They report a very interesting and instructive meeting. meeting

Mr. and Mrs. D. Roche left on Monday morning for Toronto where they have purchased a handsome dwelling on Park Row Drive and will dwelling on Park Row Drive and Will make their home in future. They were accompanied by their son, Dr. Norbert Roche, of Chicago, who will remain with them for a short time.

Strathroy observed Fire Prevention Day on Saturday by having its first fire since the first of August. A frame barn belonging to Mrs. Levi Smith, English street, was totally destroyed. It is not known how the fire originated, but it had gained considerable headway before the alarm was

FAREWELL PRESENTATION Mr. and Mrs. David Roche Tendered Purse of Money on Their

Departure from Town.

There was a happy gathering of between 40 and 50 citizens in Dr. McGillicuddy's office on Friday evening last, assembled to give expressions of regret at the departure from Watford to Toronto of one of Watford's early business men, a citizen of 50 years' standing, in the person of Mr. D. Roche, and to present him with a purse as an expression of

good will. Col. Kenward called the meeting to order and explained that the gathering was to do honor to an old citizen, a true friend and clean and enthusiastic sport, and to show respect for him, his wife and family, and called on Mr. John Farrell to take the char

the chair.

Mr. Farrell eulogized Mr. Roche and his life partner and children and said that the years they had spent in the town would never be forgotten by those who were left behind. During his nearly fifty years in town Mr. Roche had always done his part nobly and well, and that all citizens regretted the departure of Mr. and Mrs. Roche. "No doubt we are all more or less selfish," said the speaker "and would wish them to remain, but family claims must come first. Mr. the chair family claims must come first. Mr. Roche had always been prominent in matters tending for the welfare of the town and in his younger days brought honor to the town in many ways, especially in connection with the Fire Brigade and the Gun Club. His pocketbook had always been open for any good cause and we are glad to be assembled here to give express-ion of the good will of the people and voice their regret at the departure of Mr. Roche and family from our midst." He then called upon Mr. E. D. Swift, who came forward and presented Mr. Roche with a purse containing \$100, as a slight token of the esteem of the citizens which, he honod, would serve as a remembrance in the days to come and of the

brance in the days to come and of the pleasant days gone by."

Mr. Roche made a feeling reply, but was considerably overcome by the unce pectedness of the proceedings, yet in suitable terms thanked the company for their expressions of good will. He would always remember Watford and all the kind friends he was leaving behind. On behalf he was leaving behind. On behalf of Mrs. Roche and family he thanked

of Mrs. Roche and family he thanked all for their good wishes.

The chairman then called on a number of gentlemen present, all of whom expressed regret at the departure of the family, wishing them happiness and contentment in their new home. The sentiment was general and freely and pointedly expressed home. The sentiment was general and freely and pointedly expressed that Mr. Roche was at all times liberal minded, well informed and conversant with all matters of local interest, and with all matters of local interest, and the sentiment and sentiment and sentiment and sentiment and sentiment and sentiment and sentiment was general and the sentiment was general and sentiment was at all times liberal minded, well informed and conversant with all matters of local interest. an ardent lover of clean sport and an ardent lover of clean sport and not slow to advocate whatever he considered in the best interests of the town. His cheerful disposition was appreciated by all. He had always been public-spirited and possessed valuable ideas on any matter in which the town's walfare was concerned. He the town's welfare was concerned. He and family possessed many qualities of heart and mind that endeared of heart and mind that endeared them to the community. Among those who spoke in this and similar vein were Messrs. J. Cowan, K.C., W. McLeay, R. Johnston, T. Dodds, J. D. Brown, W. E. Fitzgerald, Joshua Saunders, J. W. McLaren, R. Brock, J. Stanton, R. H. Stapleford, P. J. Dodds, R. E. Prentis, Rev. S. P. Irwin and others, all expressing their pleasure at being present and regret at the departure of the family from town. Mr. Connolly sang "Old Kentucky Home" and the entire company joined in singing "The Maple Leaf."
The proceedings were brought to a close with the singing of "Auld Lang Syne," "Goodbye David," and the national anthem.

ADDRESS AND PRESENTATION

The parishioners of Watford R. C. Church met at the home of Mr. and Mrs. Ed. Upton on Thursday evening of last week and presented Mr. and Mrs. D. Roche with a purse of money and the following address.

Watford, October 14, 1920. Dear Mr. and Mrs. Roche

We, the parishioners of Watford Church, have gathered to enjoy an evening with you before your departevening with you before your departure for your new home in Toronto. We regret very much the fact that in future we shall be unable to have as full a measure of comradeship with you as we have been privileged to enjoy in the past, but hope that our times of meeting and of mutual happiness will not be few. We wish to take this opportunity of assuring you of the esteem in which we have always held you aand your family; and we feel that Watford and Watford Church with which you have been associated sustain a great loss

as a result of your departure. Your as a result of your departure. Your long sojourn among us, and the untiring support which you have always given to every worthy cause have endeared you to us all. Allow us to take this opportunity of presenting to you this purse as a token of our appreciation of the kindly feeling which you have always shown towards us, and of your many and generous acts of which we have been the recipients. Accept our best wishes

erous acts of which we have been the recipients. Accept our best wishes for many years of good health and prosperty that you may be privileged to continue a life of helpful service to others."

The address was read by Miss Celestine McManus and the presentation made by Mr. John Caughlin. On behalf of himself and wife, Mr. Roche replied in suitable terms for the gift, assuring the donors that in the years assuring the donors that in the years to come their kind words of appreciation expressed in the address would be much prized.

DREAMS WITH TRAGIC ENDS. Sleepwalkers Have Changed Visions

Into Realities. The recent death of a prisoner in his cell as the result of a dream was by no means an isolated instance of the dream fatality. There have been

cases where a dream has proved fatal, not merely to the dreamer, but to one who happened to be near him at the time of the dream, says Answers.

Such was the case of Robert Hendrey, the Vorkshire solicitor, whose Such was the case of Robert Hendrey, the Yorkshire solicitor, whose dream led him to inflict serious injuries to his guest. This guest, who was an old school friend, was staying with Hendrey, and one night the two became deeply involved in an intracal legal argument.

intricate legal argument. After much discussion, the host out-argued his friend, who seemed to be rather nettled at his defeat. During the night the host dreamed that his friend, angry at having been

beaten in argument, come to his room and attacked him. He actually "felt" his friend's hands round his threat. He sprang out of bed, but found the room empty. Believing his guest had run away, he seized a walking stick from a corner, rushed to his guest's room, and, in a fit of anger, belabored him so badly that he died from his injuries.

In another instance a householder In another instance a householder dreamed that a burgiar was in the house. He woke up, and, unaware that he had been dreaming, got out of bed, listened, heard soft movements downstairs, and crept down

with an unloaded revolver.

In the darkness at the foot of the stairs somebody blundered into him. He struck out with the revolver— and blinded for life his brother, who had returned late, and was trying to get to bed without disturbing the

A London chemist once dreamed vividly that he had swallowed some poison. In a haze of sleep, he went into the shop and hurriedly took an emetic. This, of course, poisoned him. When he began to feel the effects, he realised that he had made a mishes and immediately swallowed and take, and immediately swallowed an

take, and immediately swallowed another emetic to counteract the first one. But he was too late; he died the next day.

Sitting half asleep in a train one hot day, an acquaintance of the writer somehow gained the impression that the train had stopped at his station. He sprang up, opened the door, and fell on the permanent way. The train was traveling at about thir-The train was traveling at about thir-ty miles an hour. He was badly in-jured, and will be lame for the rest of his life.

All these cases were due to the in-ability of the dreamer to distinguish between dream and reality. There are many people to whom this failing is a source of continual annoyance, and often danger. Most children are victims of it, but seldom to such a degree as to endanger their lives.

A famous instance was thet of A famous instance was that of Charles Darwin, the scientist, who, as a boy, was continually in hot water for telling his parents stories of happenings that he really believed he himself had witnessed.

England's Cotton Supply.

Cotton plays a great part in the ves of men in England and in the United States, says the Nation's Business. Even if in these later times cotton has been more of a hand-maiden than a king, it has recently turned out a very haughty sort of handout a very haughty sort of hand-maiden and inclined to be exceedingly self-assertive

Two years ago England took note of such possibilities and has since had a committee that points out that the world is short in cotton, if needs are measured by the capacity of prewar machinery, and the shortage is increasing; that the shortage is great-est in the kinds of cotton that go into the finest kinds of cloth; that England is getting 85 per cent. of its cotton from the United States, which each year uses more of its own crop; and that the British Empire can itself with profit produce the cotton it needs. Egypt the Soudan, Uganda and India are parts of the empire, in which, according to the committee, cotton, growing, can be greatly according to the committee, cotton growing can be greatly extended

It seems the committee believes that to extend cotton growing in the British Empire it will need funds—something like \$500,000 a year. This amount it proposes to raise by levy-ing a tax of 12 cents on each bale

House of Surprises.

In a dingy London by-way there is a public-house which displays no sign, a public-house which displays no sign, serves only one drink to a customer every half-hour, and has equally quaint rules of its own, says Tit Bits.

Near Liverpool Street Station is a small alley known as Artillery Lane, containing this house of surprises. Of three persons questioned in the alley only one knew where it was, and then its name was unknown.

Years ago—in 1686, when it had the first license—it was probably familiar as the Ship, but to-day it is known only to a few by the name of its proprietor.

There is only one bar, and it is useless for customers to return for a second drink before twenty-nine minutes are up, for the barmen have been trained to a wonderful pitch of facial memory. That is the first surprise.

Another is the landlord. Instead of being greeted by a gigantic per sonage, as one might perhaps in-

agme. Mr. Launer winners, suver-haired and diamond-pinned, is intro-duced. His appearance is that of an eminent literary character. Perhaps the biggest surprise of all is when the ever-watchful barman orders you to take your cigarette out of your mouth, as "no smoking is allowed here."

Wireless Stations.

The Marconi Wireless Company proposes to the British Governmen to erect wireless stations in England, Egypt, India, East Africa, South Af-rica, West Africa, Canada, West Indies, Straits Settlements and Austra-MYSTERY OF THE LAKES.

Early Voyageurs Note Rise and Fall of the Waters.

Why does the water in Lake Ontario and it's sister fresh water seas rise and fall in periods which average seven years? This hatural phenomenon has been puzzling people since the old days when France held way in Canada. held sway in Canada

Looking through the unpublished diary of an English traveler, who voyaged up the St. Lawrence to Nia-gara in the summer of 1785, the fol-lowing reference to this mystery of the waters, will be discovered dated under July 1 of that year, the diarist little thinking that 82 years later Confederation would take place on

that day:
"A remarkable circumstance was told me," writes this traveler up the St. Lawrence 135 years ago, "by Mr. Pansee, our conductor, who has been constantly engaged in this navigation for nearly twenty years, and which he advises me is a matter of fact, both from his own observation and that of the oldest men living. Each year the River St. Lawrence settles or falls a little until the seventh year, when it is visible that it has sunk between three and four feet, and then for the next seven years continues to rise in the same proportion. The river is at this time at its greatest elevation. I took some pains to gain some information of this uncommon phenomenon. I find that the lakes have the same appear-

Thus the rising and falling of Lake Ontario, etc., has been under observation for about 200 years. Careful Government records were begun about 1840 and since then it has been found that the periods between the high water and low water are sometimes as low as four years and sometimes as high as nine years, though they do average seven years.

But the cause is appropriate a in-But the cause is apparently as in-explicable to modern scientists as it was to the hardy explorers of the

Seal Hunting Slaughter.

olden days.

Hunting the seal from the icy, torm-swept coast of Newfoundland is not sport; it is toil, whereby in part the Newfoundlander wins his scanty measure of bread, says Spare Moments. The hunt is a dull and hideous slaughter—a leap into the whining and scurrying pack, and the swinging and thrust of an iron-shod gaff, a merciless raining of blows, with a silent waste of ice all splash-ed with red at the end of it. There fear of hurt, for the seal pleads and whines like a child, even while the gaff is falling; but the case is beset with multitudinous and unfore-shadowed perils. The wind gathers the ice into floes and jams it up against the coast, an immeasurable, jagged expanse of it interspersed with plains; then the Newfoundlander takes his food and his goggles, and sets out from his little harbor, starting at midnight that he may come up with the pack at dawn. But the wind which sweeps the ice in inevitably sweeps it out again without warning in an hour, or a day or a week; nor does it pause to consider the situation of the men who are twenty miles off the men who are twenty innes on shore. It veers and freshens and drives the whole mass, grinding and heaving, far out to sea, where it disperses it into its separate frag-

The lives of the hunters depend upon the watchfulness of the attenuated line of lookouts, from the women on the headland to the first sentinel within signalling distance.

Population of Growth

Department of Trade and Com-merce estimates the present popula-tion of Canada at 8,835,102, compared with 7,204,838 in 1911, and 5,871,315 in 1901. By provinces the present estimate is:

Ontario	2.820.000
Quebec	
British Columbia	718,660
Saskatchewan	754.090
Manitoba	618,903
Alberta	587,770
Nova Scotia	518,761

SITES FOR WAR MEMORIALS.

Canadian, Australian, and British Forces to Honor Dead.

The Battle Exploit-Memorial Committee, which was constituted by the Army Council last year, has made progress with the work of correlating the claims of individual units to erect permanent memorials of their ex-ploits on the battlefield and of facilitating the acquisition of sites from landowners in France, Belgium, and other theatres of war. Claims have been submitted by two corps, 33 divi-sions, six brigades, and 42 lesser formations. In addition, the various Dominions have negotiated their claims through the committee. The Australian memorials have al-

ready been erected at Pozieres, Mont. St. Quentin, Sailly-le-Sec., Bellen-glise, Polygon Wood (Zonnebeke), and Willers Bretonneux. For the Canadians, a battalion memorial has been erected at Passchendaele. Other memorials are to be erected at St. Julien, Observatory Ridge, Courcelette, Vimy (Hill 145), Caix-le-Questell, Dury, and Parkey. nel, Dury, and Bourlon, and repre-sentatives of the Canadian Govern-ment are arranging for the acquisition of the necessary land. Details of the sites required have not yet been received from other Dominions.

Complete particulars as to the sites required have been received from sev-eral divisions and other formations. The sites required by these units are at the following places: Vielle Cha-pele, Fricourt, Bellenglise, La Bois-selle, Etreux, Bailleul, Givenchy, Favet. Lagnicourt. Graincourt. Thiepval, Pozieres, Bois des Buttes, Ven-dresse et Troyan, Mont Noir, Neuve Chapelle, Beaumont, Hamel, and Villers Outreux. In each of these cases negotiations have been opened with the mayor of the commune and the landowner concerned, except where, as at Vendresse, the country is so devastated that local government has not been restarted, and it has been impossible to find the owner. Free offers of sites have been made to units by the owners of the commune at Vieille Chapelle, Fricourt, Bellen-glise, La Boiselle, and Fayet. The Belgian Government has gen-erously offered to reserve, so far as

plan of reconstruction admits, sites for possible memorials at the follow-ing places: Boesinghe, Bixschoote, Langemarck, Poelcappelle, Passchendaele, St. Julien, Gravenstafel, Zon-nebeke, Polygon Wood, Sanctuary Wood, Gheluvelt, Hooge, Hill 63, Neuve Eglise, Messines, Wytschaete, St. Elio, Hill 60, Kemmel, Klein Zil-lebeke, and Varee

lebeke, and Ypres.
In certain much-fought-over areas, notably on the Somme, at Ypres, and in the valley of the Sambre, several units have selected the same or closeadjacent sites, and the question priority has to be examined.

The sites in France and Belgium, in regard to which complete particu-lars have not been supplied by the claiming unit (and in the absence of complete particulars negotiations for acquisition cannot be prosecuted), are at the following places; Point du Jour, Longueval, Arras, Ephey, Trescault, Havrincourt, Thiepval, Gommeccurt, La Verguier, Moeuvres, Mons, Monchy-Le-Preux, Villers Carbonnel, Zandvoorde, Guillemont, and Montagne de Bligny.

In theatres of war other than France and Belgium, units have registered preliminary claims for sites at Papadapoli Island (Italy), Gallipoli, Geza, Doldzeli, and the Doiran Front, Nevoljea (Saloniki), Aleppo, Kantara (Palestine and Para) ar Tanga (East Africa.

HAS NO PAIN NOW

What Lydia E. Pinkham's Vegetable Compound Did for Mrs. Peasey of London.

London, Ont.—"I suffered with periodic pains, was weak and run down, could not eat and had headaches. The worst symptoms were dragging down pains so bad I sometimes thought I would go crazy and I seemed to be smothering. I was in this condition for two or three years and could not seem to work. I tried all kinds of remedies and had been treated by physicians, but received no benefit. I found one of your booklets and felt inclined to try Lydin E. Pinkham's Vegetable Compound. If received the best results from it, and now I keep house and go out to work and am like a new woman. I have resemmended your Vegetable Compound to my friends, and if these facts will help some poor woman use them as your please."—Mrs. J. F. Peasex, 200 Rectory Street, London Ont.

The reason women write such letters to the Lydia E. Pinkham Medicine Co. and tell their friends how they are helped is that Lydia E. Pinkham's Vegetable Compound has brought health and happiness into their lives. Freed from their illness they want to pass the good news along to other suffering women that they also may be relieved.

If there are any complications you do not understand write to Lydia E. Pinkham Medicine Co., Lynn, Mass.

FARM WATER SUPPLY

Practical Pointers About Installing Suitable Equipment.

Putting Running Water In the Home and the Barn-How to Develop the Natural Water Supply-Several Systems Suggested.

(Contributed by Ontario Department of

N penning this short article the writer desires to stress two main points in regard to this subject, first, the need and importance of curing an adequate and permanent supply, and, second, the installation of suitable equipment for getting the water "on tap" in house and stables and about the lawns and gardens.

In regard to the supply of drinking or hard water, it may be said that of late many of the old shallow wells of the Province have been failing seriously, thus indicating that the watertable is not as high as it used to be. It is to be hoped that this is only a temporary condition and that many of these wells will soon become serviceable again. However, the shallow well can seldom be relied upon absolutely, and so as a rule it is wise to sink such wells deeper. This usually means drilling. Sometimes there is good reason for abandoning the old well altogether and choosing a new site. A careful survey of the existing wells of the district in respect to depth, supply and character of the water will usually prove useful in regard to the advisability of drilling, also a knowledge of the nature, depth and dip of the underlying strata or rock formation may help too. Instru-ments for locating underground water, so far as our experience goes,

have not been a success in this Pro-vince, although much is claimed for them in some other countries differ-ing widely from Ontario in geological formation. Some individuals claim that they can locate underground water by means of a forked twig from such trees as cherry, plum, and hazel, and because we have known good wells to be found in this way, and because prominent scientists have given the matter considerable attention in recent years, we are not inclined to pooh-pooh the idea. In some cases old wells go dry because the water veins feeding the well have become clogged. If so, a charge of dynamite in the bottom will effect a remedy. Sometimes an old due well remedy. Sometimes an old dug well will supply plenty of water for all time if it is dug a few feet deeper, or if the formation is sandy or gray elly (fine) for some depth below the bottom a special filter may be sunk into a water-bearing layer of sand or gravel with good results. It is well to emphasize the value of a good spring. If one exists reasonably close to the buildings it may be made to supply them with water if certain condition obtain. In every farth home there should be a large cistern either in the cellar or just outside the calley. in the cellar or just outside the cellar wall and below the ground for stor-age of rain water. This water can be used for washing purposes, bathing and flushing the closet. A large cis-tern at the barn and connected with tern at the barn and connected with the eave-troughing thereon, will supply a large portion of the drinking water for the stock in the rainy periods. It is very essential that the supply be ample and never failing, and when this is assured steps may be confidentially taken to install water systems in order to have the water convenient about the home.

The second point, namely, the distribution of the water supply, is a very big one, and one about which a

yery big one, and one about which a good deal might be written. Space will permit only the very briefest treatment, but if more details are required write the Department of Agriculture, Toronto, Ontario, for Bulletin No. 267, entitled "The Farm Waler, Supply and Severe Dispart to Water Supply and Sewage Disposal," or the Department of Physics, O. A. College, Guelph, will gladly advise regarding any problems received by

regarding any problems received by letter.

(1) If the well be shallow, that is the level of the water is never more than 25 feet below the surface, or say the level of the pump cylinder, the pump may be located inside the

well. Greater convenience would be the result of such a change.

(2) A small water tank in the attic of the house will make it possible to install plumbing fixtures, as sinks, bath and closet in the home.

(3) Better than the attic tank system is the compression system.

A Brawn and Brain Work Well.

tem is the compression system. A strong steel cylindrical tank is locat-ed in the cellar or some frost-proof place, water is pumped into it from well or cistern against air pressure which forces the water to all points where it is required. The pump may be operated by hand or better by gasoline engine, windmill, or electric

(4) If electricity be available the compression system can be operated automatically and the storage tank made so small that the water is drawn fresh from the well instead of from a large storage tank

from a large storage tank.

(5) If a good spring exists on ground level with top of house or higher, a pipe under the frost-line between spring and house is practically all you need in order to have the

spring water on tap.

(6) If not high enough for a grav ity system the spring may possibly be advantageously located for installing a hydraulic ram which will pump the water to a tank in house or stable or trough in yard. It is worth while having pure and cool spring water always on tap about the buildings. The fall would be a good time to

be tall would be a good time to be obliged to carry water another winter. First be sure that your sup-ply is ample for all requirements, and then go ahead with the install-ing of some suitable water system, and do not forget that we are anyious and do not forget that we are anxious to help you.—R. R. Graham, O. A. College, Guelph.

Relieves Asthma at Little Expense.—Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr.J.D.Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within the reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

Police Dogs. The present wave of crime has given an impetus in Great Britain to the training of dogs for police purposes. The training of these dogs calls for a large amount of patience, intelligence and resource, far removed from the old idea of dog breaking, which was usually to beat the animal mercilessly into the observance of a few set rules. It is step by step in his daily lessons that a dog gradually becomes a tracker of criminals by their scent, pursues escaping prisoners, discovers missing people, or finds suspected ones in concealment. He learns fear-Ressly to seize and pull down any aggressor, whether his master or himself be attacked, and to do it with the least possible damage, ceasing at once when the enemy gives in. The popular conception of the police dog as a wild, savage brute, probably accounts for the antipathy to his use some quarters. The public should realize that the properly trained dog is at all times per-fectly under control.

Wise Guy.

Circus Manager-"So you want a job as circus attendant, do ytu? What steps would you take if a lion were to escape?" Applicant-"Good long ones,

Meighen Is a irresugtermin Hon. Arthur Meighen, the new Premier, is the most talked of man in Canada at the present time, and wherever two or three people are gathered together there will one hear at some time discussion of him and his merits for the office he has been called upon to fill. There is much called upon to fill. There is much speculation as to his religious beliefs, and many people who are heard discussing him appear to think he is a Roman Catholic. As a matter of fact he is a regular attendant at Chalmers' Presbyterian Church, Ottawa, where the Minister is Rev. J. W. Woodside, who was called there two years ago from Chalmers Church,

Step by Step.

"Supposing," said the man who-wants to see everybody happy, "that we somehow arrange to give you a 'six-hour day. Are, you sure that you will be contented?"

will be contented?"
"For the present. Of course, I shouldn't think of asking for less than six hours work to the day. But I have an impression that in the course of time our chronological system will need revision so that we'll have 25 or 30 minutes to the hour."

Comping In 1920.

It was dawn and very chilly in camp, and one man was unable to find any of his outer garments. He wandered about, asking all his mates if they knew where they were. "Has any one seen my b-b-blanket?" he demanded and was fold that no one had. "Has any one seen my t-t-trou-sers?" No answer. "Well, I'm jolly g-g-glad I have got on my nice w-w-warm pair of suspenders."

St. Thomas barbers have raised the price of a haircut to 50 cents.

Brawn and Brain Work Well Together - Students Help to Direct In Sports-Building Up the Body for Later Usefulness.

(Contributed by Ontario Department of Agriculture, Toronte.)

THLETICS at our College are being revolutionized and nlaced on a more stable basis than in the past.

Progressive colleges are coming to ealize the supreme importance of bringing physical training to the front in educational work. College authorities are realizing that they are responsible for the Ignorance among the alumni of the colleges, regarding the care of the body, as it is a well known fact that eighty per cent of graduates die from ten to thirty years before the age at which they should. They are also realizing that under the old method less than fifty per cent. of the students are engaged in any form of systematic or organized exercise. This is due to the fact that our colleges were, and some are as yet, fostering two classes are as yet, fostering two classes—
one class attends for social and athlefte advantages, and the other
attends largely for intellectual opportunities. The first class is inclined
to neglect mental work and carry
athletics to excess, while the second
class is inclined to neglect physical
training and carry mental efforts to
excess. Neither class lives strictly
hygienic lives.

Now our colleges are adopting new
methods to eliminate such conditions
and are awakening to the fact that
physical education has a legitimate
place in the college curriculum,
Some of these methods are as follows: (1) Intra-collegiate sport and
recreation in addition to our intercollegiate sports, with the constant
purpose in view of usefulness in after
life. This draws in the spectators on

life. This draws in the spectators on the side lines and promotes interest of activities on the basis of athletic sports, rather than on gymnatic basis, giving games to the student if normal physically; if not, remedial gymnatics until fit. It is necessary to have a wide range of sports. to have a wide range of sports, games, and physical activities, and a plan to encourage more general participation in them. (3) Exercise taken systematically and at regular in-tervals. (4) A subject with required attendance. (5) Strength test upon entering and at the end of each year, entering and at the end of each year, so a student may realize the benefit of systematic training. (6) Encouragement of the type of physical exercise that student is likely to use in after life. (7) The teaching of fundamental principals of hygienic living. (8) Increase of facilities for living. (8) Increase of facilities for outdoor sports in winter and summer.

In the past years athletics at the A. C. have been carried on without these advantages and, in spite of great difficulties, we have been handicapped primarily in not having an athletic field, and necessary funds for equipment which is essential for executing an effective program; this is our greatest need and will be a hinderance to our progressive program for this year. It is our great desire that it will not be long before we benefit by both.

The whole student body had a meeting before finel examination of

meeting before final examinations on the thirtieth of last March for the purpose of discussing and voting on the new program for the coming which was outlined by our athletic executive. Professors Blackwood, Toole, and Crowe, and Dr. Creelman pointed out to the students and fac-ulty the great need of such a program and their duty in regard to athletics and themselves. After a discussion, each cause of this program was voted on and passed unanimously by the

whole student body.

The following is a brief outline of the Athletic Program for the coming

(1) Students who have had pre-ous training to act as leaders in the different branches of sports-to coach in boxing, wrestling, aquatics, and track and instruct in athletic games.

(2) Promote a fuller program of inter-year athletics by having schedules in more branches of sports. Inter-year competitions in the following sports. Further severe playing sports. ing sports: Rugby, soccer, play ground ball, push ball, volley ball, outdoor basket ball, boxing and wrestling, track, mass athletic meets, ross country runs, tug of war, ten-nis and aquatics.
(3) For those students who do not

take part in these sports, two compulsory periods a week will be given in which they will be instructed in athletic games, field and indoor events, swimming, boxing and wrestling.

In order to promote this program, we had to enlarge on our Athletic Council which was composed of the sports managers, picked from the faculty, and the Athletic Executive. To this we added a Leaders Corp and Managers of inter-year sports picked from the students. The Leaders Corp is made up of directors of sports (one for each sport) and their leaders. The inter-year managers leaders. (one for each sport) have charge of

teams and are responsible to their

year representative who is a member of the executive. By such an organization we feel By such an organization we feel confident of swinging our program, successfully, which means every student will take part in some branch of athletics. Those students, who come under clause (3) of our program, will be given special instruction by our Leaders Corp and will greatly benefit themselves and the college. In this way we will be abled to reach the student on the side lines. to reach the student on the side lines. Suggestions regarding athletics in rural community centres will be presented in a future article,—K. W. Forman, Director of Athletics, O. A.

Clever Ants.

The reputation of King Solomon as a naturalist has been much enhanced by the comparatively recent discovery he asserted, make a business of gathering and storing grain. But there are other ants which pursue a much nore remarkable practice. They culti-

The so-called parasol ants of Brazil get their name from their habit of marching along in single file, each one with a piece of green leaf held over its head. These scraps of leaves are taken to underground chambers, well chewed, and allowed to ferment and decay in a mass, through which the mycelium or a fungus soon begins to run in white threads. When little mushroom buttons have started to develop the workers bite them off and feed them to the baby ants.

Experiments have proved that these mushrooms, if permitted to develop, will attain a diameter of six inches. But the ants prefer them i mature. Man has discovered that preparing suitable beds in dark ces where he can control tempe attire, he can grow mushrooms all the year round, but the leaf-cutting ant got the idea long before he did

Guide-Advocate

FRIDAY, OCTOBER 22, 1920.

The force behind our national progress is the consolidated forethought The force behind our national progress is the consolidated forethought and ambition of the Canadia people to become a national and imperial influence in world civilization and trade. The Navy League of Canada has a wonderful vision of the future and is preparing the way in their campaign to raise \$760,000, "Trafalgar" Sailors' Week, October 18 to 23.

The ultimate possibilities of our Great Land Heritage will be realized through the development of ourGreat Sea Hertage. And prevent us from becoming merely a continental people—hewers of wood and drawers of water for other nations.

Canada's Overseas Trade made giant strides during the war. Employment was plentiful, wages were good, farmers were prosperous. To hold what we have and get more Canadian where and Conedian merely

ployment was plentiful, wages were good, farmers were prosperous. To hold what we have and get more Canadian ships and Canadian men to man them are needed. New routes must be opened, Canadian trade lines must be established and maintained. With ships the markets of the world are open to Canadians. Trade follows the flag.

Overseas trade made us prosperous, Overseas trade made us prosperous. To maintain our overseas trade Canada must have a sea-conscious spirit. It must be in the people, in the government and in the

ple, in the government and in the schools. Canadians must not be hewers of wood, drawers of water for other nations. Canadian ships must carry Canadian products to world markets.

Canada's overseas trade is \$2,351, Canada's overseas trade is \$2,351, andborne \$1,305,000. More than half
this land-borne trade is ultimately
sea-borne—but in foreign ships.

Every pound of Canadian products
shipped from a port outside Canadian
territory retards our maritime growth
weakens our national properity and
weakens our national properity and

weakens our national prosperity and places control of a part of our sea-borne commerce in the hands of a competitive nation.

competitive nation.

For four hundred years the freedom of the Empire has been maintained by the sacrifice of countless gallant lives on land and sea. "He that commands the sea is at great liberty."— Bacon. Liberty to live, liberty to trade; trade means prosperity; liberty to trade lies upon the Sea! The congregated wealth of the nation must stand behind the fornation must stand behind the forward movement to the sea.

KERWOOD

Mr. Lang has shipped forty cars of apples from here, sixteen cars of cattle were shipped Wednesday the 20th. Mr. and Mrs. J. W. Early and family have returned after spending the summer in different parts of the West.

Mr. and Mrs. Fisher, London, spent a couple of days at the home of Mr. J. Johnson.

Johnson.

Mrs. Ashwell, London, spent a few days at Mr. Edward Callaghan's. Mr. and Mrs. Earn Tedball and son of Glencoe spent Sunday with Mr. J. Richardson.

CHOP STUFF

A Petrolia lady has an Easter lily in bloom.

The Winnipeg Telegram has ceased publication after a life of 27 years, Forest fair had 85 exhibitors and \$557 in total receipts.

The output of butter in Saskatche-wan this year will be seven million

R. A. Germain, harness-maker, has decided to quit business in Alvinston and move to Petrolia, where he has purchased a business.

A plowing match in which 16 boys of the Lobo district took part, was one of the unique features of the school fair held at Poplar Hill.

A Durham county farmer has just closed a deal by which he will receive \$34,000 for his apple crop. His orchard consists of 100 acres. The total receipts at Strathroy fair amounted to \$5,295 and after

paying all expenses the association will have about \$1,200 to the good. While Rev. Mr. Hunt, rector of the Anglican churches at Bothwell and Thamesville, was conducting service at the former place, his auto was

About 140 men were laid off on Saturday at the factory of the Wilt Twist Drill Co., in Walkerville, on account of other factories cancelling their orders.

Boy Scout patrol leader Graham Fenn of Parkhill was presented with a bronze medal for life saving last week. The presentation was public-ly made by Mayor Logan.

The Clerk of Lion's Head was fined \$15 by Judge Klein for not getting out the voters' list of the village within 30 days after the Court of Revision, which brings the date for first posting up of the list to about the first of July.

Thomas Petch, aged 75, is in the general hospital at Strathroy so terribly injured as a result of being trampled by a steer, that no hope is held out for his recovery. He was taking the animal, with others, to the station for shipment, when it attacked him, and he was knocked down, sustaining a fracture at the base of the brain, a fractured collar-bone, several broken ribs and internal injuries. He has en ribs and internal injuries. He has been unconscious ever sinie the acci-dent and his condition is most precarious

carious.

Death came very suddenly to John McEwen, president of the Byron Telephone Company, and one of the best known farmers of the district at his home Friday evening. He had been at work all afternoon in his garden picking vegetables, and apparently was in his usual excellent health. At ten minutes to six as he was entering the front gate to go into the house for supper he suddenly fell over, and was dead when his sister, who was only a few feet behind him, reached him.

It was stated recently that French.

work Wanted - All kinds of It was stated recently that French repairs done to Furniture, Cabinets, etc., Masons had admitted women totheir order. But, with the exception of a few lodges of the F. & A. Masons, they have no connection with the fraternity elsewhere, says the Hamilton Spectator. As a correspondent states many years ago the various lodges in France removed the Bible from the altar and substituted the Constitution of France therefor. This act tion of France therefor. This act automatically removed them from the Masonic fraternity and they have never been restored. This latest action should serve to widen the breach breach.

breach.

From every view point the farming class of this country is in better shape now than at any period as long as we remember. More people own their own homes and little farms and cars, more are free from the yoke of bondage inflicted by burdensome debts, more are becoming independent each year by making a comfortable living for their families, more are waking up to the necessity of giving their children better educational advantages, and withul, prospeity and contentment seem to prevail throughout the country Let progress still be our watchword.

To Our Subscribers

The cold water floweth;
The back subscriber oweth;
And the good Lord knoweth
We are needing-our dues.
But there is no funnin'
This 'everlastin' dunnin'
Gives us the blues.

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day is warm and bright and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WATFORD HIGH SCHOOL FIELD DAY

The annual Field Day of the Wat-ford High School was held in the park on Thursday, October 7th. The weather was fine and a large

The weather was fine and a large number of students gathered together in the morning to compete in the events. The sports went off well, under the able direction of Mr. Ballanyne, the different events were carried out, and the championship for the year decided upon. The students entered heartily into the various contests and emphasized the feeling of unity existing among them as pupils of the Watford High School.

In the afternoon a goodly number of the boys and girls from Forest High School and Strathroy Collegiate Institute, including a baseball team and basketball team from Strathroy, came over for the events. The sports were entered into with a spirit of friendly competition and good feeling.

spirit of friendly competition and good feeling.

The day was brought to a suitable conclusion by a banquet in the Armory, at which the Watford students entertained the visitors. Later in the evening a basketball game was staged in the Armory between Forest and Watford, in which the visitors were successful.

A DEPENDABLE PAPER

When you subscribe for a newspaper there are two essential points to be taken into consideration. First, make sure that you subscribe for a paper friendly to your interests, one whose friendship has been proven. Second, a newspaper that is fearless editorially, always dependable and with farm markets reports that are as nearly accurate as possible. Such a paper is The Farmers' Sun, Toronto. owned, and published twice a week owned, and published twice a week by the farmers in the interest of the farmers. Twice a week, 104 issues for the old price, \$1.50. You should have this sure friend in your home.

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

THE FOOT OF FATE

By DORA MOLLAN

For the third time since she entered the station Edith Redway's overshoe slipped at the heel. For the third time she stopped to give it an impatient tug. At the instant a dittle hard bulk of paper bound about by twisted elastic, skidding from under the spurning foot of a passerby, brought up against Edith's offending

She picked it up. Evidently the paper was wrapped about some small object. Whoever had kicked it her way had passed on. Edith dropped the little parcel into her bag and proceeded to her train.

Sinking into the first vacant seat the girl rested her head against the high plush back and wearily closed her eyes. Two weeks with a grip cold as bed fellow had forced Edith to take a vacation.

The listlessness of convalescence possessed her mind and body. Vagrant thoughts came and went, unpursued to any conclusive end. Cousin Marie, whom Edith was going to visit, would ascribe her sickness to the fact that she didn't wear woolens-she would harp on that. Then the illness itself-doctor's bills and meals in her room-a forfeited summer vacationno money for week-end outings—an employer who expected as untiring service from his office force as from his typing machines!

The approaching summer would loom dreary enough, Edith decided, were it not that a small park, that quaint old square dedicated to the memory of the man who tradition tells us never uttered a lie, lay within easy walking distance of her rooming There were green growing house. things there, and benches where one might sit and watch the passing.

Associated with that park in Edith's mind was a man—a slender young man with dark, dreamy eyes whe often walked there alone. He was not like the park's patron saint. He could tell a lie had told her one. One sunny Sunday morning he had sat on the bench next to her favorite one. Across the walk a toddling, swarthy speck of humanity, fired by the same spirit that sent a famous compatriot sailing over uncharted seas centuries before, set out from the port of his mother's knee on a voyage of discovery, gleefully tottering to the inevitable fall.

Edith and the dark young man had simultaneously rushed to the rescuehalf an instant too late. When the excited parent arrived they were making joint efforts to wipe away the evidences of a bleeding nose. The mother's voluble thanks served as an introduction of a sort, and when they seated themselves again it was upon the same bench. They talked of many things-impersonal mostly. But the man had said he walked in the square every pleasant Sunday morning-he would look forward to seeing her the following week. That was the lie. Two pleasant Sunday mornings had passed and he had not been there.

The conductor, coming for her ticket, interrupted Edith's train of thought. As she took the pasteboard from her big she noticed the forgotten little package. Slipping the elastic binding, she found it to contain blue plush jewel box, and in the box reposed a ring—a cameo of extraordinarily delicate pink set simply in gold. It bore the profile of a weman, beautifully chiseled. With an inward exclamation of admiration Edith proceeded to closer examination

Some characters, engraved on the inner surface, she deciphered as "C. to E; 3—2—11-5." Surely that mystic inscription must mean much Somewhere, that some to some one. one was bewailing the loss of the camee even while she was revelling in its beauty.

On the sheerest impulse Miss Redway dropped the jewel box to the floer and thrust it under the seat with her foot but not before she had glimpsed the name of a well-known firm of jewelers stamped in gold inside the lid.

She tried the ring on every finger and found that it best fitted the third finger of her left hand. Why shouldn't she keep it? The foot of fate had literally kicked it to her. And, anyway, she remembered reading somewhere that beautiful things should belong to those to whom they brought the most enjoyment. It was easy for a rather discouraged, half siek young woman in Edith's place to anaesthetize her conscience.

But anaesthesia is a temperary condition. Edith completely restored un-der Cousin Marie's motherly care and on ner way nome two mays exiler than she had anticipated, spurred by the restlessness of the unaccustomed-ly idle, was sorely conscious of that jewelry firm's name and address.

It met her eyes in the columns of the magazine she tried to read; the wheels of the train pounded out the rhythm of it. The jewelers would be sure to have some record of the per-son to whom the ring had been sold and who had had it engraved. Surely, not to attempt to trace its ownership through that obvious channel was to steal it; no less. This was Satur-day afternoon and too late in the day to do anything about it. But on Monday morning she would give up the ring. Meantime, Edith rejoiced that with a clear conscience she could wear it one more day.

Sunday morning, warm and sunny, advance sample of the best styles in May weather, found Edith Redway strolling toward her favorite bench in the square. And there, looking as candid and trustworthy as if he and truth were one, sat the young man who had lied to her-who had promised and had not come. Steeling herself to ignore him bitterly, Edith was sauntering regally by when he caught sight of her and sprang, up, his face alight. It was too genuine; his delight too sincere. The girl yielded to his entreaties to be seated and let him explain.

He had been called away six weeks before, he said, by the almost fatal illness of his mother, and had returned a fortnight ago. He had haunted the square ever since, hoping that she would come. What had happened? Where had she been?
So Edith told him about her own

illness and her having to go away, and between them they pieced it out that with any luck at all they would have met in the Grand Central, for they must have been there at the same moment on the day of her departure.

It was in the midst of this interest ing comparison of data that Edith subconsciously resenting the pressure of too snug kid, drew the glove from her left hand. Her companion halted in the middle of a sentence. "Where did you get the ring?" he asked ab ruptly.

"It was given to me-by a friend," Edith told the fib desperately. For some vague woman's reason she was impelled to impress this nice young man that she had the sort of friends who would choose such a ring to give

But her companion if impressed was impressed curiously. He glanced sidelong at Edith, at the ring and then straight across the square to the great Washington arch. Also he whistled, low and long and specula-

"Do you suppose," he inquired, still, gazing across the park, "that the old boy over there on the arch ever told one like that? Honest Injun, where

Instantly Edith's tiny structure of the Grand Central station," she admitted penitently. "Is-is it yours?" "Oh, no, no," was the hasty joinder. "I bought it, though, for a friend. You'll find it marked, 'C. to E.; 3-2-11-5.' The C stands for my name, Chester-Chester Barlow."

"And the E stands, I suppose, for the name of your fiancee?" Edith

was carrying it off bravely. "I hope so, very earnestly. It stands, you see, for Edith-oh, I peeked twice at letters you had been reading, for I had to know. And the numbers stand for the month, the day and the hour when we first met. It's yours. It has always been yours. Will you wear it—dear?"

And Edith is wearing it yet.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

Police Magistrate Gorman, of Sarnia, has not yet been officially requested by Premier F. C. Drury for quested by Premier F. C. Drury for an opinion on the Ontario Temperance Act, he announced when interviewed. When the question of the establishment of local dispensaries to supplement the Act was suggested, the Magistrate remarked that it might help, but, he added, that apparently as long as it (liquor) is made those who want it will get it somehow.

The Forest Standard is placing a Linotype typesetting machine in its office. The Guide-Advocate extends congratulations, hoping The Standard will experience the same innumerable joys and thrills we have received from ours in the past few months. months

COULD NOT SLEEP

Halifax, N. S.:—"I was in a run-down nervous condition for over two years, had been treated by several doctors and only found temporary relief. I could not sleep at night my heart palpitated so, and I was almost straid to close my eyes. Being peasuaded, I wrote and stated my symptoms to the Medical staff at Dr. Pierce's Invalidat Hotel in Buffalo, N. Y., I was advised to use Dr. Pierce's Golden Medical Decovery with the "Favorite Prescription' and the 'Pleasant Pellets'. I did so with the very best results. I could sleep and became my natural self again. I certainly recommend Dr. Pierce's medicines to all sufferent for they have done for me what doctors failed to do and they have saved me doctor bills, too."—MRS. JOHN HOMANS, Clame Harbor.

Toronto, Ont .: "For over thirty yes I have been a user of Dr. Pierce's Pleas Pellets. I have taken them for liver trou constipation and sick-hea aches and they always gave me the rel wanted. I am sure the 'Pleasant Pellets have saved me many a sick spell. I can highly recommend them."—MRS. HAN-'NAH BOWNESS, 60 Strange St.

SUIT WITH LARGE POCKETS

An advance style showing a beautiful suit in white pongee, collar and cuffs of black satin, with outstanding pockets lined with black; large buttons and hat to match which is also in black satin under a white crown.

NET AND ORGANDIE IS LIKED

Combination Predicted as Strong Summer Favorite—Dresses of Gingham on Wane.

Combinations of organdie and taffeta continue to be very much approved. Another fabric combination that is being developed for summer is net and organdie. Both white and colored nets are smart for summer frocks and either plain white or col ored net may be trimmed with hands or insets of crisp organdie in contrasting co'or with excellent results. Organdie has the effect of giving a net dress more character than an all net one possesses. Some flowered cotton nets are also among the dainty summer fabrics. They are frequently made up over taffeta in plain color as dance or evening dresses

Dresses entirely of gingham have not had the demand this season that they enjoyed when they were introduced as novelties two seasons ago. Last summer their lease of life was very uncertain. For the coming summer the most charming gingham dresses are those that employ white organdie in their makeup.

A blue and white or pink and white checked gingham may be made guimpe style, with sleeves and upper bodice of organdie, or organdie and gingham may be combined much as taffeta and organdie are.

Safe, Swift

to a Wound or Sore, Pain is Soothed, Inflammation Disappears, and Healing Starts.

Zam-Buk is so penetrative and so powerfully antiseptic and germicidal that anothing case has ever been known like it. This result is attained by the unique character of Zam-Buk's rare herbal ingredients and the scientific way in which they are refined and blended together.

Zam-Buk first ensures that the flesh is medicinally cleansed before healing begins. For instance the cut, scald, burn or wound that is dressed immediately with Zam-Buk never festers.

Likewise, Zam-Buk speedily gets to the root of Skin Disease. There are no "breakings-out" again when Ulcers, Eczema, Poisoned Wounds, Boils, Bad Legs, Ringworm, and Scalp Disease have been treated and cured by the Zam-Buk method.

TRACTORING ON FARMS

A Survey of the Tractor Situation in Ontario.

Many Uses of the Machine on the Farm - Ploughing, Hauling and General Belt Work - Speed a Great Factor In Its Use.

(Contributed by Ontario Department of

N order to secure as complete authentic information as possible concerning the tractor situation in the Province, Messrs. P. C. Connon and J. A. Steele of the Ontario Agricultural College, under the direction of the Physics Department of the College, prepared a questionnaire which was replied to by over one hundred tractor owners in Ontario. As far as possible, all phases of the tractor situation were covered in this questionnaire in order to determine with the greatest possible accuracy information re the future place of the tractor relative to other means of securing power for the farm. The following information backed by the statements of over one hundred farmers owning and operat-ing tractors will possibly be of inter-est both to those owners and to others who are contemplating the others who are contemplating the supplementing, (not replacing) of horse power with tractor power, The chief advantages of the tractor as a power machine would appear to be listed in order of importance as follows: Speed, belt work, work done at the proper time (expecially at the proper time (especially ploughing), labor saving, hot weath-er worker, economy, improved work. The quickness with which work can be accomplished with the aid of a tractor has possibly been given the premier place of importance on the premier place of importance on the above list, due to the necessity of speeding up production during the past five years. This condition is likely to obtain for some years to come until the returning sanity of the nations of the world results in a returning to the principle of seeking happiness from producing and living rather than spings and evicting

rather than gaining and existing.

The saving of hauling costs and the "convenience" of the tractor as a source of power for grinding and silo filling seems to have appealed strong-ly to a large number. Had the significance of the third

mentioned item on the list been bet-ter understood, especially on farms where the land is heavy and difficult to work, it would no doubt have headed the list. Too much stress canneaded the list. Too much stress can-not be laid on this feature of the use-fulness of the tractor. Condition of the soll with respect to tilth is the first and foremost problem to be looked after when greater production is the aim and object of the agri-culturist. culturist.

Had the number of men on the farm been equal to the task, there is little doubt but that the tractors would still be considered mainly as a luxury to be possessed only by those who had made good on the those who had made good on the farm, and not by those who are using it as a means of making good. The fact of his always being "behind with the work" has driven many a man to buy a tractor in order to feel for once in the last five years that he has caught up with the work, and can have an hour to discuss with his neighbor, the letter information relationship.

meighbor the latest information relative to farm or city conditions.

Many men have procured tractors exclusively for the belt work which they are able to do with it. These, combining their own work with some custom work have made the tractor. custom work, have made the tractor

custom work, have made the tractor a paying proposition.

The fact of having work done at the proper time, including early fall ploughing, and getting the crop in during the short available time in the spring is perhaps the most important feature in tractor efficiency. It takes the peak load off the horses and permits the farmer to get rid of the horses which are kept for this purpose.

purpose.

In the majority of cases where tractors are used, it results in a decrease of man labor. There is a wide difference, however, in the estimate made by various individuals as to the saving in man power; and ranges in extent from "making it easier" to a "man's yearly wages." As a hot weather worker the tractor has no rival. Thousands of horses were ruined last year'due to the effect of heat. rival. Thousands of horses were ruin-ed last year due to the effect of heat. The tractor works on regardless of the temperature, and it is, on this account, even more in favor during the hot spring and early fall seasons.

the hot spring and early fall seasons. As far as economy in tractor operation is concerned, there are few farmers who keep accurate records in connection with operating costs, and it is therefore very difficult to give definite information in this respect. In only six cases out of one hundred is there any definite statement made that the tractor is not a

The next few years may see either a marked increase or decrease in the Toronto.

standardize the make of machines which are to hold their place on the Ontario farm. Better design of parts to give greater efficiency and greater accessibility will be necessary if the tractor is going to hold its place as an efficient labor-saving device on the farm.—W. C. Blackwood, O. A. Coljege, Guelph. lege, Guelph.

Live Stock Observations. Under certain conditions fall colts

onder certain controls at course are just as satisfactory as those foaled in the spring of the year.

A little care in handling feed and keeping racks repaired will be more than repaid by the higher grading of the wool in the spring.

THE STORING OF CROPS

How to Keep Over Fruit, Roots, Cabhages, Celery, Etc.

All Specimens Should Be Sound and Healthy-Careful Handling Very Important-Hints on Fall Work In Field and Garden and Among Live Stock.

(Contributed by Ontario Department of Agriculture, Toronto.)

N the storing of roots, tubers, cabbage and celery it is a comparatively simple matter if the materials are sound to begin with. Although the decay-producing bacteria, yeasts and molds are always on these they cannot do any injury until the materials are first damaged in some way as by bruising, heating or freezing. After such injury has been done the decay bacteria and molds are able to feed on the damaged tissue and as a result of this action decay or rot takes place and gradually spreads until all is spoiled. Therefore, in storing roots, tubers,

abbage or celery, it is necessary,—
1st. To have only sound, healthy

2nd. To handle with care so as not to bruise or otherwise damage tissues.

3rd. Store in a cool, well-ventilated place where there will be no dan-ger of either over-heating or freezing. Overheating or freezing will usually kill the living tissue of which the roots are composed, after which they will readily decay as a result of the rapid multiplication of bacteria and

molds in the dead tissue.

In the storing of such fruits as apples and pear: which can be stored without canning we have to prevent the development of molds and yeasts. These are always present on the surface of the fruit. face of the fruit. Bacteria do not damage fruits as they do vegetables or meats on account of the sugar and acid nature of the fruits, which is not satisfactory for bacterial development, but is just what is needed for molds and yeasts. But even molds and yeasts will not develop on sound apples and pears that are properly stored. If, however, the fruit is damaged in the picking, handling or packing, then the bruised spots en that are on the surface to germinate and grow and multiply, and when once they get a start they will con-tinue to spread even through the sound healthy tissue and from fruit

to fruit until the whole pack may be spoiled.

Therefore in the storing of such fruits as apples and pears it is

1. To have only sound specimens.
2. To pack carefully without

2. To store in a cool, well ventilated place where they will neither be overheated nor frozen.—Prof. D. H. Jones, O. A. College, Guelph.

Hints for Field Work In the Fall. Watch every opportunity for ploughing land in preparation for

spring crops.
See that all crops are carefully stored so as to avoid damage in case of an early winter.
When harvesting potatoes for storage or for market be careful to remove as much of the dirt and as

remove as much of the dirt and as many of the small, irregular, bruised or diseased potatoes as possible.

If manure is available it is an excellent plan to spread it over ploughed land and then place the soil into ridges about thirty inches apart by means of a single or double mould-board plough. This preserves the fertility, improves the sub-soil and leaves the land in excellent condition in the spring, especially for cultivaters. in the spring, especially for cultivat-ed crops. Complete all ploughing which is required to be done in the autumn.

When practicable, gather and feed or burn all remnants of vegetable crops and other refuse.

Select in the field from the growing crop some of the best ears of corn for seed for the following spring. When filling the silo the third cut-ting of alfalfa might be mixed with the corn for improving the quality of the silage.

Fall Work In the Garden. Harvest the late cabbage, cauliharvest the late cabbage, cauli-flower and celery; much of this can be put away carefully in storage and held until well on through the win-ter. Slight moisture and 36 deg. F. for roots, dry and cool for onions, and dry 72 deg. F. for winter squash.

well manured and deeply ploughed so as to admit the frost to mellow it. Cut off and burn the asparagus tops, and clean up the rhubarb bed for next year, giving it a coating of

Take up some parsley plants, put them in pots or boxes and allow them-to grow in the house. Some counsel given early: All vines killed by frost should be clean-

od up. Root crops except the parsley and salsify should be taken out before the ground becomes too wet. Squash and pumpkins should be taken out begathered before frosted. On vacant ground sow rye at the rate of three bushel to the acre to give a green for ploughing down in the crop for ploughing down in the spring. Late celery should be hilled up to start the bleaching process before it is put it storage.

October Hints for Live Stock.

Getober Hints for Live Stock.

Feeders can generally be selected to advantage this month.

Dipping ewes and lambs this month will clean them up, and make them comfortable and thrifty during the winter.

If ewes are given good parture they will begin to gain, and be in best possible condition for breeding, ensuring more lambs.

ensuring more lambs. Stables which are swept down and whitewashed after the fall threshing make more sanitary quarters for the

stock during winter. Time Has Tested It.—Dr. Thomas' Eclectric Oil has been on the market upwards of thirty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. It has no equal in the whole list of liniments. If it were double the price it would be a cheap liniment.

NOTICE

NOTICE

Notice is hereby given that a court will be held pursuant to the Ontario Voters' List Act, by His Honor the Judge of the County Court of the County of Lambton, at the office of the Village Clerk, Watford, on FRIDAY, OCTOBER 29th, 1920 at 5.30 o'clock p.m. to hear and determine the several complaints of errors and omissions in the Voters' List of the municipality of Watford for 1920.

All persons having business at the Court are required to attend at said time and place. W. S. FULLER, Clerk of Watford. Dated this 12th day of October,1920. BRONCHITIS

Cats although said to have "nime lives," usually live about fifteen years. The hare, rabbit, and squirrel, if they escape the sportsman's gun, seldom outlive the seventh year. The fox, on an average dies off at fifteen, and the wolf lasts out to twenty years. However, and donkers will years. Horses and donkeys will not years. Horses and conkeys was ab-often exceed twenty-five years, ab-though Copenhagen, the Duke of Wellington's famous steed, lived till twenty-seven. Seme wild horses, how-ever, have even attained sixty years of age. Pigs have been known to live years, and to that period can breed and thrive well. But some extra-ordinary instances are recorded of rams having reached the unlucky thirteen, while a ewe is mentioned by Somerville as having weaned a pair of lambs when shearing and having had two pairs yearly for fifteen years, afterwards producing single lambs for two years more. Cows average fifteen years of age. Bears rarely beyond a score years, and the rhin-oceros has been known to live through that age. Lions are reckoned long lived, but on an average they do not exceed twenty years. There are exceptions, however. Pompey, who died in the Tower of London in After twelve years decreptitude usually commences in dogs, and increases so rapidly that by the four-teenth year they are burdens to themselves and people generally. Do have lived to twenty years of age.

high and very unfair, as I only have a few short drains with outlet into Courtright drain.

Orville Lloyd, owner W½ lot 1, con. 6, sworn said, Assessment too high, as most of my land drains into the Weidman drain.

David Lloyd, owner of E½ lot 1, con. 6, sworn said, Assessment too high. I am assessed for 60 acres, have only 40 acres which drain to the Courtright drain.

Basil Johnston, owner N½ W½3, con. 6, sworn said, Assessment too high as land is not drained. Courtright*drain is outlet for all my lot.

Sutton—Zavitz, that assessment as made by engineer in bylaw authorizing repairs to the Courtright drain be confirmed and Court closed.—Carried.

Sutton—Zavitz, that Council open.

be confirmed and Court closed.—
Carried.
Sutton—Zavitz, that Council open as a Court of Revision on assessment in bylaw authorizing construction of the Acton drain, with Reeve in the chair.—Carried. No appeals.

Loosemore—Lindsay, that assessment as made by engineer in bylaw authorizing construction of the Acton drain be confirmed and Court closed that bylaw be read a third time and finally passed.—Carried.

Bylaw submitted and read, authorizing the levy and collection pro rata the sum of \$505.19 from off lands and roads assessed under bylaw No. 16 of 1917 authorizing repairs to the McEachern drain.

Loosemore—Zavitz, that bylaw be read a third time and finally passed.—Carried.

Bylaw submitted and road guthay

-Carried.

Bylaw submitted and read author-

Bylaw submitted and read authorizing repairs to the Smith drain and to borrow on the credit of the municipality the sum of \$3560.00 for completing the same.

DRAWING ON YOUR

RESERVE STRENGTH This is What Thousands of People Throughout the Country Are Doing.

Thousands of Canadian housewives are working from day to day on their nerve. They are daily drawing more nerve. They are daily drawing more and more on their reserve strength, knowing full well that they are using up that vital force which often means life or death in the crisis of disease. They are the victims of a feeling of hopeless exhaustion after the performance of even the small tasks which were once the simplest and easiest parts of the day's work. They find the appetite failing, sleep is disturbed and unrefreshing; they lose weight, and always feel tired and depressed. In this condition a blood-building tonic is needed to restore health and activity, and for store health and activity, and for this purpose Dr. Williams' Pink Pills are unsurpassed. Often the trouble will have progressed to a point which makes full recovery slow, but the treatment should be persisted in and renewed health and activity will be

the result.

The case of Mrs. W. Schooley, R.

R. No. 2, Tilsonburg, Ont., well illustrates the value of Dr. Williams' Pink trates the value of Dr. Williams' Pink Pills in cases of health breakdown through weak, watery blood. Mrs. Schooley says: "For upwards of five years I felt my strength declining, until at last I could not do light chores "around the place. Then a doctor was called in and after doctoring about a month he said that only an operation would help me. I did not feel like going through this, and decided that in any event I would wait a while. I had no appetite, often had headaches accompanied by dizzy spells; several times I had fainting spells, and my legs would swell, and I could not even sweep a floor without resting several sweep a floor without resting several times. Again a doctor was called in and he said the trouble was general and he said the trouble was general debility and nervous breakdown. The treatment however did not help me, and then one evening as my husband was reading the paper he came across a case in many respects similar to mine, cured through the use of Dr. Williams' Pink Pills. The next day he got me a supply of the Pills and to their continued faithful use for several months I owe my present splentheir continued faithful use for several months I owe my present splendid health. I may say that soon after beginning the use of the Pills I felt a gradual improvement in my condition, my appetite improved, I began to feel rested after a night's sleep and I gained in weight. My friends were continually expressing surprise at my improved condition, as it was generally believed I had become a chronic invalid. I always take a delight in telling them that Dr. Williams' Pink Pills are responsible for my present good health, and as they have been a real blessing to me Ishall always continue to praise them."

If you are suffering from any con-

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will im-

You can get these through any dealer in medicine, or they will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

THOUGHTS ON MY FRIEND ROBERT O. SPALDING

Who Died September 11th, 1920. Dear friend and brother, how I miss

thee,
One whom I learned to trust,
We miss thee in the Bible class
We miss thee in the pew we pass,
We miss thee everywhere! Alas!
The best of us is dust.

When we discovered what we liked,
And found we had a friend,
We had not time to say goodbye,
Almost like lightning from the sky, It caught our prize and passed us by, And stunned us at the end.

But Oh, we're glad we ever met
And had communion fine,
Basked in the sunshine of his grace,
Within his heart we held a place,
Enriching us; while we could trace
Some features that's divine.

Those high ideals that he loved, And valued very high; His soul has gained that blessed height,

His eye must revel in that light, His faith has won? and lost in sight, He knows the reason why. Our friends are passing on before,

We sadly say goodbye,
We could not ask them back again
To suffer the old ache and pain,
Although we wished them to remain
They're better far on high. Tis us, the living, that's bereaved,

We have the wounded heart, We feel the burden of the years, Experiencing a vale of tears,
The worries, cares, and many fears,
We also would depart.

W. B. LAWS. Watford, October 11th, 1920.

GRAHAM-McINTYRE

On Wednesday, October 6th, at the home of the bride's parents, the mar-riage took place of Elva, the younger daughter of Mr. and Mrs. Malcolm McIntyre, of Napier, to Mr. Stanley, Graham, of Brooke. Rev. Wm. Mae-kintosh performed the ceremony in the presence of immediate relatives and friends. The bride was dressed in white crepe de chene with bridal in white crepe de chene with bridal veil and was unattended. The wedding march from Lohengrin was played by Mrs. Wm. Mackintosh. Following the ceremony a bountiful dinner was served, and later the bride and groom left to spend the honeymoon in Michigan, Mrs. Graham traveling in a taupe suit with hat to match and fox fur. On their return Mr. and Mrs. Graham will take uphousekeeping on the groom's farm in housekeeping on the groom's farm i

Protect the child from the ravages of worms by using Mother Graves Worm Exterminator. It is a standard remedy and years of use have enhanced its reputation.

Cream the butter with the sugar" the Cook-Book says

H, come on, Mabel, I want to go shopping. It needn't take all afternoon to make a cake! Here, let me cream the butter and sugar. Watch how quick I can do it! If you'd ever used Lantic before you'd realize how quickly a fine sugar

Lantic is a quick-acting sweetener, because it is fine. It distributes the pure cane sweetness speedily, thoroughly and economically. It saves time in the preparation of cakes, puddings and sauces, in the cooking of preserves, in the making of candy, in the sweetening of beverages, hot or cold. Not whiter are the snowy doilys and servicettes on the mahogany table than the tiny crystals of Lantic that distance and distance and the same and carried that gleam and glisten in the sugar bowl. Not finer is the silver with its hall-mark. Yet, in homes where every penny counts, Lantic goodness helps in the saving. It does go farther!
