New Light on Killing of Nissouri Farmer by His Daughter-in-Law.

MRS. SCOTT SPENT A NERVOUS NIGHT

Ed. Meredith, K. C., Will Defend Hear-Stories of Neighbors and Others.

Mrs. Wesley Scott, who is charged with the murder of her father-in-law, Harvey Scott, of the 5th concession of West Nissouri, was brought to the city last night and appeared before Squire Chittick, who remanded her

She is at present in the county fail. Mr. Edmund Meredith, K.C., will have charge of her case. At an early hour yesterday morning

the little village of Thorndale was stirred with excitement by the news that Harvey Scott, who had lived practically in their midst as far back as the memory of some could go, had been shot to death by a revolver in the hands of his daughter-in-law, Mrs.

Driving northward along the 5th concession towards the Scott homestead at about half-past seven, he met Mrs. Wesley The woman was sobbing, and seemed half-frenzied, and to Mr. Vining's question as to what was the mat ter, she would only reply:

An Awful Sight.

"Go up to the house and see what Y have done. Then having told that much of her story, she turned back again. Mr. Vining's team was somewhat wild, and he could not wait for the woman. He drove down the road as far as the elder Scott's place, where he met Albert Scott and his son. When the woman saw him drive past the gate she cried out and world her gate, she cried out and waved her arms, but when the three men returned ! she was sitting quietly at the table in

On the roadway they met Mr. Vining, and the three men went in together, and found the elder Scott lying on his back with his right arm stretched out, his left arm close to his side, and a ghastly wound behind his Simcoe. Physician Called. Mr. Vining at once went to a neighbor's house and called up Dr. J. R. Armstrong, of Thorndale, who in turn notified Constable Hughes, of London and Constable Quirk, of Thorndale. Together, Dr. Armstrong and the constable went to the scene of the crime, when the doctor saw that the remains were not touched, pending the arrival of the coroner. An adequate motive for the crime

seems hard to find. And as far as can be learned it is a case, the neighbors say, of a woman goaded beyond endurance by long series of cruelties and petty tyranny, stretching back for many years.

The Deceased.

The dead man had borne a harsh name among his fellows. "He was a good neighbor," one man said, "and always kept the line fences carefully. She has hardly eaten anything since she arrived at the jail, and is very white and shaken. Her husband, and the lawyer who has been retained, Mr. Edmund Meredith, K. C., were the only persons to see her this morning. When Mr. Scott was seen shortly after he said that his wife was in a very nervous state, due partly to a recent illness. Mr. Meredith, he said, was confident of the success of his case, though he had not yet outlined the defense lined the defense.

SMALLMAN & INGRAM, LIMITED WITH THE FARMERS

Reported That Hydro Power Men and Citizens Came to Blows.

St. Anns, Sept. 13.—The first actual physical conflict between farmers in the county of Lincoln and the workmen of the contractors for the hydroelectric power line took place here Saturday morning and the first victory lay with the farmers.

From what can be gathered of the conflict, it appears that the hydroelectric commission in July last agreed with Eli Lane and some neighbors on the amount of compensation to be paid for the right-of-way across their farms, but the money had not been paid over, although it is claimed that an official called on Mr. Lane last Friday to pay the money, but Mr. Lane, it is said, was not at home, consequently the payment was not

Be this as it may, on Friday morning about 7 o'clock the contractor's nen, under Foremen Bowen, started to dig the holes for the "footings" or foundations of the towers to carry the power line on part of Eli Lane's farm. It is alleged by the workmen that the farmer and several neighbors, armed pitchforks and shovels, approached Bowen and his men and threatened them. It is claimed that Bowen urged the farmers not to interfere with the workmen, but to sue them or the contractors for any damage or for any wrongful entry on the

Bowen and his workers allege that in spite of their peaceful attitude the farmers attacked the workmen, that Bowen had his nose broken by a blow from a pitchfork, that another workman got a scalp wound two inches long as the result of a blow with a ovel, while another workman was struck on the side, also with a shovel, and was badly bruised. The workmen then quit the farm

and will at once enter suits for damages for the alleged assaults and for being delayed with their work. It is understood that Clark Lane, a prother of Eli Lane, has settled with the commission, as have most of the farmers in the vicinity, and on Monday the work of preparing for neighboring farms to that on which the trouble arose.

The contractors and the commission have, it is held, given every con-sideration to farmers and others whose property is affected by the work, and they say there is no justi-fication for any attack on the workmen engaged in constructing the line.

LONDON, TUESDAY, SEPT. 14. QUEBEC'S BOLD MOVE.

The Government of Quebec has decided to copy Ontario's policy by prohibiting the exportation of pulpwood cut on crown lands.

Quebec has been for some years charging a duty of 60 cents per cord on wood cut upon crown lands for exwith a rebate for wood converted into pulp or paper within the provhastened by the new United States tariff bill, which discriminates against pulp and paper imported from Quebec and Ontario, but the step would later, regardless of American legislation. ONTARIO'S WONDERFUL CLAY

New Ontario signifies something more than Cobalt. The lure of the the Canadian West have diverted attention from the northern clay belt, now being opened up by the two great railway projects-the National Transcontinental and the Temiskaming and Northern Ontario. The country has been a revelation to some of the Provincial legislators who are now tour ing it for the first time. It is believed to be on the eve of a sensational development.

The extent of the clay belt is varlously estimated at from sixteen to apple. twenty million acres of what is declared to be the richest soil on the continent. The sandy loam subsoil retains the moisture, and the plow encounters no stones or boulders. This season's grain yield was exceptionally large, and included wheat, oats, barley and flax. , With the most fertile of pasture lands, dairying is already becoming a profitable industry, butter selling at 35 cents per pound.

Of course, the land has first to be cleared. There is, however, no sap root to the growing timber, nor is any firmly-embedded white pine, the woods consisting solely of spruces and jack and red pine. Roots are extracted with little difficulty. Timber, pulpwood and cordwood are easily disposed of at profitable prices, the railway picking up cargoes left the proprietor. along the tracks by the settlers.

The experience of some of the setflers has been as remarkable as anything in the west. On May 10 last one of them purchased his farm in WHAT AEROPLANES LOOK LIKE. His clearing was done too late steering a straight course across the

season, but the timber alone more than paid double time for the work. Two brothers of this settler, who intended going out to Saskatchewan, have decided to join him in this most promising country.

Another settler who purchased 170 acres a couple of years ago for \$700, has refused \$5,000 for the property, and mathematics. still another is considering an offer of \$1,100 for land for which he paid \$125 last spring, and from which he his since taken a profitable crop.

A vigorous propaganda for the settlement of the clay belt should follow the visit of the legislators.

Province Will Allow No More Wood Pulp Exported.

Montreal, Sept. 13.-The Province of Quebec has definitely decided to prohibit the exportation of pulpwood, cut from crown lands. In September, 1900, the Premier of the province made a promise that the stumpage rates of 60 cents per cord on wood cut from crown lands would not be raised for a period of ten years. It is intended to carry out that pledge and no increase in stumpage charges will be nade until September, 1910.

The Canadian paper makers are urging the provincial authorities to stop the exportation of pulpwood cut from crown lands, but the American owners of rights to cut timber on more than 12,000 square miles of those lands represent that the pledge of September 1900, implied a right of importation for ten years, and that in good faith no prohibition should be made until the lapse of that period.

YOUR BLOOD IS POISONED

IF YOU SUFFER FROM HEAD-ACHES OR NEURALGIA.

Frequent attacks of headaches neuralgia are Nature's warnings of blood poisoning. The pain is due simply to the tortured nerves, inflamed by the blood being overloaded with impurities, because of inactive bowels, kidneys or skin.

There is usually chronic constipation and the foul matter, instead of passing from the body, is absorbed by the blood. The kidneys are not as strong as they should be and fail to filter from the blood, the necessary amount

of impure matter.

Instead of the skin throwing off one and a half pounds of waste matter every day, it becomes inactive and does only half its work, leaving three quarters of a pound of this waste to polson the body. Detroit, Sept. 14. - If James Mc-Aleer really wished to ascertain just what his prospects for '10 were capable of doing, he couldn't have picked a better team than the Tigers to develop the information.

Yesterday the leader of the Browns sent his club against the Champions | *Orth with five recruits in its make-up. All of the outfield and the battery positions were filled by youngsters, and the weaknesses and ability of the quintette, Detroit brought out in glar-

Detroit.

George Mullin Twirled. Upon Mullin fell the duty of leadthe Tigers to victory. George didn't have to exert himself in doing it, but he succeeded in holding the rejuvenated outfit to four hits in seven innings. Detroit had a lead of five runs when Jennings took Mullin from the game and sent Killian in to finish it out. Edward proved much an enigma to the budding Browns as was his predecessor, and the visitors added one hit, no tally,

FINE HAIR GOODS.

An exhibit which is entirely new at the Fair, and which is attracting every visitor to the Main Building, is that of Professor P. O. G. Micheel, on the upper floor. The very finest line of hair goods, including a splendid assortment of gentlemen's toupees and wigs, is shown. Professor Micheel has an enormous stock of switches and a splendid display of fancy combs, imported direct from France. A feature of unusual interest to ladies, is the special hand-made rat, offered at 35 cents. The exhibit also includes a full line of hair tonics of Professor Micheel's own manufacture. These are guaranteed to be the best in the world, A full line of switches, curles, pompadours, wigs, self-dressers, bangs, transformations and puffs are shown and at the parlors above 179 Dundas street the most complete and up to date means are in use for curing all scalp and face diseases by electricity. Hair dressing, singeing, shampooing, curling, manicuring, hair dyeing and bleaching are all done by the latest methods. Everything sold is manufactured by Professor Micheel himself in London, and is offered only under the strictest guarantee. Professor Micheel is the best human hair goods manufacturer in Canada, and no one is able to surpass him in ladies' and gentlemen's hair construction. A visit to this exhibit, or to the parlors above 179 Dundas street, will well repay any visitor to the Fair, who is interested in securing the very best hair goods at There is always much interest among lon, J. FEATURES OF WEATHER IN MONTH OF AUGUST

Victoria, B. C., Had 277 Hours of Bright Sunshine.

Toronto, Sept. 14 .- The official metcorological report for the past month, says that in British Columbia, a nearly normal temperature in the south decreased to the Cariboo District, where there were negative departures of from 3 degrees to 7 degrees. In the Peninsula of Ontario, the Ottawa and Upper St. Lawrence Valleys and throughout the Maritime Provinces the average was just, or not quite reached. Elsewhere in the Dominion, the average was generally exceeded. Positive departures of from 3 degrees to 5 degrees wree recorded from Saskatchewan to Northwestern Ontario. Highest and lowest temperatures recorded were 97 degrees at Lorne Park. Toronto, and 26 degrees at Dawson, Yukon Territory. The amount of precipitation which fell during August varied greatly with the district. In the southern parts of Vancouver Island the Central Valleys of British Columbia, throughout Alberta, in most districts of Ontario and locally in Quebec and the Maritime Provinces the amount was much less than the usual quantity, whereas in some of the remaining portions of the Dominion the positive departure was very marked, especially so in the eastern portion of Quebec, the extreme southwestern portion of the Peninsula of Ontario and also in portions of Prince Edward Island.

General Notes.

British Columbia.-With the exception of rainstorms during the third week, the weather was uniformly bright and fine throughout the farming districts, so that hay and grain crops have mostly been secured in good order. Root crops and late varieties of fruit benefited greatly from the rain, particularly on Vancouver Island. Good second crops of hay, chiefly alfalfa and red clover, will be harvested at many points. Victoria had 277 hours of bright sunshine.

Western Provinces .- The weather o August was unusually fine in all districts and most favorable for the crops a bountiful harvest being pretty well assured. Hailstorms admittedly did damage locally, and the local frosts at the close of the month no doubt were responsible for other small injuries, but on the whole conditions appear to be most satisfactory.

Quebec-The weather of the month in the western portion of the Province was for the most part fine and warm with a scanty rainfall, but in the eastern portion rain fell more frequently, heavy local thunderstorms occurring at intervals, more especially between the 6th and 11th, and during the last two weeks the heaviest rainfalls being recorded on the 9th, 10th and 26th In the eastern portion also the temperature did not exceed the average The hav crop is reported about the average; oats fair and vegetables good.

New Brunswick.-A month of fine and exceptionally warm weather, with a marked deficiency of fogs near the coast. Rainfall varied with locality. some places being below and others much above the average.

Nova Scotia-The weather of the month was generally fine, warm and dry with plenty of sunshine. The rainfall, which was moderate, occurred on eleven days.

Prince Edward Island.—The weather was fine and favorable for growing, ripening and harvesting crops. Hay STREET AWAITED fair, average crop well saved. Grain harvesting began on the 21st; yield above average; quality good; all other crops excellent.

In Ontario.

The weather during August was generally fine with a rainfall below the average in most districts, although in the Rainy River and Thunder Bay districts, counties contiguous to Lake Erie, and the Lower Ottawa and Upper St. Lawrence Valleys, an amount the end of the month.

Laid Behind the Counter Until Relief Came.

TERRIBLE SUFFERING OF AN OWEN SOUND CONTRAC-TOR AND BUILDER.

MR. WM. KRANTH, Owen Sound, Ont., writes: "Having read some of the testimonials of cures effected by Dr. Fowler's Extract of Wild Strawberry, I thought it advisable to say a word of praise for its merits.

"Some years ago I was much troubled with stomach trouble and cramps. I used to roll on the floor in agony, and on one occasion I went into a faint after suffering intensely for four hours. A short time after this, in driving to town, I was attacked again and had to lie down in my reports of the great foreign banks

rig, seeking relief.
"When I reached the drug store I asked the druggist for a quick remedy and laid behind the counter until relief came. The remedy I received from the druggist was Dr. Fowler's Extract of Wild Strawberry. Whenever, after that time, I felt cramps coming on, I found speedy relief in the above mentioned remedy, and I am now cured of this dreadful malady. Solid Talk About Pianos

The Piano business demands especial and distinct treatment by the highest commercial capacity. Your thoughtful attention to the following facts will enable us to save you many dollars.

Piano-buyers are the most exacting people in the world. They have a right to be. The money involved is not small; and, money aside, the responsibility of a musical education rests on the right Piano. Tone is everything. Case is only the outward show. 'Anyone with capital can buy wire, wood, felt, ivory, ebony, varnish; but it takes more than money to put people in possession of artistic temperament, genius of organization, and the powerful principle to make Pianos right, because nothing less than right will

FINANCIAL AND COMMERCIAL

APPLES PLENTIFUL ON LOCAL MARKET

Sold at From 50 Cents to 75 Cents a Bushel-Today's Prices.

There was a very fair-sized market this morning, but there was little change in prices. New oats were considerably higher in price, selling at \$1 50 to \$1 59. There were about a dozen loads offered. Apples heavy stockers; prices around \$3.50 t were plentiful and considerably lower in \$3.75; very choice, \$4 to \$4.25; common were plentiful and considerably lower in \$3 75; price, selling at 50c to 75c per bu. Tomatoes, too, were offered in large quantities, the prevailing price for good stock be-

SOME DEFINITIONS

For Beginners in Investments. More or Less Familiar Terms Precisely Explained.

There are always new investors coming on," and some who already have securities drawing dividends, are not familiar with the precise meaning of some of the terms used on their stock certificates. For these A. Ames & Co., Limited, furnish information showing the full significance of the securities of the F. N. Burt Company, Limited, which they are now offering for sale by advertisement. These securities are 7 per cent cumulative, convertible preference shares, which are offered at par, with bonus of 20 per cent of the amount of the preference shares in common stock. The following is a detailed explanaion of the terms used:

7 per cent .- The shares yield dividends at the rate of 7 per cent per year. In this case quarterly dividends are to be paid of 13-4 per cent each, on the first days of January, April, July and October of each year.

Cumulative-If, for any reason, the company should not pay a total of per cent in any one year in dividends to preference stockholders, no dividend can be paid to common stockholders until such shortage and any other shortage from year to year has been paid to the preference stockhold-

Convertible.-In the Burt Company his word signifies that a holder of preference shares may, any time he ikes, exchange his preference shares for the same par value in common shares. This right would come into value on the business of the company becoming so prosperous that the common stock dividend rate could be made greater than the dividend rate on the preference stock. Preference-In the Burt Company

the fixed preference dividend rate is per cent per annum, and the "preference" is as to both assets and dividends. That is to say, if the business should ever be wound up preference shareholders would have to be paid in full, including any unpaid dividends at per cent per annum, before the common shareholders would get anything Common.-All dividends over and above the 7 per cent per annum on the preference shares go to the common shareholders, and in the winding up of the company, they receive all surplus after the preference shares have been paid in full, together with any accumulated dividends.

Subscription books are open at the offices of A. E. Ames & Co., Limited, 7 and 9, King street east, Toronto, and close on or before Tuesday afternoon next at four o'clock.

The firm report a growing demand for this class of security during the last two years, and expect to receive a large number of small subscriptions.
