Select Poetry.

Why live when life is sad—
Death only sweet?
Why fight when closest fight
Ends in defeat?
Why pray when purest prayer
Dark thoughts assail?
Why strive and strive again
Only to fail?
Why hope when life has proved
Our best hopes vain?
Why love when love is fraught
With so much pain?
Why not cool heart and brain
In the deep wave?
Why not lie down and rest
In the still grave?

Live, there are many round thee
Needing thy care!
Pray, there is one at hand
Helping thy prayer!
Fight for the love of God,
Not for renown!
Strive but in his great strength,
Not in thine own!
Hope, there is heaven's joy
Laid up for thee!
Love, for true love outlives
It's agony!

Fight, pray and wrestle on,
Loving God best,
Then, when thy work is done,
Lie down and rest!

Interesting Story.

The Hoosier Schoolmaster.

BY EDWARD EGLESTON.

CHAPTER X.—Continued.

Granny Sanders was not a little flattered by the visit.

"Why, doctor, howdy, howdy! Come in, take a cheer. I am glad to see you. I loved you'd come. Old Dr. Frazier used to say he had lost lots of things of me. But most of the doctors since he z been kinder stuck up you know. But I knowed you for a man of intelligenence."

Mean'time, Small, by his grave silence and attention, had almost emboldened the old hag with flattery without saying one single word.

"Many's the case I've cured with yerbs and things. Nigh upon twenty year ago they was a man lived over on Wild Cat Run as had a brakin'-out on his side. 'Twas the left side, jus below the waist. Doctor couldn't do nothin'." 'Twas Doctor Peacemaker, He never would have nothin' to do with 'ole woman's cures! Well, the man was goin' to die. Every body said that. And they come a driving away over here all the way from the Wild Cat. Think of that air! I never was so flattered. But as soon as I laid eyes on that air man, I says, says I, that air man, says I, has got the shingles, says I. I know'd the minute I seed it. And if they'd a gone clean around, nothin' could a saved him. I says, says I, git me a black cat. So I jst killed a black cat, and let the blood run all over the swelin'. I tell you, doctor, there's nothin' like it. That man was well in a month."

"How old?" asked the doctor.

"There you showed yer science, doctor! They's no power in a pullet. The older the black hen the better. And you know the cure for rheumatiz?"

"And here the old woman got down a bottle of grease. 'That's ole from a black dog. Ef it's rendered right, it'll knock the hind sight off of any rheumatiz z you ever see. But it must be rendered in the dark of the moon. Else a black dog's ole aint worth no more nor a white one's."

"All this time Small was smelling of the uncooked butter, taking a little on his finger and feeling of it, and thus feeling his way to the heart—drier than her herbs—of the old witch. And then he went round the cabin gravely, lifting each separate bunch of dried yerbs from its nail, smelling of it, and then, by making an interrogation-point of his silent face, he managed to get a lecture from her on each article in her materia medica, with the most marvellous stories illustrative of their virtues. When the Granny had gotten her fill of his silent flattery, he was ready to carry forward his main purpose.

There was something wierd about this silent man's ability to turn the conversation as he chose to have it go. Sitting by the Granny's tea-table, sipping corn-bread while he drank his glass of water, having declined even her sassafras, he ceased to stimulate her medical talk and opened the vein of gossip. Once started, Granny Sanders was sure to allude to the robbery. And once on the robbery the doctor's course was clear.

"I low somebody not fur away is in this 'ere business!"

Not by a word, nor even by a nod, but by some motion of the eyelids, perhaps, Small indicated that he agreed with her.

"Who d'ye s'pose 'is?"

But Dr. Small was not in the habit of suppressing. He moved his head in a quiet way, just the least perceptible bit, but so that the old creature understood that he could give light if he wanted to.

"I dunno anybody that's been 'bout here long as could be suspected."

Another motion of the eyelids indicated Small's agreement with this remark.

"They aint nobody come in here lately 'cep'n the master."

Small looked vacant y at the wall.

"But I low hes alters bore a tip-top character." The doctor was too busy looking at his eye to answer this remark even by a look.

"But I think these over-smart young men'll bear looking arter, I do."

Dr. Small raised his eyes and let them shine in assent. That was all.

"Shouldn't wonder of our schoolmaster was overly fond of gals."

Doctor looks down at his plate.

"Had plenty of sweethearts since he waked home with Hannar Thomason Collier night, I'll bet."

"I'll Dr. Small shrug his shoulder? Granny thought she detected a faint motion of the sort, but she could not be sure.

"And I think as how that a filler what tiffles with gals' hearts and then runs off ten miles, may be, aint no letter'n he had orter be. That's what I says, says I."

To this general remark Dr. Small assented in his invariable—shall I say intangible?—way.

"I aint think, may be, that some folks has found it best to leave home and go away. You can't never tell But when people is a-bon' robbed it's wed to look out. Hy?"

"I think so," said Small quietly, and having taken his hat and bowed solemn and respectful adieu, he departed.

He had not spoken twenty words, but he had satisfied the news-monger of Flat Creek that Ralph was a bad character at home, and worthy of suspicion of burglary.

CHAPTER XI.

MISS MARTHA HAWKINS.

"It's very good for the health to dig in the elements. I was quite enaciated last year at the East, and the doctor told me to dig in the elements. I got a fl. real hoe and dug, and it's been most excellent for me. Time—the Saturday following the Friday on which Ralph kept Shooky company as far as the 'bricks' near Granny Sanders' house. Scene—the Squire's garden. Ralph helping that worthy magistrate perform sundry little jobs such as a warm winter day suggests to the farmer. Miss Martha Hawkins, the Squire's niece, and his house-keeper in his present bereaved condition, leaning over the palings—pickets she called enclosed by a brush fence. The stick chimney, damped with clay and topped with a barrel upon at both ends, made this a typical cabin.

It flashed upon Ralph that this place must be Rocky Hollow, and that this was the house of old John Pearson, the on-legged basket-maker, and his rromantic wife—the house that hospitably sheltered Shooky. Following his impulse, he knocked and was admitted, and was not a little surprised to find Miss Martha Hawkins there before him.

"You here, Miss Hawkins?" he said when he had returned Shooky's greeting and shaken hands with the old couple.

"Bless you, yes," said the old lady,

and conversation with her was both interesting and diverting. It helped him to forget Hannah, and Bud, and the robbery, and all the rest, and she was so delighted to find somebody to make an impression on that she had come out to talk while Ralph was at work. But just at this moment the schoolmaster was not so much interested in her interesting remarks, nor so much amused by her amusing remarks, as he should have been. He saw a man coming down the road riding one horse and leading another, and he recognized the horses at a distance. It must be Bud who was riding Means's bay mare and leading Bud's roan colt. Bud had been to mill, and as the man who owned the horse-mill kept but one old blind horse himself, it was necessary that Bud should take two. It required three horses to run the mill; the old blind one could grind the grist, but the two others had to overcome the friction of the clumsy machine.

But it was not about the horse-mill that Ralph was thinking, nor about the two horses. Since that Wednesday evening on which he escorted Hannah home from the spelling-school he had not seen Bud Means. If he had any lingering doubts of the truth of what Mirandy had said, they had been dissipated by the absence of Bud from school.

"When I was to Bosting!"—Miss Martha was to Boston only once in her life, but as her visit to that sacred city was the most important occurrence of her life, she did not hesitate to air her reminiscences of it frequently.

"When I was to Bosting," she was just saying, when, following the indications of Ralph's eyes, she saw Bud coming up the hill near Squire Hawkins' gate. Bud looked red and sulky, and to Ralph's and Miss Martha Hawkins' polite recognition he returned only a surly nod. They both saw that he was angry. Ralph was able to guess the meaning of his wrath.

Toward evening Ralph stole through the Squire's cornfield toward the woods. The memory of the walk with Hannah was heavy upon the heart of the young master, and there was comfort in the very misadventure of the corn-talks like tattered banners and rattling discordantly in the rising wind. Wandering without purpose, Ralph followed the rows of staks first one way and then the other in a zigzag line, turning a right angle every minute or two. At last he came out in a woods mostly of beech, and he placed his melancholy fancy by kicking the dry and silky leaves before him in blows, while the sighing of the wind through the long, vibrant boughs and slender twigs of the beech forest seemed to put the world into the walling minor key of his own despair.

What a fascination there is in a path come upon suddenly without a knowledge of its termination! Here was one running in a zigzag, irregular curves through the wood, now turning gently to the right in order to avoid a stump, now swaying suddenly to the left to gain an easier descent at a steep place, and now turning wantonly to the one side or the other, as if from every caprice in the man who by idle steps unconsciously marked the line of the foot-path at first. Ralph could not resist the impulse—who could?—to follow the path and find out its destination, and following it he came presently into a lone corner hollow, where a brook gurgled among the heaps of bare limestone rocks that filled it. Bud, following the path still, he came upon a queer little cabin built of round logs, in the midst of a small garden patch enclosed by a brush fence. The stick chimney, damped with clay and topped with a barrel upon at both ends, made this a typical cabin.

Calendar for May table with columns for days of the week and numbers 1-31.

THE ACADIAN

WOLFVILLE, N. S., MAY 28, 1886

SECESSION.

The action of the local government in passing repeal resolutions at the close of their last session has been compared by some to that of a burglar's setting fire to a house to cover the traces of his robbery...

CLOSE OF THE YEAR AT ACADIA COLLEGE.

The academic year closes with the College and affiliated institutions in a flourishing state. The College has had 51 students enrolled and will, we understand, graduate more than in any previous year...

A FEW QUESTIONS.

The New Star has at last concluded to mind its own business. That places us where we started. Now we want to ask the council or its spiritual adviser some questions which the Star has very carefully and no doubt advantageously left unanswered.

2. Why was the Star allowed to print Collectors' Banks on greatly inferior paper to that in the specification? 3. Why was the Star allowed to put these banks on smaller size than specification? 4. Why were these tenders opened in the presence of one of the parties tendering? 5. How did our tender get raised to \$7.80? 6. How many jobs of printing have been let by the council for which tenders were not asked, and who received them? 7. Why was the lot of pamphlets just issued by the council not offered for tender, but instead given to the Star?

As these are all pertinent questions in which the public are interested and in which the public money has been used, we have a perfect right to ask them and to expect an answer. We might add that many persons are waiting an answer in order to know just how much the council are protecting the interests of the electors, and if other public business is joggled in the same way. Now will the Star try to keep still if it can, and continue to mind its own business if it has any, or else stop its personal luscious and talk like a man. If it can see no further than doing everything from personal motives it is time it ceased to be a public journal and went into a "private manual ad rat on concem" policy.

CLOSE OF THE YEAR AT ACADIA COLLEGE.

The academic year closes with the College and affiliated institutions in a flourishing state. The College has had 51 students enrolled and will, we understand, graduate more than in any previous year. The health of all on the Hill has been good, so that no interruption of work is taken place; the department is said to have been excellent and the general attention to study marked. Several first-class lectures and entertainments have offered means of culture of much value. The kindly feeling of students for each other has been strengthened by the religious influences enjoyed. The prospects for next year is that the attendance will be still larger. All the Maritime Provinces are fully represented by students, a considerable number of whom are preparing for ministry, while others aspire to law, medicine, literature and politics. Holy Trinity Academy has had 75 students, who come from N. S., N. B., P. E. I. and Quebec. The matriculating class numbers 23. It is understood that the state of the Academy is in every way satisfactory. Acadia Seminary has the names of 79 young ladies enrolled. These have pursued their literary and artistic labors with their usual order, and no doubt the exercises of Anniversary week will bring several of them before the public. We congratulate all personally interested in these institutions upon the success of the year's work and hope the closing exercises may give them much satisfaction. No doubt many strangers will visit Wolfville on the occasion; may they carry away pleasant recollections of their sojourn among us.

A FEW QUESTIONS.

The New Star has at last concluded to mind its own business. That places us where we started. Now we want to ask the council or its spiritual adviser some questions which the Star has very carefully and no doubt advantageously left unanswered.

of others; that it is much better to do so than undertake to prove the truth of the old adage—"Experience teaches a dear school, but fools will learn in no other." Farmers, and others of that set who try to fulfill the divine denunciation, are full of experience; but their ideas, their practices and their surroundings differ so materially that one method of teaching is about as expensive as the other. A very inadequate view of agriculture is usually taken, at the outset, by the beginner. Field labor to be successful depends on the quantity of available manure at the farmer's disposal. The husbandman's chief dependence must be on the home-made material. To obtain this of a valuable kind the animals should receive nutritious food, be comfortably housed, and the manure carefully preserved from injury. "Muck," says the English farmer, "makes meal." Deep stirring of the soil, and a thorough pulverizing help to make meal, too. Commercial fertilizers are not always reliable; they are erratic and expensive. The most productive system of farming is that in which half the farm is mostly devoted to the production of food for the stock. This method with oil-cakes, and provender, would enable a farmer to maintain a large number of animals in proportion to his acres. The superiority of farm-yard manure is obvious. The decomposition leaves a residuum which adds to the staple of the soil, and its presence on the farm is a great advantage as no expense for extra carting is required. With a little attention at the right time it's the right stuff in the right place. Farm-yard manure is shallow cultivation, and their crops usually correspond with the amount of labor expended. The customary depth of plowing is six inches, below that gauge roots rarely penetrate. In growing potatoes the almost universal practice is to take the manure direct from the yards as that root, from the size and strength of the sets, does not require so much preparation as the smaller and more delicate seeds of other roots. Drills are opened at the distance of thirty inches, a narrower space not allowing of easy and effectual cultivation, or room to the roots to expand and multiply. "Numerous experiments have been made in order to ascertain the best distance at which to plant, the best kind of manure, and the result appears to be, that in dry ground, drills twenty inches apart, with sets of a good size, obtained by cutting medium-sized potatoes, and laid fourteen inches one from another, on a sufficient quantity of rich, well-rotted farm-yard manure, yield the most remunerative crop. The after-culture consists in hoeing and earthing the crop, that is, in laying some earth up to the stems of the plants with the plow. This process of hilling or ridging is being questioned, although the practice is very general. Others contend that flat culture is better, that a deeper seed-bed is required, and deeper preparation of the soil admitting a greater expansion of root fibers. In the cultivation of green crops, turnips and mangel wurtzel are special roots; both require abundance of rich manure, careful and deep cultivation; both are excellent preparatory crops. Mangels may be produced on almost any kind of soil, but they thrive best in good loam, and a sheltered situation. What farmers agree on principally, is an abundance of good hay. That is about it. They don't value the expense of fodder. "Experience is good if not bought to dear." There is a good deal of experience in Nova Scotia. Feeding out hay at twelve dollars a ton—an undefined agricultural problem. A beginner at farming should ascertain what his land is capable of doing, whether special or mixed farming, and what improvements it is susceptible of. "It is better to be sure than sorry." John Jakes, of Pessiquid, was not considered a farmer in the broad sense of the art, although he was solid on potatoes and spade culture. The boys called him "Old Hortus," because he wouldn't allow them to steal his pears and plums. Pessiquid is a great place for flowers, fruits and garden truck, generally allowed to be the best locale in the province. Jakes was said to be close-fisted; not in a pugilistic sense, although when there was occasion for such activity—it was uncommonly sudden—usually he was on his guard. As he habitually ranged up in line with the elders of his church he esteemed "discretion the better part of valor." Once he woke up—not during divine service, but on the deck of a vessel—and tipped a fellow over as quick as a flash—a striking aspect of evolution and dissolution. Great allowances must be made for them "who go down into the sea in ships." A man rigged out in his "spotted Sunday vest," listening to a discourse on moral science, is, to appearance, an exemplary individual; but on the deck of a ship in his everyday duds, bosing a crew red-hot from an infatigable, as it were,—there moral science is reversed—valor is better than discretion every time. His mate remonstrated on such sudden display of activity, and he being a member of his church, too, he expressed much sorrow and remorse for the deed, but he "couldn't stand a row,"—his man calling him a liar. "He grew potatoes in trenches opened out with a spade, a foot deep, and a foot wide, barn-yard manure placed in 6 inches deep, seed (early Vermont) planted one foot distant, two eyes to a set, covered with three inches of soil having three inches to be raked in at after culture—yield from a quarter of an acre 100 bushels, all good; the intensive the following year on receiving like treatment. By this Prince, his neighbors, pleased with the success of Jakes, tried the experiment on his ground and failed, losing his labor. Being somewhat of an inquisitive turn of mind—the neighbors say "he is

CLOSE OF THE YEAR AT ACADIA COLLEGE.

kind of crochety, always wanting to get at the bottom of things"—look in the situation at once. He bought drain tiles, pipe tiles, and drained the land, taking every precaution necessary to permanency and perfect drainage. It was not long before he was in a position to beat Jakes in growing vegetables. Prince's ground artificially drained was every way better than Jakes' naturally drained land. It stood drought better, besides being a superior quality of soil. Wet and stiff soils with thorough drainage admit of more perfect tillage, and are made more valuable than light and dry land. Manure acts with greater effect, and almost any kind of crops can be grown with certainty and advantage. The importance of underdraining land is frequently urged upon the attention of farmers, besides a liberal application of manure and a deepening of the soil. Drainage may or it may not add to the fertility of the land—that is an open question—yet it is essential to the development of fertility. Rich soils are an important factor in farming. We have daily evidence on the part of farmers to procure material suitable for compost. The accumulated refuse of towns and villages, the contents of muck-beds, the collection of sea-reef cast upon our coasts are all called into service. These components of the compost are, to the diligent, a clear gain. There are sources of fertility going to waste in all our towns and villages, and it may be added, in most of our farms also, that, if properly economized, would greatly assist the farmer in his efforts to raise abundant crops. In making a compost you may use one load of manure to three of muck, just in proportion to the strength of the manure. Warm weather hastens fermentation. If forked over several times the compost will be ready in eight or ten weeks, but it is always essential that the material should be thoroughly decomposed. If a compost is wanted enduring in its effect, add twenty or twenty-five bushels of ashes (hard wood) to a cord of compost. In manured value of potash takes first rank; it is indispensable. Most farmers have some special privilege of procuring suitable material to mix with barn-yard manure, especially those living in wooded districts. Forest leaves as bedding material are unsurpassed. In a compost they induce a very active fermentation. Loads of material are suffered to decay in the woods that a diligent man could make effective, burning refuse wood, stumps, and all incumbrances of the ground for the ashes. The bulk and quality of compost, annually made, may fairly be taken as a measure of the profits obtained. For the farmer's first and most important crop is the one which comes out of his barn cellar.

MARKET REPORT.

Price Current this day: Apples, Green, per bushel 1.75 to 3.00; Dried, per bushel .05 to .10; Beef in Quarts per lb. .06 to .09; Butter on foot per lb. 7.00 to 8.50; Butter on boxes per lb. 20 to 21; Eggs, Ordinary per lb. 17 to 19; Chickens, per bushel 40 to 60; Ducks, per dozen fresh 50 to 70; Eggs, per dozen fresh 15 to 20; Cheese, each 50 to 60; Hams smoked, per lb. 10 to 11; Hides, per lb. inspected .07 to .07 1/2; Lamb, per lb. 60 to 67; Mutton, per lb. 57 to 60; Oats, per bushel 45 to 50; Pork, per lb. 60 1/2 to 67; Potatoes, per bushel 40 to 45; Green, each 50 to 60; Turkey, per lb. 13 to 15; Tomatoes, per bushel none; Veal, per lb. 55 to 60; Yarn, per lb. 40 to 45; Carrots, per bushel 20 to 25; Turnips, per bushel 20 to 25; Parsnips per bushel 1.00 to 1.10.

R. PRAT.

THE ACADIAN

WOLFVILLE, N. S., MAY 28, 1886

Local and Provincial.

FOUND-A shop-keeper. The owner can have the same by paying for this notice.

Mayor Duffy, of Moncton, offers to head a citizens subscription list with \$100 for the enforcement of the Scott Act.

Fishing Tackle nice assortment at R. PRAT'S.

Dr Theodore H. Rand formerly a professor at Acadia and for the last year occupying a chair in McMaster's Hall, Toronto, has been appointed principal of Woodstock Baptist college.

J. E. DeWolfe & Co., Kentville, have received to-day 50 bus. Timothy, 1,000 lbs. Clover, 4 cases Garden Seeds, 2 cars Flour, 1 car Meal. It will pay you to call.

FRU-We did think some of publishing some items on the catches made on Monday. On consideration of the matter however we have concluded that we won't do it. The boys know why.

Linen and Rubber Carriage Rugs at Burpee Witter's.

Don't Forget-the Great Plant Sale in Arnold's Block, Kentville. Close on Saturday. Plants from 5 cents to \$1.50, 3 d. z. Budding Plants for \$1.00.

Choice Imported and Domestic Cigar at 3, 4, 5, 7, 8 and 10 cents at J. M. SHAW'S.

PAINT-Dr W. D. Patterson is having his shop painted, and under the hands of Mr White it begins to look like new. We could mention several other buildings that would be the better of a coat of paint. Now is the time to make improvements.

Com Meal \$3.50, Feed Flour \$3.75, at R. PRAT'S.

The Liberal convention, held at Kentville on Monday, nominated Messrs. Leander Hand of Canimac and A. P. Welton of Kingston, as candidates for the Local Legislature. The Liberal Conservatives nominate on Monday next at the court house.

TAKE NOTICE-If your razor is dull, take it to J. M. Shaw's Barber Shop, and he will put it in first-class order for the small sum of 15c. 10 if

Rev. Joseph McLeod, editor of the Religious Intelligencer, Fredericton, N. B., will preach in the Baptist Church on Sunday morning next. Mr McLeod is leader of the Free Baptists of the Maritime Provinces and is highly esteemed as a preacher and editor.

Wanted immediately a first-class pant maker; also a vest maker. Good wages will be given. Apply to Messrs. Milne & Christie, Welster Street, Kentville.

MUSIC-Mr John S. Jones of the "New Music Depot," Halifax, passed through Wolfville on Saturday on his way to Moncton, N. B. We understand that he is desirous of establishing an agency in this town, and with that aim in view would like to correspond with some good, active man with a small capital.

Cedar Posts for sale low at S. R. Sleep's.

PERSONAL-Mr and Mrs A. S. Murray spent a few days in Wolfville this week. Mr C. W. Williams arrived in Wolfville last Saturday evening and intends stopping a few weeks. Capt. Clarence Pelee is home on visit. Mr R. W. Ford is staying in the village. Mr Wm. Jones arrived here on Wednesday evening.

THANKS-We take this opportunity of expressing our thanks to Messrs J. L. Bishop, Albert Forsyth and Marshall Forsyth for a fine string of trout which we were the recipients of on Monday last. These gentlemen spent Saturday fishing on the Forks river and were abundantly repaid, having succeeded in hooking some six or seven dozen of fine fish.

R. Prat is taking orders for FRESH SALMON, to be delivered for Anniversary dinner.

A WORD TO THE WISE-Being among the long list of public benefactors, we wish to call the attention of the College people to the fact that, as dark nights usually set in during anniversary week, it would be a good idea to have the approaches to the College marked by lights of some sort. Last year considerable inconvenience, and some personal injury, was experienced owing to the darkness and consequent difficulty in keeping on the roads to and from the College. If you doubt this ask the Governors.

Having recently imported a "Perfect Ion Sharpener," I am prepared to sharpen and put in first-class order shears and scissors of every description. Perfect satisfaction guaranteed. J. M. SHAW.

J.F. HERBIN,

WOLFVILLE, N. S., One door east of Post Office.

Watches, Clocks, and Jewellery REPAIRED

ENGRAVING Done in Every Style!

Local and Provincial.

Nomination day for the Local Legislature will be on Tuesday, June 8th, and the elections will take place on the 15th.

Try Soluble Pacific Guano, R. PRAT Agent.

NEW STORE-Mr Dodd has commenced business in the store lately occupied by Miss Hamilton. He is showing a very pretty stock and his store presents a fine appearance. We wish him success.

The steamers of the Yarmouth Steamship Company will make three trips per week for two weeks from Yarmouth to Boston on Monday, Wednesday and Saturday's. This route is a favorite and is largely patronized.

CIDER-It is a well known and disgraceful fact that some respectable people are selling cider to the students and village boys whereby they are made drunk and disorderly. It may be done thoughtlessly but it does not cease the offending ones may get into trouble.

Lace Curtains and Sets, Beautiful Patterns, low prices at Burpee Witter's. 7 This is the size of the fish he caught. And carried home that day:

And this is the size of the one he hooked, But "the blam'd thing got away!"

Everybody should see Burpee Witter's fine stock of CLOTHS before making their purchases. 5

To the Editors of the Acadian.

DEAR SIRS-At a large and enthusiastic meeting of the King's Co. Temperance Alliance, held at Coldbrook, on Thursday, the 20th inst., the following resolutions were unanimously adopted:-

"The members of this Alliance having heard with sincere regret of the illness of their Brother Matthew Fisher, desire to express their heartfelt sympathy with him and his family. We miss his wise counsel in our deliberations and hope he will be restored to health and again be permitted to meet with us.

"Resolved that this expression of sympathy be sent to Brother Fisher by the Secretary.

"Resolved that the thanks of this meeting be extended to Mr Charles Woodworth for his valuable services voluntarily rendered to this Alliance and to the temperance cause in general, by obtaining evidence to commit a number of liquor dealers in this county.

"Resolved that copies of the foregoing resolutions be sent to the New Star and ACADIAN for publication."

R. R. DUNCAN, Secretary.

THE TWO WAYS.

TENDALL'S PROPOSAL. "Saccharine conglomerate of protoplasm! Adorable combination of matter and force! Rarest product of infinite ages of evolution, the luminiferous superabundant, yes luminiferous ether, is no mere response to the rays of light than are my nerve centres to the mystic influences which emanate from the photosphere of thy countenance. As the heliocentric system was evolved from primordial chaos by the workings of the inexorable law, so is that rarification of matter which men call my soul lifted from profound despair by the luminance issuing from thy visual organs. Deign, O admirable creature, to respect that attraction which draws me toward thee with a force inversely proportional to the square of the distance. Grant that we two shall be made double suns describing concentric orbits which shall touch each other at all points of their peripheries."

MR TENDALL'S PROPOSAL. DEAR MISS-I was informed by Mr -that you wanted a Correspondent and I took an opportunity to write to you that you and Me might Correspond to gether and hope when you see Me you will not change your Mind as I Am a going away this summer. I would like some one to write to. hope it May be a grea apple that we may Make a Match. I am not Rich a t ll but will do all I Can to make a girl happy. I am a Cook and a Candy Maker. I hop you will write to me and let me know what you think a bout My Affair, as I am tired of single life. I thought I would get Married this fall or next spring as I dont Know much a bout writing love letters you will excuse this one this is what I call postal courtship, and hope and hope that you will remain Mine and hope that you will remain Mine by the time I see you charmed Me by the Magic at-thine eye day after day. I watched and sigh, watch the dream of the sigh, for the alone fair Star of Albion I call my one deatht Miss-I hope what ever you will do you will Consider to be Mine and Mine only if you Can state the Case to yours, you would be ashamed at your father or mother to Know I Mother a knowing any thing a bout it, and I hop you are the same I love you very Much and I hop you will love Me to whoe we come to see face to face, you Must excuse all of the Mistakes and also the writings, as I have not had Much practise a writing love letters I should be happy if we Could Correspond to gether.

Ma. The above letters form a striking contrast of two ways of settling this momentous question. They are bene fide letters, which through chance came into the hands of a correspondent. The names are withheld out of consideration for the lady.

Anniversary next Thursday. We have not been able to get the order of exercises but presume the usual order will be carried out. A grand entertainment will be held in the evening at which the music will be furnished by the Haydn club of Halifax.

ONTARIO MUTUAL LIFE ASSURANCE CO.

DOMINION DEPOSIT \$100,000.

HEAD OFFICE, WATERLOO, ONT.

The "Ontario Mutual" is the only purely mutual company chartered by the Canadian Government. It is also the only Life Co. doing business in the Dominion that attaches to its policies a definite cash and paid up policy value, which forms an important part of its contract. The effect of this liberal and equitable provision will be readily gathered from the following example: Policy No. 771, \$2,000; age 21; ordinary life premium \$25.88; 15th year premium reduced by application of surplus to \$26.47.

Total paid in 14 years.....\$633.07 Present cash value.....492.30 Total cost 15 yrs assurance.....\$140.77 Average annual cost \$4.69 per \$1000.00 Paid up policy value \$500.00 Full information at Avonport, N. S.

DR. O. W. NORTON'S BURDOCK BLOOD PURIFIER!

Purely Vegetable!

A Valuable Compound FOR RESTORING HEALTH

Hundreds have been cured by us

it for LIVER COMPLAINT, COSTIVENESS, DYSPEPSIA, SALT RHEUM, CATARRH, RHEUMATISM, IMPURE BLOOD, LOSS OF APPETITE, KIDNEY DISEASE,

GENERAL DEBILITY.

READ THE FOLLOWING TESTIMONIALS.

Weymouth, Sept. 14, 1885.

DR. NORTON: Dear Sir,-For twenty-five years I have been afflicted with Salt Rheum, and last Summer my head and part of my body was one fearful sore. My husband employed at different times three doctors, which failed to do me any taking your Dr. O. W. Norton's Burdock Blood Purifier, and after taking three bottles, an entirely cured, as I have not the least symptoms of it since. The Blood Purifier has also cured Capt. Brooks of Dyspepsia and Liver Complaint.

Yours truly, Mrs. John Grant

ARTHUR BLACKBURN, of Newport writes: "For five years I have been afflicted with two Erysipelas Fever Sores on my legs. Have consulted all the doctors far and near. All medicines failed to do me any good until last fall I commenced to take Dr. O. W. Norton's Burdock Blood Purifier. After taking seven bottles my sores are entirely healed up and I am as well as ever."

"February 9th, 1887."
