NO. 16

### Captain Joshua Slocum Given Up for Lost.

Sailed a Year and a Half Ago in Famous Sloop Spray, for the West Indies,—Wife Has Abandoned Hope of Return.

New Bedford, July 24.—Capt. Joshua Slocum, master of the famous sloop Spray and author of a book, "Sailing Alone Around the World," has been given up as lost by his wife.

Capt. Slocum sailed from Vineyard Haven for the West Indies more than a year and a half ago to escape the severity of the approaching winter and has not since been heard from. He sailed alone and was last seen by a passing steamer, which reported the Spray as making heavy weather.

Capt. Slocum was sixty-six and he has made voyages to all the seas of the earth in the famous sloop.

Mrs. Slocum, his wife, is living at Vineyard Haven.

"I believe beyond all doubt that Capt. Slocum is lost," said Mrs. Slocum. "He sailed Nov. 12, 1908, going south for the sake of his health. I had often accompanied him on short voyages but I did not like to go on so long a voyage, although he desired it. We expected to hear from him when he reached the Bahamas and always made a point of keeping his publishers informed. Neither of us has received word and the steamer companies that run to the Bahamas have no tidings beyond the report a few days after his sailing. I am convinced the Spray was run down by a steamer at night.

Capt. Ernest Dean of Chilmark, who cruised in the West Indies last winter, made inquiries everywhere but could not learn that Capt. Slocum reached the islands.

Capt. Slocum was born in Nova Scotia and was a sailor all his days. He finally became a commander of

vessels and was wrecked in the bark Aquidneck on the coast of Brazil. He built a sloop, the Liberdade, in which he cruised home and later exhibited his boat and curiosities at country fairs and along the coast.

He was given an old sloop abandoned at Fair Haven, Mass., and rebuilt her. She was thirty-feet long and her timbers were largely green wood, apple tree trunks from an old orchard being used to quite an extent. Yet the vessel was taut and staunch, and after cruising along the coast he sailed from Yarmouth, N. S., on July 2, 1895, on a world cruise that lasted three years. For a long interval at that time he was given up as lost. Later he visited ports all along the coast, selling his books and curiosities.

In 1908 he brought home a piece of green coral weighing two tons. He purchased a farm at West Tibary and undertook the culture of hops, with slight success.

Capt. Slocum has a wife and four children. One of his three sons, Victor J., is now on a whaling voyage. Another son is Benjamin A., of Lynn, and a third, James Garfield Slocum, lives in New York City. His only daughter is Mrs. Arthur Joyce of Atleboro.—Boston Globe.

TELEPHONE EMPLOYEE  
SERIOUSLY INJURED.

Halifax, July 28.—(Special)—Geo. Walker, an employee of the Nova Scotia Telephone Co., while repairing a wire on a post on Quinpool Road, this morning touched a live wire with his hands and was thrown from the pole. He was burned some, but his worst injury is sustained by the fall. He is in a critical condition.

### Annapolis Royal English Church Celebration

(Annapolis Spectator)

On the opening of Friday last Bishop Worsell met a number of St. Luke's congregation and made final arrangements for the celebration to be held on the 9th and 10th of September. The first meeting will take place (D.V.) on the 9th at 3.30. Addresses of welcome will be delivered by the Mayor and Rector, and responded to by some of the distinguished visitors. The letter of greeting from the historic parish of Annapolis, Maryland, will be delivered by its Rector or delegate and replied to by one of St. Luke's congregation. At five o'clock the unweaving of the monument to Rev. Thomas Wood, S.P.G., Missionary in 1753, will take place. Addresses will be delivered by Judge Savary and Rev. Archdeacon Raymond. This will be in the old cemetery. At 8 o'clock Divine service will begin in St. Luke's and if the night is fine this service will be finished in the open air in the grounds adjacent to St. Luke's. The Lord Bishop of London will be preacher. At this service a handsome quartered oak Bishop's chair, prayer desk and seat and pulpit will be dedicated respectively to the memories of General Nicholson, Rev. John Harrison, Chaplain to Commodore Martin of H. M. S. Dragon, who conducted the service of thanksgiving in St. Anne's church, and Mrs. W. S. Gray. The Town Council, who kindly offered to have the fort especially illuminated, will be requested to do so on the night of the service. On Saturday there will be a celebration of the Holy Communion. The V. S. Grenville will take the visitors to Digby at 9.15 from King's Wharf.

### Governor Tweedie Urges More Help for Refugees

St. John, N. B., July 27.—Lieut. Governor Tweedie, who was here last night, again spoke of the seriousness of the Campbellton situation. He said in part:

"I am somewhat surprised and disappointed that the generous-hearted people of the Dominion have not responded as quickly to the call for aid as might be expected. When we find contributions of \$10,000 coming in from the city of Boston and no amounts from many wealthy cities of our own Dominion, it is proper to infer that the people are not thoroughly aroused as to the necessities and the utmost need for large and generous assistance. Money, food, and clothes are needed."

Hon. Mr. Pugsley, Canadian Minister of Public Works, Governor Tweedie and Premier Hazen are to meet in Campbellton Friday to consider matters with the people.

One pitiable case is told of in tonight's Campbellton despatches. The case of a woman who had applied a number of times for aid was investigated and in her tent was found her sick husband lying scantily clad on a bed of boughs. On the ground were several children, crying for the mother who had gone to get the family allowance. Some damp blankets formed the tent equipment.

### AIRSHIPS ONLY GOOD FOR SCOUTING.

British Admiral Says They Would Never Be Practical as Agents of War.

New York, July 27.—In talk on naval matters and on the possible use of air craft in warfare, Admiral Sir Albert Markham, of the British Royal Naval, retired, who arrived here on board the Adriatic, expressed the opinion that aeroplanes and dirigibles never would be practical as agents of war for other purposes than those of scouting. He also expressed the belief that the most practicable size for battle ships was in the neighborhood of 20,000 tons and that efficiency would not be increased by building them larger.

### Town Council

A meeting of the Town Council of the town of Bridgetown was held in the Council room on Monday evening the first day of August, inst. at seven o'clock in the evening with Mayor Hoyt in the chair and Councillors present as follows: J. R. DeWitt, O. F. Ruffe, E. A. Craig, W. H. Burns and C. B. Tupper.

Resolved that the bill of the Bridgetown Electric Light Heat & Power Company, Limited for the last quarter's lighting of streets be paid less the deduction for the rights the lights were not burning during the last quarter.

Resolved that the bill of W. D. Lockett for work done in 1909 be laid on the table for further consideration and that the Clerk over the old town accounts to obtain what information he can relative to the same.

Ordered that the following bills be paid:— J. Lockett and Son, material for draping, Baptist church, for King's funeral, \$1.58; N. E. Chute for sewer pipe, \$5.15; Wallace Wynot for labor on streets, \$1.00; Charles F. DeWitt, labor on streets, \$7.20; Alden G. Walker, gravel for streets, \$30.00; Neil Walker for gravel on streets, \$2.40; Joseph I. Foster for supplies on foot account, \$5.00; Municipality of the County of Annapolis poor account \$33.00; Municipality County of Annapolis poor account \$29.90; A. and W. MacKinlay for record book, \$3.40; Karl Freeman for sundries, \$11.94; J. H. Longmire and Sons, labor on streets and supplies poor account \$2.35; William Ruffe, labor on streets, \$12.35; Charles Berry, labor on streets, \$14.50.

Resolved that the application of Joseph Moses for a permit to erect a slaughter house within the limits of the Town be not granted and the grant that this Council have no jurisdiction in the matter.

Minutes read and approved—and the Council adjourned.

H. RUGGLES,  
Town Clerk

### What Nations Have Done

Rev. Ben. H. Spence spoke on "Progress in Canada and the World," and the salient features of each nation's achievement in combatting the liquor evil freshly outlined. England has seen Alcoholic Bill introduced aiming at the extinction of 32,000 liquor licenses, and Lloyd-George's increased taxation of liquor led to the largest number of convictions for drunkenness. The Government of France placards every municipality with temperance posters at the tax-payers' expense. Beer-drinking Germany has had lately seen a local option bill introduced in its parliament. Switzerland has prohibited the use of saloons, the Denmark has lately adopted local option. Spain Sunday closing of saloons, and Iceland and Finland national prohibition. Sweden recently had national prohibition for a month during a great strike there, and its good results were so marked that more than half the adult population have petitioned the Government for permanent national prohibition. Norway has four-fifths of its territory under prohibition. South Africa has the largest prohibition area in the world, and its new federal parliament will soon consider temperance measures. Jerusalem has a Good Templar Lodge and a movement is going on to wipe out the sale of drink from that historic city. China, Japan, and India all have active temperance movements. New Zealand lately gave a majority of 34,000 for prohibition. Australia makes similar headway. The United States put 12,000 saloons out of business last year. Nine of its States are dry, half the remaining territory is freed from the saloon. Newfoundland is all dry except for the city of St. John's. Prince Edward Island has no saloons; Nova Scotia none except in Halifax. New Brunswick has eleven out of seventeen counties dry. Quebec has seven hundred out of one thousand municipalities under prohibition, and Ontario has half of its cities and towns free from bar rooms. Mr. Spence concluded with an appeal for greater activity in the freeing of Canada from the legalized bar-room.

### Bridgetown's Donation to Campbellton

At the public meeting of the rate payers of the Town held on Monday evening, the first day of August inst. to vote upon the proposed expenditure of a sum of money not to exceed the sum of one hundred dollars towards the relief fund of the Town of Campbellton, N. B., pursuant to the public notice given, Mayor Hoyt was elected chairman. A number of the rate-payers of the town were present and after the chairman explained the object of the meeting, a general discussion took place and all the speakers expressed themselves very strongly in favor of the expenditure.

The returning officer Mr. Percy Burns then held a poll and the vote was unanimously carried.

The meeting was again called to order by the chairman and the question of a further contribution to the relief fund by personal subscription was discussed and the following Committee were appointed by the chairman to solicit subscriptions from the citizens: Rev. E. Underwood, J. W. Ross, Dr. C. Jost and J. Harry Hicks.

Mr. Ruggles was elected treasurer of the fund.

At a meeting of the Committee held after the general meeting the Town was divided into districts as follows:

From head of Queen street East Solicitor J. W. Ross.

From head of Queen street West Solicitor Rev. E. Underwood.

Church St., and all that portion of the town lying east of Queen street, Solicitor J. Harry Hicks.

Queen St., over to Carleton's Corner and that portion of the town lying west of Queen street, Solicitor Dr. C. Jost.

The different members of the Committee urgently request all of the citizens of the town to give what they can towards the fund and they will visit the different districts at once in order that the amount submitted be forwarded not later than Monday, the 8th instant.

The Committee further request that any person living outside the limits of the town wishing to contribute to this fund will leave their subscriptions at the office of the treasurer before Monday next and he will be pleased to forward the same with the bill of lading.

A subscription was opened at the meeting and the sum of \$31.00 was subscribed on the spot. Let the good work continue.

### Appeal to Baptists

Campbellton, N. B., July 21st  
To Baptists Everywhere:

By the fire in Campbellton, July 11th, the Baptist church and parsonage were totally destroyed and all our members in town lost their homes and places of business. The insurance on parsonage only cancels the debt against it. The insurance on church pays debt against it and leaves two thousand two hundred dollars, with which to build church and parsonage.

We have sold church lot and bought one of the best lots in town.

Our people are stripped for the most part of everything—home, furniture and business. One third of our congregation have gone away, leaving the burden of building for the rest. Our people will not be able to do much, for one year, either toward pastor's salary or building fund, except a few of them, who will do nobly. We are compelled to look to the denomination to put us in possession of buildings or disband. We must build without debt as we could not carry even a small debt.

Anything but a good building would mean failure for us. We are awaiting your answer. Unless the buildings are finished on the outside within four months, they cannot be until next summer. There are no buildings to secure either for worship or to live in. Most of us are now living in tents.

Help us and help us now.

G. W. SHURMAN,  
Pastor.

### Clementsport, Dutch Shore, and Colonial Arms.

The Charms of One of the Valley's Tourist Resorts, Interestingly Sketched by a Visitor, with Some Reflections Thereupon

To the Editor of Monitor-Sentinel—

Your correspondent was invited by Captain Amos Burns to spend a day or two with him at his home in Clementsport. He talked so much and so eloquently about the place, the Dutch Shore, and Colonial Arms, the scenery of which he said would surprise and delight me, that in spite of my naturally retiring disposition and attachment to Bridgetown I found myself with grip in hand getting off the train and shaking hands with the Captain at Clementsport station.

The station is not very inviting. It is old and dilapidated and not at all keeping with the country by which it is surrounded. The Captain had soon told me this and he said: "You bet, when the C. P. R. get possession they will make this place blossom like a rose."

A little walk and we were on top of the hill with all the glories of the surrounding country in view. "Look at that," said the enthusiastic Captain as he pointed out the beautiful aspects. "There is no other spot like this on God's green earth." The houses were well painted, the crops and the trees on the hillside farms were thrifty and beautiful. Nature had lent her varied charms of sea and land to beautify this locality.

Fronted by the delightful and historic Annapolis Basin which ever restless nestles neath perpendicular ledges of Devonian rock that are crowned with hills of delightful verdure, these hills interspersed with beautiful meadows, I caught at once the spirit of the Captain. This pleased him so we did not sit long on the verandah of the Captain's most beautiful home at which we had arrived but were soon on our way to the village of Clementsport. We passed through a graveyard and the Captain pointed out to me the old church of over one hundred years, which stood as of yore among the graves of the burial ground with the spire still pointing heaven-ward as though it had decided, notwithstanding the changes of time to wait there until the resurrection day, so that those that were sleeping around it could congregate once more within those walls and hear one more sermon before they were caught up in the air.

Of course the Captain had to introduce me to Parson Lockward. I have a faint suspicion by the way we were received by Parson Lockward, that the Captain is a very pious man when he is at home. But the Dutch Shore was on the Captain's mind and we had to hurry on. He was evidently bound that I should see it before night, for after shaking hands with the business men of Clementsport (who all seemed happy and doing a good business) the Captain appeared with a good team and we were soon on our way to the Col-

onial Arms, through what is known as the Dutch Shore Road.

The Captain had told me that our best farmers lived in this section. He knew that I did not believe him, so he took this opportunity of demonstrating to me that he was a truth-telling man, and to see the delighted expression that came over the Captain's face when at last I acknowledged the corn, pleased me very much. In fact, I was having a pretty good time and so was the Captain.

In point of picturesque features this part of the country is not excelled by any part of the Province. The touring travellers of the neighboring Republic have caught on to this and I was told that every one of these beautiful homes was in addition to their regular inmates the home also of all the tourists that they would accommodate. "But we must hurry on to the Colonial Arms or we will be late for dinner," said the Captain. "Dinner is served about six o'clock." We soon turned in at the gate way, and my attention was riveted upon the beautiful natural scenery, hills, woods, river,—natural scenery, that during many thousands of years has been waiting for some of Nova Scotia's enterprising sons to develop, the sand beach washed by the restless waters of the Bear River—natural scenery decorated only by natural growth of maple trees through which had been cleared roads and paths in various directions,—natural scenery which is broken now only when looking one way when your view is intercepted by a huge wooden roof, floating from the top of which is the flag of the Colonial Arms. We have at last reached the stable, which has every sign of industry. Just beyond is a large tennis court, and turning to the left we find ourselves in front of a large well-finished building with broad verandahs on which numerous apparently happy and wealthy people are rusticating, a building elegantly finished with polished hard-wood floors and furnished with suitable furniture for an up-to-date summer home for people of means. We found Captain Spurr to be a genial host and we believe well calculated to make a success of this business, although new to him. We found a large number registered and the genial Captain informed us that he was well satisfied with his venture. We were served with a luxurious dinner and after a smoke on the verandah ordered our team.

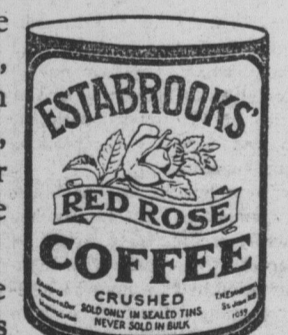

On the way home I said to the Captain, "Why did Captain Spurr call his place the Colonial Arms?" "You see, Miller," said the Captain, "the arms referred to in this case are not military arms, they are friendly arms," and this set me thinking.

Who knows?—the opening of this new (continued on page 8.)

### Crushed Coffee— what it is

By a process of crushing between steel rollers, instead of grinding, the skin, which remains in the eye of the bean after roasting, is separated from the kernel and removed by air suction, while the kernel is broken into small even grains. These grains when steeped, being free of the skin or chaff, settle quickly, leaving the liquid clear and bright, and give the true coffee flavor.

Estabrook's Red Rose crushed Coffee is as easy to make as Red Rose Tea. Directions are in each tin.

Estabrook's Coffee for Breakfast and Red Rose Tea for other meals.

## Estabrook's RED ROSE Coffee

Try it for Breakfast To-morrow

MIS-NAMED.

"Name this child," said the sponsor.  
"Original Story," she repeated in clear, deliberate tones.  
"It's a very odd name, isn't it? Are you sure that you want him called by the name of Original Story?" I queried.  
"Original Story—that's right," she declared.  
"Is it a family name?" I persisted.  
"Named after his uncle, sir," explained the woman in charge, getting red in the face.  
I made the acquaintance some weeks after of the said uncle, a farm laborer in another village, whose name was Reginald Story.  
George: What kind of candies do you love best, Miss Muriel?  
The girl: The kind that comes in gift boxes.  
"I suppose Mrs. Henpecke, that you and your husband live happily together."  
"You bet we do," I would like to see Henry try to live unhappily with me!  
Tottie was amusing herself by watching her shadow. But presently she paused and said: "But, mamma, wouldn't little white girls have white shadows? This one is so black."  
Tommy's mother had made him a pair of trousers from an old pair of his father's, and he was very proud of himself when he went to school with his new "trousers" on. But he came home with the tears running down his face. "What's wrong wi' ye?" asked his mother. "It's they trousers said the sorrowful Tommy; 'the laddies say they dinna ken' when A'm coming, and when A'm gaun."

**MOST MODERN CATTLE ACCOMMODATIONS AT DOMINION EXHIBITION**

The most modern of live stock accommodations will be afforded exhibitors at the Dominion Exhibition in St. John, N. B., September 5th to 15th—indeed the new facilities embody the latest and most approved ideas, and will be appreciated by both exhibitor and sight-seer. In the cattle barn proper five hundred head will be housed within easy eye-range. In connection with each stall there will be running water and other modern improvements. A patent litter carrier suspended from a railtrack in the ceiling will be utilized to remove all accumulations, while the drainage will be perfect. Sheep will be accommodated in keeping with most modern ideas. From central elevated walks spectators will be afforded an excellent view of the animals as they wander around their six-foot pens. The carpentry work will be open or picketed, assuring constant circulation of air. The Piggery will follow this same plan of erection, especial attention to ventilation, freedom from over-crowding, lighting and sight-seeing. Heretofore exhibits of horses have been made in long rows of box stalls only, but this year special provision is being made for harness horses in new barns arranged with broad aisles. Poultry and Pet Stock are to be shown in what was formerly known as Agricultural Hall where much more space is available and a comprehensive display is possible.

**BURNED SUGAR**

Professor Trilbert of the Pasteur Institute at Paris has demonstrated that burning sugar develops one of the most powerful antiseptic gases known. The practice of burning sugar in the sick room was formerly regarded as an innocent superstition.  
If sugar were burned in the house when one member of the family has grip or merely a cold, there would be less danger of its spreading throughout the household. This may be easily done by putting a few hot coals on a shovel or pan, sprinkling them with a tablespoon of sugar and letting it burn in the rooms where the sick person has been.

**NEW WAY TO MARK CLOTH.**

An ingenious way to mark cloth has just come in. The tissue paper pattern is pasted upon the cloth, which is then placed in the sewing machine. There is no thread in the needle. But the paper pattern is stretched along the line of the design. And when the pattern or design is lifted there is a handsome pattern all outlined underneath. The little fine needle has marked it out in the prettiest manner possible. It is clear, out, and can be followed nicely with the embroidery needle.

**A New Laxative**—the best known to modern medicine  
—is the active principle which makes  
**NA-DRU-CO LAXATIVES**  
so much better than ordinary physics. While thoroughly effective, they never gripe, purge or cause nausea, and never lose their effectiveness. One of the best of the NA-DRU-CO line.  
25c. a box. If your druggist has not yet stocked them, send 25c. and we will mail them.  
National Drug and Chemical Company of Canada, Limited, Montreal.

**SERIOUS DEPLETION IN FUNDS**

**HARD TIMES HARD ON THE POOR CONSUMPTIVE**

Muskoka Free Hospital for Consumptives Makes an Urgent Appeal for Money.  
\$35,000 Required to Cover Bank Overdraft and Provide for Maintenance of Poor Patients.  
These head-lines tell the story of our needs.  
They are heavy and urgent.  
Many times during the past twelve months the question has pressed itself upon the Trustees, "Can we continue the work further?"  
Every month brought its quota of accounts for salaries and wages of staff, bills of butcher, milkman, eggs, groceries, heavy coal bills—a serious item—and other uncontrollable expenses so long as the doors were kept open.

These had to be paid somehow. Contributions—especially after the turn of the year when the financial depression was felt at its keenest—fell off to such an extent, that each month the burden became heavier.  
During all this period there was only one thing to do, and that was to lean on our bank—swelling the bank overdraft.  
The trial was the severest in the history of these Muskoka Homes, in which nearly 3,000 persons, stricken by the dread white plague, have been cared for.

Shack Life at Muskoka Free Hospital for Consumptives.

But never for a single hour did the doors of the Free Hospital fail to swing open, and give a welcome to suffering ones without money and without price.  
The good news has gone forth of a rich harvest the wide Dominion over.  
Friends, we come to you at this time, when the clouds of depression are being lifted, asking that you now—in the direness of our extremity—help to lift the burden being carried—not for any personal gain, but solely, alone, only on behalf of suffering sisters and brothers.  
Our plea is on behalf of the sick ones.  
What will you give?  
Do not say nay.  
Help generously.  
Help all you can.  
Help some.  
Help now.

Contributions may be sent to W. J. GAGAN, Esq., Chairman Executive Committee, 84 Spadina Avenue, Toronto; or J. S. ROBERTSON, Sec.-Treasurer National Sanitarium Association, 347 King Street West, Toronto, Canada.

**Cheerful Temper of Nova Scotians A Great Asset, Says Mr. Beckles Wilson**  
Mr. Beckles Wilson, the author and journalist, who first interested Lord Northcliffe in Newfoundland, is again in Halifax. Mr. Wilson, having visited all parts of the Province, from Ingonish to Cape Sable Island, was raked what in his travels impressed him most.  
"The urbanity of the people," he replied promptly. "Of course, the beauty of the scenery and the fertility of these I shall have much to say, but I am bound to tell you that it is the cheerful temper of the Nova Scotians, from the highest to the lowest which has made the deepest impression on my mind. And please don't think that this is a small thing. I know something of countries, and a quiet God-fearing happiness is a great asset."  
"Another thing," Mr. Wilson went on, "which has interested me is the operation of your laws. Of course, you know what is best for yourselves but I can't help thinking that it is a pity that the consumption of slightly high wholesome beer or wine or cider is not encouraged in many parts of the province. I regret to say that I witnessed more cases of intoxication in certain towns than I ever saw in two years' residence in France, and I shall never forget what Mr. Cantley, your brilliant 'man of iron,' told me at New Glasgow. 'Those men are not drunk—they are poisoned. It is the adulteration, not the consumption of liquor which is the cause.'" And he explained to me the terrible process by which men are drugged, because they are not allowed to have a quiet glass of ale in one of those well-conducted public-houses which Earl Grey has been the means of establishing throughout England, but which His Excellency daren't so much as mention in Canada for fear of offending the Prohibitionists.  
"What do you think of the Bras d'Or district?"  
"It is superb. No wonder Graham Bell, George Kennan and others, who have had the pick of the whole continent, have built houses there. It is an ideal country for the tourist. But is not this true of a hundred parts of this beautiful country? I met a man on the Mira River who had caught eighty trout in a day's sport. Think of 80—eighty trout! It is far, far too many. He ought to have been contented with eight. But it is Cape Breton offers, not to mention the splendid sport I have seen at Kedgemoakidge and Rosignol Lakes at the other end of the province. I wish your farmers could be induced to go in more for sheep-raising. I have seen hundreds of thousands of acres crying out for sheep. Down in Yarmouth County I met a farmer who was strangely silent when I broached the question of sheep. Just then I noticed his little girl coming down the path trailing a little wooden lamb. "Ah, well," I said, laughing. "I see you've made a beginning, at all events." "And the end, too," answered. "Less than two years ago I bought seventeen sheep, meaning to go in for sheep-raising on a large scale by and by. In two weeks every sheep was dead—killed by my neighbor's dogs. I complained, but it wasn't any use—they wouldn't hear of a muzzling law." I've met similar complaints all over the province. It's a great pity, especially as a muzzling order need only be provisional. After a few months the muzzled dogs get accustomed to the sheep and the muzzles can safely be removed."  
"Did you visit Truro?"  
"Yes, I spent two days on the Experimental Farm. There is no one man in Nova Scotia who is doing a greater or more lasting work for his country than Melville Cumming. He is, in truth, making two blades of grass grow where only one grew the year before. It is no good farming without knowledge. And with true knowledge of their farms and its possibilities, there will be a firmer and more lasting connection between the farmer and his homestead. He will be less desirous of swapping it for another. He will want to enrich it and beautify it. When a man plants hedges he plants character, for hedges and flower gardens re-act upon character. If you want to see what can be done in the way of lawns and flower gardens, even in the eastern extremity of the province, you should see the estate of a friend of mine at Sydney, who at night can look upon the light of a hundred ore furnaces across the bay. Why, you might be in Kent or Surrey!"  
"What in your opinion is the most pressing need of the province?"  
Mr. Wilson laughed. "Good cooking," he said. "I know you expected me to say—British capital. Well, capital's a good thing and so are immigrants, and mark my words both from now onwards will continue to pour into Nova Scotia, but pray

don't ignore good cooking. Have you ever heard the saying, 'A nation is as good as its digestion?' At Middleton they showed me a man who said 'Home's a different place to me since my two girls learnt to cook at the McDonald College.' Isn't that simple justification for that excellent institution? It is not enough to attract tourists to the country, you must have hotels on the English rather than the American pattern. There are the old Nova Scotia inns of fifty years ago? You find Halifax full of their charms, their appetizing dishes, cheerful coffee room and pleased alacrity of service." I think are his words.  
"The C. P. R. builds hotels on the Annapolis Valley line where are they likely to be placed?"  
"I should say that besides one at Halifax, there will be first-class hotels at Grand Pre and Digby. And with an eye to the American tourists they will not commit the mistakes of the proprietors of the present hotels. I heard a Bostonian say at Digby, 'You Nova Scotians think you attract us by copying American ways, by floating the Sters and Stirpes over a Manhattan or an American or a Nevre House and giving us plenty of ice water and baked beans and Washington pie. That's where you fail in knowledge of human nature. When an American leaves the States and goes to a foreign country he wants to leave his own country behind him. He wants a change. He wants novelty. He would rather stop at the Royal George with a swinging sign and dine off a mutton chop and a Welsh rarebit and a pint of ale or Maderia. As he can't he saves up his money and crosses the Ocean instead. Now I believe there is something in that."  
Mr. Beckles Wilson has nothing but praise for the charms of the Annapolis Valley. He was a guest of Sir Robert Weatherbe at Grand Pre, and Chief Justice Townsend at Wolfville, and of Judge Owen at Annapolis Royal. He also motored all through the district. After a few days in Halifax, Mr. Wilson is leaving for Amherst and Parrsboro.

**WIRE WOUNDS.**

My mare, a very valuable one, was badly bruised and cut by being caught in a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better. After three weeks the sores have healed, and best of all, the hair is growing well, and is not white as is most always the case in horse wounds.

F. M. DOUCET, Weymouth.

**TRAINING THE CHILD.**

Love has its place in the education of the child, and a most important place it is, but when 'love' is carried to such an extreme that the parents desist from all efforts to make the child obey them it is 'love' run mad. The mother who loves her child should insist upon obedience and courtesy at its hands. She should expect this, not so much because it is her right, but for the simple reason that it is best for the child that he should bestow it upon her.  
Naturally we are selfish beasts. The child, left to itself, thinks only of its own desires, and it is perfectly reasonable that this state of things should exist, for the love of self is the dominant note in almost every individual. Selfishness is natural—the animal trait that is subordinated only by education and training.  
Moreover, the entire ethical structure of the universe is built upon a principle that gives full recognition to the rights of others. As long as our own desires and aspirations do not interfere with the rights and privileges of some other individual we are allowed to pursue them, but the moment we come into contact with the other person's rights it is just as if we had come up against a stone wall. It is a case of either backing out or getting into trouble.  
Left to himself the ordinary child is slow to recognize the rights of others, and it is in this regard that the public in general, if not the police themselves, will take a hand and teach your boy this lesson if you do not take the pains to instruct him in these principles of life while he is a child at home. In fact, in my opinion it is far better that the child should learn to obey, to be courteous, to recognize other person's rights, and to be unselfish at home, even at the cost of a few applications of the slipper, than he should be sent out into the world to find out all these things at the hands of those who will be less loving and less gentle with him.

AWAKENING OF SCIENCE

TO THE VALUE OF FRUIT

What is "FRUIT-A-TIVES"?

Medical men are just beginning to realize the possibilities of fruit in curing disease. Its action on the liver, kidneys and skin is wonderful. Yet fruit in its raw state is impracticable in treating disease because of the minute quantity of the active or curative principle contained in fruit juice.

AUTOMOBILE ACCIDENT IN HALIFAX

Woman Struck by Car on Granville Street and Her Life is Endangered.

A regrettable, but apparently unavoidable automobile accident occurred on Granville street, Halifax, Saturday afternoon, as the result of which a lady, age 47, unknown, is at the Victoria General Hospital and the doctors fear cannot live.

The facts of the case are that a northbound tram car was standing at the corner of Duke and Granville streets. A half dozen passengers were getting on board and one, the lady, was the victim of the accident.

The pedestrian had a bundle in her hand and, facing northwards, did not see the automobile, but Benjamin Anderson, who was standing by, saw what was coming and sprang forward to snatch the woman back.

The lady was struck by the front of the automobile but sustained no injury. Unfortunately the lady did not escape. Her head struck the sidewalk so that the skull was fractured and there were injuries to the base of the brain.

The lady was removed to the Victoria General Hospital, where Drs. Hawkins and McDonald attended her. At three o'clock this morning she was still unconscious and there seems little hope of recovery.

No one has the slightest idea who the lady is. Mr. Thompson, a bootman, heard a rumor that it was his sister, Mrs. Baker, who had been hurt and he went to the hospital to see if it was she. There were no other inquiries whatever, and the lady's friends, if she has any, apparently had not heard of the accident.

She is a woman evidently in rather poor circumstances and about forty years of age.—Herald.

Make Them Sound

Kendall's Spavin Cure

A lame horse is a dead loss. Swollen, Curd, Splint, Ringbone, Spavin and Bony Growths won't cure themselves. Yet you can cure these troubles and make your lame horse sound with Kendall's Spavin Cure.

In the 40 years that this world's famous remedy has been on the market, Kendall's Spavin Cure has saved millions of dollars to horse owners.

One bottle—\$1.00. Two bottles—\$1.75. Three bottles—\$2.50. Get a bottle now—\$1.00 for \$5.00. One bottle—\$1.00. Two bottles—\$1.75. Three bottles—\$2.50.

Dr. B. J. KERRALL CO., Essexburg Falls, Vt.

Strange Disappearance of Ald. Edwards' Son

Hedy, the 15-year old son of Alderman Edwards, who disappeared from Halifax last Tuesday, has not been located, and his parents and friends are becoming very anxious about him.

He had been promised a situation with a City firm to fill a vacancy that will occur at an early date, and whilst waiting for that he had been making occasional short trips on the I.C.R. and D.A.R. trains as the news agent. He started on one of those trips last Tuesday, leaving the City on No. 9 train.

It is surmised that he had been asleep when his train reached Amherst, and having missed his connection there, returned to Halifax on Wednesday morning. But when that train arrived he was not in it.

Think he was perhaps with his uncle, Mr. Aaron Tilley, who lives in St. John, his father wired Mr. Tilley, but received a reply that the boy had not been seen by him.

Mr. F. M. Chute urged the adoption of a uniform system of book-keeping. He outlined the system now in use, showing the necessity of a uniform system which would facilitate the work of auditors and under which each lot of apples could be traced by entries, from its receipt at the packing house till placed on the car for shipment.

Mr. McMahon spoke briefly in regard to aid required by fruit growers from the government. There was a general feeling that too large a share of the receipts for the sale of our fruit in the English market was absorbed by the commission on the other side.

Mr. F. M. Chute gave some figures obtained by him during his visit to England in January, 1909, showing there very considerable saving could be effected in the marketing of our apples.

Mr. McMahon, Mr. S. E. Bancroft, and Mr. John Donaldson were appointed a committee to report on the matter to the association.

Mr. F. M. Chute gave some figures obtained by him during his visit to England in January, 1909, showing there very considerable saving could be effected in the marketing of our apples.

Co-Operative Fruit Shippers' Association

A meeting of the Co-operative Fruit Shippers' Association of the Annapolis Valley was held at Forsters' Hall, Berwick on July 4th. It was attended by delegates from the ten co-operative fruit packing associations at Bear River was not represented.

A public meeting opened at 1:30, Mr. S. C. Parker gave an address on the benefits of co-operation, in which he pointed out the financial advantages already obtained in the way of larger prices for fruit better packed as a result of the adoption of the co-operative system.

Mr. F. M. Chute urged the adoption of a uniform system of book-keeping. He outlined the system now in use, showing the necessity of a uniform system which would facilitate the work of auditors and under which each lot of apples could be traced by entries, from its receipt at the packing house till placed on the car for shipment.

STORY OF LAURA SECORD

A Tale of Canadian Pioneer Life That Never Grows Old.

Undoubtedly Laura Secord is the greatest of Canadian heroines. She performed one of the most heroic feats in the annals of history. This was sufficient to make her famous, but the romance which colors the history of herself and her husband adds much to the glamor which has always been associated with her and her name.

Laura Ingersoll was the daughter of Thomas Ingersoll, a United Empire Loyalist who came from Massachusetts to Canada about 1785. He was the founder of the town which now bears that name. His daughter Laura was born in 1795, and she was the youngest child of her father.

Mr. McMahon spoke briefly in regard to aid required by fruit growers from the government. There was a general feeling that too large a share of the receipts for the sale of our fruit in the English market was absorbed by the commission on the other side.

EXIT THE REDMAN.

The Indians of West Selkirk Must Go Farther Into the Wilds.

There was a day when the town of West Selkirk, pitched out in the fertile valley of the Red River, was the pioneer West in epime—shacks, traders, saloons, and Indians. Its picturesqueness has gone out with the wheat. There are still a few shacks—more stores and banks; traders there are, calling themselves business men, not bartering, but selling for cash; the Indians are still there in all gleaming bottles sold at long bars by white-aproned waiters.

Mr. McMahon spoke briefly in regard to aid required by fruit growers from the government. There was a general feeling that too large a share of the receipts for the sale of our fruit in the English market was absorbed by the commission on the other side.

**M. K. PIPER**  
PROPRIETOR AND PUBLISHER.  
WEDNESDAY, AUGUST 3, 1910.

The sultry summer days remind  
us that there is one thing in which  
Bridgetown is lacking. It is perhaps  
a little premature to make the sug-  
gestion, but Bridgetown is bound to  
become a large industrial centre some  
day, and when that time arrives,  
even more than at present, the town  
will be incomplete without a park.  
At present people who wish to spend  
their time after working hours and  
on Sunday getting a little fresh air  
and exercise have to walk up and  
down the dusty streets, which is  
neither healthful nor exhilarating.  
A generation past, some of our  
thoughtful forefathers set apart a  
small square adjoining the school  
grounds and planted a number of  
shade trees, with the commendable  
intention of making a beauty spot  
and a breathing place for their pos-  
terity. Many of the citizens who took  
part in the planting are not living  
today but those who are are well  
satisfied with the fruits of their la-  
bor. It was thought best a few years  
ago to throw this square in with the  
school-grounds, and this has given  
Bridgetown public school a setting of  
which its architectural status and its  
importance as a civic possession is  
worthy. Few if any public schools in  
the province have more beautiful  
grounds. The portion of the grounds  
used for athletic sports after school  
hours and at intermission is one of  
the most valuable assets the town  
possesses as a feature in the develop-  
ment of its coming generation.  
Still the purpose which our former  
enterprising citizens had in view,  
when they planted the trees and set a  
fountain in the centre has never  
been carried out,—even though they  
builded better than they knew, it  
was intended as soon as the trees  
reached a suitable size for giving  
shade to place seats around and  
make the square a place for social  
gathering. Some of the trees are now  
throwing out wide branching arms  
inviting passers-by to their coolness,  
but there is no provision for seating.  
Is it not time that such accommoda-  
tion should be provided, unless we  
are willing to ignore the good inten-  
tions of those progressive and far-  
seeing citizens, who with the labor of  
their own hands laid out the ground  
and planted the trees? Surely we are  
not so ungrateful or unmindful of  
their thoughtfulness.

But we, also, while accepting the  
benefits bestowed by the past gener-  
ation, have a duty of our own to per-  
form for coming generations. What  
would add more to the attractions of  
Bridgetown than a park or grove al-  
ong the river bank? To be sure the  
Annapolis river in this locality is not  
always a thing of beauty, as when  
the tide recedes it leaves but muddy  
banks, but this is a thing that is go-  
ing to be altered,—and not long hence  
st the many citizens who express  
themselves so strongly in favor of  
the plan of dredging and draining  
the river above the bridge will exert  
a little energy in behalf of carrying  
out the plan. A practical engineer  
should be consulted in regard to the  
matter without delay. Then the sub-  
ject should be brought before our

civic and municipal authorities and  
our government representatives. One  
energetic person could set the ball  
rolling. May it not be YOU? Think  
what a boon posterity would owe to  
YOU. Look ahead a little and fancy  
Bridgetown with a water-front from  
the bridge where navigation ends to  
Paradis or beyond, a smooth, spark-  
ling stream where canoes, rowboats  
and motor yachts may ply up and  
down on sunny days or warm even-  
ings, giving healthful enjoyment to  
pleasure seekers,—to many after a  
hard day's toil. This is feasible for  
you, and for many generations after  
you, if YOU will take a little trouble  
to secure it.

Then look ahead a little further  
still. When the river front is alive  
with boats many who cannot or  
would not enjoy the luxury of boat-  
ing would wish to sit or stroll along  
the river bank inhaling the cooling  
breeze as it passes up and down the  
river and enjoying the pleasant out-  
look. Only a few remain of the  
noble oaks that once lined the river  
front along where Bridgetown lies,  
but some of these beautiful trees  
still stand at the edge of the Chip-  
man field. This field should be secur-  
ed by the town before it is drawn in-  
to commercial uses,—for which there  
is plenty of other space,—and plant-  
ed at once with trees,—that in future  
Bridgetown may have a park worthy  
of an ambitious residential and in-  
dustrial centre. Think about it,—  
talk about it,—and act. Before next  
Arbor Day let it be a settled under-  
taking, and make Arbor Day, 1911, a  
public holiday for the purpose of  
planting the Bridgetown Park.

**Obituary.**

**MR. CHARLES MARSHALL**  
A sudden death occurred on Friday  
at Clarence when Mr. Charles Marshall  
passed suddenly away while in the hay-  
field with his son. Mr. Marshall was  
not engaged in haying, as he had been  
in failing health several years, but was  
standing watching the progress of the  
work when suddenly he was seen to be  
losing his balance. His son hastened to  
his assistance but he expired almost in-  
stantly.  
Mr. Marshall was seventy-five years  
of age and in his younger days was one  
of the Valley's most active and prosper-  
ous farmers. He is survived by two  
brothers, James and Newcombe, also  
well-to-do farmers, all residing within a  
few miles of each other, and another  
brother Ansley who lives in the United  
States; and a widow and three sons,  
Arthur, Stanley and Wheelock, all  
farmers of Clarence, and two daughters,  
Mrs. Chas. Banks of Aylesford and Mrs.  
Amos Banks of Waverly, Mass.  
The funeral was postponed until  
Monday after the arrival of the trains  
to enable the daughters and their hus-  
bands to be present. Rev. N. A. McNeill  
officiated at the funeral which was very  
largely attended.

**TO KEEP FOOD CLEAN**

(From the Kansas City Times.)  
The city law prohibiting the exposure  
of foodstuffs for display purposes, to the  
dust of the streets is a good law. It is  
based on the very essentials of rational  
cleanliness and sanitary precaution. The  
fact that it strikes a prevailing  
custom and involves a change in the  
methods employed in displaying many  
kinds of foodstuffs is all the greater  
reason for the law and its strict impartial  
enforcement. While the whole country is  
agitating against the fly, against bad  
sanitation in homes, against dirt and  
disorder, all as menaces to the public  
health, it would be absurd to have the  
domestic precautions prompted by this  
agitation nullified by a listlessly toler-  
ant market system. The campaign against  
unclean foods should be made to reach  
not only grocery stores and meat shops,  
but hotels and cafes and delivery,  
huckster and milk wagons as well.

**NOTICE**

According to the postal law now  
in force newspaper publishers can  
hold for fraud anyone who takes a  
paper from the post office and refuses  
payment, and the man who allows  
subscriptions to remain unpaid and  
then orders a postmaster to send no-  
tification of discontinuance to the  
rest and fine. Postmasters are also  
liable under the law for the cost  
of papers delivered to other persons  
after the death or removal from their  
office district of the person to whom  
the paper was first addressed.

**Jottings by the Sea Side**

(Continued from last issue.)

As an encouragement to farmers  
interested and ambitious of improv-  
ing their dairies, report of the prod-  
ucts of one cow owned and cared  
for by Mr. Wm. C. Woodworth, of  
Delap's Cove, is hereby appended:  
Commencing April 18th 1908, end-  
ing July 12th, 1910, twenty-seven  
months, the cow has given in that  
time 22,745 lbs. of milk. From that  
has been churned 1183 lbs. of butter.  
Butter sold at 22c. per lb. or aver-  
aged that throughout the twenty-  
seven months \$260.26. One calf sold  
at six months old for \$12.00. The  
other a heifer is worth today \$30.00.  
One given the writer and raised from  
same cow on skim milk without one  
pound of anything but turnips, sold  
last fall for twenty dollars. Total re-  
ceipts \$312.26. Expenses for bran,  
cotton seed meal and corn meal in  
that time \$68.00. Record shows a net  
profit of \$244.26.

Had the milk been sold at 5c. per  
quart instead of making it into but-  
ter it would have netted \$450.80.  
Highest milk record for one dairy was  
fifty-four and a half pounds or one  
half pound short of five gallons. Her  
best butter record being in the month  
of May and June 1908, sixty-one days  
and forty-five pounds or  
two pounds, six ounces per day. Best  
month's milk production was October,  
1909, 1544 lbs. 154 gallons in thirty-  
one days. The cow is eight years old  
red and white Ayrshire and Jersey,  
weighs about one thousand pounds,  
splendid looking and a fine eater, has  
averaged 17½ ounces per day for  
every day since April 18, 1908, has  
been dry in that time, eighty days.  
Large crops of potatoes, turnips  
with an abundance of other garden  
stuff was raised on this farm, where  
stones are an never falling bane and  
much labor has to be expended. Fine  
apples, plums, strawberries and cur-  
rants also flourish.

Two blacksmith shops are found in  
this little village, one owned by Mr.  
Richard McCaul, the other by Mr.  
Corning Woodworth, each receiving a  
liberal amount of patronage. A small  
grocery store is also kept by Wm. C.  
Woodworth, where the usual stock to  
be found in larger stores is sold at  
moderate prices. Those actively en-  
gaged in fishing, combined with farm-  
ing in the Cove are Richard McCaul,  
who is also the local Postmaster,  
Frank McCaul, Frank M. Sprout and  
others. Possibly a little more careful  
disposal of fish garbage would pre-  
vent an unpleasant odor and make  
the village more attractive to visi-  
tors.

Little criticism however should be  
given, for many citizens of Delap's  
Cove with Litchfield are to be hon-  
ored for their industry. The eight hour  
system is unknown and an abundant  
harvest of fish as well as hay and  
root crops testify to this fact, al-  
though the lack of sufficient grain for  
the needs of the people is apparent,  
as in the Valley.

Capt. Reed Longmire and Charles  
Burnie are the local merchants at  
Litchfield, a tri-weekly mail is a late  
improvement and gasoline boats add  
much to the comfort of those engaged  
in fishing by their speed, as com-  
pared with sail or row boats.  
Lads and lassies, as well, early  
learn the art of fishing. The boats  
are also used for pleasure and serve  
as a recreation when an occasional  
holiday offers.  
Although very quiet, many leaving  
the home nest for larger fields of la-  
bor seem glad to return, during the  
summer months, to share the boun-  
ties liberally given and are shure of a  
warm welcome under the old home  
roof.

**COLORADO WOMAN  
CANDIDATE FOR CONGRESS**

Denver, Col., July 26.—"Kate Wil-  
liamson for congress!" That is the  
battle cry of the women of Colorado.  
Since it became known that Colo-  
rado, because of its increase in popu-  
lation, is entitled to another repre-  
sentative in the national house, the  
women of that state have declared  
that one of their number shall be the  
new member.  
The movement was launched in  
Denver and the women did not have  
far to look for a candidate. Colorado  
is one of the few states that places  
men and women upon an equality in  
the matter of voting. Colorado rolls  
up a large women's vote and the  
women are keenly alive to their op-  
portunities. So when it became a  
matter of certainty that the state  
would be entitled to one more repre-  
sentative in congress, the women of  
the capital city met and determined  
to make a united effort to capture  
the office for one of their sex.

**I. O. F. NOTICE.**

A special meeting of the I. O. For-  
esters will be held in Warren's Hall,  
Tuesday evening, Aug. 9, 1910. All  
members are urged to be present as  
important business is to be transacted.  
By order of the Chief Ranger,  
F. H. DODGE,  
R. S.

**Real Estate**

**FARM  
FOR SALE**

The subscriber offers for sale his  
pleasantly situated farm one mile west  
of Bridgetown, consisting of orchard,  
hay land, pasture with wood and poles.  
For information apply to  
HOWARD H. TROOP,  
Bridgetown, May 28th.

**FOR SALE**

An Eight Room Cottage pleasantly  
situated on Court Street. Land con-  
taining fruit trees and several shade  
trees.  
Apply to owner,  
A. J. WEIR,  
Bridgetown, May 30th.

**FARM FOR SALE.**

The subscriber offers for sale his  
farm of seventy acres one hundred at  
Lawrencetown, consisting of a small  
orchard, hayland, pasture with wood  
and poles.  
The farm will be sold en bloc or  
in parts to suit purchasers.  
For information apply to  
J. B. HALL,  
Lawrencetown.

**HOUSE FOR SALE.**

Mrs. John E.  
Sancton offers for sale her cottage  
on Washington street, recently re-  
modelled and in excellent repair.  
Very desirable for a person of mod-  
erate means wishing a snug, pleas-  
ant home.  
Apply on premises to  
MRS. SANCTON

YOU CAN SAVE MONEY AT THIS SALE. WE WILL NOT BE UNDERSOLD

**JOHN LOCKETT & SON**

**PLEASE NOTICE**  
We respectfully request our patrons not to overlook the fact that all subscriptions are payable, strictly in advance.

**LOCAL AND SPECIAL**

Price of flour has gone up ninety cents a barrel.

Some correspondence necessarily held over for next issue.

Mr. H. J. Crowe was in town the first of the week on his way to Newfoundland.

W. D. Lockett returned on Saturday from a business trip into Prince Edward Island.

Mr. M. W. Graves and family have taken possession of their new residence on Granville Street West.

The pass lists of the pupils of the public schools have just come to hand and will be published in next issue.

Rev. W. B. Wallace, D. D., of Cleveland, Ohio, will speak at Clarence Sunday, Aug. 7, at eleven o'clock and at Paradise at three o'clock.

The show given by the colored minstrel troop last Friday night was well spoken of. They repeat their performance here tonight, but under a new management.

Another of our progressive merchants is showing his faith in "printer's ink" in this issue. Don't miss this chance to purchase boots and shoes for the family at finest prices.

What has become of the grasshoppers? Last year at this season they threatened to clear everything off the face of the earth. Possibly the excessive amount of rain we have had has not been conducive to their health.

Rev. W. B. Wallace preached in the Baptist church last Sunday evening to a large and appreciative congregation. Mr. Wallace has recently been called to the pastorate of the Baptist Temple, Brooklyn, New York City.

Splendid prizes, large aggregation of athletics, special trains and excursion rates for the great Western, N. S. Trek Meet at Middleton on August 13th. The all Lanesburg Co. vs Middleton Base-Ball game will be a big event. Proceeds for skating rink fund. Entries close Aug. 10 with A. H. Beaton, Middleton. See posters for particulars.

The elm tree planted with much ceremony by the school-children on corner of school grounds as a memorial to King Edward VII. has grown fairly well this summer. Before the fall gales commence it should be boxed around, and the Monitor would suggest that it would be well to attach a plate with the date and circumstances of its planting.

Dr. M. E. Armstrong and Mr. H. B. Hicks leave for Victoria, B. C., on Friday next as delegates to the Methodist General Conference of Canada. They will be accompanied by Mrs. Hicks and Mrs. Mary Chute and will be absent till the end of the month. Dr. Armstrong has promised the Monitor notes of the trip, jotted by the way, which doubtless our readers will anticipate with pleasure.

The Monitor's Lower Granville reporter says:—S. S. Catalone, 2416 tons, Capt. T. L. Glover, arrived at Port Wade pier on Tuesday from New York to load with ore for Glasgow. Owing to some delay in getting the loading system in operation she is still waiting cargo. S. S. Patria is due Aug. 2nd. We hope these ships will not be long detained. So gigantic a system of buckets has never before been attempted and hence it is no surprise that a few hitches should take place in getting things in running order.

A resident of Centrees called at the Monitor Office last week with the request that an advertisement be inserted of a pocket-book lost on the previous day containing the sum of nearly \$40, somewhere between Hampton and his home. The advertiser mentioned that he had twice before lost the same pocket-book, and had found it, but he hardly dared hope for such good luck again. However, before the advertisement could be put in type he returned to the office to say the purse with the money had been found and returned to him. If this was not a case of pure luck what was it?

**Farmer's Picnic**

The big picnic for the farmers of Annapolis County will be held at Lawrence town, August 18th. Sports, tea-meetings, band music, special trains. Professor Cumming and Dr. Standish, of Truro, will speak in the afternoon and Hon. Mr. Justice Longley and others in the evening. See large posters.

**PERSONAL**

Rev. L. F. Wallace was in town Monday.

Mrs. Alfred Hoyt is visiting friends in St. John.

Mrs. F. C. Harris spent a part of last week at the shore.

Mrs. Aldous is convalescing from a serious illness of several weeks.

Mrs. A. D. Brown is visiting her sister, Mrs. A. M. Spinney at Torbrook.

Miss Mary Gordon and friend, of Roxbury, Mass., are guests of Mrs. Burton, Hampton.

Mr. Harold Bent, is home from the States on a visit to his parents, Mr. and Mrs. G. F. Bent.

Mr. Milton Elliott, of Somerville, Mass., is visiting his parents, Mr. and Mrs. John Elliott.

The Misses Lillian and Lena Hicks, Clempport, are guests of their cousin, Miss Marguerite Hicks.

Mrs. H. R. Shaw and little daughter of Denver, Colorado, are guests at the home of Mr. and Mrs. W. Anthony.

Miss Jennie Kidston, head milliner for Miss Chute for the past season, returned to her home in Boston on Saturday.

Mrs. E. J. Walling and grandson, Burt Walling, of Moncton, N. B., are visiting her daughter, Mrs. Elias Messenger.

Mr. Arthur G. Whitman, who has been a student at Pictou Academy the past year, was successful in obtaining an A certificate.

Mrs. McMillan and Miss Besse McMillan, of Annapolis and Miss Angie James are guests of Mr. and Mrs. J. W. Beckwith at Hampton.

Mrs. Chas. Prat and son and daughter, of Montclair, N. J. and Miss Louisa Armstrong, of Canine, are guests of Dr. and Mrs. M. E. Armstrong.

Mrs. Andrew Stevenson, of Lawrence town, and Miss Margaret Stevenson, of Brifton, were guests of Mr. and Mrs. S. C. Turner for a few days recently.

Mrs. Chipman Beckman, of Roxbury, Mass., and Mrs. Robert Johnson, of Dorchester, Mass., visited at the home of Mrs. Edward Marshall during the past week.

Mrs. Byron Chesley returned home Thursday from Lynn, Mass., accompanied by her sister, Miss Lizzie Marshall, who underwent a surgical operation for appendicitis.

Mrs. John Farrill, Boston and Miss Betanson, of Drummond, New York, and Mr. Storey Crossman, of New York are guests at the summer home of Dr. F. S. Anderson, Hampton.

Mr. R. R. Ruggles was in town a part of last week. Mr. Ruggles has severed his connection with the Union Bank of Halifax and will shortly go to Calgary to engage in the insurance business.

Rev. W. H. Warren and Mrs. Warren, Mrs. W. A. Warren and little son with the latter's sister, Mrs. Wright, and son, of Malabar, and Mrs. A. F. Brown are spending the week at Hampton, where they have rented a cottage.

Mrs. M. E. Armstrong and son, Maurice, go to Yarmouth next week to remain during the absence of Dr. Armstrong on his western trip. The house, while the family are away will be occupied by Rev. E. P. and Mrs. Colwell.

Mr. John Palfrey, teller of the Bank of Nova Scotia, has been transferred to Oxford for which place he left yesterday. Mr. Palfrey and sister Miss Mary Palfrey, returned the first of the week from a vacation trip to Digby and Middleton.

Mr. F. G. Cochrane, arrived from Panama on Monday for a few weeks' visit. On his return to Panama he will be accompanied by Mrs. Cochrane, who has been spending the past year with her parents, Mr. and Mrs. Wm. Spurr, Clarence.

Mr. and Mrs. John Anley, of Boston have been guests recently of the former's aunt, Mrs. Prat. Mr. Anley returned home after a brief visit but Mrs. Anley, who is now at the shore with Miss Prat, will remain in the Valley some weeks longer.

Consumption is the cause of more deaths than any other disease. Pneumonia comes second, bronchitis third and cancer fourth.

**C. H. R. H. Fund**

To the Editor of Monitor-Sentinel:—Subjoined I give statement of receipts to date for the County Hospital Recreation Hall fund. Your readers will note the net result in favor of the fund from the recent entertainment is small. In explanation of this I would point out that the expense account of such an entertainment is very heavy—much more than the uninitiated have any idea of, and this, in certain directions, is the same whether the patronage be large or small.

I am also desired on behalf of the Superintendent of the Hospital to express his sense of indebtedness and appreciation to one and all who so kindly assisted either in this or the former entertainment. It is needless to say, I take it, that we should be pleased to receive subscriptions from any and every quarter. Bridgetown has done well, but as the Institution is a County one, and patients are admitted from any part of the Province, we are now desirous of extending the appeal.

Truly Yours,  
Ernest Underwood,  
Treasurer

**SNAP-SHOTS**

The benefit for the Hospital Recreation Hall Fund came off on Wednesday evening last, under the direction of Miss Walle of the Beck Entertainment Bureau of Boston. The promoters worked hard to make the entertainment a success and it was somewhat disappointing that the attendance was not as liberal as at the former benefit. However there was a fairly good house and those present felt that they had got their money's worth in addition to assisting a worthy cause.

The photographer's studio was well represented, the management being indebted to Mr. P. R. Saunders and J. H. Hicks and Sons for fittings.

Dr. Burns, who was expected to take the part of the photographer was prevented by professional business and the part was taken at short notice by Mr. Chas. Fox. The photographer had able assistance in Miss Walle, the retoucher, and Elton Burns, office assistant.

The play went off with a swing and kept the audience in good humor till the end. With the talent so admirably brought out it will be a pity if some local dramatic entertainments are not a feature of social life among our young people this winter.

**DISTRICT DIVISION AT PARADISE.**

The following resolution was passed unanimously at the District Division held at Paradise:—Resolved that this District Division place on record its appreciation of the advanced temperance legislation recently adopted by the Government of our Province yet we cannot but express our dissatisfaction with that section of the new act which exempts the capital City of our country to be exempted in a large measure from the prohibitive requirements of an otherwise excellent piece of temperance legislation thus rendering the folly of the Dutch farmers who close up all the rat holes in their dykes but leave the main sluice wide open. We want nothing short of Provincial Prohibition.

Dr. C. Goodspeed gave a very interesting talk on the temperance condition in Texas and other Southern States. Rev. Mr. Brooks, of Brandon conveyed the greetings of County D. Division and spoke forcibly of temperance legislation and condition. Rev. Mr. Warren and others spoke warmly of their conviction and purpose in the cause of all mankind.

**NOTICE TO THE PUBLIC**

I am instructed by the Committee on streets to call the attention of the citizens of the Town of Bridgetown to the filthy condition of our streets which are a disgrace to the town and a menace to the public health, and more particularly to the condition of Queen and Granville streets, and to publish the following Town-By-Law relating to the same which I am instructed by the Town Council to rigidly enforce against all persons hereafter found violating the same.

By-Law:—  
"No person shall deposit ashes, garbage or rubbish of any kind on any road, street, lane or sidewalk, or on any other public place in the said town of Bridgetown, and anyone found guilty of the offence shall be fined the sum of \$5.00 and costs."

H. RUGGLES, Town Clerk, Bridgetown, August 2nd. 3ins.

### Do You Have Headache

TAKE ONE OF THESE LITTLE TABLETS AND THE PAIN IS GONE.

"My first experience with Dr. Miles' Anti-Pain Pills was a simple package handed me. They relieved the pain so promptly that I have never been without them since. I have given them to many friends when they had headache and they never failed to relieve them. I have suffered with neuralgia in my head, and the first one I took relieved me. They cured me of neuralgia. I would not be without them."

DR. MILES MEDICAL CO., Toronto.

### THIS HAY CROP HARD TO BEAT

Councillor Robert Archibald, Clifton, gathered Fifteen Tons From Three Acres—Crops Heavy in the County.

(Truro Sun.)

Much cut grass was caught out in the recent heavy rains. The hay crop promises to be, in fact will be, tremendous. At Clifton, Councillor Robert Archibald gathered fifteen tons from three acres. Seems to us this will be hard to beat.

In the meantime because of the tremendous hay crop, the agricultural implement dealers are doing a rushing business, selling mowers and rakes by the hundreds.

The great trouble with farmers is the scarcity of stock. It is next to impossible to purchase young cattle throughout the province, and it will scarcely pay to import them from other provinces. With abundance of hay and the prevailing high prices for meat, the scarcity of stock prevents farmers from taking advantage of a good thing.

While there is such a scarcity of cattle throughout the province, the consumers in the towns and cities, need not look for much decrease in the price of meat.

In buying a cough medicine, don't be afraid to get Chamberlain's Cough Remedy. There is no danger from it, and relief is sure to follow. Especially recommended for coughs, colds and whooping cough. Sold by all dealers.

### FLIES AND BACTERIA.

As an instance of the numbers of bacteria the common fly can carry, the following figures given by Professor Baileys may be cited.

He caught 100 flies in a kitchen, put them in a pint of sterilized water and rinsed them about, and then examined the water, and found that he had rinsed such a number of bacteria off that each fly averaged over 300,000. He next caught a similar number in the cow barn, and they averaged over 800,000 each, a fourth hundred were caught about the swill-pails, and they ran up to 1,500,000 bacteria apiece. Do you wonder that some of us object to seeing flies in the milk-jug? It may be said that when one goes into a factory or a house and finds many flies, one is immediately justified in condemning the sanitary surroundings of such premises. One, too, can appreciate the fact that in factories where flies abound it is next to impossible to keep them out of the milk, and the seeding of the milk by the bacteria which they carry must be very appreciable. The evil deeds of the fly need emphasizing as too many of us seem to think the fly a necessary, if annoying, nuisance; but truth is, the fly serves no good purpose or serves a purpose which can be better performed in other ways.

### Mystery of Assassination of Five Children Cleared Up

Convicted Nine Years Ago of Murdering His Children and Died in Prison.

Tours, France, July 28.—A rag picker named Joseph has confessed to the assassination April 21st, 1901, of five children of a farmer named Briere in the vicinity of Chartres. The father of the children was found guilty of the murders and sentenced at the time to life imprisonment. He died in prison.

The trial of Briere attracted the attention of the whole of France. Four of his daughters—aged respectively 14, 11, 5 and 4 and his son aged 7 years were found in bed one morning, stabbed and beaten to death. The farmer was arrested and charged by the police with the crime.

According to a theory advanced by the police to provide for the crime, Briere who owned a small farm near Cerancez, wished to marry a woman of considerable wealth. Circumstances led to the conviction that the farmer, considering his family embarrassments, murdered his five children in order to carry out his wishes.

He stoutly maintained his innocence throughout the trial and declared that two tramps entered the house during his absence and killed the children. His added, that he returned while the murderers were robbing the place, and that they attacked him and left him for dead.

During the trial the Judge got down from the Bench and loudly gave expression to his belief in the guilt of the prisoner while the spectators filled with fury cried "Kill him."

A pathetic incident of the trial occurred when Briere's surviving daughter, who the police declared, only escaped the fate of the other children by not responding to Briere's invitation to go to see him, went on the witness stand, sobbingly protested that her father was innocent and begged the Court to restore him to her.

No one but those who are afflicted with the dreadful Kidney Disease knows what this means, and you who are so afflicted will forget all about it in a few days if you are only wise enough to take FIG PILLS. FIG PILLS are guaranteed to cure you. If not, your money back.

25c. a box, at all leading drug stores. W. A. Warren, special agent.

### A SURGICAL TRIUMPH

Woman Walks out of Hospital With Renovated Nose.

London, July 22.—A woman has just left the London Hospital with a new nose made from a flap of skin taken from her own forehead.

The operation was rendered necessary on account of a rodent ulcer of many years' growth, which had gradually eaten away all the tissues of the nose.

The operation, known as Indian method, was devised by Lieutenant Colonel Keegan some years ago, but has only been performed successfully in this country two or three times.

A racket-shaped flap of skin about two inches in length and an inch and a quarter wide was cut extending from the bridge of the nose, the beginning of the "handle" of the racket being the only point of attachment. The whole thickness of the skin was then carefully detached from the underlying bone and, being swung round on its attachment at the base of the nose, was made to cover the previously denuded nose area. The new nose was stitched into place at the sides, openings being left for the nostrils. The denuded space on the forehead was then covered in with skin grafts.

The patient, a woman of fifty, who was only three weeks in the hospital, left well pleased with her artificial feature.

### BATTLED WITH BEARS.

A Belmont lad, Bent Roode, son of Mr. and Mrs. Robert Roode, had an exciting time with bears near his home at that place one day last week.

In company with another lad he was journeying along the highway when four bears, an old she, two cubs and a yearling put in an appearance, the old mother on her hind feet in a fighting mood. Young Roode rushed home, got a gun and pluckily returned to the attack. For some reason or another the large bears and one of the cubs made off, the other cub climbing a tree, where it was shot by the lad.

For some time past the Onslow woods have been infested by bears. It is believed there are some seven or eight all told prowling about those woods. For the safety of human life, and that of the flocks, especially sheep, it is time they were destroyed. —Colechester Sun.

POULTRY NOTES BY C. M. BARNITZ, BRIDGETOWN, N.S.

THE MUSCOVY DUCK. "John, John," yelled Maria, "the old duck's pitching her ducklings into the creek, and they'll all get drowned!" Sure enough, when John got there the old Muscovy grabbed the last little quack by the neck and fired him over the bank.

GENE READER. If your old quack does the same stunt don't risk your life to save the little rubbernecks. Mamma Muscovy is just giving them their first swimming lesson. And don't be surprised if she flies to the housestop and, storklike, builds her nest on the chimney. In South America, where

they are wild, they nest in the highest trees. They lay fifty greenish eggs a season, incubation requiring about five weeks. Drakes weigh from ten to twelve pounds and ducks from six to eight. They are pure white or glossy blue black and white. They have caruncles on their face, like a turkey, and often molt bare, so that hunters may pick them right up. The drakes are great fighters. When angry they raise their crest, wiggle their tails, hiss and charge. They are the oddest, most ornamental and finest table ducks. "Not fit to eat," replies Mrs. Know-it-all. "Our first Muscovy duck was

WHY, when she came into the church to get from Mrs. Blank. Who had a profile sweet. Her figure, too, was up to date. Indeed, she was quite rare. She had a way of making friends that capped the climax too. Indeed, all fell in love with her. They simply just had to.

And scanda! never had a word To say about her life. While Mr. Blank and Mrs. Blank Seemed model man and wife. But what surprised the ladies most Was how this woman dressed. Indeed, she led the whole parade, 'Twas candidly confessed.

Why, when she came into the church To get from Mrs. Blank. The women felt so out of style When they saw her swell hat. Now, all these anxious women knew Her husband wasn't rich. They all were puzzled how she could Dress at such a high price. So a committee went around To call on Mrs. Blank To get from her a tip or two How to attain such rare. She led them to her chicken coop And showed them her fine flocks. The mystery there at once lay bare— She had fine Golden Rocks.

O Rocks, O Rocks, that fill egg crocks. You beat the band, you do. To pay Maria's hats and frocks And Bill's Havanas too! C. M. BARNITZ.

KURIOS FROM KORRESPONDENTS. Q. I had so many chicks dead in the shell last season and wish to ask which part of the hatch the germ is most liable to injury from shock—too much heat or cold? A. The first week, especially for shock, eight to twelve days for extremes of heat and cold.

Q. Does it injure a show bird to let her hatch? A. No. After such a rest a hen is healthier, a better layer, breeder, moult and lays sooner and is in better shape for show.

Q. Do you help little chicks out of the shell? A. Very seldom and only when we see that dryness prevents chick from escaping. The chicks that can't get out are generally upside down, monstrous or very weak and amount to nil.

Q. After a chick picks the egg how soon should it come out? A. In five to ten hours; quickest under hens.

Q. I recently set an incubator with 150 eggs and got twenty-two chicks. There were sixty infertile and sixty-two rotten eggs, and six eggs were broken during hatch. How many of the eggs were fertile? A. Eighty-four. Infertile eggs are never rotten during a hatch. The sixty-two eggs may have been chilled. It's a wonder you got any chicks with that many spoiled eggs unless you tested them out as the hatch progressed.

Q. I understand some fanciers bleach cream and brightness from their show birds' plumage with hydrogen peroxide. How do they apply it? Does it cause injury? A. This is a fable's trick. You must buy from vendors of "poultry secrets," so slick. Peroxide does not bleach out brass, but it bleaches the yellow from heat and legs and makes the feathers so brittle that any judge may discover the trick by simply rubbing and bending the feathers. It also causes temporary sufficing.

Q. I set an incubator and hen on the same date. The hen hatched her chicks in twenty-one days, and the machine hatched in nineteen days. Will you explain? A. The hen hatched O. K., but you ran your incubator too hot, and its forced chicks will likely be weaklings.

Q. How do you get broody hens to adopt incubator chicks? I fall in nearly every instance. A. The hen must have been broody for a week or so. In the afternoon put chicks under her on nest and make it dark. Thus they will get accustomed, and the next morning take them off and feed, giving the hen whole corn and chick feed together. By this plan we have had hens take chicks a week old.

DON'TS. Don't try to hurry prosperity by any method that will make what you gain a source of pain or permit others to remark, "There goes a human shark." Don't ridicule the farmer as a "punkhead." He looks from nature unto nature's God as he plows up the sweet green sod. He turns that furrow in the field that earth may for you sweet bread yield.

Don't look upon the city man as a stuck up fop. Those folk amid the dust and noise wish for quiet country joys and look upon the husbandman as brother in the one great clan. Don't stir up prejudice against yourself by running down another's product. If his stock is nil folks will see it. If his eggs are bad they need no ad.

MINARD'S LINIMENT CURES PAIN. Ask for MINARD'S and take no other

Dr. Herbert Rice, of Massachusetts is visiting friends here.

Mr. Lamert Daniels is spending a few days in Digby with his uncle at the Methodist Parsonage.

Miss Florence Nelson and her brothers, Eustace, left for St. John's, Nfld., on Wednesday.

Rev. Arthur and Mrs. Archibald and family went to Deep Brook on Monday for the summer months.

Miss W. Milvern is the guest of Mr. and Mrs. Fred Schmidist.

Mr. W. H. Smith was in town on Monday.

Miss Josephine Graham has gone to visit her sister, Mrs. Dr. Braine at Glen Margaret.

To Rent.—For the summer months a house, furnished, Apply to W. W. Wade.

**Clamecantsport**

There are at present many strangers including American tourists in the Village, which at times make our streets have a titled appearance.

Haying is progressing now as the weather seems to have taken a change for the better in connection with this branch of farming.

The shipping business here has been quite brisk lately. No less than four large schooners have loaded wood and piling for Boston within the last fortnight as follows: Sch. Emma E. Potter loaded by McCormick and Strachan, Sch. Boba and Mercedes by Herbert Hicks and Sch. B. B. Hardwick by Mrs. A. L. Potter. This would indicate that Clamecantsport is doing her share of business.

Several commercial men have visited here recently in connection with their various lines of goods and we fancy with good results as our merchants here strive to keep up to date in their lines of goods.

We have had a number of Bridgetown people within a short time visiting friends. Among them we have noted Mr. and Mrs. W. V. Jones and Miss Carrie Hall, Mr. and Mrs. A. Ward Beeler, Mr. and Mrs. J. Harry Hicks, Mr. Regd and Mrs. W. Dodge, Mr. and Mrs. O. C. Jones, of Digby, were the guests of Mr. and Mrs. W. C. Jones recently.

Mrs. Gilbert Dittmar, of Boston, is visiting his aunt, Mrs. Gibbons.

Mr. Charles Shaw, of Boston, is spending his vacation with his mother, Mrs. J. Shaw.

The teachers belonging here are at their respective homes spending their vacation and seem to be having a good time.

Miss Journey, of Weymouth and Mrs. Bonnett, of Boston, are the guests of Capt. and Mrs. Musella.

Mr. Herbert Vroom and Mr. Chas. Ritchie were on a trouting expedition last week and we learn did well.

**A WORD FOR THE HORSE**

(Toronto Star)

When the automobile came, there were those who said that the horse must go; but the horse stayed. Its tillage stays. On occasion it drags its rival.

On the whole, mankind behaves itself better to its automobiles than it does to its horses. A sick automobile is generally sent to the repair shop. The chauffeur knows that it is easier to cure it in the first place than later. Its tanks are kept filled. Automobiles will not run without gasoline. But the horse, because he will still struggle on when he is sick and when he is thirsty, is subject to much abuse. And the flies, which are not among the things which give motor cars nervous troubles, make life misery for man's best friend.

This is the "runaway season," and a goodly percentage of the runaways are caused by flies. Flies and over-work are responsible for others. To protect the dumb creatures from insects, to see that they are properly fed and watered, and to exact only a hot day's work on a hot day is well as of the horse. As man's servant, it is entitled to the same care and attention as the other servant, the automobile. As man's friend a creature endowed with the spark of life and suffering, it is entitled to more.

**BUSINESS GOOD AND PROSPECTS EXCELLENT.**

Financial Situation in Canada Sound and no Uneasiness Felt Over Depression in Stock Markets.

Montreal, July 26—Leading local bankers when interviewed today of the financial situation expressed the view that there was nothing in the Canadian situation to cause any uneasiness. All reports showed that trade throughout Canada was good, and the prospects fine.

**Port Wade**

Mr. MacKenzie, of the firm of MacKenzie and Mann, visited this place last week, coming in his private car.

Mr. Bayne, road Supt., of the H. & S. W., who accompanied him there is stopping here for a few days.

The large steam ship "Catalone", Capt. Glover, is here awaiting the completing of the loading machinery so as to load ore for Scotland. Mr. Glover's ship is a fine one. She hails from London, England and has a gross tonnage of three thousand seven hundred and eighty-four.

Mr. Drummond, President of the C. I. Co., has been here a few days. Mr. W. F. C. Parsons, Chief Engineer of the C. I. Co., is also looking after the work here.

Mr. C. M. Crockett, Secty. of the I. Matherson & Co., Iron Works, New Glasgow, has been here the past week quite badly bruised by the sliding of a number of iron buckets, Friday, though hurt, he is still attending to his duties.

Mr. MacAloney, head machinist at the Torbrook Iron Mines, has been here the past week with a number of mechanics helping to install the machinery.

Mrs. Percy Fleet, Mrs. Archibald Morrison, and Miss Ella Johns returned to Boston on Saturday last.

Mr. Andrew Keane came home from Everett Mass. on Saturday.

Mrs. Belle Holt and son Harry, came home from Boston Wednesday with the remains of Mrs. Holt's son, Willie, who died in the hospital there of hemorrhage of the lungs. The sympathy of the community is with the family in their severe bereavement. Mrs. Holt's son returned to Boston on Saturday.

**Painful Stitches in the Back**

No one but those who are afflicted with the dreadful Kidney Disease knows what this means, and you who are so afflicted will forget all about it in a few days if you are only wise enough to take FIG PILLS. FIG PILLS are guaranteed to cure you. If not, your money back.

25c. a box, at all leading drug stores. W. A. Warpen, special agent.

**A SERUM-COMIC TRAGEDY**

She was a doctor's child, and he embraced the opportunity. From all disease to make her free With absolute immunity.

"And first, said he, "as I endorse Prevention of diphtheria. This anti-toxin from a horse Should kill some bad bacteria."

"This vaccine from a cow (And I endorse it fully). Should help along, and anyhow 'Twill make the child feel 'bully.'"

"Of snake-bite serum just a touch? We get it from a rabbit Which we have bitten up so much. He really likes the habit."

"Some meningitis toxin, too, Would better be injected; A guinea pig we strain it through To get it disinfected."

"Some various serums of my own I'm rather sure will answer; I make them for all troubles known, From freckles up to cancer."

Alas! Alas! for all his pains The end was scarce distressive; She soon had nothing in her veins But various kinds of virus.

Part horse, part cow, part sheep, part goat; Her laugh was half a whinny; "Dear me," said he, "she's half a shot And badly mixed with guinea."

"A girl who bleats and has a cud Will never make a woman; Will never make a good clean blood I'd better get some human!" And make her partly human!"

Edmund Vance Cooke.

**Always in Stock**

A complete line of WALL PAPERS in all the latest and leading designs. Samples sent to any part of the country.

CREAM SEPARATORS, SEPARATOR PAINTS and high grade SEPARATOR OIL always in stock.

A few high grade CARRIAGES to clear sold on reasonable terms. Phone 19.

**F. B. Bishop - Lawrencetown**

**Clementsport, Dutch Shore, and Colonial Arms**

(Continued from page 1.)

Industry might mark a new era in the history of our country. Our people ever restless have been continually in the past leaving our shores in search of wealth and homes in foreign countries. Captain Spurr in choosing a name for his place, says, "Come Home." Colonial Arms are open and extended to greet you, if you are tired and restless in the home of your adoption "Come Home" and rest. Do you want nauting, fishing, boating and bathing among our colonial hills and streams with motor boats and all modern conveniences to make you not only comfortable but happy? Colonial Arms invites you. Are you a stranger seeking rest and recreation? Have you money to invest in some paying enterprise in which the colonies are teaming? Come to Colonial Arms and Captain Spurr will tell you all about it.

"Miller," said Captain, "We are home, and I forgot to tell Captain Spurr about Empire Liniment. We will have to go down there again some day."

O. S. MILLER.

INSANE MAN PLACED OBSTRUCTIONS ON TRACK NEAR BURBIDGE STATION.

Ottawa, July 27.—The passengers on this morning's C. P. R. from Maniwaki to Ottawa had a narrow escape from death through the timely discovery by John Barker, a section man, of an attempt to wreck the train through the placing of a barricade of planks, stakes, spikes and a ladder on the track along the deep ravine by Louis Richard, an insane man, found wandering in the vicinity. Richard was arrested and sent up for trial.

GETTING AND EARNING.

"The trouble with Jim," said his uncle, "is that he always is hoping for opportunities to make money, but he doesn't have any desire to earn money." There is a tremendous difference between those two ways of looking at money. The craving to make money to get it quickly and in great quantities, without any real earning of it, is an unwholesome and evil craving. The lad that fills his head with newspaper items about millionaires and sudden fortunes is not the lad that is worth his wages to any employer. The desire to make money leads many a young clerk into gambling with borrowed money, and so into disgrace and ruin.—Sunday School Visitor.

**BRANDRAM-HENDERSON, LIMITED.**

**ENGLISH PAINT**

—That's The Paint For Me

—The Paint With The Guarantee

This good, reliable paint bears the guarantee of Brandram-Henderson Limited.

This guarantee says that the white pigment forming the base of Brandram-Henderson "ENGLISH" Paint is 70% Brandram's B. B. Genuine White Lead and 30% Pure White Zinc—100% pure.

LAWRENCETOWN, Nova Scotia.

**GOURLAY PIANOS** are all of one quality

**THE BEST**

4,000 Gourlay Pianos are now in constant use, not only in Canada, but in Great Britain, United States, South Africa, China and Japan. How they have stood the extreme test of climatic changes is shown in a letter from Japan as follows:

"You are to be congratulated on producing a piano, that will stand this climate. Ours is in fine order, while others brought here from America are terribly cracked and damaged."

Every dollar INVESTED in a Gourlay brings the LARGEST POSSIBLE DOLLAR'S WORTH in return.
