WATSON & CO.'S, - - - Corner Charlotte and Union Streets.

OUR FATAL ERROR.

The GREAT AND GLORIOUS GROWTH of our business during the past twelve months made us no longer the little firm we were in 1879. We could no longer do the 14 three miles in this vicinity, and remember that some people through rain or exposure or some other cause would continue to wear the old hat and shoe and clothing store and say the old hat store was the best.

POPULAR 20TH CENTURY STORE, 12 CHARLOTTE STREET.

DeFOREST, THE TAILOR.

RUBBER GOODS. Ladies' Cape Waterproof Cloaks. Gents' Trench Waterproof Cloaks. Gents' Rubber Coats. Boys' Rubber Coats. RUBBER LIP. Rubber Boots and Hats.

LAURANCE SPECTACLES are the only ones I can see properly with. W.C. Rudman Allan's CHEMIST AND DRUGGIST, WEST ST. JON.

FRANK S. ALLWOOD, 170 Union Street.

THE LIBERAL PRESS AND THE GLOBE

It is a curious feature of the life of this city that two of its newspapers, the Globe and Telegraph, which enjoy the support of the business public...

The Liberal Press and the Globe are both published in Saint John, N. B., and both have a long history of service to the community.

The Liberal Press is known for its independent journalism and its commitment to the public interest.

The Globe is a well-established newspaper with a reputation for accuracy and reliability.

Both newspapers play a vital role in the life of Saint John, providing news and information to the residents.

The Liberal Press and the Globe are both committed to providing high-quality journalism and service to the community.

The Liberal Press and the Globe are both proud to be part of the Saint John community and to serve its needs.

The Liberal Press and the Globe are both committed to the highest standards of journalism and service.

The Liberal Press and the Globe are both committed to providing high-quality journalism and service to the community.

The Liberal Press and the Globe are both proud to be part of the Saint John community and to serve its needs.

1891 cannot be correct as five in number, and we challenge any enemy of St. John to answer them.

The number of children going to the public schools in the united city has increased from 5,924 in 1881 to 6,815 in 1891, an increase of 891 in school attendance...

The number of families returned to assessment for water rates in St. John North and South—there were no figures for St. John West in 1881, but in 1891 it was 1,150...

The number of houses in St. John has increased from 5,136 in 1881 to 5,900 in 1891, or at the rate of 13 per cent, and these houses are much more fully occupied now than they were in 1881.

The increase in the number of houses in St. John, South has been 228 since 1881, although it is claimed the population of that part of the city has decreased by 1,700.

The post office revenue of St. John derived from the sale of stamps is \$23,274 in 1881 to \$42,214 in 1891, an increase of about 80 per cent, showing that after making due allowance for an increase in the use of the mails, there must also have been a large increase in population.

The opposition met with another defeat last evening being beaten by a majority of 24 in their want of confidence in regard to the sugar duties. It is true that the farce of a meeting of confidence resolutions daily was ended.

We do not quite see the point of the St. John's statement that the opposition is plotting to fall. If we understand the situation aright, the opposition, as an office to be held in a state of collapse ever since the summer of 1878. It fell then in a great ruin and has never risen since. To say that a thing is plotting to fall implies that it is standing up which is certainly not true of the Liberal party.

The silly Telegraph devotes most of its editorial space today to woe and rain. It is intended to discourage the people of this province. As an office to be held in a state of collapse ever since the summer of 1878. It fell then in a great ruin and has never risen since. To say that a thing is plotting to fall implies that it is standing up which is certainly not true of the Liberal party.

It is not long since the first attempt was made to erect a mill in this city. The higher grades in the American market are being taken by the mills of the West. The mill in this city is being erected by Mr. Alexander, who contemplates erecting a large one this fall above the Point, and Mr. David Richardson of the Newcastle, who will build at Newcastle a mill below Campbellton.

Mr. Richardson will have shingles and clapboards. It is the general opinion of things that the mill in this city is being erected by Mr. Alexander, who contemplates erecting a large one this fall above the Point, and Mr. David Richardson of the Newcastle, who will build at Newcastle a mill below Campbellton.

There was a larger yield than that taken from a portion of the farm belonging to Mr. Charles Cope, Englefield, DeL.

The present hay season, he took from a piece of land measuring a little less than one and three-quarters of an acre, fifteen loads of splendid hay, weighing fully eight tons—Bridgetown, P. I.

A strange story comes from Mr. DeL. It tells of a man who has long been a resident of that place, but lately employed in Bala Verde, who has become quite demoralized and has taken to the woods, his only companion being a shot gun and large knife. When discovered by chance, he seemed very much afraid and made off to the woods again, like a wild animal.

Mr. P. J. Mahoney of Melrose, Westford County, shipped a car of sheep to Portland, Me., last week. Mr. Mahoney has entered into partnership with Mr. H. S. Hastings of Portland, for the purpose of handling sheep and they will dispose of one and two carloads every week in the Portland market. Mr. Mahoney says the McKinley Bill has not affected their business in the least. The sheep are shipped from all parts of the maritime provinces and Quebec and Portland where they are slaughtered and the meat sold in that city.

Seventy years ago the farm of Rufus Barnaby in Cornwallis was covered with a heavy growth of timber. At present the place is one of the most highly cultivated and productive in this valley. The farm—a not large one—only six acres, of which it is under cultivation, has now on it not less than two hundred trees of various kinds, many of which are just coming into bearing. This year he expects, besides a large amount of garden truck already gathered, to raise not less than 3,000 bushels of carrots, 800 bushels of potatoes and 400 bushels of onions. The value of the crop is estimated at \$15,000—Kantville Chronicle.

Cereus Purdy, Esq., of Deep River, in Connecticut, is the possessor of a curiosity in the shape of a cow or bullock's horn. It was finely polished and then engraved in a neat hand by the hand of a forgotten artist, for he must have been to have produced so fine a work. A portion of the southern shore of Lake Ontario is a strip of land, the position of the straits in that district, and the course of the Hudson river is traced, giving the name of the straits on it down to Albany, and from the latter place to New York. In addition to these contents of Lake George, the position of Fort Ticonderoga, William Henry and other forts are accurately laid down. In fact, the whole includes a well executed map of considerable portions of the old colony of New York. The printer here does not exceed nine inches in length and is literally covered with fine engravings. The following: "Presented to Gabriel Purdy, Esq., by the author, in 1810." It is said to have been the handy work of a soldier who took part in the battle of the Clouds, and who presented it to the grandfather of the present possessor.

It is a well known fact that the position of the straits in that district, and the course of the Hudson river is traced, giving the name of the straits on it down to Albany, and from the latter place to New York. The printer here does not exceed nine inches in length and is literally covered with fine engravings. The following: "Presented to Gabriel Purdy, Esq., by the author, in 1810." It is said to have been the handy work of a soldier who took part in the battle of the Clouds, and who presented it to the grandfather of the present possessor.

It is a well known fact that the position of the straits in that district, and the course of the Hudson river is traced, giving the name of the straits on it down to Albany, and from the latter place to New York. In addition to these contents of Lake George, the position of Fort Ticonderoga, William Henry and other forts are accurately laid down. In fact, the whole includes a well executed map of considerable portions of the old colony of New York. The printer here does not exceed nine inches in length and is literally covered with fine engravings. The following: "Presented to Gabriel Purdy, Esq., by the author, in 1810."
