

TWENTY-FIFTH ANNUAL REPORT

OF

The Hospital for Sick Children

College Street, Toronto,

AND THE

Lakeside Home for Little Children

The Lighthouse Park.
Toronto Island,

FOR THE YEAR ENDING SEPT. 30th, 1900.

Embracing the Medical, Financial and General Reports
of the Work.

1900:
TORONTO.

— 2 —

“They are idols of hearts and households.”

“And what would the world be to us
If the children were no more?”

Help us in Our Great Effort to Gain Financial Freedom.

\$19,000

Will pay off the entire indebtedness of the Great Mother
Charity that has cared for 40,000 sick children of
Ontario during the past twenty-five years.

CAN YOU HELP US WITH A DOLLAR ?

Consider this as a personal demand, to be repaid you by the smiles from the
thousands of little ones, who will be nursed and cared for by this institution in the
years to come.

**We Appeal to you for Aid in this our Jubilee Year—
Our Year of Great Effort.**

Your dollar will bless you in the giving.

Your giving will be a much needed help, when help is most needed.

Give what you can—as much as you can spare.

\$19,000—A QUICK GIVER GIVES TWICE.

If you could but walk through the Hospital and see the nature of the work, the
thorough system and equipment, the Hospital would not need to further beg.

If you are visiting Toronto, visit the Hospital. 'Tis a grand work—a noble charity.

SEND YOUR DOLLAR TO

**The Hospital for Sick Children
WANTS YOUR AID.**

YOUR MONEY—Just what you can give is the best gift that Benevolence, prompted by Charity, can offer to suffering humanity.

We want Just \$19,000 to Free the Great Charity from the load it carries.

This is our Silver Jubilee Year

We have in Twenty-five years cared for about 40,000 Children.

Nearly 800 a year from all parts of Ontario are treated within its walls.

It costs about one dollar per head per day to keep a patient.

Read with pitying eye and then respond with cheerful heart to this appeal for help.

Every dollar—yes, a single dollar—helps.

In the joy of your Christmastide remember the poor sick children and bring them joy and gladness.

Contributions may be sent to—

J. ROSS ROBERTSON, or DOUGLAS DAVIDSON,
Chairman. Sec. Treasurer.
HOSPITAL FOR SICK CHILDREN, COLLEGE STREET, TORONTO.

THE HOSPITAL FOR SICK CHILDREN.

TWENTY-FIFTH ANNUAL REPORT.

The Trustees of The Hospital for Sick Children beg to present to the people of Ontario the Twenty-fifth Annual Report of the work of the Charity.

This report covers the work of the institution for the year ending 30th September, 1900. It also marks the closing year, not only of the century, but of twenty-five years of hospital effort in the nursing of sick children who have sought relief within its walls.

The generous people, who, for so many years, have stood by the Hospital in its struggle for life, may look at it to-day with pride, as it stands in the front rank of the hospitals of the Dominion, perfect in equipment, a standard and model for any institution in the world embracing the same field of labour.

Annual reports are generally—indeed mainly—statistical, and, therefore, perhaps uninteresting to the general reader. Yet without figures no idea of the work accomplished can be given.

There are, however, annual reports and annual reports, and this differs in many regards from stereotyped accounts of hospital endeavor.

In some particulars the results attained are unique, while in all regards the work specially commends itself to every father and mother in the land, who love the child-life that this charity seeks to preserve.

Surely no one can read the printed words which tell of great results in this work, so dear to all, without feeling that human interest must be magnetized, and with it all that is loveable in human hearts must go out to those whose day-dream is to give health and strength, life and comfort to sick little ones, and thus gladden homes that but for the Hospital's help would be darkened by the shadow of sorrow and death.

The work that this Trust has in charge has grown by leaps and bounds. The figures marshalled at the end of the year show a record for good that is a credit to this Charity.

The work accomplished has been phenomenal. The daily average of patients last year was $101\frac{1}{2}$. This year it is $111\frac{1}{2}$; and if the proportionate increase of the last months of the official year continue, the daily average for 1901 will show a more material increase than in any previous year.

There are three leading departments of the work which particularly merit attention.

1st. The Indoor Department, which includes all patients who are maintained and treated in the building.

These are both paying and non-paying patients. For the first

named the charges are \$2.80 per week in the public wards. In the latter are included all patients whose parents are too poor to pay for treatment. In the case of non-paying or free patients, absolute proof of inability to pay must be shown by certificate. This is the usual plan adopted to prevent imposition.

2nd. The Outdoor Department for free dispensary patients, where those who are unable to pay receive advice and medicine free. These patients are necessarily from Toronto and its suburbs. Each applicant must produce a certificate signed by a clergyman showing inability to pay for advice and treatment. The expenses of this department are covered by the \$7,500 grant made by the Corporation of Toronto to the general funds for the maintenance of the Hospital.

3rd. The Orthopedic Department, a most important branch of the work. This department was established in the month of June, 1899, to supply mechanical appliances, such as supports, trusses, crutches, braces, etc.

Last year over 200 cases were treated in this department, and about 120 were supplied with mechanical appliances, being an increase of 75 cases over 1899. The appliances are made by adept workmen and are furnished at the cost of manufacture for patients in either the Indoor or Outdoor Departments.

In opening this important branch, the desire of the Trust was to supply an absolutely necessary annex to the Surgical Department of the Hospital. The Trust is convinced that this new feature has been of the greatest value in the treatment of orthopedic cases. The furnishing of proper appliances at a moderate cost is a blessing to the deformed children who have come under our care, for it has enabled them to become useful members of society, and thus given them an equal chance in life with their more fortunate companions. The hospital surgeons consider that this department is doing most valuable work. No other department is so enthusiastically spoken of or excites such sympathy as that which removes deformities and aids those unfortunately afflicted with club feet, bow-legs, knock-knees, flat feet, infantile paralysis, spinal diseases, etc.

The surgical appliance shop contains two rooms, one of which is used for forging, grinding and polishing and is fitted up with benches, vises, lathes and electric power. The second room is used for the leather work necessary in connection with the manufacture of appliances.

THE X-RAY DEPARTMENT.

Since the introduction of the X-Ray apparatus into hospital work, all leading hospitals have been supplied with equipments more or less perfect. That in use in this Hospital has given excellent service and has been improved in order that effective work may be secured. It has been of assistance in the locating of fractures, etc., and the Trustees hope as the process develops to provide a perfect equipment for the use of the surgeons. Were it not for the crowded state of the building many other features of the work would be adopted. A fairly large room, for instance, is required for X-Ray work, but at present in the building there is not a square foot of vacant space. Indeed, the

t

Trustees have been compelled to decline the gift of the most perfectly equipped X-Ray apparatus ever made by the Edison Company, simply for the reason that there was no accommodation in the building for an up-to-date plant.

The Training School for Nurses in connection with the Hospital has been most successfully carried on under the supervision of Miss Brent, the superintendent. The results have been most satisfactory and the nurses trained in the school have earned for themselves the highest encomiums from the entire staff.

All branches of the work show a great increase over previous years, and in both the Indoor and Outdoor Departments the ratio of admission is so great that if it were to continue for another year the increase in expense would be a serious matter.

Last year—and in referring to the year's work it must be remembered that each Hospital year ends on the 30th September—5,776 children have been treated, an increase of over 831 over 1899. Of these 767 were in-patients, an increase of 97, and 5,009 were out-patients, an increase of 734 over 1899. Among the in-patients were 510 from Toronto, an increase of 19, and 257 from places outside the city, an increase of 78 over 1899.

In the Out-door and Free Dispensary Department 5,009 children have been treated. This is one of the most interesting departments. As many as forty little patients, accompanied by their parents, are often found waiting treatment at one time. Six physicians attend this department regularly and the results have been most satisfactory.

Compared with 1899—of the in-patients 383 were cured, an increase of 66; while 298 were relieved, an increase of 140; 38 were unimproved, a decrease of 6; and 48 died, an increase of 6. It should be stated that a large number of those who die are children who are brought into the Hospital when there is but a faint chance for life. Of the number above mentioned, six died within two hours after admittance, twelve being in less than a week and fourteen less than a month.

At the beginning of the year (October, 1899), there were 109 patients, and at the end 139 patients in the wards. The highest number at one time was 145, on September 7th, 1900; the lowest number 89, on January 7th, 1900.

Taking the number of children and the total number of days they were in the Hospital, the average stay of each patient was 53 days.

The average daily number of in-door patients for the past four years was in 1900, 111½; 1899, 101½; 1898, 100 1-3; 1897, 87¼.

During the twenty-five years of the Hospital's existence, nearly 40,000 children have been treated. From year to year the number of patients cared for and relieved has steadily increased.

At this writing there are 140 children in the Hospital. The building was erected with accommodation, including the wards for infectious and "suspect" cases, for about 195 patients. But 140 children require at least 40 nurses, to perform effectively night and day work. There are, however, only 30 nurses employed. There is not room in the building for more—many of whom have to be lodged in two wards

and corridors that, if free, would afford accommodation for about 40 children.

The ward for infectious diseases is for all such cases as originate in the building. The "suspect" wards are those in which newly admitted patients are placed for forty-eight hours when there is the slightest suspicion of infection.

The indebtedness of the Hospital on the 30th September, 1899, the end of the official year, was \$34,961.04, consisting of a mortgage of \$25,000 and \$9,961.04 in a bank overdraft. The total income for 1900 was \$56,116.41 and the expenditure, \$36,274.35. Over and above this expenditure \$3,421.05 had to be spent in repairs and alterations at The Lakeside Home, while \$16,386.45 was paid to reduce the mortgage by \$10,000 and the bank overdraft by \$6,386.45.

There have been added to the assets of the Hospital this year \$16,421.01. The total now stands at \$215,180.83 as against liabilities of \$18,574.59.

It must be remembered that a large proportion of the receipts through the annual appeal for assistance in paying the debt has to be devoted to maintenance, so that amounts, such as the sums paid in on Cot Account, (\$4,150.20); and Pay Patients, (\$3,217.97); Students' Fees, (\$977); which help to swell the total sum received, have to be devoted to the first charge on the Hospital, namely, maintenance.

The Lakeside Home for Little Children, at the Lighthouse Point, Toronto Island, the summer home for the patients, is a most important annex to the institution. It has accommodation for 150 children and twenty nurses. One hundred children were removed to The Lakeside Home in the first week in June and a hundred were brought back at the end of September. Two hundred children enjoyed the advantages of The Lakeside Home and 100 were discharged and returned to their homes cured. This is the largest and best equipped sanitarium for children in the world.

Unforeseen expenses are encountered every year. The necessity of filling in an unsavory lagoon and perfecting the system of drainage in order to place The Lakeside Home in a sanitary condition, according to the standard laid down by the Medical Health Department, involved an expenditure of about \$2,000. The acetylene gas lighting apparatus and necessary furnishings also required, cost about \$1,100, leaving as before stated, \$16,386.45 to be paid on account of the general indebtedness of the Trust.

It should be stated that the expense of The Lakeside Home which cost, in buildings, \$50,276.31 and furnishings \$8,372.87, in all \$58,649.18, has been paid entirely, not only in the buildings, but in the furnishings, by the subscriptions of the original donor.

The per capita expenditure per day for 1900 was 89½ cents; for 1899, 90½ cents. That is to say that 767 in-patients were kept in 1900 at a less rate than 670 were kept in 1899.

The annual official returns of all the hospitals for children in Great Britain, the continent and the United States show that out of twenty-four of the great hospitals in the world, this hospital is carried on at the least expense.

Some of the principal sources of income deserve special mention in this report.

DONATIONS FROM SOCIETIES.

From the Masonic Fraternity, which includes the Royal Arch Masons, and the Knights Templars, and members of the Mystic Shrine, this year we received \$3,862.94; in which sum is included \$1,300.00 from the Zetland Masonic Lodge, No. 326, Toronto, being their contribution towards the endowment of the "Zetland Masonic Lodge Cot," in the Boys' Surgical Ward of the Hospital.

We have received generous aid from other fraternal societies, viz: Ancient Order of Foresters, Juvenile Branches of the Ancient Order of Foresters, Companions of the Forest, Canadian Order of Foresters, Independent Order of Foresters, Knights of the Maccabees, Sons of England, Sons of Scotland, Independent Order of Oddfellows, Canadian Order of Oddfellows, Canadian Order of Chosen Friends, Ancient Order of the United Workmen, Canadian Order Woodmen of the World, Royal Templars of Temperance, Knights of Pythias, Royal Arcanum, Loyal True Blues, Loyal Orange Lodges, Independent Order of Good Templars, Juvenile Templars, Royal Black Knights of Ireland, Sons of Temperance, Canadian Order Home Circles, Trades Unions and Railroad Organizations, and other societies and associations. When the contributions of any of the societies shall have reached the sum of \$2,000 they shall then have a cot permanently endowed in the Hospital.

ONTARIO PUBLIC SCHOOLS.

A generous response has come from the Ontario Public School children. Of the 6,000 schools appealed to, about 2,000 responded.

In 1898 a cot was established in the Boys' Medical Ward, and last year the boys and girls in the Public Schools of Ontario were asked to complete the endowment of a cot in the Girls' Medical Ward, for which the sum of \$1,724.61 was required. Their gifts this year amounted to \$2,747.85, and after completing the endowment of the second cot, the balance of \$1,023.24 has been placed to the credit of a cot in the Baby Ward, which is one of the most interesting wards in the Hospital. We trust the boys and girls will this year complete the endowment of this cot and upon its completion the Ontario Public Schools will have three endowed cots in this institution.

THE TORONTO PUBLIC SCHOOLS.

The Toronto Public School children did not forget their sick schoolmates, as their gifts this year amounted to \$1,210.86. Forty-three dollars and thirty-nine cents are still required to complete the endowment of the cot in the Girls' Ward, and we hope this year to receive a good sum towards the endowment of a cot in the Baby Ward. This will make three cots endowed by the boys and girls of the Toronto Public Schools.

SABBATH SCHOOLS AND CHURCHES.

This year we received from Sabbath Schools and Churches in the

Province \$2,317.09, of which \$1,602.33, together with the balance from the previous year's contributions—\$397.67, has completed the endowment of the "Ontario Sabbath Schools' Cot," (for girls). The balance—\$714.76 has also been placed towards the endowment of a cot in the Baby Ward. The Sabbath Schools and Churches will, we feel sure, respond as generously as they have in previous years and complete the endowment of this cot, which will make three endowed cots in the Hospital.

MUNICIPALITIES.

From the different municipalities in the Province of Ontario we have received \$1,938.50, also \$100 from the County of York Council, for the maintenance of its cot, established in 1898. The Trustees are grateful to the officers and councillors of the different townships, villages, towns and cities in Ontario for the kindly interest they have shown in bringing the wants of the Hospital before their municipalities.

EMPLOYES.

From the employes of many business centres and factories of Toronto and elsewhere, the contributions have been generous during the past year. The sum of \$1,293.24 was received, and our thanks are cordially extended to the friends who have so aided in relieving our needs, which are always numerous and ever present. How can it be otherwise when so many little sufferers are obliged to have such constant care and attention?

The above mentioned sum of \$1,293.24, together with the amount of \$186.20, being the balance after the endowment of the cot in the Boys' Ward was completed, has been credited towards the endowment of a cot in the Girls' Ward. We hope this year the working men will respond as generously as in previous years and thus complete the endowment of this cot.

POSTOFFICES IN THE PROVINCE.

From the different postoffices in Ontario we received this year \$1,127.75. Of this sum \$645.87 was credited towards the endowment of the cot, named the "Ontario Postmasters' Cot," (for boys), established in 1899. The balance \$481.88 has been placed towards the endowment of a cot in the Girls' Ward. To this timely aid from sympathetic friends who have visited the postoffices throughout the Province and subscribed to the Postmasters' Lists, is due much of this year's success.

For our Christmas Fund this year we must ask for sufficient money to clear away our present total indebtedness, approximating \$19,000. Not a dollar of debt should stand against this grand institution at the beginning of the Twentieth Century.

This should be the last appeal the Trust should have to make in its attempt to free the Hospital from debt. Eight years ago the debt looked as if it would never pass away. To-day the Trust think the long struggle to reduce mortgages and overdrafts is about over.

With the aid of the good people of Ontario this result has been accomplished and, now, as we sight the goal, shall the generous hand

be stayed, forbidding us to say "Good-by" to the last of the milestones in our financial journey? Many think that every dollar received in response to our annual appeal goes straight to the hand of the mortgagee and the banker—but the Trust has many other calls.

Nearly eight hundred children are housed during the year in the Hospital. About one hundred and ten little faces are to be seen every day in our wards and cots. These children cannot be maintained and treated with the best of medical and surgical skill without money. It costs 90c per head per day to keep each child, that is for our average of 111 children, \$100 a day for every one of the 365 days in the year.

The only money that the Trust can look forward to with certainty is the grant of about \$14,000 received from the Government of Ontario and the City of Toronto. For the twenty odd thousands over and above this amount, the Trust has to rely upon the generosity of the citizens of Toronto and the people of the Province. Further, for the advances which are made by the bank to cover the shortage, be it large or small, the Trustees are personally liable. The Trust respectfully suggest that this responsibility, voluntarily assumed, is, at least, some evidence of sincerity in the great work they are endeavoring to carry on in their chosen field of labour.

Even from the figures submitted, the general public can form but little idea of the large expenditures required for the needs of the institution. Two items alone will suffice. The first, \$16,000 for housekeeping, fuel and light, clothing and linen, and \$11,000 for salaries and wages. Every dollar's worth is bought by public tender and at the closest prices, and the salary and wage bills are no more than will secure effective work.

A gentleman well versed in British and American hospital work, one intimately acquainted with hospital economics, after an exhaustive inspection of the work, remarked that "if ever a hospital got good value and effective return for its money it was The Toronto Hospital for Sick Children."

Eight years ago (1892) the debt on the Hospital amounted to \$101,000. This was the first year in our new building. In 1893 it increased to \$105,000, and the following year it fell to \$96,000. It remained at that figure up to the end of 1895. In 1896 it climbed up to \$106,000, but in 1897 it came down with a bound to \$63,000, and in 1898 it fell to \$55,000. On the 30th Sept., 1899, it stood at \$35,000, while at the close of this year (30th Sept., 1900), all that was wanted to square the account was \$19,000.

So that in eight years \$85,000 of the debt has been paid off, with \$31,000 for interest and, approximately, about \$240,000 for maintenance, a grand total of \$350,000. When the remaining \$19,000 of indebtedness is paid, which the Trust hope will be the case by the end of this year, the Hospital will have to its credit assets amounting to \$233,755, a contrast with the statement of its finances in 1893, when its burden of debt amounted to \$105,000. These figures show the cost for each of the 7,000 children treated as in-patients to have been \$50, an absolute confirmation of the Hos-

pital statistics, which show that the maintenance of each child is about one dollar per day.

The great drawback to the furtherance of the work is the lack of accommodation for nurses and domestics. Some day this Hospital will have to do as other similar institutions have done, that is, erect a Nurses' Home for the accommodation of the nurses and a portion of the help that it is not necessary to lodge in the main building.

This explanation of many points of the work is deemed necessary by the Trust. The people of the Province and the City of Toronto have been generous to this institution, and it is but fair that all the sides and conditions of the work should be placed before those who have shown an interest in the work.

In these days of prosperity, when business is booming, when the great marts of trade are crowded with buyers, when factories are turning every wheel to fill the demands of trade, money should be plentiful. Everyone, be he merchant or mechanic, can help us. Everyone can give something to bring health, cheer and comfort to ailing little ones. Everyone in business can lighten his or her purse a little and thus brighten little lives.

Poverty puts its own cruel accent on the word "suffering" as applied to children. Their pain-racked little bodies languish in narrow homes. Their lives go glimmering through days of weariness, and to these the Hospital is a very Heaven, all warmth and brightness, into which God's suffering children go in ailing and come out whole. The Hospital either prolongs the life journey of the little ones or smooths the rough places out of their short pathway. The hand of its activity blesses all who are touched.

Money is needed to widen the circle of the Hospital's healing influence. Your money will be well invested. A child won from the grave back to home and health and happiness may be the rich dividend it earns. New interest will be paid on the amount each time that the smile of health chases the shadows of death off the face of the child your money has benefited.

The Hospital door is the door of health and the door to home. It opens at the touch of suffering childhood and through its portals pass the never-ending line of little ones to that inner world of healing, where mercy wins them back to health. It opens again on that outer world of home, where mothers wait for the children who come in weakness and leave in strength, who are brought in as cripples and go forth straight and rejoicing in the blessing of restored strength and health.

For the Trust,

DOUGLAS DAVIDSON, Secretary-Treasurer.

AUDITOR'S REPORT—HOSPITAL FOR SICK CHILDREN, TORONTO.

TO THE CHAIRMAN OF THE TRUST:

Dear Sir:—I beg to certify that the Receipts and Disbursements of the Hospital for Sick Children have been carefully audited with the vouchers and Bank Account throughout the year ending Sept. 30th, 1900, and the accompanying statements of Income and Expenditure and of Assets and Liabilities bearing my signature are a true and correct account of the affairs of the Hospital to that date.

I find the books and the work of the office in excellent condition, and all desired information has been freely given.

Toronto, Oct. 6th, 1900.

Respectfully submitted,

A. C. NEFF, F.C.A., Auditor.

CITIES, TOWNS, VILLAGES, ETC., FROM WHICH PATIENTS WERE RECEIVED AT THE HOSPITAL FOR SICK CHILDREN FOR THE YEAR ENDING SEPT. 30TH, 1900.

COMPARATIVE STATEMENT OF NUMBER OF PATIENTS RECEIVED FROM PLACES OUTSIDE OF TORONTO, 1891 TO 1900.

Year.	No. of Places.	No. of Patients
1891	27	40
1892	51	66
1893	49	68
1894	56	76
1895	70	83
1896	88	123
1897	83	118
1898	136	163
1899	140	179
1900	188	257

This statement shows that each year the Hospital has increased in favour with the general public. Years ago parents were not easily persuaded to send their sick children for hospital treatment. But to-day public opinion has changed and those who were at first opposed to the idea are now ardent supporters of the advantages accruing from hospital treatment.

AT THE CHILDREN'S HOSPITAL—A TRUE STORY.

ED AT
1900.

general
hospital
ad to the

A little crippled figure, two big path-
etic eyes,
A face that seemed unchildish, so wan
it was and wise.
I held her hands; the homesick tears
came stealing down her cheeks;
"I had to come," she whispered, "I
was so sick and weak;
It is my back; I used to be so strong
and tall and straight;
I went to school and learned to read
and write upon a slate,
And add up figures, such a lot, and
play with all my might,
Until I hurt my back; since then I
just ache day and night.
'Tis most a year since I could stand
or walk around at all;
About all I am good for now, is just
to cry and crawl."

Poor little thing! There came to us
the laughter, gay and sweet,
Of little ones let out from school, the
sound of flying feet;
She listened for a moment, then turned
her to the wall;
"I wish," she said, "that I was dead;
I'm tired of it all.
I hurt so here and hurt so there;
why can't I run and shout
others do?" "When you are
cured you shall," I said; but
doubt
Was in the eyes she turned to mine,
and doubt was in her tone.
"Perhaps," she said, and then the pain
grew harsh, though plaintive
moan
Smote sharply on my heart. I knew
she had but lately come
From mother's care and father's love
and all the ties of home.

"I wish I'd lived on earth," she said,
"a long, long time ago,
When Jesus came at eventime, be-
cause He loved folks so,
And made the cripples walk again, and
made the sick ones well;
If it was now, instead of then, I'd
hurry up and tell
Him where the hurt was hardest; I'd
kneel down low and say:
'It is my back, dear Jesus, please to
cure it right away;
I'm tired of being lame and weak, I
want to jump and run
And laugh out like I used to laugh,
and have a lot of fun;
Be good to this poor little girl.' And
He would touch me—so—
And all the hurt and crookedness and
all the ache would go."

I held her close, and kissed her and
soothed her off to rest;
So frail, so sad, so homesick for the
ones she loved the best!
But yesterday I saw her, and would
have passed her by.
Had I not caught the greeting smile,
the look so bright and shy.
"Can this be you?" I questioned. She
laughed. "Oh, yes; I thought
You wouldn't know me when you
came; I've changed, oh, such a
lot!
For see how strong my back is, it
doesn't hurt at all,
And I can walk as straight—look
here—I never have to crawl;
I'll tell you—'tis a secret—I raced
with nurse last night;
Just think of it; I raced and beat,"
and then in sheer delight
She laughed so loudly and so long
the nurse looked in to, say:
"Is not this little maid of ours quite
boisterous to-day?"

"They are so good to me," she said, "I
know I'll have to cry
When I am starting home next week
and have to say good-bye;
For if I had not been sent here"—the
sweet blue eyes grew wat-
"My back it would be hurting—I'd be
a cripple yet,
For folks as poor as my folks are they
haven't much to spare
For doctors' bills and nurses' bills and
such—but won't they stare
When I go home like this—red cheeks
and fat as I can be;
My back all well. My papa he will sit
and look at me,
And mamma she will close her eyes
and bend her head and pray,
While all the others kiss and hug;
then I can hear her say:
'Give me my girlie, she's been gone so
many long months, five,'
And hold me tight. Oh, I will be the
gladdest thing alive."

Oh, children of the Public schools, who
gave your help to lift
The debt from off the Hospital, your
gen'rous, loving gift
Makes you a sharer in the work. You
cannot each one go
To visit all the little ones you help to
care for, so
I have written out this story for you,
and you alone;
The older ones may scan it, but the
story is your own.

—Jean Blewett.

DONATIONS IN KIND FOR THE YEAR 1900.

It is impossible to express thanks to all who have remembered the sick children. We might speak of flowers, books, toys, illustrated papers, magazines, etc., telling many a story of self-denial and sympathy for the helpless little ones in the Hospital; also clothing, provisions, fruit, preserves, etc., received from many kind friends during the year from Toronto and throughout the Province. All these gifts are gratefully acknowledged by the Trust, who appreciate the kind interest taken in the work of the Hospital.

This little girl is suffering from Tubercular Glands of the neck. She was operated upon a short time ago and is now getting on very well.

The above cut shows one of the little patients in one of the Toronto Public School Cots suffering from Hip-joint Disease. He is steadily improving.

ONTARIO SABBATH SCHOOLS' COT (for Girls)
Was established in 1900 in the Girls' Ward. We hope the scholars will respond as generously as they have in the past and complete the endowment of a cot to be placed in the Baby Ward.

ONTARIO SABBATH SCHOOLS' COT (for Boys)
Was established in 1899 in the Boys' Ward, and has been constantly occupied during the past year by little patients in the Hospital.

ONTARIO PUBLIC SCHOOL CHILDREN'S COT (Boys)

Was established in 1898, and has been constantly occupied by patients during the past year.

ONTARIO PUBLIC SCHOOL CHILDREN'S COT (Girls)

Was established in 1899. We trust the boys and girls in the public schools of Ontario will this year generously respond to our appeal and complete the endowment of the Cot in the Baby Ward.

THE ZETLAND MASONIC LODGE COT
Was established in 1898 by the Zetland Masonic Lodge No. 826, Toronto, and last year the further generous sum of \$1,800 was paid.

GRAND CHAPTER ROYAL ARCH MASON'S COT
Was established in 1897 by the Grand Chapter of the Royal Arch Masons of Canada, and the endowment of the same completed in the year 1899.

TORONTO PUBLIC SCHOOL CHILDREN'S COT (Boys)

Was established in 1898 by the generous contributions of the scholars in the different city schools. This Cot has been constantly occupied during the past year by patients in the Boys' Surgical Ward of the Hospital.

TORONTO PUBLIC SCHOOL CHILDREN'S COT (Girls)

Was established in 1899. The sum of \$43.39 is still required to fully complete the endowment of the above Cot, and this year we hope to receive a sum sufficient to cover this amount, and to endow a Cot, which is going to be placed in the Baby Ward.

THE 'ONTARIO POSTMATESRS' COT

Was established in 1899 in the Boys' Ward of the Hospital, and this year we hope the kind friends visiting the post-offices throughout the Province will remember the subscription list, and that we shall be able to complete the endowment of the Cot in the Girls' Ward.

THE WORKINGMEN'S COT

In the Boys' Medical Ward, was endowed by the employes of the different firms in Toronto and vicinity in 1899. This year we trust the workingmen will respond as generously as they have in the past, and complete the endowment of a Cot to be placed in the Girls' Medical Ward.

ONTARIO NEWSPAPER MEN'S COT

Was endowed by the generous help of the Editors, and Publishers of the Province by bringing before their readers the needs of the Hospital.

COTS MAINTAINED IN HOSPITAL FOR SICK CHILDREN, TORONTO.

These cots are maintained in the Hospital on College street by the payment of one hundred dollars annually from the donors named.

The name is retained on the cot as long as the payment continues. These maintained cots have been of the greatest assistance to the Hospital, in that the payment of \$100 assures the Trust that this part of the income of the charity may be considered permanent and counted on in calculating the expenses of the Hospital.

THE LIST OF DONORS.

In the earlier years of the Hospital's work the annual list of donors occupied but a few pages of the report and could be readily and economically printed. The lists were all moderate in length up to 1898, when the individual subscriptions so increased and so many more pages had to be given to the acknowledgment of the donations, that the subject matter pertaining to the work had to be much restricted unless an expense of over \$500 for extra postage, type-setting, printing and binding was incurred.

In 1899 the report was so voluminous on account of the space given to the donations that a large amount of interesting matter had to be cut out in order to bring the report within the one cent postage rate.

This year the publication of the donations in the usual form would involve a report of nearly 150 pages in length, which would demand a two-cent postal rate, or an extra expenditure of about \$350 for postage alone. So that in contemplating the acknowledgment by publication of the donations of those who have kindly aided the Hospital, the Trust had to very seriously consider the expense.

It should be stated that each and every donor whose address is known receives a post card acknowledgment of his or her donation and that in addition to this method, the amounts are acknowledged in "The Toronto Evening Telegram" and a copy of that paper is also sent entirely free of all cost for printing, to every donor, and this publication is also included in the general circulation of the paper, so that the fullest public acknowledgment and publicity is given to the donations of our many friends.

This year's report brought matters to a climax, for the expense involved in the old plan of publication would have been about \$800. As therefore, full acknowledgment had been made during the year, the Trust have taken advantage of the offer of Mr. J. Ross Robertson to print in the columns of "The Evening Telegram" a full list of all donors, copies of the paper to be sent to each, free of all cost for printing to the Trust. The offer in all, not only financially frees the Trust of an expenditure of about \$800, but gives the work of the Hospital a hundred times the publicity that it would get if in the ordinary form.

The regular annual report will be found in "The Evening Telegram" along with the list of donors, and the report itself will also in book form be sent to each donor as before.

The Trust deem it but right that this explanation should be made, so that the friends of the Hospital may understand why the individual donations are not included in the bound copy of the Annual Report.

The paper in this report is the generous gift of the Toronto Branch of The Canada Paper Company, of Montreal, through Mr. J. F. Campbell, the Toronto manager.

Thirty thousand copies of this report have been printed.

The Gift That Pays Dividends

There is a literal meaning in the promise of a blessing to the donor who gives in HIS name.

No man who has ever given a dollar to a deserving charity has ever had cause to regret his gift.

The first joy of giving is often followed quickly by more material returns to the donor.

A Dollar to the Hospital for Sick Children

A sum of money donated towards relieving the sufferings of helpless children, is

A Dollar Sent Direct on an Errand of Mercy.

A gift to the Hospital for Sick Children is a gift that pays dividends.

A Sick Child appeals TO YOUR LOVE,
TO YOUR PITY,
TO YOUR GOLD.

Be it One Dollar—or Five Dollars or Five Cents.

Think of 40,000 helpless children—an army of little ones who have been cared for in twenty-five years.

Last Year there were Over 5,000.

Nearly 800 were lodged, maintained and treated within the four walls of the great pile on College Street.

It costs over \$100 a day to keep the Hospital open.

There are to-day 130 children in its beds and cots.

The Hospital door is the door to health and the door to home.

Through its portals pass the never ending line of little ones, won back to health by the Hospital's healing hand.

Can you aid this grand work in this our Jubilee Year?

Just \$19,000 is Needed.

Will you help us with your dollar to meet the incoming century free of debt?

CONTRIBUTIONS MAY BE SENT TO—

J. ROSS ROBERTSON, or DOUGLAS DAVIDSON,

Chairman of the Trust,

Secretary-Treasurer.

THE ORTHOPEDIC DEPARTMENT.

The Orthopedic branch of the Hospital was established in the month of June, 1899, to supply mechanical supports, trusses, crutches, braces, etc. The department has proved of the greatest benefit and assistance in our work and has met the surgical needs of the Hospital as no other treatment could possibly have done. Nearly 200 cases were supplied with special surgical appliances last year made by adept workmen and furnished to the patients at the cost of manufacture.

These few photos are examples of many complete cures.

THE TREATMENT OF DEFORMED FEET, ETC.

No department of the Hospital's work excites more sympathy or is more enthusiastically spoken of as our record of what we are doing in removing deformities and aiding children who come under our care to become in the future useful members of society.

The above photos give a slight idea of the work, showing the condition of the feet when entering the Hospital and the improvement under treatment.

Did You Start Right ?

“ Better Late than Never—
Better Never Late.”

FEEL THE JOY OF GIVING

A Good Start and You've a Light
Load and the Courage of Victory.

In the Race of the New Century

You Should Not be Handicapped
by Neglect at the Start.

Begin the year right. Begin the year with worthy deeds—with acts of kindness. It's an act of kindness to commence the glad New Year with a gift to the

Hospital for Sick Children,

College Street, Toronto.

The Hospital has a record of practical, thorough work, a record of skilful treatment. Nowhere else in Canada can a child receive such grand, patient, skilful attention.

It is a boon and a blessing to suffering childhood.

Nearly 6,000 children, a large number from a hundred different parts of the province, were treated last year by the Hospital.

In twenty-five years the Hospital has cared for 40,000 sick children.

Donations, allowances and benevolence must make up the remainder.

Put your dollar on the list and watch the fund grow.

Do not cripple the work and the institution by your refusal.

Do not put off until to-morrow, but send your dollar to-day. Nineteen thousand dollars are needed to free the Hospital from debt. Help the work along. Take an interest in it and invest a dollar in New Year's joy.

Send your contributions to

J. ROSS ROBERTSON,

or

DOUGLAS DAVIDSON,

Chairman of the Trust,

Secretary-Treasurer,

Hospital for Sick Children, College Street, Toronto.

**Your Dollar Will Help—Your Dollar Will Heal ;
There's a Great Need—Please Read This Appeal.**

Heal Their Wounds Dry Their Tears

Sick, sad and suffering, crying with pain, it is a sorrow-soothing task—caring for and curing the sick children.

The pity of it—the sadness and sorrow is somewhat mitigated by the triumphs of skilful surgery and medical science.

Healing Dollars.

A \$30,000 expense yearly. Over five thousand children treated last year.

A \$19,000 debt now encumbers the Hospital. When this is paid the Hospital will be freed from its financial burden.

It's a grand institution, but its work is hampered by its poverty. It has no income, no endowments.

Help the Hospital out of debt !

Do it now !

Don't let the debt grow !

Your dollar is as big as the dollars that have come before—and it's just as badly needed.

See them smiling! Watch the poor little ones who go into the Hospital deathly sick. See them carefully nursed, skilfully treated, and see the dear little ones come forth, restored to health and welcomed home with a mother's love and a father's joy.

You will not disappoint these little sufferers? You can't do it.

Whether it's dollars or whether it's cents, your donation is welcome—10,000 quarters count as much as 2,500 dollars—and all are equally welcome.

Get your dollar quickly to

J. ROSS ROBERTSON,
Chairman of the Trust,

or

DOUGLAS DAVIDSON,
Secretary-Treasurer,

Hospital for Sick Children, College Street, Toronto.

THE BACTERIOLOGICAL ROOM, COLLEGE STREET.

By means of the costly and scientific instruments in this department many cases otherwise uncertain are definitely proved to be consumption, diphtheria, typhoid or other serious disorder. Many cases of dangerously infectious disease, in patients who have come to the Out-door department for some trivial disturbance, are here detected, thus enabling immediate steps being taken to prevent the spread of the disease throughout the city.

THE TRAINING SCHOOL FOR NURSES.

Miss Louise C. Brent, the Lady Superintendent of the Training School for Nurses in connection with the Hospital, in her annual report to the Trustees states that the work of the school has been most satisfactory and that many of the nurses who have graduated have obtained good positions in leading hospitals of the Dominion and of the United States.

Miss Brent in her report refers "to the organization of the present school in 1892, for prior to that date the work, owing to the small resources of the Hospital, not only in the number of patients but in money, were limited."

The report continues: "However, in 1892 Mrs. S. F. McMaster, who had been associated with the work as one of the founders of the Hospital in 1876, and who, with great experience as a trained nurse, had practically been the guiding hand of the Hospital till its government was transferred to the present Trust, really commenced the practical work of training. During the next year or two the work slowly progressed. Much to the regret of all concerned Mrs. McMaster resigned and was succeeded by Miss Underhill, who remained in charge until 1896," when she was succeeded by Miss Brent.

"At this period the new building on College street was in the full swing of work. The patients averaged about 50 per day, and the staff of nurses, who had started with Mrs. McMaster, was doubled in number, the entire department having been systematized and brought into line with modern improvements in the management of Training Schools.

"There are now twenty-four nurses and five probationers, and the staff has been further increased by the addition of an Assistant Superintendent and a Night Supervisor, who has entire charge of the building from 8 p.m. until 7 a.m. The addition of an expert in massage work to the staff of nurses is not only a new feature in the nursing of children, but one that has given excellent results. The Masseuse, in addition to giving treatment to from ten to twenty children daily, also instructs the nurses in massage methods. This Hospital is the only one on the continent that has a specially trained expert masseuse for the treatment of children and the instruction of nurses.

There have been during the year 450 applications made for admission to the Training School. Less than five per cent. were accepted.

"Classes for instruction are held by the Superintendent weekly and twenty-eight lectures have kindly been given by the active and special staff of the Hospital during the months of October to May. The past year's work has been unusually heavy. The number of patients has increased with a rapidity far from normal. The close attention required in a large number of these cases has taxed the strength and skill of the nurses to the utmost and the cry goes forth, as it does in other hospitals, 'Give us more nurses.' But the accommodation in the building is limited; no more can be housed within its walls, neither can more be admitted to the school until the Trust provides, as other Trustees have done, a home for nurses adjacent to the building. Since 1892 eighty-seven have graduated and the reports received from the institutions with which they are connected and from physicians and surgeons who have engaged them, show excellent records.

This Annual Report contains a list of all the graduates since 1892, and the positions that they now occupy either as Superintendents, Head Nurses of other Hospitals, or as doing private work in different parts of Canada and the United States.

"Owing to the superior accommodation and food provided under the best sanitary principles, the health of the nurses has been excellent. The diet is plain but good, the cooking excellent and everything about the service, not only in connection with the child patients but with the nurses, is served clean and free from many of the complaints that are sometimes made concerning similar service in other institutions.

"In the summer months, June to October, the nurses are sent in turn to The Lakeside Home for Little Children. The Medical and Surgical Staff of the Hospital have courteously given to them their professional services when required."

The following is the Course of Lectures delivered to the nurses during the year, Oct. 1st, 1899, to Sept. 30, 1900:

- Anatomy (4)Dr. D. J. G. Wishart.
- Gynaecology, (4)Dr. R. J. Wilson.
- Surgical Appliances, (2)Dr. F. N. G. Starr.
- Anatomy of Eye and Ear, (1)Dr. J. M. MacCallum.
- Diseases of the Ear and Eye, (1)Dr. J. M. MacCallum.

An Extreme Case of Broncho-Pneumonia Saved by Oxygen Inhalation.

On May 6th, 1900, a little boy was admitted to the Hospital for Sick Children suffering from inflammation at the top of the left lung and at the bases of both. He had been ill a week before this, and after coming in he held his own for three days on the stimulant medicines given. After this, however, he began to grow worse, becoming very blue and puffy, the nostrils being dilated, and it was very evident that if the lung condition were not relieved it would not be many hours before the little heart would cease from overwork in pumping blood through the blocked lungs.

The doctors had only one more resource, one which they hesitated to suggest on account of its costliness, i.e., oxygen (the cost of which alone was seven dollars a day). The Trustees, however, were determined that nothing should be lacking in the attempts to save this little charity-patient, and so on May 17th the inhalation of pure warm oxygen was commenced and continued each day till the 30th of May. In a few hours the little sufferer showed improvement, and when the oxygen was finally discontinued was beyond all danger. The little lad left the Hospital on the 10th of September entirely cured.

We quote the following from the Canada Lancet, October number, 1900:

"The main point of interest in this case is that the recovery from a condition ordinarily absolutely hopeless may, with an unusual degree of certainty, be attributed to one therapeutic measure. The inhalation of oxygen undoubtedly saved his life, as asphyxiation was far advanced when the oxygen was begun, and with such condition of both lungs and kidneys only one event could be looked for. The rubber tubing used had a flat glass mouthpiece in the end of it, which lay in the mouth even while the patient was unconscious. Intermission of the oxygen caused prompt increase of the cyanosis for the first seven days of its administration. After this period, for four days longer, it was given ten minutes out of every twenty, and for two days longer only five minutes in every twenty. The enormous expense to which the Trustees of the Hospital for Sick Children went to save the life of this little charity-patient is not entirely unique, but deserving of the highest commendation."

ADDRESS—

DOUGLAS DAVIDSON, or J. ROSS ROBERTSON,

Sec.-Treasurer,

Chairman of the Trust,

HOSPITAL FOR SICK CHILDREN, COLLEGE STREET, TORONTO.

"A little child can help."

Canada's Boys and Girls

All go to the Sabbath School, and early learn
the joys of giving to those in need.

Every Little Helps

Only \$19,000 is Wanted to Free from Debt

The Great Mother Charity

That Takes Care of Your Sick and Ailing Comrades.

There is not a boy in Canada who would not stop to help his comrade should he fall and hurt himself.

The boys and girls can help a thousand suffering children—they can save five cents every year for charity.

And there are patient little ones waiting for your help.

Ask your Superintendent to organize a systematic giving in the Sunday School—for The Hospital for Sick Children.

The way to know true happiness is to make our poor children strong and healthy.

The boys and girls can help a thousand suffering children—they can save five cents every year for charity.

Children, your cents will grow into dollars—your sympathy can never be measured.

CONTRIBUTIONS MAY BE SENT TO

J. ROSS ROBERTSON, or DOUGLAS DAVIDSON,
Chairman of the Trust, Sec.-Treasurer,
HOSPITAL FOR SICK CHILDREN, COLLEGE ST., TORONTO.
