The second effect of the VEGETABLE LIFE MEDICINES is to cleause the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the amany organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banaer of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be interested to the state of the system.

Consequence of its cure.

It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this complaint for apwards of THEATY-FIFS YEARS; and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. THESE truly valuable WATERS are distinguished for the large quantity of Bromine and Iodine they contain, and are acknowledged superior to all other Medicinal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the greatest degree in the most oppressive heat of Summer, and that without altering or affecting injuriously the health of the person using them, upon the contrary, they are found to improve and strengthen. The large number of cares effected by the use of the above the public as in excellent comments of a few only of the persons of celebrity, who have given their written recommendation of the Waters, are here given. Unlike the host of pernicious quackeries which boast of vegetable ingredients, the LIFE MEDI-CINES are parely and solely vegetable; and contain neither Mercury, nor Antimony, nor Arsenic, nor any other nineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknown to the ignorant 'pretanders to medical science; and were poser before administered in so happily efficacions a meribination.

REDUCED RATES OF PREMIUM—HALF
CREDIT RATES OF PREMIUM.
THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the orthogy European Rates. The result of such Reduction Caropean Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at much lower Rates of Premium than those of ony other Assurance Company to ansacting business in Canada.

The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved, and are so

ing for a period of FITEEN YEARS, and during that time have maintened a high character in almost every part of the globe for their extraordinary and immediate power of restoring perfect health to persons suffering under nearly every kind of disease to which the hungs frame is lightly and the many thousands the latter of certificated instances; they have efter message after all the deceptive most name of the day had a terry failed; and to many thousands they have terry failed; and to many thousands they have permanently secured that similar may receive a person of the day had a terry failed; and to many thousands they have permanently secured that similar may make they have a second to the second they have ready and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquaimed with the beautifully philosophical principles upon which they are compounded, and spon which they consequently act. It was to their manifest and semable action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name. by the HALF CREDIT RATES of FREMENT which have been so highly approved, and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are like-wise offered to the Assured in the limits to which they may proceed by sea of land, to other parts of North America without affecting their Interest in Statistics and Stati eir respective Policies.
