

CHIGNECTO POST AND BORDERER

SACKVILLE N. B., JULY 28, 1892.

THE LIBERAL PARTY.

Following close upon the call made by the Toronto Globe for a grand convention of the Liberal Party of Canada to be held at a not distant date, comes the apparently authoritative announcement that Mr. Laurier will shortly resign his position as leader of the party. From whatever standpoint it is viewed, a convention of the different wings and factors of Liberals could but result in good to the party, and if there is an atom left of the old Liberal spirit which enervated Hon. George Brown, good would consequently result to Canada also. That party has lately gone haywire. When last crossed the floor of the House to the left of the speaker, its minority was such that its friends could hope for better days in the near future. But this future has not yet dawned. The small minority of 1878 has grown to 73 in 1892 and seat after seat which has long been considered safe, has been given over to the party which for fourteen years they have claimed to be the party of the future. The platform for the last campaign, Unrestricted Reciprocity, Free Trade, Commercial Union or whatever name it may choose to call under, was a policy which involved more sacrifices than Canada could make for the privilege of selling in a market which is little if any better than our own. It was a catch policy and more a ruse to get its followers to the Treasury benches than as a means of increasing the prosperity of Canada. But its effect has been otherwise. Hon. Edward Blake foresaw the consequences of such a policy. He and many others saw that it meant first commercial and then political absorption and they refused to sail under false colors. The Conservative policy may not be perfect. There may be ways in which the country would be benefited by more careful administration, but Canadians prefer to retain their national institutions as they have them, than they flinch away by a policy whose true nature is kept in disguise.

As a leader, Mr. Laurier, has not been a brilliant success. He had too many factions to carry. Too many antagonistic factions to harmonize. Had his followers seemed a different attitude towards the country, he had ideas and a force of personality which might have kept his party's head above water, but with a ring of Cartwrights whose blue ruin speeches form the fiction of much Canadian history of fourteen years ago, and a host of Merciers whose political morals are of the stripe that have sent many a plebeian to prison, he could but little more than keep the name of the party valuable member.

Mr. Davies of P. E. Island, Sir Oliver Mowat, Premier of Ontario, and Mr. Patterson of Ontario have been mentioned as successors but the probable choice in the event of Mr. Laurier's resignation has not been made public.

The English Market.

There can be no more valuable testimony given upon the worth of a market than that of a man whose business brings him into daily relations with it. His opinions should always carry considerable weight where ever given. Alderman G. F. Franklin, of Toronto is one of the largest, probably the largest shipper of Canadian cattle shipped to the English market. In a letter to the *Chignecto Globe* published on Saturday last he says:

Mr. Editor, it is difficult to answer satisfactorily why trade and the supply of meat has been so much out of proportion to other years. But after all the facts upon Canadian farmers the absolute necessity of breeding and feeding the highest class possible of stock is the only sure outlet for our surplus stock—and indeed for all other animals, especially in the States. That country has at least 16,000 head of cattle more than we have, and people can consume every week, and about that number and dressed find their way to Scotland and England every week. This has been the means (this year at least) of cutting the market to that extent that the British people have been supplied with an abundance of animal food at much less than they were used to pay for it. In consideration of the expenses of sending them across the Atlantic, competition is great. Canada must and will hold its own. And I desire to point out a record that Canadian cattle surpass all and any animals that seek purchasers in Great Britain. In regard to the sheep trade, let me call the attention of your readers to the vast changes that have taken place in the supply of mutton to England during the last twelve years. In 1880 the first 400 carcasses of frozen mutton reached England. In 1885 the number had increased to 75,000. In 1890 the number had increased to 2,945,000. And last year the large steers employed in the vintages of refrigeration mutton totted up to 3,324,000 carcasses. Multiply these by 60 pounds, the average weight of each carcass, and it shows that a colony of Great Britain delivered to the motherland 199,440,000 pounds of mutton yearly. Canadian farmers do you realize what competitors they have to contend with and all this weight, this stupendous weight, of mutton is added to the thousands of their own sheep. Therefore I think your readers desire information will readily understand why the markets are depressed. No matter how large, and numerous the pollution of a country may be, it can be over-supplied, and England at the present day is overwhelmed with home and foreign supply. I think your readers so far for the day as in my time when animal food was only procurable for one day in the week for the farmers of Lancashire, and that was Sunday. Every other day they had porridge, bread, and meat, or a bit of fried fish, and that was all. But now the earth is near and accessible, and, with water and electricity, we are drawing nearer and nearer to every part of the world.

G. F. FRANKLIN.

It will be noted that again is brought out the fact that the farmer must study the wants of the market and breed only the best to be successful.

CATERER CURED, health and sweet breath secured by Shiloh's Catarrh Remedy. Price 50 cents. N. B. Remedy is sold by A. Dixon, Sackville, and Fairweather, Dorchester.

Weldon versus Hawke.

The action for libel brought by Dr. Weldon M. P. for Albert county against John T. Hawke, editor and proprietor of the *Moncton Transcript* was disposed of on Friday last by the jury awarding the plaintiff a verdict of fifty dollars. The full amount claimed as damages by the plaintiff was five thousand dollars and although the verdict given is but a small percentage of this, the victory is as great as if the whole amount had been awarded. The libellous article was published in the *Transcript* on September 11th last and was as follows:

Prof. Weldon, of Albert, it is said, has deserted his parliamentary duties for the session. If Dr. Weldon's professional duties interfere with his position as a member of Parliament, surely he ought, in common justice to his constituents and to the public service, to resign his seat in the House of Commons. Besides, the country is about to witness in Parliament one of the fiercest debates ever conducted in upholding the party of the public service and the integrity and independence of the House of Commons. It would afford Prof. Weldon an opportunity of applying his powers as an orator to the permanent interests of his country to uphold those who are fighting for the vindication of righteous principles.

But it is proposed, it is said, that Sir Hector Langevin and, as Dr. Weldon has not the courage to do so, the common honesty to vote in condemnation of it, it is proposed to designate him as an Albert county farmer.

But in claiming his mileage in connection with the sessional allowance the other day, he was charged with having received \$87 more.

The evidence adduced upon the charges is rather voluminous and it was sufficiently clear to all who attended the trial that Dr. Weldon, or the writer of the libel had no other foundation for the assertion that Dr. Weldon, in a bill and collected money from the government, or that he shirked his vote on the Tarte charges, than a rather prolific imagination stimulated by a fierce political hatred. The facts of the case are that Dr. Weldon found it necessary to leave his home during the long session of last year to attend to his law lectures at Dalhousie Law School, Halifax, and instead of shirking his vote on the Tarte case he went from Halifax to Ottawa solely for the purpose of recording it. Dr. Weldon stated also that he had often received charges over different railways in common with other members but with one or two exceptions he had never used them and then for short distances and while travelling in his private capacity. There is nothing whatever in the charge of corruption in changing the ballot papers. Judge Fraser pointed out that while a man could have but one domicile he could have two.

Mayor Snow's Absence.

Nothing has yet been learned of the whereabouts of Mayor Snow, Representative of several insurance companies here yesterday looking over his accounts and making arrangements for carrying on the business. Captain Masters has been appointed to transact the business which of course requires immediate attention. It is believed the business is all right as between the companies and the parties affected. The city council has taken steps to have an investigation in regard to Mr. Snow's whereabouts. Detective Ring, of St. John, was sent for last night and will probably arrive here today. He will likely be detailed to make inquiries along the railway and steamboat lines. He is expected to visit various quarters to bring any solution of the mystery. Many of the reports in circulation are shown to be without foundation. From information received at this office this morning it is thought Mr. Snow was not in Hampton at all on Friday. He was there Thursday and made enquiries of a boy in the ticket office about the price of a ticket to some place that the boy did not know about, indicating that it must have been some place outside the province. —Times.

Says the *Transcript*: Mr. George Harris has sold his well known horse "Tip-top," to Mr. W. Forrester, of the Quebec Cavalry School, for the handsome sum of \$225. This is one of the best bred horses in the district; being sired by General Hewitt out of Lady Green; and full blooded to Stag owned by Walter McMonagle, Sussex.

A Magnificent Record.

The contents of census bulletin No. 12 will be a revelation to pessimists. The progress of Canadian industries, cities towns and villages under the beneficent influence of a truly National Policy is exemplified as it never was before. In 46 cities and towns having a population of 5,000 and upwards, the number of manufacturing establishments has increased 6,000 since 1881, and capital invested \$93,000,000, the number of employees 62,000, and the yearly wages paid \$22,000,000.

This magnificent record is more than an evidence of the success of any party policy however great and wise that may be. It is an indication of the development of popular interests and the steadily increasing comfort of our people. It is an old truism that the more diversified are a country's industries, the more room there will be for individual intellect and ambition. The development of our manufactures is another name for the presentation of opportunity to rise in the world, and to find that peculiar occupation most fitted to a man's capacity, without which individual chance we should be a mere nation of hewers of wood and drawers of water to the neighboring republic.

Not only, however, has an opportunity been afforded to many thousands of our population, but increased wages and profits have also followed upon the adoption of moderate protection. In 1881, the average yearly wage was \$284.26 in 1881, now it stands at \$437.26. In 1881 each \$1 invested by the capitalist brought him \$1.72, now it brings him only \$1.88. So that unlike the United States under its protective tariff, the N. E. in Canada has improved the position of the laborer at the expense of the manufacturer. In the republic to which our critics wish to see us turn, the opposite has been the result.

Look also at the expansion of our great cities. The output of manufactures in Toronto has increased \$25,000,000 in the past ten years, and that of Montreal \$20,000,000. Meanwhile, according to Mr. Johnson's summary, the urban population has increased only by \$306 per head of its increase in numbers, while the rural population, or the small towns and villages have increased theirs by \$386.

The reason of the whole bulletin, as of previous ones, is that if our population has only grown half a million in ten years its comfort and prosperity has increased in far greater ratio. Hope and faith, not pessimism, is the lesson of the figures. —Toronto Empire.

Amherst.

Seven cars filled with excursionists left the station on Wednesday and were joined by two more equally well filled Macan, bound for that pretty little watering place, "Pugwash," and I have not yet heard of any who did not well satisfied with their days out. The day was spent in bathing, boating driving and renewing old acquaintances. After deducting all expenses upwards of \$100 will be left to divide between the three churches, who originated and successfully carried out the undertaking.

Mrs. John Brown left on Thursday for a short time in the morning to Halifax where she will spend the remainder of the summer. She is the guest of Miss Laidlaw.

Maritime Matters.

—Bouchard and Landry, two whisky smugglers of Quebec were captured on Saturday. A large quantity of whisky was taken with them.

—Ira Cornwall of St. John was in Sussex on Monday and visited the butter and cheese factory. He expressed himself strongly in favor of sending cheese to England, where a good market awaits a first class article. —Sussex Record.

—The steamer *Danara* came within an ace of being run into by a German steamer going 19 miles an hour near Newfoundland the other day. So close did they come that the *Danara* was wet with the spray from the other bow.

—JOHN ACKER of Nictaux falls, Annapolis county, was instantly killed by lightning at Blomington on Saturday. He was carrying a couple of scythes under his arm and was running to find shelter when struck by the fatal fluid.

—Says the *Chatham World*: The shipments of fresh salmon in ice this week for United States markets were 54 boxes, counting 854 fish. The run of salmon was good on the north side. Donald McLean has 100 fish on hand to ship.

—On Saturday, while working on a raft a few miles above Fredericton, Randolph Whitlock was instantly killed by lightning and William McCoy, who was working with him, was very seriously injured. Deceased was unmarried and belonged to Robertson's Mills. McCoy belonged to Sheffield.

—The S. S. Helen, which sailed on Friday with 1200 standards of deals, boards and scantling, was loaded by Wm. Richards, for F. E. Neale, in 73 days. Daniel Crimmon is the stevedore. It is claimed that this is the fastest loading record. She got quick dispatch before, but was two days' less in port this time. —Chatham World.

—The steamer *Havana*, which took down a cargo of provisions, clothing, etc., for destitute people at St. John's Nfld., arrived at Halifax on Saturday. Captain Hopkins states when he arrived there the ship was so full of provisions that he was unable to discharge the cargo unless they received pay for doing so. The captain threatened to back out of the dock at last and bring the goods back to Halifax, when the relief committee got a gang of men to work and discharged the cargo.

—Lunenburg, N. S., has been called the Gloucester of Canada, and its people are proud of its name. The fishing fleet of Lunenburg county numbers about 100 vessels, averaging from 80 to 90 tons each. Supporting each vessel to cost \$4,500, a capital is represented of \$450,000. The crew of each vessel numbers from 15 to 20 men, so that at least some 1500 men are engaged in this great industry.

—The fishing fleet of Lunenburg county numbers about 100 vessels, averaging from 80 to 90 tons each. Supporting each vessel to cost \$4,500, a capital is represented of \$450,000. The crew of each vessel numbers from 15 to 20 men, so that at least some 1500 men are engaged in this great industry.

—Says the St. John Gazette: The New York strikes are effecting the lumber trade to a considerable degree. One large three masted schooner, the *Ada G. Shortland*, which has finished loading lumber at Millville, Woodville, will be being held up for a short time awaiting developments in New York. If the present condition of affairs continues the vessel may have to be held here a while but it is thought that there will soon be a chance to resume business there and word to that effect is being anxiously awaited here.

—Mr. James Armstrong, of Green Head, has been enjoying some rare sport in the evenings lately near that place. Standing on a point on the river just below Green Head he noticed numerous gaspareux jumping about the surface of the water, and began to skip his trout fish and water. Greatly to his surprise the gaspareux took the flies in a trout style, and in a short time he captured about a dozen of these funny jumpers which he generally think can be caught only in nets and weirs. —St. John Gazette.

Westmorland Point.

—Haying commenced. The dry weather of this month has prevented the grass crop from being what was expected in the same season. The English grass in general will not be above the average.

—We have had some beautiful showers lately which will prove valuable to the grain and root crops that were suffering considerable in consequence of the drought.

—Mrs. Thos. Keillor and Miss Fanny Chandler of Dorchester, are spending a few days here with their friends. This place is particularly interesting to Miss Chandler being the home and birth place of the late Rev. J. C. Keillor, who was the son of Sergeant Smith of Port Cumberland, whose sword still remains at the old homestead, and a number of whose descendants live in the old Point View graveyard.

—Rev. A. W. Teed of Carleton Co., N. B., with his sister has been making a very welcome visit to his relations and friends in this vicinity. Mr. Teed has the best wishes of many friends for the success of his labors in the ministry.

—Mr. Rev. D. C. Lawson has just returned from a visit to the New West Parishes. He was present at the Orange celebration at Moncton in which he took much pleasure, then proceeding to Salisbury where he took advantage of everything calculated to prove a benefit especially to his health which we are sorry to say is not very good, but which she feels much improved by her visit and which is particularly so from the result of her visit to the mineral springs at Salisbury where she took advantage of everything calculated to prove a benefit especially to his health which we are sorry to say is not very good, but which she feels much improved by her visit and which is Local Matters.

Mr. Geo. H. Steadman has offered as an independent candidate in Albert for the seat vacated by death of Mr. Turner.

The first shipment of coal from the Salt Springs Mining Co's mines was shipped to day to the Oxford Furniture Co. limited. It was a 20 ton gondola and looks well. —Press.

The Rockland wood trade has not been as profitable as usual this year owing to the low price ruling there for kiln wood. The average price has been \$3 to \$3.25.

At the Canadian Rifle League match on Saturday the Amherst Rifle association made the best score, 852 points. The Hamilton, Ont. team came next with 826. These matches are shot at home and the results photographed.

The body of Michael Sullivan, a railway foreman supposed to be from Moncton New Brunswick, was found in the water at Toronto on Sunday.

The man was about 40 years of age, five feet ten inches in height; his hair and moustache were light brown.

Great preparations are now being made by the Amherst Gun Club for a tournament under their auspices to take place on the grounds Amherst on Aug 17 and 18. Teams from all over the Maritime Provinces will compete for local prizes which will be offered. The local club is practicing and promising good shooting.

Mr. H. S. Bell of Moncton is the possessor of three Sable Island ponies, one pair of chestnuts, the other a dark bay, two years old. The chestnuts are a perfect match and will make a fine team. The ponies were brought from Sable Island about three weeks ago, and purchased by Messrs. H. G. & F. A. Marr. Mr. Bell claims to have secured the best cut of a lot of fifty.

John Atwood and Edward Arrows, who have been working in North Abington, Mass., were arrested on the arrival of the morning train from Boston, Saturday, by the police. They are young men who went from Springhill, N. S. and were arrested in Bangor in response to a despatch received by chief of Police Parker from Detective George C. Pratt of North Abington, Mass. They stole a watch and \$200 in money from a room in the boarding house where they were staying and started for home. The Massachusetts men will arrive in Bangor to day to take the men back with him.

Three serious fires in Albert county last week. On Monday the dwelling house of Thomas Smith, about one half mile from Egin Corner, was seen to be on fire. The wind was blowing a hurricane and in a remarkably short time, house, barn, and outbuildings were in ashes. The contents of the house were mostly burned. A man and moving machine were saved from the barn. From the building, man, and this was soon a sheet of flame. A force of men were sent on hand and by strenuous exertions prevented any further damage being done. It is reported that Dinmook Collier, of Collier Mountain had his house burned Tuesday night.

The St. John's Relief Fund.

A meeting of the St. John's Relief Fund Committee was held last evening at which the collectors reports were submitted. The total fund is \$449.00 in cash and \$15.00 in kind.

These assistants expressed their gratitude to the citizens for the very ready response given to the appeal, which greatly lightened their labors in raising the fund. It is decided to forward the money and goods immediately to the chairman of the Relief Committee at St. John's. The following is the list as reported:

Church Services.

Episcopal—July 31st, Morning prayer and sermon, St. Ann's 10.30; evening prayer and sermon St. Paul's 6.30.

Sackville Baptist.—Rev. W. H. Warren at Bethel 10.45; at Sackville 3 p. m. Y. P. Meeting at 7. Subject: "The Degradation of Sin."

Conference at Bethel on Wednesday evening Aug. 3rd.

Methodist.—Sackville, 11 a. m. and 7 p. m. Rev. W. Harrison; Upper Sackville, Rev. W. Harrison.

Around Town.

The Band will play at Lower Sackville on Saturday evening weather permitting.

PICNIC.—The Baptist—Episcopal Picnic is held at Cape Turbina today. The train left this morning at 8 o'clock with the largest load of the season.

PROPERTY TRANSFERS.—The Eliza Tingley property at Four Corners was sold on the 14th to Geo. W. Towse for \$940. Yesterday Mr. Towse bought in at mortgagee's sale the farm of 70 acres belonging to William McPhee, situated on Aboumagan Road.

DEATH OF D. H. CALHOUN.—In another column is announced the death of Mr. D. H. Calhoun which occurred in St. John on Sunday last. The deceased has been for many years a prominent figure in lumber circles in Westmorland and Albert Counties, and was also interested in the promotion of the Albert Southern Railway. Of late years the mills at Calhoun and Beech Hill have been managed by his sons.

A HOT WAVE.—A hot wave of considerable intensity has struck along the eastern portion of North America. In New York on Tuesday the thermometer started at 80 in the shade in the morning and gradually crawled up to 94. On the 4th day 44 were prostrated by sunstroke and the death rate among infants in the poorer districts was high. It is estimated that 123 were killed by the heat. The total number who succumbed is 227.

A number of horses dropped dead on the street. In Boston the heat was intense, the mercury standing at 93 1/2 most of the day. In Sackville the weather was above the average in the matter of heat.

A perfect match of the day the thermometer registered between 80 and 85 but towards evening the showers made the air cool and comfortable. The heat and thunder storm which passed over at five o'clock was very heavy in the east. In Botsford it was more like a tornado, and did some damage to crops and fences. At Moncton it is reported that a barn was struck by the lightning and destroyed. Yesterday the thermometer was still high but the heat was tempered by the wind.

SCOTT ACT.—In Chambers before Judge Palmer on Monday Mr. A. J. Trueman applied for an order in nisi the recent cases against Brownell and Fillmore of Sackville, orders in the following form were given by the Judge:

IN THE SUPREME COURT:

EX PARTE FREDERICK BROWNELL.

Upon motion of Mr. A. I. Trueman and upon reading the affidavit of Frederick Brownell, I do order that Walter Cahill, Stipendiary Magistrate in and for the County of Westmorland and Prince Edward, do show cause at the next Michaelmas Term why a writ of Certiorari should not issue to remove into this Court a certain conviction made by Walter Cahill as Stipendiary Magistrate for the County of Westmorland, for that the said Frederick Brownell did between the fourth day of February A. D. 1892 and the thirteenth day of May last pass the fourth day of February A. D. 1892 in the said County of Westmorland unlawfully keep for sale intoxicating liquor to wit: "The Canada Temperance Act" which said conviction is dated the seventh day of February A. D. 1892.

Two cases against Fillmore came up yesterday and were adjourned until Wednesday next at the request of the defendant's counsel to enable him to make defence.

Two cases against Nathan Hicks, Midgie came up yesterday and were adjourned until Wednesday.

On Thursday last, Priestly Estabrooks was fined of three violations the act and convicted \$50 and costs for each offence.

BORN.

PLINT.—July 5th, at Concord, New Hampshire, to Mr. and Mrs. M. W. Flint, a son.

MARRIED.
