How Hazing Was Stopped.

Try as hard as they might the profe Bradford were powerless to stop hazing in the famous old institution. It seemed as much a part of the undergrading life as No one could tell when the custom originated and surely no one had prophetic vision keen enough to predict when it would end. To all appearances the spirit of hazing was a part of the college endowment. As class after class graduated, the traditions of sophomore daring increased until it became the ambition of every underclassman to leave a record of "Bloody Monday"

doings unsurpassed by any previous class.
"I tell you, fellows," exclaimed Ralph Gilman, the son of the president, leaning against the bookcase in Cyrus Downing's on, where they had gathered for consul ation the Saturday before the memorable 'Bloody Monday" "I tell you we must do comething out of the ordinary this year. There's no use talking, we must eclipse last year's class or we'll be the laughing stock of the college. Got any plans, you fellows !"

younger than most of the others present, slowly arose. It was "Billy" as the boys called him. William Dunlap, who, to pay his way through college, did various odd jobs for different members of the faculty. "Well, Billy?" as Ralph gave him the floor. "Hope your plan isn't anything rash -we don't want to run any risks," and he smiled meaningly to Tom Ellis and Carl Whitman on the sofa.

thought it would be." He rested his left hand on the table beside him. The eyes of all the class were curiously turned his way. "The fact-or rather my plan, is to do

away entirely with "Bloody Monday" night, and to stop hazing this year, and then to use our influence to prohibit it being practised in college in the future." A murmur of surprise went round the room, followed by determined head shaking.

as a class, and a member of it the son of the college president?" exclaimed Ralph frown-

"That-that's one of the reasons why I suggested the plan," continued Billy calm-"That a member of the class is the esident's son-and if the contemptible practice (you know the indignities we were subjected to last year) is ever to cease, it's the time now to act. You know how the fac ulty feels about it, and how it worries Presint Gilman and-and the disgrace of it all. I say it ought to stop-it's gone far enough." There was silence for a moment in the room. Ralph was the first to speak.

"I partly agree with the gentleman who spoken-hazing isn't a covetous honor to the school, I admit. I think we lost a umber of students this year just on that ount. You know the Packard boys went o Tipton, and three of the class who graduted from Hudson entered Know. If it's thought best after this year to act as Billy proposes we'll do it, but not this fall. They'd all say 'twas because I was a sopho more, and I was compelled by my father's position to persuade the class to give up hazing, and that would put us all in an unavorable position! I for one am strenuous y opposed to taking any such action as

"As I was saving it is just the thing for s to make use of on "Bloody Monday." We can take the fellows-not all, of course, but only the freshest"-and stand them up in a row in the ditch, and fill the earth in around them, leaving only their heads exposed. 'Twill be great when the fellows get about in the morning—to see the campus "Whom had we better put in ?" was the

"There—good bye, fellows. Must hurry to catch my train. Wish I could see it out. Enjoy yourselves." And he was off. He made a motion again to take up "I-I can't-I know it all-no use to read it !" And he raised his hands to his head. "I-I am to blame, and father at the head of the institution-that makes it doubly culpable. Oh father !" and Ralph bowed his head on the seat in front of him and didn't look up till he heard the breakman call, Bradford, Bradford !"

Almost too weak to stand Raiph picked up his grip and started for the door. "The police will be there when I get off," ught, and he could see his father's haggard face among them. "I could have used my influence to prevent it—the boys didn't want to put Stanley in."

"Why!" Ralph stopped almost dazed. "There's nobody here—only the usual number of passengers going to Carville. They probably telegraphed to hold me at Auburn, and missed me. "Carriage ? Have a carriage ?"

But Ralph preferred to walk. "I'll get there soon enough without riding," he groaned as he left the platform.

*Of the terrible periods of starvation that swept over Ireland, beginning in the year 1845, the famine of 1848 will be remembered as the most destructive and devastating. While the suffering in the congested districts of the larger cities was widespread, yet, to counterbalance this, there was in these places an organized system of relief conducted along both public and private lines. Maggie, his wife, with a wistful smile on her wan face, sought to comfort him with words of hope as the night wore on; but in the gray hours of dawn, when she thought that he was sleeping, she stole softly out of the cabin. When he followed her he found her leaning against the window-ledge, sobbing

A cry from the sick baby drew her into the cabin. She smoothed the little sufferer's tangled auburn Ralph. "You look as though-why, man, looks and moistened her fevered lips with water. Then, taking her in her arms, she crooned a soothing air until the child slept. It was night when Shaun returned, dragging his feet after him as if they were weighted. He stumbled toward the bed, and lay on it with a long-drawn sigh of weariness, closing his eyes that he might the more thoroughly enjoy the sense of rest that came to him. Maggie came close to

him, with evident anxiety to hear the result of his errand. After a while he opened his eyes and spoke: "I sent the letter on the first mail. I met Squire Bagley -him that used to visit at Sanderson's-and I tould him that I wanted sixpence to post a letter. He gave me a shillin', an' I bought this for her."

He pointed with his thumb towards little Mary, and Maggle noticed for the first time that he held a package in his hand. She ened the parcel and found a sixpenny load of dark bread, and then she broke some of the loaf into water, treasuring the crumbs as if they were gold. Before feeding the mixture to the child, she offered some to Shaun, but he would not eat any, and turned to gnaw the sodden potatoes that were on the rude table.

The wind wailed dismally down the chimney, and, as if in answer to an unexpressed thought, Shaun shook his head dejectedly, saying, "No, there's no use thinkin' that any one would venture to night." A few minutes later there was a contra tion to his speech, in a guarded knock that came to the door. Shaun and Maggie both rose to their feet and listened. The knock was repeated.

> Protection and Reciprocity. (New York 'Evening Post.')

(New York 'Evening Post.')

Senator Hoar made some remarks before
the Essex Club at Salisbury Beach, Mass.,
simultaneously with President McKinley's
speech on reciprocity at Buffalo last Thursday. The senator said that he was not opposed in all cases to such commercial arrangements as the President recommended,
but he felt bound to caution the manufacturers of New England not to enter upon
this great struggle, with all mankind as a
competitor, by placing any fetters upon
their own limbs. What he meant by putting fetters on their own limbs was explained in the following manner: ting fetters on their own limbs was explained in the following manner:

The possession of your own market is what has gained for you the power and the opportunity to enter upon foreign markets. Be careful that you de not throw away that vantage ground. Remember that nearly every considerable reciprocity treaty we have ever made, especially our old reciprocity treaty with Canada, has been a source of unmixed vexation, and you were eager to get rid of it as soon as its term expired."

This means, apparently, that if the present tariff enables the producers of anything to sell their goods at higher prices in the home markets than they sell the same in foreign markets, they had beet not consent to any relaxation of the tariff which gives them such rare opportunities. It is to be hoped that the question of reciprocity may be debated in open session of the Senate at the coming session, and that Mr. Hoar may be asked whether he really means this. It will be a good time then to ask him also what foundation he has for the assumption that the mannfacturers of New England were dissatisfied with the old reciprocity treaty with Canada. Mr. Hoar says that it was a source of 'unmixed vexation.' Our recollection is that it was a source of 'unmixed vexation.' Our recollection is that it was a source of Snew England, and that the real cause of its abrogation was the bad feeling growing out of the civil war and the operations of Confederate agents in Canadian territory. Without this cause of irritation, the old reciprocity treaty might have remained in force to this day. At all events, the manufacturers of New England would never have taken a step to abrogate it. ing fetters on their orders in the following manner:

The Dominion Iron and Steel Company has already secured a foothold in the United States market, and has demonstrated that it is a competitor of the big Pennsylvania plants. Three cargoes of pig iron, making in all two thousand tons, have been shipped from Sydney to American ports. Two of these cargoes went to to Boston, and the other to Hoboken, N. J. It is understood that the iron has proved very satisfactory and that other cargoes will shortly be shipped. Notwithstanding the high duty imposed, Sydney pig iron can be landed at Boston at a lower figure than iron from Fennsylvania. The Dominion Iron and Steel Company has also found a market for its iron in Sootland. Twenty thousand tons of Sydney pig iron have been sold in that country, and the first five thousand tons will leave here this week in the steamer Dumore.

The emigration returns from London for August show the number of emigrants to leave for Canada during the month was 4.746 Of these 2.042 were Euglish, 274 Irish, 573 Scotch and 1,347 foreigners.

President McKinley is Dead.

Buffalo, September 14.—William McKinley, the 25th president of the United States, died at 2.15 a.m. this morning from the effects of an assassin's bullet. Theodore Roosevelt, the 26th president of the United States, succeeds to that exalted office under the constitution and laws of the country, and with the administration of the oath of office to-day he will begin the exercise of the office of president. In these statements are embraced the consummation of an awful tragedy and the historic event by which the entire administration of government is changed and a new administration comes into being. But for the moment the transfer of the government is forgotten in the great sorrow which has fallen on the nation in the passing of President McKinley. Soldier, stateman, president, devoted husband and friend, he was beloved by all who knew him.

I have maintained that any man, no matter I have maintained that any man, no matter how rich or powerful he may become, no matter what positions of power he may hold, will, as he draws near the end of his life, find the most satisfaction in reviewing the acts where he has been helpful and kind to those who are weaker and poorer than he is. President McKinley's life has been filled with acts of kindness which make up one of the brightest and most satisfactory pages of his busy life. He will be sincerely mourned by the American people as a whole, but his memory will be especially prized by the host of people whose burdens were lifted and into whose lives bright rays of sunshine came from the kind heart of William McKinley.

Where was Assassination Planned?

Cleveland, Ohio, Sept. 12 — The police of a dozen cities are using every endeavor to obtain evidence that will demonstrate beyond the shadow of a doubt that Emma Goldman, the anarchist, held a number of secret meetings while in Cleveland last May, and that it was at one of these rather than at the public meetings that she made the speech which inflamed the mind of Czolgosz and caused him to shoot President McKinley. The police officials are assisted by every available man in the secret service department in this task. They will attempt to show that while in Cleveland meetings were held at which the assassination of the President was planned. Mr. Theodore H. Better put out six trees of the right kind, and plant them in the best possible manner, than sixty trees put out in a slipshod fashion, and in twenty years the former will be getting more fruit than the latter. About thirty years ago a neighbor said to me:

great extent. There will be a big demand for them in the West. Then, as they are of such fine quality this season, we should endeavor to our utmost to get a fine lot of special country. Then I began to fall behind. My apples began to get smaller and smaller them over to Englind in prime condition, and show the Englishmen that if we cannot produce "dukes," we can produce fruit, and that the finest in the world.

The shortage in the apple crop in most came into bearing. Also the mystery was been a drug in the market. that we have reached the point of over-production of apples of the best quality by a very long way.

Last year the press all over the country reported an enormous crop. The Americans were reported to have a record-breaking crop. Apple brokers in the Old Country advised that apples must be bought at a low price or there would be no profit in shipping them. And yer apples never realized better prices the season through in the British markets than last year. And this spring they are worth from \$3.00 to \$4.50 per barrel for best varieties.

We have not exploited our own home market yet. Our own Dominion should aborb a very large percentage of our aurplus stock. With great development going on in Algoma, and the rapid settlement of our millions of acres of fertile lands in the Northwest, it seems to me that the prospect of a home market for a great part of our surplus fruit is very encouraging indeed.

Sometimes it pays well where a man has suitable storage, 'to hold his apples ever until spring and sell at a very satisfactory price in our own cities and 'towns. Of course, if this plan were generally adopted, there would probably be too much thrown on a somewhat limited market in the spring, and prices would vary accordingly. Then very few have the faculties for storage, and there is a considerable waste. About the worst place to store apples is in the sellar of a house you are living in. The best way to keep apples is to fill the baarels, head them up tight, and lay the baarels, head them up tight, and lay the baarels, head them up tight, and lay the barrels on their The far-famed "Garden of Canade," the Niegars fruit delatriet, is the year—the first of the new contury—taking a comparative rest, as a consequence of the shortage in the fruit cresp the people of Canada are paying more for that product than they have for some years past. That spart of Otataris of the contract and the incursation on the west and Niegars. Talls on the east, Lake Oharden on the contract and the incursation of the shortage in the built of their fruit supplies. Such will always be the case, for there is no other section in this vast_Dominion where the soil and climatic influences are so favorable to bringing excellent fruit to perfect maturity. The reason of the short crop in this district this season was not a late spring, though the contract, and the winds, could not do their work in the fertilitation of the blossoms. There never was a more magnificent delay of the respectation prices they are getting for their products, while those who have not expected the some product of the place for the contract, and the winds, could not do their work in the fertilitation of the blossoms. There never was a more magnificent engineer. The respectation prices they are getting for their products, while those who have not realized. As a consequence, those growers who have fruit are wearing long smiles to correspond with some of the long prices they are getting for their products, while those who have not because of their products, while those who have not because of their neighbors.

The exerly small fruits ruled high, strawberries ranging from \$1.50 to \$2.50 per 2 to the contract of the product of th

But for commercial purposes and for profit, the six varieties recommended cannot very well be amended or improved upon. The average orchard we find through the the European market. The United States has a short apple crop this year, and they will not be likely to flood the European markets. I am not one that believes in "hanging on" to fruit or anything else, when once I consider I am offered a reasonable price, and unless you are sure of being able to preserve your apples in good condition on into winter way much better part with to preserve your apples in good condition on into winter, you might better part with them soon after they are harvested, as it them soon after they are harvested, as it for his own use. The Kingdom of Home.

Some of the wives and mothers, a number the sisters, and a good many of the daughers, think a woman was made for something better than housework, something nobler han mending stockings and sewing on buttons—a grander sphere than one bounded by the walls of home. I heard one say: "It is | suit." such a sordid-life, your hands in the dish-She Showed Him Her Work. ater, your face over the stove, your houghts with to-day's dinner or tomorrow's breakfast, while other women are making a | was fiercely scrubbing one dirty garment afname for themselves." He knocked on the front door until make, floors to sweep, clothes to wash, to he was tired, and then he went around to make, to mend, and alway, always food to the back door. The woman was bobbing cook; it's a wonder that all housekeepers are up and down over the washboard. "Good morning, madam," said the book not insane." I listened and pondered. It agent, pleasantly. seems to me that as a nation we are not so happy as we were fifty years ago. We are icher, but too often ambition on the one hand, and discontent on the other rob ou lives of much, if not all, of the pleasure of existence. Talk of the monotony of house-

work! Go and ask the women who work in telegraph offices nine or ten hours a day if they ever weary of the ceaseless noise, the cramped position, the endless round of telegrams so much in nature that one wonders if the minds of all men are cast in the same mould. Ask the girls at the telephone ex. dirty clothes. change if they get tired of the monotonous "Hello! What number?" Ask the typewriter if the rattle of the machine grows tiresome, and the demands of her employer the same after years. Ask the litertary woman the successful author, whose work the public demands, if she ever feels the strain upon heart and brain. No need to ask the factory girls, the needle-women, the women in hundreds of humble avocations, if life is sordid and monotonous. To them a house to keep, and means to keep in a very modest way, is the summit of bliss. Discontent is the bane of our existence. Women need an education first of all that shall give them a ntented spirit. Every one who has studied the subject in the least, knows that house work properly conducted is the most health-

ful of all womanly occupations. Mrs. Poke and Mrs. Rush. Mrs. Poke sets out to do a days work, out she loses a half hour here, and a quarter hour there, in considering what to begin with. Then she has only a vague plan in her mind of what she means to do, and she starts two or three things at once and finishs none of them. She rips out her sewing ecause she has not succeeded in making every stitch invisible. In the middle of her baking she is attracted to the morning paper, reads it, omits her baking powder, and

produces a batch of heavy biscuits. Mrs. Poke's work is never done. Mrs. Rush is in a whirl from day dawn to dark. She is hammering and pounding, fly-ing and fretting until her own nerves and those of her family are nearly worn to shreds. She scolds her children, nags at he husband, and cannot keep a maid. Nobody wants to live with Mrs. Rush. One of thes days she will die of collapse and nervous ex-haustion, and few will mourn for her though she is a good woman and an estimable n er of society.

Mrs. Method is a more successful house

keeper than either Mrs. Poke or Mrs. Rush, and will live longer, be happier and do more good than they. —A sudden and wearing attack of coughing often needs immediate attention, especially in consumption and those chronically ill. In an emergency, that ever useful remedy, hot water, will often prove effective. It is much better than the ordinary cough mixtures, which disorder the digestion and spoil the appetite. Water almost boiling should be sipped when the paroxyisms come on. A cough resulting from irritation is relieved by hot water through the promotion of secretion, which moistens the irritated surfaces. Hot water also promotes expectoration, and also relieves the dry cough. The effect is also pleasing to the nerves.

People said I didn't have proper pride about wheeling, but I wasn't taking any risks, and the very thought of coastin made my blood run cold. One day we starte for Annisquam, and about half-way there we struck an awful hill. It was frightfully steep and long, and was full of gravel. Ther there were springs in the woods, so that little streams ran across the road diagonal and had washed out deep hollows.
