### THOUGHTS BY THE WAY.

I offer no apology, and do not think these columns to the subject of High to "head off" just the reform that has has resulted in prohibition." peen asked for. This is exactly the position of High Liconse to day. It is an attempt on the part of these gentlemen to "head off" prohibition by this latest piece of sophistry.

On the 2nd of the present month a publie discussion on the question of High License as opposed to prohibition took place in the Academy of Music, Brooklyn, New York. It was a significant gathering, because of the large attendance, and more especially because of the importance and value of the papers and addresses on either side of the question that were presented. The symposium, for such it really was, was opened by a paper favorendeavor, so that readers of the CITIZEN may see both sides of the question, and have all information possible directly be fore them, to summarize the arguments furnished on both sides, on this particular

Gon. Eaton prefaces his paper by saying, "We at least all alike sock a common object, the suppression of the fearful evils of the liquor traffic." The only difference that he sees between himself and the prohibitionist is the difference in means adopted by each. His first argument is that the profits of the liquor traffic to-day (which he agrees are enormous,) have become a potent, secret and demoralizing power in politics. "Everywhere it is used by the most unscrupulous politicians, and the adroit agents of grog shop keepers, to defeat the policy of the Prohibitionists, to misrepresent them, to intimidate them, to elect their enemies to office, and to bribe, if possible, their supporters and agents." The argument is, erable portion of it, that now goes for at many points, and the written and ex- prohibition. these demoralizing political purposes, can pressed opinions of those whose position be applied by the State to lessen that dis- is such as to enable them to speak posiare making war.

Put in a sentence or two, the argument is, that the High License Bill, is in principle, a legislative declaration that the hundreds of dollars from towns, the thousands of dollars from villages, the tens of thousands of dollars from cities, and the hundreds of thousand of dollars from the States at large, annually contributed for the corruption fund of elections from the profits of the liquor traffic, and which have, for generations past, been more and more used to bribe voters, to buy the press, to elect corrupt demagagues, to support mercenary partisan cliques, to defeat the most worthy candidates, and to degrade and debauch our politics generally,-auch a bill, such a law, is a legislative declaration that these vast sums from such profits shall no longer be used for such purposes. It declares that a part, at least, of these profits shall go to a useful and honest purpose. They shall go nate the treasuries of towns, counties and License closed any of the grog shops of States, to be used perhaps to help support the poor-houses and asylums, to swer 'What class of saloons did High which the liquor traffic brings the most [License close t' His answer was substannumerous and degraded inmates.

In answer to the argument that at the best High License is only a compromise. and will delay the triumph of prohibition, Mr. Eaton replies that in substance this argument is, "that to remove an evil in part is in itself an evil." He believes, of course, that High License will result in closing one-third or one-half the grog shops, and will in the same proportion reduce drunkenness. Then follows the oft repeated argument that reforms are always gradual, and instances in history to this effect are quoted.

When it comes to a statement of facts, the liquor saloon, every low dive where a or ardent spirits of any kind. Mr. Dickie opens his argument by the statement that Gen. Eaton assumes, as do all advocates of High License, first that High License yields more money for the public treasury. This he looks upon as a specious argument. "To advocate High able to High License, by General Dorman License because it puts money into the B. Eaton, of New York. It will be our public treasury, that pays the cost of the open saloon, would be like saying with regard to those people whom I read about in your evening paper in this city of Brooklyn who are suffering with the smallpox, that we should advocate the continuance of smallpox, providing simply we could sell sufficient vaccine to pay the doctors' bills. It is a matter of no consequence that the poor victims of the disease suffer and die; it is a matter of no consequence that the revenue from vaccine matter does not pay the undertaker it is a matter of no consequence that it does not meet all the other expenses. Such a policy is at once set down as a process of bribery with relation to every voter who is concerned in the rate of taxation."

A strong point of difference between the address of Gen. Eaton and Professor Dickie, is that the former, whilst presenting certainly a very able paper, confines himself almost entirely to theorizing, to speculating on what should be the results. that by placing a high license on the The latter deals very largely in facts; he tress which the liquor traffic itself creates. tively on a question of this kind. > Professor Dickie takes up the case of the city of Chicago, from which point ho had just come, and whilst there had obtamed for hunself the official figures. "In the year 1882 there were 3,849 sa loons in Chicago, paying a license fee of \$52. The next year the license was double, and the saloons dropped off from 3,849 to 3,682. The next year the license fee was \$500, and in the number of saloons there was a slight decrease, - from 3,682 to 3,336. The following year the tax remaining uniform, the number of saloons rose to 3,584 The next year the number was 3,587, and the last year, 1887, it had risen to 4,093, a larger number of saloons in the city of Chicago during 1887 than during any one of the preceding five years."

He goes further and says -"I asked a prominent official this question, 'Has High Chicago f 'Certainly it has,' was the antially that it closed the least injurious class of saloons, it closed the class of liquor dealers who were doing business in a small way out in the suburbs of the city, in connection with a grocery trade. It closed those having the smallest patronage, and who really were doing the least damage. When asked if it had closed any of those dens of vice, 'where an evil that here to-night shall be nameless, is coupled with the saloon system," he said, 'Not one, not one.' I asked him did it close any of those lower dens and dives that the people of the city had been in the habit of calling the Black Hole of Chicago. Said the gentleman, 'Not one.' 'Every house of questionable repute in connection with

In favor of High License Mr. Dickie was followed by Mr. John Brooks Leviatt, of the Church of England Temperance Society, and the debate was closed by a rejonder again from Professor Dickie We would only be too plo-sed if the CITIZEN could give space to print in full the verbatim reports of these speeches that it has been the pleasure of the writer to study An honest effort, however, has been made here to summarize both the views pro and con. I am free to confess that the more fully I look into this subject, the weaker becomes the cause of those advocating rive scruples on the score of the practice, plausible enough to say that the placing life without deliberately manufacturing of a high heense fee on the saloons will reduce the drinking habits, and consequently the Cals that flow from them, daughters from the like pain and annoy but such is not the case. Let us take history as it reads; let us learn the lessons of experience; and then when the fight does come no one will be blinded by any of the false arguments of High License. History is entirely against it. Experience. m plain terms, says it is a humbug; and the more thoroughly its fallacies are ex posed, the more quickly will we all get to recognize the fact that there is but one panacea for this evil, and that is abselutely to banish it Prohibition.

The principle is just and humane. Upon this stable foundation of common sense humanity we base our plea for the exclusion of intoxicating liquors from family use. It is like leaving matches within reach of baby ingers, or encouraging servants to kindle the morning fire with kerosene, to teach the young to partake of and enjoy even the best wines, to initiate them into the delights of claret cup and the fragrant mysteries of sherry cobbler. #### Is Drunkenness a Disease?

AN INTERVIEW WITH DR. NORMAN KEER.

Titts is a question that has not been fully discussed in public as it deserves to be. That disease is often the effect of drunkenness most people know, but that drunkenness is often the effect of disease is a proposition by no means so fully accepted. Yet there now exists in London, as there has long existed in America, a society-- chiefly consisting of doctors—for the study and cure of inebriety. The president of the Society for the Study and Cure of Inchricty is Dr. Norman Kerr, a physician recog nized in the medical profession as the principal authority on the physical as poet of drunkonness, and the public, but in the majority of these cases a owing to Mr. Axel Gustafson's recent lectures at Exeter Hall, having heard a good deal lately about the other as poets of the matter, the present writer sought out Dr Norman Kerr to hear drunkenness, even in cases where peolowing conversation ensued: -

In some States a considerable is just what I mean. part of the receipts from licenses go to How do you account for that !- Be the support of these homes, in addition cause of a condition of pathological unto that the magistrates have the power rest, or a diseased or over-powering of giping persons convicted of being mental and physical unensiness which drunk the alternative of being treated; is impossible to describe, but which deat one of these homes instead of going mands relief even at the price of addto prison.

And which do they generally prefer? -As many prefer the prisons to the and unconditional abstinence from all

That does not say much for the homes.—On the contrary, it does.

How do you make that out 1-Because they know they will be cured of mented wine; intexicants are so dandrunkenness if they go to the homes, gerous to many reformed drunkards and it is because some of them do not want to be cured that they prefer to go to prison.

And the treatment in these American homes. How does it differ from the treatment in English ones !-- The treatment in all genuine and intelligently conducted homes for inebriates is much the same. But, I may tell you, there are homes and homes. Some are mero commercial speculations, without any attempt at cure or reformation, indulgence in liquor being winked at, and oven encouraged in certain cases. Then there is a second class of homes, both in America and in England, which may be called in popular plimscology purely "faith cure" homes, where the physical conditions of the inebriates are altogether ignored, and the all belonging to the house, which has ebriates are altogether ignored, and the only means used are moral and religious influences. The first class are not genu into in the sense of being honest and well-intentioned, although the trustment is defective. Then there is the third class, which is honest and at the same time intelligent because in this same time intelligent because in this class both the physical and moral aspects of drunkenness are recognized. In this class the bodily disease is dealt treatment of inebriety in England will In this class the bodily disease is dealt treatment of inebriety in England will with by appropriate medical and hygi. largely depend, as Dr. Crothers, editor enic troatment directed to the cure or of the American Quarterly Journal of allosiation of the particular state of each patient, and to building up healthy brain and nervo tissue. Moral and religious influeuces are at the same time employed to strengthen the self-control, the loss of which is, perhaps, the most difficult thing we have to cope with in dipsomania. Indeed, considerable emphasis is laid on the moral and religious influences, because of their elevating and purifying effect on the depravity of the inchristes, in whom, in the diseased state, selfishne s, lying and deceit are generally met with.

Where is there such a home in England !-The Dalrymple Home at Rickmansworth. It is indeed the only one licensed under the Habitual Drunkards Act, conducted without pecuniary profit to the proprietary, and publishing its records in scientific form.

But has not the Habitual Drunkards Act been a failure !-- Not quite. Although imperfect, it has yet done some and professional worry," in one to good. and intelligently conducted homes, like the Dalrympie Home, one-third of the patients have been permanently oured.

Then you consider, Dr. Kerr, that drunkonness is really a disease !-- Undoubtedly. In a very large number of cases as clearly a disease as gout, or rheumatism, or insanity.

How comes this disease generally? -Through certain physical degenerations of body and brain, which may be inherited or may be acquired.

Do you mean that a craving for al cohol is often inherited, just as gout or cancer is !- Perhaps that is hardly the correct way to state the facts. The disease of inebrioty, apart from the act of drunkenness, consists either in an unhealthful craving for, or an unhealth ful impulse to, intoxication. In some cases the taste for alcohol is inherited, physical tendency to intoxication is inherited, which tendoncy, on the application of an exciting caure, such as a glass of liquor, leads to an outburst of ple hate the taste of the intoxicant it-

It is, therefore, interesting to notice that its records indicate an intimate connection between drunkenness and disease. For instance, out of 103 cases treated there the liabit of drunkenness has been caused in forty-nine cases by injuries to the nerves, head, or spine. In forty four cases some complaint or disease was present, dyspepsia claiming the largest number of victims, and insanity coming next; while in forty-three cases sreditary tendency to inchricty had been traced, and in fifty-nine cases no family history at all was obtainable. By far the largest number of the patients were described as "gentlemen of no occupation," but only in eight out of the whole 103 cases was "want of employment" the exciting cause of the drunkenness, which in thirty cases was attributable to "sociability," in six to "business temptation," in nine to "do-mestic trouble," in eight to "business "over study," in two to "overwork," life," in one to "colonial life," and Don't you find that few people give three to "travelling" So much for the their consent to entering !— Yes. ### HEALTHIER THAN BEER,

An Industrious Laborer Who Makes Gatment Hie Substitute for Malt.

"No beer, thanks." "It will do you good, after working in the street all morning," add the foreman of a party of laborers from the Public Works Department to one of the most intelligent of his workmen, during a noming on an up town arrest the other

day. "I'd rather drink what I've get in my

"What's that?"

"Oatmeal and water."

"What do you drink that for !"

"To keep cool, same as you drink "It doesn't rost you like

though. "Try it once and see. When I began drinking oatmeal in my water, the wife had almost to make me take it. I used to drink a glass of beer every noon, two before suppor and 'work the growler' before going to sleep at night. That cost about twenty cents a day. Now I save all that and get along just as well as before. I don't know what there is about the meal, but when I have had a drink of the meal, but when I have had a drink of it I don't care for beer or anything else to drink You'd botter try it yourself."

"Oatmeal in water," explained a physician to a reporter who had overheard the above-recorded dialogue, "is one of the best drinks in the world for a working man, especially in warm weather It is nutritive, satisfying and agreeable to the atomach. For laborers it makes a usoful addition to the diet, costs but little, and repays the small outlay in the form of increased ability to perform labor, either physical or mental." - N. Y. Mail and Express.

#### Children's Dress.

THERE are, of course, several ways in which this question can be regarded. There is the point of view of fashion, and that of common sense. It is a puty that the first of these considerations should ever exist apart from the second; but unfortunately, especially for girl children, it does, and as a rulo it is in the earliest infancy of these that the compression which is to make them "good figures" begins, to be followed as soon as they can stand on their t' feet with preparations for making those " neat" - and deformed. It is as a rule useless to proach dress reform to adults. But all women who have taken to heart the lessons of physiology may help to save children from the mistakes that follow a blind adherence to fushion. At present besides the serious blunders already spoken of in connection with the dress of little girls, there is a fashion of cutting away the thicker moollen stuff of which the dress is made in front, in order to "let in" a puff of thin silk or lace; that is, in a country where diseases of the respiratory organs are painfully common, it is the custom to make the clothing thunor rather than thicker, over the chest, thus inducing colds which may ultimately develop into bronchitis or phthisis. Children's dress is a matter with which fashion should have little to do. Health and comfort should at any rate be the primary, if not the sole considerations.—The Hopital.

### JOURNALISM BOOMING.

### A Lot of New Periodicals.

THE Free Lance is a new candidate for public favor in the line of temperance journalism. It is published at Neenah, Wisconsin, and if number one is a fair sample of the issues that are to follow the Free Lance will desert o a warm welcome and support,

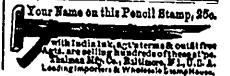

The Light of Home is a little eight page monthly, edited by A Il Lowis, Plainfield, New Jersey, and published by the American Sabbath Tract Society, Afford Centre. It is devoted mainly to the dissemination of arguments and facts in r. 'ation to the Sabbath and Sabbath observance

Another I.O G.T. journal is to the front under the title The New England Good Templar. It is published by E. B. Lord at Upper Stillwater, Maine, monthly, and is of eight page form, and full of rousing campaign matter, including an unusually large number of selections well adapted for lodge work. It deserves success.

The Canadian Sentirel is another eight page monthly, published by Mrs. J. H. Cowie, Monoton, N. B., devoted to "Subbath reform, liberty of conscience, Bible truth, temperance, and items of general interest." The Sentinel talks out, as might be expected, in favor of the Scott Act. We wish our good friend, the publisher, Large measure of success.

The Cadets' Advocate complex a special field in journalism being published in the interests of the Cadets of Temperat. v. an organization with which many of our st. of T. friends are already familiar, but of which, unfortunately, we hear very little in Canada at the present time. The Advocate to in the form of an eight page, 32 column paper, well gotton up, full of matter of value and interest, and is published at the low price of 23 cents persont, by Mosers. Hart & Klein, at 2345 Townsend St., Philadelphia.

A monthly magazine to be called Our Day will shortly be published by a syndicate of moral reform workers, prominent among whom are Joseph Cook and Frances R. Willard. It will, no doubt, be of high interest and value.

#### HIGH LICENSE.

LESEWIN RE will be found, under the caption of "High License," a letter from Mr James Thomson, of this city, in which he, in prorty strong language, accuses us of unsequesentation in an article published two weeks ago under the heading, "A Palace of Sin" In that article we quoted from the Public Leader, a recognized liquor organ, a graphic description of a gorgeously titted up saloon, just opened in Detroit. We spoke of the evil done by such seductive and attractive liquor shops and went on to sny .

"Our friends who want to respectabilize the liquor traffic through careful legislation, meluding High License, would reap the traffic in such luxuriance and magnificence as here described."

Mr. Thomson professes to see in this statement an assertion that "High License" is in operation in Detroit, and tions with which she has been connect- proceeds to make a vehement and gened, chief among which, of course, is emi charge of misrepresentation against out single copies of the Temperance also for the insight it gives into the lay before our readers anything of more shown her genius and skill. #### The "Sumptuary" Delusion.

We do not refer to the Scott Act. This for two excellent reasons - (1) The Scott Act is not a delusion. It meets the ross-onable expectation of its friends; (2) the Sout Act is not "sumptuary." The idea dat the Sout Act is a sumptuary measure c precisely the defusion to which, in our citle, we refer. This is a wide spread halincrnation. It especially affects the fiquor-selling mind. The delusion appears and re-appears in confidential circulars and in the organs of the iquer party, and is re-posted of sources, by the opposition of die Scott Act, which with much statesman like magnifujuence is pronounced a foolod piece of sumptuary legislation quite out of date in those wise modern times

Now what are sumptuity laws? Sumpcurry tawa are anoply lawa designed to regulate and moderate the expensiveness of living. The adjective is one derived from the Latin noun meaning "expense." oumptuary, or expense, laws were very common in antiquity. The old Romans enacted a tolerably continuous series of them. The "consors" of the Roman Conmonwealth used to look out, officially, not to say officiously, for the good habits of their esteemed fellow-citizens in the matter of personal and household expenditure. Then there were statutes, too, forbidding you, for example, to have more than so Lawrence, Run., is to be converted into a many guests at a feast, to make your feast sugar factory. No high license haw ever our you more than so much. You were, cost you more than so much. You were, at one Roman epoch, even helped out practically in making up a frugal bill of fare for the occasion, by being logally limited to a single hen, in the way of fowl, which solitary hen must be taken in whatmony before the Legislative Committee ever condition of fat or lean might chance and that twenty muniers had taken place to be at the time her luck - and yours, and

Conturies ago England and Franco tried sumptuary legislation with much the same result as attended the repeated Roman ex-periments. relitical accommists and inatructed legislators now generally agree in holding sumptuary laws in contempt. We, sho try ourselves, in our humble way, to be both political commists and legislaturn abare the common enimon of these two respectable intellectual guilds. We condenn sumptuary laws, as fallacies in legislation not to be repeated.

But the Scott Act is not in any sense a sumptuary law. It does not seek in the least to interfere with anybody's scale of expensiveness in living. It does not even dutate to a man as to mad he shall est and drink. We entreat the friends of re-peal to be instructed. "Sumptuary" is a line word, it sounds well, it looks well, prohibits the sale or gift of intextestits use it freely—with a meaning; but be assured it does not mean snything as ap-

### Arrests Goine Up.

For the tirst half of 1887 Minneapolis had 334 saloons, each paying \$500 license. For the second half 230 saloons, at \$1,000 A-moco for inonso. During the first half of the year there were 1,132 arrests for drunkenness and disorderly conduct; durmg the second half 2,238 arrests for the same offences. You see that the fewer salcons you have the more drunkards you were polled in the same cities and counties must have to make the business pay, at the general election of 1886, and of this Theory says, the fewer the saloons the less the drinking, facts tell another story .- N. W Prohibitionist.

#### The Bill Introduced in the Kentucky Legislature.

A BILL has been introduced in the Legislature of Kentucky, providing that every county in the State shall vote next Noprohibit the sale or importation of liquor State. On the other hand, if the majority within such county. If the popular vote of the votes of the State are against prohibition, prohibition shall obtain in all countres or districts which vote "dry." a county votes "dry" the question shall not be referred to the popular vote again for ten years, while if a county votes "wet," there shall be another vote next year. The penalty for illegal selling is made not less than \$2,000, after the third Monce, and three months' imprisonment. -Nashville paper.

I saw three sisters hend in hand; Yet one did seem to lead the way, As with a steady hand she soanned The path that bleak before them lay ; Nor blenched she at its ruggedness; But at her look of simple trust The hills and rocks wanted less and less, And mingled with the common dust, And thus my heart in quiet saith, -. Hor name is PAITH.

And nimbly on the second went, Her face angelically bright With lieuven's glory and content, That gemmed her o'er with native light As, with her engor eyes upraised, She saw the bleasedness to be-The goal; which, brightening as she gazed Made her soul throb with ocatacy, Whose vision hath so large a scope?

Her name is Horg.

She glided on with gentle mien, The noblest of these sisters three. At this season of the year, the little girl should be so clad that every portion of her body will be thoroughly protected. The stockings should always be of west except in very warm weather, and should invariably be aupended from the shoulders by means of clastic straps either passing over the shoulders or attached to the undergarment

High boots with thick soles should be worn, and should be supplemented with warm, knit leggins extending above the knees.

Fortunately, short-sleeved and lownecked dresses are out of style now, so we need not say much with reference to this abominable mode of dressing children which has been so long in vogue. It must have a passing notice, however, as the fickle Dame may soon return to her old folly, and insist that the arms and bosoms of children shall be exposed at all seasons of the year, regardless of the permicious effect of such exposure upon their delicate constitutions. The upper part of the trunk contains the heart and lungstwo of the most important vital organs. Chilling of this portion of the body is certain to result disastrously to health. There is no doubt that many of the weakly, sickly, consumptive girls of the present generation own their feeble condition to the low-necked, short-sleeved dresses which they wore in childhood.

We are glad to know that mothers are becoming more sensible in this matter. It is not an uncommon thing to see upon the streets a little girl who is warmly and sensibly clad. We hope that this course on the part of some about to throw himself down, when the mothers will be contagious, so that we may have a thorough going revolution in the dress of little girls .- Good

#### BANKS WINDING

Such is the news from the Official Garette of Ottawa. What an amount of loss the tarting of those superfluous and worse than useless Banks have inflicted upon the public; its subscribing to their stock at par nundreds of men expected to make money through the rise in value and were bitterly disappointed. Thousands of innocent people invested their all in the stock or placed the savings of a life-time in the savings bank branches, on account of the expectation of better actume than could be given by the sound and wellstablished Banks. Now that the five voung Bunks have fasied these people, and a good many others, can see clearly that they did wrong, and acted foolishly, in putting their money at risk in those new, untried, experimental affairs. Their eyes have been opened since the

But it was just as foolish for them to just their money there open the expectation of greater value for it than the Oider and rance Banks could give) before their eyes were so

### The Great Presbyterian Church

### ITS ATTITUDE ON THE REPEAL To the members and adherents of the Metho QUESTION

As per the Proceedings of the tieneral Assembly of 1887.

#### THE LICENSE SYSTEM MUST GO

"It is clear that the general community are more than ever convinced that the liquor-traffic must be suppressed, and that throwing the cloak of respectability about the liquor traffic, by the continuance of the license system, cannot be much longer solerated.'

#### THE STRENOTH OF SIN " THE LAW.

"Some take refuge in the fact that Liconso means to restrict, yet it is confessed by all that license clothes with respectability a destructive traffic, and sanctions that which should call forth our holiest maledictions. Truly the strength of this sin is the law, a law that makes the noblest good of society a dream, and mocks the noblest efforts of Christian energy."

#### MORAL SUARION.

"The drunkard is to be plied with moral considerations to-day as vigorously as in the past. The philanthropic argument-abetinence for the sake of othersstill retains all its Christ-like beauty and heavenly power for those who seemingly ere in no personal danger. But the belief has ripened into conviction that the time has come when those who manufacture or sell strong drink must be restrained by the strong arm of the law So moral aussion and logal restraint are added together in this noble work, and they must never be divorced. Either will fail of its full effect if deprived of the strength which the other yields."

#### THE LAW EDUCATES.

"Were the principle admitted that complete education must precede law, it would revelutionize the whole process of law, human and divine."

NOT DISHONORABLE TO BE AN INFORMER. "Perhaps nothing has more emboldened the traffic and encouraged it in its lawless

deeds than the false and immoral sentiment

#### abroad that it is dishonerable to inform against law-breakers whose illegal traffic is apreading ruin and death all around us "

THE SCOTT ACT KILLS TREATING. "It is cheering to find that even in exceptionally unfavorable circumstances, the Act has really put down 'open, honest treating '-has stamped it as a rumous and disreputable thing, and chased it into dark hiding holes where those who indulge in it must do so 'on the sly.'

### GOOD RESULTS OF SCOTT ACT.

"Other good results of this Act (noted in the reports of Synods), are the undoubted decrease of drunkenness; drawing the line more sharply between abstainers and non-abstainers; making the liquor-traffic more and more disreputable; and the lessening of crime as testified by many judges and grand juries throughout the land."

THE TRAFFIC MUST BE EXTERMINATED. " "The conviction is deepening and intensifying throughout the Church, and throughout the land, that the liquor-traffic is an unspeakable and unmitigated evil, that it is a seductive and corrupting power, making humiliating inroads on the Church herself; and that fidelity to Christ and compassion for men forbid any compromise with a foo so terrible, or any method of settling the controversy short of its ut ter extermination."

### AN ENCOURAGING OUTLOOK

"On the whole the outlook was never more encouraging. The 'conspiracy of silenco' is now completely broken. In the pulpit, in the press and on the platform this subject is freely discussed There is no man now with any enlightened sense of duty that can stand aloof from the temperance cause and remain an indifferent witness of either its struggles or its triumphs."

### What's the Watter with the Beer?

Tits North-Western Info Insurance Company, which has its headquarters in Milwaukee, announces that it will not is sue a policy to any member, or employee, of any brewing company. This stand taken by shrowd business men in the interests of their husiness does not seem to harmonize very well with the advertise ment of the Milwaukee brewers who doclare their beer to be "non intoxicating, healthful, refreshing and invigorating, conducive to health, prosperity and happi ness, and beneficial alike for old and young, male and temale

"In the presence of alcohol there can be no true nervous action going on. There may be a certain wild pleasure about the first stage, but beyoud that there can be nothing more." —Dr. Richardson.

A general effort to repeal the Canada Temperance Act in the cities and count ics in this Province where it is now in force has been begun, and to give this movement greater force a reign of lawluss. nosa and violence has been inaugurated, and, to all appearance, has become the settled policy of this unholy truffic.

For these and other reasons, a meeting of the Ontario section of the committee was convened by the Rev John A Williams, D.D., General Superintendent, on the 12th day of September, 1887, when after a careful consideration of the present aspect of the temperance question, it was decided to call the prayerful attention of the Methodist people of this Province to the emphatic utterance of the General Conference on the subject and its applies tion to the present attustion.

### ENFORCEMENT OF SCOTT ACT.

The Scott Act is in force in twenty-five counties and two cities in Ontario, and in the whole Dominion the law has been adopted in sixty-three countres and citics thus far in all the contests is 49,955. It. is now more than eight years since it was county or city has yet rejected it, although repeated efforts have been made to do so We regard it of great moment proper enforcement of this law. We ward his friends for carrying the county would urgo that everywhere they stand by the officers appointed to that work and where there is no house and down. assist them in every lawful way.

#### LESSONS.

The adoption of the Act has taught us several valuable lessons which we do well

- I We have learned that the abolition of the license system has not been followed by commurcial disaster, as the liquor advocates everywhere declared it would be.
- 2 That municipal government may be carried on without the local revenue derived from the licensing of intoxicating liquors, and that without the imposition do all who seek to crush the denion intenof now and burdensome taxes upon the perance. Would you be on the aide of people
- 3. That the law has proved a valuable educator of public opinion.
- 4 That where the law is even moderately well enforced the mischievous and wicked treating customs are largely destroyed.
- 5. That the consumption of intoxicants the Act is adopted.
- 5 That the reduction of poverty, abstinence from things evil. drunkenness and crimo is more and more manifest.

Utterly refuse to have any partnership in a business whose policy is that of the Anarchists in the use of the dynamite bomb, violence and terrorism Let it be known to all that a vote to repeal the Act is a vote against prohibition, and every vote to sustain the Act is a vote for prohibition. Then, in the fear of God, let us endeavor to defeat the repeal agitation all along the line and prohibition will soon be gained.

### THE DUT OF THE HOUR

The present situation defines the duties of Christian electors in unequivocal terms. We would not ignore, or in any way deproceste, the value of the subordinate forces in the struggle for deliverance from a great national bane. We rejoice in the power of moral sussion, in the good work wrought by the numerous temper ance organizations of our land, in the influence of the religious and political press that is ever becoming more potent for prohibitory legislation. Still, it is evident, even to the superficial observer,

that the mightiest weapon in this conflict before the country now. The attitude of Canada have the opportunity of strik ing a blaw for the complete and final supent Committeeson Temperance, dividing pression of the liquor traffic such as they hour! John A. Williams,
