

## THE PRISON COMMISSION.

Juvenile Vice and Crime—Importation of Pauper Children is an Undesirable Practice With Payson.

The report of the commissioners appointed to collect information regarding prisons, houses of correction, reformatories, industrial schools, etc., with a view of ascertaining any practical improvements which may be made in the methods of dealing with criminal classes so far as the subject is within the jurisdiction of the Ontario Government, has been presented to the House. It is a volume of 215 pages, exclusive of the reports by the individual members of the commission and the evidence taken. The recommendations are framed in an endeavor to avoid all unworkable theories, being confined to the most advanced and at the same time the most practical methods.

With regard to juvenile vice and crime, the report recommends that the compulsory school laws be rigorously but judiciously enforced, that further measures be passed to secure a proper education for children employed in factories, etc., and that the appointment of trained officers to enforce the law be made compulsory. It recommends that the establishment of one or more industrial schools in every city and large town to receive children who are sent to the reformatory during the day of disorderly or neglected children and for carrying on work of a simple kind for the industrial training of these classes. Cities, towns and villages should be encouraged to pass by-laws forbidding the running at large of boys and girls in the streets after dark as is now done in the County of Waterloo, and in order to furnish amusement and exercise chiefly for such children, suitable play grounds, with gymnasium attached, be provided. Recreational stores, etc., should be rigorously inspected. The importation of children from the reformatory, reformatory, etc., of the Old World to the new world is regarded as fraught with much danger and calculated to swell the ranks of criminals. They, therefore, recommend that precautions be taken to prevent the importation of children of parents known to be criminal, or of children who have spent their whole lives in an atmosphere of vice and crime. The immediate attention of the government should be given to the problem of the accommodation of children whom it may be necessary to place there. The reformatory for boys should be removed to a suitable locality, where the cottage system can be introduced, and the laws should be amended that all boys who are sent to the reformatory should be entirely separated from the male reformatory and one or more industrial schools should be established for the reformatory and one or more industrial schools who have committed trivial offenses. As soon as the girls are removed from the reformatory the interior of the Mercer reformatory should be rearranged so as to provide for a thorough classification of the inmates.

A startling suggestion. With regard to drunkenness, the Government out of the funds derived from fees for provincial licenses should erect in the centre of population one or more industrial reformatories for females. Such reformatory should be near a city and have attached a sufficient area for farming and market gardening, and should be furnished with means for suitable industrial occupations. The first committee should be for a period not shorter than six months, the second for not less than one year and the third for two years. If the families of such inmates be wholly dependent on them for support, a portion of the earnings of such inmates should be paid to them. After a third commitment to an industrial reformatory for inebriation a drunkard be again convicted, he should then be sentenced to the Central Prison for the full term authorized by law.

In the employment of the labor of inmates of jails, etc., what is the "contract system" must be condemned as defective and unworkable. The "piece price" system, though an improvement, is also open to serious objection. The labor of prisoners and inmates should be conducted in a manner which should supply all necessary machinery, plant and fixtures, purchase the raw materials and use the labor in the manufacture of such articles as may be best suited to the needs of the institution. The selection of prison industries, next to such branches of work as technical instruction, which should always receive the first consideration, preference should be given to the manufacture of the largest possible extent of all goods required for the public service.

Respect to the proposal that the Government should assume entire control of the jails, the commission is of opinion that if their recommendations for founding new institutions be acted upon, the control of the more effective management of common jails will be materially changed and simplified. The commission is of opinion that a change should be deferred until it is fully ascertained what effect the changes they recommend will have on the management and discipline of the common jails and the classification of prisoners within.

Receipts from the horse show. The recent horse show given by Mr. W. D. Grand in aid of the Children's Fresh Air Fund netted that worthy charity \$300. The total receipts amounted to \$435.37 and all that Mr. Grand expended for the show was \$135.37, although the arrangements cost the neighborhood of \$1300. The cash receipts at the afternoon performance amounted to \$172 and in the evening \$164. In connection with the success of the show and the subsequent sale, he promises to repeat the show next April on a even larger scale, and it is safe to say that the only trouble will be in securing the crowd that will attend.

Worship in the Pavilion. Cooke's Church congregation, which has worshipped for over 30 years on the corner of Queen and Mutual-streets, will hold their services in the Horticultural gardens during the summer and until their new church is completed. But few congregations have so long a history as this one. It has been a necessity to erect on the old site the church to accommodate the large congregation which has gathered around it and through his great work on Babylon and Nineveh have made him famous.

The Doctor Orders It. Sister Caroline, St. Andrew's Hospital, Claver, Windsor, Eng., says: "I have found St. Jacobs Oil a most efficacious remedy for gout; also for sprains and bruises. Indeed, you cannot say too much in its praise. Our doctor is ordering it constantly." Many physicians use it.

A Great Preacher. Bishop Newman will preach in Trinity Methodist Church Sunday morning and evening and give his famous lecture on "The War of Races" on Monday evening. The great and good Bishop is perhaps the best known Methodist preacher in the world. He has the intimate friendship of the late President Grant, and his long and eloquent pastorate at the Metropolitan Church, Washington, and his extensive travels around the world have made him famous.

Sam Small in Town. The name of Rev. Dr. Samuel Small does not sound so familiar as plain Sam Small. Since the rev. gentleman has become president of the M. E. University at Utah, U.S., he has been commonly referred to as Rev. Dr. Small. He will preach at 8 and 7 p.m. tomorrow in the Auditorium, and through the week will lecture each evening at 8 o'clock.

Severe colds are easily cured by the use of Bick's Anti-Consumptive Syrup, a medicine of extraordinary properties. It is recommended by those who have used it as being the best medicine for colds, coughs, influenza, etc., and it is also a reliable remedy for the throat and chest. Its agreeable taste makes it a favorite with ladies and children.

North End Club. Bengough's Grip will take part in the program of the north end concert on Tuesday evening next, May 5, at the club rooms (Red Lion Block), 719 Yonge-street, Ladies and gentlemen of the North End should not miss hearing him. A good orchestra and vocal music is also promised.

## A NICE HOUND VETERINARY ACCOUNT—Liquor Case.

The action of Hickson v. Clarkson is going to the Court of Appeal, and yesterday the master in chambers made an order for the delivery out of court of the exhibits for the purpose of having them printed in the appeal book.

Chief Justice Galt yesterday handed out judgment in the case of the Queen, a trust W. J. Urquhart, the King-street druggist, ordering that unless Urquhart proceeds with his motion to quash the convictions against him within the first four days of the term he will be convicted on three charges of selling liquor contrary to the act, but after obtaining the removal of the convictions into the High Court took no further steps to quash them.

Judgment was also given in the case of the Queen against Emma Gordon, convicted of selling liquor without a license. The Police Magistrate stated a case for the court at the request of defendant's counsel, but under the act to pursue such a course and refused to entertain the stated case. There is provision made for stating a case under the Summary Conviction Act, a Dominion act, but this does not apply to this conviction, which is made under an act of the Ontario Government. As the police is a municipal corporation, it was given to either side.

Chief Justice Galt yesterday made an order allowing Jane Harrison to mortgage property belonging to her without her husband joining in the mortgage. The application was made by William Harrison, a painter, and in the same year, as the half of her father, received property in Cumberland-street, near Yonge. For over four years Harrison has been confined to his bed, and his wife wishes to raise money on her property.

The same judge yesterday made an order in King v. the municipality of St. Catharines, quashing a local option by-law. Thomas McConnell, veterinary surgeon, yesterday issued a writ against the city, claiming \$2000 and interest thereon. The claim is for examining 1372 horses for the city at the rate of \$1.50 per horse.

The Big Reclamation Scheme. The Ashbridge's Bay Committee met again yesterday. Ald. Havelock presided. Present: Ald. Leslie, Small, Macdonald, Allen, Beavis and Redway. The specifications were once more considered and referred to Mr. Bugler, City Solicitor, and Mr. Kingston for the syndicate, for them to consider the amendments and use upon them the necessary agreement to be signed by the city and the parties of the second part. It was agreed that Mr. Jennings meet Mr. Redway to make arrangements for the proper carrying out of the work. Mr. Kingston said that he understood the City Engineer refused to have any more to do with the work, and he thought a request from the committee might be in order. The chairman said that the City Engineer was ready at any time, but he objected to giving the aldermen opinions on policy which was not in his province. The Engineer will be asked to meet Mr. Redway.

Markets and License Committee met yesterday. Present: Ald. George Verral (chairman), Julliffe, MacMath, J. E. Verral, Phillips, Foster, Farquhar, Stanley, Pope and the City Commissioner. Alkones and Franks sat. It is the intention of the committee to hold a special meeting on Monday, May 1, at 8 o'clock, to consider the report of the committee on the liquor license. A sub-committee was again appointed to take up the liquor license. The committee will meet on Monday, May 1, at 8 o'clock, to consider the report of the committee on the liquor license. A sub-committee was again appointed to take up the liquor license. The committee will meet on Monday, May 1, at 8 o'clock, to consider the report of the committee on the liquor license.

A Minute a Day. A minute a day devoted to taking a dose of Burdock Blood Purifier, will cure you of all skin diseases, such as eczema, psoriasis, and all other skin ailments. There is nothing better than B.B.P. for the skin.

## THE CHALLENGE

Before insuring elsewhere examine the Plans of Insurance operated by the Manufacturers' Life and particularly the two latest additions to the Company's Insurance Bill of Fare—the Twenty Plan and the Instalment Plan.

In the former a man can protect his family at the actual cost of carrying the risk, the premium rates are phenomenally low—one-third lower than any other form of whole life policy issued.

In the latter, for a premium not very much larger than is charged for a \$5000 policy where the entire insurance is to be paid in one sum down the Manufacturers' Life will give a policy of \$10,000, payable in 20 Annual Instalments of \$500 each.
