inquiry was not sufficiently wide. When the commission reassembled at 3.30 p.m., Mr. Hellmuth put in evidence the letter of complaint addressed by Lloyd Harris and T. A. Russell to Sir Fobert Borden, in October, 1915. The letter rehearsed the history of the negotiations of the Russell Motor Co, with the shell committee. The allegations of the letters are already quite familiar to the public. One interesting familiar to the public. One interesting item was an offer by the Russell Company to make graze fuses for \$2.20. For these fuses the shell committee, on Jan. 19, 1915, agreed to pay the American Ammunition Co. \$3.72 per fuse. sum? Later on they cut the price down to Gen \$2.35. But the Russell Company has a contract for the same fuses at \$3.50.

per fuse, Mr. Hellmuth next read the reply of Col. Carnegie, to whom the prime minister referred the Russell-Harris letter.

20,000, or even a greater number if they ran night and day, provided, of course, that the sub-contractors did not fall down in their delivery of the component parts. The component parts were all manufactured by sub-contractors, but the International had an assembling and loading plant at Bloomfield, N. J. The fuse would compare favorably in character and quality with the time fuses being manufactured in England and the United States. The company employed about

A "Silly Contract."

Sir William Meredith called the attention of the witness to the fact that the International had not commenced to deliver fuses until about eight months after the contract was made, altho by the terms of the contract they were obliged to begin deliveries after a few months.

"It was a silly contract," Mr. Brown interjected. In his opinion, no company without a loading plant could safely contract to turn out time fuses under 12 months.

under 12 months: Mr. Justice Duff: Should not an ex-pert on fuses have known in June, 1915, that it would require a year for a company without previous experience to turn out No. 80 time fuses in commer-

cial quantities? Mr. Brown: I should think so, Mr. Brown said the International Company had done remarkably well, in view of the fact that it had to build and equip a loading plant and had no previous experience in the manufacture

of time fuses.

Any company in Canada could have taken the contract and could have done equally as well if they were willing to assume the financial risk.

Company Did Its Best.

Mr. Brown said that the American

He doubted the oft published statement that the Russell Co. were having the powers for the commission. tractors in the United States, Some contractors had to be employed because in the time fuses there were 42 competent parts, and in the graze fuses there were 17. At the time the contracts with the two American fuse companies were made, Mr. Brown said that neither company had a loading plant. The International had built a plant. The International had built a plant at Bloomfield and the American Affinunttion Co. had converted a factory into a loading plant at Fallsboro, Delaware. The latter company were also building and had just completed another loading plant at Baltimore. The international Co. had also erected two branch factories for the con-

struction of some component parts.

means over three million people, and added to them are four million more, who must look to food sent them from Canada, the States and South America, for their sustenance. Everyone who has reviewed the history of Belgium since the first of August, 1914, has been appalled at the terrible things which the Belgian people have passed thru at the hands of the enemy. Everyone has heard of the atrocities of the early days of the war, of the reign of terror in Belgian cities and country places, but these fade into insignificance before the great death shadow that now hangs over the entire populace—the possibility of death by starvation, an end ignominious, in view of the heroism of the soldiers of the little country, and a death reflecting discredit on the civilized world.

Belgium expects the worst from her chemies; from her allies she has the right to expect assistance. In view of this, the Belgian relief committee, 59 St. Peter street, Montreal, the one source thru which supplies can safely be transported to Belgium, asks Canadians to help bridge that three weeks, the end of which means starvation. The committee is asking Canadians to come to the rescue. A dollar means at loast starvation averted a month for one person. There are seven millions Belgium expects the worst from her one person. There are seven millions facing starvation, so much is needed, and Canada is asked to give generously in this hour of her prosperity.

CANADIAN OFFICER KILLED IN DUBLIN

Lieut. A. Lucas of Montreal Was Victim of Riots.

MONTREAL, May 4.—Word has been received here that Lieut. A. Lucas has been killed in the fighting at Dublin. When the war broke out Lucas went overseas and secured a commission with the King Edward Horse.

He was wounded while fighting in France six months ago, and sent to England. When he recovered he was sent to Curragh Camp, where he was stationed when the outbreak in Dublin occurred. No details of his death were contained in the cable.

BRITAIN MAY ADOPT DAYLIGHT SAVING PLAN

Asquith Will Set Aside Day in House for Discussion.

LONDON, May 4.—There now seems to be little doubt that Great Britain will follow the example of Holland and adopt the daylight saving system. Premier Asquith has promised to give a day for discussion of the question in the house of commons, while Home Secretary Samuel has written a long letter for publication strongly recommending the idea on the ground that it would be an important saving in fuel and illuminants. He points out that the government committee on the disposal of coal, the great railway managers, and chambers of commerce favor the reform. and circumstances to indicate that the government had been imposed upon by the three lowest tenderers, and would for that reason be justified in refusing to abide by the contracts entered into with Simpson with Simpson.

"The practice of applying to government contractors for contributions to the election funds of the party in power is vicious and inimical to public interest. In a vast majority of cases the contributors who makes such a contributor who makes such a contributions to the contributions to the contributions to the election funds of the party in power is vicious and inimical to public interest.

W. A. McConnell was refused an order for an injunction at Osgoode Hall yesterday afternoon by Justice Britton against the Township of Toronto and the Toronto Golf Club from allowing them to have a water flow run on to his property alongside of the golf grounds.

The action was heard in the County of Peel, and McConnell claimed that the defendants had diverted water from the course in which it wasted.

from the course in which it would naturally flow, and have caused it to flow upon and over his land, causing damages. His lordship found that the water flow had in no way damaged the plaintiff's property, and, in giving judgment with costs, stated that any future action which might arise would of course he at the party's own risk.

### **AGINCOURT WANTS** IMPROVED SERVICE

Growth of Village Demands Better Railway Accommodation.

### EARLY MORNING TRAIN

First Does Not Leave for Toronto Until Ten-To Further Movement.

Out in the Village of Agincourt they are taking up the matter of improved suburban railway service which is bound to follow the completion of the new C. P.R. uptown station in North Toronto, with the greatest enthusiasm and interest. The great need for improved railway service in Agincourt has long been felt in that rapidly growing village, and The World's story of Wednesday morning has set them thinking harder than ever.

The village is laboring under a great disability due to the fact that there is no early morning train service into the city, the first local train from the east reaching the village at 10 a.m. and another follows at 10.10. What the people of the village want is that one of these local trains shall be replaced by an earlier one preferably at 7.45 a.m.

But the big solution as the farmers and villagers of all that rich farming and dairy district see it, between the city and Agincourt, Whitby and Oshawa on the east, and the city and Streetsville on the west, is the inauguration of a suburban service running into the new terminal at North Toronto.

An imsuburban service running into the terminal at North Toronto. An terminal at North Toronto. An immense dairy business and other farm products will follow, to say nothing of the tremendous increase in the passenger

traffic.
"We are heart and soul with the will do all we can to further it, and will gladly meet with the Business Men's Association of North Toronto or any other," said W. H. Paterson, chairman of the Agincourt Village commission, last night.

### **GRADING OPERATIONS** BLOCK THOROFARE

Residents of Earlscourt Bitterly Complain of York Township

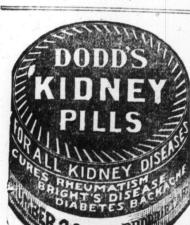

Council. Much inconvenience is being experienced by the residents of Boon avenue in the township owing to the blocking of the road by the York Township Council for traffic pending grading operations between the city limits and Teignmouth & Venue.

The road has been in a shocking conon from mud and water for the past be weeks, and no effort has been made to relieve the situation.

The neglect of garbage collection is also causing considerable annoyance to the ratepayers of the southern portion of the township. According to a statement of an Ernseliffe road resident, no garbage has been collected for several months, necessitating the burning of the accumulated matter by the residents.

A unique patriotic service has just been executed by the members of the Walkerton Chapter, I.O.D.E., in bringing out a special souvenir edition of The Walkterton Telescope, in honor of the 160th Bruce Battalion. This energetic chapter, which has been in existence since August, 1914, has accomplished many excellent works on behalf of the men in the trenches, and the wounded. During the first year, their efforts were confined to providing comforts for soldiers, and in 1915 activities branched out to the making of hospital supplies. At Christmas time the

### MORRISETTE PUZZLE TO LUCKLESS LEAFS

Birmingham's Crew Runless and Hitless for Eight Innings.

BALTIMORE, Md., May 4,-Joe Bir-

mingham's Leafs not only finished on the short end of a 3 to 1 score here today, but dropped down to a tie with Rochester for the cellar berth in the present International League race.

A piece of tough luck in the third inning helped Dunn's Birds to their victory, and helped wreck Toronto's badly demoralized hurling corps. Dye, who occupied the hill for the Leafs at this stage, had his throwing hand split in fielding Twombley's smash in the third, and Thompson, who was playing centre, had to rush to the hill. Thompson was formerly with the Los Angeles Pacific Coast League Club, and pitched a very creditable game, despite the fact that he went in cold.

Birmingbam's pets got away to a running start in the opening frame. Thompson walked, and moved to second on Truesdale's single to centre. When Brackett laid down a sacrifice, Thompson electrified the fams by scoring from second. His work was so daring that no play was made on him.

Things started nicely for the Leafs in the second. Thormahlen walked Martin, and Kelly singled to right. He was then derricked in favor of Morrisette, whom the Birds secured yesterday from Connie Back's Athletics. Right here the Leafs' chances of victory were given a severe setback, for Morrisette did not allow a single hit during the remainder of the contest.

In the Orioles' half of the second, Fewster walked, and took second on Ritter's single to left. Both runners moved up a base on McAvoy's sacrifice. Morrisette's double to left centre placed Dunn's crew in front, which position they maintained to the close. The Orioles' third and final score was registered in the seventh, due to Miller's double, Ritter's sacrifice and a single by Fewster.

Pitcher Devinney, who was let go by the Orioles seven days ago, was today signed by Manager Birmingham, and will accompany the Leafs will spend the day at New York, and will move down to Providence at night.

The Leafs' visit to this city was very upprofitable, three of the four games played being credited as defeats. Manager Birmingham is spending a small fortune in telegraph toils short end of a 3 to 1 score here today, but dropped down to a tie with Ro-chester for the cellar berth in the present

Then he takes a brisk walk—training for his flight with the English fighter. Senor Craven. In the afternoon he visits the music halls. In the evening he inhabits the music halls. He is not training as a fighter at a serious job does, but he keeps in exhibition condition.

The citizens accept him because he is famous, and stare in wonder at his stature, but they are not proud of him as they are of their real sportsmen, the bull-fighters. A bull-fighter is gentle; Johnson is brutal, because he fights a man. But Johnson sees more blood in one afternoon's "gentle sport" than he has scen in years of boxing. Six bulls on regular days, eight on holidays, and each

one efternoon's "gentle sport" than he has seen in years of boxing. Six buils on regular days, eight on holidays, and each buil responsible for an average of two dead horses before he is regarded as sufficiently dangerous for the clever-footed matador to bother with him.

Boxing Growing in Spain.

In spite of the indifference, boxing is coming slowly there. A club has been formed for its promotion, and exhibitions are held at intervals. They would not bass in the poorest boxing club in New York, and Johnson and his friends rail at the harmful effect of "ham-and-egg" boxers, but there is nothing better to be had.

When the tentanguage of two death to box the strength of the world is growing smaller for Johnson: if one of his favorite reminiscences is to be believed England was lucrative in spite of the war for a time, but:

Astor, Gallito and Belmonto, national favorites of Spain in the bull ring, is a new one proclaiming Jack Johnson "Campeon del Mundo" in the boxing ring. It gets as much space as do the others, because Richard Klegin is a good advertiser, but it is not as popular. Boxing is cruel and low caste sport, and the sporting writers resent the new intrusion, which will "lead the youth of the land astray."

In Barcelona, where, in April Johnson gave the first real prize fight ever presented in Spain, he was hailed as champion in a questionable line of endeavor. The writers of sport notices were sure that "when Barcelona has once satisfied its curiosity as to this thing called prize-fighting, it will never wish to see another."

Johnson feels differently about it.

Then comes the Johnson philosophy of what a boxer should do. The majority start too young, without sufficient training. He gets sapped of vitality before he really finds himself and then cannot do himself justice when his brain has developed properly. More supervision at the start, more training, more exhibition bexing and a much later start is the way that he plans to bring out a new negro champion.

### PITCHERS IN FORM IN THREE LEAGUES

Morrisette, Leonard, Johnson and Dell Turn in Sterling Performances.

Dutch Leonard came thru with another srand performance yesterday by letting the Yankees down with two hits. Boston got nine safeties off Caldwell and won,

When the Hustlers finally decided to win they did it in style. The Newark Indians thought that it was all over any time they stepped on the field until Leach's men hit town. Rochester's first win was an earnest one, and was Newark's first loss after six wins.

The great Christy Mathewson made his 1916 debut yesterday. The veteran pitcher was nosed out in a great teninning struggle with the Braves. Benny Kauff had a hand in Matty's undoing. In the 10th Christy walked Smith and Kauff dropped a fly. Hank Gowdy's single scored the winning run.

Walter Johnson had no trouble in downing the lowly Mackmen. He kept their six hits scattered, and the Senators hit two Athletic pitchers solidly.

Montreal and Richmond got started yesterday, but at the end of the second inning rain fell and stopped the battle.

The Dodgers made their lead in the National stronger by shutting out the Phillies. Moran's warriors only got three hits off Dell. The Leafs will have a rest today and open a four-game series at Providence on Saturday. They will then move on to Richmond before coming home.

Speaker's double helped the Naps to score their first run against Chicago yesterday. Cleveland scored a shut-out over the White Sox. The Hustlers slugged Enzman and Willer of Newark hard to win their first

Jim Lavender, the former Providence pitcher, weakened at Pittsburg in the 8th and the Pirates hammered out a vic-tory over the Cubs.

The Grays bunched hits in two innings and beat the Bisons one run. Billy Smith's Richmond club get In-fielder Joe Fautsch from the White Sox. The New York National League Club last night released Wm. Ritter, a pitcher, to the Rochester club of the International League, under an optional agreement. Outfielder Becker of the Leafs, has been released to the New London club-of the Eastern League. He lacks experi-

Jack Quinn, the former Rochester and Baltimore Federal pitcher, has wired Manager Birmingham asking for a trial with the Leafs.

Seventeen years with a major league club as a pitcher is some record. Christy Mathewson started his 17th year of boxwork for the Giants yesterday.

Thompson, a pitcher who can also play in the outfield, reported to the Leafs yesterday. Thompson got a chance to peddle his wares in both the outfield and the box. He did well on the mound and showed some clever base-running. Thompson came from the Los Angeles club of the Pacific Coast League.

The Cardinals' infield blew up in the ninth and Buck Herzog's Reds scored 3 runs and captured the game. Dye had his pitching hand split in the third inning at Baltimore yesterday and Joe Birmingham is another pitcher shy. Twombley's hard grounder split Dye's

Manager Joe Birmingham got into the game yesterday for the first time. Joe went to centre field when Thompson was called upon to pitch. The St. Louis Browns emerged from their long losing streak by nosing out the Tigers in a long-drawn out game. It went 13 innings, and good base-running by Sisler made the St. Louis victory possible.

Joe Birmingham is in a sad way for pitchers, and in an endeavor to plug up the hole caused by Dye's injury he signed Devinney, who was released by the Orioles last week, yesterday.

There are a lot of managers in the National League that are pretty sore on the world. Several of them have fought the twenty-one man limit until they are sick of talking about it.

Connie Mack has a much better ball team this year than he is credited with having, according to several of the eastern critics. The Mackmen have not had a chance to show that they are improved over last year because they have been up against the Red Sox and Yankees and the Senators all the time since the opening of the season.

Jimmy Callahan says he is satisfied with the Pirates. It is not hard to satisfy the former Sox leader, it would seem, if he thinks that his team is all right.

Eddie Ainsmith, the big catcher Grif-fith wanted to dispose of last winter, is working his regular turn for the Sena-tors again. He has always been the man to hold Johnson's speed delivery and is doing the usual stunt again this year. Cal Brown, former Mack and Yank, is with the Memphis nine.

### BASKETBALL

The final games in the Elementary Hitand-Miss Basketbull League at Central "Y" were played last night, when two good games were played, as the championships hung on the final results of both games.

The first game brought two very even teams together when Winfield, the league leader, met Lickers' team. Both teams played good, fast ball, checking back hard. Half time saw the game even, 2-2, and after playing the second half the same was still a tie, 4 all.

The second game was closer than the score indicates, Scott's team playing McMinn very close. Half time also saw the teams tie, 2 all, but after the rest Leverty, for the latter, got away from his check for 4 baskets, making the game sure. sure.

Stock Exchange Continues in State of Nervous Sus-

GAINS FAILED TO HOLD

Coppers, War Shares Higher at Times and Then Receded.

NEW YORK, May 4.—Practically the same influences that have recently tended to curtail trading and depress prices were operative again today. The cumulative perplexities resulting from the situation between Washington and Berlin kept Wall street in a state of nervous suspense. This feeling was intensified by the circulation of circumstantial rumors, some of which were obviously of bearish origin.

Dealings were light and narrow from the outset, the intermediate period being dull to the point of absolute apathy. Early prices were irregular, but manifested underlying firmness, until heavy selling of Mercantile Marines served to undermine the entire list. The further decline of marines was naturally associated with the dissatisfaction expressed at the proposed readjustment plan submitted by the preferred shareholders' protective committee.

tyre Mill today. A little ore from the Jupiter was previously tested, but operations are now in full swing.

Dome Lake Vein.

The Dome Lake Mill will be running London Letter Suggests the Pub-Friday or Saturday. Under tests of several hours it has run at the rate of over fifty tons a day and is giving an extraction of over 95 per cent., a saving of more than 15 per cent. A new vein was struck by diamond drilling from the 180-foot level. It is about two feet wide.

### STANDARD STOCKS HAD AN OFF DAY

Reactionary Tendency Thruout List-Prices Down to Lower Levels.

The general tendency of mining stocks at the Standard Stock Exchange yesterday was reactionary and declines in prices thruout the whole list, with but one or two exceptions, took place. The volume of business, too, fell off considerably, transactions for the day amounting to 193,948 shares.

Both Porcupine and Cobalt stocks came in for continued profit-taking, and to this was ascribed the weakening trend. In the Cobalt list this influence was accentiated by the decline in silver of 3.8 from the previous day's record at ?71-4. The feeling pervading the exchange is that when the present profit-taking period is ended another. the exchange is that when the present profit-taking period is ended another upward movement will be seen.

In the Porcupine stocks Dome Extension sold up to 36 1-2 and reacted to 35, closing at the latter figure. Big Dome, in sympathy with the break at New York, dropped from \$26 to \$25.50. Hollinger also was easier, selling from \$29.25 down to \$28.75. McIntyre was the firmest stock in the gold issues.

was the firmest stock in the gold issues, yielding only one point and closing at 107. West Dome Consolidated was active around 22 1-2 to 28 1-2.

ciated with the dissatisfaction expressed at the proposed readjustment plan submitted by the preferred shareholders' method to shade an extreme decline of 2½ to 55½, or a total of 12½ from its record price of the early week, and the common fell 1½ to 23. The course of these stocks was in marked contrast to United Fruit, another shipping issue, which rose 4½ to 151½ on moderate but steady absorption. Reports of early developments favorable in fruit shareholders in connection with acreased earnings gained currency. The Mexican group supplemented yesarday's advances, Mexican Petroleum sifig 2½ to 101½, with more moderate lists for American Smelting and Greene Cananea Copper. War shares and allied issues, as well as coppers were it to 2 points higher at times, but receded in the flaal hour, when Union Pacific, U.S. Steel and other potential leaders were at their lowest, the market closing with a weak undertone. Total sales of stocks amounted to 515,000 shares.

Narrow changes marked the day's nominal dealings in foreign exchange, but these again favored the German market, marks advancing a fraction, while frances as well as sterling were inclined to shade. The Bank of England reduced its gold holdings by something over 37,000,000, but the Bank of France made a nominal gain in its item, incidentally increasing its discount bills and advances.

Bonds were irregular to heavy. Total sales (par value), \$2,940,000.

### LOW GRADE ORES WILL INCREASE COBALT PRODUCTION

There are two things that will count materially in the increased output from Cobalt from now forward. First, large dumps of low-grade ore which have hitherto been neglected because of the low price of silver, and, second, two new processes which will lower the cost of smelting considerably. One Cobalt mine is already having a smelting unit of the new process constructed at a small cost. This process is a revolution in the smelting business, as it not only cheapens the cost, but secures a much higher percentage of silver values from the ore. In the latest London circular dated April 19, Messrs, Pixley & Abell, bullion brokers, say of silver: "The rise has been caused by the continuous demand for home and continental coinage, helped also by Indian and speculative purchases. In addition to these factors further strength has been added to the market by the small supplies from America and the consequent determination of producers to sell sparingly. A remarkable feature of the market has been that the recent advance in the quotation has not attracted larger sales; on the contrary, the supplies have fallen off. The disorganized state of affairs in Mexico has quite likely prevented a large output of silver from that country, but apart from that this factor is a good indication of the general opinion of the future of silver." Yesterday's price for silver was 76 7-8 cents, or a decline of 3-8 cents from the previous day, but as this is the first reaction since 70 cents was recorded, it has little significance. A matter of much importance to the mining securities is the knowledge that new financial interests are making enquiries into vanious properties and are quietly accumulating shares that might ultimately lead up to a change of control. This might easily bring an excited market should the news leak out. One of the factors which is having a good deal of influence on the price of silver is the big demand for silver-plated goods. The American firms manufacturing these goods have already advanced their prices 10 per cent.

### PRICES OF WHEAT **AGAIN SENT BACK**

Gloomy Views of Situation Between U. S. and Germany Held.

CLOSED AT LOWEST

Reports About Berlin Note Caused Buyers to Sell Out.

CHICAGO, May 4.—Pessimistic forecasts of the reply of Berlin to Washing-

ton led to a sharp setback today in the walue of wheat, and so, too, did reports that civilians were leaving Metz. The market closed heavy, 2% to 3c net lower, with May at \$1.13\% and July at \$1.14\%. Corn lost \% to 1\% to 17c.

In provisions the outcome was an advance of 2\% to 17c.

Closing prices in the wheat market were at virtually the lowest point of the day. Sentiment had become increasingly bearish almost from the outset, the only notable rally being a brief one soon after the opening. At first the pressure to sell appeared to result chiefly from better weather for seeding in the northwest and from attention to the fact that the world's available supply total had exceeded all previous records. It was not indeed, until after adverse reports about the German note began to circulate that owners of wheat undertook to unload in earnest. Subsequently rumors of peace possibilities grew out of the advices regarding Metz and were the cause of additional selling. Assertions that reserves of wheat said to have been accumulated by the British Government would not come into competition with commercial stocks did not have much effect in stopping the descent of wheat prices here. On the other hand, the bulls were distinctly handicapped to some extent by the Kansas state crop report, which estimated the Kansas yield this season as 20.000,000 bushels more than was harvested in 1915.

Corn turned weak with wheat. The market was also bearishly affected by the excellent conditions for planting. Canadian oats were offered in New York at 4c under Chicago standards.

Higher prices on hogs gave the initial strength to provisions. walue of wheat, and so, too, did reports that civilians were leaving Metz. The

ON MONTREAL MA ON MONTREAL MARKET

MONTREAL, May 4.—The local market took on a brighter appearance today as a result of the strong demand for a number of special stocks, notably Scotia, Steel of Canada and Smelters. Scotia led the list in activity as well as strength, upwards of 3000 shares changing hands on an early rise of 4 points to 113%, or more than 3 points above the previous high of many years, and a subsequent reaction to 111. The close was firm at 111, 2% below the best of the day. Steel of Canada rose to 59%, but fell to 58 later. Smelters rose 1% to 40%, a new high mark, and closed 1% up at 404. The enlarged demand for Scotia was

### **NOVA SCOTIA STEEL** RISES FOUR POINTS

New York Buying Gives Shares Cobalt and Porcupine Stocks Buoyancy-Market Has Few Other Features.

The Toronto market was stimulated esterday by a renewed demand for some of the metal stocks. Nova Scotia Steel was the feature, with almost a four-point rise to 113½. Much of yesterday's buying of these shares here and in Montreal was reported as emanating from New York. American financiers have taken an interest in the company which is transfer. the company, which is known to be doing a phenomenal business, and it is believed that the new field of investment will carry the price materially higher. Smelters was the only other active issue, the advance here being about a state of the company of the compa being about a point from the previous day. The other metal shares were quiet. Steel of Canada strengthened fractionally, but Dominion Steel was easier. Cement was stronger at 62½, and Brazilian and Steamships fractionally lower. The market continues to be influenced by Wall street nervousness and when the American market eased off in the afternoon, trading here became almost stagnant.

This stock is due for a good advance soon. Write for information regarding the COBALT STOCKS.

New York Influences Prices. Heron & Co. had the following at

MONTREAL, May 4.—In the early trading the local market was decided. J. P. CANNON & CO and active. Aggressive buying of Nova Scotia Steel started the whole market, Steel Company of Canada being particularly sympathe-Canada being particularly sympathetic. There were large buying orders in the market for Consolidated Smelters, which helped the general strength of the market. The New York market broke sharply between 1 p.m. and 2 p.m., and the afternoon session of the local market reflected the weak-ness from that centre by a weaker ness from that centre by a weaker market and a large part of the early gains was lost. Power, however, was conspicuously strong and the whole power group developed strength.

1102 C.P.R. BLDG. MONTREAL GRAIN AND PRODUCE. MONTREAL, May 4.—There was an improvement in the demand for Manitoba wheat from English buyers today, and on the decline in the Winnipeg market sales amounting to 300,000 bushels were effected. Locally coarse grains were quiet. Spring wheat flour was in fair demand. Milifeed active. Butter steady. Cheese firm. Eggs steady.

The enlarged demand for Scotia was accompanied by a revival of the early year rumors, that a stock bonus would be declared before long and a dividend policy inaugurated.

Detroit Power and the Steamship stocks were firm to strong. Quebec Railway, which fell back 2 to 25, and closed only 34 above the lowest, was the one pronouncedly reactionary stock.

Strength in the Canadian war loan was a feature of bonds. Small lots sold as high as 99 and board lots at 3314.

### STRIPED COAT LININGS EXTREMELY FASHIONABLE

Smart Spring and Summer Suits Made Pretty Inside as Well as Out.

### DAINTY SHADOW EFFECTS

And Many Clever Color Combinations Are Displayed in More Exclusive Models.

Stripes are most emphatic, even to linings. Practically every wardrobe boasts one costume or another that, when the lapels are turned back or the fronts pulled open, reveals a pretty, light-toned lining with a stripe in the shade of the frock used for the decorative pattern. Navy blue being the color paramount provides ample excuse for many effective linings in combination of navy and white. A smart little model in taffeta trimmed plentsously with navy gabardine showed, when the jacket blew open, a remarkably effective lining of soft white pussy-willow taffeta striped every quarter of an inch with navy half that width. At the peplum edges the stripes are run cross wise instead of long ways with excellent effect. Cross bar effects are also very popular. Light grey, cream, white and oyster tinted linings have bar designs in black, navy, chartreuse, deep rose, wistafia and tetre de negre. A very pretty separate coat in biege broadcioth had Oriental trimming bands, in which the brighter shades of blue and rose were daintly combined with dull gold. The lining in this model was a dull blue with broad hollow squares of rose double crossed with the gold threads. Then, of course, shot effects are numerous and very much in favor, featuring stripes as well. The shadow design is pretty—sometimes known as the broken stripe. A dull green soft satin lining with bright paddy green stripes half an inch in width looked remarkably well in a suit of deep orchid. Stripes in every color, as long as they do not blaze are decididely "a la mode."

### LARGE ATTENDANCE AT THE RUG SALE.

The exist age auction sale of L. Babayan's stock of Oriental rugs was
attended by a large audience of rug
buyers for the second time yesterday
afternoon. Amongst many rugs offered
and sold there was a number of fine
lerstan rugs, such as Royal Kirmanshah, Sarouk. Boukhara, also a large
number of antique and rare small rugs
which belonged to Mr. Babayan's private collection. This sale will be continued this afternoon at 2.30, and following days, at No. 34 King street east,
where a large number of rug buyers
are likely to attend the sale every day.

Work is progressing rapidly in con-nection with the eastern entrance for the Exhibition and the old bridge at the southern end of Bathurst street will be closed to traffic after to-day. All 'vehicles will be diverted over the tem-porary bridge erected by the city and the Grand Trunk Railway.

LONDON, May 4.—James M. Suilivan, of New York, until a few months ago American minister to San Domingo, has been arrested at Dublin in onnection with the rebellion. American Ambassador Page today made inquiries at the foreign office

concerning Sullivan's arrest.
Sullivan has been brought to England. Mr. Page asked what charge has been preferred against him, and what procedure will be taken.

correct it.

It is a simple matter to train the ears of a growing child to lie close to the head, for the cartilage is soft and pliable. After one has advanced beyond the period of early youth the cartilage become hard and unyielding, and it was considered that nothing short of a surgical operation would have any effect upon the protruding ears. But I am glad to say that I know of three different instances when this deformity was corrected without resorting to the surgeon's lands.

Months of patient treatment are resisted to reduce the distance of the cartilage become hard and unyielding, and it was considered that nothing short of a surgical operation would have any effect upon the protruding to three different instances when this deformity was corrected without resorting to the surgeon's lands to reduce the distance of the cartilage to reduce the distance of the cartilage is soft and the woman whose ears protrude should be most particular about the arrangement of her hair. The new hairdressing is all more or less high, but one with ugly ears cannot afford to expose them simply to comply with the fashion of the day.

It will be necessary for some woman to modify the hairdressing and partly cover the ears with the hair. Personally, I think that every woman should conceal at least the tips of her ears unless they are really beautiful, for it gives a softer line to the pro-

to the head. You can purchase such a cap at the pharmacy or make one yourself by sewing strips of inch-wide tape together in the form of a skeleton

are more important than many women think. A pair of well-shaped ears—not too large nor too small-shell-like in their pink—and—white transparency, and set close to the head, add a certain delicate beauty that every woman should desire to possess. Outstanding ears, on the other hand, are a deformity, and if this physical defect robs you of beauty begin immediately a treatment which will correct it.

A bandage of antiseptic gauze will also answer the purpose by strapping the ears close to the head. Take quite a large wide strip, long enough to pass about the head, over the ears and under the chin, several times. Pin the end securely on top of the head with safety pins. Bathe the ears first with quite warm—not hot—water, then rub them with heated almond oil. Then press the ears close to the head and hold them in this position with the bandage. If you follow these gin immediately a treatment which will correct it.

To Soften Profile-

Months of patient treatment are required to reduce the distance of the ears from the head, so you must eliminate the word "discouraged" from your knowledge.

Binding Ears Back.

The first step in the correction of protruding ears is to soften the cartilage and covering of flesh by rubbing them with almond oil, slightly heated. Then the ears must be bandaged close to the head every hight and during the day, when you are in the privacy of your bouddir or do not expect callers.

You can buy a practical cap formed of bands of tape arransed in such a manner that they strap the ears close
