Mercantile Summary.

THE Imperial Oil Company has decided to move the head office of the Company to Petrolia, at the end of the present year. Mr. William Spencer, secretary of the company, has resigned, and Mr. William Pratt, accountant, has been appointed to the position.

Mr. D. Marshall Lang, manager of the fire department of the Commercial Union Assurance Company, has resigned his appointment, as appears from a circular of the company dated 27th November. Pending the appointment of his successor, the sub-manager, Mr. Jno. Carswell, is performing the duties of the position.

THE men who accomplish the most never seem in a hurry, no matter how much they have to do. They are not troubled for lack of time, for they make the most of the minutes by working in a cool, clear, orderly and methodical fashion, finishing each task properly, and not wasting their nervous force on trifles or expending it in bustle. They never complain of over-

THE Chatham Planet states that the \$250,000 suit of the Merchants' Bank of Canada vs. Campbell & Schulenburg, of Windsor, which has been before the Canadian and Michigan Courts for several years, has been settled at last by Campbell & Schulenburg paying \$5,000. It arose out of a dispute regarding a quantity of lumber for the English market.

THE latest telegraphic advices received show that since the season opened the amount of tea shipped from Hankow has been 68,000,000 lbs. against 71,000,000 lbs.; from Fooshow, 48,000,-000 lbs. against 50,000,000 lbs.; and from Canton, 16,000,000 lbs. against 17,000,000 lbs.; making a total export from those ports of 132,-000,000 lbs., as compared with 138,000,000 lbs. for the same part of the season last year.

THE geological survey of the anthracite fields of Pennsylvania is now in the fourth year of its progress. Thus far it has explored one-third of the coal fields. There are 470 square miles of anthracite lands, the original contents of which were 25,000,000,000 tons, and the quantity produced to Nov. 1, 1884, was 543,205,150 tons, which is about 30 square miles, or 6½ per cent. of the whole, and the amount remaining in the fields is 23,400,000,000 tons.

THE exports of cotton stockings and socks from the British Islands for the ten months ended October 31st this year, were 1,528,151 dozen pairs, valued at £480,017. Of other kinds of cotton knitted goods £468,454. The exports for the corresponding period last year were, of cotton stockings and socks, 1,438,142 dozens, valued at £452,474, and of other kinds of cotton

Mr. J. J. BLACKMORE, of St. Thomas, has been awarded the contract for the heating apparatus of the Hamilton Post office

THIS season the Chatham Manufacturing Company have sold one hundred and fifty sleighs to the C. P. R., and are now finishing a carload of wagons for British Columbia.

THE landlord has seized the stock and chattels of the London Co-Operative Supply Association. Darragh & Daly, a St. Catharines firm of furniture dealers, are offering 25 cents on the dollar, secured. If the security is found to be good, the creditors will probably accept.

It is proposed to organize the Campbell Hoop Machine Company in Montreal, with a capital of \$100,000, and a preliminary meeting has been held at which were present a number of leading capitalists, among them being Hon. A. W. Ogilvie, Geo. Brush and others.

THE exports for the ten months ended October, 1884, of woollen horiery and of hosiery mixed with wool, were valued at £392,097, and for the corresponding period last year, £312,932. These figures show a falling off in the exports of cottons, and an increase in the exports of woollens from the British Islands.

THE imports of Italy in the first ten months of the year amounted to 1,181,508,806f., and the exports to 973,829,733f., which was an increase of 31,684,452f. in the former, and of 27,998,569f. in the latter. The Customs' receipts, amounting to 146,022,380f., left a deficit of 4,712,564f. compared with last year.

THE Royal Canadian Insurance Company will apply, at the next session of Parliament, for au thority to reduce its capital stock to \$500,000, in shares of \$25 each, of which sum \$20 shall be paid up and \$5 subject to be called in. Also to amend the company's charter so as to be enabled to reduce the number of directors to seven, etc.,

THE post office department gives notice in the Canada Gazette that under arrangements recently concluded, money orders may, on and after 1st January, 1885, be obtained at any money order office in Canada for payment in Portugal, Egypt, Japan, Danieh West Indies, Dutch East Indies, Gibraltar, Malta, Cyprus, Constantinople, Smyrna, Bermuda, Ceylon, Hong-kong, and all British possessions and colonies in the East and West Indies, Africa, and Australia.

A CORRESPONDENT of the Halifax Herald writing from St. John's Nfld., observes: -" I met to-day a traveller for a Montreal boot and shoe house, and a well-known brush manufacturer of St. John N. B. Both tell me they have done a good business here. The latter says he has been carefully cultivating business here for twelve years, has sold tens of thousands of dollars worth of goods, but never lost a single cent. A Halifax drummer is a rare sight here."

THE sheriff has disposed of the effects of D. H. Scott, a general storekeeper at Meadow Lea, Man. - A Winnipeg undertaker, T. A. Lundy, has assigned .--- Rigney Bros., or Wm. Rigney, grocer, Winnipeg, is in embarrassed circumstances being behind in his payments and sued by a creditor. Book debts are placed at \$9,400, a large percentage of which is bad; stock \$2,100. Liabilities about \$5,000; apparent surplus \$7.000. The estate, if wound up, would not pay over thirty cents on the dollar.

In the Province of Quebec we note the following failures. L. O. David, tailor, Buckingham, has failed and assigned, owing about \$3,000; assets estimated at \$2,000. Noel & Ferland, furniture dealers at Montreal, have also failed, and show assets of about \$4,000 to pay an indebtedness of \$5,000. Shufell & Buck, a firm of soapmakers, also of Montreal have fallen into the

hands of the Assignee. P. A. Bourget, a grocer of St. Joseph de Levis, has assigned to H. A. Bedard, Quebec. At St. Hyacinthe, Devane & Co., a foundry form have failed and assigned. J. A. Dufresne, a tobacconist at Three Rivers, has failed with small liabilities.

THE pilotage returns for the port of Pictou for the year 1894 show a revenue of \$3,437 from steamers and 1,015 from sailing ships. total is \$407 in excess of that of 1883.

-With the end of the year, La Banque Jacques Cartier will close its branch at St. Remi. Que. La Banque du Peuple will take up the business, which will be under the charge of Mr. C. Bedard.

THE Montreal agents of the Giasgow and London Fire Insurance Company announce their removal into more commodious offices in the Federal Bank block, Montreal. The company has also appointed as general agent on the Pacific coast Mr. John Landers, of San Francisco, late agent of the Commercial Fire.

MESSES. CAMPBELL & Co., lumbermen of Lachute, Que., who we recently reported as endeavoring to compromise at 50 cents, have made an assignment, and a meeting is called for the 13th of January. The liabilities are largely due in Quebec and are estimated at about \$60,000, with assets nominally of \$50,000.

THE Montreal stock market has shown but little sign of vitality this week, transactions being very light indeed and confined to a few stocks, principally Montreal, Merchants', Gas and Richelieu. The tone of the market is rather easy. Montreal sold at 1871, Merchant's 1081, Gas 1811, Richelieu 581, Ontario 104, Toronto 175. The money market presents no special features; call loans are made at 4 to 4½; discount rate, 7 per cent. Wholesale houses are principally engaged in balancing up the year's operations, and the movement of merchandise is limited, travellers being generally off the road. Payments, as a whole, are only fair.

THE trade in phosphate, at Aylmer, Que., has been larger this season than was expected, and would have been larger still had the roads not been so difficult, from heavy rains. total amount shipped from the mines this year was 22,143 tons, of which this county furnished 20,353 tons. At the High Rock 1,100 tons remain on hand, while at several of the other mines large quartities have been held over. The prices, says the Times, have not been so good as former years, but the decrease in the price of labor has more than counterbalanced this falling off. On the whole the season has been favorable to those engaged in the trade.

THE Boston Journal reports a manufacturer as saying :-- "I know of a mill which sells all its best goods without distinctive marks in order that they may be sold as foreign goods. We can make them much cheaper than they can be imported, and I know by actual experience that they are just as valuable, as well made, and of as fine colors as the imported. None but those in the trade know it, and it is for the interest of most of them to let it be understood that the best American goods are imported. For instance, there are goods that can be sold at \$2.50 per yard, but many tailors will dispose of them as foreign goods at \$4 per yard."

THE receipts from shipping on the Suez Canal in November amounted to 4,230,000 francs, against 4,704,832f. in the same month of 1883. and 4,373,083f. in 1882. The total returns for the first eleven months in each year were 57,-937,152f. in 1884, 60,685,726f. in 1883, and 55,-678,815f. in 1882. The number of ships that passed through the canal in the last two years 3,066 in 1883. The falling off in the receipts

this year is due to the reduction of 50 centimes per ton in the tolls on the 1st January last, and the abolition of pilotage dues since the 1st July. A further reduction of 50 centimes per ton will be made from the 1st of January next.

THE affairs of J. C. Kemp & Co., patent medicine manufacturers, etc., Montreal, are turning out very badly, and at a meeting held on the 22nd inst. the liabilities were stated at \$45,000 to \$50,000, while the assets will only be about \$7,000, figures vastly different to those first given to the public. Mr. Kemp is in the States and is not likely to return, while his partner, Mr. Derrick, who was at the meeting, seemed to treat the matter as a huge joke. The affairs of the concern seem to have been very loosely conducted, and there will be but a small dividend for the creditors. A committee consisting of Mesers Crombie, Stanley, Parsons, and Sawyer was ap. pointed to liquidate the concern.

ANTHER of the ornaments of the Ontario Bar has been removed by death. James Bethune. Q.C., breathed his last on Thursday, the 18th instant, after a short illness, from typhoid fever, and was buried on Monday last. A large assemblage, including many of the Bench and Bar, attended his funeral, the pall-bearers being Judges Burton, Patterson, Osler, and Rose, Christopher Robinson, Q.C., James Maclennan, Q.C., Charles Moss, Q.C., and A. B. Aylesworth. In the prime of life-45 years of age-having won distinction in the Legislature as ; well as in the legal profession, the career thus cut short was a most promising one. Rev. D. J. Macdone!! fitly described the character of the deceased gentleman as one characterized by great simplicity and unaffectedness, by great singleness of purpose and purity of aim, affectionate and faithful.

SPEARING of an auction sale of mining shares in St. John on a recent date the Globe of that city says: "The coolness of the auctioneer, the the lack of animation on the part of bidders, and the prices realized made it appear as if it was an every day occurrence, and that to own an interest in the gold mines of Nova Scotia was like winning an elephant at a lottery. Mr. A. J. Armstrong first put up 3-16th shares of 103 areas in the Montague, N. S., gold claims, and it was sold for \$5.25; 3-20ths of the allotted stock of the Lochabar Gold Mining Co., for \$1.25; 3 club shares Copper Prince Mining Co., for 25c.; 1-32nd in the Clarke Patent Palace Car and the patents thereof, 25c.: and the same interest in the Clarke Patent Cattle Car, 25c.; Book debts, for \$5.25. The purchaser took all the right, title and interest of T. Sherman Peters in the above properties.

We have received a copy of the illustrated catalogue and price list of the Galt Edge Tool and Carriage Spring Works, which have been established for forty years, and the products of which have taken honors at the Centennial Exposition and the New South Wales Exhibition, as well as in some forty different Canadian shows before and since. The book is an admirmirable specimen of typography and engraving. The illustrations are by Rolph Smith & Co., the printing by the Caxton Press and the paper resembles that produced by the Toronto Paper Mfg. Co. Colored and gilt pictures of axes, adzes, chisels, hammers, draw-knives, cooper's tools, picks and crowbars abound, while some twenty pages of the pamphlet are devoted to descriptions and illustrations of carriage springs and gears, the product of this factory. Messrs. Warnock & Co are to be congratulated on the steady growth of their business. Their goods, we believe, continue to deserve the character given them in Philadelphia in 1876, viz., that was almost stationary, or 3,057 in 1884, against they are "of excellent design and superior workmanship."

-The Western Assurance Company declares a half-yearly dividend of four per cent., which, with the six per cent. previously declared, makes ten per cent. to their shareholders for the year, by no means a bad return.

-The forty-third dividend of the Western Canada Loan and Savings Company is declared. It is at the same rate as that maintained by the company ever since its inception, ten per cent.

"HOW HAVE YOU FOUND BUSINESS?"

We have been favored with some hundreds more of replies to our circular desiring information in reply to the above enquiry. Regretting that we have not space to print them all, we give below a selection from each locality in order of receipt.

Messrs. C. S. Shaw & Co., of Ottawa, importers of china and plated ware, say that they have found trade very satisfactory this year, "Our sales," continues their letter, "have been twenty per cent. better than than they were last year."

" For the information of your most valuable paper"-such is the complimentary way in which Messrs. Joseph Kidd & Son, of Dublin, refer to the Monetaby Times-" For the past year we have but little to complain of in regard to business; but money has been very slow and scarce. Our sales have kept up to the standard. Lots of large accounts in the hands of good farmers throughout the counties of Perth and Huron."

We congratulate Messrs. J. & R. Craig, of Ottawa, upon their trial of the cash trade, the result of which they describe below :-- "Business with us is quite satisfactory. We have been doing for "strictly cash" since the beginning of last March, and find the system to work admirably."

A firm of merchant tailors in Kingston, Messrs. C. Livingston & Brother, say:-"We beg to state briefly how trade is in our line. In our order clothing department we find business even better than last year, but in the ready-made clothing and sale work we find it not so good, no doubt owing to the low prices farmers are receiving for grain and some of our largest industries being shut down "

MB. JOHN McKinnon, druggist, of Beaverton writes: "Replying to your enquiry, trade during the current year has been fairly good. Crops were beyond the average in this section, prices are certainly low but considering the increased yield farmers are no worse off than last year. The great drawback is the slowness of marketing grain, many feel disposed to hold over for next year consequently accounts. year consequently accounts are coming in badly."

The postmaster at Cheddar, in Peterboro county, who is also a general trader, gives the following testimony as to the condition of things in that neighborhood on Dec. 17th: "Business is rather dull here and has been very much so during the last summer and fall. Money was scarce and remittances not good generally. There are some signs of improvement now. Crops have been good and the lumbermen are in and paying good prices for beef, pork, oats and hay, so that settlers in the woods are getting better prices than what are paid in the front townships for more of their produce."

The following is from a well-known retail dealer in Windsor, Ont., Mr. J. W. Blackadder: " I can say the current year has been a hard one, October and March being the only fair business months in it. The entire loss of the Inaian corn crop of 1883, with more than partial failure of the wheat crop in this county, has been felt ever since, and the good corn crop of this year (1884) has not made its presence felt yet, being still in the cribs on the farms. It is, however, exerting an influence in sustaining confidence for the future. The low price paid by our American cousins for the now famous "Mackinaw straw braid," which is grown and braided in this county by the French Canadians largely, has paralized that industry also, so that the prospect for the present is not very encouraging. However, the stocks on the shelves of the dry goods men are down to rock bottom prices of manufacture, so it is better for us than if we had our stocks laid in at old high figures."

EDWD, TROUT, MANAGER.

TORONTO, CAN., FRIDAY, DEC. 26, 1884

THE OLD YEAR AND THE NEW.

In wishing a happy and prosperous New Year to our subscribers, which we do with all cordiality, we take the opportunity, as we have often done before, to offer a few suggesti as to those-and they are the majority of the subscribers to the MONETARY Times-who are shop-keepers, in town or country.

To the merchant, the year has been a peculiar one. In a number of staple articles he has had to buy in a falling market. Domestic cottons, sugar, grain, have all been troublesome commodities, puzzling to buy, troublesome to hold, and difficult to get a profit upon. Overproduction by our factories has filled the market to repletion with cotton goods, and the consequence has been 'drives, and 'job lines,' month after month, at lower prices than before.

Just what to do in such circumstances is not an easy matter for a retail dealer to decide. If he were to hold off entirely, his neighbor might get the advantage of cheap goods and take away his customers. If he bought, he was rarely sure that a later buyer could not undersell him. The result in most cases was that such goods were purchased timidly, in limited quantities. Few have been able to make money on them; many, probably, have had to stand a loss. Then, in order to clear out large lines, bought from the mills at sacrifice prices, extra time has been offered by wholesale houses, extra discounts given, dating ahead been resorted to, with demoralizing effect.

There is no permanent cure for such a glut, so long as the means of production exceed the capacity of the market. No factory proprietor wishes to be the first to shut down his machinery. No agreement has thus far seemed possible to stop production and relieve the market. But to this complexion it must come. We have built too many mills, and there must be a loss of capital before the disproportion can be corrected.

It is a time of low prices for manufactured goods, in Europe and America. Textiles, iron and hardware, wood goods, chemicals, provisions, wool, have each seen shrinkage in value. In some of these lines it is difficult to see how prices can go lower. So generally abundant a crop of cereals the

wonder is that the Canadian farmer cannot see what is so patent, and make the most of his varied resources by selling at market prices, making up in quantity what he finds lacking in price.

For the shop-keeper entering upon the year 1885, with profits on his stock cut fine and with competition keen, economy and retrenchment are necessary. To face his position and make the best of it, is a desirable a titude to assume. Early in the autumn we were told that country traders were buying cautiously, and later we have heard that stocks were generally light.

This is as it should be. But even so, it is necessary, now that the year is closing, for traders to know how their debits and credits stand. Let every one who has not already done so take stock promptly-Write every atom of merchandise down to value-Sort out stock, in drawers or on shelves-Make Christmas boxes of unsalable stuff rather than count it as a good asset-Go through your books and dun every debtor in them-Make a list of what you owe and get the very best terms you can for prompt settlement—Boldly dispose of grain, butter, wool, or whatever you have been holding in eager hope of a rise-Know the worst of everything, and having done so you are in no worse position, but rather better than if you bolstered yourself up in the false notion that you were better off than you are.

We need, as a people, to study economy. In many respects we are wasteful. In our cookery, in our clothing, in our fuel, we spend more than we need. Some of us live beyond our incomes because, indeed, we do not know what our incomes are. Numbers of people have drifted away from their former simplicity of habits and are none the happier in consequence. The glamowr of a "boom" of past years is over us still, while the stimulus of a protective tariff and of prodigal expenditure for public works has spent its force. We have still to learn that labor, not speculation, is the proper basis of prosperity.

The merchant may find some encouraging features in the outlook for 1885. The prospects are in favor of a rise in values, since in several lines the lowest limit of price appears to have been reached. The country is strong in resources—grain, timber, cattle, dairy produce. What is needed is a resolve to reduce the volume of indebtedness, a putting of shoulders to the wheel, an improved tone of commercial morality.

There is no need for the plaint of Hard Times. Canada is not worse off than other countries. A good step to take, in the New Year, would be that towards shorter terms of credit, or better still, cash trading. Laxity in credits is an evil which has brought, and will still bring, others in its train.

CANAL TOLLS AND CANAL ENLARGEMENT.

At a time when the abolition of the tolls on the St. Lawrence canals finds many advocates, it is opportune to enquire what has been the effect on the volume of traffic of former reductions and the temporary suppression of tolls. This Mr. Robert C. Douglas, assistant engineer of the Departworld over has rarely been known; and the ment of Railways and Canals, has done in a figure—in 1881, it was only 24.6—the last

report to the head of the department. Hi. conclusions against abolition are well supported; those in favor of a third enlargement of the Welland canal are of a somewhat doubtful character.

What makes against the success of the St. Lawrence route more than any thing else, is that a large number of vessels on the upper lakes draw more water than there is in the Welland canal. For a quarter of a century the number of these vessels has gone on increasing with an aggregate tonnage of nearer six than five (557) hundred thousand tons (392,808).This was the state of things after the first enlargement of the canal. A second enlargement before it was completed enabled the Welland canal to admit some of the smaller of the vessels which were too large to pass through before. But not only are the larger vessels unable to pass through this canal; the route is abandoned to vessels too small to be profitably used, in competition with the larger ones on the upper lakes.

In 1859 a large number of sailing crafts on the upper lakes were unable to pass through the Welland canal, the enlargement of which consequently resolved upon, was scarcely executed when the size of the vessels, which had gone on increasing, was found to have grown faster than the capacity of the canal. The effect of the enlargement in lowering cost of transport on the Welland canal was unappreciable. In 1870 no fewer than eighty of the American vessels drew over twelve feet of water; the number having increased from twelve in 1860. Twelve feet of water was obtained by the second enlargement; but at the time this enlargement was decided upon, there were eighty vessels in the upper lakes which it would exclude, and the size of vessels gave indication of future increase. That increase has gone on steadily till there were, last year, 225 vessels which could not pass through the enlarged Welland. With twelve feet of water there are 75,278 more tons of shipping excluded from this canal by the size of the vessels than there were in 1870, when there was only 10 feet of water. The cost of running a vessel is proportionately lessened with the increase in her size. This is the prime secret of the increase in the size of the vessels. The deepening of harbours and the excavation of the subaqua canal on the St. Clair Flats and similar improvements followed of necessity. Cotemporaneous with the increase of the size of the vessels there has been a reduction in the cost of carrying a bushel of wheat from Chicago to Buffalo of more than two-thirds; in 1861 it was 11.53 cents, in 1883, 3.40 cents; the lowest figure reached in 1882, 2.57, it would seem could not be maintained. But it would not be safe to conclude, that this decline is altogether due to the increase in the size of the vessels. Railway competition has borne a large share in the declension.

The successive increase in the size of the Welland canal had mainly in view the American carrying trade of the upper lakes. But not only has that object not been attained; the proportion which the American trade of the Welland canal bore to the whole had fallen from 51.3, in 1850—for many years one-half of the whole---to 39.2, in 1883. This is by no means the lowest

enlargement having caused some recovery. The Welland Railway might be a great aid to the canal if worked in conjunction with it; but the railway is under the control of the Grand Trunk company, whose road is a competitor of the canal. To Port Colborne, vessels come with heavier loads than can pass through the canal; they are relieved by elevating part of their cargoes, which goes by rail to port Dalhousie, where it is The Grand again put into the vessels. Trunk has a direct interest in working the auxiliary railway in such a way as to prevent it giving the greater assistance to the water route. It would answer its purpose to work the Welland railway with a view to reducing the aid it should render the canal navigation to a minimum. There was a time when it was open to the government to acquire this auxiliary railway; and it is a question whether it did not make a mistake when it elected to enlarge the canal instead. Lightering the upper lake vessels is necessary, under present conditions, and it is scarcely possible that it can be done to the best ad vantage. Every vessel of sufficient size to do a profitable business must pay toll to the Welland Railway. The cost to some vessels, and those said to be the most suitable for the lake trade, is twenty-four cents the ton of freight; but it does not follow that a third enlargement of the canal is, as Mr Douglas suggests, the true remedy. The cost of lightering is not, as he contends, a discrimination in favor of the Erie Canal, for from the lake vessel at Buffalo there must be a transhipment to the canal boat. Nor is it easy to see how "every inch of water [deducted from twelve to fifteen feet six inches is a serious discrimination against the St Lawrence route in favor of Buffalo." Many of the lake vessels that supply freight to the Erie Canal are larger than those which the Welland Canal can admit, but the Erie itself is not a ship canal at all, and besides being a mere ditch has the disadvantage of being hundreds of miles in length. When the sizes of the lake vessels which supply freight to the two canals are given, only half the story is told. It still remains to be explained how the Erie Canal can compete with a great natural water-way, the canals of which are only required to overcome occasional obstructions most of which are short.

If the Welland Canal be deepened, Mr. Douglas argues, trade will be diverted from Buffalo and the Erie to the Welland Canal. "The abolition of tolls on the Erie Canal, or tolls on our own canals, cannot affect Montreal so far as this business is concerned, for under the present system of commercial relations it is impossible for Montreal to engage in it." Between the years 1874 and 1883, inclusive, there was a great decline in the quantity of wheat and corn carried from one State to another through the Wel-land Canal. In the first five of these years the total tonnage was 977,264 tons and the tolls \$197,052, and in the next five years the tonnage sank to 381,346 and the tolls to 76.269. During the same period the traffic between the Eric and Montreal has been much steadier, the tonnage commencing in 1874 with 209,154 tons, and ending in 1883 with 185,570 tons. In the first five of these ten years, the tonnage was 1,002,368, tolls \$200,272, and in the second five years 1,147,-232 tons and the tolls \$229,379.

Through shipments to Europe are all rail to tide water. Corn and wheat are sometimes sought by ocean steamers as ballast. This business avoids the canals and does not affect tolls. Through bills of lading from Chicago date back only to 1869, and not before 1872 did wheat figure on them for a million bush. (1,420,948), in 1878 the quantity was over six millions, since which it has fluctuated between that and a little over three and a half millions. Corn attained the figure of nearly eleven million bushels in 1879 (10,991,760) and last year it was less than three millions (2,893,870). Of the total shipment on through bills of lading to Europe of grain, seeds, meats, and other products, 134,394 tons were shipped by lake to Buffalo and rail to seaboard, and 420, 883 tons all rail.

There are 78,000,000 bushels exported from Boston, New York, Philadelphia, and Baltimore which did not go by the canals, while there were only 5,000,000 carried by the Erie canal, the transportation of which was cheapened by the abolition of canal tolls. Mr. Douglas thinks that before calling for the abolition of tolls on the Canadian canals, Montreal should exert herself to obtain her proportion of the major quantity exported, which is unaffected by canal tolls.

The little Erie is carrying three times as much tonnage as the Welland and the disproportion is increasing. From 1864 to 1873, both inclusive, the Welland carried 11,498,291 tons, the Erie 30,897,094, the average of the Welland being 1,149,829 and of the Erie 3,089,709 tons. In the ten years 1874 to 1883, the Welland carried 9,864,410 and the Erie 34,474,636 tons; the yearly average of the Welland being 986,441, and that of the Erie 3,447,464 tons. Was the gain at the other end of the line, on the lake part, caused by larger vessels?

There has been a great decline in the freight rates on all the routes-lake and canal, lake and rail, all-rail-since 1864. In that year, the lake and canal freight was 28.36 cents; in 1883, it had fallen to 8.30. considerably more than two-thirds; lake and rail combination is not recorded before 1868, when it was 29 cents; last year it had fallen to 12.10 cents; all-rail began at 52 cents in 1864, and last year it sank to 16.50. the greatest decline of all, though far from being absolutely the lowest. The navigable routes are not continuously competitive. The charges on the all-rail routes are of course greater when the ice shuts off the competition of the water rou es; and then the railways reap some benefit from their natural advantages.

The railways, six of which compete with the Erie canal, make it a condition of their contracts that shippers shall send nothing by canal, and as an inducement make a reduction of 30 to 50 per cent. on traffic rates. In the six years from 1872 to 1877, 223,206,-973 tons were shipped by canal, and 62,171,-241 by rail; the yearly average by canal being 37,201,162 tons by canal, and 10,361,-873 by rail. In the next six years ending with 1883, the tonnage carried by rail was 266,637,064 tons against 111,363,748; the yearly average of 44,439,510 going to the canal, and 18,560,624 the other way. These figures show with what rapidity the railways are gaining on the canal,

and they seem to indicate that the competition is one which the canal will not always be able to sustain, though it still carries 70.20 per cent. of the traffic, and the railways only 29.80.

The railway companies find it necessary to compete against their own roads, by transporting western produce by water as far as Buffalo; and for that purpose they own or control lines of propellers. Every ton of coal shipped returns a ton of grain to Buffalo. The railway Cos. in Buffalo have immense terminal facilities, their real estate being assessed at \$15,000,000. To compete with this route Mr. Douglas thinks it will be necessary to deepen the Welland canal and complete the enlargement of the St. Lawrence canals. The shipping tonnage of Buffalo is greater than that of any Atlantic port on the continent.

The influence of those facilities—the power of this vast apparatus—has been sufficient to divert traffic into the dearer artificial channel. In the decade ending with 1873 a bushel of grain could be carried from Chicago to Montreal for nearly five cents less than from Chicago via Buffalo and the Erie Canal. In the next decade the advantage in favor of the Montreal route had svnk to 74 parts of a cent, but if tolls were abolished on both, the Erie Canal route would have the advantage of the one 20th of a cent. In the decade ending 1883 the freight rates were 1.72 mills per ton mile greater from Kingston to Montreal than from Buffalo to New York. Mr. Douglas contends that for this extra charge there can be no reason "except excessive charges," and that "no Government could do more than provide for the cheaper transportation that is now accomplished by the enlarged Welland Canal." He thinks that "when the freight rates per ton mile are the same on both routes, then a reduction of tolls may be asked; when that date arrives those asking can be informed that the superior advantages of the St. Lawrence route, as to economy of transport simply, without relation to questions of trade, to rectify which becomes a system of bounties and subsidies; that the St. Lawrence route gives a cheap transportation per ton mile so much below the rival route that those who transport through our own system can well afford to pay the tax necessary for its maintenance."

Mr. Douglas is of opinion that forwarders who profit by the canal traffic do not do their share towards increasing it. They content themselves with calling on the government when they fail to do their own share for the accommodation of the traffic. The want of elevators at Kingston and Montreal cause great delays in the transmission of freight. At Kingston the delay is sometimes long enough for a vessel to cross the Atlantic and get half the way back. The result has been that with both the canal and railway routes in favor of Montreal, the traffic has gone elsewhere. This has happened when the canal rates was less by one cent per 100 lbs., and the railway rate two cents less than to New York. If the Grand Trunk had had an elevator at Montreal, there seems to be no reason, on grounds of competition, why it should not have got a larger proportion of the traffic. And the port charges at Montreal are not higher than at competing American

ports. In the quantity of produce carried Montreal was once second only to New York; now it is be ten by Pniladelphia and Baltim re as well. No reduction of tolls ever increased the traffic on the Erie canal; and the abolition of tolls on our canals, when tried, was found powerless to divert traffic from the Erie "or affect in the slightest degree the channel of commerce through the United States." Free canals on the St. Lawrence have never prevented American traffic, when it reached lake Ontario, going by Oswego. Experience, it cannot be denied, does not offer any encouragement for Canada to free her canals from tolls. Whether a further enlargement of the Welland, which Mr. Danglas advocates, would pay, is by no means certain.

In another article we give later figures, showing that the experiment of reducing the tolls on the St. Lawrence causals has not prevented the traffic still further declining, in the present year.

BANKING REVIEW.

We gave last week the usual statement of the condition of the banks at the close of November. We now append our summary of the same by provinces:

Financial matters are pursuing their usual sluggish course. There is no energy or activity in business, and but little profit results from it as a whole, yet the number of failures is not unusually large. In one instance however, a firm, bearing an old and very honorable name, in Montreal, has col-Capital having been drawn lapsed. out by former partners, and a high style of living kept up on diminished business and resources. It is one great bane of our modern system of business that people will go on spending money whether they are earning it or not. This is not honest. We have had during the last year or two flagrant instances of firms whose parters lived in an extravagant style when they

good example of this some years ago. After Traders' Bank rests upon a sound foundaa year or two of diminished profits, they set tion. There is a sort of unreal appearance to work to put their house in order, about it at the very outset. It was got up economized severely, lopped off lux-and promoted by a number of people in uries, and set their expenditure on a Bowmanville, all of whom are respectable scale commensurate with the real position of people, in their locality, and if the bank affairs. They did not care what their neigh- proposed to have its principal office in Bowbors thought. Their chief anxiety was to manville the criticism we are making would maintain the honorable name they had won. be entirely inapplicable. But these Bow-It scarcely needs be said that this firm did manville people have been allowed, by an not fail. It never has failed, and is never oversight of the Legislature, to place the likely to do so. The example of this firm headquarters of the bank in Toronto, might be imitated with advantage by the where not one of them lives. They rising generation of merchants. We have know nothing about banking in Toronto, said that such expenditure as is before and with all due respect to them when referred to is not honest. No honorable operating in their own sphere, we say they man would allow his creditors to support his family in luxury, and drain away their means in order to enable him to keep up style. It is time there was a better tone of in it. It is in the nature of a sham to put a mercantile honor with regard to such concern of this kind alongside banks backed matters

Yet there are mercantile firms, and even manufacturing firms, which are doing a prosperous business at present. Where manufacturers have had the sense to avoid unwise locking up of capital in building and ambitious extension, and at the same time conduct their business economically, they are doing well even in these times. There are mercantile houses whose members say they have no reason to complain either of sales or remittances. But these houses have laid the foundation of success in thorough knowledge. adequate capital, hard work and severe economy. There are people in trade who look upon their business as a sort of gentlemanly occupation for an idle man. The system of joint-stock companies rather fosters this than therwise. Where two or three partners have the undivided responsibility, and do business at the risk of all they are worth in the world, there is a reasonable prespect of success. But in a limited jointstock company, the men who have the responsibility often take little practical part in the management and do not pretend to devote much time to it. They leave this to salaried employes. And such companies are peculiarly exposed to the danger of over-buildiag and over-producing, inasmuch as new capital can readily be procured for these purposes in prosperous years. Time, however, will cure many of these evils; though in our judgment it will take a considerable time.

There is a rumor that another bank is to be established in this city. We should have thought there were signs enough of "overproduction "in this department also, sufficient to deter any prudent person from venturing his money in such a wild goose chase. Whether people venture their money or not in such a concern may be said to be their own affair. If they lose it, nobody but themselves will be to blame. This, perpetrated when the bank is allowed (if it however, is only partly true. A chartered ever be allowed) to commence business. bank has its public as well as its private side. It has power to issue notes, and it does business under the prestige of a parliamentary canction. The public, therefore has an Government was far too lax on a former occaknew well that their business was rotten to interest in seeing that institutions establi-hed the core. It is better to sell horses and carriages in good time, than let them drag a man down to ruin. The members of discourage enterprise in any direction, but this instance.

one of the wealthiest firms in Canada set a we cannot see that this enterprise of the will be out of their sphere in the financial capital of Ontario. The bank, in this respect, will start if at all with a weak spot by the wealthy and influential business connections of the directors and stockholders of other banks in this city. But it is further rumored that a gentleman has been chosen as chief manager who has just made a disastrous and ruinous fiasco as manager of an ther institution. The career of the Federal Bank for years past has been a thoroughly discreditable one. It has been notorious for its connection with stock jobbing; for its evasion of the plain requirements of the law, and for violation of the plainest principles of common sense in lending money. The Federal Bank has ruined numbers of its stockholders and caused numbers of others to lose far more than they could afford. It may be said that this is their own affair entir.ly. We deny it. The public has something to say about this. The career of the Federal Bank under its old management was a bad element in the business community in Canada, and the public has an interest in seeing that nothing of this kind is let loose upon the community again. We are bound to take notice of this element in the proposed organization, and herein lies the mischief of a number of people in a small town allowing their foolish ambition to carry them beyond the bounds of prudence and good sense. If the Traders' Bank was, as it ought to be, a Bowmanville affair, the promoters would no doubt exercise good judgment in choosing a man to manage it. But what do they know, and what can they know, about the responsibilities connected with the management of a bank in a centre like Toronto? The whole scheme has an unfavorable look about it. The foundation is not sound, although the project got a parliamentary charter. We observe that a contemporary has already sounded a note of warning upon the subject. The warning, apparently, is addressed to the Government, which is requested to see that there is no trickery or evasion of the law There are men who are perfectly familiar with the arts by which mere bogus capital can be made to stand for real capital. The sion, when the laws were openly evaded. It

THE ST. LAWRENCE AND THE GRAIN TRADE.

The St. Lawrence route is not holding its own in the matter of grain export. We have already published statistics of the export of breadstuffs &c. from Montreal, showing that the season of navigation just closed does not compare favorably, in respect of quantity of grain shipped, with any one of seven years last past. Does this mean that our canals and water route are being left behind in the competition with the American trunk lines of railway?

From 1876 to 1880, the quantity of grain shipped by this route ran up from twelve millions to twenty and a half millions of bushels. From 1780 the decline was abrupt, to eight and a quarter millions in 1882, nine and a half in 1883 and seven and a half millions this year. The exact quantities are thus, given by the Montreal Gazette, of the aggregate export of grain during the last eight seasons:—

Season	1884	7.445.903	bushel
44	1883		46
41	1882		- 11
44	1881		
64	1880		44
46	1879		44
**	1878		44
4.6	1877		**

The principal decrease as compared with last year, it appears, has been in maize, which has fallen behind 2,067,945 bushels, while wheat has decreased only 198,932 bushels and barley 82,652 bushels. Exports this year of peas have increased 98,782 bushels and oats 132,443 bushels.

The exports of fleur, however, were 508,-728 b rrels—an increase of 101,193 barrels over last year, which more than counterbalances the decrease in wheat. They were, indeed, the largest of the whole eight seasons, being 140,000 bushels in advance of the average quantity shipped yearly for that period. The following figures show the export of flour during the last eight seasons:—

gosae5	1884	508,728	barrele
64	1883	407,535	44
44	1882	387,851	66
64	1881	278,821	44
44	1880	383,397	44
44	1879	351.067	**
44	1878		4.6
44	1877		44

Among the reasons for this preference of the St. Lawrence route for flour may be its greater coolness as compared with southern United States routes, whether on this continent or on the Atlantic.

It is interesting to note to what ports these breadstuffs have gone. We therefore append a resume of the total shipments to particular ports via River St. Lawrence from the opening of navigation, May 2nd, to its close, November 20th, 1884, nearly seven months:—

MANNE	оо <u>д.</u>				
Wheat	1,561,865	bushels.

Indian corn	126,496	**				
Pease	46,478	44				
Oats	17,859	64				
Flour	1 366	barrela				

To Rotterdam 21,101 bushels of rye were shipped during the season, while 30,978 bushels of wheat went to Cork for orders, and 15,113 bushels of pease were sent to Newcastle-on-Tyne. To recapitulate, the shipments of the present year show an increase over last year in flour, oatmeal, cornmeal, pease and oats, but a decrease in wheat, corn, barley and rye.

Comparing the breadstuffs exports of 1884 with those of 1883, we find the aggregate of each kind to have been as under; the figures include 146,949 bbls. flour, and about 20,000 bushels of grain sent to lower St. Lawrence ports:

	1884.	1883.
Wheat, bushels	3,539,200	3,738,132
Indian corn "	2 055,580	4.123,525
Pease "	1,478,441	1,379,659

In addition to the 17,769 tons of phosphate tabulated above, there was sent to Dublin 200 tons; to Penarth, Wales, 100 tons; to Sunderland, 60 tons; to Antwerp, 285 tons; to Hamburg, 2,269 tons; to Rotterdam, 432 tons, making a total of this mineral of 21,-115 tons as compared with 16,474 tons in the

Butter

Phosphate.....

previous season of navigation. To ports on the St. Lawrence below Montreal the shipments were: of butter, 11,920 pkgs.; cheese, 3,012 boxes; pork, 6,160 barrels; lard, 99 barrels; hams and bacon, 107 boxes; canned meats, 50 packages. Shipments of butter and cheese show, upon the whole, an increase over 1883, those of ashes, pork, lard, hams, bacon and canned meats, a decrease.

FREIGHTS ON FARM PRODUCE.

Loud have been the complaints of the farmers of our North-West about the railway freights on their produce. But they are not alone in this respect. Farmers in the Western United States make still louder complaints. The low price of produce makes anything like high rates of freight all the more keenly felt. The State of Illinois has a Railway and Warehouse Commissi n which assumes to have power to relieve the grievances of which the farmers complain. This commission proposes to reduce the rates on freight "in proportion to the great decline in the price of wheat and corn." This mode of exercising the powers of legislation is a novel one and must be liable to great abuse. Freights may be too high. but the legislative power of reducing them could be best exercised by the Legislature itself. Indeed, from the complaints made there seems to be much need for a remedy. The New York Commercial Bulletin collects some startling information on the subject from telegrams published by the Chicago Tribune. It finds "that the best wheat at Abilene, one of the wheat centres of Kansas, is worth but 46 cents a bushel, while the freight rate is 25 cents a bushel. The farmer gets \$6.50 an acre for a crop which it costs \$9 an acre to take out of the ground and deliver at the depot, allowing nothing for interest of capital. The inferior grades of wheat there, it would appear, are worth but 36 cents a bushel, or a little more than half the cost of production. Again, at Wichita, Kan., wheat ranges from 30 to 48 cents a bushel, and the freights are 27 cents a bushel, giving the farmer but 3 to 11 cents a bushel, more than the railroads charge for hauling it to Chicago.

As for the rates on corn, in most cases, we are told, they confiscate the crop. At numbers of points in Nebraska and Kansas the freight on a bushel of corn is much more than the farmer can sell it for at the station. At Central City, for example, it is selling at 15 cents a bushel, and tho railroad rates thence to Chicago are 18 cents. Nor is this all; the railroads will carry a bushel of corn from Council Bluffs, on the western verge of Iowa, 500 miles, to Chicago for less than eight cents, but to bring it to Chicago from Des Moines, which is but half way across the State, they demand 11 cents. That is to say, they have competition at Council Bluffs, and discover that they can do the work for eight cents." These are samples of the charges complained of, as made by the railways when there is no check upon them, in the way of competition. "If," says the Bulletin, "the railways have any defence they had better get it ready, as nothing is more certain-unless current in-

tide of grangerism throughout the North West will give them serious trouble as soon as the Legislatures meet." The discriminations form the worst feature in this scale of charges, and with these the Railway and the Warehouse Commission might be entrusted with the power to d al. The figures show the danger of railway amalgamation or any device by which competition can be killed. Perhaps some of the competitive rates are below the paying point; but some of the non-competitive rates are certainly above all reason. Some of these rates appear to be a great deal higher than those charged by the Canada Pacific Railway Company. thened with such charges for freight on produce, it would be a miracle if farming, at present prices, could pay.

TAX EXEMPTIONS.

The ratepayers of Toronto will shortly be called upon to vote upon the question of the abolition of tax exemptions, a matter which engages, and properly, much attention, since the keeping free from taxation Government, municipal, and religious and educational properties imposes heavier burdens upon the ratepayers than would be the case if these bore their share of civic taxation along with other real estate. It is instructive to find, as we do from a statement in the Globe of Tuesday, that properties valued at nearly eleven millions of dollars, more than an eighth of the assessed value of real property in this city, pay no taxes. The list is as under :---

C urches, including Separate	
Schools	\$2,332,057
City property, including Public	
Schools	1,426,505
Charitable Institutions	233,354
Educational Institutions	1,108,956
Ontario Government	1,753,610
Dominion Government	1,674,090
County of York	87,940
Law Society (Osgoode Hall)	555,650
Toronto University	1,014,835
Miscellaneous	608,600

Total.....\$10,795,597 At a public meeting held in St. Andrew's Hall, a resolution, on motion of Mr. Alfred Boultbee was passed: "That all exemptions should be abolished, and the power [to abolish or retain be left in the hands of municipal councils; and that the government should pass a permissive act enabling this [abolition or retention] to be done." This came as an amendment to a motion which proposed to exempt churches and the ground on which they stand. One of the speakers very improperly referred to the judges as officials who are in the receipt of "fat" salaries; improper because whatever is not true ought never to be stated, and it is notorious that so underpaid are the judges that it is difficult to find suitable men to fill the offices as they fall vacant. It so happens, too, that they are about the only officials whose salaries the local legislature cannot tax. Every judge is appointed on the express condition, declared by order in council, that his salary shall not be diminished by direct taxation. Generally speaking, exemptions are indefensible and ought to be abolished. But some of the exemptions are only nominal; of this nature are those con-

To tax them would be to go through the farce of making the city pay out of one pocket and into the other. The gain of the operation would be measurable by the loss which its cost would involve. People ought to exercise a little common sense even in the matter of exemptions. Whether the local legislature has the power to authorize the taxation of the property of the Federal government which, in Toronto, is set down at the value of \$1,674,090 is an open question, with perhaps, the odds in favor of the local govern ment. The real obstacle to the abolition of exemptions will be found to be Archbishop Lynch; and if they be allowed to remain the credit and the blame of maintaining the impassive will belong to him.

EXHIBITIONS AND NEW MARKETS.

Canada is to be represented at the International Exhibition in Antwerp next year, and also, at the Colonial and Indian Exhibition in London the year following. By a recent minute of the Privy Council, we learn that Sir Charles Tupper, the High Commissioner for Canada, will be the executive commissioner for both Exhibitions. Mr. F. J. Dore, of our London immigration staff, will be secretary of the commission. The Dominion Minister of Agricul ure is charged with the arrangements at both exhibitions.

Official notification with respect exhibits, is to be published, and circulars sent to the principal manufacturers and producers throughout the Dominion, stating the conditions on which they can send exhibits to Antwerp and London; and an agent or agents will be appointed for each Province, for proper collection of such exhibits as it may be thought advisable to send to Antwerp and London.

The cost of freight of goods sent by the owners for exhibition, will be defrayed by the commission to Antwerp; and afterwards to London, also cost of freight in returning such exhibits to Canada if not sold by the order or agents of the owners. All such goods will be under the care of the commission and must remain during the exhibitions; but all perishable articles to be at the risk of the owners. All exhibits must be ready for shipment to Antwerp not later than the first week in March next. Goods sold at Antwerp must be replaced by duplicate or similar products for exhibition at London.

Exhibits of cereals and other field or garden products, also of natural mineral products, will be purchased and remain the property of the Department of Agriculture for further exhibition at the several emigration agencies in the British Islands and Europe. Owners, however, of such natural products in the Dominion may, if they see fit, send specimens for exhibition on the same terms as manufactured articles.

There is good reason to agree in the belief expressed by the official announcement that these exhibitions will afford a favorable opportunity for making known the natural capabilities and manufacturing and industrial progress of the Dominion, and also for opening markets abroad for such articles as

advantage. A number of our manufacturers want foreign markets and cannot begin too soon to look for them.

-A statement of the condition of the blast furnaces of the United States as at Dec. 1st, is given by the Iron Age. From this it appears that 181 of the 447 furnaces using these fuels, or forty and a half per cent., were in blast, and 266, or fifty-nine and a half per cent. out of blast. Of the 225 Anthracite furnaces 88, or thirty-nine and a half per cent., were in blast, and of the 222 Bituminous furnaces 93, or a little less than forty-two per cent., were active. The following table exhibits the condition of the Anthracite furnaces on the 1st of December, as compared with their condition on the first of each of the six previous months:

CONDITION OF ANTHRACITE FURNACES.

	Furnaces in blast.	
June 1	106	124
July 1	101	130
August I	95	138
September 1	88	139
October 1	86	141
November 1	86	135
December 1	88	137

These figures show that there has been but little change in the condition of Anthracite furnaces since the 1st of September, the same number being in blast at both dates. The weekly capacity of the Anthracite furnaces in blast average during these seven months 24,782 tons; that of those out of blast, 30,312 tons.

The following table presents the condition of the Bituminous furnaces on December 1st, as compared with their condition on the first of each of the six previous months :-

CONDITION OF BITUMINOUS FURNACES.

	urnaces 1 blast.	Out of blast.
June 1	98	127
July 1	98	127
August 1	88	138
.September 1	83	142
October 1	79	146
November 1	86	136
December 1	93	129

This shows an increase of seven furnaces in blast, the same increase as in the previous month. The only marked increase in any of the districts is in Alabama, three furnaces having blown in. The only marked decrease is in Illinois, three being blown out. We have no reports for one year ago, but, as compared with the 1st of January, there are 88 Anthracite furnaces now in blast, as against 109 on January 1st, and 93 Bituminous, as against 101 on that date. The capacity per week of the furnaces using Bituminous coal averaged 44,244 tons weekly; and that of the furnaces out of blast, 47,807 tons.

-Nothing farther about Canadian Pacific Railway matters has been made public, except the statements of Mr. President Stephen, as reported by an interviewer, that "he thought there would be no trouble in disposing of the stock of the Ontario & Quebec railway, which is to be placed on the London market;" that though no arrangement about the Lachine bridge has been yet completed, "he thought he might safely say that the work would go on this fall (sic) and be finished by sisting of city property and public schools. can be made in Canada and exported with the end of next year;" that he had not

asked money for the branch lines while in England; that there is sure to be "a first-class line of steamships running between Vancouver and Yokohama and Hong Kong by the time the C.P.R. is completed," making the shortest and most expeditious route.

TO CORRESPONDENTS.

A. L., Winnipeg.—"Can you inform me if the Hartford Life and Annuity Company has made any deposit with the Canadian Government since July 12th, and if not, could a claim against them be collected in a court of law, and by what process." [We do not find the name of the company in question amongst those licensed to do business in Canada, and understand it has no deposit at Ottawa. This being the case, we do not see what chance there is of realizing anything upon a Canadian claim against the company.]

meetings.

LIFE ASSOCIATION OF CANADA.

The following is the report submitted to the stockholders of the Life Association of Canada by its directors:

REPORT.

The Directors beg to submit the annual statement of the Association's business:

1,400 policies were in force at the beginning of the year for...\$1,833,212 849 new policies were assued during the year for..... 485,516

1,749 \$2,315,728 475 policies were cancelled during the year for 709.182

1,292 policies remained on the books in force at the end of the

There is thus a falling off in assurance to the extent of 223,666

It is with great regret the directors have to report the unfavorable state of affairs exhibited. Although the solvency of the association is undoubted, it has been made quite clear to the directors that the business cannot be worked so as to yield a surplus from which bonues could as to yield a surplus from which bonures could be paid to the policy-holders. They have now unanimously come to the conclusion that it would be for the interest of members to have their policies replaced by those of a company of approved position, in which the results realized in the past would afford a guarantee for future profitableness. They give their preference for this purpose to the New York Life Assurance Company, now licensed and established in Can-Company, now licensed and established in Canada, as an institution offering peculiar facilities and advantages, and possessing such financial strength as to command confidence. An arrangement is being made by which the policyholders desiring to effect an exchange into that office may do so on highly favorable terms. The excessive expenditure necessitated by the keen and crowing competition for hysiness having been growing competition for business having been one of the chief causes of weakness, the directors at once on realizing the downward tendency, discontinued all active measures for obtaining new assurances, and thus already something has been effected in the way of improvement in the financial position of the association. Lately it was thought well to entirely give up issuing new

JAMES TURNER, President. JOHN CAMEBON, Manager.

Hamilton, December 8. 1884.

ENGLISH OPINIONS ON AN INSOLVENCY ACT FOR CANADA.

Sir John Macdonald, accompanied by Sir Charles Tupper, had an interview with the representatives of the Associated Chambers of Commerce, in London, England, upon the 27th ult. The conference had reference to the dishonest preferences which, since the repeal of the Insolvency Act of 1875, had been continually given by debtors in Canada to favored creditors. The representatives of the Boards urged that if it were not put an end to by a bankruptcy law or public registration of preferential claims, it would be a great impediment to trade between Great Britain and the Dominion of Canada. The deputation consists of Mr. Norwood, M.P.,

the president of the Chambers, and Mr. Leaf (London), Mr. T. F. Firth (Heckmondwike), Mr. Melliss, Mr. E. J. Hole, and Mr. E. W. Fithian. Mr. Norwood, M.P., briefly introduced the subject, when, says the London Times, Mr. Leaf stated that the want of a bankruptcy law in Canada was producing a serious state of in Canada was producing a serious state of things, and in the London market the trade with Canada had become almost a by word. The question of the national credit was one of a mag 1,550 00 nitude which it would be desirable that the Canadian Government should take up by endeavoring to corry through some sort of general bank ruptoy bill which would make fraudulent preferences in Ontario and the Lower Provinces as few

as they hoped they were in Quebec.

Mr. T. F. Firth (Heckmondwike) said that
what they complained of in respect to trade with Canada, was that it was exceedingly injurious, not only to British merchants, but to the Canadian merchants themselves, and that it was a direct incentive to fraud. If a man failed they found that he made a statement that his rela-tives had a prior claim, and these preferences were given without any publicity. Every trader were given without any publicity. Every trader should be compelled to register all preferences publicly, and any debts contracted prior to the registration should have priority.

Mr. Melliss complained that generally in large

failures in Canada, the European creditors had

not got a cent.

Sir Charles Tupper remarked that when, a few years ago, Sir John Macdonald tried to re-enact

a new bankruptcy law, he was outvoted. Sir John Macdonald said that the matter was discussed, and there was a preponderating feeling that the Bankruptcy Act had encouraged reckless trading. He might remark that all the preferential claims were not fraudulent, for a man would naturally go to his relatives to borrow money to tide him over his difficulties.

Mr. Firth—But it is an encouragement to fraud; and it is used for fraudulent purposes.

Sir John Macdonald—What are the provisions

of the English Bankruptcy Act?

Mr. Leaf—The only way in which a preference could be given in England was by a man giving a bill of sale, and that was registered and it

stopped his credit. Mr. Firth mentioned a case where a debtor in

New Brunswick classified his debts into four classes—first, to clerks; second, to his relatives; third debts owing to Canadians; and fourth, debts he owed to the English.

Sir John Macdonald, in reply, said that the objection to fraudulent trustees was a very natural and a very obvious one, and it was very clear that preferences of every kind were to be avoided. It was very difficult to deal with the walls to the said of the s Sir John Macdonald, in very difficult to deal with the subject in Canada in consequence of the provisions of the Constitution. The law of contract is governed in each Province by its own legislation, and the Federal Parliament has no right to interfer with the law in any one of the Provinces which affects contract, with the onesingle exception that the Federal Parliament has the right to deal with the general subject of insolvency and bankruptcy, so that it can pass an Act on matters of insolvency and bankruptcy which would have the effect of depriving pro tanto the Provincial Legislatures of their right to deal with contracts quo ad in the case of bankruptcy and insolvency. Therefore the difficulty was this—that if they could not get a general Act of bankruptcy or insolvency from the Federal Parliament, that Parliament had no power to deal with the question of preference—that must be left to the Local Legislature of each Province. ture of each Province. There were certain protectionists in Quebec and Ontario where fraudulent preference was always set aside on fraud being proved. But if, as had been suggested in New Brunswick, there were no protections, it worked very hershly, and it must be an encouragement to fraud. In Quebec he encouragement to fraud. In Quebec he knew there were certain protections against fraudulent preferences, and concealed private preferences. In the Province of Ontario bills of sale must be registered. There was no publication in official gazette; there was no notification given. But any creditor of the person could search at the Registry of Land office of the county or the town and ascertain whether any bill of sale had been filed against the property of any individual. Therefore the Government and the Federal Parliament were both powerless to deal with the subject, unless by the enact-ment of a general law of bankruptcy or insolvency.

They had such a law, but it was found, or thought, to have a demoralizing effect on young men without capital, speculative persons, and others, who went into business and got (from the competition among merchants) credit too easily; competition among merchanish credit too easily; and these people went on for a little, living expensively, and knowing that by going into the court they could get their discharge and commence de novo, be whitewashed and stort again. It was believed in Canada that a greater check the chained by the against dishonesty was to be obtained by the repeal of the Act, and leaving the party liable to the debt which he had incurred for all time to In Canada at present no person could come. In Canada at present no person could get relief from the courts from the obligation that he had come under to his creditors. He was liable to be followed to all parts of Canada and the United States, and in

Canada the merchants looked after these A debtor was a and followed them. slave to his creditor—he could not get into business or earn his bread in consequence of the burden of debt hanging over him. The general belief was that a creditor had a better chance of getting his debt paid so, than by threatening the man with the Bankruptcy Court. That feeling was so strong that the Act was repealed. Several attempts had been made to re-enact a bankruptcy law of some kind; but there was a general objection to the enactment of a new law, and when it was last discussed in their Parliament it was thought better on all hands that they should wait to see what was the working of the English Act. He understood that it was not working satisfactorily. and he saw from the commercial papers that very many estates were wound up by private arrangement instead of going into court quence of the English Act. It would be very difficult to pass a satisfactory bankruptcy Act. England has been trying ever since the time of Queen Elizabeth, and has not succeeded, and he feared would not succeed in this. Perhaps the reason was not far to seek. What was every body's business was no man's business. No matter how good an Act, unless the provisions were followed out, and the bankrupt punished, and unless there was a united effort to follow up the bankrupt, the results were not satisfactory. He believed, however, the majority of commercial men in Canada were in favor of the re-enactment of a Bankruptcy Act.

THE COAL TRADE.

The week since our last edition has been a quiet one in the Anthracite coal trade, due as much as anything to the very mild weather which has been the rule, and not the exception; the very wild stories and rumors which are daily set affoat in the city press, have also had their effect in keeping back some would-be purchasers of coal, although it is beyond question that these tales are told for the use and benefit of speculators only. As we stated some weeks ago would be the case, we have now reached the close season with its reduced volume of trade, and therefore dulness is not unlooked for at this time of year, by any one with any knowledge of the coal trade. By the official tonnage statement for November, it appears that we did three million tons and the total, to the first of this month was 28,087,556, tons as against 29,659,tons, a decrease of 1,572,329 tons. When we consider that the year 1883, with its 31,793,000, was the largest in the record, such a result as 1884 shows is not a bad one. The decrease is due largely to the fact that dealers are not carrying the stocks they formerly did, and it is not necessary that they should do so, as the facilities for producing and forwarding are nearly as good in winter as at any other time; the place to carry stocks of coal is in the mine, and that is where it is-a good asset for the future. It is almost unnecessary for us to state to our readers (for we believe they know something of the coal trade) that there has been normally eighty cents per ton less realized on the thirty millions of Anthracite mined and sold, as is stated by certain daily newspapers. Price often stated by certain daily newspapers.
lists this year, as we have said, have been merely a certain lists this year, as we have often said, have been merely a certain some-thing from which to discount, as the market was active or dull, but it is manifestedly unfair and untrue for any one to make such a statement as that the companies have lost twenty-four million dollars this year. It should be remembered that not more than forty per cent. of the total shipments enter the tide of competitive markets. If the prices had been eighty cents a tons higher all round, then the companies would have made twenty-four million dollars more than they have made.

Bituminous runs along in about the same shape as heretofore; the tonnage is large and the price is low. We do occasionally hear that something will be done next year, to bring about a higher range of prices, but the elements are so diversified that it will be hard work to make an effective pool in this variety of coal. It is selling for less than its value, either as a steam producer, or in comparison with other fuels, and this state of affairs has been brought about by the over-production and the competion of the carriers to secure tonnage. All the mines in the Georges

Creek region are at work, and those in Elk Garden also. We hear of nibbles for next year's trade already, and note one instance where a bid of \$3.25 at Boston was named; this means low tells on the railroad carrying it. By the way, the Anthracite operators do not strive to compete with soft coal on Broken, but they offer Pea, Buckwheat and Culm at rates which are less than good Bituminous.—Coal Trade Journal Dec. 17.

THE NEWFOUNDLAND DRY DOCK.

The following are the dimensions of the new dry dock just completed at St. John's, Newfoundland, by the Messrs. Simpson of New York, at a cost of \$550.00C :-

Length on top from inside of head measured upon centre line, to gate ..600 ft

Width on top at head..... 4 ins Width on top at abutment...... 85 ft Entrance between piers........... 150 ft Bottom width at hoad...... 16 ft Bottom width of first angle...... 49 ft 10 ins

Width to inner end of abutment.. 46 ft 10 ins Width through the abutment as far 78 ft 8 ins

Draft of water over gate sill at high

Atlantic, and takes the largest ship affoat, cargo Atlantic, and takes the largest ship afloat, eargo and all, except the Great Eastern. Messrs. Simpson not only build the dock but have agreed to operate it for ten years at a rental of \$15,000 a year. The interest on the cost of the dock is \$24,000 a year, so that the government loses \$9,000 a year nominally. But this sum is expected to be made good by the increased revenues of the port of St. John's and the advantages in the way of employment of labor and the disbursements in connection with the dock. The Messrs. Simpson who are the patentees of this particular style of wooden dry dock, now operate two docks in New York, which they completed in 1881. In one of these, two years ago, the steamship City of Berlin was docked for six weeks, the dockage alone footing up to \$39.000. At the same time, in their other lock at New Yo k, a French steamer paid \$23,-000 for dockage in about the same length of

The dock at St. John's is the third in British America, there being one at Quebec and another at Esquimalt, British Columbia. The two latter are of stone and not yet completed. dock is usually from four to eight years in building, the wooden dock can be built in eighteen oths, but that at St. John's was really in thirteen months, an average of 300 men being employed .- Halifax Chronicle.

THE NEW CONGO STATE.

The Congo conference has virtually dispatched the greater part of its business, and with remarkable unanimity. The African International Association has been recognized as to all interests and purposes a state. The powers of defence, of preserving order, and of making treaties have been guaranteed to it. And if the conference decides that any duty is to be placed on im-ports, the association will have the power to im-

The conference divided upon the commercial limit to the territory of the association and not the geographical. A broad strip of country on each side of the Congo. and stretching through to the Indian ocean, will be assigned to the new Within the bounds of this vast region it will be charged with the responsibility of maintaining peace, protecting trade and developing the rich resources that are found there.

The expenses of the association have hitherto been borne chiefly by the King of the Belgians. It is said that he has contributed \$2,500,000 towards the undertaking already and pledged \$200,000 for its maintenance. But this will be \$200,000 for its maintenance. But this will be only a fraction of the cost which will necessarily be incurred in the development and government of so great a territory, and it is probable that small import duties will be levied on the trade of the Congo to defray expenses.

The question of the Niger is a more difficult ne. Great Britain so far has taken the position one. Great Britain so far has taken the position seem to have all ordered in moderation, that she will guarantee free trade and protection to the navigation of that river, but will not some of these purchases are now beginning to

admit the right of the conference to claim or exeroise authority in the matter. By the settle-ment of the Congo question, the continent of Africa is opened to European commerce and attendant civilization.

CANADIAN PRINT BUYERS.

The Canadian buyers have nearly finished their purchases for the spring. These have smaller than usual, particularly in prints. These have been addition to over supplies last season, the Canadians now have a print works of their own, and in low goods, notably, the English market cannot compete. The protective duty is 27 per cent. on the cost in England. For rovenue purposes, grey and white cottons have almost ceased to be a source of income to Canada. Possibly this will soon be the case with prints and what good to Canada or the Canadians? The owners of cotton mills have got none. The high duties on prints make the Canadians now use the poorest cloths printed for civilized or semi-civilized people in the world. The trade of Canada is largely in the hands of Scotchmen, who can cast up figures well enough. What are they about? Cannot they face the facts? And if Canada is obliged now and then to take goods from America, at a lower price than America can produce them at a profit, why cannot the Canadians submit to the infliction? No doubt the ans submit to the infliction? No gouds are Americans used Canada as a slaughter house for their over-production. These Scotchmen with long heads can tell you very well whether this made the Canadian people richer or poorer.— Manchester Warehouseman and Drapers' Jour-

-The wheat trade was lively last week at different points in Southern Manitoba, especially at Manitou. At that place one day, the rush to the Farmers' Union elevator was so great that 68 loads had to wait over for delivery, and the crowding continued next day

An English paper states that a farmer in West Suffolk recently bought 1.000 sacks of American flour at 17s. per sack, for the purpose of subjecting the flour to a process of baking before placing it in the mangers of his fattening Christmas stock.

Commercial.

MONTREAL MARKETS.

MONTREAL, Dec. 24th, 1884.

Asnas.—The market is weak. Stocks of Canadian ashes in Glasgow and Liverpool are reported as accumulating, and the demand decreasing, as manufacturers are substituting the cheaper German carbonates, etc. No. 1 pots are now selling at \$3 60 to 3.65, seconds about \$3, though odd bbls, have been hought at \$2.90. Pearls weak and nominally \$4.75. Receipts continue very light; stocks at present in store

here about 1,400 brls. pots, and 185 pearls.

DRUGS AND CHEMICALS — We find no change to be noted in these lines. Quinine is firm at to be noted in these lines. Quinine is firm at the late advance; heavy chemicals are all as before quoted. Business, as is to be expected, is without life. We quote:—Sal Soda \$1.10 per 100 lbs.; Ri-Carb. Soda, \$2.50 to \$2.60; Soda Ash \$1.65 to \$1.75; Richromate of Potash, per 100 lbs., \$8.50 to \$10; Borax refined, 11 to 12\forall c, \(\text{Cream Tartaric Acid crystals}, \(52\hat{1} \) to 550.; do nowders Tartaric Acid crystals, 52½ to 55c.; do. powder; 55 to 58c. per lb.; Cautic Soda. white, \$2.40 to 2.60; Sugar of Lead. 9 to 11c.; Bleaching Powder, \$2.50 to \$3.00 according to lot: Alum \$1.85 to \$2.00; Copperas, per 100 lbs., \$1.00; Ground Sulphur, \$2.75 to \$3.00; Flowers Sulphur, sublim per 100 lbs., \$3.00 to \$3.25; Roll Sulphur, \$2.40 to \$2.60; Sulphate of Copper, \$5.75 to \$3.50; Epsom Salts, \$1.25 to \$1.40; Salt, \$4.75 to \$3.60; Sulphate of Copper, \$5.0 to \$3.50; Epsom Salts, \$1.25 to \$1.40; Salt, petre, \$9.00 to \$9.50; German Quinine, about \$1.20 to \$1.30; American do., \$1.30 to \$1.35; Howard, \$1.30\tauterous to \$1.30; to \$4.50; Morphia. \$2.20 to \$2.30; Gum Arabic, sort, \$2 to \$3c; White, 40 to 55c; Carbolle acid, 45 to 50c. Iodide Pota*sium. \$4.00 to \$4.25 per lb.; Iodine, \$5 to \$5.50; Iodoform. \$7.00 to \$7.50.

DEX Goods.—Wholesale circles remain quiet, and activity is not looked for at this time which is supposed to be the retailers, specially busy season. Buyers are mostly home from Europe, and seem to have all ordered in moderation, some of these purchases are now having a second seem.

arrive. In cotton circles the general topic of conversation is the sale by the Valleyfield mills to Messrs. J. MacDonald & Co., of Toronto, of the whole of their stock of white cottons, the sale amounting to some \$40,000. It is stated that no more white cottons will be made at these mills, but that their attention will be devoted to the production of sateen, glove finished linings, colored balistes, foulards, &c. They already have some of these lines on the market, and of such excellent quality and cheapness that some houses have given up buying such goods abroad altogether.

Geographics.—Travellers are getting off the road for the holidays, many houses are about stockt king, &c., so that a quieter time may be looked for during the next fortnight. Payments in this line are reported fair. Sugars are again easier; a 500 brl. lot of granulated could probably be got at 6 cents, while ordinary lots from refinery would be from 6½ to 6½c.; yellows are also off about ½th. The demand is slack. Japan teas may be called 2c. a lb. stronger all around from the point of a fortnight ago; blacks and greens are unchanged. Rice still \$3.40 to \$8.50; the mill is reported getting short of stock. Valencia raisins are selling at 9½c, and will probably be 10c. in a few days, and are scarce at that, in fact hardly to be had at all. Of layers the market is cleared. Currants at the moment scarce, but further supplies expected. Nothing new in prunes or figs, except that the latter are getting within narrow compass. Sardines firm at 11½c. There are reports of a bull movement in pepper in England; prices here 17 to 17½c. for black; white, 25c. Almonds, filberts, and walnuts all scarce and dear.

FLOUR.—Business, which was dull and quiet, is a little more active at the moment. Values are pretty steady, and we quote: superior extra, \$3.70 to \$3.80; extra superfine, \$3.60 to \$0.00; fancy \$3.45; Spring extra, \$3.35 to \$3.40; superfine, \$3.20; to \$3.25; strong bakers' (Canadian), \$3.70 to \$3.80; strong bakers' (American), \$4.00 to \$4.25; fine, \$2.90 to \$3.00.

Fish.—There is nothing of consequence doing, nor will there be for six weeks or, till lent begins. We make a few changes and quote: Labrador herrings, \$5.50; eastern shore, \$4.75 to \$5; fat July, C. B, \$5.25; dry cod, Graspe, \$4.50; American cod, \$3.25; green cod, No. 1 being sold at \$4.00 to \$4.25; large No. 1, \$4.75 to \$5; No. 2 about \$3.25; North Shore salmon, \$14, \$13, and 12 for Nos. 1, 2, and 3 respectively; British Columbia salmon, \$11; Mackerel, \$4 to \$6; lake trout \$4.25 to \$4.50.

Fuss.—Raw furs still come in plentifully, but as the manufacturing for local wants is about over, prices are likely to ease off, for only the shipping value can be realized from this out. Mink continues rather a drug. 75c. is being paid for strictly prime skins, but the average would be probably 50 to 60c. We quote for prime furs: Beaver, \$2.75 to 3.00; Bear, \$8.00 to 10.00; do., cub, \$4.00 to 6.00; Fisher, \$6.00; Red Fox, \$1.00 to 1.20; Cross do., \$2.00 to \$3.00; Marten, \$1.00 to \$1.10; Lynx, \$2.50 to \$3.00; Mink, 75c to 0.00; Muskrat, 8 to 10c; Otter, \$8.00 to \$10.00; Raccoon, 50c average; Skunk, 40 to 60c. Leather—The present is always a dull time among boot and shoe manufacturers, as the hands "knock off" till after old Xmas, and consequently there will be little buying done till after the first week of the new year. Spanish sole is rather weaker, owing to slack demand

LEATHER—The present is always a dull time among boot and shoe manufacturers, as the hands "knock off" till after old Xmas, and consequently there will be little buying done till after the first week of the new year. Spanish sole is rather weaker, owing to slack demand and full stocks. Upper leather generally remains at old figures; splits quiet and not much shipping being done. We quote: Hemlock Spanish Sole B. A 24 to 27c., ditto, No. 2, B. A. 21c. to 24c; No. 1, Ordinary Spanish, 24c. to 25c; No. 2 ditto 22c. to 23c; No. 1 China 23c. No. 2 21c. ditto Buffalo Sole No. 1, 21 to 22c. ditto No. 2, 19½ to 21c. Hemlock Slaughter, No. 1, 26 to 27½c; Waxed Upper, light and medium, 33 to 38c; ditto ditto heavy, 1s3 to 36c; Grained, 34 to 38c. Splits, large, 23 to 30c.; ditto small, 16 to 24c. Calf-shine (35 to 36 to 36); Imitation French Calishins. 30 to 85c; Russet Sheepskin Liebing. 30 to 85c; Russet Sheepskin Liebing. 30 to 85c; Russet Sheepskin Liebing. 30 to 16c. Patont Cov., 15 to 16c. Peobled Cow., 11½ to Patont Cov., 15 to 16c. Peobled Cow., 11½ to 155c. Rossyh, 28 to 28c. Russet & Bridle, 155c. Rossyh, 28 to 28c. Russet & Bridle, 155c.

METALS AND HARDWARE.—Some houses report a few fair orders of car lots of iron; but business generally is no more active than for weeks

past. The home market for pig iron shows no particular change; warrants, which had dropped somewhat, seem to have taken a turn upward, and last figures were about 42/5d. The market for tin and copper is very uncertain, but local prices are very little affected except for large transactions. Tin and Canada plates are unaltered, as also is bar iron. Hardware men are quiet, and in their line there are no changes to note. We quote: Gartsherrie and Summerlee \$19 to 19.50. Langloan, \$19.50; Coltness, \$19.50 to 20, and very searce; Eglinton, \$17.50; Dalmellington; \$17.25 to \$17.50; Calder \$19.00 to \$19.50; Hematite \$20 to \$22.50, according to brand; Siemens, \$19.00 to \$19.50; Bar Iron still \$1.70 to \$1.75; Canada Plates about \$2.90. Charcoal I C \$4.60 to \$4.75 as to brand; do. I X \$6.25 to 6.50; Coke I C., \$4.25. Galvanized Sheets, No. 28, 6 to 7c. secording to brand; Tinned Sheets, coke, Nos. 24 to 26, 63 to 74c.; Hoops and Bands per 100 lbs., \$2.25; Sheets, Boiler Plate, per 100 lbs., \$2.25; Sheets, Boiler Plate, per 100 lbs., \$2.25; Sheets, Boiler Plate, per 100 lbs. Staffordshire, \$2.50 to \$2.75; Steet Boiler Plate \$3.25 to \$6.50; best cast Steet, 11½ to 12c; firm; Spring, \$3.25 to \$3.50, firm; Tire, \$3.25 to \$3.50, firm; Fire, \$3.25 to \$3.50, f

OILS AND PAINTS.—In both oils and paints matte s are flat and dull. Prices of fish oils are pretty much nominal; we quote, steam refined seal 60 to 62c; pale vat 55 to 57½c; straw 52½ to 55c, Newfoundland cod, 57½ to 60c; Halifax do. 55c; good liver oil, \$1.15 to 1.20. Linseed is quiet at home and quotation; here for raw is about 58 to 59c, 60 to 62c for boiled; turpentine firmer in the south, but still about 50c here. Leads at home are quiet and dull. We quote White Lead (genuine and first-class brands only) \$6.25 to 6.75; No. 1 \$6.50 to 6.00; No. 2, \$5, to 5.50; No. 3, \$4.50 to \$4.75. Dry White Lead 6 to 6½c; Red do. 5 to 5½c. These prices for round lots. London Washed Whiting 50 to 60c; Paris White \$1.25; Cookson's Venetian Red \$1.75 to 2.00; Yellow Ochre, \$1.50; Spruce Ochre. \$2 to \$3.00.

Ochre, \$2 to \$3.00.

Provisions.—The demand for butter is only of a local jobbing nature, and values tend to weakness. Creameries 20 to 24c. as to make and quality. Townships 18 to 21c.; Morrisburg, 16 to 18c.; western, 16 to 17c. for selected; cheese firm at 11½ to 12c. lor choicest; ordinary fall 9 to 11c. Eggs sell readily at 25 to 26c. for strictly fresh. The pork market is almost lifeless; we quote western mess, \$14.75 to \$15; Canada short cut about \$16; dressed hogs about \$6.25 to \$6.50; lard 10 to 10½c.; hams, 14 to 15c.; bacon 13 to 14c.

Salt.—Very little doing and prices exactly as before:—elevens 60c.; twelves 57½c; factory filled \$1.25 to \$1.40; Eureka, \$2.40.

Wool.—Nothing noticeably new in this line, business continues slack, and prices unchanged. We quote: 27 to 28 cents for A. supers; 22 to 24c. for B. do.; black, 21 to 22c.; unassorted, 22 to 23c.; Cape, 16½ to 18c.; Australian, 19 to 28c.; as to quality.

TORONTO MARKETS.

Toronto, Dec. 24th, 1884.

Christmas Day coming on Thursday, we must visit the wholesale markets a day earlier in the week, since neither merchants nor printers, with a proper appreciation of the day, can be expected to work on Christmas. The weather has happily assumed an aspect suitable to the occasion. After alternate thaw and severe frost, which has hardened the roads, we are now favored with an abundant fall of snow, and its effect upon city trade, both wholesale and retail, is marked. The grocery importers are busy selling fruit, the hardware dealers skates and plated goods, the dry goods men fancy wares, the provision dealers hams, turkeys and fowls, the jewelers, the stationers, and the confectioners are as busy as they can well be. But no such business comes in the way of the flour and grain men. Boot and shoe houses, leather and hides dealers, wool merchants find matters dull.

On the Stock Exchange, business has been decidedly of a holiday character, transactions being rare and dealings small, which led to an adjournment after the morning session on the 24th until the 29th inst. Quotations for Bank stocks vary irregularly from last week though the changes have only been fractional. On the announcements of reductions in the dividends Insurance stocks have been lower, British declining 6 per cent. to 83 bid, while Western closes 5 down, at 86 to 86\frac{3}{2}. In other stocks there eas been literally nothing doing. At the close the feeling continued firm for the general list.

CATTLE, ETC.—The market cannot be called active. In the St. Lawrence market there is a marked falling off from the activity of a year ago. Butchers say that people buy with far less freedom. Cattle dealers have sold beeves, Christmas cattle, at from 5½ to as high as 7c. per pound live weight, but for the average run of good butchers' cattle which have been plentiful, 4 to 5c has been the rate since mid month, demand has fallen off this week. Sheep.—We hear of a purchase of a lot on Tuesday last at \$3.75 live weight for 130 lbs. average. Lambs have sold at \$4.50 to 5.00. There is a good deal of venison offering, it offers to-day at 5c per pound, with skin and horns, a low price. Poultry is plentiful, prices for these and for hogs quoted under provisions.

FOUR AND MEAL.—There has been no movement of flour, and the market is dull, with lower prices in the cheaper grades. We quote superior extra \$3.40, to \$3.45; extra \$3.25 to \$3.30; spring extra, \$3.15; fancy \$3.15. Oatmeal dull and unchanged. Bran steady at \$10.00 to \$10.50.

Grain.—The feeling can scarcely be called improved. Transactions have been moderate. Wheat we hear of no spot lots moving, but some sales have been made at outside points, 74c. was offered for No. 2 fall without bringing about a sale Barleyhas moved with some freedom from outside points for export at equal to our quotations. We hear of sales of from 5 to 20 cars. This grain has been brought out by the farmers much more freely than wheat. Oats are steady. Peas firm, corn and rye nominal.

firm, corn and rye nominal.

Groceres — Activity is very perceptible in the demand for fruit, and the scarcity of Valentia raisins has been somewhat relieved by the receipt of some since our last. What few are now in market are held at 9½ to 10c., but are hard to get. Currants, sound, are as quoted, raindamaged are offered at from 4½ to 5½c. Patras and Vostizza quotations are for sound fruit, damaged can be had much lower. Sugars continue weak, we quote Porto Rico, dark to fair, 4½ to 5c.; bright to choice, 5½ to 5½c; Canadian refined, 4½ to 6c; granulated, 6½ to 6½c; standard, do 6½ to 6½c; off standard, 6 to 6½c. In tess, we make some changes of quotation.

Hides and Skins.—Business is a little on the

HIDES AND SKINS.—Business is a little on the dull side, car-lots of cured sold last week at 8\frac{3}{2}0.; we believe an eighth more has been obtained for small parcels. Sheepskins, fresh, are this week advanced to 90c. Tallow, rough 3\frac{1}{2}c. rendered 6 to 6\frac{1}{2}c.

Provisions — Receipts of hogs have been freer at this point, and the market has been steady at \$5.75 to \$6, outside price only for choice stock. The demand for product is of the most limited nature and quotations are unchanged. Dullness continues in butter; recent English advices state that commission houses there will only advance 50s. per 112 lbs. against western dairy. The outlook is certainly not cheering to holders. Cheese is steady and unchanged; cable, 62s. 6d. Hops, there is no activity and the feeling is weak; we hear of no large transactions; small sales have been made within our range, the outside figure for choice. Supplies of poultry have been large, turkeys selling at 11 to 12c. for choice dry picked stock, and ducks 60 to 70c per pair. Geese, 7 to 7½c per pound.

Petroleum.—A despatch from Oil City, Pennsylvania states that sales of oil on Saturday were 3,164,000 bris. Oil opened at 76c; closed at 74 $\frac{1}{2}$ c. On the 23rd, oil opened in New York at 76c and closed at 75 $\frac{1}{2}$ c.

Woon.—The market is dull and lifeless. So near the end of the year mills are not disposed to buy until stocktaking is over. Ordinary fleece may be quoted at 16 to 19c, and the best will be sold by dealers at 20c; a car-load was offered at 19c since our last and not taken. Canadian Southdown is scarce; more of it, and purer, should be raised in Ontario (the crosses affect the quality, for pure English will bring 28c while not more than 23 is paid by our dealers). We have to ship our coarse Leicester

wools to the States, while we import fine grades from abroad. Pulled combing is beginning to come in, 16 to 17c would be accepted by dealers here; none has sold at 18c for some time, Super is offering at 21c; one dealer says he has 50,000 lbs. to sell at that figure. For Extra, 25½c has been paid this week, small sales are reported at 26½c.

British Mortgage Loan Co'y

DIVIDEND NO. 13.

Notice is hereby given that a dividend at the rate of Seven per cent. per annum

on the paid up Capital Stock of this Company has been declared for the half year ending

DECEMBER 31st, 1884,

and the same will be payable at the office of the Company in the Town of Stratford, on and a ter

CARD.

We, the undersigned, desire to express our sincere thanks to the "CITIZENS' INSURANCE COMPANY OF CANADA" for their promptness in sending their cheques in full settlement of our losses by the late fire. Claim papers only reaching Montreal on Monday and their cheques for the same being issued on Tuesday, shows us plainly that they fully appreciate our immediate requirements in this serious calamity by which we so recently suffered. NOTICE TO CREDITORS.

Of William John Twomey, of the Village of McGregor, General Storekeeper.

Notice is hereby given that the said William John Twomey has made an assignment of his estare and effects to Henry W. Darling, of the City of Toronto, in trust for the benefit of all his creditors, and that persons having claims against him are required to send in their names, residences, and particulars of their claims, and the nature of security (if any) held by them, by letter, prepaid, addressed to the undersigned, agent for trustee, on or before the 2nd day of February, 1885.

And notice is hereby given, that after that date the said trustee will proceed to distribute the assets of the said debtor among the parties entitled thereto, having regard only to the claims of which notice shall have been given, and that he will not be liable for the assets, or any part thereof so cistributed to any person or persons of whose debt or caim he shall not then have had notice.

E. R. C. CLARKSON.

E. R. C. CLARKSON. 26 Wellington St. East, Toronto.

Toronto General Trusts COMPANY.

27 & 29 Wellington St. East, TORONTO.

President-Hon. EDWARD BLAKE, Q.C., M.P. Vice-President-E. A. MEREDITH, LL.D. Manager-J. W. LANGMUIR.

Directors—Hon. W. McMaster, Hon. Alexander Morris, B. Homer Dixon, Amelius Irving, William Elliot, Wi liam Mulock, M.P., Geo. A. Cox, William Goodenam, J. G. Soott, Q.C., James J. Foy, A. B. Lee, James Maclennan, Q.C., J. K. Kerr, Q.C., T. Sutherland Stayner, W. H. Beatty and Robt. Jaffray.

The Company acts as Executor, Administrator and Guardian, and receives and executes Trusts of every description. These various positions and duties are assumed by the Company, either under Deeds of Trust, Marriage, or other settlement executed during the life-time of the parties, or under Wills, or by appointment of the Court.

by appointment of the Court.

The Company also undertakes the investment of money in real estate mortgage securities; collecting and remitting the interest fer a moderate charge. It will either invest the money as agent in the usual way; or should the investor prefer, it will for an extra charge, guarantee the principal and the prompt payment of the interest on fixed days, yearly, or half-yearly. Mortgages thus guaranteed and taken in the name of the investor, are the safest class of investments, and specially commend themselves to Trustees, as well as to Municipal Corporations and Public Companies desirous of establishing Sinking Funds.

The Company also acts as agent for the collection of interest or income, and transacts financial business generally, at the lowest rates.

Railways

Intercolonial Railway.

THE GREAT

CANADIAN ROUTE

TO&FROM the OCEAN

For SPEED, COMFORT, and SAFETY

IS UNSURPASSED.

Pullman Palace Day and Sleeping Cars on through Express Trains.

Good Dining Rooms at convenient distances. No Custom House Examination.

Pullman Cars leaving Montreal on Monday Wednesday and Friday run through to Halifax, and on Tuesday, Thursday, and Saturday to St. John, N.B., without change.

Passengers from all points in Canada and Western States to Great Britain and the Continent should take this route, as hundreds of miles of Winter navigation are thereby avoided.

navigation are thereby avoided.

IRLPORTERS will find it advantageous to use this route, as it is the quickest in point of time and the rates are as low as by any other. Through freight is forwarded by fast special trains, and experience has proved the intercelental route to be the quickest for European freight to and from all points in Canada and the Western States.

Tickets may be obtained, and also information about the route and about freight and passenger rates from

BOBT. B. MOODIE.

Western Freight and Passenger Agent, 98 Rossin House Block, York St., Toronto

D. POTTINGER, Chief Superintendes
