Victoria University.

VICTORIA UNIVERSITY was founded by resolution of the Conference of the Methodist Church in Canada, held in Kingston, in August, 1830. The institution was opened for students on the 18th of June, 1836, with the Rev. Matthew Ritchie, M.A., as Principal. On the 12th of October, 1836, letters patent were issued by His Majesty King William IV., incorporating the institution as a seminary of learning for the Province of Upper Canada, under the name of "Upper Canada Academy."

In 1841, the Parliament of the United Provinces of Upper and Lower Canada, being now first constituted by Act of the Imperial Parliament, with authority to grant such a charter, at its first session, held in the city of Kingston, passed an Act to incorporate the Upper Canada Academy under the name and style of "Victoria College, with power and authority to confer degrees of Bachelor, Master and Doctor of the various arts and faculties," which Act was assented to by the Governor-General on the twenty-seventh of August, 1841.

On the twenty-first of October, 1841, the Rev. Egerton Ryerson, having been appointed Principal, opened the first college session under the enlarged charter.

In the year 1844, the Rev. A. McNab, D.D., succeeded the Rev. Dr. Ryerson as Principal, and occupied the office until 1849. At the close of his term the number of students in the college was 140.

In 1850, the Rev. S. S. Nelles, M.A., was appointed Principal, and addressed himself to the task of organizing and enlarging the College to the status and work of a University. In the year 1854-55, the Faculty of Medicine was added and established in Toronto. In 1860, the Faculty of Law was added, and in 1871, the Faculty of Theology.

In the year 1883-84, a commission, appointed by the General Conference of the Methodist Church, arranged for the consolidation of Albert College, Belleville, with Victoria College, Cobourg, and legal

effect was given to this consolidation by Act of the Legislature of Ontario, 47 Vic., chap. 93.

The corporate name was by this Act changed to "Victoria University." The government of the University was vested in a Board of Regents, Chancellor, Vice-Chancellor and Senate. To these bodies was given power to affiliate outlying colleges and full university powers in all faculties were continued. The Rev. S. S. Nelles, D.D., LL.D., as President, was *ex officio* first Chancellor, and William Kerr, Q.C., LL.D., was elected Vice-Chancellor.

In 1887, the Rev. S. S. Nelles, D.D., LL.D., died, and the Rev. N. Burwash, S.T.D., was appointed President and Chancellor.

Under the provisions of the present charter, the following Colleges are affiliated in Arts with Victoria College: Albert College, Belleville; the Wesleyan Ladies' College, Hamilton; the Ontario Ladies' College, Whitby; Alma College, St. Thomas; Columbian Methodist College, New Westminster, B.C.

On the twelfth of November, 1890, under the provisions of the Revised Statutes of Ontario, chap. 230, and the Acts amending the same, Victoria University was, by proclamation of the Lieutenant-Governor, federated with the University of Toronto.

By the provisions of the Federation Act, the President of Victoria University, a representative of the Senate of Victoria University, and five representatives of the graduates in Arts, become members of the Senate of the University of Toronto.

Six hundred and three graduates of Victoria University have been admitted to the standing and privileges of the degree of B.A. in the University of Toronto; two hundred and thirty-two to those of M.A.; nine hundred and sixty-three to those of M.D.; one hundred and twenty-five to those of LL.B.; and forty to those of LL.D.

On the first of October, 1892, the faculty of Victoria University occupied their new buildings in the Queen's Park, Toronto, and the federation of the Universities was practically consummated. The curriculum in Arts for all students of Victoria University is that prescribed by the Senate of the University of Toronto. The Faculty of Arts in Victoria University provide instruction in all subjects assigned by the Federation Act to University College. In other subjects the students of Victoria University attend the lectures and laboratory practice of the University of Toronto.

Regulations and Curriculum
in Arts.

GENERAL REGULATIONS AND INFORMATION.

Admission.

Students are admitted to registration in the Faculty of Arts on having passed the Matriculation examination prescribed by the University of Toronto, or on giving the Faculty satisfactory evidence of their ability to pursue the courses of study proposed. They are required to observe the general regulations of the University of Toronto, and of Victoria University in regard to attendance on lectures and examinations.

Examinations.

All students of Victoria University desiring to take the examinations in Arts will present themselves at the annual examinations of the University of Toronto.

The standing thus obtained gives the students of Victoria undergraduate rank in the University of Toronto as well as in Victoria University, and entitles them to compete for all University honors.

No student may present himself for any university examination subsequent to matriculation without producing a certificate of having complied with all the requirements of his college affecting his admission to such examination.

Scholarships, Medals and Prizes.

All scholarships and prizes of the University of Toronto are open to students of Victoria University on the general terms prescribed on pages 85-90. Whenever the winner of a scholarship is entitled to exemption from College fees, such exemption will be accorded in Victoria as in University College.

Various prizes and medals are open to students enrolled in Victoria University. For details see pages 90, 91 and 99.

Instruction.

Instruction is given in the various subjects of the Arts course by the Arts Faculty of the University of Toronto, and the Arts Faculty of Victoria University. In the division of the work of instruction between these faculties the subjects are assigned as follows:—To the Faculty of the University of Toronto: Mathematics, Physics, Mineralogy and Geology, Biology, Chemistry, History of Philosophy, Logic, Comparative Philology, Italian and Spanish, History, Political Economy and Constitutional History, Constitutional and International Law, Roman Law, General Jurisprudence and History of English Law; and to the Faculty of Victoria University: Latin, Greek, Ancient History, English, French, German, Oriental Literature, Ethics. Instruction in the theological options is given by the Theological Faculty of Victoria University.

Libraries, Museums, Etc.

The students of Victoria University have all the advantages of the following libraries, laboratories, etc.:

UNIVERSITY OF TORONTO LIBRARY, containing upward of 50,000 volumes, is supplied with a reading room, a periodical room, several seminary rooms, etc., and is provided with the standard and current literature of all subjects taught in the University.

VICTORIA UNIVERSITY LIBRARY consists of a working collection of some 10,000 volumes in the English, French and German languages and Literatures, History, Philosophy, and the various departments of Theology. The Library is one of reference, and includes the loan of the Literary Society collection and a private library. For the list of Donors for the present year see Appendix.

The LABORATORIES in the various Departments of Science are well supplied with apparatus for work in the departments, and are situated in the buildings devoted to the subjects.

The MUSEUMS contain collections of specimens in Biology, Mineralogy and Ethnology arranged for purposes of instruction.

In addition to the collections of the Museums of the University of Toronto, there is in Victoria University a museum that is of particular value in the department of Mineralogy.

Student Societies.

Various societies and associations, both of young men and of young women, have been organized for the promotion of Christian effort, social intercourse, literary and scientific activity.

The UNION LITERARY SOCIETY, a reorganization of two older societies, meets each week in literary session, organizes public entertainments, and keeps furnished a well-provided Student's Reading Room. The Society publishes *Acta Victoriana*, a paper devoted to literature and college affairs, each month during the Collegiate Year. The members of the Society, assisted by graduates and friends, have furnished Alumni Hall, where their meetings are held.

The WOMAN'S LITERARY SOCIETY which meets every two weeks has kindred aims.

The MISSIONARY SOCIETY has before it the object of supporting a missionary in Japan, assisted by the graduates of the University.

The Young Men's Christian Association is an active force in the college life, and meets twice a week in Jackson Hall.

Religious Services.

All students are expected to attend the public worship of God on the Lord's Day, at such churches as their parents or guardians may prefer. Morning prayers will also be held daily in the Chapel, at which all students are expected to be present.

Other religious services will be held at suitable times, to which all students are cordially invited.

Residence.

It is expected that a residence constructed upon approved modern principles, and affording healthful and comfortable accommodation for one hundred students will shortly be erected on the Victoria University grounds in the Queen's Park. In the meantime students are required to board in such houses as are licensed by the Faculty, except students residing with their parents or with friends designated by their parents or guardians. A carefully selected list of boarding houses where board and rooms may be obtained at prices varying from \$3.00 to \$5.00 a week, is prepared each year by the Young Men's Christian Association. Students will be expected to observe proper hours, and to maintain the conduct of Christian gentlemen.

REGULATIONS
 OF THE
 UNIVERSITY OF TORONTO.

Degree of Bachelor of Arts.

There are two ordinary modes of proceeding to the Degree of B.A., viz.: (1) by taking a Pass course; or, (2) by taking an Honor course.

Entrance.

Candidates may enter this Faculty by passing the Junior Matriculation examination or the Senior Matriculation examination (First year).

Candidates for Junior Matriculation must have completed the fifteenth year of their age.

All candidates entering at the Junior Matriculation examination must take the pass subjects in Latin, Mathematics, English, History and Geography, and in one of the following groups: (a) Greek; (b) French and German; (c) French, and either Physics or Chemistry; (d) German, and either Physics or Chemistry.

Candidates intending to take, during their University course, any one of the following honor departments, viz.: Political Science, Mathematics and Physics, Chemistry and Mineralogy, Natural Sciences, are recommended to take French and German at Matriculation, since these languages must be taken in connection with the above-named honor departments. For a similar reason candidates intending to take, during their University course, either the honor department of Philosophy or that of Oriental Languages are recommended to take Greek, French and German at Junior Matriculation.

All candidates entering at the Senior Matriculation examination must take the pass subjects in Latin, English, History, Mathematics, either Greek or French and German,* and either Biology or Physics, specified in the curriculum under the title of First year. Candidates who purpose taking the honor

* Hebrew may be substituted for French or German.

course in Philosophy are recommended to take French and German as well as Greek, in view of the course for Second year prescribed on page 29; and candidates who intend taking the honor course in Political Science are recommended to take French and German, either instead of or along with Greek, in view of the course for Second year prescribed on page 29. Candidates for Senior Matriculation may present themselves either in May—and compete with the undergraduates for honors and scholarships—or at special examinations in June and September, at which no honors or scholarships are awarded.

An undergraduate in the Faculty of Arts, in any University in Her Majesty's dominions, may enter by being admitted *ad eundem statum*, on special application to the Senate.

If such application be for admission to the standing of the Third or Fourth year in this University the Senate will, if it sees fit to grant the same, prescribe the subjects of examination in which such applicant shall be required to pass before proceeding to the Degree, having regard to the subjects in which he has already passed satisfactory examinations in his own University.

If such applicant be admitted to a lower standing in this University than he held in his own University, he may not compete for scholarships at the next ensuing examination; but if he obtain honors, he shall, at the next succeeding examination, enjoy the same rights and privileges with respect to obligatory subjects as an original undergraduate of this University who has passed an examination of the same merit.

The ordinary annual examinations for Junior Matriculation (both pass and honor) will commence in the beginning of July, and applications therefor must be sent to the Education Department not later than May 24th, except in the case of candidates for Scholarships, whose application and fee must be sent to the Registrar.

Supplemental examinations for Junior and Senior Matriculation will be held in the University about the middle of September, at which those who are rejected at previous examinations, as well as new candidates, may present themselves; but no honors or scholarships will be awarded at such examinations.

Candidates for entrance must produce satisfactory certificates of age and of good conduct.

The fee for the ordinary Junior Matriculation examination is five dollars, and for the Supplemental Matriculation ten dollars. The fee must be paid in each case when the application for the examination is made.

The fee for admission *ad eundem statum* is six dollars, and must be paid to the Registrar at the time of application.

Until the Senate by resolution otherwise determines, the standing of candidates who have passed, or who may hereafter pass, the examination of the Department of Education for First or Second Class Teachers' Certificates, is accepted *pro tanto* at any Junior Matriculation examination.

First Class Teachers' Certificates, or Senior Leaving Certificates, or certificates of having passed portions of the examination for such certificates, may be accepted *pro tanto* at the Senior Matriculation and First year examinations.

Teachers holding Grades A and B are allowed the options granted to honor men in the subjects in which these certificates have been granted; thus those having these grades in Mathematics will be recognized as in the honor department of Mathematics; those having Grade A in Natural Science will be recognized as in the honor department of Natural Sciences of the Second year, on passing the necessary additional subjects in the First and Second examinations; and those having these grades in English will be recognized as in the honor department of Modern Languages on passing in pass and honor French and German in addition to other necessary subjects.

The Examinations in Mathematics and Chemistry are not required of those who hold certificates of having passed the First examination in the School of Practical Science.

Candidates who desire to compete at the First year examinations for scholarships or relative standing cannot exercise the privilege referred to in the preceding two paragraphs.

Regulations Relating to all Undergraduates.

Undergraduates proceeding to a Degree are required to be registered either in University College or in a federating University—except in those cases in which the Senate, in consideration of peculiar circumstances, shall dispense with attendance. All applications for such dispensation must be lodged with the Registrar before January 15th.

Every undergraduate not registered in University College, and who has not received such dispensation from the Senate for any particular year, must, before being admitted to examination, produce to the Registrar, from the Head of the federated University which he has attended during the year, a certificate of attendance and of compliance with the requirements of that University.

Notice of the time of commencement of the undergraduate examinations will be given annually in January.

Candidates in all the years are required to send to the Registrar of the University, at least six weeks before the commencement of each examination, an application for examination according to a printed form to be obtained from the Registrar, and such application must be accompanied by the fee of ten dollars.

Regulations Relating to the Pass Course.

The subjects to be taken by those pursuing the pass course, with the options permitted, are set forth in the following schedule :

FIRST YEAR	{ Latin ; English ; History ; Mathematics ; either Greek, or French and German* ; Biology or Physics.
SECOND YEAR	{ Latin ; English ; History ; Philosophy ; Chemistry or Geology† ; either Greek, or French and German.*
THIRD YEAR	{ Latin ; English ; either Greek, or French and German* ; any two of the three departments—History and Political Science, Philosophy, Physics.
FOURTH YEAR	{ Latin ; English ; either Greek, or French and German* ; any two of the three departments—Political Science, Philosophy, Astronomy.

Undergraduates in the pass course in the Third and Fourth years may, in lieu of one or more of the subjects prescribed for each of these years, take certain of the following subjects, namely, Biblical Greek, Biblical Literature, Apologetics, and Church History, according to the following scheme :

THIRD YEAR.

BIBLICAL GREEK	{ May be substituted for the prescribed classical Greek.
BIBLICAL LITERATURE OR CHURCH HISTORY	{ May be substituted for the Modern History of the Political Science subject.
APOLOGETICS	{ An undergraduate who takes Philosophy may substitute Apologetics for Ethics.

FOURTH YEAR.

BIBLICAL GREEK	{ May be substituted for the prescribed classical Greek.
BIBLICAL LITERATURE OR CHURCH HISTORY OR APOLOGETICS	{ May be substituted for Political Science or Philosophy.

Undergraduates who exercise these options must present certificates of having attended lectures and passed examinations in the subjects so selected at an affiliated or federating College or University other than University College. The minimum for passing at such examinations must not be less than the minimum required at the University examinations of the same year.

Undergraduates of any year, who have been rejected, or who have by sickness, domestic affliction, or other causes beyond their control been prevented from attending the Annual examinations in May, may present themselves for examination in September, at the time of the Senior Matriculation exam-

*Hebrew may be substituted for French or German in each of the four years.

†Pass candidates who take Biology in the First year must take Geology in the Second year, and those who take Physics in the First year must take Chemistry in the Second year.

ination; but candidates who have failed to attend at the May examinations, must prove to the satisfaction of the Vice-Chancellor, before presenting themselves in September, the existence and sufficiency of the alleged cause of absence, and all such cases shall be subsequently reported to the Senate.

The name of a Pass candidate in Arts may be allowed to appear in the class lists of his year, provided there are not more than two subjects in which he has failed. These subjects may be among the obligatory subjects of the year, or they may be subjects attempted at a previous examination or examinations.

An Honor candidate in Arts may be starred in one, but not more than one, of his Pass subjects on like conditions.

Candidates who have failed in one or two subjects, and who in consequence have been starred in those subjects, may present themselves for examination therein either in May or September, but on their presenting themselves, they shall be entitled to examination in those subjects only in which they have been starred.

A student who has been pursuing the pass course, but who has also succeeded in taking honors in some department in any year of his course, may apply to the Senate to be permitted to take such honor course, as if he had originally entered thereon; and such application may be granted, the Senate having due regard to the subjects on which he has already been examined.

Candidates in pass subjects in the Faculty of Arts shall be arranged in the annual class lists in three grades, A, B, and C; the minimum for Grade A shall be 75 per cent. of the marks, and for Grade B, 50 per cent.; all who pass with less than 50 per cent. shall be placed in Grade C.

Term Work in the Pass Course.

Reports of attendance at pass lectures in the First and Second years shall be made in all departments except those of Chemistry, Natural Science, and Physics, and marks for such attendance shall be assigned in connection with the May examination as follows:

For attendance at four-fifths and over	20	marks.
“ “ “ two-thirds and over	13	“
“ “ “ one-half and over	7	“

No student receiving less than one-half the lectures shall receive any marks for attendance.

Reports on term pass work in the First and Second years shall be made in all departments except those of Chemistry, Natural Science, and Physics. In the department of English four essays at least shall be required during the session from each student; and the reports on term work in that department shall be based on the essays. In other departments the report on term work shall be based on those parts of the work which the professor or lecturer may deem most appropriate as tests of proficiency. The maximum number of marks to be assigned for term work in connection with the May examination shall be thirty.

Students to whom the foregoing regulations apply must obtain on the May examination at least thirty-three per cent. of the examination marks; and must also obtain at least thirty-three per cent. of the aggregate number of marks assigned according to the following schedule:

May Examination	100
Term work	30
Attendance	20
Total	150

The Senate may for good reason excuse non-registered students from attending lectures, and shall in such case dispense with the requirements hereinbefore stated in regard to term work save in the case of English.

The Senate may upon the report of the University or College Council, based on the recommendation of a Professor or Lecturer, excuse registered students from term work and from attendance at lectures in any one or more subjects; but no exemption from term work shall be allowed in the case of English.

Regulations Relating to the Honor Course.

In this course there are eight honor departments, viz.: I. Classics; II. Modern Languages; III. Oriental Languages; IV. Political Science; V. Philosophy; VI. Mathematics and Physics; VII. Chemistry and Mineralogy; VIII. Natural Sciences.

Candidates pursuing department II. are allowed to take either Teutonic or Romance languages in their Fourth year.

Candidates pursuing department VI. are allowed to take either Mathematics or Physics in their Fourth year.

Candidates pursuing department VIII. are allowed to take either Division I. or Division II. in their Fourth year.

An undergraduate is entitled to admission to the degree of Bachelor of Arts, if in each year of his course he passes the examination in the pass and honor subjects of one of these departments (except in the department of Political Science of which the honor subjects only are required), and also the Pass examinations in the subjects, and at the respective times mentioned in the following schedule:—

	Pass Latin, or Greek of the First Year	1st Year.
	Pass French and German of the First and Second Years	1st and 2nd Years.
	Pass Psychology of the Second Year.....	2nd Year.

Undergraduates in the honor departments of Philosophy and Oriental Languages may, in the Third year, substitute Biblical Literature or Church History for History. Undergraduates in the honor department of Philosophy may also substitute Biblical Greek for the pass Classical Greek (Plato) to be taken in the Third year, and Biblical Literature or Apologetics for the pass Economics of the Fourth year. Undergraduates in the honor department of Oriental Languages may also substitute Biblical Greek for the pass Classical Greek of the Third and Fourth years. Undergraduates in the honor department of Political Science may substitute Church History for the pass English of the Second year, and Biblical Greek for the pass French or German of the Third year. Those exercising these options must present certificates of having attended lectures and passed examinations in the subjects so selected at an affiliated or confederated College or University other than University College. The minimum for passing at such examinations must not be less than the minimum required at the University examinations of Third year. These examinations do not count for honors.

In the honor department of Philosophy two distinct examinations are held upon the two systems of Philosophy taught in the confederating Arts Colleges.

A candidate for honors in any of these departments is required each year to take the pass papers set in the subjects of his department for that year, except in the department of Political Science, in which only the honor papers are required.

Candidates in the honor subjects of Physics, Chemistry, Biology, and Mineralogy and Geology, will be ranked in the class lists on practical work done in the laboratories of the respective departments during the session; and no candidate will be allowed to proceed to examination in any of these honor subjects unless he presents to the Registrar a certificate from the Professor that he has attained honor standing in the practical work of that subject.

In the Departments of Mathematics and Physics, Chemistry and Mineralogy, and Natural Sciences, each candidate for honors must attend all examinations in the practical work of the year in which he presents himself for the University Examination.

A candidate pursuing the honor course in any one of these departments may, after passing in honors the examination of any year, apply for leave to take the pass course during the remainder of his undergraduateship.

A candidate pursuing the honor course, who fails to take honors in his department, shall not be considered to have passed the examination of the year, excepting that in the departments of Modern Languages, Political Science, Philosophy, Chemistry and Mineralogy, and Natural Sciences, a candidate who in any one branch has failed to obtain the full percentage requisite for ranking in honors may, on the special recommendation of the examiners, be allowed to proceed as an honor candidate in the department in the following year. A candidate who has failed may at his option again present himself as an honor candidate at any subsequent annual examination; or, upon application to the Senate, may be permitted to take the ordinary Supplemental Pass examination in September, with such of the previous pass subjects as may appear requisite in view of the extent and character of the examinations he has already passed.

A candidate who competes for honors at the examination for B. A., and fails to obtain the requisite number of marks to entitle him to be classed in honors, may, on the recommendation of the examiners, be awarded a degree without honors; it being at the option of the candidate to accept the award of such a degree, or to wait until a subsequent examination, and again compete for a degree in honors.

An undergraduate who has obtained honors in any one of these departments may transfer himself to any other department, and proceed therein, but as a prerequisite to obtaining the Degree of B. A., he must during his course have passed the examinations in pass subjects annexed to the honor department to which he is transferred.

Regulations Relating to Students, Terms, and Examinations.

Students.

1. The regular students include undergraduates of the University, and matriculants, i. e., students who, though they have not passed the prescribed matriculation examinations, are taking the full undergraduate course.

2. Matriculated students are required to attend the lectures and examinations on all subjects necessary for students of their respective standings. Certificates of attendance, during one or more academic years, will be given to those matriculated students who have been regular in their attendance on the required lectures, and who have passed the prescribed examinations.

4. All interference with the personal liberty of any student, by arresting him, or summoning him to appear before any tribunal of students, or otherwise subjecting him to any indignity or personal violence, is forbidden by the Council. Any student convicted of participation in such proceedings will forfeit the certificate required for admission to the University Examinations, and will render himself liable to expulsion from the University.

5. Occasional students may be admitted to lectures on application to the President.

6. Certificates of attendance on lectures in any department during an academic year, may be given to occasional students who have been regular in their attendance, and who have also passed the examinations in such department.

Terms.

1. The Academic Year consists of two terms; the first (*Michaelmas*) extending from October 1st to December 23rd; and the second (*Easter*) from January 2nd to May 31st.

2. The term will not be allowed to students who have been reported to the President by any of the Professors as neglecting to attend the required lectures, or have not conformed to the statutes and regulations of the College, or have been reported to the Council for bad conduct.

Examinations.

1. Matriculated students are required to attend all examinations prescribed by the Professors and Lecturers in their special departments.

2. Prizes and honors are awarded on the recommendation of the Professors and Lecturers, in accordance with the requirements prescribed by them in their several departments.

3. Occasional students are not required to attend the examinations, unless they are candidates for prizes or honors, or desire to obtain certificates of attendance.

Degree of Master of Arts.

Candidates for the Degree of Master of Arts must have been admitted to the Degree of Bachelor of Arts, must be of the standing of one year from admission to the Degree of Bachelor of Arts, and must have sent in an approved thesis upon some subject in one of the departments in the Faculty of Arts. The thesis must be sent to the Registrar not later than May 1st.

Admission "Ad Eundem Gradum"

A graduate in the Faculty of Arts in any University in Great Britain or Ireland (if his degree be not an honorary one) may be admitted to the same degree in the University of Toronto.

FEES.

I. UNIVERSITY OF TORONTO FEES.

General.

The following fees are payable :—

For Junior Matriculation.....	Five Dollars.
For Senior Matriculation.....	Ten “
For each Supplemental examination.....	“ “
For each examination after Matriculation	“ “
For change of Faculty.....	Five “
For admission <i>ad eundem statum</i>	Six “
For the Degree of B.A.	Ten “
For the Degree of M.A.	Twenty “
For admission <i>ad eundem gradum</i> (B.A. or M.A.).....	“ “
For admission to a higher year on the certificate of the Head of an affiliated College.....	Five “
For dispensation from attendance at lectures in an affiliated College.	Two “
For certificates of Honor, each	One “

Matriculated undergraduates who are registered students of University College, or of any federating University, may attend lectures of University professors and lecturers in the Faculty of Arts without payment of fees, except those imposed for laboratory work; but such students must enter their names with the Registrar of the University.

Laboratory Fees.

“A course in laboratory work” means the continuous course of instruction in laboratory or practical work offered to the student in any one year in any of the undermentioned subjects, namely, Physics, Chemistry, Mineralogy and Geology, Psychology, Biology (including Physiology, Zoology, Botany, and Histology), and any other separate subject in which laboratory work is or may be prescribed.

“A partial course of laboratory work” means a special course, or any subdivision, complete in itself, of a course of laboratory work as above defined.

"A matriculated student in Arts" means a student who is matriculated in the University of Toronto, and enrolled in University College or a federating University, and whose name is entered with the Registrar of the University of Toronto.

"An occasional student" includes every student in whose case the Senate of the University of Toronto is by law authorized to determine fees for courses of lectures in the University of Toronto.

Laboratory fees shall be divided into, (a) Fees for practical instruction in the laboratory, (b) Charges for supplies.

Practical Instruction Fees.

The annual practical instruction fee for an occasional student attending a course, or partial course, of laboratory work shall be based on the lecture fee prescribed for occasional students by the Senate statute, namely :

For each course of not more than 15 hours	\$2 00
" " " between 15 and 30 "	3 00
" " " " 30 " 50 "	5 00
" " " " 50 " 80 "	7 00
" " " more than 80 hours	8 00

The annual practical instruction fee for an occasional student attending a course, or partial course, of laboratory work, shall be ascertained by adding for the purpose of calculation, to the number of lecture hours in the same course, or partial course, the number of hours of laboratory work therein ; and by rating the aggregate lecture and laboratory fee for that course combined accordingly, as for example :—

Assuming the course of lectures to comprise fifteen hours, and the course of laboratory work to comprise fifteen hours, making thirty in all, the total fee for the course of lectures and laboratory work combined shall be that prescribed above for thirty lecture hours, namely, \$3.

Charges for Laboratory Supplies.

Charges for supplies shall include laboratory materials and instruments used by or for the student, and ordinary wear and tear of instruments ; but not charges for waste, neglect and breakage, which are to be met out of a deposit, to be fixed by the Professor.

The annual supply charges for a matriculated student in Arts shall be according to the following table :—

	Chemistry.	Mineralogy and Geology.	Biology.	Physics.	Psychology.	Totals.

3. Every matriculated student in Arts shall, during his undergraduate course, pay, at the time of the entry of his name with the Registrar, an annual library fee of \$2.

4. No occasional or other student of any class shall be admitted to the library, save upon payment of an annual fee of \$2.

N.B.—All the above fees are payable in advance, and in the case of fees for lectures, if not paid during the month of October (or in the case of students attending in Easter term only, during the month of January), an additional fee of one dollar per month will be imposed until the whole amount is paid.

The fee for each examination must accompany the application to the Registrar.

The fee for admission *ad eundem statum*, for change of faculty, for admission to a higher year on the certificate of the Head of an affiliated college, for dispensation from attendance at lectures, or for certificates of honor, must be paid to the Registrar at the time of application.

II. VICTORIA UNIVERSITY FEES.

Every matriculated student in Arts shall, on each year's enrolment in Victoria University, pay a fee according to the following table:

FIRST YEAR.....	Any course or department	\$30 00
SECOND YEAR.....	Any course or department	30 00
THIRD YEAR.....	Chemistry and Mineralogy.....	25 00
	Natural Sciences	25 00
	Any other course or department	30 00
FOURTH YEAR.....	Chemistry and Mineralogy or Physics	25 00
	Biology	20 00
	Any other course or department	30 00

Students in Victoria will also be subject to the regular University of Toronto fees as on pages 33-37.

The fees payable for partial courses will be as follows :

English.

1. Composition :—Nothing but an essay will be required ; this will be dealt with rather as a test of the candidate's power of English composition than as a proof of his knowledge of the subject written upon. Legible writing and correct spelling and punctuation will be regarded as indispensable, and special attention will be paid to the structure of sentences and paragraphs. The examiner will allow a choice of subjects, some of which must be based on the following selections, with which the candidate is expected to familiarize himself by careful reading :—

1895 : SCOTT, Kenilworth ; GOLDWIN SMITH, Cowper (English Men of Letters Series)²⁸

*An Essay. A liberal choice of subjects will be allowed.

2. Grammar and Rhetoric :—The examination will be chiefly on passages not prescribed. A liberal choice of questions will be allowed to the candidate.

*Grammar, Philology, Rhetoric, and Prosody :—The examination will be chiefly on texts not prescribed.

3. Poetical Literature :—Intelligent comprehension of and familiarity with the prescribed texts will be required.

1895 : TENNYSON, Recollections of the Arabian Nights, The Poet, The Lady of Shalott, The Lotus Eaters, Morte d'Arthur, The Day-Dream, The Brook, The Voyage, The Holy Grail.

*Poetical Literature :—Intelligent comprehension of and familiarity with the prescribed texts will be required.

1895 : SHAKESPEARE, Richard II; CHAUCER, Prologue to the Canterbury Tales.

French.

Grammar.

Composition :—(a) Translation into French of short English sentences as a test of the candidate's knowledge of grammatical forms and structure, and the formation in French of sentences of similar character ; and (b) translation of easy passages from English into French.

Translation of unspecified passages from easy French authors.

*Grammar.

*Translation from English into French.

*Writing easy French from dictation.

*Translation of unspecified passages from modern French prose.

An examination on the following texts :—

1895 : SARDOU, La Perle Noire (the romance) ; DE MAISTRE, Voyage autour de ma Chambre ; *SOUVESTRE, Un Philosophe sous les Toits ; *Le Voyage de Monsieur Perrichon.

* Only for Candidates for Honors.

German.

Grammar.

Composition:—(a) Translation into German of short English sentences as a test of the candidate's knowledge of grammatical forms and structure, and the formation in German of sentences of similar character; and (b) translation of easy passages from English into German.

Translation of unspecified passages from easy German authors.

*Grammar.

*Translation from English into German.

*Writing easy German from dictation.

*Translation of unspecified passages from modern German prose.

An examination on the following texts:

1895: RIEHL, Culturgeschichtliche Növelen, viz., Der stumme Rats Herr, Der Dachs auf Lichtmess, Der Leibmedicus; SCHILLER, Der Taucher; *FREYTAG, Die Journalisten; *SCHILLER, Belagerung von Antwerpen.

History and Geography.

Great Britain and her colonies from the revolution of 1688 to the peace of 1815, and the geography relating thereto.

Outlines of Roman history to the death of Augustus, and the geography relating thereto.

Outlines of Greek history to the battle of Chaeronea, and the geography relating thereto.

*English history from the discovery of America to the revolution of 1688. Geography to illustrate the history read.

Mathematics.

Arithmetic.

Algebra. (Elementary rules; easy factoring; highest common measure; lowest common multiple; square root; fractions; ratio; simple equations of one, two and three unknown quantities; indices; surds; easy quadratic equations of one and two unknown quantities.)

Euclid, Bb. I, II, III.

*Plane Trigonometry; Trigonometrical ratios with their relations to each other; sines, etc., of the sum and difference of angles with deduced formulæ; solution of triangles; expression for the area of triangles, radii of circumscribed, inscribed, and escribed circles.

*Algebra: More thorough knowledge of the pass subjects, together with variation, progressions, permutations and combinations, binomial theorem, interest forms with annuities.

*Euclid, Bb. IV, VI, and Definitions of B. V.

* Only for Candidates for Honors.

Elementary Science.**Physics.**

An experimental course in (a) Dynamics, (b) Heat, (c) Electricity, including an acquaintance with the Metric System of Units. The courses are defined as follows :—

Dynamics : Definitions of velocity, acceleration, mass, momentum, force, moment, couple, energy, work, centre of inertia ; statement of Newton's laws of motion ; composition and resolution of forces ; conditions for equilibrium of forces in one plane.

Definitions of a fluid, fluid pressure at a point, transmission of fluid pressure, resultant fluid pressure, specific gravity, Boyle's law, the barometer, air pump, water pump, siphon.

Heat : Effects of heat, temperature, diffusion of heat, specific heat, latent heat, law of Charles.

Electricity : Voltaic cells, chemical action in the cell, magnetic effect of the current, galvanometer, voltmeter, Ohm's law, heating effect of the current, electric light, current induction, dynamo and motor, electric bell, telegraph, telephone.

Chemistry.

Definition of the object of the science, relations of the physical sciences to Biology, and of Chemistry to Physics, chemical change, elementary composition of matter. Laws of combination of the elements, atomic theory, molecules, Avogadro's Law. The determination of atomic weight, specific heat, atomic heat, nomenclature classification. The preparation, characteristic properties, and principal compounds of the following elements : hydrogen, chlorine, bromine, iodine, oxygen, sulphur, nitrogen, phosphorus, carbon, silicon.

*Elementary Inorganic Chemistry ; The practical study of the following elements with their most characteristic compounds, in illustration of the outlines of Mendelejeff's classification of the elements : hydrogen ; sodium, potassium ; magnesium, zinc ; calcium, strontium, barium ; boron, aluminium ; carbon, silicon, tin, lead ; nitrogen, phosphorus, arsenic, antimony, bismuth ; oxygen, sulphur ; fluorine, chlorine, bromine, iodine ; manganese, iron, gold, platinum.

*** Biology.****I. ELEMENTS OF BOTANY :—**

The examination will test whether the candidate has practically studied representatives of the flowering plants of the locality in which the preparatory school is situated, and representatives of the chief subdivisions of cryptogams, such as a fern, a lycopod, a horse-tail, a liver-wort, a moss, a lichen, a mushroom, and a chara.

* Only for Candidates for Honors.

A knowledge of structure is required, such as can be obtained with the use of the compound microscope. Attention will be given in the examination to drawing and description of parts of plants supplied, and to the classification of these. Comparison of different organs, morphology of root, stem, leaves, and hair, parts of the flower, reproduction of flowering plants, pollination, fertilization, and the nature of fruit and seeds.

2. ELEMENTS OF ZOOLOGY :—

Practical study of the subject as defined in *The High School Zoology*, but limited by the author's syllabus of work.

Pass Standard.

The percentage required for pass standing shall be 25 per cent. on each paper, and 40 per cent. on the whole examination.

Bentham, Fragment on Government, (viii.) Herbert Spencer, Man v. The State, (ix.) T. H. Green, Lectures on Political Obligation: Lectures A, M, N, in Philosophical Works, vol. II.

***GENERAL JURISPRUDENCE** : Candidates will be examined on the principles of Analytical Jurisprudence, and on the early history of legal institutions. They are recommended to read Holland, Elements of Jurisprudence; Campbell's Students' Edition of Austin, Elements of Jurisprudence; Maine, Ancient Law, and Early History of Institutions, Lectures XII, XIII.

***INTERNATIONAL LAW**.

***ETHNOLOGY** : With especial regard to its anthropological aspects.

***THE LAW OF CONTRACTS** : The Law of Contracts is a necessary part of the LL.B. course.

* Only for Candidates for Honors.

DEPARTMENT OF PHILOSOPHY.

Second Year.

†LOGIC : Formal and Inductive.

†PSYCHOLOGY : The Senses; the Intellect ; the Feelings.

Third Year.

PSYCHOLOGY : The Will.

ETHICS : Theory of Obligation ; Ethical Systems.

*PSYCHOLOGY : General.

*ETHICS : Theory of Obligation ; Ethical Systems ; Cicero, De Finibus, Bb. I, II (in the original).

*HISTORY OF PHILOSOPHY : Ancient and Mediaeval.

An alternative is allowed between the Honor Ethics, and either the History of English Law, or the History of Roman Law of the Third year.

Fourth Year.

HISTORY OF PHILOSOPHY : Modern (Descartes to Kant).

*HISTORY OF PHILOSOPHY : Modern.

*ETHICS : Aristotle, Nicomachean Ethics, Bb. I-IV, inclusive (in the original). To be taken with the work of the Department of Classics of the same year.

*METAPHYSICS : Constructive—Theory of Being and Knowledge. Kant, Prolegomena to Metaphysics, §§1-39 inclusive, in the original. (Not required of candidates who take Pass Latin instead of Pass German in the Second and Third Years.) Work of previous years.

NOTES.—1. Honor Candidates of the Fourth year, in 1895, are not required to take the Pass paper of the year.

2. Students who avail themselves of the Hebrew option in the first, second, and third years, may read Kant in translation.

DEPARTMENT OF MATHEMATICS AND PHYSICS.

Mathematics.**First Year.**

ALGEBRA : Simple equations of one, two and three unknown quantities ; easy quadratic equations of one and two unknown quantities ; elementary treatment of variation, proportion, and progressions.

† For Pass and Honors.

* Only for Candidates for Honors.

EUCLID: Bk. IV, VI, and definitions of B. V.

PLANE TRIGONOMETRY: Trigonometrical ratios with their relations to each other; sines, etc., of the sum and difference of angles with deduced formulas; solution of triangles, expressions for the area of triangles; radii of circumscribed, inscribed and escribed circles.

(a) Permutations and combinations (only those propositions that are necessary to an understanding of the binomial theorem); binomial theorem; elementary analytical geometry of two dimensions.

*Algebra, omitting Theory of Probability.

*Plane Trigonometry.

*Analytical Plane Geometry (C. Smith).

Second Year.

Elementary Treatment of Differential and Integral Calculus.

*Newton's Principia, Sec. I.

*Differential Calculus (Williamson).

*Integral Calculus (Williamson).

*Solid Geometry (C. Smith).

*Spherical Trigonometry (Todhunter).

*Theory of Equations. (For Reference—Burnside and Panton).

*A special paper on Physics, as prescribed in the Pass Course for the Second year will be set for Honor Candidates.

Third Year.

Elementary Treatment of the Doctrine of Probability.

Fourth Year.

Astronomy.

*Modern Geometry or Plane Astronomy.

*Higher Plane Curves.

*Higher Algebra.

*Differential Equations.

*Theory of Probability.

*Quaternions.

*Problem Papers of First and Second years.

NOTE.—Honor Candidates in Mathematics of the Fourth year are not required to take the Pass papers of the year.

Physics.

First Year.

Elementary Mechanics, Hydrostatics and Heat, only definitions and statement of principles, with easy illustrations, will be required.

(a) Optional except where specially prescribed.

* Only for Candidates for Honors.

Second Year.

Electricity and Magnetism.
Geometrical optics.

Third Year.

Elements of Acoustics.
*Analytical Statics (Minchin).
*Dynamics of a Particle (Tait and Steele).
*Newton's Principia, Secs. II and III.
*Geometrical Optics. (Course set forth in Prof. Loudon's Syllabus).
*Hydrostatics (Besant).
*Rigid Dynamics.
*Practical Work in the Laboratory.

Fourth Year.

*Elasticity.
*Hydrodynamics.
*Acoustics.
*Physical Optics.
*Thermodynamics (Clausius).
*Electricity and Magnetism.
*Method of Least Squares.
*Laboratory Practice (at least 150 hours).

DEPARTMENT OF CHEMISTRY AND MINERALOGY.

First Year.

*Elements of Analytical Geometry.
*Elementary Chemistry.

Second Year.

Elementary Chemistry.
*Elementary Differential and Integral Calculus.
*Physics : Theoretical and Practical, comprising Mechanics, Hydrostatics,
Heat.
*Inorganic Chemistry with Laboratory Practice,
*Mineralogy : Theoretical and Practical.

Third Year.

*Light, Heat, Electricity : Theoretical and Practical.
*Organic Chemistry with Laboratory Practice.
*Spectrum Analysis and Determinative Mineralogy.
*Crystallography.

* Only for Candidates for Honors.

Fourth Year.

- *History of Chemical Theory.
- *Advanced Inorganic and Organic Chemistry.
- *Physical Chemistry with Laboratory Practice.
- *Advanced Mineralogy and Crystallography.
- *Assaying (practical).

DEPARTMENT OF NATURAL SCIENCES.**First Year.**

- Elementary Biology.
- *Elementary Chemistry.
- *Physics; elementary course with laboratory work.
- *Practical work in Biological Laboratory; special attention will be given in the examination to accuracy and neatness in drawing.

Second Year.

- Elementary Geology and Physical Geography.
- *CHEMISTRY :—
Inorganic Chemistry.
Qualitative Inorganic Analysis.
- *BIOLOGY :—
Structure and classification of flowering plants, with special reference to the Canadian flora.
Zoology of Vertebrata.
Canadian vertebrate fauna.
For Laboratory Work: The candidate is expected to be familiar with the principal methods employed in the investigation of the structure of plants and animals, with the structure of the forms described in Huxley and Martin's Elementary Biology, and with the histology of the higher types of these.
- *MINERALOGY AND GEOLOGY :—
Elementary mineralogy.
Geology and physical geography.
Principles of crystallography.
Use of the blowpipe in the practical examinations of minerals.
Candidates will be required to present certificates of attendance at the laboratories of the University of Toronto as follows: of 100 hours in Biology, 120 in Chemistry, and 75 in Mineralogy and Geology.

Third Year.

- *CHEMISTRY :—
Organic chemistry.
Qualitative and quantitative analysis.

* Only for Candidates for Honors.

*BIOLOGY :—

Structure and classification of cryptogamic plants, with practical knowledge of typical forms of the various orders.

Vegetable physiology.

Zoology of invertebrata, with practical knowledge of typical forms of the various orders.

*MINERALOGY AND GEOLOGY :—

Economic minerals of Canada, with practical determinative work.

Paleontology (Invertebrata).

Candidates will be required to present certificates of attendance at the laboratories of the University of Toronto as follows: of 160 hours in Biology, 160 in Chemistry, and 100 in Mineralogy and Geology.

Fourth Year.

The candidate may select either of the following divisions for examination :

*DIVISION I.—BIOLOGY.

Classification and comparative anatomy of vertebrata.

Paleontology of vertebrata.

Embryology of vertebrata.

Physiology.

Histology.

Physiological chemistry.

Bacteriology in its biological and chemical aspects.

History of modern biological problems.

*DIVISION II.—GEOLOGY.

Crystallography and advanced mineralogy.

Geology of Canada.

Paleontology of vertebrata.

Mining geology.

Candidates will be required to present certificates of attendance at the laboratories of the University of Toronto of 400 hours in Biology, 200 in Geology.

* Only for Candidates for Honors.

Undergraduate Courses of Instruction in Arts.

The courses of instruction in the University of Toronto and Victoria University are based upon the Curriculum, as above (pp. 57-74). The following statements regarding the scope and aim of the courses are added in cases in which such additional information is considered desirable:—

Classics.

It is intended that students in this department should acquire at least so much knowledge of the language, the literature, the history and the philosophy of Greece and Rome, as is necessary for the comprehension of the prescribed authors; for this purpose, the following books are recommended for ordinary use or for occasional reference:—

Philology: King & Cookson (abridged edition); Delbruck, Introduction to the Study of Language (translation)—Ginn, Heath & Co., Boston; Whitney, Language and the Study of Language; Muller's Lectures on the Science of Language, 1st series; G. Curtius' Outlines of Greek Etymology; Curtius' Greek Verb; Leo Meyer's Comparative Grammar; Brugman's Comparative Philology; Henry's Comparative Grammar of Greek and Latin (Elliott's translation). *Grammar*: Jelf's Greek Grammar; Curtius' Student's Greek Grammar; Madvig's and Roby's Latin Grammar; Madvig's Greek Syntax; Goodwin's Greek Moods and Tenses (edition 1890), and Greek Grammar; Schmidt's Rhythmic and Metric. *Dictionaries*: Liddell and Scott's Greek (7th ed.); Andrew's Latin Dictionary; Harper's Latin Dictionary; Facciolati's Lexicon. *Literary History*: Mahaffy's Greek Literature; Jevons' Greek Literature; Teuffel's History of Roman Literature; Cruttwell's History of Roman Literature; Sellar's Roman Poets of the Republic; Sellar's Virgil, and Sellar's Horace and the Elegiac Poets; Abbott's Hellenica; Mure's History of Greek Literature; Donaldson's History of Greek Literature; Haigh's Attic Theatre; Moulton's Ancient Classical Drama; Campbell's Greek Tragedy; Verrall's Students' Greek Tragedy; Coleridge's Introduction to the Greek Classic Poets; Symond's Studies of the Greek Poets; Geddes' Homeric Problem; Jebb's Attic Orators; Wilkins' Homer and the Homeric Question; Jebb's Homer; Nettleship's Lectures on Latin Literature. *Biography and Mythology*: Smith's Dictionary; Seyffert's Dictionary; Frazer's Golden Bough. *Ancient Philosophy*: Zeller's Pre-Socratic Philosophy; Zeller's Socrates; Zeller's Plato; Zeller's Stoics, Epicureans, and Sceptics; Zeller's Eclectic Philosophy; Graut's Aristotle's Ethics; Mayor's History of Ancient Philoso-

English.

A. Pass Courses:—

FIRST YEAR.—An attempt is made to develop the appreciation of literature through the study of three selected plays of Shakespeare. The student is expected to master the explanatory notes of some good edition, such as Rolfe's, and the lectures are mainly devoted to exhibiting the beauty, effectiveness, and truth of the poet's works. Composition is taught through the study of good models of modern English prose (essayists of the present century), and through the writing and criticism of original essays. Four of these are required from each member of the class, and count as term work.

SECOND YEAR.—The study of literature is continued by the reading and minute examination of select works of some one writer (Scott in Session 1894-95). In composition special attention is given to structure,—the arrangement of thought, so as to make the composition an effective whole. Four essays (one at the end of each of the months October, November, January, and February) on subjects assigned by the instructor are required as term work. These are discussed in the class, and, in as far as time permits, privately with the individual writers.

THIRD YEAR.—The student is introduced to the study of the history of literature. The period selected extends from 1660 to 1793. The members of the class are required to familiarize themselves with a number of typical works of the time. The lecturer, besides attempting to help the student towards the understanding and appreciation of these works, treats the literature of the period as a whole, and exhibits the ideas and tendencies which stamp all the literature of the period with certain common peculiarities.

FOURTH YEAR.—In this year selected works of the nineteenth century are treated in a similar way, and their characteristics are contrasted with those of the preceding literary period. But more attention is given to the differences between individual writers and to the way in which the character of the man shapes his literary work.

B. Honor Courses:—

In the Honor courses the object is to broaden the knowledge and deepen the insight which the student may acquire in his Pass work, and further, by the study of the earlier forms of the language to fit him either for the teaching of English in the schools, or for the advantageous prosecution of post-graduate work on the subject. In all the years not only are the Pass subjects incumbent on the student, but constitute an extremely important part of his work. His knowledge of these subjects is expected to be of a wider, more accurate, and altogether higher character than that expected of the mere Pass students.

FIRST YEAR.—The study of Anglo-Saxon is taken up in the Early West Saxon dialect of Ælfred. An introduction to the phonology will be given in the lectures, but the main object will be to secure familiarity with the accidence of the language in its earliest development, and the philological interpretation of the selections read. Certain cantos of the Faery Queene (Bk. II, v.-viii. in Session 1894-5) afford materials for comparison with Tudor English, and serve as a basis for subsequent studies in the development of English poetry.

SECOND YEAR.—The Early West Saxon is continued, and the Late West Saxon of Ælfric taken up. A careful comparative study of these two stages in the history of Anglo-Saxon is followed by a similar line of comparison between Old English and Middle English as represented by Chaucer, whose works are also dealt with from a literary standpoint.

THIRD YEAR.—The introduction of Gothic in the Honor work of this year is for the purpose of giving wider scope to the comparative method of treatment. Stress will be laid on the accidence, which will be made to illustrate the origin of the Anglo-Saxon forms. In reading the Anglo-Saxon poetry special attention will be directed to the metrical form and literary characteristics of the authors taken up. A play of Shakespeare (Tempest in Session 1894-95) will also be read and dealt with from a literary standpoint.

FOURTH YEAR.—I. In literature the Elizabethan period is selected for study. The student is expected to make a minute and critical study of certain selected works, and to extend his knowledge by a careful reading of others. The class work is partly devoted to the special examination of these works, partly to an exemplification, by lectures, of the general characteristics of the period. With a special view to training in accurate scholarship, and to preparation for teaching, each student in succession is required to interpret before the class a part of a play of Shakespeare (Hamlet in Session 1894-95), and informal meetings are also held in which the members of the class are led to discuss selections from the Pass or Honor works. Finally, an essay requiring a certain amount of investigation on some topic connected with the course must be submitted to the instructor, and may be read before the class. These essays count for Honors.

II. Lectures will be given on Historical English Grammar, and as an introduction to *Béowulf*. The reading of *Béowulf* will be carried on as seminary work and will embrace textual criticism and the grammatical, metrical and literary investigations connected with the poem. Such work counts for Honors in the final examination.

French.

The instruction in French has for its subject matter: (1) The spoken and written language of the present day; (2) the history of the literature; (3) the history of the language. The organization of the courses of study is as follows:—

A. Pass Courses:—

FIRST YEAR.—The aim is to give the student an acquaintance with the simplest forms of the language, spoken and written. The class work consists of exercises in pronunciation, dictation, translation into French, and the reading of easy French authors.

SECOND YEAR.—The student is introduced to more difficult forms, and is expected to become familiar with the most common French idioms to be found in ordinary writers, as well as to translate into French sentences and passages which present no unusual difficulty. In this way the student should be able by the end of the year to read modern French prose with some ease.

THIRD YEAR.—The exercises of the first two years are continued, and increase in difficulty. The systematic treatment of the history of the literature begins with an outline of the earlier epochs, and deals more particularly with the seventeenth century, for which period illustrative selections of masterpieces are made for reading and analysis in the class-room.

FOURTH YEAR.—The practical exercises of the previous years are continued, and composition on simple subjects is added. The eighteenth and nineteenth centuries form the subject of the lectures on the history of the literature, which are supplemented by the reading of certain leading authors of that period.

B. Honor Courses:—

FIRST YEAR.—The work in grammar and translation is of a more advanced character than the Pass work of the year. Particular stress is laid on pronunciation and advanced exercises in translation into French. Incidentally the attention of the student is called to some of the more striking and interesting topics in connection with the history of the language and literature.

SECOND YEAR.—The work of the First year in grammar, pronunciation and translation is continued, and to it are added introductory exercises in conversation and composition on simple subjects. The student by the end of this year should be able to pronounce well, write fairly good prose, speak a little, and read easily.

THIRD YEAR.—Almost the whole attention of the student is directed to conversation, in connection with which French newspapers are read, to composition on topics chosen from the life and customs of the French people, and to the literature of the seventeenth century, to illustrate which a number of Molière's plays are read, as well as the authors prescribed for Pass work. A few lectures are also given on the history of the language in connection with the reading of a selection from the *Chanson de Roland*.

FOURTH YEAR.—The work of the Third year in conversation, composition and incidental study of French life is continued. The history of the literature in the eighteenth and nineteenth centuries is studied, and selections from important writers are read to illustrate the lectures, the chief stress being laid on the study of certain works of Victor Hugo. The study of the history of the language is continued in connection with the reading of a selection

from the *Chanson de Roland*. Students are also encouraged to undertake the independent study of topics in connection with the history of the language and literature.

In this department the Pass and Honor classes are completely separated, except in the lectures on the history of the literature in the Third and Fourth years. The Pass students are divided into sections of about thirty, and the Honor students into sections of from five to eight for oral exercises of various kinds.

German.

The courses in this subject comprise: (1) The study of the literary language of classical authors of the 18th and 19th centuries; (2) practice in writing and speaking German as illustrative of and a means to the above-mentioned end; (3) the history of German literature; and (4) for the Honor courses the elements of the history of the language.

A. Pass Courses:—

In these courses, the objects are to attain facility in reading German authors at sight, and an acquaintance with the history of German literature in outline. The former object is sought to be attained by, (a) practice in dictation, translation at sight from German authors and translation, both prepared and unprepared, from English into German, together with a certain amount of practice in speaking. For this purpose, each year is divided into sections, as necessary, two hours weekly being given each section in the First and Second years respectively, and one hour each in the Third and Fourth years. Stein's "German Exercises" is the book used for practice in translation into German; (b) careful reading of the texts prescribed, to which one hour weekly is devoted in each year. The periods of literary history presented are as follows: In the Second year, a study of the lives of Goethe and Schiller, for which the text-books recommended are Sime's "Goethe" and Nevinson's "Schiller." In the Third year, the literature of the 18th and 19th centuries; in the Fourth, that previous to the 18th century, for which Gostwick and Harrison's "Outlines of German Literature" is recommended as a text-book.

B. Honor Courses:—

(a) Practice in translation from English into German, and in German composition. For this purpose, each year is divided into sections as required, conversation being also practised, especially in the Third and Fourth years. The books used for translation into German are Macmillan's German Prose Composition, Part I, and Harris's German Composition, also Buchheim's German Prose Composition in the Third and Fourth years.

(b) Careful reading of the texts prescribed in the First and Second year, and minute reading of Goethe's Faust, Part I, in the Third year.

(c) History of Literature. In the Second year the period selected is that from Klopstock to Goethe, with some knowledge of the leading authors of that period. Gostwick and Harrison's "Outlines" is recommended. In the Third year lectures are delivered on the literature of the 18th century, and the fol-

Following authors and works have been selected for special study, the cheapest and most available editions being specified: Gottsched (Kürschner's Deutsche National Literatur, No. 33), Einleitung, der sterbende Cato; Wieland, Oberon, Cantos 8 and 9 (Reclam); Klopstock, Messias, Canto 1 (Kürschner No. 34); Bürger, Poems (in Golden Treasury Series), Balladen and Romanzen; Lessing, Minna von Barnhelm and Emilia Galotti; Herder, Ossian, Shakespeare (Kürschner); Schiller, Wallenstein's Tod. Students are required to possess themselves of copies of the above works. They are also referred to Lessing's life by Sime. In the same year a special study is made of Goethe's life and times to the end of the 18th century, and of the following works in addition to the first part of his "Faust": Götz von Berlichingen, Leiden des jungen Werthers, Iphigenie, Hermann und Dorothea, Poems (Sonnenschein's Selection). The study of Goethe's life is taken up chiefly in connection with the reading of "Faust." In the Fourth year lectures are given on the literature of the 19th century, and the following works have been selected for special study, copies of which each student should possess: Jean Paul, Quintus Fixlein (Reclam); Tieck, der gestiefelte Kater (Kürschner, No. 53); Kleist, der Prinz von Homburg (Brockhaus); Körner, Leyer und Schwert (Reclam); Uhland, Ballads (Golden Treasury Series); Heine, Poems (ed. White, Heath & Co.); Freytag, Soll und Haben (abdg. by Crump); Keller, Romeo und Julie aus dem Dorfe (Neuer Deutscher Novellenschatz); Scheffel, Ekkehard (abdg. by Wenckebach); Sudermann, die Ehre. The life and works of Goethe, and his influence on the literature of the 19th century, will also be studied, the following works being selected for perusal: Faust, Part II, Acts III, IV, V; Wilhelm Meister's Lehrjahre, Bks. I-V; Wahlverwandschaften. The student is also referred to the following in the original or in translation: Goethe's Autobiography; Eckermann's Conversations with Goethe; Correspondence of Goethe and Schiller; also Düntzer's Life of Goethe (transl. by Lister).

(d) History of the German Language. The study of the older forms of the language is begun in the Third year with the elements of Middle High German grammar (Wright's Middle High German Primer) and the careful reading of selections from the Nibelungenlied as prescribed. In the Fourth year elementary instruction is given in the comparative and historical grammar of the language, including grammar and phonology of Old and Middle High German (Wright's Primer), and the phonology, accidence and syntax of Modern High German, considered in their growth and development. In illustration, selections from Old High German authors in Wright's Primer, and the poems of Walther von der Vogelweide are carefully read in class.

Italian.

The courses in this subject extend over four years, and are arranged with the object of giving the student (1) a knowledge of the Italian language of the present time; (2) an appreciation of the more important masterpieces of Italian literature proportionate to his knowledge of the language; and (3) an elementary acquaintance with the historical development of the Italian language and literature.

FIRST YEAR.—Simple narratives by de Amicis are used as a basis for instruction in grammar, and for the acquisition of vocabulary and idiom. Elementary exercises in translating English into Italian are continued throughout the year. A course of lectures on phonetics is given, with special reference to Italian pronunciation, and as a preparation for subsequent study of the history of the language. Dictation and oral practice form a large part of the work at this stage, being regarded as fundamental for the mastery of the language. Phonetic transcription is practised as a means of giving definiteness to the knowledge of pronunciation and orthography.

SECOND YEAR.—The exercises in translation into Italian are continued, being based on the minute study of Italian extracts. These extracts are also used to afford oral practice in composition. Dictation and phonetic transcription are continued. The authors prescribed, Goldoni and Salvatore Farina, are read more with a view to the acquisition of the language than with reference to their literary value. The knowledge of grammar is increased in connection with the work in composition and the reading of the prescribed texts.

THIRD YEAR.—The work in composition consists largely of the translation into Italian of prose extracts of a varied character. Oral composition, dictation and transcription are constantly practised. The authors prescribed, Alfieri, Foscolo, Tasso, Dante, are read minutely as to the interpretation of the thought and the appreciation of the literary form. The history of literature and historical phonology are presented in outline.

FOURTH YEAR.—Original composition in Italian is required, as well as the translation of English prose extracts of an advanced character. Dictation is continued, and oral practice is afforded by conversation in Italian. The reading of modern prose is continued with Manzoni and Leopardi. Dante, Petrarca, and Boccaccio are read minutely from a literary standpoint. Selections from authors antecedent to Dante form the basis for an investigation of the history of the language and its literary origins.

The following editions of some of the texts prescribed are recommended for the purpose of securing uniformity: Alfieri, Saul (ed. Menghini, Sansoni); Foscolo, Jacopo Ortis (Bibl. naz. ecom.); Tasso, La Gerusalemme Liberata (ed. Severino Ferrari, complete, Sansoni); Dante, La Divina Commedia (ed. Fraticelli, Barbera); Manzoni, I Promessi Sposi (Bibl. naz. econom.); Leopardi, Prose Scelte (ed. Fornaciari, Barbera); Boccaccio, Novelle Scelte (ed. Dazzi-Barbera); Petrarca, Rime Scelte (ed. Mazzatinti e Padovan, Loescher).

Students will also furnish themselves with the following books not mentioned in the curriculum: Grandgent's Italian Grammar (1st year); Grandgent's Italian Composition (2nd year); Snell's Primer of Italian Literature (3rd year).

Spanish.

The courses in this subject begin in the second undergraduate year, and extend over three years. They are on the whole parallel in scope and aim with those in Italian (which see).

SECOND YEAR.—As in Italian special importance is attached from the outset to composition and oral practice in the use of the language. Knapp's

Grammar is used as a text-book, but is largely supplemented by extemporaneous exercises based on the vocabulary and idiom employed in it.

THIRD YEAR.—Dictation, phonetic transcription, and composition, both oral and written, are continued, the latter exercises being based on colloquial Spanish. Modern prose is studied from Knapp's Reader, and dramas by Moratin and Hartzbusch are read with more direct reference to their literary value. Historical phonology is presented in outline, and the history of literature is treated in its more general aspects.

FOURTH YEAR.—Dictation and the oral and written composition exercises based on colloquial Spanish are continued, and this work is supplemented by the translation of idiomatic English extracts of varied character. Facility in the comprehension of modern prose is increased by the reading of Moratin and Galdós, while Cervantes, Lope de Vega and Calderon, are read minutely from a literary standpoint. Selections from Keller's "Altspanisches Lesebuch" form the basis for an investigation of the historical development of the language and earlier literature.

The following editions of some of the texts prescribed are recommended for the purpose of securing uniformity: Hartzbusch, *Los Amantes de Teruel* (ed. Kressner, Gebhardt und Wilisch); Cervantes, *Don Quijote* (Vols. 3 and 4 in the Brockhaus Col. de. aut. esp.); Calderon, *La Vida es Sueño* (ed. Max Von Krenkel, Barth).

Students of the Third Year will also furnish themselves with the following books, not mentioned in the curriculum: *El Eco de Madrid*, with Span.-Eng. vocab. (Leipzig, Violet); *Butler's Hand-book of Spanish Literature*.

Oriental Literature.

The Oriental course has the main object of affording an introduction to the study of the Semitic languages and literature and of Semitic history. On account of the paramount importance of the literature of ancient Israel, the Hebrew language and the Old Testament in the original are made very prominent throughout the course, being taught in all the years and occupying almost as much time as all the other languages taken together. The aim of the course, more definitely, is a twofold one: to give those interested in the Bible a competent acquaintance with the Hebrew text, and to furnish all who desire a liberal education an opportunity of becoming acquainted with the literature and history of the Semites, who divide with the Indo-European race the controlling moral and intellectual influence of mankind. These ends are kept in view in the Pass as well as in the Honor lectures.

For purely linguistic study the Pass course is confined to Hebrew, and is so arranged that, with an average of two or three lectures a week throughout the four years, the student may gain some familiarity with the different kinds of literature in the Old Testament: narrative, historical, prophetic and poetical. The Honor course secures in its Hebrew department an intimate familiarity with the language and literary features of the Old Testament in all its divisions, and at the same time introduces the learner to the other important languages of the Semitic family. In the second year of the curriculum, which

begins the Honor course, the Aramaic is taken up in its two dialects, East and West Aramaic; in the Third year Arabic is the subject of study; and in the Fourth year the student is made acquainted with the Assyrian in the original cuneiform texts. In all the years care is taken not only to impart an exact knowledge of linguistic forms, but also to convey an accurate idea of the genius of the Semitic race and of the several peoples among them who in succession helped materially in the education of the world.

Thus, while philology is duly studied for its own sake and as an indispensable instrument of research, the whole tendency of the discipline is to make it subservient to the higher ends of literary and historical culture. The Oriental Seminary Room is well provided with maps and other illustrative material; and the library, although so lately founded, has already one of the best selections of Semitic literature, including inscriptional works, to be found in America.

A Seminary in Oriental languages will be held twice a month for the benefit of advanced students, the work done in which will count as part of the sessional duties. Graduates of the University who may apply for admission may take part in the work of the Seminary.

Books Recommended for Ordinary Use: Strack's Hebrew Grammar; Davies' Hebrew Lexicon; Old Testament Text with Massoretic Clavis; Driver's Notes on Samuel; Berliner's Targum of Onkelos; Conder's Palestine; Wright's Comparative Grammar of the Semitic Languages; Driver's Literature of the Old Testament; McCurdy's History, Prophecy and the Monuments; Articles in the Encyclopædia Britannica on Alphabet, Arabia, Babylonia, Hebrew Language, Mesopotamia, Palestine, Phœnicia, Semitic Languages, Septuagint, Targum.

THIRD YEAR.—The Renaissance movement will be traced with especial reference to the revived scientific and commercial interest which resulted in the discovery of America. Especial emphasis will be laid upon the Spanish, English and French colonial movements in America; the history of France in the 17th and 18th Centuries culminating in the French Revolution; the rise of Prussia as a great power; the development of the British Empire.

For Reference.—Burckhardt's Renaissance in Italy; Marco Polo (translated by Yule); Fiske, Discovery of America; Fyffe, Modern Europe; Stephen's European History; on *England*: Froude, Ranke, Gardiner, Macaulay, Lecky; on *Scotland*: Burton; on *France*: Kitchin; de Tocqueville, France before the Revolution; Stephens, French Revolution; Mignet, French Revolution; on *Germany*: Gardiner, Thirty Years' War; Carlyle, Frederick the Great; on *Canada*: Winsor, Cartier to Frontenac; Parkman, Old Régime and Montcalm and Wolfe; on the *United States*: Lodge, English Colonies in America; Fiske, Critical Period of American History; Goldwin Smith, The United States.

Ethnology.

FOURTH YEAR.—In the lectures some of the more important ethnological and anthropological questions will be discussed, including: The Unity of the Human Species; Man's place in Nature; the mental and moral characteristics and the social condition of primitive man, with especial reference to the Native Culture of America; the Distinctions of Race; Heredity; the Early Home of the Aryans; the Antiquity of Man. The lectures will be illustrated by maps, typical skulls of different races, primitive implements, etc.

For Reference:—Portions of the following works to be referred to in the lectures: De Quatrefage, Human Species; Huxley, Man's Place in Nature; Waitz, Anthropology; Topinard, Éléments D'Anthropologie Générale; Tylor, Anthropology; Boyd Dawkins, Early Man in Britain; Wilson, Prehistoric Man; Fiske, Discovery of America, chapters I, VIII, IX; Winsor, Narrative and Critical History of America, Vol. I, chapters III, IV, VI; Ribot, Heredity; Taylor, Origin of the Aryans; Wright, Ice Age in North America and its Bearings upon the Antiquity of Man.

History and Political Science.*A. Honor Courses*:—

The Honor courses in Political Science with the related Pass courses in languages, mathematics and natural science are intended to afford a means of preparation for those who desire to enter the professions of law, the ministry, journalism or teaching. The special subjects of study are economic history and theory, constitutional history, international and constitutional law, jurisprudence and history. The Honor course begins in the Second year in Arts and continues for three years.

SECOND YEAR.—*Economics.* The lectures give a general introduction to the study of modern political economy. The chief text-book is Marshall's Principles of the Economics of Industry, Vol. I. The following works will also be found useful: Gide's Political Economy; Andrew's Institutes of Economics; Smart's Introduction to the Theory of Value; Devas' Political Economy; Ely's Introduction to Political Economy; Mavor's Economic History, Tables and Diagrams.

English Constitutional History. The chief topics are the Hundred and County Courts, the Witenagemot, the Feudal System, the Growth of Parliament, the Growth of the Cabinet and of Responsible Government. For reference, selected portions of Stubb's Constitutional History, to be designated by the lecturer; Introduction to Stubb's Select Charters; Freeman's Growth of the English Constitution; Bagehot's English Constitution; Wakeman & Hassall's Constitutional Essays (excepting Essay I); Taswell-Langmead's English Constitutional History.

Canadian Constitutional History. Character of French Settlement; Nature of European Claims to Territory; Government by Trading Companies; Growth of Rule by Colonial Policy as distinguished from Trading Company Policy; Establishment of Provincial Organization in 1663; the Sovereign Council;

THIRD YEAR.—*History and Criticism of Economic Theory.* The course of Lectures will present a systematic account of the development of Economic History and a criticism of current Economic Theories of value, interest, rent, wages and international trade. The chief text-book for the work of the Michaelmas Term is Ingram's History of Political Economy, and for the work of the Easter Term, Marshall's Principles of Economics, vol. I. Students are also expected to study Böhm-Bawerk's Capital and Interest, and The Positive Theory of Capital (transl. Smart); Wieser's Natural Value; Smart's Introduction to the Theory of Value. The following books will also be useful: Cossa's Introduction to the Study of Political Economy; Bonar's Philosophy and Political Economy; Nicholson's Principles of Economics; Keynes' Scope and Method of Political Economy, chaps. 1-3, 7, 9. Bastable's Theory of International Trade, and The Commerce of Nations.

English Constitutional Law. The lectures on this subject comprise a discussion of the Royal Prerogatives; the constitution and functions of the two Houses of Parliament, the constitution of the executive government; the rise of the Cabinet and its relation to the Crown and the two Houses of Parliament; the military forces of the Crown, the constitution of the judicial department of government and its relation to the Crown and to Parliament, and the rights and obligations of the subject, the leading cases, the constitutional statutes, and the conventions of the constitution are discussed. For reference: Dicey's Law of the Constitution; Hearn's Government of England; Traill's Central Government; Boutmy's Studies in Constitutional Law, Part I.; Broom's Constitutional Law; Anson's Law and Custom of the Constitution.

Colonial Constitutional Law. The lectures on this subject trace the sources of Colonial Constitutional Law; the prerogatives of the Crown in the constitution of colonial governments; different forms of government; colonies by occupancy; colonies by cession and conquest; powers of Parliament in respect to the colonies; conventional limitations arising from local self-government. For reference: Creasy's Constitutions of the British Empire; Forsyth's Cases and Opinions on Constitutional Law; Todd's Parliamentary Government in the Colonies, as far as page 318; Tarring's Law in Relation to the Colonies.

The History of English Law. The history of the English law from the Roman Conquest until the Norman Conquest; the Roman occupation; the Saxon invasions; the laws of the Confessor; the change effected in the law, especially of real property, by the Conqueror and his successors,—the introduction or extension of the feudal system; the difference between that system on the continent and in England; the creation of new tenures; the Great Charter and its frequent renewals, as showing the condition of the people, and the evils to be remedied; the great changes effected by the legislation of Edward I and Edward III; the creation of entailed estates; the struggle to obtain power to alienate them; legislation to restrict alienations in mortmain; the evasion of the law; the law giving power to devise lands, and the legislation of Elizabeth to prevent frauds upon creditors and purchasers; the abolition of feudal tenures by Charles II. The efforts in the reign of George III. to ameliorate the criminal law, and the English Statutes after 1792 that have their counterpart in our Colonial legislation are discussed and explained. For reference: Reeve's History of English Law; Hale's History of English Law; Blackstone's Commentaries. Consult also a collection of English Statutes, and the Revised Statutes of Canada, and of Ontario.

History of Roman Law. The lectures on Roman Private Law comprise a sketch of the history of the law from the time of the decemviri to the death of Justinian, giving an account of the growth of the unwritten law, of judicial legislation to the suppression of the formulary system by Diocletian, and from that time to the death of Justinian, and treating of the statutory legislation during the Republic and under the Empire, and of the several attempts to form a code, finally terminated by the work of Justinian. The larger number of lectures is devoted to the substance of Roman Law during the reign of Justinian. The law of testamentary succession, the various kinds of wills, the duties of the heir, the gift of legacies, and the history of trust gifts and codicils are explained. The remedial processes for the protection and enforcement of rights are traced from the *legis actiones*, the changes effected by the formulary system, the summary jurisdiction of the praetor, the abolition of the formulary system, terminating in the *extraordinaria cognitio*. The series is closed by a discussion of the law as to specific performance of contracts; of the law as to frauds upon creditors; and an examination of the influence of Christianity upon Roman legislation. For reference: Muirhead's Historical Introduction to the Private Law of Rome; Sandars' Justinian; Institutes of Gaius, translated by Muirhead. The Digest, the Code, and the Novels should be consulted.

FOURTH YEAR.—*Economic History.* The lectures will trace economic history from the early middle ages down to modern times, with special reference to England. Books recommended: The chief text-books are Ashley's Economic History, Parts I-II; Toynbee's The Industrial Revolution. Students are also advised to study Seebohm's English Village Community; Vinogradoff's Villenage in England; Gross' Guild Merchant, chaps. 1-4; Rogers' Six Centuries of Work and Wages, chaps. 1-6, 8-10;

Public Finance. The lectures will deal with National and Local Finance, and with important questions of modern economic policy. They will discuss, among other topics: the History of Public Finance and of Financial Science; the Currency and Banking Systems of Canada, Great Britain and the United States; Public Debts and the Policy of National and Local Governments in relation to them; Methods of Extinction and Conversion of Debt; Sinking Funds; Public Domain—Lands, Forests, Minerals; Railroad Policy, its history in Europe and America; Principles of Taxation; Incidence of Taxation; Tariff Policy—outline of its history in Great Britain, Canada and the United States; Local Taxation in Canada and the United States. Books recommended: The chief text-book is Bastable's Public Finance. The following works should be read: Bastable's The Theory of International Trade; Seligman's The Incidence of Taxation; Elliott's The Tariff Controversy in the United States; Cossa's Taxation; Dunbar's Theory and History of Banking; Walker's Money, Trade and Industry; Adams' Public Debts; Ely's Taxation; Hadley's Railroad Transportation; Mavor's English Railway System; Bagehot's Lombard Street; Jevons' Money; Leroy-Beaulieu's Science des Finances, Livre II, chaps. 4, 5, 9, 10; Giffen's Essays in Finance, 1st series, IX; Taussig's Tariff History of United States.

Political Philosophy. History and Criticism of Political Theories. The principal text-book will be Sidgwick's Elements of Politics. The following are also recommended for study: Pollock's History of the Science of Politics; Ritchie's Principles of State Interference; Maine's Ancient Law; selected portions of Bluntschli's Theory of the State to be designated by the Lecturer.

Ethnology. Ethnology as a factor in ancient and modern history. The science of language. Philological classification of races. Anthropology. Succession of races in different countries in Europe. Physical evidence of diversity of race. Philological evidence. The prehistoric, unhistoric, and historic races. The lectures are illustrated by means of maps, typical skulls of different races, primitive implements, etc. For reference: Max Muller's Science of Language, 1st and 2nd series; Tylor's Anthropology; Wilson's Prehistoric Man, 3d ed.; Pritchard's Researches into the Physical History of Man; Latham's Ethnology of British Isles; Latham's Ethnology of Europe.

General Jurisprudence. In lecturing on this subject, the attention of the student is directed to the definition and analysis of *law* and of *rights*, to the sources of law, to the classification of rights, to the consideration of antecedent rights *in rem* and *in personam*, to remedial rights, to adjective private law, to the nature of public law and its various divisions, to international law, and to the application of law. For reference: Holland's Elements of Jurisprudence; Austin's Elements of Jurisprudence (Campbell's Students' edition); Maine's Ancient Law, and Early History of Institutions (Lectures XII, XIII).

The English Law of Contracts. A course of lectures will be given on the English Law of Contracts. Reference will be made, as occasion requires, to the Statutes of Ontario, and to cases decided in the Courts of Ontario, as well as to English Statutes and to cases in the English Courts. For reference: Anson, Law of Contracts; Pollock, On Contracts; The Revised Statutes of Ontario, 1887, and the Statutes of subsequent years.

The Law of Contracts is an alternative to the Ethnology of the Fourth year in Arts.

Constitutional Law. The lectures deal with the origin of the United States Constitution and the relation of the federal government to the States; the federal institutions, legislative and executive and judicial, and the leading decisions of the Courts in reference to the same. The Constitution in Canada; rules of interpretation applied by the Supreme Court of the United States; rules of interpretation applied by the Judicial Committee in construing the Constitution in Canada. For reference: Houston's Constitutional Documents of Canada; Todd's Parliamentary Government in the Colonies, page 318 to the end of the volume; Clement's Constitution of Canada or Munro's Constitution of Canada; Cartwright's Decisions on the B.N.A. Act; Cooley's Principles of Constitutional Law in the United States; Pomeroy's Constitutional Law; Boutmy's Constitutional Law, Part II and III. On the Constitution of the United States: Story, Hare, Miller, and Bryce; Todd's Parliamentary Government in England (ed. Walpole).

Public International Law. Besides the elementary principles of International Law, the lectures comprise a discussion of the growth of International Law, its sources, and the characteristics which distinguish it from international morality. Also a discussion of the doctrine of nonintervention, of the Monroe Doctrine, and of the various treaties and conventions relating to Canada. Controversies raised by the Civil War in the United States. The Geneva Arbitration and the rights of neutrals. For reference: Wheaton's International Law, (ed. Boyd); Hall's International Law, or Kent's International Law (ed. Abdy).

Private International Law. The lectures comprise a discussion of Person, Domicile, Marriage, Divorce and Legitimacy, Contracts, Torts, Bankruptcy, Succession and Distribution, Property, Foreign Judgments. For reference: Westlake's Private International Law; Foote's Private International Law, or Guthrie's Von Savigny, and Nelson's Selected Cases illustrative of the principles of Private International Law; Halleck's International Law, (Baker's edition), and Pigott's Consular Jurisdiction.

B. Pass Courses:—

Lectures will be given as follows to those students who require to take Political Science as a Pass subject:—

THIRD YEAR.—Constitutional History. The elements of English Constitutional History. Books for reference: Taswell-Langmead, Constitutional History of England; Bagehot, The English Constitution; Dicey, the Law of the Constitution.

FOURTH YEAR.—*The Elements of Political Economy.*—The lectures, textbooks and examinations are the same as those prescribed for students taking the Second year Honor course. See page 68.

Federal Constitutional Law. Pass candidates will be expected to show a textual knowledge of the British North America Act, and of the Constitution of the United States, and will be examined on the following works: Bourinot, Manual of the Constitutional History of Canada; Cooley, Constitutional Law of the United States. Lectures on the British North America Act for Honor work in the Second year, will be arranged so as to assist Pass students of the Fourth year.

The Departmental library in Economics is open under certain conditions to all Honor students in the Department of Political Science. Tutorial classes in Economics and in Constitutional History are held several times each week during the Michaelmas and Easter terms. Facilities for research are afforded to senior students, and also to graduates who desire to prosecute the study of the subject.

Philosophy.

The work of this department is pursued during the Second, Third and Fourth undergraduate years. The course embraces Logic, Psychology, Ethics, History of Philosophy, and Metaphysics. In every case the Pass work is to be taken by Honor students, and will be counted along with the Honor work, in determining the standing of students.

Pass Course in Logic:—

SECOND YEAR.—A course of lectures is given dealing with the scope and method of Logic; the nature of Deductive and Inductive Reasoning, and their relation to each other; the Definition of Terms; the Laws of Thought; the Forms of the Judgment and their mutual relation; the Syllogism; the Canons and Methods of Inductive inquiry; the detection and rectification of ambiguities in reasoning and logical fallacies. Exercises in logical problems are given from time to time and corrected. Books recommended: Jevons, Elementary Lessons in Logic; Fowler, Inductive Logic.

Honor Course in Logic:—

SECOND YEAR.—A course is given in the study and criticism of Mill's System of Logic, the exposition of scientific methods, and the discussion of the philosophical presuppositions underlying theories of Induction. The ground covered in the Pass lectures will not be taken up here, but will be presupposed. Books recommended: Mill, System of Logic (Books I-IV); Bradley, Principles of Logic; Venn, Empirical Logic; Jevons, Principles of Science; Jevons, Studies in Logic.

Pass Courses in Psychology:—

SECOND YEAR.—The lectures deal, in a general way, with the phenomena of consciousness, their description, correlation and classification; covering, in outline, the whole field, except the will. The course is designed to introduce

the subject, to familiarise the student with fundamental principles, and lead him to observe his own mental states. Term work is required. Books recommended: Baldwin, Elements of Psychology (Parts I-III); Höffding, Outlines of Psychology.

THIRD YEAR.—This course is intended as a continuation of that given in the Second year; so that the student at the end of his Third year should have a tolerably adequate knowledge of the whole field of Psychology in outline. The lectures deal chiefly with the springs of action and the growth and nature of Volition. The nature of Motive; its relation to Volition; the significance of Habit, and its bearings on Character and the Moral Life, are some of the topics discussed. Books recommended: Baldwin, Elements of Psychology (Part IV); Höffding, Outlines of Psychology (Chaps. VI-VII).

Honor Courses in Psychology:—

SECOND YEAR. (a) General: A course is given, in which some of the more difficult topics are carefully and critically discussed. Books recommended: Baldwin, Handbook of Psychology (Parts I-III); Bain, Senses and Intellect; Spencer, Principles of Psychology; Sully, The Human Mind. (b) Experimental: The lectures on experimental Psychology are of an introductory nature, and deal with psychological methods and their application, having special regard to the lower senses (touch, temperature, taste, smell, muscular sense, etc.). Books recommended: Ladd, Outlines of Psychology; Baldwin, Handbook of Psychology, vol. I.

THIRD YEAR.—(a) General: A course of lectures is given, dealing more carefully and critically than is possible in the Pass courses, with the special problems connected with the Will. The Attention will here be a leading topic. Representative theories of Attention and Will are studied. Portions of the works mentioned below may be selected for special study in the class: Baldwin, Handbook of Psychology (Part IV); Bain, Emotions and Will; James, Principles of Psychology (Chaps. XI and XXVI); Tracy, The Psychology of Childhood. (b) Experimental: The lectures on experimental Psychology have special reference to the higher senses, and deal with the chief questions of contemporary Psychology, in so far as they are accessible to exact investigation, special attention being devoted to the quantitative, qualitative, emotional, time and space relations of mental phenomena. The practical work of the laboratory is designed to afford the student an opportunity to become familiar with experimental methods. Books recommended: Wundt, Physiologische Psychologie (4th ed.); Ladd, Elements of Psychology; Kulpe, Grundriss der Psychologie. (c) Lectures are also given on historical and comparative Psychology. Books recommended: Ribot, German Psychology of To-day.

FOURTH YEAR.—An opportunity is afforded to students of the Fourth year and to graduates to undertake, in the laboratory of the department, independent investigations on such problems of empirical Psychology as are accessible to exact experiment.

Pass Courses in Ethics:—

THIRD YEAR.—(a) Theory of Obligation: Lectures on the scope and methods of Ethics, the relation of Moral Philosophy to Natural Science, The Moral Ideal, Personality, Instinct, Desire, Motive, Volition, Freedom of the Will, Conscience, Duty, Responsibility, Sensational Theories, Intuitional Theories, Transcendental Theories; Relation of Ethics to Theoretical Philosophy, Political Economy, and Religion. Essays will be written by members of the class, and examinations held during term. Books recommended: Calderwood, Handbook on Moral Philosophy; Muirhead, Elements of Ethics. (b) History of Ethics: The lectures cover the ground from Hobbes to the present time. Attention is given to fundamental standpoints rather than to details of doctrine. The interrelation of the various historical phases of Ethical thought are considered, the development of cardinal doctrines followed, and the chief representatives of the leading schools expounded. Books recommended: Sidgwick, History of Ethics; Bain, Moral Science.

Honor Courses in Ethics:—

THIRD YEAR.—(a) Selected Readings: Cicero, De Finibus Bonorum et Malorum (I-II), in the original (to be read in connection with the Department of Classics). (b) Theory of Ethics: The students in this course will make, under the guidance of the professor in charge, a careful and special study of Green's Prolegomena to Ethics. Lectures will be given to assist in the exposition, explanation, and estimation, of Green's position. (c) History of Ethics: This course is supplemental to, and given in connection with, the Pass Course on the History of Ethics. The aim of the lectures is to set in a clear light the real significance of the problems occupying the attention of moralists, and to estimate the solutions that have been offered for these problems. Students are required to read Martineau: Types of Ethical Theory. The following are also recommended: Butler's Sermons; Mill, Utilitarianism; Spencer, Principles of Ethics; Janet, Theory of Morals; Sidgwick, Methods of Ethics; Jodl, Geschichte der Ethik. (d) Applied Ethics: The class will meet once a week for the reading and discussion of papers written by members of the class. In these essays an attempt will be made to apply ethical principles to the investigation of social problems, such as Temperance, Charity, Socialism, etc. Books recommended: Spencer, Man vs. State; Ritchie, Principles of State Interference; T. H. Green, Lectures on Political Obligation, A. M. N., in vol. ii.; J. G. Hume, Value of a Study of Ethics, Political Economy and Ethics, Socialism.

FOURTH YEAR.—Students are expected to read the Nicomachean Ethics of Aristotle (Books I-IV) in the original. Lectures on the text will be taken in connection with the Department of Classics. Lectures will be given by the Professor of Ethics on the Ethics of Aristotle, and of Kant as given in the Kritik der Praktischen Vernunft. A Seminary will also be held for the reading and discussion of papers written by the students, on Ethical topics, historical, theoretical and applied. Books recommended: On Aristotle, Grant; on Kant, Semple, Porter, Schurman, Green.

Pass Course in the History of Philosophy:—

FOURTH YEAR.—A course is given, intended as an introduction to the critical study of Philosophy. The student is led to trace the development of philosophical speculation from the beginning of Modern Philosophy up to the time of Kant; to discover the relation of the various thinkers to one another; to estimate the contribution made by each; and to note how inadequacies and errors were subsequently met and corrected. Books recommended: Schwegler, Falckenberg, Windelband.

Honor Courses in the History of Philosophy:—

THIRD YEAR.—Lectures are given on the History of Ancient and Mediaeval Philosophy. The chief centre of interest is the Platonic Philosophy; but the Pre-Socratic and Post-Aristotelian periods are dealt with as fully as time permits; the former, as the essential prelude to the study of the Platonic Philosophy; the latter, as showing the various directions in which its influence was felt in later times. The influence of Christianity on philosophic thought; the main features of Scholasticism; and the preparation of the thinking world for Modern Philosophy, are considered. Special attention is given to connecting links, and the relation of the thinkers to one another. An extra hour a week will be devoted to a more special study of some of the more important Platonic Dialogues. Books recommended: Zeller; Ueberweg; Butler; Erdmann; Ferrier; Schwegler; Bann; Tennemann; Burt; Mayor; Scott; Jowett's Plato; Grote's History of Greece (chapter on the Sophists); Aristotle's works. Students are also required to read Plato's Phaedrus in the original (lectures on the text to be taken in connection with the Department of Classics).

FOURTH YEAR.—(a) Pre-Kantian Period: Honor students will attend the lectures on this period given to the Pass students (see above), and the class reading selections in *Metaphysics* (see below). Books recommended: Ueberweg; Erdmann. (b) Kant: The development of the Kantian Philosophy, through the Critiques and Prolegomena, is followed. The "*Kritik der reinen Vernunft*" and the "*Kritik der Urtheilskraft*" are carefully studied in the class; essays by the students are read and discussed; and lectures are given on Kant's relation to previous philosophers; the significance of his new method; the various links in his system; and the positive and negative elements in his philosophy. Books recommended: Caird; Watson; Morris; Stirling; Mahaffy; Bernard; Vaihinger; Erdmann; Riehl. (c) Post-Kantian Period: Lectures will trace the development of Idealism after Kant, sympathetic and antagonistic. Special attention is given to Fichte, Schelling, Hegel, Schopenhauer, Von Hartmann, and Herbert Spencer.

A seminar in the History of Philosophy is conducted for the reading and discussion of papers written by the students. Books recommended: (a) General histories: Kuno Fischer, Windelband; Falckenberg; Ravaisson; Lewes; Morell. (b) Special: On Hobbes, Croom Robertson; on Des Cartes, Kuno Fischer; on Spinoza, Pollock; Caird; on Locke, Berkeley and Hume, Green, Frazer, Selby-Bigge; on Leibniz, Dewey; on Scottish Philosophy, Seth, Murray, Bowen, McCosh; on Kant, (see above); on Fichte, Everett, Adamson; on Schelling, Watson; on Hegel, Wallace, Caird, Harris, Royce, Sterrett; on Spencer, Collins; on Schopenhauer and Von Hartmann, Bowen.

Honor Courses in Metaphysics:—

SECOND YEAR: Theory of Knowledge—Honor students are required to read Locke's Essay on the Human Understanding; Berkeley's Principles of Knowledge; and Hume's Treatise on Human Nature, Book I. They are expected to write expository summaries of these works, and to discuss and criticize them in the class. It is the aim of the lectures to assist the student in making the transition from observation and analysis of mental phenomena to the reflective consideration of the underlying philosophical principles. Books recommended: Fraser's, Locke and Berkeley (Blackwood's series); Green, Introduction to Hume; Aikins, The Philosophy of Hume; Ward, Psychology in Encyclopædia Britannica, 9th ed.; Dewey, Psychology.

FOURTH YEAR.—Theories of Knowledge and Being: Several courses are given. Honor students are required to read Kant's Prolegomena (of which paragraphs 1-39 must be read in the original); Lotze's Metaphysic; Des Cartes, Meditations and Method; Spinoza, Ethics; Hamilton, Lectures on Metaphysics; Spencer, First Principles. Of these the first two are carefully studied in the class; the others are made the basis of special exposition in lectures; the principles and methods of philosophical speculation; the correlation of different disciplines; and the interrelation of Logic, Psychology, Metaphysic and Ethics, are carefully considered. A seminary is held for the study of advanced Metaphysical Problems.

In the Seminars papers are read and discussed by the members. Everything is done to encourage independent thinking on the part of the students. Graduates may become members of any of the seminars in the Department of Philosophy by arrangement with the professor in charge.

Mathematics.

The Department of Mathematics is furnished with the admirable thread and plaster models of Brill for illustrating the teaching of Geometry in three dimensions.

Physics.

The work of instruction in Physics consists of courses of lectures and of practical work in the laboratories. The lectures include, (1) an introductory course for Natural Science and Medical students, (2) an elementary course illustrated by experiments in Mechanics, Hydrostatics, and Heat, as required by students of the First year in Arts, (3) a similar course in Optics, Electricity and Magnetism for students of the Second year in Arts, (4) a similar course on Acoustics for students of the Third year in Arts, and (5) advanced courses on Mathematical Physics for Honor students in the Third and Fourth years in Arts.

The elementary courses for students of the First, Second and Third years in Arts are also attended by students in Engineering, Architecture and other departments.

In the practical work of the Laboratory there are at present eleven courses, six elementary and five advanced, which have been arranged to meet the requirements of Arts students, Engineers, Architects, and candidates for specialists' certificates at the Education Department.

Chemistry.

The following lectures will be delivered :—

Inorganic Chemistry.—A special course for First year students in Honor Chemistry and Mineralogy ; an elementary course for pass students of the Second year and Honor students of the First year in Chemistry and Mineralogy, and Natural Sciences ; an advanced course for Second year Honor students in Chemistry and Mineralogy, and Natural Sciences ; a special course for Second year Honor students in Chemistry and Mineralogy ; an elementary course for First year Pass and Honor students in the Faculty of Medicine.

Organic Chemistry.—An elementary course for Third year Honor students in Chemistry and Mineralogy, and Natural Sciences ; an advanced course for Honor students of the Third year in Chemistry and Mineralogy ; a course on Organic Synthesis and Stereo-chemistry for Honor students of the Fourth year in Chemistry and Mineralogy ; an elementary course for students of the Second year in the Faculty of Medicine.

Physical Chemistry.—A course on Stoichiometry for Honor students of the Third year in Chemistry and Mineralogy ; a course on the Theory of Chemical Affinity for Honor students of the Fourth year in Chemistry and Mineralogy.

History of Chemical Theory.—A course for Honor students of the Fourth year in Chemistry and Mineralogy.

The laboratory practice includes Quantitative Analysis and the preparation and study of selected inorganic compounds for First and Second years Honor Chemistry and Mineralogy, and Second year Natural Science students ; inorganic Quantitative Analysis and Volumetric Analysis for Second year Chemistry and Mineralogy, and Third year Natural Science students ; the preparation and study of selected organic compounds for Third year Chemistry and Mineralogy students ; and the investigation of the laws of chemical change, the properties of chemical compounds, and a selected research for Fourth year Chemistry and Mineralogy students.

The lectures and practical work in Chemistry will be given in the School of Practical Science pending the completion of the Chemical Building now in course of erection. Students working in the laboratories are provided with the necessary apparatus on making a deposit at the commencement of the session, which will be returned at the close of the session after the following charges have been deducted from it : (1) the cost of all apparatus broken or destroyed, (2) any fines for breach of laboratory rules.

Text-books and works of reference : Elements of Chemistry, W. A. Miller, Parts II and III ; Richter, Organic Chemistry ; Treatise on Chemistry, Roscoe and Schorlemmer, 3 vols. Inorganic, 5 vols. Mineralogy and Geology.

The work of this department is conducted both in the form of lectures and in that of practical or laboratory work. The courses are so arranged as to lead from the elementary work of the earlier years to the more advanced study of the various subjects included in the teaching of the department. A general outline of Geology (with the cognate subjects of Paleontology and Physical Geography, briefly treated) is given in the Second year. No special text-book is enforced, but Parts III and IV of Chapman's "Geology of Canada," and Chapman's "Synopsis of Paleontology," are recommended for perusal.

The work of the Second year also comprises the subjects, separately treated, of Mineralogy and Crystallography, with a considerable amount of practical work in the laboratory, including the use of the blowpipe and the practical determination of more common minerals. Chapman's "Mineral Indicator" is recommended for laboratory use.

In the Third year the practical determination of minerals is much extended, and the use of the spectroscope in mineral examinations is made an important part of the laboratory course. Chapman's "Blowpipe Practice" and "Mineral Tables" are used in this work. The lecture work of the year comprises the Economic Minerals of Canada, and a course of about twenty lectures on the Paleontology of the Invertebrata, in which the characteristic types of Canadian occurrence are especially considered.

In the Fourth year lectures are given on the following subjects: (1) Systematic Mineralogy; (2) Mathematical Crystallography; (3) Paleontology of the Vertebrata (about twenty-five lectures); (4) Geology of Canada; and (5) Mining Geology—the latter subject including the detailed study of mineral veins and economic deposits generally, with the methods of examining and reporting upon mineral lands. The practical work of the year comprises the assaying of ores of gold, silver, copper, nickel, etc., and the examination of coals, fire-clays and other economic substances.

Biology.

The lectures and practical instruction in this subject are given in the University Biological Building.

The following arrangements will be in force for 1894-95:—

1. A course of elementary lectures on Biology will be given three days a week to prepare candidates for the University examination of the First year. For reference: Jeffrey Parker, Biology; High School Zoology; Francis Darwin, Botany.

2. A course of lessons involving 100 hours' instruction given in connection with the above course of lectures for students entering the Honor department of Natural Sciences. A laboratory supply fee of \$2 will be charged to

members of the practical class for the use of microscope and material for study, but each member will be required to provide himself with a case of instruments and an engraver's lens, both of approved pattern.

3. In addition to attending the course of lectures specified in sec. 1, candidates for Second year Honor examinations will attend special courses on the Zoology of the Vertebrata and the Anatomy and Classification of the Phanerogams during the Michaelmas Term. A series of lectures and demonstrations on selected topics in Physiology will be delivered during the Easter Term.

4. The practical course for Honor students of the Second year will be devoted to the study of typical forms of plants and animals, such as are treated of in Huxley and Martin's "Elementary Practical Biology," new edition, and Bower's Practical Botany. There will also be opportunities for the study of the Canadian Vertebrate fauna (Text-book, Jordan's "American Vertebrates"), but the student is expected to have familiarized himself with the Canadian flora during the preceding long vacation. For reference: Spotton's "Canadian Flora," or Gray's "Manual"; Vines' Text-book of Botany, 2 vols.; Francis Darwin, Elementary Botany; Van Tieghem's *Traité de Botanique*, 2nd ed., revised.

5. Honor students of the Third year will study the Zoology of the Invertebrata three days a week during the Michaelmas and part of the Easter Terms, and, during the remainder of the Easter Term, Cryptogamic Botany and Vegetable Physiology. Books of reference: Goebel's Outlines of the Classification of Plants; Vines' Lectures on the Physiology of Plants; Vines' Text-book of Botany; A. B. Frank, *Lehrbuch der Botanik*; Van Tieghem, *Traité de Botanique*, 2nd ed., revised; Bower, Practical Botany; Claus's Zoology, translated by Sedgwick; Lang, *Vergleichende Anatomie*.

6. The practical course for Third year students will be devoted to the study of typical forms of Cryptogamic plants and Invertebrate animals.

7. Wiedersheim-Parker's "Elements of Comparative Anatomy of the Vertebrata," and Foster's Physiology, last English edition, are recommended for Honor students of the Fourth year, and the following works will be required in the practical course: Stöhr's *Handbuch der Histologie*; Parker's Zootomy; Foster and Balfour's Embryology; Bunge's *Physiologische Chemie*.

Works of reference on Bacteriology and the other subjects specified in the University curriculum will be found in the laboratory.

8. Honor students of all years are required to pay in advance to the Registrar laboratory supply fees.

SCHOLARSHIPS, PRIZES AND MEDALS.

I. University of Toronto.

A. Matriculation Scholarships.

The scholarships hereinafter mentioned, with the exception of the Prince of Wales Scholarship and the Mary Mulock Scholarships, are provided from the endowment fund presented by the Honorable Edward Blake, Chancellor of the University, and are known as the Edward Blake Matriculation Scholarships.

I.

There are, including the Prince of Wales Scholarship, nine Junior Matriculation scholarships for general proficiency in the four departments of Classics, Mathematics, Modern Languages, and Science, and in the sub-department of History and Geography.

The Scholarships are of the following values:—

	SOURCE OF MONEY.		FREE TUITION.	TOTAL VALUE.
(1)	The Prince of Wales (Name, Prince of Wales.)	\$50 00	\$50 00

(7)	"	30 00	" 90 00	120 00
(8)	" (Name, West Durham.)	25 00	25 00

Candidates must obtain first-class honors in at least one department, and at the same examination pass in the other subjects for Junior Matriculation.

The scholarship (1a) is held together with the Prince of Wales Scholarship.

The scholarship (8) is preferentially tenable by a scholar from the Bowmanville High School.

II.

There are twelve Junior Matriculation scholarships for proficiency in two departments, as follows:—

		SOURCE OF MONEY.	FREE TUITION.	TOTAL VALUE.

	(Greek	300	
MATHEMATICS			600
MODERN LANGUAGES	(English	200	600
	(French	200	
	(German	200	
SCIENCE	(Chemistry	200	600
	(Physics	200	
	(Biology (Botany, Zoology)	200	
HISTORY AND GEOGRAPHY			100

The total value of the marks allowed for Pass work in a department shall be one-third of the total value of the marks for both Pass and Honors.

Saving the exception as to the Prince of Wales Scholarship, no one shall be entitled to hold more than one scholarship; but anyone who would, but for this provision, have been entitled to a second scholarship shall be published in the lists and receive a certificate of honor.

No scholarship shall be awarded save on condition that the candidate becomes a matriculated student in actual attendance in the University of Toronto.

Free tuition awarded shall be available on the following conditions: For the first year on the award of the scholarship; for any year after the first on proof that the claimant has passed his examination for the preceding year with first-class honors in at least one department.

In case in any year any scholarship be not taken, it shall be allowable to award such scholarship, or some part thereof, to a candidate who has shown special excellence in the examination in some other group, and has taken scholarship rank therein, but has failed to win a scholarship therein.

In case in any year any scholarship be not awarded, the money undisposed of shall be divided among the scholarships for the succeeding year.

The Board of Arts Studies may from time to time make and amend any regulations requisite to carry out the plan: such regulations shall be laid before the Senate at its next meeting, and may be from time to time amended by the Senate or referred back to the committee for reconsideration.

B. Undergraduate Scholarships.

The following scholarships have been founded and endowed in the University, and are open for competition to all undergraduates in Arts, who are candidates for Honors in the departments and years to which they are assigned :—

CLASSICS.

THE MOSS CLASSICAL SCHOLARSHIP, of the value of \$120, founded by subscription in honor of the late Hon. Chief Justice Moss.

MATHEMATICS AND PHYSICS.

THE WILLIAM MULOCK SCHOLARSHIP in Mathematics, of the value of \$60, the gift of William Mulock, M.A., LL.D.

Two scholarships in Physics of the value of \$100 and \$45 respectively, the gift of the Local Committee for the Toronto meeting of the American Association for the Advancement of Science. In awarding these scholarships, the theoretical and practical work in the department will be estimated in the proportion of three to one.

CHEMISTRY AND NATURAL SCIENCE.

THE DANIEL WILSON SCHOLARSHIPS, two of the value of \$60 each, the gift of a friend. In awarding the Daniel Wilson scholarships, the theoretical and practical work in the several subjects will be estimated as follows: In Chemistry, in the proportion of two to one; in Biology, in the proportion of one to one; in Mineralogy and Geology, in the proportion of two to one.

POLITICAL SCIENCE.

THE BLAKE SCHOLARSHIPS, two of the value of \$75 each, and two of the value of \$50 each, the gift of the Hon. Edward Blake. These scholarships are open for competition alike to students in Arts in the Honor department of Political Science, and to undergraduates in the Faculty of Law, taking the same examinations.

THE BANKERS' SCHOLARSHIP in Political Science, of the value of \$70, the gift of the Canadian Bank of Commerce, the Dominion, Imperial, Standard, and Traders' Banks, and the Union-Bank of Lower Canada. Only such candidates are eligible as are of one year's standing and have passed the examination of the First year. A special examination on some special text-book of history or finance will be held at the time of the Supplemental examinations in September. This scholarship is not tenable with any other.

The years and Honor departments to which the above-named scholarships have been assigned are as follows:—

IN THE FIRST YEAR.

One in Classics (The Moss Scholarship), of	\$120
The Bankers' Scholarship of	70

IN THE SECOND YEAR.

The Blake Scholarships in Political Science and Law, one of	\$75
“ “ “ “ “ one of	50
One in Mathematics (The William Mulock Scholarship), of	60

IN THE THIRD YEAR.

The Blake Scholarships in Political Science and Law, one of.....	\$75
“ “ “ “ “ “ “ “ one of.....	50
Two in Physics, one of.....	100
“ “ “ “ “ “ “ “ one of.....	45
One in Chemistry and Mineralogy (The Daniel Wilson Scholarship), of..	60
One in Natural Sciences (The Daniel Wilson Scholarship), of.....	60

All undergraduate scholars must sign a declaration of intention to proceed to a Degree in this University, and must attend lectures in some affiliated College for the academic year immediately following such examination; but the Senate may, upon satisfactory reasons being shown, permit such scholar to postpone attendance upon lectures for a year, in which case the payment of the amount of the scholarship shall likewise be postponed. The scholarships are paid in three instalments—on the fifteenth November, the fifteenth January, and the fifteenth March; and each scholar is required to send to the Registrar a certificate of attendance upon lectures at least three days before the date of each payment.

No scholarship will be awarded to any candidate who has been placed lower than the First Class in the department, or in any of the departments or sub-departments to which the scholarship is attached.

C. Prizes in Books.

THE CHEMISTRY PRIZE, the gift of Professor Pike, of the annual value of \$15, is open for competition among students of the Fourth year in the Department of Chemistry and Mineralogy.

THE MINERALOGY and GEOLOGY PRIZES, the gifts of Professor Chapman, are open for competition among students of these subjects in the Second and Third years. The value of the Second year prize is \$5, and of the Third year prize is \$10.

D. Medals.

NATURAL SCIENCES.

The McMurrich Medal (Silver), the gift of W. B. McMurrich, M.A., awarded on the recommendation of the Natural Science Association.

The Cawthorne Medal, the gift of F. T. Shutt, M.A., awarded on the recommendation of the Natural Science Association.

E. Graduate Scholarships.

THE RAMSAY SCHOLARSHIP in Political Economy, of the value of \$60, the gift of Mr. William Ramsay. This scholarship is open for competition to all graduates of undergraduates who have been placed in the First Class in one of the Economic subjects of the Fourth year in the Honor department of Political Science (Third year in the Faculty of Law); but not more than two years must have elapsed since the competitor passed the examination above specified. The award is made upon an essay, the subject of which must be some question in Economics or Finance of interest to the commercial community in Canada, to

be announced in May of each year, and the competition closes on the 15th of September thereafter, by which date the essays must be sent to the Registrar.

THE 1851 EXHIBITION SCIENCE SCHOLARSHIP, of the value of £150 sterling, given by the Commissioners for the International Exhibition of 1851, is awarded once in two years by the University Council for research in some branch of Physics or Chemistry. Subject to a satisfactory report as to progress in study, it is ordinarily tenable for two years at home or abroad.

By James Strong, S.T.D., LL.D.

DR. JAMES STRONG will be recognized as the Editor of *McClintock and Strong's Cyclopaedia*, and for nearly a quarter of a century Professor of Exegesis in the Drew Theological Seminary. The magnificent volume is a monument to his industry, his ingenuity and his distinguished biblical scholarship.

Complete in One Volume, Quarto.

This great book is properly named. It is, in the strictest sense, an exhaustive Concordance, "the only one hitherto constructed that gives all the words of the Bible, and all the passages where they are found; and in this respect no Concordance can ever be made more perfect." In the Preface the author says:

"Three great features have been constantly kept in view—completeness, simplicity and accuracy. It is intended to be a permanent standard for purposes of reference; so full in its vocabulary and lists that every one consulting it will be sure to find a passage easily and quickly by seeking it under any word whatever that it contains; so plain in its arrangement that a child cannot miss his way in using it; so correct in its citations, both numerical and verbal, that the most scholarly may implicitly depend upon it. A comparison with other works of the kind hitherto produced, however valuable they may have been in their place, will reveal the fact that none of them perfectly or adequately combines these advantages. For this reason no preceding work of the kind has been taken for the basis of the present one; it is entirely independent of them all. The passages were collected directly from the sacred text, and they have been repeatedly compared with it, both in manuscript and in type, in so careful and thorough a manner as to test satisfactorily their exhaustiveness and accuracy."

KING ST. EAST, - TORONTO.

FOR nearly SIXTY YEARS in the Clothing Business, the reputation of this house for straight dealing, superior quality of materials and general good workmanship has spread throughout this Province until the name is almost a household word.

Young Men's Clothing is a special feature with us; a magnificent stock of "up to date" Clothing to select from, and the Fall of 1894 sees, if possible, a finer stock than ever of SUITS and OVERCOATS upon the tables. *Hats and Furs* we buy as we do everything, direct from the makers. Our profits all through are made quite as much through good buying as in the selling, so that our customers can hardly be said to pay even one profit let alone two.

Gents' Furnishings from the best and most fashionable makers of Great Britain and Canada. Comparison will show that in most goods our prices are *twenty per cent.* below the ordinary prices charged, quality for quality.

If you are a student of Victoria, kindly mention it when visiting us, and we will use you well.

R. WALKER & SONS,

King Street East, - - - Toronto.
