## PREFAOE.

After twenty-six years' experience as a Practical Accountant and Teacher, J have ventured to introduce to the favorable consideration of the Canadian public "The Dominion Accountant," or "New method of teaching the Irish National Book-keeping."

A thorough examination of, all the larger, and even smaller standard works on book-keeping, within my reach, led me to the conclusion, many years ago, that the Irish National was the best fitied for the school-room as a text-book; and my varied and extensive practice si: e, both as a book-keeper and a teacher of the science, has served to corvince me that that conclusion was a just one.

In the plan, it is more progressive than any book on the subject with which I have met. It begins at the beginning, and proceeds by regular gradations until it reaches the highest order and most intricate description of accounts.

The first set teaches, in a few Cash transactions, simply how to Debit and Credit, that is, on which side to enter the Cash received, and on which that paid out, without any regard to ulterior results; in fact, how to keep a Cash Account. The second set has a Cash Account like the first, and in addition introduces Personal Accounts, by which means the pupil is instructed how to make the Contra entries in the corresponding accounts, viz., to Debit the Cash Account with the money received, and Credit the person's account from whom it was, received, and vice versa. The transactions are so arranged that the three Personal Accounts in this set, with two or three entries on the Debit and Credit side of each, serve the purpose of as many hundreds or thousands of such accounts; because all the results that can possibly arise in the management of personal accounts, are produced. At the winding up of the set it is found that one of the persons is indebted to me, that I am indebted to another, and that, in the case of the third, the Debit and Credit sides are alike ; neither of us, therefore, owes each other anything-all that could possibly be learned, respecting the results of personal accounts, from a book of a thcusand folios. And both sets are so short that they can be thoroughly mastered, the first in one evening, and the second in two at most, thus laying the foundation of a practical knowledge of book-keeping in a few hours. In like manner the other sets proceed, each set becoming more and more difficult as the pupil progresses, until a complete knowledge is obtained of the most difficult entries connected with any commercial transaction.

Such, however, is not the mode adopted by authors generally. The pupil is put to work to write out, at first, a complete set of books, containing many pages of transactions, all of which he cannot possibly remember, and of whose
nature and bearing he can know but little, if anything. Add to this the difficulties of opening and closing a set of books, and he has a task set him too difficult to surmount, and which even persons with some practical experience might fai. to satisfactorily accomplish; but yet it is supposed not too great an undertaking for the raw student and the unpractised Dominie to perform. And with what results? Simply the production of a bad copy of the author before themnothing more.

The rine sets, in the present small work, are not onls short, but every entry is designed to produce certain results, and these results are as varied as the fluctuations nf commercial life. In closing the second set, $i_{6}$ will be found there is neither gain nor loss-the merchant ends as he began ; but his property is somewhat differently situated, and this the pupil should be made clearly to understand. In the third and fourth sets there is a gain, and the fifth ends in a loss. The sixth and seventh* sets, which contain the most varied, practical and difficult entries to be met with in any work on the subject, both result in a gain. Intentional mistakes are made in the sixth set, such as Charging merchandice to the wrong person, and Crediting the wrong person for payments made, for the purpose of teaching the pupil how to rectify them. Great advantages accrue to the learner from the shortness of the sets, as well as from the comparatively large number of them. Their brevity enables the pupil to carry all the transactions in his memory from the first to the last; and their number not only gives great variety, as regards the nature and position of the merchant's property at the opening and closing of each set, but also much practice in opening and closing the books, a thorough knowledge of which is so indispehsable, that, without it, all the other information that can be accaired on the subject is comparatively valueless.

The "Irish National Book $\cdot$ keeping," in its original form, is in ster'ng voney and British weights. I have substituted for them the decimal currency and weights. It contains eight sets of books; I have rejected the last set, called the "Farming Set," because I-consider all specialties in book-keeping a waste of the pupil's time, and likely to impress the mind with a wrong idea, viz., that a special business requires special principles of book-keeping, whereas, the truth is, the principles of book-keeping need orly a special application to the peculiar business.t I have therefore retained only seven of the original sets in the present work ; but I have added, to these the fifth and sixth sets in a varied form, for the purpose, in the first place, of showing the advantages of "Single Entry," by changing the fifth set-Double Entry-into Single; and in doing this, I have introduced an Expense Account, and retained, in a modified form, the Profit and

## *The eighth aet in the present work.

+ The booke whioh procleim too many methods of book-keeping, as woll as those who profess to teach thum, aro alike untruatworthy. In every poemible variety of book-keeping the prinulples are identical. When, in advertisemente relative to this aujuoot, we find teachers protecing to embrace, in their course of instructions, all knowledge on all matters relating to overy poseible variety of commercial pursuits-Book-keop-ing, Bank-ing, Railroad-ing, Steamboating, Telegraph-ing, and even Dobat-ing, (without Bpait-lose and Rup-my.), until the moat astounding almax of ings is reached that evor foll under the ays, or upon the ear of mortal man! Oh, mive us from thene everiast-ing ingh

Loss Account, was in the Doulle Entry aethod; and have produced sesults, in closing the set, equally as satisfactory by the Single, as by the Double Entry system, and with a great deal less work. In the second place, as all the sets in the original woik are journalized entry by entry, and day by day (a good method for the learner), I have given the sixth set in the collected form, according to the most approved practice of the best Mercantile Houses both in the Old Country and in the New Dominion. By pursuing this plan in the class-room, I have enahled many young men in Toronto, in thirty or forty hours' instruction, who w. re totally ignorant of book-keeping at the commencement of these lessons, to thse charge of, and keep the books of some of the largest and best managed Wholesale Houses in the Province-prcof sufficies : of the practical merits of the "Dominion Accouratant."

I have not altered the text or interfered with the questions at the end of the sets; but I have appended notes where the text seemed to require it, and trust these will be found instructive and useful. I have also prefixed the questions and answers on the principles and practice of book-keeping, used in my lectures to nuy own students; these the pupil should learn thoroughly before commencing to write out the bnoks, and they should be rehearsed as often afterwards as the teacher can make it convenient-say once a-week.

In the "Compendium of Merchants' Accounts" will be found Rules showing how to Debit and Credit every description of Entry that can possibly occur in any department of the Commercial circle.

I have not multiplied Books of Form, ior the obvious reason that every mercantile house has its own peculiar forms; and to the man who understands the principles of the scieace, jorms are of but little account. I have, however, given in an appendix a few forms of Notes, Bills, etc. Also some Arithmetical Rules, especially applicable to commercial pursuits-the one for Equating Payments, or averaging notes ; those for converting Sterling Money into Halifax and Decimal Currency and vice versa; and those on Exchange, with the form and manner of worki ; ti.e interest on an Account Current; the Abbreviations, Signs and Explanations of Commercial Terms, etc., will, I doubt hot, prove acceptable to the reercantile community.

Ascountants, engaged in any business whatever, will find this treatise very valuable as a book of reference. It is so arranged that, at any point in their progress, 'they can find an exact counterpart, and, by turning to it, may at once verify their work.

Having thus endeavored to explain the contents and practical bearing of the "Dominion Accountant," I leave its fate to the decision of that public from whom I have already received so many tokens of favorable consideration and regard.

Toronto, Ist June, 1868. . . WM. R. ORR.

- It is most remarkable that a Profit and Loss Account is not to be found in any pubUlished Single Entry Set of Book-keeping I have seen. Sce note, page 174, fifth set, Single Entry.

## PUBLISHERS' PREFACE

SECOND EDITION.

The "Dominion Accountant" has stood the test of criticism better than any other work on Book-keeping that has either been published in Canada or imported into it. As its real merits become more widely known as a text-book for Schools and Colleges, as well as a trusty companion to the actual Accountant, its diffusion will spread more generally, year by year, until it has superseded-as it ought to do-every book of the kind extant ; because it is more practical and more easily understood than any other. Its triumphs already have been very great. Many of the best Accountants in the Dominion have receiveil their instructions from it, under the Author, Mr. W. R. OrR, of the Mercantile Academy, Toronto. It has been adopted by the Board of Public Instruction of Ontario, for use in all the Schools; and what is perhaps, of greater significance, is that it has been adopted by the Bureau of Public Instruction of the City of New York, for the use of the Schools of that commercial metropolis : and last, though not least, it has become the only text-book on this subject used in Upper Canada College.

Every typographical error in the First Edition has been corrected by the Anthor. A few alterations have been made by him in the text, to make it in full harmony with his General Questions, at the beginning of the work; and the Anthor's Arithmetical Rule has been appended, to determine the Amount of Goods on hand at the time of a fire, to the other invaluable Commercial Arithmetical Rules.

In this Edition will be found the Critiques of the Press all over Canada, from Halifax to Sarnia, and of some of the best business men in the Dominion.

To insure the most correct mode of studying for one's self, or of teaching most successfully the Dominion Accountant, che Author's Copyright Rlanks should be used, which are also published by us.

Toronto, November, 1873.

## INTRODUOTION.

# GENERAL QUESTIONS,* ON THE THEORY AND PRACTICE OF BOOK-KEEPING. 

## The Object of Book-keeping.

## 1. What is the object of Book-keeping ?

To enable me to know at any time how my property is situated.
2. Explain this.

In business my property is continually undergoing changes ; and a knowsedge' of Book-keeping enables me to trace my property through all these changes, and determine where, and how it is situated.
3. Give an example.

If I buy goods and pay cash, the Merchandise Account is increased and theCash Account decreased, and vice versa. In iike manner every transaction, whether I buy and sell for cash or on credit, affects my property, and changes it: both in kind and position.

## Book-keeping, and the Methods.

4. What then is Book-keeping?

- It is simply a noting of the changes which occur in my property, or a systematic record of my business transactions.

5. How many methods of Book-keeping are there?

Two-Single and Double Entry.
6. Explain Single Entry.

By this method I make only one entry of each transaction, in the Ledger.
7. Illustrate this.

If I sell goods to A. B. on credit, I open an account for him in the Ledger, and debit his account To Merchandise, without making the contra entry.

[^0]
## 8. What is Double Entry ?

It requires, at least, two entries in the Ledger for each transaction.

## 9. Illustrate this also.

If, as in the case above, I sell goods to A. B., I not only debit his account To Merchandise, but I also make the corresponding entry, and credit the Merchandise Account by A. B.'s."
ro. What then seems to be the real difference between the Single and Double Entry methods ?

By the first method I open, in the Ledger, only the Nominal and Personal Accounts; whereas, by the latter, I open the three kinds of accounts, viz., the Real, the Personal, and the Nominal. (See Q. 29.)
rr. Do you wish to make it appear that the opening, or not opening, of the Real Accounts in the Ledger, constitutes the principal difference between the two systems?

I do. If I have not the Real Accounts in the Ledger, I can make but one entry of the transaction in it ; but if I open the Real Accounts, I must, of'neces. sity, make two entries-a Delit and a Credit. (See Q. 9.)

## THE PRINCIPAI BOOKS.

## 12. What are the Principal Books ?

The Day Book, Journal and Ledger.

## 13. Explain the use of each.

In the Day Book-I enter the transactions of the day at length, and in orrier, as they occur. In the Journal are collected, at fixed periods of time, all the th isactions from all the other Books, under their proper Debits and Credits. And in the Ledger, they are arranged under their respective Headings or Titles.
14. What is the infallible rule for Debiting and Crediting ?

Debit In, Credit Out-i. e., the thing received is debtor to the thingt given, or to the p.rsont irom whom it is received. $\ddagger$

[^1]15. Which is the Dr. (debtor) and which is the Cr. (creditor) side of the folio in the Ledger ?

The left hand side is the Dr., and the right hand side the Cr., and the Title or heading, $i$. e., the name of the account, should be written between them, thus : Dr. $\qquad$

- THE SUBSIDIARY BOOKS.

16. What are the principal Subsidiary Books?

The Cash Book-Bills Receivable and Payable Books-Invoice Books (inwards and outwards)-the Warehouse Book or Stock Jedger, and the Sales Book.
17. Describe the use of each.

1st. The Cash Book. -This book, like the Ledger, has a Dr. and a Cr. side; all moneys received are entered on the Dr. side, and all paid out on the Cr. side. By this means I am enabled to keep my Cash transactions in a collected form, and to detect at any time any discrepancy that may occur between the entries in the Cash Book, and the actual cash on hand.

2nd. The Bill Books.-These books are ruled with columns to suit the Headings (see Bill Books, Sixth Set), and contain the record of my Bills Receivable and Payable, in order of Date, etc., and by referring to the columns headed "When Due" and "When Payable," I can ascertain, in a moment, on what day any particular Bill falls Due or becomes Payable. Much valuable time is thus saved to the merchant.
$3^{\text {rd. Invoice Books-In these books are entered, in detail, the Invoices, i. e. }}$ the Accounts of all goods received or sent out by me. They are of great utility as books of reference to determine quantity, quality and price. It is not necessary to enter the details in the Day Book or Journal,-the totals are sufficientwith reference to No. of Invoice.

4th. Warehouse Book.-For this book no particular form needs be prescribed, as its form must necessarily be as varied as are the products of Commerce itself. - In it is entered the number of packages or the quantity of goods received isto, or taken out of the warehouse; and it is a check upon the purchases and sales. The prices of the goods may or may not be entered in this book; but if entered, they will be found very serviceable at the time of taking stock.

5th. Sales Book.-This, like the Warehouse Book, must be accommodated in form to the peculiarities of the business in which it is used. It is generally kept by Wholesale Merchants, and of necessity by Commission Merchants, and is designed to show the particulars of the sales, the number, weight, or measure, and the price of the articles sold, together with all charges to which they are liable. It is sufficient to carry the totals to the Day Book or Journal.

## 18. Have you named all the Subsidiary Books ?

No; the e are others ; but those above mentioned have a direct connexion with the keeping of the principal books.
19. 'Can you tell me-anything of a little book which should be used by every one who keeps a Cash Account, but not described by any author you have read?

A Bank Pass Book, in which to enter the amounts deposited in the Bank and withdrawn from it.
20. Although you have correctly described a Bank Pass Book, do you consider the answer given a correct one, especially when you reflect that in the question asked there was nothing said about Banking ; I spoke only of keeping a Cash Account?

The answer was irrelevant ; I should have said a Cash Balance Memorandum Book.

2I. Explain the use and importance of this much neglected little book.

Every time the Cash Account in the Cash Book is Closed or Balanced-say every day, week, fortnight, or month, as the case may be, I should enter in this book the Balance of Cash on hand, as per Cash Book; and then, every day, before leaving the office, I should, by adding up the Dr. side of the Cash Book, ascertain the amount received during the day, and add it to the balance entered in the Cash Balance Book. I should then add up the Cr. side to ascertain the amount paid out, and deduct it from the sum already found ; this difference will agree with the amount of the cash on hand, (which is found by counting it) if the Cash Book has, been correctly kept, and be again the balance for the next day. As the Cash on hand is the only certain check upon the entries in the Cash Book, the importance of this practice must be obvious; and as some such method as the above is absolutely necessary in keeping a Cash Account, no one should be entrusted with its management who is ignorant of the principle involved in this simple method of testing the correctness of the Cash Account, or too negligent or too apathetic to rigorously apply it.*

## TRANSFERRING THE ENTRIES.

22. Now, that you have described the Books, how do you proceed to transfer the entries from the one to the other?

In every case, the page or folio of the book from which the entry is taken should be written opposite the entry in the book to which it is taken; and the page or folio of the book, into which it has been transferred, should be placed opposite the entry in the book from which it was taken. Thus making a complete reference, forwards and backwards, to each entry throughout the books.

[^2]ch should be described by
d in the Bank
c Pass Book, ly when you about Bank-

Memorandum

## glected little

 the next day. re Cash Book, method as the pne should be volved in this too negligentES.
o you pro-
ntry is taken en ; and the d be placed king a come books.

## THE TRIAL BALANCE.

23. What steps do you take to insure the correctness of the transfer ?

When I have transferred the entries, usually at stated periods, from one book to another, as above described, I turn back to the beginning and compare the entries thus transferred, one by one, and item by item, with the original ones, placing the check mark $(\sqrt{ })$ opposite the amounts in both the books, till all are thus marked and found correct.

Correct checking, both as regards names and amounts, is of the utmost importance.
24. When all the entries have been carried in this way to their respective accounts in the Ledger, and carefully checked, what other precaution is taken to prove that the Ledger has been correctly posted ?

A Trial Balance is made out.
25. What is a Trial Balance?

The Trial Balance Sheet or Book has Dr. and Cr. columns" similar to s Ledger folio. I now proceed to add up, in pencil, all the accounts in the Ledger, placing the sum of the amounts of the Dr. side of each account in the Dr. columns of the Balance Sheet, and the sum of the amounts of the $\mathbf{C r}$. side in the $\mathbf{C r}$. columns of the Sheet. I then add up the amounts thus collected in the Dr. and Cr. columns of the Balance Sheet, to ascertain if they be equal, as they ought to be, if the Ledger has been correctly posted.

That these totals shonld be equal, is manifest from the principle of Double Entry, viz : That every Dr. has a Cr., and every Cr. a Dr., i. e., an equal amount placed to the opposite sides of the corresponding accounts; consequently the sum of all the Debits must equal the sum of all the Credits.
26. Is the Trial Palance, then, an infallible proof that the accounts in the Ledger are correct, when the two columns show equal amounts?

It is not. Every entry in every account in the Ledger might be reversed, i. e., placed to the opposite sides of the accounts, and every account might contain the entries of any other account but its own, and still the result of the Trial Balance would be the same.
27. Is nut the Trial Balance, consequently, useless?

No. If the person keeping the books thoroughly understands the grand principles of Dr. and Cr. by Double Entry, and be careful in checking his books, the Trial Balance will then be the most satisfactory proof that can be obtained of the correctness of the posting, previous to making the Final Balance.

[^3]
## INTRODUCTION.

## The Different Kinds of Accounts.

28. How many kinds of Accounts are there ?

Only three.
29. Narse them.
(I.) Real (2.) Personal, and (3.) Fictitious-Nominal, or Accommodating. 30. What are Real Accounts?

They are the names of the Accounts which represent my property : such as Cash, Merchandise, Bills Receivable, Bank, Bank Stock, etc.-in fact, whatever can be realized upon and turned into money, are called Real Accounts.

1. Bills Payable. - This account is placed, by all the authors that I have. read upon the subject, among Real Accounts. They are clearly wrong. A Real Account is an account of property which can be exchanged for money, or bap. tered, i e., realized upon. The Bills Payable Account differs in its nature from Real Accounts. How can I'realise upon my liabilities or debts ? Again, Real. Accounts are closed By Balance ; Bills Payable Account always To Balance; thus differing also from the Real Accounts in the mode of its Bal. In this respect it likewise Jiffers from the Personal and Accommodating Accounts (See questions 31 and 32). It is therefore an anomaly in accounts, and the only definition which I can give of $i t$ is, that it is an aggregate account of my indebtedness to persons, transferred from their respective accounts to it, by my acceptance of their Bills or Notes of Hand.
2. Bank Stock aind Bank Deposit Accounts are Real Accounts, whereas a Bank Current Account must be considered a Personal Account.
3. What are Personal Accounts ?

The Accounts which represent the persons with whom I do business on Credit."
32. What are the Fictitious, Nominal or Accommodating Accounts?

These Accounts represent myself-the merchant-and are designated Stock, Profit and Loss, and Balance.
33. Why do you say these Accounts represent the Merchant ${ }_{3}$, Because the Stock, etc., stands for his name.
34. Suppose there were partners in the firm, would one Stock Account be sufficient?

No. I would then be obliged to open a Stock Account for each of the partners, thus : A. B.'s Stoclr Account, C. B.'s Stock Account, etc. $\dagger$

[^4][^5]
## Order of Opening Accounts.

35. Can you tell the order of time in which these accounts should be opened in the Ledger?

The Stock Account is to be opened ffrst, and, as I have already said, it represents myself, $i$. e., in it are entered, on the Cr. side, all I possess in the business, and on the Dr. all I owe. It shows my position, commercially, at the commencement of my business, as clearly as a good mirror reflects me physically. If I look into the Stock Account, I see on my left hand, or Dr. side, all I owe, and on the Cr., or right hand side, all I possess. The difference, of course, would be my net estate.

The Profit and Loss Account is opened when any casual gain or loss requires to be entered in the corresponding accounts; and at the time of closing the books, the results of all its branches, viz: Interest, Discount, Expense, Wages, Commission Account, etc., are brought into it, as well as the gain or loss on the Merchandize Account, etc.

The Balance Account is opened when I commence to close the accounts in the Ledger, and all the balances of all the accounts are brought into it. Instead of opening this account in the ordinary Ledger, it is often kept in a separate book, called the Baiance Ledger.

## Of the Balance-Real Accounts.

## 36. How are Real Accounts closed or balarced ?

They are all closed-first, By Balance for the amount on hand, if there be any ; and-second, 2b or By Profit and Loss for the gain or loss.
37. Why did you not say To or By Balance, instead of By only, in closing Real Accounts ?

Because, in the case of the Cash Account, I cannot pay out more than I receive ; also, in the Merchandize Account, I cannot sell a greater quantity or number of packages of goods than was bought ; and as what came in was entered on the Dr. side of the respective accounts, and the amounts paid out in the one. and the quantity or number sold in the other, were entered on the Cr. side, it $\mathrm{K}_{4}$ impossible that the Cr . side in either account can exceed the Dr. "And as thrs Balance in all cases is taken to the less side to make both equal, it can never be carried to the Dr'. side, because that can never be the less, but always the greater, while any portion of my property remains on hand, unpaid out, or unsold.*
38. Are all the Real Accounts closed, as you have said, To or By Profit and Loss ?

Two of them are never closed To or By Profit and Loss, viz., the Cash and Bills Receivable Accounts.

[^6]
## 39. Why ?

Because in receiving or paying out Cash, it neither increases nor decreases in value, i. c., if I receive five dollars, all I can possibly pay out are five dollars ; and if I pay out only four, I must account for the other dollar, which is the Balance, and will close the account.
40. But suppose, as in the case ibove, you find, on counting the Cash on hand, that you have only ninety cents instead of a dollar, how are you tc close the account?

I must first use all diligence to find out he error, and if I fail in this I may charge the ten cents to myself, or to Profit an. Loss, and thus acjust the account; so that the ninety cents, the Balance on hard, will then close it.
41. You have said the Cash and Bills Receivable Accounts can never be closed To or By Profit and Loss; have you not used it as a closing entry just now?

I have not. It was only used as an adjusting entry; and whether I closed the Cash Account at the time the error was discovered or not, it was proper to make such entry, so that the Cash Book entries and the actual Cash on hand might correspond. It would not have been a closing entry, had I continued to make further records in the Cash Book; no more would it have been, had I at once balanced the account. In the case above referred to, you will have observed the Balance entry comes last, whereas, in the other Real Accounts-as Merchan-dize-it is entered i st, and Profit and Loss last, which must ever be the practice, or the gain or loss could not be ascertained at all. The Cash Account can never, therefore, be closed either To Balance, or To or By Profit and Loss, but only By Balance for the amount on hand, if there be any. Indeed, the idea of Yrofit and Loss should never be entertained in connection, either with keeping a Cash Account or closing it. When all the Cash has been paid away, the two sides of the account should be equal, and the account may then be said to close itself.

## 42. What about the Bills Receivable Account?

It is closed similarly to the Cash Account, and the same line of argument will apply equally to it.
:3. But suppose you discount the notes at the Bank, you would, of course, get less cash for them, by the amount of the discount, than their face value, and when placed to the Credit of the Bills Receivable Account, would not correspond with the amount of the notes as entered on the Dr. side of that Account.

Discount-ardother term for Profit and Loss-would, in this case, be used as the adjusting entry; and the cash received for the notes, together with the discount, would be equal to the face amount of the notes, and might be entered to the Cr. of the account, either separately, or jointly, By Sundries.
44. Is there not another methud, in very general use, of entering the amount of the notes discounted to the Cr. of the Bills Receivable Account?

There is another mode, viz. : Enter on the Cr. side of the Bills Receivable Account the whole amount as'written on the Bills-By Cash, and Dr. the Cash Account aiso with the full amount, To Bills Receivable ; and then Cr. the Cash Account-By Discount for the amount charged by the Bank for discounting the notes. The result in both cases will be the same.

If a portion only of the notes be discounted, the amount of those remaining on hand will close or balance the account.

## PERSONAI ACCOUNTS.

remain to be closed that your books may be balanced, and the state of your affairs fully known to you?

The Three Accommodating Accounts, which are closed in the following order, viz., Ist, Profit and Loss ; 2nd, Balance ; and 3rd, Stock.
52. How are they closed?

They will close each other, if the books have been correctly kept.
52. Explain the process.

I first add up the two sides of the Profit and Loss Account, to ascertain which is the greater; having found tnis, I close it To Stock for gain if the $\mathbf{C r}$. side is the greater, and carry the amount to the Cr. side of the Stock Accountwriting by Profit and Loss for gain ; and if the Dr. side is the greater, By Strock for loss, and sarry this amount to the Dr. side of the Stock Account-writing To Profit and Loss for loss. * I next close the Balance Account By Stock for the difference between the two sides, which is my Net Estate, or the Excess of Assets over Liabilities, and carry this amount likewise to the Stock Account-writing To Balance for Net Estate. The two sides of the Stock Account, if the books have been correctly kept, must now be equal, and the books closed.
'53. Can you demonstrate the last statement to be correct, viz., that the two sides of the Stock Account must be equal, whether you have gained or lost, it the books have been correctly kept?

I shall endeavour to do so. If, as was been stated, the gain found in the Profit and Loss Account was carried to the Cr. side of the Stock Account and added to what I possessed when I began business (See Q. 35), the sum of these two items would be equal to what I possess now, because I can only be worth what I had at first and what I have gained; and as the Balance Account shows, on the Dr. side all my assets, and the Cr. side all my liabilities, then the difference between the two sides of this account must be my Net Estate, or what I am actually worth at the present moment; and as we have seen that the Balance Account is closed By Stock for this amount, and the Stock Account Dr. with it, To Balance, what I possess now is by this means pleced in the Stock Account, opposite what I had when I commenced busmess, together with what I have since gained, and these sums must be equal, if the books have been correctly kept, as they both represent the same thing, viz., what I am actually worth at present. Again, if I have lost, it is clear I cannot have as much now as when I began, and it will be found that the Dr. side of the Profit and Loss Account is greater than the Cr., and will therefore be closed By Stock, and the amount brought to the Dr. side of the Stock Account, To Profit and Loss for loss; to which will be

[^7]ed, and the state

1 in the following ck.
tly kept.
count, to ascertain for - gains if the $\mathbf{C r}$. Stock Account-- greater, By Strck count-writing To it By Stock for the e Excess of Assets ccount-writing To , if the books have
be correct, viz., tal, whether you kept? gain found in the Stock Account and , the sum of these can only be worth ce Account shows, es, then the differfate, or what I am that the Balance count Dr. with it, be Stock Account, with what I have een correctly kept, wisth at present. as when I began, Account is greater mount brought to to which will be
added my diminished capital, because, as before, the Balance Account is closed By Stock, and the amount carried to the Dr. side of the Stock Account, and adder to the loss; and as the loss and what I now possess must be equal to what I began with, which is at the Cr. side of the Stock Account, both sides of the account must now be equal, as well as when there is a gain.

## 54. Can you state the substance of this more briefly?

I shall try. If, in the Stock Account, I add what, I possess now to what I o wed when I began (which is on the Dr. side of Stocl:), and what I now owe, to what I possessed when I began (which is on the Cr. side of Stock), the difference of these two sums will be equal to the difference between the two sides of the Profit and Loss Account, i. e., the difference between the two sides of the Profit and Loss Account, wherher a gain or loss, added to the smalier of these two sums in the Stock Account, will make the two sides equal and close the books.*
55. Is your Ledger now in a proper state to receive the Entries which have accumulated in the Day Book and Primary books, during the time you were occupied in balancing it?

The balances used in closing the accounts have yet to be brought down, before the Ledger is in a fit staie ts. receive further entries.'
56. To which side of the accounts do you bring down the balances?

To the opposite side, i. e., if I find them on the Dr. side, I bring them down to the Cr . side, and vice versa. This operation re-opens the accounts in the Ledger, and prepares it for seceiving entries until the time of making the next balarce.

WM. R. ORR.

Toronto, Ist June, 1868.

[^8]
## ELEMENTS OF BOOK-KEEPING.

## FIRST SET.

## OASH ACCOUNT.

As keeping an account of money received and paid, furnishes the simplest example of Book-keeping, we commence with a Cash Account.

Let us suppose a person engaged in money transactions, of receiving and paying, which are written down as they occur ; it is obvious that, if he wish to know what money he ought to have in nand, he must pick out all the sums received, and add them tcgether, and also all the sums paid; and then, by subtracting the one from the other, he will be able to tell what money he should have on hand (if any); and afterwards, by comparing the sums thus indicated in his book, with what he actually has in his desk or elsewhere, he can tell whether he has kept his books correctly.

Now, in order to be able to do this at any time, without the delay of separating the sums received, from inise paid, the method adopted in Book-keeping is, to ,have a Cash Account, either in a book by itself, or in a book among other accounts.

For this purpose, take the two opposite pages of a book (which two pages taken together are then called a folio); rule each with money columns towards the right hand, and a column for the date on the left hand. Then write on the top of the left hand page, in a text hand, "Cash, Dr.," and on' the right hand page, "Contra, $\mathrm{C}_{\mathrm{R}}$;" the former is then called the Dr. or debtor side, the latter Cr. or credit side.*

[^9]
## Blements of Book-keeping.

All sums on hand or received, are entered on the Dr. side; and all sums paid, on the Cr. side ; because the word Cash, at the top of the page, is put for the person himself to whom the books belong, in so far as cash is concerned ; and, in Book-keeping, every one is considered Dr. for what he receives, and Cr.by what he gives out.

## DIRECTIONS.

The first thing that the pupil should do, is to copy out, in a fair legible hand, the transactions stated from page 4 to 7 , into a book ruled with money columns towards the right, and a column for the date towards the left, and either with or without a head line. This book is called, sometimes, the Waste Book, because the entries in it have been regarded as superseded and rendered no longer necessaiy, by being transferred to the Journal (a book afterwards to be described), and it is sometimes called the Day Book, because the transactions are entere' in it every day, as they occur, without technicality of form.

Let him then open an account for Cash, as above directed; and having done so, let him go over, seriatim, the transactions which he has copied into his Waste Book, carefully observing in each, whether the cash was received or paid.out, entering as he proceeds, whatever was received on the Dr. or left hand side, and what was paid out on the Cr. or right hand side, in this form :

First Set-Directions.
1868.

Cashe
DR. 1868.
Contra.
Cr.

Having thus entered all the different sums on their respective sides, let the pupil then add up, first, the one side, and then the other; let him then subtract the smaller sum from the larger, and

## Elements of Book-keoping.

at the bottom of the smaller side let him enter the difference by which they will be made equal. This is called balancing an account, that ; bringing both sides to an equality, like a pair of balances equally poised; and the sum necessary to bring them to an equality is called the balance, and entered To* or By Balance, according as it is required on the Dr. or Cr. side of the account.

Thus, in the above example, the Dr. side was first added up, making $\$ 651.20$; then the Cr. side was added up, and was found to be $\$ 394.25$; this being subtracted from $\$ 65 \mathrm{I} .20$, leaves $\$ 256.95$, which is added to the Cr. side, with the words By Balance, before it, and thus makes both sides equal. $\$ 256.95$, therefore, is the money on hand, and ought to correspond to the money actually in the possession of the person whose transactions are recorded.

[^10]V. R' ORR.

## WASTE BOOK.

The tranactions in this set are to be regarded merely as the items or transactions of a Cash Account, and all that the pupil is expected to do, is to distinguish Cash received from Cash given out, that he may enter the former on the Dr. side of the Cash Account, and the latter on the Cr. side.

The cash on hand to close this account is $\$ 570.23$. This amourt agrees with the difference of the two sides, which proves the account correct, and will close it. W. R. ORR.

The pupil should be made to do this exercise upon a separate piece of paper, properly ruled, before he enter it in his book; and he should not be permitted to leave it till he fully understand it.

The teacher should also dictate to him other transactions, and require him to post them, that he may acquire readiness in placing cash going out, and cash coming in, to the proper sides of the Cash Account.

## QUESTIONS ON THE FIRST SETT.

What is meant by Cash ? Why is this book begun with a Cash Account? If you wrote down in a book the money you received and the money you gave out, in the order in which the transactions occurred, what would you need to do that you might ascertain whether your accounts were correct or not? What plan is adopted to avoid this tedious operation? In what kind of book would you reçuire to keep your Cash Account? What is a folio in the language of Book-keeping ? What would you write on the left hand page of your folio? What on the right? Suppose you receive a sum of money, on which side would you place it? Why ? What does the word Cash stand for?

## QUESTIONS ON THE FIRST SET-Continued.

What is the difference of Dr . and Cr. ? What is the first thing that the pupil ought to do? What is this book called ? In what order do you en er your transactions in this book? After having written out the Waste Book, what is to be done? What is to be carefully observed? On what side do you enter Sales; Hopuse Expenses? When the sums are all entered, what is to be done? When is the balance entered' $\mathrm{To}^{*}$ and when By? Why, in the example given here, is the Balance added to the Creditor side? What is meant by remitting money?

## CASH AND PERSONAL ACCOUNTS.

If I have transactions in money with other persons, such as paying and receiving, borrowing and lending, etc., it is necessary not only to keep an account of my Cash, that I may know at any time what I have received, what given out, and how much I have on hand ; but also to keep an account with each of the persons with whom I have dealings ; that I may know whether I owe any. thing to them, and how much ; whether they owe anything to me, and how much ; or whether our accounts be clear.

In order to effect this purpose, I first open a Cash Account, as directed in the First Set, which is to be my own account ; the word " CASH," at the top, standing, as before, tor myself, in regard to Cash.

I then open an account for each of the persons with whom I have dealings, that is, I write each of their names upon a folio of the Ledger, putting Dr. (debtor) on the left-hand page, and Cr. (creditor) on the right.

When I receive money from any of these persons, I put down on the Dr., or left-hand side of the Cash Account, "To" that person, adding the sum in the money column, because I am considered debtor to the person for what he gives me. I then turn to that person's account, and upon the Cr., or right-hand side, I write, " By Cash," adding the same sum, because that person paid it out, and therefore he is Cr . for it. The same sum, therefore, will appear on the Dr. side of the Cash, that is, of my account, and on the Cr. side of his account ; intimating that, apart from all other dealings, I am his debtor, and he is my creditor; for that sum.

## Bookukeoping.

But if I pay him money, I turn to the Dr., or left hand side of his account, and write, "To Cash;" adding the sum, "because he received it, and therefore is debtor for it ; and then I turn to the Cr., or right hand side of the Cash, that is, my own account, and write, "By" that person, adding the sum; so that this sum will appear on the Cr. side of my account, and on the Dr. side of his; intimating that I am his creditor, and that he is my debtor for that sum. This system of entering all transactions twice, namely, on he Dr. side of one account, and on the Cr. side of another, is called Book-keeping by double entry. It procec ls upon the obvious principle that every debtor must have a creditor, and every creditor a debtor; and it keeps an account both for the debtor and the creditor in every transaction. Whatever, therefore, is entered on the Dr. side of oile account, is entered. on the Cr. side of another, and vice versa.

Having gone over all the items in the following Waste Book in this way, I add up all the items on the Dr. sides of all the accounts into one sum, and also all the items on the Cr. side intc another, to ascertain whether they be equal, as they ought to be, if they have been posted correctly. This is called a Trial Balancc. Having found, or made them correct, I then balance the Cash Account as before, which will show me how much money I have on hand. In the same way I balance the accounts kept with different persons, which will show me how much I owe to any of them, or how much any of them owes to me.

## SFCOND SET. <br> WASTE BOOK.

ft hand side of im, 'because he n I turn to the n account, and t this sum will Dr. side of his; debtor for that ce, namely, on nother, is called e obvious prin:very creditor a und the creditor red on the Dr. nother, and vice

The transactions in this set are mere cash transactions, i. e., giving out and receiving money; but they are cash transactions on credit, and therefore accounts with those persons who give or receive credit, are necessary.

TORONTO, IST JANUARY, 1868.

TORONTO, 3RD JANUARY, 1868.

## DIRECTIONS.

When these items are posted and balanced, it will be found that I have a balance of cash on hand of $\$ 246.55$; that William Reid owes me $\$ 185.50$; that I owe James Thompson $\$ \mathbf{1 8 2 . 0 5}$, and that my account with John Robertson is clear.

If I wish to know whether I am a gainer or loser on the whole, so far as these receipts and payments are concerned, it is obvious that I must add the cash that I have on hand to that which William Reid owes me, and then subtract that which I owe to James Thompson, by which it will appear that I am now possessed of $\$ 250$ i precisely the same sum that I had on hand on commencing the transactions.

Now the manner in which this result will be shown in a Ledger, is as follows:-If I intend at the time of opening these accounts, thus to balance and close all the accounts, I must begin with opening an account in the Ledger for Stock, writing on the top, Dr. Stock, $\mid$ Contra Cr., and on the Cr. or right hand side, I must enter the cash that I had on hand at the commencement, namely; $\$ 250$, writing before it the date, January ist, and " ${ }^{\text {ry }}$ Cash." ${ }^{*}$

This stands, without addition or alteration, till the accounts are to be closed. Having balanced the different accounts as directed above, I open another account, for Balance, and on the left or Dr. side of that account I enter those balances that appear on the $\mathbf{C r}$. or right hand page, namely, the balance of the cash and of William Reid's account ; and on the right or Cr. side, I enter those balances that appear on the Dr. or left hand page, namely, in this case, that of James Thompson. I then balance this Balance, Account, i. e., add up the two sides separately, and subtract the least from the greatest, and add the difference, which will be found in this case to

[^12]be $\$ 250$, to the smallest side, to make it equal with the other, writing before it, "By Stock," for my net estate. I then turn to the Stock Account, and write on the Dr. side, "To Balance," for my net estate ; and as this is precisely equal to the cash entered on the other side when I began, it shows that I have neither lost nor gained, having precisely the same value of property. There is one difference, however, in my affairs, namely, that when I began I had $\$ 250$ in cash, whereas I hive, in closing: only $\$ 246.55$; but the difference between what William Reid owes me, and what I owe James Thompson, makes up the deficiency of cash, namely, $\$ 3.45$. Instead, therefore, of having $\$ 250$ in cash. I have in cash $\$ 246.55$, together with $\$ 3.45$ owing to me more than I owe, which amounts to the same sum.

## QUESTIONS ON THE SECOND SET.

When you have transactions in money with other persons, what is necessary besides keeping a Cash Account? Why is this necessary? How would you manage this? Would you, write the names of the persons with whom you have dealings on both sides of the Ledger? On which side would you put Cr.? If you receive money, in which account would you enter it, and on which side? After you have entered it in the Cash Account, where would you enter it next ? On which side? Why ? Where will the sum now appear in your books? What would you understand by the position of this sum in your books, considering it apart from all other transactions you may have with the same persion? Suppose now, that instead of receiving, you pay money to the same person, how would you enter it in your books? When you thus enter every transaction twice, what.is this mode of Bock-keeping called? Upon what obvious principle does it proceed? If you enter in the Cr. side of one account, on which side do you enter the same sum in the other account? When you have gone over the Waste Book in this way, what are you to do? When you borrow money, on which side of your account would you enter it? What do you mean by posting? When you have posted all the accounts, what is your next operation? What does the Trial Balance ascertain? Why should the sums of all the debits and of

## 18

 Questions on the Second Set.all the credits be equal? If you wish to know whether you are a gainer or a loser, what would you do ? When you open an account for stock in the Ledger, on which side would you enter the cash that you have on hand?. When you have balanced the different accounts, what next? When this Balance Account is finished, what are you to do with it? When, in adding up the two sides, you find one greater than the other, what are you to do with the difference?

## THRD 8ET.

## CASH AND ANOTHER REAL ACCOUNT.

Accounts of any kind of property, as Cash, Goods of any kind, Ships, Houses, Shares in Companies, etc., are called real accounts, i. e., accounts of things which belong to me.

One object of Book-keeping is to keep a recurd of my property, how it is vested, whether in money, or goods, or lands; and as, in the course of mercantile transactions, it is continually varying, it is necessary to keep an exact account of these ariations. Another object is to ascertain whether I be losing or gaining by my transactions, and bow much I may have gained or lost during any given time ; and also, by what particular transactions the gains were made, or the losses șustained. Now these objects are effected by keeping the real accounts, which are, as has been explained, accounts of my property of whaiever kind it may be.

The following transactions are intended to show how a person's Stock may pass from one kind of property to another, how an account is kept of it, and how it is ascertained that profit has been made. or loss sustained. Then suppose that I deal in but one article, viz., Wine, and that by the pipe ; and that I buy and sell for Cash : so that my Stock is always either in Cash or in pipes of Wine. For by always purchasing and selling for Cash, I owe nobody anything; nor does any one owe me anything; so that I require to keep no accounts with any other person. I have, therefore, no Personal. Accounts.

\hline
\end{tabular}

To arrange these transactions in a Ledger, so as to effect the purposes of Book-keeping with regard to them, three accounts must be opened-one for Stock, a second for Cash, and a third for Wine. On the Cr. side of the Stock Account is stated the amount of Cash, and the value of the Wine on hand; and the account, remains in that state till the accounts are to be balanced; that is ,to say, till I wish to know whether I have gained or lost by the transactions, and to what amount either of luss or gain. All the transactions, therefore, are entered in the other two accounts. And here the general rule is to be observed, that whatever kind of property comes in, is to be entered on the Dr. side of its own account ; and whatever kind goes out, is to be entered on the Cr. side of its own account ;
from this it will follow that whatever is entered on the Dr. side of one account will be entered on the Cr. siae of the other, and vice versa; because, as often as Cash comes in, Wine goes out, and as often as Wine comes in, Cash goes out.

To assist the pupil in posting his Ledger, let him previously write an exercise upon these transactions upon a loose slip of paper, the object of which would be to distinguish, in each transaction, which of the accounts is. Dr., and which Cr. This will prepare hil for understanding the nature and uses of a Journal, a book of whic. nothing has yet been said. The exercise is to be in the following form, omilting, of course, the directions printed in small type :

TORONTO, IST JANUARY, 1868. the general omes in, is 1 whatever account;

## THIRD SET.

TORONTO, 1оTH FEBRUARY, 1868.

The last of the entries in the Waste Book, namely, the taking of Stock, and finding how much Cash and Wine remain on hand, is to be written in the exercise, thus :

Having finished all the entries in this form on a loose slip of paper, let the pupil copy them in the same form and order, into a book ruled like the Waste Book, and which is called the Journal, (with double columns to the right).

Having written the Journal, he then opens his three accounts in the Ledger; one for Stock, a second for Cash, and a third for Wine. : Instead of posting the Ledger from the Waste Book, as in the former Sets, let him now post from the Journal.

In the first entry, Sundries are Dr. to Stock. The word Sundries always means in Book-keepirg, not sundry or several articles, but sundry or several accounts. Here it stands for the two accounts mentioned immediately afterwards, Cash and Wine. These accounts are Drs. Let him therefore turn to the Cash Account, and enter the Cash on hand on the Dr. side, writing before it, "To Stock." Also to the Wine Account, and on the Dr. side write, "To Stock," prefixing the date, and adding the number of pipes in the proper column, and the amount in the money column. Let him then turn to the Stock Account, Cr. side, and after writing the date as before, write, "By Sundries," adding the whole sum, \$19500.00.

Let him then proceed to the other entries in the Journal, and wherever he finds one account made Dr. to another, let him turn to the Dr. side of that account, which is made Dr., and write, "To-," mentioning the other account ; and then let him turn to the Cr. side of that other account, and write, "By-_," mentioning the first account. Thus, when he finds such an entry as "Cash Dr. to Wine, $\$ 2250.00$," he turns to the Dr. side of the Cash Account, and after the date writes, "To Wine, $\$ 2250.00$;" he then turns to the Wine Account, and on the Cr. side he writes, after the date, "By Cash, $\$ 225^{0} 00$," also inserting in an inner column the quantity of Wine mentioned in the entry.

The Wine Account will appear as in the note below,* and the Cash-Account as in the former Set.

be explained after.

Having posted alj the entries but the last, which states the amount of Stock on hand, let the pupil make his. Trial Balance as in the former Set.

This being found correct, he must proceed to balance the accounts. He first balances the Cash Account, as in Sets one (1) and two (2). The Wine Account is differently balanced. The balance of that account consists in the quantity of Wine remaining. on hand.

This he will find by balancing the inner columns, in which the quantity bought and sold is stated.* Add up the number of pipes on each side, and on a slate or separate bit of paper, subtract the one sum from the other; and if there be a difference, enter it at the bottom of the side on which is the smallest quantity, which must be the Cr. side; for no more could be sent out than came in-and write before it, "By Balance on hand."

A value must then be affixed to the quantity on hand, which, in real business, is the true value of the article in question, without the addition of any profit. Compute, then, the value of the whole Wine on hand, and enter the sum in the money column.

Add up, then, the money columns on the Dr. and Cr. side, on a slate or loose slip of paper; subtiact the least from the greatest, and enter the difference on the side that is least. This difference, however, is not the balance of the account, i. e., it is neither what property $I$ have in it, nor what $I$ owe upon it, but it is the sum that I have lost or gained by the transactions reccrded. On the Dr. side has been entered the value of all that $I$ had when $I$ began, and of all that came in afterwards; on the Cr . side has been entered the value of all that went out, and of all that remains on hand. The difference, therefore, must be my loss or gain.

[^15]
## Book-keeping.

I enter the difference then on the smallest side, prefixing not "To or By Balance," but "To or By Profit and Loss."

If the Dr. side was the smaller side, I enter upon it, "To Profit and Loss ;" if the Cr. side, upon it, "By Profit and Loss."

This entry requires the opening of a new account, namely, Profit and Loss, the use of which is to keep an account of my gains or losses ; and having entered on the Dr. side of the Wine Account, "To Profit and Loss for my net gain," I turn to the Cr. side of the Profit and Loss Account, and enter, "By Wine for my net gain," entering the amount in the money column.

Add up now the two sides of the Wine Account, which will be found equal, and which closes that account.

In order to close the Set, open an account for Balance, and enter upon it the balances of the Cash and Wine Accounts. As the Balances are entered on the Cr. sides of these accounts, they must be entered on the Dr. side of the Balance Account, "To Cash" and "To Wine."

Then close the Profit and Loss Accounts. This is done, as in the other cases, by adding up both sides separately, and subtracting the onc from the other. But, in this Set, nothing is entered on the Dr. side ; we must, therefore, enter the whole of what is on the Cr. side, on the Dr. side. As this is gain, or an addition to my original Stock, I enter it, "To Stock for my net gain." I then turn to the Stock Account, and on the Cr. side I write, By Profit and Loss, entering the same sum.

Proceed now to close the Balance Account, by adding up both sides of it, subtracting the one from the other, and entering the difference upon the smallest side. This difference would be all that I possess, after deducting from it all that I owe, and, therefore, is called my net estate.

## Third Set-Directions.

prefixing not
it, " To Profit _oss."
count, namely, nt of my gains Wine Account, Cr. side of the my net gain,"
which will be

Balance, and iccounts. As accounts, they t, "To Cash" is done, as in d subtracting ntered on the is on the $\mathbf{C r}$. myy original n turn to the It and Loss,
ding up both entering the d be all that therefore, is

In this Set I have no debts due to me or by me; nothing, therefore, is on the Cr. side of this account ; but, I add up the Dr... side, and enter the whole on the Cr. side, writing, "By Stock for my net estate ;" I then turn to the Stock Account, and on the Dr. side enter, "To Balance for my net estate ;" and if the two sides of the Stock Account be now equal, the books have been kept correctly ; not otherwise. The reason of this is, that the Dr. side of the Stock Account now contains all that I possess, after deducting from it whatever I owe, and also whatever I may have lost. The Cr. side contains all that I had when I commenced, with the addition of whatever I gained since. These statements, therefore, are both of them statements of my actual property, and, if correct, must be alike.

## QUESTIONS ON THE THIRD SET.

What are Real Accounts? Whai' two objects are effected by keeping Real Accounts? What are the transactions in this Set intended to show? Why is it. not necessary to keep Personal Accounts in the following transactions? After the Waste Book has been copied out, how many accounts must be opened in the Ledger, and for what? What general rule is to be obseived? What book do you post from into the Ledger? How would you enter the number of pipes of Wine? In posting from the Journal, what would you do when you find one account made Dr. to another? What is the Trial Balance? What is to be done when the Trial Balance is found to be correct? What value do you give to Stock on bandi On whici side yo you enter Profit and Loss? How would you close the Sve? What is your net estate?

## FOURTH 8ET.

## CASH ACCOUNT, WITH A GENERAL GOODS ACCOUNT.

In those trades in which goods are sold in small quantities, it is impóssible to keep an account of every article sold, so as to be able to balance the different kinds of goods, by the quantity received and given out, as appearing on an inner column of the account of them. The description of goods also, in which trades are conducted, may be so numerous, that to attempt to trace every article by entries in the books, would require an expense in clerkship far beyond what the profits would afford; and create a complexity of books which would rather bewilder the accounts than fulfil the proper objects of Book-keeping.

In such cases it is usual to keep a general account of goods, or to divide them under different heads, and to enter only the value of goods received and given out, disregarding the kinds and quantities.

The only variation that this occasions, is that the balance of the goods on hand must be obtained by actual examination of the quantity of every kind in the shop or warehouse, and by an estimation of the value of every article. Trij operation is called taking Stock, and must be performed as often as the trader wishes to know the state of his affairs.

In the following transactions nothing is bought or sold on credit, but are all Cash transactions. The accounts, therefore, that are necessary, are merely a Cash ficcount and a Goods Account, with those fictitious Accounts, such as Stock, Profit and Loss, and Balance, which are necessary for balancing and closing the books.

## FOURTH SET.

Write out the transactions in Set 4 of the Waste Book, as directed in the former Sets:

Proceed then to journalize them in the Journal. The first entry in the Day Book, which states what you have on hand, enter in the Journal, thus :-

| Sundries Dr. to Stock, - <br> Cash <br> Goods $\qquad$ 159800 1008850 | $11686$ | C. |
| :---: | :---: | :---: |

Or, more simply,-

Then proceed to the other entries in their order, taking care to make what comes in always Dr. to what 'goes out, in the following form :-

## BOOK-KEEPING.

WISTE BOOK.
TORONTO, IST JANUARY, 1868.

TORONTO, 4TH JANUARY, 1868.

## DIRECTIONS.

Having thus gone over all the entries in the Day Book, and posted them in the Journal, take your Ledger, and open three accounts-one of Stock, a second of Cash, and a third of Goods, as formerly.

Proceed now to post into the Ledger from the Journal, according to the directions given in Set 3 .

## Book-keeping.

Having finished this operation, you are prepared to balance the books; that is, to ascertain whether you have gained or lost by the transactions. Before balancing each account, make a Trial Balance, as directed in Set 3.

Having found this correct, turn now to the Cash Account, and balance it as in all the former Sets.

The Goods Account is balanced differently. You must first insert on the Cr. side of that account the value of the goods on hand. In real business this, as has jeen said, is ascertained by what is called taking Stock, in which 'operation the person in business examines all the goods that he has,on hand, and enters them, valued at the price which they cost him, or rather the price that they would bring in the wholesale market. The goods on hand constituted the balance of the Goods Account, and are entered at the bottom of that account, on the Cr. side, "By Balance for Goods on hand."

Add up now, as in the Wine Account of the Third Set, the two sides, and the Cr. side being greater, put the difference on the other side, writing before it, "To Profit and Loss." Then open an account for Profit and Loss, and on the Cr. side write, "By Goods," adding the same sum in the money column.

We are now prepared to close the books. For this purpose, open, as in Set 3, an account for Balance, and enter in it the Balance of the Cash and Goods Account. The Balance of these accounts appearing on the Cr. side, you put them on the Drside of the Balance Account, writing, "To Cash" and "To Goods," adding the sums in which these accounts are credited by Balance.

The first account to be closed is the Profit and Loss, as in Set 3.

Fourth Set-Directions.
You next close the Balance Account, ${ }^{\text {? }}$. also directed in Set 3, carrying the difference of the two sides to the Stock Account, as there directed.

And if the Dr., and Cr. side of the Stock Account be thus made equal, the books have been correctly kept. .

## QUESTIONS ON THE FOURTH SET.

When goods are sold in small quantities, would you keep a separate account for each article sold ? How would you manage? How, then, would you find the balance of goods on hand? What is this operation called? How often must it be performed? Since, in the following transactions, there is nothing bought or sold on credit, what are the only accounts necessary ? What are you to do after having written the Waste Book ? When you have posted the Journal, what next? What accounts would you open in your Ledger? How would you balance the Goods Account? At what price would you value the goods on hand? When, upon adding up, you find a difference in the two sides, what do you do with that difference? In what other account do you enter this? How do ; you close the books? How do you know when they have been correctly kept ?

## FOURTH SET.

## FIFTH 8ET.

## EXAMPLES OF PERSONAL ACCOUNTS

in

## ADDITION TO REAL ACOUNTS.

When goods are bought or sold on credit, it becomes necessary, as was explained under Set 2, to keep an account of our dealings with every person with whom we transact business on credit, that we may know what they owe to us, or what we owe to them. The accounts which we keep with other persons are called Personal Accounts, and the rule for keeping them is, that every transaction in which they receive anything from us, or that brings them into our' debt, or that takes us out of their debt, is placed on the Dr. side of their account ; and that every transaction in whici we receive anything from them, or that brings us into their debt, or relieves them from being in our debt, is placed on the Cr. side of their account.

We have, therefore, found three kinds of accounts used in Book-, keeping, namely,-rst. My own accounts, called also Real Accounts, which contain accounts of my property divided into as many particulars as I find necessary. These are not headed with my name, but with the names of the property, an account of which is to be kept ;-as Cash, Goods, any particular kind of Goods, Houses, Ships, etc., in all of which accounts the kind of property with which the accounts is headed signifies myself, in regard to such property. 2nd. Accounts of other persons with me, called sometimes Personal Accounts, described above ; and 3rd. Accounts of gains or losses, such as Profit and Loss, Discount, Rent, Charges, etc., all receipts or expenses, for which no direct return is given or received.

To these is to be added, the Stock and Balance Accounts. These are used merely to show at one view the state of my affairs, at some particular time. The Stock Account, commences with a statement of what I possess on entering into business, and after every balance of my books. The Balance Account shows, on examining the state of my affairs, on the one side, all that I possess, and all that is due to me ; on the otker side, all that is due by me to others.

These two accounts, therefore, are used merely in commencing or closing a set of books, no entry being made in them between one balance and another.

The chief of the accounts called fictitious, more properly accounts of gain or loss, is the Profit and Loss Account itself, the others being only subdivisions of it, and being concentrated into it, in balancing the books.

## DIRECTIONS

Proceed, as in the former cases, to copy the following transactions in the Day Book.

In posting the Journal; remember that the transactions are upon credit, cxcept when the contrary is specified; as when it is said, Bought for Cash, or Sold.for Cash; in these cases you journalize as in Set 3, making Cash Dr. when it comes in, and Cr. when it goes out. But when sales are made to persons mentioned, and it is not said that they paid cash, make that person Dr. to the goods sold to him ; and when you purchase goods of any person, and it is not mentioned that you paid cash for them, make yourself, that is, your account of goods, Dr. to that person. When cash is received, while no property is given for it, as gifts or legacies, make Cash Dr. to Profit and Loss. The Cash came in, therefore it is Dr. ; and as it is clear gain, it is made Dr. to Profit and Lowe Account, which
s. These s , at some statement ry balance g the state hat is due
mmencing tween one
perly acitself, the ed into it,
transac-
tions are hen it is ou jourr. when ed, and e goods and it is that is, eceived, ash Dr. and as ; which
contains the accounts of gains and losses. When Cash goes out, without any return of property that can be added to Stock, as in paying wages, rent, losing money, etc., then Cash is Cr. by Profit and Loss. The Cash went out, therefore it is Cr ; and as nothing was received for it, Profit and Loss is its Dr. In manufacturing establ:hments, the wages of workmen are paid for the addition made to the value of the raw material manufactured, and, therefore, ought to be put to the debit of the goods on which they are expended. '

Having finished the Journal, open accounts as before, for Stock, for Cash, and for Goods, and also for every person who is made Dr. or Cr. in the Journal. You then go over every entry in the Journal in order, as in the former sets, posting them into their proper accounts in the Ledger, every item being posted an the Dr. side of one account, and on the Cr. side of another.

Having made a Trial Balance, as in the former sets, proceed to dalance the Cash and Goods Accounts as before, the balance of the Goods Account being the quantity of goods on hand, taken by inventory. Then balance each of the Personal Accounts, adding up the two sides of each, and putting the difference, as before, on the smallest side, saying, "To Balance," if ic be added to the Dr. side, and "By Balance," if to the Cr. side.

Add up the two sides of the Goods Account, after the balance of goods on hand has been added to the Cr. side, and put the difference to the smallest side, saying, "To Profit and Loss," if it be added to the Dr. side, and "By Profit and Loss," if it be added to tne Cr. side.

Open then a Balance Account, and enter all the balances of the different accounts as before. If the balance of any account stands on the Dr. side, enter it on the Cr. side of the Balance Account, saying, "By ——," (the account from which it is taken), and vice versa.

Balance the Profit and Loss Account, placing the difference of - the two sides to the Dr. or Cr. of Stock, and post it in the Stock Account.

Then balance the Balance Account, placing the difference of that account also to Stonk; and if the two sides of the Stock Account are equal, when the ba wice of these two accounts is posted, the books are correci.

the d

## ON TRACING TRANSACTIONS

FROM
ONE BOOK TO ANOTHER.
It is often necessary to find how a transaction recorded in the Waste book, has been entered in the Journal, or how it has sen. posted in the Ledger ; or, on the contrary, to trace back some tatry in the Ledger, to the original record of it in the Waste Book.

This is effected by the number of the page, or folio of the book into which any entry is made, being entered upon the $t, k$ from which it is taken; and also the number of the page of the book from which an entry is posted, being entered in the book into which it is posted. It is not necessary thus to connect the Waste Book and Journal, because the order of the dates being followed in both books, the date will be sufficient guide from one to the.other.* But as this order is not followed in the Ledger, it is necessary to connect the entries in the Journal. When, then, an entry is made from the Journal to the Ledger, as above described, it is usual tonote on the margin of the Journal, the two or more folios into which the transaction has been posted, and to mark in a column, ruled in the Ledger for that purpose, the corresponding Ledger folio. Entries. can be traced from the Ledger to the Journal by the date. Thus :

[^16]

The figures in the margin ${ }_{17}^{2}$ imply that the Cash Account is in folio 2 of the Ledger, and the Tobacco Account is in folio 17.

The number 17 in the column immediately beside the money column in the Cash Account, signifies that the Tobacco Account will be found at folio 17 ; and the number 2 , in the corresponding column of the Tobacco Account, signifies that the Cash Account is in folio 2.*

\section*{EXAMPLES OF MY ACCOUNTS.}
I. \(E\)-Real Accounts, subdivided into various kinds of Goods; also of Transactions by Bills, with Discount, Interest, etc.

Copy the Day Book given below, as before.
In Journalizing, Credit Stock for all the articles in the inventory, and Debit it for all debits due either in Bills Payable or otherwise.

Every description of Goods that comes in is Dr.; and every description of Goods going out is made Cr. in botn cases the quantity must be specified.

Bills Receivable are Bills for which I am to receive patyment, or which are payable to me.

Bills Payable are Bills which I am to pay.
When I receive a Bill Receivable from any person, in payment of Goods bought by him, Bills Receivable are Dr. to Goods, because the Goods went out, and the Bill came in. When I give my own acceptance or note for Goods, then Goods are Dr. to Bills Payable ; if the Bill was that of another person, previously entered to the debit of Bills Receivable, then Goods are Dr. to Bills Receivable.

If the Bill was received from a person with whom I have an account towards that account, then Bills Receivable is Dr. to that person; or if a Bill Receivable be paid to a person with whom I have credit, that person is Dr. to Bills Receivable. If I pay my own note, or give an acceptance to such a person, he is Dr. to Bills Payable.

When a Bill is puschased for Cash to be remitted, it is usual not to enter the Bill in the Ledger account of Bills Receivable, but simply to make the person to whom it is remitted Dr. to Cash.

When one person's acceptance is paid to another person, with both of whom I have accounts, it is usual, instead of passing the Bill through the account of Bills Receivable, to make the person to whom the Bill was paid, Dr. to the acceptor of the Bill.

When I get Bills in my possession discounted, i. e., when I receive Cash for them before they become due, the interest or discount being deducted, Bills Receivable are Cr. by the Cash received, and by the discount ; because the Bills went out, and Cash came in for the amount of the Bills after deducting discount.

When I discount a Bill, i. e., when I pay the Cash for it before it be due, receiving the interest or discount, Bills Receivable are Dr. to Cash and to Discount, both together making the amount of the patyment, Bill, because the Bill came in and the Cash went out.

When a person pays an account partly in Cash, partly in Bills, and 'discount is deducted from his account, he is Cr. by Cash, by Bills Receivable, and by Discount.

All charges, such as rent, wages, interest of money borrowed, may either be placed to the debit of the I rofit and Loss Account, by posting them "Profit and Loss Dr. to Cash," or a separatt account of them may be kept, and only the balance transferred ts the Profit and Loss Account, 'when the books are to be balanced.

This is an inventory taken as a preparation for balancing the books, Balance is made Dr. to all goods; and property of every description, remaining in my possession. The property in this case consists of the various kinds of Goods enumerated, of Cash, ot Warehouse, of Bills Receivable, and of debts due to me. Each description of goods for which an account has been opened is credited, By Balance, for the quantity and value on hand; also Cash for the Cash on hand; and Warehouse and Stores, for the value of them; Bills Receivable, for the whole amount of Bills in one sum ; and persons, for the sums due respectively by them.
\begin{tabular}{|c|c|c|c|}
\hline " &  & \[
3357
\] & 80 \\
\hline & & 23991 & 941/2 \\
\hline
\end{tabular}

balancing the
erty of every y in this case of Cash, of o me. Each en opened is 1 hand; also ores, for the nt of Bills in \(y\) them.

From my property must be deducted debts due by me. This is done by making them Dr. to Balance. The debts here are balances of accounts not settled, and Bills Payable. Balance is made Cr. by each of the persons to whom I owe money ; or, what is the same thing, each person is made Dr. to Balance for the amount of what I owe him, and Bills Payable are made Dr. in one sum for all such bills still remaining unpaid.

The Journal being written according to the directions given, the Ledger must be posted from it. Then, before entering the Balance of the Goods, \&c., on hand, according to the Inventory, make the trial balance. Enter then, from the Inventery, the Balances of Goods on hand to the Cr. side of each account ; this ought to agree with the balance found by comparing the quantities on each side, as in Set 3.* Proceed to balance and close the Cash Account and Personal Accounts, the difference between the two sides being entered, To or By Balance. \(t\) Close the Real Atcounts by entering the difference between the two sides, To or By Profit and Loss. Close also, in the same manner, the accounts of Discount or Interest, Charges, \&c. Collect now all the balances upon a separate sheet of paper, ruled like the Ledger, as directed in former sets ; and whenever the Balance is entered on the Dr. side, to make the sides equal, enter it on the Cr. side of the Balance Sheet, and vice versa. Proceed now to close the Profit and Loss Account. Enter in the difference between the two sides, To or By Stock for my gain or loss, as the case may be, and write the same sum on the opposite side of the Stock Account, To or By Profit and Loss. Close now the Balance Account, entering the difference, To or By Stock for my net estate, entering the same sum on the opposita side of the Stock Account, To or By Balance. The two sides of the Stock Account should now be equal, which closes the books ; if the sides be not equal, an erior has been committed, whirh must be searched out and corrected.

\footnotetext{
- I have not ourriod the quantities of Goode to their respoctive socounte th this sot; a Stock Book should be kopt, in which to enter the Coody on hand, and thom brugits and sold.
}
t Not To Balanco-so far as the Oush Account is concerned-800 forwer note, page 8.

\section*{Sixth Set-Questions. \\ 1 \\ QUESTIONS ON THE SIXTH SET.} 87

Of what accounts are there examples given in this set ? In journalizing, for what do you debit and credit Stock ? When goods come in, are they Dr. or Cr. ? What are Bills Receivable, and Bills Payable? When you receive a Bill Receivable in payment of goods, how would you enter it? When are goods Dr. to Bills Payable ? When to Bills Receivable? What if the Bill was received from a person, with whom you have an account towards that account? What if a Bill, Receivable is paid to a person with whom you have credit? What is done when a Bill is purchased for Cash to be remitted? What is done when one person's acceptance is paid to another, with both of whom you have accounts? What do you mean by getting Bills discounted? What is done when a person pays an account partly in Cash, and partly in Bills? How are transactions traced from one book to another?

TRANSACTIONS BY BILLS, ,WITH DISCOUNT, INTEREST, \&c., FIRST.
i

\section*{EACH TRANSACTICN SEPARATELY JOURNALIZED.}
N. B.-This Set of books being of the greatest value to the learner, as its tral sactions are of a varied and practical nature, more so than any set in any author I have ever seen. I have journalized and posted the transactions according to the original, viz: each transaction separately.

I have then made out separate books for each kind of transaction, viz : Cash Book, and Bills Receivable and Payable Books, in which are collected all the transactions in Cash and Bills, and have entered the Credit transactions only in the Day Book. (It will be understood that in this case I use the original entries merely as a Waste Book).* I then collect from the various books all the transactions into the Journal.

\footnotetext{
* All the transactions should he transferred to a Waste Book prepared by the pupll before proceeding with this Sot by the colicoted method; he should also prepare his Oach Book and Bill Booke, also a Cash Book and Wasto Book for the Fitth Set, Single Ehitry. And as ho trane fers the entrien from the nowly made-out blotter, he should enter in the margin the inition ropreaenting the names of the subaldiary books into whioh he has taken the respective entries -thus: O. B. (Cash Book), D. B. (Day Book), B. R. (Billa Recoivable), B. P. (Bilis Pajable), of sourse the follo No. af these books ahould be entered as uaval in the column fur that purpoos in the Blotter or Waste Book.
}
W. R. ORR.

\section*{Book-keoping-Sixth Set.}

This form will give the learner an insight into the mode pursued by some of the best wholesale houses, and is adopted and recommended as the best method by Morrison and others; but daily posting is perhaps, after all, the easiest and surest.
value to the nature, more e journalized tal, viz : each
ind of transble Books, in ills, and have (It will be merely as a all the trans-

\author{
EXAMPLES
}

\begin{abstract}
OF SINGLE AND JOINT CONSIGNMENTS, ADVENTURES, FACTORSHIPS, PARTNERSHIPS, \&c.
\end{abstract}

If I purchase a Ship, I open an account for the Ship, debit that account to Cash, for the purchase money or to whatever other description of property I have given for it, and credit the account by whatever I receive by the Ship, as freight, \&c., and, also, if I sell it, by whatever I may receive for it. If the account is to be balanced while the ship remains in my possession, I must enter the Ship estimated at its present value, on the Cr. side of the account ; and then the difference between the two sides will show the gain or loss which has arisen out of my purchase.

The same directions are applicable to houses, land, or other property, from which I may receive returns without parting with it. I must open a separate account for every particular item of such property; for example, every house, every farm, \&c., which I purchase, or let separately, I debit such accounts to Cash, for all expe. ies laid out upon them, and credit them by all returns received from them. When I balance such accounts, I must, as in the case of Ships, enter on the Cr. side, the' present value of the propetty, and the difference between the sides will show my loss or gain.

If I ship goods on an adventure, I open an account for the adventure, describing it in whatever way may render it most distinct, as, Consignment per the - (the name of the ship,) to (the name of the place), Consignee, Mr. or Messrs. ___ (the name of the person or persons) : or simply, Consignment or Adventure, No. 1, No. 2, \&r.., the particulars being recorded in the Waste

Book, I debit this account with the goods shipped, or with Cash laid out in purchasing goods for the adventure, and with all Charges; and credit the account with all returns.

If the goods be all sold, the difference of sides will show the result of the adventure. If part of the goods be unsold, I must, in balancing, enter the value of them on the Cr. side of the account, as in the former case, such value being taken as it originally stood, and stated in an inner column of the account, and a percentage deducted therefrom, of the supposed deduction, if any, in the value, leaving the net account, or apparent real value, to be extended in the, proper coiumn, to show the true state of the account.

If I receive goods to be sold on behalf of an employer, for a commission, I open an account of Gocds for the Account of -_ (the employer), this account is made Dr. for all charges, and Cr. by all receipts on account of the goods. If I sell goods thus consigned to me on credit, I make the purchaser Dr. to this account of goods; when the goods are all sold and the account is to be closed, by my remitting Cash or Bills, the account is made Dr. to the Cash or Bills remitted, and to Profit and Losş for my commission; or if I have an accuunt open for commissions, the amount of the commission is placed to the credit of that account. If the account is to be balanced before the goods are all sold, or the proceeds remitted, I open a personal account for my employer, and credit him therein with what I may have received from the sale of his goods, and debit him with what I have expended on the goods, also with my commission on the amount sold, up to the time when the balance is struck and furnished to him.

The chief peculiarity of accounts of goods received to be sold on commission, is, that the value of the goods received is not entered on the Dr. side of the account in my Ledger, because they do not belong to me. I keep the account of them in a separate book, as
still
hav eve side mis imm good any they allud cred he o good unde co-pa Ledg such \&c. bute Good be ba main calcu pay credi feren the p do no

Balar

yer, for a f. . nd Cr. by onsigned of goods ; d, by my h or Bills I have an hission is balanced en a perh what I him with ssion on and fur-
be sold entered do not book, as
still belonging to my employer, although entrusted to my care; but, having entered on the Cr. side of the accuunt of such goods whatever Cash or other property I receive for them, I enter on the Dr. side, what I remit to my employer, together with charges and commission. If I do not remit to him Cash that I receive for his goods immediately, I credit his personal account with the amount of his goods sold by me, and debit it with my commission. If I advance any proportion of the value of the goods consigned to me, before they be sold, I open a personal account with my employer as before alluded to, debit that account with the money advanced to him, and credit it for whatever I sell, the difference will then show how much he owes me, or how much I owe him.

There are three cases of partnership. First, when I entrust goods to another person to trade with on my behalf and his own. under certain stipulations. In this case, I state the terms of the co-partnery in the Waste Book, and open an account for it in the Ledger, designating it briefly and clearly. If I engage in several such co-partneries, I may describe them, Company No. 1, No. 2, \&c. This account is debited to the Goods or Cash, which I contribute to the joint stock-in-trade, and credited by everything either of Goods or Cash, \&c., that I receive from it. When the account is to be balanced, my Partner must ascertain the value of the goods remaining unsold, estimate the profit and loss in the ordinary way, calculate my share of either. If he pay me my share of gain, or I pay my share of loss, I debit the account for what I pay to Cash, or credit it by Cash for what I receive, as the case may be. The difference between the two sides in the Company Account will show the profit or loss, which must be entered accordingly. If my Partner do not pay me my share of gain, or I do not pay my share of loss, I Cr. the account, By Balance for my share of gain, or Dr. it, To Balance for my share of loss, after which, the account is to be closed like any Goods Account, by Profit and Loss

\section*{BOOK-KWEPING.}

The second case of partnership is, when I am entrusted with property to trade with, on behalf of myself and others, on certain stipulated terms. I enter the terms in my Waste Book, and open an account for the Company as before ; but in this case, I open also an account for the "Goods in Company," or accounts for the different kinds of goods in Company. I debit these accounts for whatever goods or cash I contribute to the Company's stock. I then make the Company's account Dr. for all the outlay I incurred by it, and make it Cr . by all that I received for it ; if the outlay was for goods to be added to the Company's stock, I make the account of "Goods in Co." Dr. for the outlay ; and, if I receive for the Company, Cash or Bills, I make my own accounts of Cash or Bills Receivable, Dr. to the Company's account. If I purchase goods on credit for the Company, I make the account of the Goods in Co. Dr. to the person from whom I purchase. If I sell on Cr., on behalf of the Company, I make the person to winom they were sold Dr. to the Goods in Company.

When I would settle with my partner, I find the gain or loss upon the "Goods in Company" Account in the usual way, and that gain or loss upon the Goods, I transfer to the Partnership Account, making that account Dr. to the "Goods in Company" Account, for loss, or Cr. by it for gain. The difference between the two sides of the Co-partnery Account will show the gain or loss upon the whole business of the Company.

I then calculate the shares of gain or loss for each Partner, according to the terms of the Partnership. If I pay my Partner his share then the Company Account is Dr. to Cash, for his share of gain, and to Profit and Loss for mine. If his share is not paid, then I open an account for him personally, and make the Company Account Dr. to his Personal Account for his share, and to Profit and Doss for mine. If loss was sustained, and he pay his share, then the Company Account is Cr. by Cash for his payment, and by Profit
and
trusted with s , on certain and open an open also an the different for whatever I then make d by it, and as for goods it of "Goods npany, Cash ceivable, Dr. edit for the to the person he Company, he Goods in gain or loss ray, and that ip Account, Account, for two sides of on the whole

Partner, acPartner his his share of ot paid, then ompany Ac0 Profit and share, then nd by Profit
and Loss for my share of loss; if he do not pay at the time, I open, as before, a Personal Account for him, and make him Dr. to the Company Account for his share of the loss, and Profit and Loss Dr. for my share.

The third case of partnership is when the several Partners take part in the management of the joint trade. In that case books are kept as for the trade of an individual. The Real Accounts, as Cash, Bills, \&c., are the accounts of the Company ; the Personal Accounts are accounts of persons dealing with the Company; and the Fictitious Accounts show the gains or losses of the Company. Besides these accounts, an account is opened for each Partner, and each is made Dr. for whatever he receives from the Company, and Cr. for whatever he pays an its behalf. When a settlemeñt is to be made the books are balanced as in ordinary cases. The gain or loss is ascertained also, by comparing the two sides of the Profit and Loss Account. Here, however, occurs a difference between books belonging to a Company, and books belonging to an individual. The gains or losses are not properly gains or losses of the Company, but of the individual Partners of the Company, to be dist:ibuted among them according to their respective shares. The balance of the Profit and Loss Account, therefore, is not carried to the Stock Account. but it is divided among the Partners, and carried to their personal accounts ; if gain, to their credit ; if loss, to their debit. The Stock Account, thereiore, does not show, as in ordinary cases, the net profit made, or loss incurred, for the Stock of the Company receives no accession by profit made, or diminution by loss sustained, the profit going to the individual Partners, and placed to the credit of their Personal Accounts; and loss being also charged to the Partners, by being carried to the debit of \(t^{\prime}\) 'eir Personal Accounts.

Different methods are adopted by different Book-keepers in closing the Stock Accoun' of the books of a Company. Perhaps the following is as simple and clear as any. Place as usual the gross

\section*{140}

\section*{BOOK-KEEPING.}
value of the property of every kind, actually in possession of the Company, including the debts due to them, on the Cr. side of the Stock Account. If profit has been made, this inventory will of. course include it, showing an overplus above the standing capital. The Balance of the Balance Sheet, brought to the Dr. side of the Stock Account will correspond with the standing capital, exclusive of gain ; and to make the Dr. side equal, bring the sums placed to the Cr . side of the Partners' Account to the Dr. side of Stock. The profits made, will then appear as debts due upon the Stock, to the Partners of the Company ; and losses will appear on the Cr. side of Stock, as debts due by the Partners to the Company.

If any transactions took place previous to the balance being made, between the Company and any of the Partners, such as, his receiving money before profits are ascertained, his account must be balanced among the other Personal Accounts, before ascertaining the loss or gain of the Company. But the profits or losses of that period, and first ascertained in the balance, are merely to be entered to the Partners Personal Accounts, to stand to their debit or credit for the ensuing year.

If any Partner wishes his share of gain to be added to his share of capital in the Coliapany, and the company agree to it , then his share of gain, after being entered to his credit, must be entered also on the debit side of his account, "l"o Stock," and from thence being carried to the Cr. side of the Stock Account, makes the intended increase to the capital of the Coripany. If the partnership is at the same time to be dissolved, the Stock on hand must be sold or valued, the debts inwards collected, and outwards paid, and each Partner's share of the property paid to him, or of debts received from him. it howevor frequently happens that some one or more of the partners, or some other person or company takes the stock and debt of the Company at a valuation, and then becomes Dr. to each of the Partners, for his share of the property, as per valuation.

\section*{WASTE BOOK.}

The following transactions are copied from Brewster's Encyclopædia. These have been chosen partly vecause they comprise in a narrow compass the chie! difficulties of Book-keeping, and partly to show that the directions are applicable to business transactions generally.

TORONTO, IST JANUARY, 1868.
an inventory of my effects and nebts active, taken THIS DATE BY ME, A. B.

TORONTO, 2ND JANUARY, 1868.

I have entered into a Partnership with John King, of London, by which I draw Bills on him, and sell them, receiving the advantage of the Exchange. I had \(\$ 2000\) in his hands, as appears by the inventory of my goods, and this transaction is, drawing a Bill on him and obtaining il per cent. for it. I have an Account for this Partnership, under the title, John King,

TORONTO, 4TH JANUARY, 1868.
our account of Exchange, Co. 3, and I make Cash Dr. to that account for the whole sum received. O. A., in the entry, signifies our Account.

\end{tabular}

James Hıggins and I contribute each 4 pipes of Port Wine to be sold, and the profits equally divided; but as he is to have the charge of selling them, he is to receive, beside his share of the profits, \(2 \frac{1}{2}\) per cent. commission. The value of my share of the Wine as stated in the inventory, was \(\$ \mathbf{1 2 8 0}\); he sells the whole for \(\$ 2880\), his commission is \(\$ 72\), the remainder is \(\$ 2808\), which is to be equally divided between us; my share is \(\$ 1404\), which he pays me by a draft on the Royal Canadian Bank. I have already an account opened for this Partnership, under the title, "Adventure in Co. 1 ," which was debited to Stock, for the Wine embarked in it.

\section*{BOOK-KEPPING.}

TORONTO, 4TH FEBRUARY, 1868.
I now credit it, By the Royal Canadian Bank for the amount received on its account.

"ORONTO, 6TH JANUARY, 1868.

By the inventory it appears that I contributed 5 tons of Madder to a partnership entered into with John Scott, he contributing an equal quantity ; the whole being under my charge, for which I am to receive a Commission, besides an equal share of the profits. I have already opened an account for this Partnership, under ie title of Co. 2, with John Scott. I sell the whole for a draft on ile Royal Canadian Bank. As in the case of Co. I, I first deduci my commission, then I pay John Scott his half by a Draft on the Roval Canadian Bank. Here, in the first place, I make the Royal Canadian Bank Dr. to Co. 2 for the whole amount of the Draft aich I have received upon it. I then make Co. 2 Dr. to Commission, or Profit and Loss for my Commission; and to John Scott's Personal Account for his half of the net proceeds, which I owe him. And lastly, I make John Scott's Personal Account Dr. to Royal Canadian Bank, for the Draft which I paid him. Or opening no Personal Account for John Scott, I might have made Co. 2 Dr. to Commission, and to Royal Canadian Bank, for the Draft given to John Scott.

This is money remitted to John King, to be drawn for, agreeably to the terms of the Partnership.

I make Co. 3 Dr. to Royal Canadian Bank, for the Draft by which I purchased the Bill on Coutts \& Co.

*I have not found in any treatise on Book-keeping-in whigh a "Single Entry" not is given--that the Nominal Accounts, such as Expenses, Profit and Lose, etc., have been'kepts

\section*{Ledger-Ninth Set.}

The reason, 1 suppose, is, the apparent difficulty in closing the books if suen accounts were opened; but I think the entisiactory manner in which this set is closed, shows the diffioulty to be only apparent. Anc it musi be remembered that if these accounts are not kept, the expenses and casual gains and losses can not be shown at all. It is matter of astonishment that Morrison and Jackson, standard suthors, should have overlooked this matter. Some of our American authors get over the diftculty by a subterfuge, vis, opening personal accounts. I think the subject of great importance, as I believe Single Entry better adapted to Retall business than Double Entry, as it dows not require more than haif the labor and expense, and is quite as satisfactory. Double Entry Book-keeping is valuablo only to the trader when he can ascertain the exact amount of goode sold, which \(\cos\) not be practically done in a retail business
W. R ORR.

\section*{8UB8IDIARY BOOK8.}

When the transactions connected with any particular account in the Ledger are very numerous and small, it is usual to keep a record of them in a bcok by themselves, and to insert in the Ledger only the sums of the transactions added up at stated intervals.

For example, it would be obviously ridiculous to enter into the Ledger every shilling or sixpence paid out or received. An account of such small sums, therefore, is kept in a book by themselves, and added up once a week or once a finonth, and only the weekly or monthly sums put into the Ledger.

Larger cash transactions are often treated in the same way. All receipts and payments are entered on the Dr. and Cr. sides of a Cash Book, and the sum of each side brought once a month into the Ledger, by which contrivance there never can be more entries in the Ledger than twelve on each side, namely, one for each month in the year.

Sales are often managed in the same way. A book is kept for recording sales only, and the amount of sales added weekly or monthly to the Ledger. In some extensive recail trades every shopman is made to keep a book, which is added up every day, and the amount transferred to a general Sales Book, which again is added up once a week or month, and the sum entered in the Journal or Ledger.' Sometimes, in such trades, only one Sales Book is kept in the shop, and every shopman writes every sale that he makes on a slip of paper, and hands it to the Bookkeeper, who enters it in the Sales Book.

\section*{BOOK-KEEPING.}

In transferring the entries of this book into the Ledger, the sum, of each month only is entered at the end of the month. The sum of the Dr. side in the Cash Book is entered on the Dr. side in the Ledger, "To Sundries received this month ;" and the sum on the Cr. side of the Cash Book is entered on the Cr. side of the Ledger, "By Sundries paid this month." This abridgment; however, only affects the Cash Account in the Ledge ; for every particular sum paid or received during the month mist be entered to its corresponding account in the Lerger. Thus, after entering the sums of the month of January' on the Dr. and Cr. sides respectively as above directed, I must turn to the account of Sir Robert Johnssone, Cr. side, and enter, "By Cash, \$120." Then to the account of Siiip James, Cr. side, and enter, "By Cash, \$500." Having thus entered all the sums on the Dr. side, I : ust do precisely the same with the sums on the Cr. side. I must turn to' the account of Ship James, Dr. side, and enter, "To Cash, \$300." Then to the account of James Allen, Dr. side, and en'er, "To Cash, \$5700," and thus with all the other entries.

In the foregoing example of a Cash Book, the Cash is balanced every month, and the balance on hand carried to the following month. In entering the sums, therefore, in the Ledger, care must be taken to subtract these balances before making the entry. Thus, the entry in the Dr. side of the Cash Account in the Ledger for January is not \(\$ 34832.84\), but only \(\$ 2436\).

For April, it is not \(\$ 29995.14\), but deducting the balance, it is only \(\$ 2037.40\). So the Cr. side entries are transferred before the two sides are compared, and the balance entered.

\section*{BOOK OF CHARGES ON MERCHANDISE.}

This is a subsidiary book in all respects like the book of House Expenses, and is treated in the same manner.
dger, the sum h. The sum r. side in the - sum on the f the Ledger, however, only ular sum paid corresponding of the month ove directed, Cr. side, and p James, Cr. tered all the the sums on nes, Dr. side, James Allen, all the other

1 is balanced he following care must be ntry. Thus, Ledger for palance, it is efore the two

\author{
INVOICE BOOK, OUTWARD AND INWARD.
}

The Invoice Book Outward is used chiefly by factors or agents, and contains copies of Invoices of goods sent abroad.

The Invoice Book Inwards contains the Invoices of all goods received. This book is usually a common paper book, in which is pasted the original Invoices, with the charges added to them. Many book-keepers enter into the Journa! from these books, other bookkeepers prefer copying the Invicices into an Invoice book.

\section*{THE SALES BOOK.}

In extensive retai! trades, the Sales Book serves a purpose analogous to that of the Cash Book. It keeps the details of sales which are entered in the Ledger in sums at stated times, as once a week, or once a month. . It is a book indispensable to factors or agents. It was formerly explained, that in accounts of goods received on consignments, the value of the goods is not entered, but merely the expenses, on them, the receipts, for them, and the returns made to the consigner. \({ }^{\text {But }}\) the accounts of the quantity and the sales of the goods for each consignment, are kept in the Sales Book, and it is from this book that the consigner is furnished with an account of the goods with, which he has entrusted his agent.

BOOKS OF BILLS RECEIVABLE AND BILLS PAYABLE.
These books contain in column, an account of every Bill reeeived or paid away, stating the date, the drawer, the acceptor, the sum, the time due, \&c.

\section*{BOOK-KEEPING.}

\section*{THE LETTER BOOK.}

This book contains copies of all letters sent out. These copies are now very generally taken by a copying machine. Letters inwards should be kept and arranged alphabetically, by the names of the writers, so that it is less necessary to keep copies of them.

\section*{POCKET BOOK.}

When a Merchant transacts business from home, or when he attends markets, fairs, \&cc., he should keep a Pocket-book, in which to mark down every' transaction, so that when he returns he may be able accurately to enter his transactions in the principal books.

\section*{GENERAL OBSERVATIONS.}

The pupil who has carefully posted and balanced the foregoing Scts of Book-keeping transactions must have learned that the chief

These copies
Letters inthe names of f them.
or when he ook, in which is he may be books. skill in this art lies in a judicious selection of accounts ; for after the accounts are determined upon, the posting and balancing of them are mere matters of routine. Every diversity of trade or manufacture will necessarily have some modinications peculiar to itself; but a steady adherence to a few general principles, such as the following, will conduct a Book-keeper through the intricacies of any descrption of business transactions.

All account must be opened for every species of property or adventure, the gain or loss on which is to be computed separately; such as goods of every kind, ships, houses, voyages, partnerships, in short every form in which the merchant's property is embarked. When no :dvantage would be obtained by keeping a separate account of gain or loss, on different kinds of goods, they must be classed under one head as goods, merchandise, houses, \&c. . Every such account of property represents myself, or is my own account in regard to such property. Thus, whe: Cash or any kind of Goods is made Dr., it is I who am made Dr. When Cash is made Cr., it is I who am made Cr .

An account must be opened with every person or company with whom I have dealings on credit, on either side, for it is obvious that I cannot hav a correct account of the state of my affairs unless I know what I owe, or what others owe to me.

Every kind of property that comes into my hands so as to become my own, must be entered on the Dr. side of the account of that kind of property ; and every kind of property that passes out of my hands so as to cease to be mine, must be entered on the Cr. side of its own account. When property comes into my hands, but not so as to become my own, as when goods are consigned to me, I do not receive them into my Ledger, but keep an account of them in a separate book, merely entering in my Ledger what I pay out or receive on account of them.

If such goods become my own, I then open an account for them, or enter them to some account already open. When goods or
any species of property goes out from the, still continuing to be mine, as when I send out goods on consignment, I do not entes it to the person's account to whom it is entrusted, but to the voyage, adventure, consignment, \&c., to which it may be transferred.

Every description of outlay for which no kind of property is received in return, or of income, for which no kind of property is exchanged, the amount of which when the books are to be balanced it is requisite to know, must have an account opened for it, such as interest of money, borrowed or lent, discount of bills, rent, wages, house expenses, gifts, legacies, \&c. But if the general account only of such outlays and incomes is required, they may be placed at once to the Dr. or Cr. of the Profit and Loss Account. If any of them be kept separately, the balance must be placed to the Dr. or Cr. of the Profit and Loss Account, as all such accounts of outlays or incomes are merely sub-divisions or branches of the Profit and Loss Account.

Every transaction must be entered on two accounts, the Dr.' side of the one, and the Cr . side of the other ; and consequently every sum posted in one account, must either be entered on the opposite side of another account, or divided among several other accounts.

This rule is so absolute and universal, that at any stage of the progress of keeping the books the sum of all the Cr. sides must be equal to the sum of all the Dr. sides. The ascertaining of this is called a trial balance, which may be made at any time.

Bills are treated like any other property, even Bills Payable; that is, my own engagement to pay money put into the form of a bill, and given out of my hands, are so treated, and accounts are opened for Bills Receivable or Bills Payable, on the same principles on which an account is opened for Cash, or any species of goods.

If a merchant, in balancing his books, would obtain a just view of the state of his affairs, he must not be satisfied with valuing his goods on hand at the price which they cost him, nor the debts due to him as if the amount of them were al-eady in his hands in cash; but must maxe such deductions as the following :-

Bills
and I

I
2 are cle

F proper stitute proper

a just view valuing his he debts due nds in cash;
1. For deterioration of goods, by being kept, if any: This in any description of fancy goods must be considerable.
a. For the expense of collecting debts.
3. For the interest of money on debts not yet due, including Bills Receivable.

For the probable amount of bad debts.
These deductions should be placed on the Dr. side of the Profit and Loss account, so as to diminish the profits by so much.

\section*{ON CLOSING THE DIFFERENT KINDS OF ACCOUNTS.}
1. All Personal Accounts are closed by the Balance Account.
2. All Real Accounts, except the Cash and Bills Receivable, are closed by a double balance.

First, the quantity of any kind of goods remaining on har , or property remaining in any voyage, adventure, consignment, constitutes the balance of the account opened for that description of property.

It is therefore entered to the Cr. of the Account, By Balance.
.Secondly, after this balance is entered, the difference between the sums of the Dr. and Cr. sides of the account is the gain or loss upon'that account, and the account. is to be closed by the Profit and Loss Account.

The Cash Account is closed by the Balance Account, because there is no such difference between the quantity of Cash remaining on hand, and the value of it, as there is between the quartity of any other kind of property, and its value in Cash.

All subordinate accounts of loss or gain, such as interest, Charges, \&c., are closed by the Profit and Loss Account, being ac. counted but branches of that account.

The Profit and Loss Account and the Balance Account aro closed by the Stock Account ; and when the balances of these two accounts are addeJ to the proper sides of the Stock Account, the two sides of that account will be equal, if the books have been correctly kept.

\section*{186 Compendium of Merchants' Aocounts.}
\(\triangle\) SYNOPSIS OR COMPFNDIUK OF MPRORANTB' \(\triangle O O O U E X G\).
Containing Particular Rules for the true stating of Debtor and Creditor, in all cases that can happen in the whole course of a Merchant's Dealing.
ther,

The Accounts of Merchants are of three sorts, viz. :-
I. Proper; wherein the Merchant trades by and for himself; which is either Domestic, i. e., Inland and at Home ; or Foreign, i.e., Abroad.
II. Factorage ; wh.rein the Merchant acts as Factor in Commission, for one that employs him ; and this, also, is either Domestic or Foreign.
III. In Company ; wherein two or more Merchants join together in trade, and have each a share of the gain, or bear a share of the loss, in proportion to his share in the Stock; as is taught in the rules of Fellowship.

Rule.-Dr. Voyage to - consigned to our factor, Cr. my Factor at - his Account Current.

Case 19.-When goods are sent by our factor in one place to my factor in another place, in return for goods sold for company account ;

Rule.-Dr. Voyage to ——, consigned to - my factor at -, Cr. our Factor at -

Case 20.-When goods are sold by our factor as per his advice ;

Rule.-Dr. Factor at - his Account Current, Cr. Voyage to - in Company.

Case 2 I. -When I receive advice that my factor has afterwards made some abatement;

Rule.-Dr. Voyage to - Cr. Factor at - his Account Current.

Case 22.-When I receive money of my partner for his share of goods formerly bought ;
sants.
account with uges of the urge, Cr. Cash ount on trust, r, paying the dries, for the Cash for the
r for company yes paid by me dries, for their ny account, for e charges paid pr in one place, factor, Cr. my in one place to d for company - , my factor at tor as per his ent, Cr. Voyage \(r\) has afterwards
- his Account
er for his share

Compendium of Merchants' Accounts.
Rule.-Dr. Cash, Cr. Partner's Account Current.
CASE 23.-When money is remitted to me by our Factor for goods sold ;

Rule.-Dr. Cash, Cr. Factor at - his Account Current.
Case 24.-When money is remitted to me by our Factor for goods sold, but payable at usance ;

Rule.-Dr. Bills Receivable, Cr. Factor at - his Account Current.

Case 25.-When I pay money on sight of my partner's bill ;
Rule, Dr. Partner's Account Current, Cr. Cash.
Case 26. - When I give to my creditor a bill on my partner, for his share of the goods in company;

Rule.-Dr. the Receiver of the Bill, i.e., my Creditor, Cr. Partner's Account Current.
my partner keeping the account, and having the DISPOSAL OF THE GOODS.

Case r.-When I pay my share in money ;
Rule.-Dr. the Company, Cr. Cash.
Case 2.-When I furnish my share in goods;
Rule.-Dr. the Company, Cr. the Goods.
Case 3.-When I furnish both my own and my partner's share ;
Rule.-Dr. the Compsny for my share, Dr. Partner's Account Current for his share, Cr . the Goods by sundries.

Case 4-When my partner furnishes my share af well as his own;

Rule.-Dr. the Company, Cr. Partner's Account Current for my share only.

Case 5.-When my partner sends me an account of the sale of goods in company ;

Rule.-Dr. Partner's Account Current, Cr. the Company for my share of the net proceeds.

Case 6.-If there be gain on the above sale ;
Rule,-Dr, the Company, Cr. Profit and Loss.

\section*{206. Compendium of Merchants' Accounts.}

Case 7.-If there be loss;
Rule.-Dr. Profit and Loss, Cr. the Company.
Case 8.-When my partner draws on me for my share of goods in company, and I pay the same presently;

Rule.-Dr. Partner's Account Current, Cr. Cash.
CASE 9.-When my partner draws on me as above at usance; Rule.-Dr. Partzer's Account Current, Cr. Bills Payable.

\section*{The General Balance of the Whole [207 Ledger, in order to Transfer the same into New Books.}

Observe 1.-All accounts are balanced either by Balance or by Profit and Loss, except Accounts in Company, which are balanced by the Goods in Partnership for my partner's gain, or to these Goods for his loss thereon.

Observe 2.-When accounts with persons are made even by receipts or payments, those accounts stand balanced already.

Observe 3.-When accounts remain unfinished :-
CASE I.-If it be of money remaining in hand;
Rule.-D... . - ount of Balance, Cr. Cash.
Case 2.-If it be of persons who are debtors ;
Rule.-Dr. Account of Balance, Cr. their Acr ants.
Case 3.-If it be of persons who are creditors ;
Rule.-Dr. their Accounts, Cr. Balance.
Case 4.-If it be of goods which are all sold, and there is gain ;
Rule.-Dr. those Goods, Cr. Profit and Loss.
Case 5.-If it be of goods which are all sold, and there is loss;
Rule.-Dr. Profit and Loss, Cr. those Goods.
Case 6.-If it be of goods, part sold and part unsold ;
Rule.-For what is sold Dr. and Cr. as above; for what is unsold, Dr. Balance, Cr. the goods at prime cost.

Nors. -The same when all the goode remain unsold.
Observe 4.-The accounts of Insurance, charges of Merchan dise, Interest, House expenses, \&c., are all balanced by Profit and Loss.

Observe 5.-The Accounts of Profit and Loss and Balance are balanced by Stock, they being made Drs. to or Crs. by Stock, as their particular balances direct.

Observe 6.-The account of Stock is balanced by the several balances of Profit and Loss, and Balance being brought thereto.

Observe 7.-The account of Balance in the old books will be the Inventory of the new ones.

APPENDIX.

\section*{ARITHMETICAL RULES.}

\section*{EQUATION OF PAYMENTS-AVERAGES.}

Rule-(1.) Multiply each of the debts, except that which is earliest due, by the difference of the days, or time, between its date and that of each successive one. (2.) Divide the sum of these products by the sum of the debts, and add the quotient thus obtained to the date of the first debt ; these days counted forward will give date of average note.

\section*{EXAMPLE.}
A. B. makes the following purchases from C. D., @ 4 months, from the undermentioned dates, viz., Jan. 3rd, \(\$ 500\); February 12 th, \$300, and March the 29th, \$600:-
\[
\begin{aligned}
& \text { Jan. 3rd.... } 500
\end{aligned}
\]
\[
\begin{aligned}
& \text { Mar. 29th . } 600 \times 85 \text { ( Mimamber of dich frix from }\{=51,000
\end{aligned}
\]

The sum of the debts... \(\$ 1400\) The sum of the pro- \(\{\) ducts of the debts
and days........... \(6_{3,000}\)
\[
63000 \div 1400=45 \text { the quotient. }
\]

Add tise 45 days thus formed to 3rd January, the date of the first debt, \(45+3=48\) days, which, counted forward, will give 17 th February, the date of Average note for \(\$ 1400\); of course the note will be due 4 months from this date, viz., the 17th and 20th June.

RULES FOR REDUCING STERLING MONEY TO HALI－ fax and decimal gurrency and vice versa．

FIRST．－TO REDUCE STERLING TO HALIFAX CURRENCY．
Rule．－＇「o the sterling add one－fifth of itself and one－twelfh of that fifth．

\section*{SECOND－TO REDUCE HALIFAX CURRENCY TO DECIMAL CURRENCY．}

Rule．－（1．）Multiply the \(£\) s by 4，adding the fives of the shillings as units of Dollars，if there be so many．（2．）＊Multiply the remaining shillings（if any）by 20 ，and the pence by \(\frac{5}{3}\) for cents．
\(\dagger\) EXAMPLE I．
\(£ 500\) 10 ○ Stg．to Halifax Cy．Rule 1 st．
\(\begin{array}{rrrr}\frac{1}{5} & 100 & 2 & 0 \\ \frac{1}{18} & 8 & 6 & 10\end{array}\)
\(£ 60818\) io Halifax Cy．Reduce to \＄s．Rule 2nd． 4
\＄2435 76 \({ }^{\frac{9}{3}}\) Decimal Cy．
THIRD．－TO REDUCE STERLING TO DECIMAL CURRENCY DIRECT．

Rule．－Multiply ihe \(f^{\text {s }}\) by \(\$ 4.86 \frac{2}{3}\) ，adding the aliquot parts of the Shillings and Pence taken on the multiplier．

EXAMPLE II．
\(£ 500\) 10－Stg．to Decimal Cy．direct．
4．86知
3000
4000
2000
\(\begin{aligned} & 1.66 \frac{9}{3} \\ & 1.66 \frac{2}{3}\end{aligned}=\left\{\begin{array}{l}\frac{2}{3} \text { of } 500\end{array}\right.\)
ros．\(=\frac{1}{8} \quad 2.43 \frac{1}{3}=\frac{1}{8}\) of \(4.86 \frac{9}{3}\).
\＄2435 76昭 Same as above．

\footnotetext{
＊The multiplication by 20 ，and by \({ }_{8}^{5}\) should be performed mentally，as in the example．
\(\uparrow\) I prefer the mode of operation Exemplitied in the first Example，to the second，although It were only required to reduce the Stg．to Decimal Cy，and not to Halifax as well．The work if much more intricate by the second method，especially when the shillinge and pence th the 8tg．would necessiate the taking of many aliquot parts．
}

\section*{FOURTH.-TO REDUCE DECIMAL CURRENCY TO HALIFAX CURRENCY AND STERLING.}

Role.-(r.) Divide the Decimal Cy. by 4 for Halifax Cy. (2.) By proportion, to reduce the Halifax Cy. to Stg.

EXAMPLES.
\(\$ 2435.76 \frac{1}{2}\) Decimal Cy. \(\div 4^{*}=£ 60818\) 10 Halifax Cy. (2.) As \(73: 60:\) : \(£ 60818\) 10 Halifax Cy. to Stg.
 \(\frac{365 . .}{36}\)
20

730
73.

gifth.-TO REDUCE DECIMAL CURRENCY TO STERLING DIRECT.
Rule -Divide the amount, Decimal Cy., by \(\$ 4.86 \frac{1}{2}\) EXAMPLE.
\(\$ 2435.76 \frac{3}{3}\) Decimal \(C y . \div 4.86 \frac{2}{3}=£ 500\) 10 0 sterling. Or thus:\(\left.4.86 \frac{2}{3}\right) \$ 2435.76 \frac{2}{3} \div \$ 4.86 \frac{3}{3}\)
\(\frac{3}{1460)} \frac{3}{7307.30(£ 500} 10\) - Stg. \(7300 .\).
\(73^{\circ}\)
\(\begin{array}{r}20 \\ \hline 14600\end{array}\)
1460.

\footnotetext{
- In the division by 4 condder the units of the romaining dollare, if any, act ivee of Dhin Ange; and the trientien in the conts, If any, at unite of the Bhllings, and add them together for the shillings of the anywar, and Yultiply the remaining conte, It any, by \(8-5\) for ponce. Thit eparation ahould ateo bo perrormed mentally.
}

\section*{SIMPLE INTEREST.}

RuLE 1.-To find the interest of a given sum for a year, at a given rate per cent. per annum. Multiply the principal by the rate, and divide the product by 100.

EXAMPLE.
Required the interest on \(\$ 375\), for 1 year, at 8 per cent. per annum.
\(\$ 375 \times 8 \div 100=\$ 3^{c} \frac{170}{100}\), interest for one year.
Rule 2.-To find the interest of a given principal for any number of Months. Find the interest for a year by rule 1 , and take aliquot parts for the months.

\section*{EXAMPLE 1.}

Required the interest (for a greater time than a year), on \(\$ 800\), for 15 months, at 7 per cent. per annum.
\(\$ 80 \sim 7 \div 100=56 \frac{00}{100}\), interest for 1 year; find the \(1 / 4\) of this amount, and add it to it, for the additional 3 months; therefore, \(\$ 56+14=\$ 70 \frac{00}{100}\), the interest for 15 months.

\section*{EXAMPLE 2.}

Required the interest (for a less time than a year), on \(\$ 500\), for 9 months, at 7 per cent. per annum.
\(\$ 500 \times 7 \div 100=35 \frac{00}{100}\), interest for 1 year ; the \(3 / 4\) of which will be the interest for 9 months ; therefore, \(\$ 35 \times 3 / 4=\$ 26.25\), interest for 9 months.
Rule 3.-To find the interest of a given sum for any number of days. Multiply the principal by twice the rate, and the product by the days, and divide the result by 73,000 .

\section*{EXAMPLE.}

Required the interest on \(\$ 1000\), for 40 days, at 6 per cent. per annum.
\(\$ 1000 \times 12 \times 40 \div 73,000=\$ 6.57 \frac{39}{3}\), interest.

\section*{EXCHANGE.}
(I.) To find the value of any sum-U. S. Currency in gold, (or Canadian Currency.)

Rule.-Multiply the number of dollars of U. S. Currency by 100, and divide the product by the price of gold in greenbacks; the quotient will be the number of dollars in gold, or (Canadian Currency).

Example.-When gold sells at 140, what is the value of \(\$ 2100 \frac{00}{100}\), U. S. Currency ? \(\$ 2100 \times 100+140=\$ 1500 \frac{00}{100}\), answer, in gold (or Canadian Cy.)
(2.) To find the value of any sum-gold (or Canadian Cy.) in U. S. Cy. (or greenbacks), at any given rate of discount.

Rule.-Multiply the number of dollars in gold (or Canadian Cy.) by 100 , and divide the product by 100 less the discount.

Example.-Find the value of \(\$ 1200\) gold (or Canadian Cy.) in U. S. Currency, discount on the latter © 25 per cent.
\(\$ 1200.00 \times 100 \div 75=\$ 1600.00\), answer, in U. S. Currency.
RULES TO DETERMINE THE VALUE OF GOODS ON hand at the time of a fire.

\section*{RULE ist.}

When the advance on the prime cost is an aliquot part of \(\$ 100\), as 50 per cent. \(=1 / 2,75\) per cent. \(=3 / 4\).

To the denominator of the fraction, indicating the aliquot part, add the numerator; thus, \(\frac{1}{2}+\frac{1}{1}=\frac{1}{3} ; \frac{3}{4}+\frac{9}{3}=\frac{3}{3}, \& c\). And subtract from the total sales the amount expressed by the fraction, whose denominator has been thus increased, to determine the prime cost of the goods sold. This amount subtracted from the amount of the goods 'purchased will give the prime cost of the goods on hand at the time of the fire.

\section*{EXAMPLE AT \(121 / 2\) PER CENT. OR \(1 / 8\).}
A. B. purchases, at various times, goods amounting to \(\$ 50,000\), and his sales amount to \(\$ 54,000\), including advance : then \(\frac{1}{8}+\frac{1}{8}=\frac{1}{8}\) of \(\$ 54,000=\$ 6,000\), which subtract from \(\$ 54,000=\$ 48,000\), the prime cost of the goods sold; which deduct from the amount purchased, \(\$ 50,000=\$ 2,000\), the amount of goods on hand at time of fire.

RULE 2ND.
When the per cent. advance is not an aliquot part of \$100; then as \(\$ 100\), plus the per cent. advance is to \(\$ 100\); so is the amount of goods sold to the prime cost.

EXAMPLE AT I7 PER CENT. ADVANCE.
Let the amount of goods purchased be \(\$ 40,000\), and the amount of sales \(\$ 35,100:\)-then as \(\$ 100+17: \$ 100:: \$ 35,100\); or, as \$117: \$100: : \$35,100:\$30,000. The fourth term, viz. \(\$ 30,000\) \(=\) the prime cost of goods sold ; subtract this amount from the \(\$ 40,000\) purchased, and we have \(\$ 10,000\), value of goods on hand at time of fire.

\section*{INVOICE.}

Invoice of 300 barrels Beef, and 400 barrels Pork, Shipped by A. V. Delaporte, on board the barque "New Dominion," John Fairweather, master, for Liverpool, on account and risk of William Brown \& Co., there.
\begin{tabular}{|c|c|c|c|}

\hline
\end{tabular}

\section*{Errrors Excepted.}

\section*{A. V. DELAPORTE.}

Toronto, ist June, 1868.
The following are the usual Modes of Effecting Marine Insurance :-
r. *F.P.A. Means "Free From Particular Average," and the party so insuring, in case of loss or damage of cargo, shall receive amount of loss.
2. P.A. Means " Particular Average," and signifies that the party insuring-insures for only a proportion of loss, say, 5,10 , or 20 per cent.
3. G.A. Means "General Average," and signifies that all the parties' insurances, on the particular cargo, pay their proportion of the loss.

\section*{FORM OF ACCOUNT CURRENT*}

WITH MODE OF CALCULATING THE INTEREST THEREON AT—BAY SIX IER CENT. PER ANNUM,

Dr. A. Jardine in Account Current with John Jones Cr.

By former Rule for Interest, multiply 227748.24 by twice the rate, and divide by 73,000 :
\[
227748.24 \times 12+73,000=\$ 37.44 \text { interest, as against Jardine. }
\]

\footnotetext{
- An Account Current contain a a aBatement of the mercantile transmotions of one perron with another, when immediate payments are not made. It is usually written on two pages, marked Dr. and Or. In the manner of a Ledger Account, the left hand page containing the payments made by the merchant who furnishes the Account, and the other what is paid to him.
}

\section*{FORMMS OF BII工S.}

\section*{PROMISGORY NOTE.}

Toronto, Func Ist, 1868. \(\$ 1000.00\)

Four months after date, \(I^{*}\) promise to pay to \(.70 h n\) -fones so Co., one thousand dollars, at the Royal Canadian Bank herc, oulue reccived.

\section*{A SHORT}

\section*{EXPLANATION}

\section*{OF COMMERCIAL TERMS OR EXPRESSIONS.}

\author{
(Extracted from Morrison's Book-keeping.)
}

Accommodation, when applied to Bills * Notes, are those for which no value has been given; that is, when the Drawee only lends his name; and that the Drawer engages to provide him with the means of payment when the bill falls due.

Adventure, when a merchant exports goods to or frons a foreign market on his own account and risk, it is called an individual speculation, or adventure to or from that place.

Advice, mercantile intelligence; to advise a bill is to describe the amount, date, term, to whom payable, etc., and to request the person on whom drawn to accept it.

Affidavit, signifies an oath in writing, sworm before some person who is authosized to take the same.

Afont, a person duly empowered to do business for another.

Arbitration, the determination of a cause by persons mutually chosen by the parties.

Assignec, a person deputed by another to manage the subject of a bankrupt.

Average, a contribution made for losses at sea, which falls upon the proprietors or insurès in a just proportion.

Balance of Trade, the difference be. tween the commercial exports and im. ports of one country with respect to another.

Bank Bill, a bill drawn on and accepted by a banking-house or banker.

Bamkrupt, a trader whom misfortune or extravagance has rendered unable to pay his debts.

Barter, the trucking or exchanging - one commodity for another.

Bills on the circle, those under acanpence, and which we are bound to

Bills in hand, those which we have in hand, and for which we receive payment.

Bill of Entry, a list of the particulars of goods entered at the Customhouse.
Bill of Lading, a printed agreement between the shipper of goods and the captain of a ship, binding the latter to deliver them "in good order and wellconditioned," on payment of a certain freight. It is usual to make out three bills, one to the shipper, the second to be held by the captain, and the third to be sent to the person to whom the goods are consigned, by which he can claim them on their arrival.

Bill of Sale is a solemn contract, under seal, whereby a person conveys the right and interest which he has in goods and chattels.

Bill of Store is a license granted by the Custom-house to merchants, to carry such stores and provisions as are necessary for a voyage, free of duty.
Blank Credit, the permission which one house gives to another to draw on it to a certain extent, at any time, for their own accommodation.

Broker, an agent employed by merchants in buying and selling, who, for a trifling charge, finds the merchant buyers in one case, and sellers in the other. There are several kinds of Brokers, such as Ship - Brokers, Insurance-Brokers, Exchange-Brokers, Stock-Brokèrs, etc.

Boaded Goods are certain articles which, on being landed, are warehoused upon bond being given by the owner for the payment of duties, etc.

Boltomry is a cont.act in the nature of a mortgage of a ship, when the of a mortgage of a ship, when the
owner of it borrows money to enable
him to carry on a voyage, and pledges the keel or bottom of the shin as a security for the repayment; ind it is understood that it the vessel be lost, the lender loses the money.

Bounty is 2 premium paid by Gorernment to the exporters of certain British commodities to foreign parts, \&e. See Debenture.
- Brokerage is a commission or Centage paid by merchants to brokers, either for the sale or purchase of goods, bills of exchange, stock, \&c.

Capital or Slock, the effects of a house in money or wares, by means of which it carries on trade and supports it credit.

Charter Party, the e.igagement between the owner of a ship and the merchant, who engages the whole ship to go from one port to another with goods, for a certain sum.

Chevisance, a composition between Debtor and Creditor.

Circulating Medium, cash, bank-notes or other paper money, payable on demand.

Circular Letter, the printed notice of the establishment or dissolution of a house, or alteration in the firm, dc. Soe Firm.

Cocket, a Custom-house warrant given on the entry of goods for exportation, to signify they have paid the duty.

Commission, an allowance given to agents or factors for transacting the business of others, always so much Cent.

Commission of Bankruptcy, an order under the great seal, directing five or more Commissioners to inquire into the affairs of a bankrupt.
- Composition, part of a debt taken in lieu of the whole.

Compromise, to adjust a dispute, by mutual concessions.

Consigument, goods sent by one house to another to sell for their account, allowing them so much Cent. for their trouble. See Commission.

Contraband Trade, that which is prohibited by law.

Contingent, the proportion that falls to the share of a person concerned in any business or adventure.

Convoy, ships of war sailing with cther shins. in order to protect them.
\(\because\) Coisnter-Order, an order, sent to reroke a former one, either for the sale or purchase of any commodity.

Credit, in general, the confidence which one house reposes in another: more particularly, the reverse f Debit.

Currency, the money in cir uilation, as distinguished from bank-paper, \&c.

Current, a term used to express the present time. Hence the Price Currewt of any merchandise is the known or ordinary price at the time it is published.

Custom-house, where entries are made on goods exported or imported, and the duties imposed by law paid.

Dobentures, a certificate given by the proper officers of the customs on certain goods exported, on which the exporter or seller is entitled to a drawbeck or bounty.
Del Credere, 2 Centage made by merchants in selling goods for guaranteeing the solidity of the purchaser.

Demuerrage, a penalty incurred by merchants for delaying a ship beyond the time specified in her charter-party.

Deviation, is a departure, withont legal cause, from the regular ccurse of a voyage, which deviation incapaciates the insured from recovering in case of lose.

Dishomor, an expression made use of when bills of exchange, \&c., are refuced acceptance or payment.
: Dividend, a share of any capital, debt, or profit; also the interest in the stocks.

Drawback, a premium allowed on exportations. Ser Debenture.

Dubious paper, means bills drawn on' houses of little credit.

Drie protection, regular acceptance or payment of a dratt or bill.

Duty, the tax imposed by Govers. ment upon the import or export of goeds,

Effects, monies, goods, or moveables in the hands of one person belonging to nnother.

Embarce, an arrest on ships or merchandise by publie authority.

Emporium, a principal place for the' i uportation and sale of merchandise.
Excise is an inland charge or impontion on Narious comniodities.

Factorage, called also Commission, it an allowance to factors by thon: the emplor them.

Wharfage, money, paid for the use of: 2 wharf.

\title{
TESTIMONIALS \\ IN favor of \\ \\ "THE DOMINION ACCOUNTANT."
} \\ \\ "THE DOMINION ACCOUNTANT."
}

\section*{}

Prom Thos. Woodside, Esq., Cashier Royal Canadian Bamk, Toronto, 13th Nov. 1868.

I am satisfied the Dominion Accountant will supply a want which has long been felt, viz:-A system of Book-keeping that can be eisily understood by any one ignorant of the science or art.

The examples given seem well adapted to the requirements of a leamer.
The book is well executed as to its typography, and is remarkably modernte in price. I hive no doubt but its merits will command for it a large sale.

From the Rev. Filkn Foinningy, D.D., Chairman of the Council of Public Instruction for Ondario, Toronto, sqth Nav., 5868.
In looking through the Dominion Accountant I find I get knowledge; and if any one can be looked to as an authority and teacher, you stand among the very foremost.
From the Rev. Wm. Morley Punshon, M.A., President of the Wesloyan Confinewce, Toronto, 3rd Dec., 1868.
I have looked over the Dominion Accountant, and think it well calculated to serve the purpose of its publication.

From the Rev. Wm. Gragg, M.A., Toronto, a6in Dec., 5868.
I have looked over the Dominion Accouratant, which appears well calculated, from its clearness and conciseness, for the parposes of a text book in Book-keeing.

The questions, notes, and explanations, as weli as the rules appended for interest and exchange, I consider particularly useful.

\section*{From David Higgins, Esq., Secretary th the Edinhurgh Life Assurance Company, Toronto, 2gth August, 880.}

I have great pleasure in stating that I consider your "Dominion AccountANT" THE best work on book-keeping I have seen in the course of a LONG EXPERIENCE. - I highly approve of the various "Sets of Books" shown in it, which exemplify how accounts may be kept, either simply or elaborately, according to the requirements of circumstances. I strongly recommend the work to both Teachers and Students. The former will, I am certain, on inspection, readily appreciate its value, and the latter, even if unable to secure the assistance of an instructor, can, by a careful study of its rules and examples, become acquainted with all the operations and details of Book-keeping, and fully qualify themselves for the duties of an Accountant. I add here that the Definitions and Arithmetical Rules contained in the Book, contribate greatly to its value.

From Andrew Henderson, of the firm of Henderson, Wallace and Company, Toronto, 5th Sept., 1870.
I have carefully examined your "Dominion Accountant," and beg to say that, from an experience of thiriy years in Practical Book-keeping, I can confidently state that your system of Book-keeping, as exemplified in the abovementioned work, single and double entry, is better adapted as a Text Book, or Self Instructor, than any system that ever came under my notice. The Arithmetical Rules in the Appendix are invaluable to Commercial Students.

\section*{EXTTAOOTS TROM THE OPDIONS OF THE PRTSS.}

\section*{From the Torome Globe.}
"s The Dominion Accountanr." - Those intending to enter M chntile life will find this a most valuible instructor. The chief excellence of the work is its cimplicity and practicability. The thorough carefulness shown by the anthor to Had the student gradually-from the easiar to the more difficult descriptions of accounts, is sure to encourage the most timid beginner. Bankers and mercantile men have given it recommendations an a-trentice that-surpasses any they have yet seen for its adaptation to the school and the counting-room.

\section*{From the Toronto Leader, Irth Now,, 1868.}

The work before us is poore progressive in its plan than any with which we have yet met. It lays the foundation of a practical knowledge of Book-keeping We recommend this volume to accountants, in whatever, In iness they may be engaged; they will find it very valuable as a book of refef)nce, and it is so arranged that at dyy point in their progress they can find an exact counterpart; and by turaing to it may at once verify their worln

\section*{From the Gualgh Maroury.}

The treatise is a very able one on the subject, and if the Board of Education would rauthorise its introduction into the schools it would be fortunate for the papils. The author has brought to the task of producing the Dominion Accounto ant a large measure of ability.

\section*{From the Fiamilton Spactator, Nov. rith, 1868.}

Book-keeping is not easily learned theoretically, but the volume goes as far as any we have seen to supply the wants of practical experience. The author Ths taken great painst to explain his system, and he has added a Compendium of valusble-Mercantile information which cannot but prove useful.
di curiefy
Inc author, Mr. Wm. R. Orr, is a practical Accountant, and teacher of many years standing. He has succeeded in producing an abmirable text Boor. The work is more progressive than any we have seen; it begins at the becinning, and proceeds by regular gradations, until it reaches the highest order and most intricute description of accounts.

\section*{Frome the Casnadian Fowrwial of Commerce, 20th Nov., 1868.}

The distinguished features of the plan of instruction is that it is progressive. We cannot speak too highly of the pains-taking care and thorough mastery of the subject manifested in the production of this work.

\section*{From the Cobowrg World, 20th Nov., 1868.}

We think the Dominion A'ccoantant superior to any other work of the kind extant. It is calculated to take the lead among works in Book-keeping, and we recommend those interested in the study to take a look through it.

\author{
From the Nerumarlet Era, sist Nov., 1868.
}

In the Dominion Accountant, we consider the author has succeeded in producing a Text Book worthy of an introduction into all public and private Schoole School Teachers should procure the work at the earliest possible moment. [^0]:    * Particular Questions and Directions, the original ones, will be found in connection with each set in the body of the book: I have, nevertheless, thought these General Questions of: sufficient importance to place them at the beginning of the work, that the pupil might study. them thoroughly betore commencing to write out the Books. I may add, thai many of these questions, answert and explanations are not to be found in the original wori, nor in any othertreatise on Book-keeping that I know of. Thoy are the product of my own experience-on quarter of a contury's extensive practice as a Book-keeper and an Auditor of Accounta.

[^1]:    *The proper wording of an Entry-or what should be written in an cosount in the Ledgar, has not always been clearly defined. The wording of every entry in evory account in the Ledger should be thu hesding or itile of another, and nothing more. If I make the Merchandise iocount Debtor to Cash, i. e., to the Oash Account, I must credit the Cash Aocount By Merohandiso, i. e., the Meichandiso Aocount. Acoounts are not debited and credited to or by thinge, Fim: Casa, Goods, etc., or persons, but by the accounts whose headings represent these thinge or persons. Ry this simple method I am enabled, when I look at an entry in one socount, to till instantly to what other socount the amount has been (or ahould be) placed, and to which cide of it; and I knnw, Jutt we well an if I had been present during the gale or purchase, what changes took piace in my property to cause such entry.

    A Remember it is the $A$ coount which represents the thing or person that is debited or zredived, and not the thlag or person individually.

    IThis answer covers the whole ground, whether the transectiony be saih or credit once.

[^2]:    - If employers would give their attention to this matter, and see to ita being enforoeds come of the temptation, at least, would wa remeved out of the way of those in charge of canh. I know, from experience, that the Oain aconunt is too Irequently balanoed by the difference between the two oldes, wichout aghartaining that this difierence agrees with tre Cash on hand, Which is the Balanos. No practice is more roprehensible than this, or mo likely to lead to disastroum resuits.

[^3]:    *Thete columns ane plocod differently, according to fanoy, cometimes to the right and left of the follo, with the namen of the socounto between thom [See Trial Balance, Second Sot, repe 27] and sometimes with both Dr. and Or. columns to the right, like a Journal.

[^4]:    *The angwor to this question, In every work I have read on Book-keeping, is erroneous, and caloulated to miflend the learnor. The anmer invariably given is, "The Accounte of percons with whom I do business.". Nothing can be more abnurd. II I'have Cash tranimotions Fith a thoutand pernons amounting to militions of money, I open no socourit for thewe perrons In the Ledger, becance they pald for what they got, and I pald them for what 1 puroinaced. It ia plain, therefore, Pertonal Acoounty are opened for thow only wilo doal on Credits.
    it Balancing the Booky in this aceo down not altect the Oompany's 8tock or Capital Account; is romalins juat as 1 t was. 800 prage 100.

[^5]:    * 

    and Loa

[^6]:    *When there is no Balance, i. e., whon all is sold, the Acoounts aro dowed To or By Protit and Lom oniv

[^7]:    * By noticing the expressions used in closing the Profit and Loss Acco nt, the pupil may deduce the following, viz: If the business has produced a gain, since the books were latt balanced, or since they were first opened, the Cr. side of the Profit and Loss Aceourit will be the greater;' and if a loss has been the result, the debtor side will be the greater. An unerring rule for making entries in the Profit and Loss Account, is, enter the losses on the Dr. side, and the gains on the Cr . side.

    I would here remind tho pupil that, in closing the books when kept by Double Entry, every Dr. must have a corresponding Cr., and every Cr. a correspending Dr., juct as in poating tho Ledger.

[^8]:    *The reacon the ords To or By Stock are uned, in closing the Proft and Low and Baiancé Accounts, is, that the difierence between the two sides of the 4 tyo socounts-the one ropeosenting the gain or loss, and the other my Net Rofate, at the time of belancing the books, may be brought into the stook Acoount; and that what 1 now powees, vis, the amount carried from the Balance. Aocount, may be brought down to the Oredit side of the Stock Account, when the balances of the other mccounte are brought down, and the books re-opened.

    It may be remarked that the differences between the two aides of any two of thewe secouuti will close the third. Thus, the Balance and Stock Accounts will close the Profit and Lose Account, asid the Stock and Prust and Lose Accounts will cloee the Balance Account; and wo have seen alnudy that the diferences between the two fides of the Profit and Lowe and Balance ccoounts closed the Stock Account, and proved the correctness of the bookn.

[^9]:    * Somettmes one broad, rage is made to hold both the Dr. and Cr. side. Arranging acoounts In the manner described above, on tuo opposite pages, the one for whatever comes in, called the Dr. side, the other for what goes out, calied the Cr. side, is what is meant by keeping books by Debtor and Oreditor.

[^10]:    *Nerg.-" "To Balance" can nover vecur in balandig Owh (or any other real acoount), we you cannot pay out more than you reccive, concequently the Or. adde can never bo the greator.

[^11]:    - In Cach never to Balance-(See General queetions 36 and 87 ).

[^12]:    *The master may here make the pupil open a stock Account, as directed, informing him that, in practice, this ls done at the commencemont, but was postponied till he should be able to understand the use of it.

[^13]:    *This account is not included in the Trial Balanoe (See Day Book, page 17), becauce both sides are alike and consequently cannot affect it. It fecilitates the work of making out a Trial Balance if all the accounts which close themsolves are left out.
    W. R. ORR.

[^14]:    $\dagger$ The words "Profit and Lose" are the tith of an account, which will be explained after.

[^15]:    * These columns answer the purpose of - Stock Ledger, or Warehouse book, which is on ought to be kept by every wholesale house.

[^16]:    * It is better to enter the page or follo in all cases; it is a much readler reference than. the dato.
    W. R. ORR.

[^17]:    * This mode of reference, from one account in the Ledger to another, is not in accordance with the general practice; it is the folio of the Journal that is entered opposite the money in the Ledger Accounth
    W. R. ORR.
