Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	14x	18x	22x	26x	30x	
12x	16x	20x		24x	28x	32x

The copy filmed here has been reproduced thanks
to the generosity of:

National Library of Canada

The images appearing here are the best quality
possible considering the condition and legibility
of the original copy and in keeping with the
filming contract specifications.

Original copies in printed paper covers are filmed
beginning with the front cover and ending on
the last page with a printed or illustrated impres-
sion, or the back cover when appropriate. All
other original copies are filmed beginning on the
first page with a printed or illustrated impres-
sion, and ending on the last page with a printed
or illustrated impression.

The last recorded frame on each microfiche
shall contain the symbol → (meaning "CON-
TINUED"), or the symbol ▽ (meaning "END"),
whichever applies.

Maps, plates, charts, etc., may be filmed at
different reduction ratios. Those too large to be
entirally included in one exposure are filmed
beginning in the upper left hand corner, left to
right and top to bottom, as many frames as
required. The following diegrams illustrate the
method:

L'exemplaire filmé fut reproduit grâce à la
générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le
plus grand soin, compte tenu de la condition et
de la netteté de l'exemplaire filmé, et en
conformité avec les conditions du contrat de
filmage.

Les exemplaires originaux dont la couverture en
papier est imprimée sont filmés en commençant
par le premier plié et en terminant soit par le
dernière page qui comporte une empreinte
d'impression ou d'illustration, soit par le second
plié, selon le cas. Tous les autres exemplaires
originaux sont filmés en commençant par le
première page qui comporte une empreinte
d'impression ou d'illustration et en terminant par
le dernière page qui comporte une telle
empreinte.

Un des symboles suivants apparaîtra sur la
dernière image de chaque microfiche, selon le
cas: le symbole → signifie "A SUIVR.", le
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc.. peuvent être
filmés à des taux de réduction différents.
Lorsque le document est trop grand pour être
reproduit en un seul cliché, il est filmé à partir
de l'angle supérieur gauche, de gauche à droite,
et de haut en bas, en prenant le nombre
d'images nécessaire. Les diagrammes suivants
illustrent la méthode.

LABORATORY

BULLETIN No. 107

DOMESTIC BUTTER

LABORATORY
OF THE
INLAND REVENUE DEPARTMENT
OTTAWA, CANADA

BULLETIN No. 107.

DOMESTIC BUTTER.

LABORATORY OF THE INLAND REVENUE DEPARTMENT,
317 QUEEN ST.,
OTTAWA, ONT., September 11, 1905.

W. J. GERALD, Esq.,
Deputy Minister of I. R. D.

DEAR Sir.—I have the honour to hand you a report upon domestic butter, i.e., butter as found in the retail market, and intended for home consumption. This report comprises the results of the analysis of one hundred and eighty (180) samples, collected under your authorization in July last.

It is regrettable that owing to delay on the part of Lyman Sons and Co. of Montreal in supplying containers to our inspectors, no samples were collected in the districts of Nova Scotia, New Brunswick and Prince Edward Island. In each of the remaining (nine) districts, twenty samples were collected.

The work of analysis has been done in this laboratory and I have to acknowledge valuable assistance on the part of Mr. Valin and Miss Wright.

Most of these samples are farm made butters, and many of the vendors were unable to trace samples to their origin. Nineteen of the samples are designated as 'Creamery made'.

We hear so much about the presence of borax and boracic acid in Export Canadian butter, that it is very surprising to find only one of the samples included in this report, containing this preservative. The sample in question (No. 18, Montreal) was purchased from Ewan Bros., 376 St. Antoine St., Montreal, but its maker is unknown.

In further corroboration of the absence of borax, in domestic butter, I caused eleven (11) samples of creamery butter as supplied to the Ottawa market, and representing as

many different makers, to be specially examined. Farm made butters being apparently quite free from borax, I wished to know whether the preservative was used by the larger creameries. The following results were obtained with these samples.

Creamery.	Vendor	Borax.
A—Maxville (Edwards Creamery Co.)	McGregor	Present.
B—Rising Sun (North Wakefield)	"	None.
C—Golden Leaf	Bate	Present.
D—Renfrew	Bryson & Tatham	None.
E—Aldernay (Wellington St.)	Moreland	"
F—Arnprior	Lindsay	"
G—Hilbrook (Prescott)	Bate	"
H—Laurentian (N. Nation Mills)	Matthews	"
I—Royal (East Templeton)	Ottawa Dairy Co.	"
K—Ottawa Cold Storage		
L—Favorite		

Thus it appears that three (3) out of eleven creameries supplying butter to Ottawa use borax. It is noteworthy that No. 25472 (No. 1, Kingston), said to be Renfrew creamery, contains no borax.

I do not wish at this time to raise the question of the desirability of employing borax in butter. There is certainly no legal objection to its use. But it is a highly interesting fact, that Canadian farm-made butter is free from borax, and that even creamery-made butter contains it quite exceptionally.

The last extensive examination of butter under the Food Act, was made in this laboratory in 1890. At that time (See Bull. 16), 150 samples were analysed; the examination having special regard to the possible presence of foreign fat (Oleo-margarine).

In the present instance the numbers tabulated under 'Refractometer,' indicate that no foreign fat exists in any of the samples now reported. It may be explained that the refractive index of the butter fat is observed at temperature above the melting point of the fat. The exact temperature of observation need not be known, since the figure found is checked by a specially graduated thermometer whose scale shows the mean reading for genuine butter fat at the temperature of observation. This number is entered in the table under the caption 'Normal,' while the observed reading is placed beside it, in the column headed 'Found.' A difference of about one unit, is permissible, owing to variations in the constitution of genuine butter fat, and to incipient rancidity.

The question of the amount of water which may legitimately be present in butter has often been discussed. In 150 samples examined in 1890, the mean water percentage was 8.97. A very careful study of the amount of water present in Canadian Creamery butter was made by Mr. Shutt, Chemist of the Experimental Farms, in 1902. Of 105 samples examined, only two showed more than 15 per cent water; only one sample exceeded 16 per cent; and ninety-two samples fell below 14 per cent. Sixteen per cent of water is, I believe, the limit fixed by English law, for imported butter. It will be seen that only one sample (No. 14, St. Hyacinthe) exceeds this amount. Only eight (8) samples exceed 14 per cent of water, while 114 samples contain less than 10 per cent.

The salt present has been determined by estimating the chlorine, and is therefore slightly below the quantity actually used for two reasons.

1st.—Commercial salt is not pure chloride of sodium, but contains traces of sulphates, etc.

2nd.—No allowance is made for the hygroscopic moisture in commercial salt. This last may frequently reach 10 per cent of its weight.

The demand for *fresh* butter, i. e., butter containing but little salt, is evidenced by the low percentage of salt found. In 1890 the salt content varied from 15.16 per cent to 1.0 per cent, the average amount being 5.15 per cent. In the present collection the average amount of salt is about 3.5 per cent.

The numbers given under 'Curd' are obtained by subtracting the 'salt' from the 'non-fat solids.' Since the former number is somewhat low, for reasons just given, the 'Curd' percentage will be correspondingly higher than the truth. The keeping qualities of a butter (apart from the addition of antiseptics) depend largely upon the completeness with which the curd is removed. This is effected by 'Working' the butter. A too complete removal of the curd, however, injures the taste of the butter, and as the public demands a table butter of distinct aroma and taste, the tendency will be to reduce the so called 'working' of the butter to a minimum, and to depend upon cold storage and the addition of preservatives to give it keeping quality.

It was proposed by Dr. Vieth of the Aylesbury Dairy Company, London, England, in 1890, that no butter offered for sale should contain less than 80 per cent of butter fat. Judged by this standard, seven (7) samples of the present collection would be condemned, as follows:—

No. 14—St. Hyacinthe.....	78·60	Butter fat.
" 1—Montreal.....	77·38	"
" 4— "	79·38	"
" 18— "	79·32	"
" 11—Kingston	79·78	"
" 12— "	79·72	"
" 17—London.....	79·84	"

It is, however, to be added that 113 samples (= 63 %) contain more than 85 per cent of butter fat.

I would respectfully recommend the publication of this Report as Bulletin 107.

I have the honour to be, sir,

Your obedient servant,

A. MCGILL,

Acting Chief Analyst.
