THE
Canadian Agriculturist,

AND

JOURNAL OF THE BOARD OF AGRICULTURE

OF UPPER CANADA.

VOL. XI.

TORONTO, JUNE, 1859.

No. 6.

THE SEASON.

We have had an unusually mild and early spring, resembling in many respects the ordinary characteristics of the season in the old country. Ploughing and farm work generally, commenced in March, that and the succeeding month being unprecedentedly mild and open, enabling farmers and gardeners to get in their crops early and in excellent condition. The season for transplanting trees, &c., in spring, is usually very short in Canada, but this year it has been extended to twice its ordinary length, and all such kinds of work have been done not only early but in good order, with the best prospects of success. The greater part of May, however, was in some parts of the Province very dry, so as to create fears for the Hay crop. And, as is not unfrequent in very early springs, considerable damage was done in some localities to the young fruit-blossoms by the night frosts. This, however, appears to have been partial, and on the whole the prospect of the fruit, and particularly of the grain crops, was highly promising. A large breadth of early potatoes was sown in April and May, and the temperature being high they soon vegetated and attained to considerable growth. The high winds and cold rains the latter part of May, arrested the progress of vegetation. Friday and Saturday, the 3rd and 4th of June, were particularly cold, boisterous and unpleasant days, while during the night of the latter a frost occurred, which for suddenness and severity has not been equalled in the month of June for the last twenty years. Thermometers in several different situations, registered from 3 to 6 or 7 degrees of frost during that fearful night. The consequence was that all kinds of tender vegetation were completely cut down. Potatoes, Indian corn, tomatoes, &c., where sufficiently advanced above ground, were nothing but a blackened and shrivelled mass under the bright sky of the next day. Even the young currants were frozen and bleached, and the tender leaves of the ash, hickory, American creeper, and other shrubs were blackened. Tender flowers shared the same fate, as, we presume, must likewise the hop. So severe in some situations was the frost that cucumbers, &c., protected by matting, suffered considerably. The weather has since continued cold and ungenial, with night frosts of less severity. At the time we are writing, (June 13th) there are symptoms of a change, the temperature is rising, and showers are copiously falling.

This frost appears to have extended over a large area of this continent—from the States of New York, Ohio, Michigan, Illinois, Wisconsin, &c., we get similar intelligence. The market gardeners, whose profits mainly depend upon early vegetables, will be the greatest sufferers; and it will not be possible by any subsequent measures they can adopt, to repair fully the loss. The injury done to fruit will prove, we fear, extensive, and also to Indian corn. Wheat and other kinds of grain have of course suffered much less—and there is still good reasons for hoping that these will prove abundant. In some sections of the Province symptoms of the wheat midge have shown themselves, and every day people will be anxiously waiting for intelligence on this important, and we might say exciting topic. The hay crop, there is reason to fear, will fall below an average, but there is yet time for farmers to mitigate the effects by sowing a larger breadth of turnips. With favorable weather for the future, an abundance may yet be in store for us.

HAYMAKING.

In consequence of the late ungenial weather, the grass crop will neither be so early nor abundant, as was at one time anticipated. The clover plant in some situations is weak and thin; having been winter killed for want of a sufficient covering of snow. Where the latter was present during the severe frosts in February, the ground in good heart, and sufficient seed had been sown, the grass will generally be found a fair crop. It is of importance therefore, to the stock farmer in particular, that the grasses should as far as possible, be converted in the surest and readiest manner into sound and nutritious hay.

With the appliances which the modern agricultural mechanic affords the farmer in the way of improved mowing machines, horse rakes, &c., the task of making grass into hay has of late years become more easy, certain and expeditious. The old system was both troublesome and expensive, and the results not unfrequently problematical. Now, by putting into requisition the modern improved implements, when the barometer and other indications denote a settled state of the weather, a large breadth of grass may, in a few days, be safely housed as hay, affording healthy sustenance to live stock during our long and commonly inclement winters.

A very frequent error is committed in allowing the grasses to become too old before cutting. The reason assigned for this practice is that the largest weight of hay is thereby obtained. Even as to mere weight the practice is very questionable; while the quality has been deteriorated to an extent which few can understand. The true rule for cutting the grasses, whether it be timothy, clover, or any other kind, is when they are in full bloom. It is when they possess the largest amount of those nourishing ingredients which sustain the health and promote the growth of stock. To allow the seed to form and ripen before cutting, and which is often shaken out in the field and lost in the process of curing, a large portion of the starch and sugar becomes changed into woody fibre in the thick cuticle of the stem, a substance containing but very little nourishing power.

In our extremely hot weather, hay, during the process of making, is often exposed too much. Much shaking is injurious, particularly to clover, the leaves of which are so liable to fall off. No more shaking and exposure should be permitted than are absolutely required to effect the necessary evaporation, to prevent the hay fermenting too much when put into the rick or barn. Hay is always more or less injured by being allowed to be spread abroad during the night,

Our copious dews are as injurious to it as a slight shower. It ought always to be left either in windrows or cocks; the latter being safer. The practice of salting hay in the mow is to be commended, particularly when it has sustained injury by wet during the process of making.

THE SUMMER FALLOW

The practice of fallowing land for the cereal crops is of very ancient date, going back to the most remote periods of history; and it is still a practice very generally followed by all agricultural nations in the present day. Of its benefits in general, when properly performed, experience leaves no doubt. The soil by being pulverized, absorbs ammonia from the atmosphere, becomes cleared of weeds, and by the disintegration to which it is subjected by repeated ploughings, harrowing, &c., yields up into a free state, potash and other valuable ingredients, constituting the essential food of plants. In Canada by far the greatest portion of winter wheat is raised upon summer fallows. It becomes then to the practical man a question of very great moment, whether this important operation is in general so thoroughly performed as an advancing agriculture and a constantly and rapidly increasing population demand.

We are not unaware of the fact, that of late years an opinion has been gaining ground both in Europe and America, that the naked fallowing of land is a wasteful and unprofitable practice; denoting indeed a stationary rather than an improving condition of husbandry. The introduction of root culture and the drill, has no doubt superseded, at least to a very great extent, the necessity of a whole year's fallow, especially upon the lighter soils, and in such a climate as the British Isles, where turnips, mangold wurzel, &c., yield a heavier and more certain crop, and butcher's meat fetches a much higher price than is the case in any portion of this continent. In England, however, upon the heavier soils, it is still found necessary every few years to subject the land intended for wheat to the cleansing and renovating process of a naked fallow, which is usually done in a thorough and expensive manner. Three or four deep ploughings, with scarifying, rolling, &c., with a liberal dressing of manure, are frequently given; a circumstance that will go a long way to account for the production of the forty and fifty bushels of wheat per acre that are frequently obtained from land which has been subjected to arable culture for centuries.

In order to render the growth of wheat more certain and remunerative in Canada, it is essential that our summer fallow should be more thoroughly prepared. Instead of two, or at the most three, superficial ploughings, with portions of the ground often left unmoved, it would be far better to expend double the amount of labor in effecting a more deep and thorough culture, which would greatly obviate the necessity of so frequent a recourse to the fallow as a means of renovating and preparing the soil for wheat. Upon our lighter soils, where root and clover crops are grown to any considerable extent, accompanied by the fattening of sheep, naked fallows as on similar soils in Europe, may be in a great measure dispensed with, and the land kept clear and in good heart. But in the stiffer soils, especially where they have been superficially cultivated and over-cropped, and, as a consequence filled with weeds, a deep ploughing before the frosts of winter set in, leaving the surface as rough as possible, is an excellent commencement for the next summer's fallow. In dry, hot weather, (for clay land particularly, ought never to be worked when in a wet state,) a good cultivator or grubber, drawn by three, or if need be, four, stout horses, to the depth of ten or twelve inches, would be more effectual and beneficial than half a dozen ordinary ploughings. Steam, there is now reason to hope, will, ere long, supply us with a cheaper and more efficient power for accomplishing this and other purposes.

Our farmers should never forget that the cultivation of wheat can never be made profitable on *wet* land. In such circumstances *draining is absolutely essential*. This, with clear cultivation, judicious manuring, careful selection of seed, and a rational system of rotation, would undoubtedly make wheat-growing and indeed all our other crops, far more certain and profitable than they now are, and would go a long way in banishing those insects and parasites, which, of late years have proved so terribly destructive.

THE PROVINCIAL EXHIBITION.

The Prize List for the Fourteenth Exhibition of the Provincial Agricultural Association of Upper Canada appears in the present number. Notwithstanding the great depression in every branch of business throughout the Province, and the consequent possible falling off in receipts at the fair, the amount offered in prizes remains the same as last year, being the large sum of nearly Twelve Thousand Dollars. Some slight changes have, however, been made in the details of the list. The Kingston Local Committee with the active and zealous President of the Association, Wm. Ferguson, Esq., at their head, are setting to work most vigorously, and will, no doubt, have every desirable preparation made in ample time. They propose to expend some Fifteen Hundred Pounds in the improvement of the permanent Exhibition Building already existing there, and in the erection of other buildings and permanent cattle pens, and in the arrangement of the grounds. With the experience gained upon former occasions, there can be little fear that the Kingston Committee will succeed in rendering the arrangements in every respect satisfactory to exhibitors and the public.

THE GOVERNMENT GRANT TO COUNTY SOCIETIES.

We beg again to remind the Treasurers of County or Electoral Division Agricultural Societies, of the important fact, that the affidavit stating the amount of subscriptions in their hands for the year, must be transmitted to the Board of Agriculture, Toronto, on or before the 1st day of July, otherwise they will not be entitled to receive any portion of the Government grant. The document to be addressed to G. Buckland, Esq., Secretary of the Board of Agriculture, Toronto.

Agricultural Intelligence.

The Seventh Annual Exhibition of the United States Agricultural Society will be held within the environs of Chicago, on the 12th of September.

JUNE FROST.—The accounts of injury to early vegetables from the frost of Sunday morning, 5th inst., are very general from all parts of the Province and the adjoining States.

The Sandwich *Maple Leaf* says the frost has done an immense amount of injury to the corn crop throughout the County of Essex, in some places rendering it necessary to replace whole fields, which, it is so far fortunate, can still be done with prospects of success.

The main dependence this year of the farmers in that section is on their crop of corn, which is by far the largest ever planted there and a failure would prove a very serious matter.

Sales of the new wheat crop, harvested in the Southern States, were made at New York and St. Louis the first week in June.

DESTITUTION.—A Fergus correspondent of the *Guelph Advertiser* says it is truly distressing to witness the destitution and want prevailing in the more recently settled townships of the County of Wellington. Many of the inhabitants are dependent on the products of their cows and the herbs which they gather for the principal part of their subsistence. It is encouraging however to learn, that after all the scarcity of seed the farmers have sown bountifully, and at present there is good ground to hope that they will also reap bountifully.

THE CROPS.—From all parts of the country the reports of the appearance of the incoming crops are very gratifying. The very extraordinary occurrence of so severe a frost, as that of Saturday night 4th, or Sunday morning 5th inst., was no doubt very damaging to tender vegetation, but we believe that the fears expressed of injury to the wheat and other principal field crops, are, except in very few instances, unfounded.

The Halifax, (Nova Scotia,) *Morning Journal* says that the season has been so far, in that Province, one of the most favorable ever known for bringing forward the growing crops. It is asserted by many that vegetation is on the whole more advanced this year by three weeks earlier than in 1858. The hay harvest promises an early as well as an abundant yield.

THE MIDGE.—The St. Catherines *Constitutional* says that the Midge has been already detected there this season in immense numbers.

INDIAN CORN.—The Windsor *Herald* of June 2d says, "that Mr. M. G. Fox of Gosfield had planted 45 acres of this crop. We have learned since that Mr. Fox has been distanced by Mr. W. C. Muckle of the Township of Malden who has planted 61 acres, and two of his neighbors have planted, one of them 30 and the other 40 acres. Essex this year will be celebrated for corn should the weather continue as favorable as it is at present."

BARLEY IN THE WEST.—Some of the newspapers state that in the County of Kent, the world has completely destroyed whole fields of barley, which is an important staple in that region. A Detroit paper states that one farmer has ploughed over a field of twelve acres, and that others are pursuing the same course, and sowing with millet.

The Stratford *Beacon* states that Mr. John Ballantyne, of Downie, one of the most enterprising Agriculturists in the County, has imported a quantity of bone dust, with which he intends to sow Turnips. This appears somewhat singular, in connection with the fact that Mr. Lamb, who has a mill in this city, has been upon the point of exporting his bones to Europe for want of a market in this country.

Horticultural.

The first show for the season of the Toronto Horticultural Society, was held on June 2d, and was highly successful, there being a large variety of plants, flowers, and early vegetables exhibited, and all or nearly all of them in excellent condition.

REMEDY FOR THE CURCULIO.—The New York *Observer* publishes the following recipe:—"To one pound of whale oil soap, and four ounces of flour of sulphur. Mix thoroughly, and dissolve in twelve gallons of water.

"To one half peck of quick-lime, add four gallons of water, and stir well together. When fully settled, pour off the transparent lime water, and add to the soap and sulphur mixture:

"Add to the same, also, say four gallons of tolerably strong tobacco water.

"Apply this mixture, when thus incorporated, with a garden syringe, to your plum and other fruit trees, so that the foliage shall be well drenched. If no rains succeed for three weeks, one application will be sufficient. Should frequent rains occur, the mixture should be again applied until the stone of the fruit becomes hardened, when the season of the curculio's ravages is past."

FIRST FRUIT OF THE SEASON.—Ripe Strawberries were gathered in the gardens and fields in the neighborhood of Toronto about the 4th of June.

EFFECTS OF THE FROST IN THE UNITED STATES.

BUFFALO.—A heavy frost occurred in this vicinity last Saturday night—it is feared doing heavy damage to the fruit. Accounts from the country towns report the crops badly damaged, and, it is feared, extremely ruined.

CLEVELAND.—There were heavy frosts in this region on Saturday night, and it is feared that the wheat crop throughout northern Ohio is rather badly injured, or wholly destroyed. Corn, grapes, and potatoes are badly frozen.

DANSVILLE, N. Y.—A heavy frost prevailed in this vicinity on Saturday night, killing all the garden vegetables, corn, and potatoes. It is feared also that fruits of all kinds have been cut off.

Miscellaneous.

TIMES GO BY TURNS.

An English Jesuit, Robert Southwell, wrote the following lines of much merit, two centuries and a half ago. The philosophic strain pervading the piece is worthy of admiration.

The lopped tree in time may grow again,
 Most naked plants renew both fruit and flower;
 The sorrest wight may find relief from pain,
 The dryest soil suck in some moist'ning shower.
 Times go by turns, and chances change by course,
 From foul to fair, from better hap to worse.

The sea of fortune doth for ever flow,
 She draws her favors to the lowest ebb;
 Her tides have equal times to come and go,
 Her loom doth weave the fine and coarsest web.
 No joy so great but runneth to an end,
 No hap so hard but may in time amend.

Not always fall of leaf, nor even spring;
 No endless night, nor yet eternal day;
 The saddest birds a season find to sing,
 The roughest storm a calm may soon allay.
 Thus with succeeding turns God tempereth all,
 That man may hope to rise, yet fear to fall.

A chance may win that by mischance was lost;
 That net that holds no great, takes little fish;
 In some things all, in all things none are crossed;
 Few all they need, but none have all they wish.
 Unmingled joys here to no man befall;
 Who least, have some; who most, hath never all.

FIRES IN THE WOODS.—The Woodstock, (New Brunswick,) *Journal*, of May 19th, says the extraordinary dryness of the season in that Province has led to the occurrence of extensive fires in the woods, charging the atmosphere with smoke, and thus adding still more to its drying and parching nature. Those fires have in places spread into the clearings, and destroyed buildings. The absence of rain or any other meteoric inter-ruption, however, enabled farmers to push forward their spring work with unusual celerity.

THE ENNISKILLEN OIL.—The London *Free Press* learns that Professor Croft has succeeded in deodorizing the natural oil found in the County of Lambton. Its illuminating qualities are excellent, but it had an unmistakable effluvia. That removed, no obstacle remains to its use, and as the proprietor, Mr. Williams, has already secured some 30,000 gallons in its crude state, it is believed that it will soon be on sale. It is estimated that the supply will be amply sufficient for the wants of all the consumers in the colony, and will form an item of domestic manufacture of no mean kind.

FOURTEENTH EXHIBITION OF THE
PROVINCIAL AGRICULTURAL ASSOCIATION,

TO BE HELD AT KINGSTON,

On Tuesday, Wednesday, Thursday, and Friday, September 27, 28, 29, 30.

RULES AND REGULATIONS.

"The Members of the Agricultural Societies of the several Townships within the County or Electoral Division or United Counties wherein the Annual Exhibition may be held, and the members of the said County or Electoral Division Society, shall be also members of the Association for that year, and have members' tickets accordingly: provided the Agricultural Societies of the said Townships, or the Societies of the said County or Electoral Division or United Counties, shall devote their whole funds for the year, including the Government Grant, in aid of the Association. The Office bearers of all County Societies shall have tickets of free entrance during the Show.—*By-law.*"

1. The payment of \$1 and upwards constitutes a person a member of the Agricultural Association of Upper Canada for one year; and \$10 for life, when given for that specific object, and not as a contribution to the local funds.

2. No one but a member will be allowed to compete for prizes except in classes 25, 35, 41, 43.

3. All Entries must be made on printed forms, which may be obtained of the Secretaries of Agricultural Societies, or of Mechanics' Institutes, free of charge. These forms are to be filled up and signed by the exhibitor, enclosing a dollar for membership, and sent to the Secretary of the Association, Board of Agriculture, Toronto, on or before SATURDAY SEPTEMBER 10, after which no entries can be taken except in the Horticultural and Ladies' Departments and Foreign classes.

Exhibitors in these Departments may enter articles up to Monday Evening, September 28, when the Books will be finally closed.

4. *Blood Horses and Thorough-bred Cattle* must be entered, and have their full pedigrees properly attested and sent to the Secretary in Toronto, *not later than Saturday, September 10th.* No animals will be allowed to compete as pure bred, unless they possess regular Stud and Herd Book pedigrees, or satisfactory evidence be produced that they are directly descended from such stock. In the class of Durham

Cattle, particularly, no animal will be entered for competition, unless the pedigree of the same be first inserted in the English or American Herd Book, or in the Upper Canada Stock Register, kept at the office of the Board of Agriculture.

5. Tickets from the Treasurer's Office will be furnished each member, which will admit himself only, free to every department of the Exhibition, during the Show. Life members admitted free.

6. Tickets of admission to those who are not members, 25 cents each time of admission. Children under 14 years of age, half-price. Carriages, including drivers, \$1; passengers to pay 25 cents each. Horsemen to pay 60 cents each admission.

7. Every article, other than live stock, exhibited for competition must be the growth, produce, or manufacture of Canada, except in classes 35 and 50, Live Stock, except in class 25 must be the *bona fide* property of persons residing in Canada, and must be exhibited in the name of the owner only. All premiums for articles, except Stock, are to be awarded to the *manufacturers or producers only.*

8. Articles for Exhibition must be on the grounds on Monday, except live stock, which must be there not later than Tuesday at noon.

9. Discretionary Premiums will be awarded for such articles as may be considered worthy by the Judges, although not enumerated in the List, and the Directors will determine the amount of premium.

In the Fine Arts and Mechanical Department, Diplomas will be awarded—in addition to the money prizes—to any specimen evidencing great skill in its production, or deemed otherwise worthy of such a distinction, on its being recommended by the Judges and approved of by the Committee to whom all such matters shall be referred.

In the absence of competition in any of the Classes, or if the Stock or articles exhibited be of inferior quality, the Judges will exercise their discretion as to the value of the premiums they recommend.

10. The Judges, Competitors, and Officers of the Association, only, will be permitted to enter the Show Grounds, until 12 o'clock on Tuesday 27th, at which hour and during the whole of Wednesday Members will be admitted. Non-Members will be admitted on *Thursday and Friday mornings* after 8 o'clock.

11. No articles or Stock exhibited will be allowed to be removed from the grounds, till the awards are made, without the permission of the President, under the penalty of losing the premiums. An Auctioneer will be on the ground after the premiums are announced, and every facility afforded for the transaction of business.

12. Delegates, Judges and Members of the Press are requested and expected to report themselves at the Secretary's Office, immediately on their arrival.

13. The Judges are to meet at the Secretary's Office on the Grounds, on Tuesday, at noon, to make arrangements for entering upon their duties.

14. The Annual Meeting of the Directors of the Association, will take place on the grounds on Friday morning at 10 o'clock.

15. While the Directors will take every possible precaution, under the circumstances, to

ensure the safety of articles sent to the exhibition, yet they wish it to be distinctly understood that the owners of the articles must themselves take the risk of exhibiting them; and that should any article be accidentally injured, lost or stolen, the Directors will give all the assistance in their power towards the recovery of the same, but will not make any payment for the value thereof.

16. The Treasurer will be prepared to commence paying the premiums on Saturday, 1st October, at 9 a. m., and parties who shall have prizes awarded them are particularly requested to apply for them before leaving Kingston, or leave a written order with some person to receive them, stating the articles for which prizes are claimed.

The Local Committee will make arrangements with Steamboat and Railroad proprietors for carrying articles and passengers at reduced rates.

N.B.—In case the Directors shall require any particular information in reference to animals or articles taking first prizes, the owners will be expected to transmit it, when requested to do so.

Provender will be provided by the Association for live stock at cost price.

PRIZE LIST.

DEPARTMENT FIRST.

LIVE STOCK, AND AGRICULTURAL AND HORTICULTURAL PRODUCE AND IMPLEMENTS.

HORSES.

Sect.	CLASS I.—BLOOD HORSES.	\$ c.
1.	Best thorough-bred stallion.....	40 00
	2d do.....	25 00
	3d do.....	12 00
2.	Best thorough-bred 3 years old stallion.....	22 00
	2d do.....	14 00
	3d do.....	7 00
3.	Best thorough-bred 2 years old stallion.....	14 00

	3d do.....	2	00
	4th do.....	1	00
7.	Extra Entries.		

DIPLOMAS will be awarded to the breeders or importers of bulls and stallions which take first prizes, when their names and residences are given.

The Judge shall ascertain, in deciding on bull calves in any of the foregoing classes, whether the animal has been suckled or raised by pail, and make allowances accordingly.—The exact age of young animals must be stated on the cards, and will be taken into consideration by the judges in making their awards; and any person understating the age of an animal will forfeit the premium to which he might otherwise be entitled.

A certificate to be produced to show the breeding of animals in class ix.

Young cattle may compete if the exhibitor think fit, in an older class than that to which they properly belong; but no animal will be allowed to compete in more than one of the foregoing sections.

An animal will not be allowed to compete as a three-year old cow unless it has had a calf, but a two year old having had a calf will be allowed to compete as a two-year old heifer, if the owner thinks fit.

Prizes will be awarded to animals of other breeds than those above mentioned, if deemed worthy.

CLASS X.—FAT AND WORKING CATTLE, ANY BREED.

1.	Best fat ox or steer.....	30	00
	2d do.....	20	00

Prizes the same as in Class XVIII.

CLASS XXII.—IMPROVED BERKSHIRES.

Prizes the same as in Class XVIII.

CLASS XXIII.—ALL OTHER SMALL BREEDS.

Prizes the same as in Class XVIII.

In the classes of Pigs, the *precise age* of the animal is to be *stated on the cards*.

With the view of encouraging largely the importation of improved stock, the exhibitor of any male animal imported into this Province from Europe since the last Exhibition, which shall take the first prize in any of the above classes, will be paid three times the amount of the premium offered in the list; the exhibitor of any female animal imported from Europe within the same time taking the first prize will be paid double the amount offered; the exhibitor of any male animal imported into the Province from any part of America within the same time, taking the first prize, will be paid double the amount of prize offered; and of any female animal imported within the same time, and taking the first prize, one-half in addition to the amount of prize offered in the list. Such animals to be the *bona fide* property of persons residing in Upper Canada. Satisfactory evidence must have been given at the time of making the entry that the animal has been imported within the time named, or the increased prize will not be paid.

CLASS XXIV.—POULTRY, &C.

CLASS L.—FOREIGN MANUFACTURES.

Foreign articles will be admitted for Exhibition only; but certificates will be awarded to any articles of worth or peculiar merit.

ABSTRACT OF THE REPORT OF THE COMMISSIONER OF CROWN LANDS.—In Lower Canada, in 1858, there were sold 49,143 acres of Crown Lands for \$22,249. Of Clergy lands 4,116 acres were sold for \$3,809. The net revenue from the Crown Domain was \$5,663. In Upper Canada there have been sold, of Crown Lands, 121,603 acres for \$138,693, of Clergy Lands 2,581 acres, for \$58,762, of Grammar School land, 5,644 acres for \$11,469, of Common School lands 3,571 acres for \$9,930. In Upper Canada there have been granted gratuitously 55,700 acres; in Lower Canada 1,100. The amount of revenue accruing from ground rents, timber dues and slides, (all Canada) was \$232,642. A mining license on the level of Lake Superior was taken at \$100. The condition of the settlers on the free grants in Upper Canada is prosperous. The whale fisheries of the Gulf have been very productive; the cod fishery moderately and steadily successful; the seal catch defective; the porpoise fishery fair; the mackrel and herring fishery less productive than in several previous seasons. The Ordnance Lands transferred to the Province have an area of 90,000 acres. Lands have been ordered to be surveyed (and sold at public competition) at Amherstburg, Chatham, Lyons Creek, Chippewa, Queenston Heights, Niagara Town, Pelham Farm, Shorthills, Burlington Heights, Prescott and Cornwall (all in Canada West). Also at Three Rivers, Laprairie, St. John's, South River, Chambly, Chateauguay, and Coteau du Lac, (in Canada East.) Water powers are to be opened up on the Rideau Canal. The revenue from this source has been \$15,127, and the expenditure \$310, exclusive of a refund to the War Department for arrears erroneously collected for that Department in 1857 of \$7,362. The totals at the end of the work shew:

Total Receipts, considered as Revenue, 1858.....	\$376,599 00
Total disbursement, do.....	253,159 00
Excess of receipts.....	\$123,440 00

COLLECTIONS, 1858.

Clergy and School Lands.....	\$271,293 00
Total Collections.....	618,455 00

MILD AND ASTRINGENT DRINK FOR A HORSE.—Take, Peruvian bark, in powder, one ounce; gentian root, in powder, half an ounce; nitre, one ounce; spirit of vitriol, half a drachm. To be given in a quart of warm ale, every morning, fasting, for three or four times, or longer, if necessary.
