YANKEES LOST HENLEY RACE.

of Pennsylvania.

Britishers Had a Length to Spare at the Finishing Buoy-Names of the Crew.

Henley, England, July 5.—To the disappointment of all the Americans at Henley, the Leander Rowing Club this morning defeated the crew of the University of Pennsylvania in the final heat for the Grand Challenge cup. There was bright sunshine, and puffy cross-winds blew from the Bucks shore, slightly favoring the Leanders' station. The followers of the British crew evinced the greatest confidence, and Leander money greatest confidence, and Leander money was everywhere available, but this confidence never exceeded anything beyond even money. A Philadelphia occupant of a houseboat is said to have invested 1500 in favor of his crew. The following are the preme of the two reasons. are the names of the two crews:

Ellis Ward, the American coach, placed a miniature American flag upon the rudder of his boat as the coxwain came to the boat house and said to Schmit: "Keep that as far ahead, my boy, as you can." A SPLENDID STRUGGLE.

Both crews, at the start, showed no trace of nervousness, and were sent away in capital style, the Pennsylvanians rowing 43 to the minute and Leanders 42. At the end of Temple American boots and shoes on Island the Americans led by three men. At Fawley the time was 3 minutes 25% seconds with the Leanders three feet ahead. From there on it was ding-dong, a splendid struggle, out of which the Leanders gained ich by inch. The mile was reached in minutes 15 seconds, with the Leanlers half a length ahead, which they increased to three-quarters of a length at the Isthman. The Pennsylvanians made a desperate spurt, but it was no good, and two men weakened perceptibly opposite the grandstand. Leanders won by a length. Time, 7

DESERTED HIS WIFE. Montreal, Que., July 5 .-- Mrs. Beert zer, wife of a German-American, who came to Montreal a few days ago with her husband from England, and was left here in a mysterious manner by Beertzer, has received a letter from him at Troy, N. Y., acknowledging the desertion. It seems he married her on short notice in England, and was under the impression that she had a considerable sum of money. He admits he was disappointed in that respect, and states that he cannot afford to keep her, and advises her to go back to her what little friends. Beetzer spent money his wife had.

The barrel in which Graham first went over the falls, was made at John Forrestal's cooper shop on Bathurst street, near Adelaide, by himself. Graham, who is now at Niagara, says he has gained much experience in barrel navigation since his first trip

He has had a cask constructed after plans which he believes will insure his absolute safety. The cask is scarcely larger than an ordinary barrel. It is much like the cask in which Graham made his first trip over Niagara Falls. It is built of Chinese locust wood 11/2 feet long, 22 inches in diameter, at the top, 15 inches at the bottom, and at the bulge near the top 27 inches. The barrel weighs 150 pounds. Just when Graham will make his at-

tempt has not been learned, as he is keeping his plans secret to avoid possibility of arrest, it is said. When Gaham went over the falls in 1889 he divested himself of all clothing except a pair of trunks, two the barrel through the manhole, crouched down in the bottom and fastened himself in with canvas strips. Then the barrel was towed into the river above the falls, where it was cast adrift. It was 50 minutes before the barrel was recovered at the eddy below the falls.

Sheriff Griffith, with a posse of twenty men, has surrounded them at Buck Allen's ranch, 40 miles south of Wagner, near the edge of the old Fort Belknap reservation, on the west fork of the Pouchette River. It is probable that the first estimate of the loss, \$83,000, is somewhat excessive. Reliable information since received is that \$70,000 was secured, and that this with the damage to through express equipments, resulting from the explosions in the car, will represent the entire loss to the company. How London Ministers Will Spend Summer Vacations.

Majority Will Enjoy Well-Earned Respite From Endless Routine of the Clergyman's Work.

A majority of the ministers of Lontion will enjoy a brief rest during a portion of the heated term, and probably no other men in the community the fashion amongst a certain class of World's Christian Endeavor convention people who are not as thoughtful as they might be, to regard the clergy-man's position as a sinecure. It is a position which few men not specially Mrs. Johnston in Northern Ontario.

Mrs. Johnston in Northern Ontario. trained in self-sacrifice could endure Rev. Thomas Eakin, M.A., of Guelph, throughout the long year. No one but will preach in St. Andrew's for three the clergyman himself knows the end-less, tiresome routine that each Suc-Scott, B.D., of Brantford, for two Sabless, tiresome routine that each suc- baths of August. No one but the clergyman knows what it is to have no time that one can call one's have no time that one can call one's and then no matter how weary. own. And then, no matter how weary he may be, his parishioners must not observe it; for clergymen are expected always to be genial, to preside at ev-ery function to which they may be invited, and to do a thousand and one other things that no other man could find time to do. There are sermons to be prepared, too, and that takes time and a clear, undisturbed brain; indeed, the clergyman's whole life is a course of preparation. Who shall say that the minister does not richly deserve the brief summer cessation of toil which his congregation is usually considerate enough to afford him?

Many of the ministers of London have not yet decided where they will spend their vacation. Several, indeed, have not yet been granted the usual holiday by the board of their churches. number, however, have already made arrangements to leave town.

Rev. Cecil C. Owen, rector of Memorial Church, was most kindly dealt leave after the second Sunday in July for Muskoka, where he will remain five or six weeks. His pulpit will be the five or six weeks. They presented him with a purse and offered the suggestion that he should make himself scarce for some time, intimating at the same time that the cold land was as good a place as any was unanimous in its choice of Mr.

other in which to spend a holiday. Needless to say, Rev. Mr. Owen will make himself scarce, although his plans

are as yet unformed. Rev. J. H. Moorhouse, rector of Christ Church, has not yet completed his arrangements. He expects, however, to go north, visiting Durham, Owen Sound and other towns. During his absence, Rev. S. P. Irwin, B.A., of Dutton, will supply one Sunday and Mr. C. H. Armitage, of London, another. Other Sundays will be arranged

for later. Rev. Dean Innes will probably not be able to leave the city this summer owing to illness in his family. Rev. Archdeacon Davis, of St. James' Church, has not taken a summer hoii-

day in two years and does not expect

to do so this season. Rev. Dr. Johnston, pastor of St. Andrew's Presbyterian Church, will, as in former years, endeavor to combine rest with preparation for the winter's work at one or two of the great Christian gatherings which have become a feature of modern religious life and which afford the only opportunity to the busy minister to meet the leaders in the world's religious thought and effort.

Church, will be spent near Sarnia and
on the lakes. Rev. Mr. MacGillivray
also expects to supply in the Central
Church, Detroit, and in Toronto. His pulpit in London will be filled by Rev. Dr. Talling, at one time pastor of Old St. James'; Rev. J. McDowell, of Sec-ond Avenue Church, Detroit, and Rev. J. A. Turnbull, LL.B., of West Church,

Rev. S. J. Allin, of Hamilton Road Methodist Church, has as yet not been granted a holiday by the board of his church. If one should be offered him, it will likely be spent in a quiet way with members of his family at Port Stanley, and he may, for the most part, take his own work on the Sabbath day. Rev. A. K. His last year's record shows 356 meetings, and the year before 407 meetings. During the month of April this year he took part in 81 meetings. He has every night but three from now till September 15 taken, after which he hopes to spend a week at the Pan-American with his family. Elder William Fligg and Samuel Pope will have charge of the London church during his absence.

Visitors Made Welcome at the Canadian Building-It Is One of the Handsomest on the Grounds-Ontario Well Represented.

Pan-American Exposition Grounds Buffalo, July 5 .- Following the recent opening of the Canadian building and the ceremonies attending the opening, that building has become a very popular resort for visitors to the Exposition. It seems rather a pity that all the Canadian exhibits could not have been grouped, but under the arrangement made by the Pan-American manoccupy the pulpit of the First Con- agement this was found impossible. As than three places, while the Canadian ings of other American governments. It is, however, easy of access, being just behind the stadium, only a few Toronto. He will also spend a short just behind the stadium, only a few time in Muskoka. The matter of sup- minutes' walk from the center of the plies for Talbot Street Church is in Exposition grounds. There is probably no government building on the grounds that equals the Canadian building for inside finish and furnishing, and certainly none excels it. The building is after the style of a Swiss chalet, with the overhanging eaves, and a tower that makes it stand out prominently over the surrounding buildings. It is finished on the outside with a dark greenish coloring, the approaches are prettily laid out with grass plots and flowering plants, while over the doorway are the national emblems, the beaver and the maple leaf. The inside of the building is fitted in a style which may be well termed luxurious. Most costly and beautiful furniture has been placed in the reception and sitting rooms, engravings and oil paintings hang on the walls, and the idea one obtains from these rooms is of a well-appointed club-house. This furniture was not purchased by the Dominion Government, but was put in by the Canadian Furniture Manufacturers' Company, Limited, who allow the government the use of the furniture while the Exposition is on. The building is a cool and pleasant place to visit, and not only Canadians, but many Americans, are taking advantage of the courtesies extended by the

The exhibit of copper ores, particularly from the Sudbury district, is very large, and of the other minerals, such as iron, gold and silver, mica, building and ornamental stone, peat, calcium carbide, the province is well represented, while the grouping of the exhibits is attractive.

Proceeding right along through the horticultural building there will be no difficulty in finding the fruit display. Compared with the other exhibits in this building, that of Ontario takes a high place and is both large and re-presentative of the great fruit industry of the province in all its branches, both in natural and canned fruits, vegetables and native wines. Considerable taste has been used in the arrangement of the various lines, and the exhibit is altogether one of the handsomest in the building. Mr. W. H. Bunting is commissioner, Mr. J. J. The forestry building, in which is placed Ontario's exhibit, is rather more difficult to locate. It is on the other side of the triumphal bridge, from the two previous exhibits, down among the government buildings. The building itself is erected after the style of an old log cabin and contains the forestry exhibits of all her woods, both natural and in some instances finished, and the arrangement is an excellent While there is still some more material to be received, the exhibit may be said to be practically com-pleted. VERY QUIET FOURTH OF JULY.

People Glad to Get Away From tire Cities.

Notable Gathering at the American Society Banquet in Old London.

Boston, Mass., July 5 .- A clear and cool Fourth of July day, in contrast to a week of severe heat, which had preceded it, was experienced in Boston and vicinity. Thermometer at 74. New York, July 5 .- The observance of Independence Day was more than usually quiet this year. There were flag raising ceremonies at sunrise at the Battery and all the blockhouses in Central Park, but they were attended by very few people. Nearly everyone who could do so left the city on account of the intense heat, and the streets were almost deserted. IN OLD LONDON.

London, July 4 .- Five hundred persons sat down tonight at the banquet of the American Society in London, given at the Hotel Cecil. It was a remarkable gathering. Across the up-per end of the great hall, and interspersed between the members of the United States embassy and prominent Americans, sat members of parliament and representatives of Great Britain's loyal colonies. Morgan Richards, flanked on the right by Mr. Choate, on the left by Robert Hanbury, M.P., presided. Representatives of India, Canada, Australia, New Zealand and Cape Colony were present. General Hamilton was a prominent figure. Chancellor McCracken, of the University of New York, attended, and scattered through the hall were representatives of all phases of material progress in the United States.

The chairman toasted King Edward, the toast meeting with a warm recep-tion from the audience, who sang the British National Anthem.

Dr. Parker, of the City Temple, who proposed the toast of President Mc-Kinley, said in the course of his "Despite the traditional prejudice, which happily has been weakening during the past year, it is now well recognized that no other nation can sustain the relation to Great Brit-Great Britain and the United States now hold the peace of the world in the hollow of their hands." Three cheers were given for President McKinley, and these were thrice

repeated, and an additional three were given for "Old Glory." Mr. Hanbury, proposing a toast to the United States ambassador, referred gratefully to the sympathy and joy of the British people in connection with Mrs. McKinley's illness and recovery. Mr. Hanbury paid a warm compliment to the United States department of agriculture.

The power given to congress to govern the territories probably meant nothing more to the founders of the republic than the control of what was then known as the North-

Salutes were fired from the forts and a reception given on board the United States training ship Hartford was attended by the Danish authorities and a number of American tourists.

THE PAPER COMBINE

Reasons Given tor Increasing the Price-The Manufacturers' Side.

Montreal, July 4 .- The royal commission investigating the complaint about the advance in the price of printing paper continued its session this morning. W. D. Gillean, assistant managing director of the Canadian Paper Company, defended the advance in price.

L. J. Tarte, of La Patrie, claimed that he would be in a position very soon to get his paper at 2c a pound, while the alleged combine is charging

James Hardy, secretary-treasurer of the Manufacturers' Association, says that the Laurentide Pulp Company had not been considered a member in good standing.

Hon. J. D. Rolland stated that his firm had given up the manufacturing of printing paper, as it did not pay at sent prices. Howard Price, of J. Wilson & Co.,

gave similar evidence. W. H. Rowley, secretary-treasurer of the E. B. Eddy Company, went into an elaborate explanation as to why the cost of manufacture was greater now than some years ago. For one thing the price of sulphur had risen several times its former cost, on account of being made contraband of war. Then the procuring of supplies from the woods had been greatly interfered with for several seasons. The investigation has been adjourned until the 16th inst.

Six bags of gold, containing altogether \$30,000, have been stolen from the San Francisco mint.

Canada and United States-Prospects Gradually Bettered Trade Relations.

'At Buffalo, on Dominion Day, the Minister of Militia and the 48th Highlanders had a hot time: we allude to the temperature, for it was otherwise a thoroughly friendly reception.

The mayor of Buffalo made a speech; the Hon. Dr. Borden spoke in reply. Both speakers favored better reciprocal trade relations; these sentiments met with approval. Many things have happened since the enactment of the present very high United States tariff. Canada has struck a strong gait. Making our tariff on British goods onethird less than on goods from foreign countries, Canada's trade with Grea Britain has increased by leaps compared to which those of the kangaroo are as retrogression. Our neighbors have taken note of all this, and begin to think they had better cultivate Canada's trade. The voice of the United States business man has at recent gatherings been heard in favor of better trade arrangements with the world in general, and Canada in particular.

Sentiment has helped. We mean that the era of good feeling between Great Britain and Canada and the States, since the Spanish-American war, has greased the wheels of the chariot of commerce. If the Government of Great Britain had only had the moral elevation and the statesmanship to take the right side at the time of the American Civil War. 40 years ago! However, the right and statesman-like thing was done at the time of the Spanish-American war, and the good effects have been noticeable in many directions.

Canada is reaping some advantage, also, in the way of incidental good feeling, as a sort of recoil following the clash of sentiment between Russia and the United States. The throwing of kisses between Russia and the United States, so long indulged in, always struck us as a little odd, if not forced; there was so little naturally in common between the very democratic American Republic and the very autocratic Russian Empire. Perhaps it partially grew out of the long century feud with Great Britain. Before the civil war, 40 years ago, the eagle screamed loudly against Great Britain every 4th of July; the throwing of the tea into Boston Harbor and the Battle of Bunker Hill were almost the only themes. The Civil War gave our neighbors other things to think about. So did their war with Spain, which cosmopolitanized their feeling the moment they became, like Britain, a world power, with distant dependencies Great international marriages, and the intermingling of business interests, as between Britain and the United States, have likewise done much to bring the two peoples together. Some even of the United States school books. in alluding to matters in which Britain is concerned, are now moderately fair! The best exponents of thought among our neighbors, as a general thing, deal as fairly as could be expected with the British side of things. The strongest influence against good feeling has long been the Irish in the United States, who would be much placated if the British Parliament had the sense to give Ireland a local Leg-Islature like that of Ontario. "Thanks be," however, the general feeling between Great Britain, Canada and the United States is now in the most satisfactory shape it has been in for 40 years, and this should make it all the easier for advocates of freer trade re-

Another thing. The era of high protection in the United States has had Its day. We do not say that the Chinese wall will be razed to the ground in quick time like the walls of Jericho: but rather that, like the actual Chinese wall, it will fall gradually into decay. There will not again be an era of high tariff in the United States luring the lifetime of the generation now inhabiting the globe. The average feeling in the United States is getting to be that the trusts have too much protection. Every tendency henceforward will be in the direction of a lowered or revenue tariff. Every such reduction of the tariff to a reasonable figure will promote trade between these two neighbor countries, and be one more binding influence that should promote prosperity and "work us a perpetual peace."

Comfort and Heat.

Paradoxical as it may seem it has been found not impossible to combine the two ideas. It seems evident that we have arrived at a stage when a solution of the matter as to how to keep cool would be very acceptable. We do not purpose, however, to furnish a solution of what we must confess is to us a mystery. All we can do is to point to nature and do our best to learn. In matters concerning excessive temperature we would say go to the savage, consider his ways, and keep cool. To the savage of the torrid zone 40 degrees above zero would be far more deadly than 40 degrees below would be to us. They are inured the country. to the heat and prepared for it by all their habits of life. They enjoy the heat. They are comfortable with the mercury at 90 and 100 and above. It ought to be possible for us to emulate them. Perhaps if we accommodated ourselves to the situation as readily as they, and as completely, we would find the warmth of summer salutary. The height of the mercury in the tube gives them no trouble. They have no thermometers. They take no thought matter. Their clothing is almost too light to mention; their food is mostly the spring or the milk of the cocoanut. They bathe often, a plunge in the river

London is getting to be quite a city. The excise collections during the year ending June 30 amounted to \$390,007 95, an increase over the total of the previous twelve months of \$12,503 36.

During the same year, London upheld its place as one of the largest cigar manufacturing centers of Canada. Its twenty factories turned out nearly 30,000,000 cigars, an increase of more than 2,000,000 over the previous

A big business was done by the London Postoffice, the revenue of every being done on the trolley are right or month during the past year having been better than the revenue of the corresponding month of the year preceeding. In the year ending June 30, 1901, the deposits in the savings banks totalled \$106,547.

This city has more trains coming daily into and going out of it than any other city in Canada. London's Springbank Park is one of

the most beautiful in America. Within a moderate time, thanks to the independent action of the Colonel. the city will have, in its Thames, stretching east and west, one of the Michigan bard," hints at, but does not best democratic fishing rivers in Can- answer the question:

Explanation Would Be in Order.

We observe that the Executive Board of the Lord's Day Alliance of Canada the other day passed the following

"That the Executive Board of the Lord's Day Alliance of Canada has learned with deep and sincere regret of the going by special excursion on the Lord's Day of the Honorable Minister of Militia and the 48th Highlanders, representing in an important sense the Dominion of Canada, to attend the opening of the Canadian exhibit at Buffalo on the following day. The alliance rejoices that the Government saw fit to close its exhibit on Sunday and feels that the action of the Minister of Militia as so reported will greatly offend the Christian conscience of the Canadian people, especially at the present time when the integrity of our Canadian Sabbath is

There may be something to be said in reply on the other side. If so, it should be promptly produced. There are three things on which Canadians are wont to pride themselves as being more fortunate than their neighbors of the United States; namely, a better average home training: a greater opposition to divorce and regard for the sanctity of the home; and also a more orderly and better-kept Sabbath. In view of the successful efforts recently made in Canada to arouse a greater interest in defending the integrity of the "one day in seven," it is regretable to have the influence of the Dominion apparently thrown into the wrong scale. We do not prejudge this particular instance, but we certainly think the onus of explanation lies on the Minister of Militia and the 48th Highlanders.

Till Twenty-One.

We observe that Bishop McEvay, of this city, in his confirmation tours, has, according to custom, been pledging the young lads to total abstinence till they reach the age of twenty-one years. This course of the good prelate has much to commend it to pastors of Protestant churches. Were the practice universally adopted by all the churches, the liquor question would

almost settle itself in a generation. There are fortunately many influences tending towards steadying young men in regard to drinking habits. The stiff stand, but none too stiff, taken in the interest of the traveling public, by railway authorities is one of these. There is also a stiffening tone against allowing liquor in connection with clubs where young men congregate. The other day a prominent United States publisher, asked whether a newspaper reporter should totally abstain, replied that it depended. If not Possibly our friends the Socialists a fool, it was worth his while to avoid fear that if the fish issue is made the all drinking risks and to make the ain one, a Jonah may rise up in their | best of himself; if he was a fool, perhaps it did not so much matter.

Our contemporary will be glad to

near of the cooling fact that while the ordinary atmosphere is hot enough, politically everything is cool and comfortable. There is a nearly general consent that at this bye-election, on this Thames fishing issue, and without prejudice to ordinary political divisions, the Colonel should be put in again for the one remaining term of the present Ontario Legislature.

Responsibility.

[From Editor and Publisher.] The editor who conducts a newspaper of standing in any community has a for tomorrow, nor for today, for that world of responsibility resting upon his shoulders, as he has in his hands, to a degree at least the moral welfare fruit, and their drink is water from of the people and can influence them in the right or wrong direction. The words of the preacher falling from the pulpit are soon forgotten. The editor talks from his printing press in type that endures and can be read and studied of such habits they are smooth and long after he is dead. It is one thing to listen to a public speech and quite another to study that speech in print-

"Spoony" Young People. [Boston Herald.]

The code of etiquette for the open summer street car has not yet been written, but, goodness gracious! it is high time it should be. Somebody with the company, and the company is sure authority to speak on such subjects should tell us if certain things that are wrong. Thoughtful gallantry is always to be admired, but when the spoony young pair sit in the middle of the trolley seat with other persons either side, is it necessary for the young man to put his arm closely about his companion to keep her from fal-ling out of the car? If it is right and proper to do this, then there are a lot of men who are neglecting to do their

duty, and, besides, are missing much of what some appear to think is something akin to bliss. As we have said, this is a sub-ject worthy the attention of those whose mission is to shape our social usages and properly direct the masses.

Writing in the Winnipeg Free Press union man gives the reasons why the labor unions and the public at large of Ontario and integrity of our Canadian Sabbath is Quebec do not sympathize with being so seriously assailed on every the trackmen's strike, but, on the contrary, regard it as ill-advised and absurd. The main reason, he says, is that the Canadian Pacific pays higher wages in the Province of Quebec than either the Grand Trunk or the government railway system, while in Ontario its wages are also higher than those paid by the Grand Trunk.

Doctors failed to reach my case and advised me to try a higher air, but, fortunately for me, a friend advised me to try Dr. Pierce's medicines. I commenced taking your 'Golden Medical Discovery,' and by the time I had taken the first bottle I was better, and after taking four bottles my cough was entirely gone. > The writer goes on to say: "Here in the west, conditions are somewhat similar. There are now two system in Manitoba, the Canadian Pacific and the Canadian Northern, of which the Northern Pacific and Manitoba has been incorporated. It is well known to all that the Canadian Pacific pays its trackmen higher wages than the adian Northern. As a matter of fact, it pays higher wages than the Great Northern and Northern Pacific, just south of the line. It pays higher than most of the roads running into St. Louis, where Mr. Wilson resides. This being the case, the public, including the other organizations, cannot understand why this strike should have been ordered on the Canadian Pacific, while the trackmen on the roads operating in similar territory, north and south of the line, which pay a lower rate of wages, should remain at work. The petter course would have been to compel the roads paying the lower wages to level up to the Canadian Pacific scale, and then, if need be, to strike on all, in order to secure a still higher rate from all."

"I have the best of reasons for knowing that the reports lately printed, to the effect that the Canadian Pacific was willing to arbitrate, are absolutely without foundation. Arbitration would have to be carried on by the labor bureau at Ottawa. But with what face could the government officer ask the Canadian Pacific to put up its wages another notch, when it has been paying higher wages than the government's own railway? How could they ask the company to make a fur-ther increase while Mr. Wilson is tacitly willing that he and his fellowmembers of the Trackmen's Association are content to work for a lower rate on the Canadian Northern and on the majority of American railways? If it ever came to arbitration, the Canadian Pacific would be justified in asking the arbitrator to let it pay as low a rate as these other lines in Canada and the United States. Mr. Shaugh nessy, of course, would not resort such a step as that. He feels that the Canadian Pacific is paying all that it should be asked to pay, and is profoundly sorry for the men that they have followed Mr. Wilson in should his ill-advised course. There will be no arbitration. Public opinion is with to win. It would be better for all con cerned for the trackmen in the Prov ince of Manitoba and the Territories to ask Mr. Wilson to call the strike off, and not order a fresh one until, as a preliminary step, he has forced other lines in Canada and the United States to come up to the Canadian Pacific

MADAME A. RUPPERT

The World-Renowned

COMPLEXION SPECIALIST

Says:

The complexion is usually at its worst at this time of the year, and if it is neglected too long, the skin gets so bad that it causes much unhappiness. You can save yourself all this unnecessary trouble if you will use now one or two bottles of my FACE BLEACH, which draws out of the skin all impurities which disease and discolor it.

My FACE BLEACH is today used by thousands of ladies throughout the land, whose complexions it has made perfect. I will personally guarantee to every lady that there is no preparation that will improve the complexion as my FACE BLEACH improves it. If you are troubled and worried over a complexion filled with freckles, pimples, blackheads, moth patches, eczema, sallowness, all redness or roughness of the skin, and wrinkles that are not caused by facial expression, get my FACE BLEACH at once and get rid of them. I only wish I could meet every lady in London, whose complexion is not all that it ought to be, and have a good talk with her so that I might advise her how to secure a good clear complexion. I could not advise anything better, anything more beneficial than my FACE BLEACH. But as I cannot meet you all, I would suggest that you get my book, 'How to Be Beautiful," which my agents, Gairneross & Lawrence, 216 Dundas Street, will give you FREE. My book is simply invaluable to every lady who desires a clear and perfect complexion. MADAME A. RUPPERT.

We hope that Mme. Ruppert's patrons will be guided by what she suggests and get a full treatment of her FACE BLEACH this time, and give your face, and neck too, a thorough clearing of all impurities of the skin.

We will present to every lady caller FREE, Mme. Ruppert's book, "HOW TO BE BEAUTI-FUL." We have a full line of Mme, Ruppert's Toilet Preparations in our store, and we will be pleased to show and explain their merits to every lady interested.

ANOTHER BATCH OF BOERS TAKEN

Lord Kitchener Reports Capture of 93 of the Enemy

With a Lot of Supplies-Large Number of the Enemy Taken at Pietersburg-Baden-Powell's Return to England.

London, July 5 .- Lord Kitchener telegraphs to the war office under date of Pretoria, July 4, as follows:

"Grenfell, on July 1, at Howell, captured 93 Boers and a lot of supplies belonging to Beyers' commando." PERMITS FORFEITED.

Pretoria, July 5.-Permits for the return of the wives of men employed on the imperial military railways have been suspended owing to the discovery that such a permit lately allowed a nurse to come here, who fraudulently took service and subsequently returned to the Boers. Those implicated in the plot have been dismissed from the railway and deported.

ANOTHER GOOD CAPTURE. From June 24 to June 30 the various olumns took 160 prisoners, killed 74 Boers, wounded over 60, and received 136 surrenders. A large amount of ammunition, a quantity of stock and 00 wagons were captured. A large capture of prisoners is reported from Pietersburg.

MAGISTRATE REFUSED TO TAKE INFORMATION

Neither Would He Let Mr. Bartram Argue-He. However. Noted the Latter's Protest.

Barrister W. H. Bartram appeared in police court this morning to learn Police Magistrate Love's decision in the matter of receiving an information against Mayor Rumball on the charge of unduly influencing Treasurer Pope in the granting of a license fee to Ringling Bros.' circus at a less rate than that fixed by bylaw. Mr. Bartram may have expected that the police magistrate's decision would be in his favor, but it is probable that he was quite alone in his expec-

that he was quite gaine in his expectation.

"Mr. Bartram," said his worship, "I have come to the conclusion that I will not receive your information."

"But, your worship," answered the lawyer, "the law provides that anyone may lay an information upon oath. The late P. M. Parke took the same

may lay an information upon oath. The late P. M. Parke took the same grounds as you have, until, after a year's litigation, Chief Justice Armour, in the court of Queen's bench, at Toronto, ruled that a magistrate must take an information from any complainant, and decide upon that information whether to issue a warrant or a summons."

"I do not want to hear any argument, Mr. Bartram," said his worship. "I only say that I refuse to receive the information in its present form."

Mr. Bartram's obliging and conciliatory disposition manifested itself in a remark to the effect that if the police magistrate would say exactly what form he would receive it in, he (Mr. Bartram) would be pleased to alter it.

"I have decided not to take it in its present form." said his worship, "because it is not definite or specific enough."

"Not specific enough"—began Mr. Bartram, but the police magistrate interrupted.

"I will not hear any argument," he said.
"I have other and more important matters to go on with."

"Will your worship note that I protest strongly against your refusal to take the information" asked the undaunted law-

yer. His worship replied that he would with great pleasure note Mr. Bartram's strong protest, and with that the incident

evening, the occasion being a reception tendered by the congregation to their new pastor, Rev. Mr. Coulter, and to Rev. C. T. Scott, pastor of Dundas Center Methodist Church. Mr. William Bowman presided, and brief addresses of welcome were delivered by Mr. J. Frank Kern, on behalf of the board of trustees; Mr. D. A. McDermid, on behalf of the official board; Mr. Frank Shuff, on behalf of the Sunday school; Miss Long, on behalf of the Epworth League; and Mr. Frank Parker, on behalf of the choir. Addresses of a similar character were also delivered by Messrs. W. H. Wortman and Harry Lewis. The reverend gentlemen made happy replies.

During the evening frequent references were made to the late pastor, Rev. Mr. Kellington, who was greatly loved by his congregation, and whose recent marriage was the subject of many kindly jests. Rev. Mr. Coulter, his successor, created a very favorable impression. He is possessed of a good voice and delivery and a pleasing manner.

At the close of the meeting dainty refreshments were served and an enjoyable hour spent in a social way.

DISAPPEARANCE NO LONGER A MYSTERY.

Young Blow Went Across the Line Without Notifying Parents of His Intention.

The mystery surrounding the disappearance of Wm. Blow, jun., son of Mr. Wm. Blow, of High street, has been cleared up. Young Blow left his house on the evening of Saturday, June 22, driving the evening of Saturday, June 22, driving his father's bay horse attached to a buggy. Nothing was heard of him till a couple of days ago, when it was learned that he was in the United States. Before leaving the city on the night he left his home, he handed the horse and rig over to a man with the request that he deliver them over to the elder Blow. The man instead left them at a North End livery stable, where they remained until discovered yesterday by the police.

New York, July 5.—Miss Jane Perlis, of this city, has broken her engagement to Jacob Prince, of Englewood, N. J., and in a letter she sent him she says: "When a man would so brutally beat a horse, and so easily lose his temper, the woman marrying him would take the same chances."

man marrying him would take the same chances."

Prince and Miss Perlis were driving in West Hoboken, N. J., on June 16, when the horse balked. Prince beat it so badly that he was arrested and fined \$10. He was unable to pay the fine, but Miss Perlis paid it for him. Prince then began to abuse the policeman who arrested him, and was again arrested. He apologized, saying he had lost his temper, and was discharged. HIS WATCH SAVED HIS LIFE.

Mud as a Health-Preserver

[From the Boston Transcript.] In London it was noticed that when the streets were muddy there was a marked diminution of diseases that were prevalent when dust is blowing. Bowel troubles are plentiful when people are compelled to inhale dust. Consumption, too, often gets its start from dust. Other illnesses almost equally grave follow from the breathing of flying particles of filth. Add sufficient water to transform the dust into mud, and the power for harm is gone, as the mud is not inhaled. The germs that infest dry dust become inert in mul, because these germs, vicious as they are, are too lazy to go anywhere un-less they are carried. Moreover, mud is very likely to get ultimately into the drain pipe, and the germs are carried off where they can do no harm. Even when mud dries on the clothing and is brushed off, the dust that arises therefrom does not appear to be as dangerous as that which has not been

ecently wet.

It will thus be apparent that there is recently wet.

It will thus be apparent that there is a bright side to mud, and henceforth all but the fastidious will revel in all but the fastidious will revel in go abroad in search of exercise only when the roads are muddy. You Are Not Sick **But Feel Miserable**

Nearly everybody seems to complain more or less at this season of the year. You feel the need of some tonic to put new strength and energy into the system. You don't sleep well, and suffer more or less from headache and dyspepsia. It may be you are depressed and discouraged, and feel the affairs of everyday life a burden. Little things worry and irritate you. You are not sick, but lack the vitality that is necessary for health and happiness.

There is one preparation which is doing wonders these days as a restorative and nerve invigorator, and that is Dr. Chase's Nerve Food. It is different from any medicine you ever used, for instead of tearing down the tissues of the body it builds them up, and so thoroughly fills the system with new life and vigor as to overcome pains and aches, weaknesses and irregularities. It is surprising what a host of people are using this great food cure. A few weeks' trial will convince you of its singular merit.

SUGAR BEET EQUALS CANE. To the Editor of The Advertiser:

Aware of the extensive circulation of your valuable paper and its instructive policy, rendering it an appreciated medium

—A valuable graybour policy, rendering it an appreciated medium in disseminating among the masses information on matters of general interest, I venture to trespass on your columns with the object of endeavoring to remove a very erroneous impression prevailing among a number of people, regarding the superior quality of sugar manufactured from cane to that extracted from the beet.

Now, I wish to state, and I defy successful contradiction, that beet sugar is identical with cane sugar in its formation, as an analysis will indicate:

The chemical formation of each is: 12 molecules of carbon, 22 molecules of hydrogen, 11 molecules of oxygen.

As they each have, the same commonent

drogen, 11 molecules of oxygen. As they each have the same component parts, science settles the question, not the opinion entertained by your correspondent, or other uninformed people. Science gives us a clear, distinct understanding beyond distinct under-Science gives us a clear, distinct understanding beyond dispute. Some have entertained the mistaken impression that the impurities of beet root sugar cannot be eliminated. Modern science has successfuly accomplished this result, giving us the clear, virgin crystal in beet sugar, equal to any manufactured, and inferior to none.

In conclusion, to convince skeptics who depreciate the good qualities of beet sugar, I will say that about 60 per cent of the sugar consumed in this country is manufactured from sugar beet, and proportionately the same percentage of our

portionately the same percentage of our pitizens enjoy this pure white, granulated

These sheets are almost a fac simile, but without coloring. The 25,000 signatures required two volumes, which are beautifully bound in seal-colored leatl.er, held together with a strap finished by a clasp of oxydized silver.

-The Congregational Club were royally entertained last evening at the residence of Mr. Thos. Jackson, "Woodview," London township. After the monthly business meeting of the club had been held an hour or two was enjoyably spent in games on the lawn. During the evening choice refreshments were served by the cordial hostess. The first annual picnic of the club will be held early in August.

-Col. Peters, D.O.C., of London, inspected the 25th Battalion at St. Thomas last evening. The regiment paraded about 150 strong, and looked splendid. They were put through the maneuvers on the Market Square. The colonel seemed pleased with the drill, but refrained from making any public remarks. He met the non-commissioned officers after the review in their club rooms. The inspection was viewed by a big crowd.

DELUGE OF APPLICANTS.

The department of crown lands have received in the neighborhood of ten thousand applications from veterans who claim to be entitled to land grants under the act of the last session. The response to the government offer has been much greater than was ever expected, and several of the clerks are occupied day and night in answering letters and sending out blank forms. So far they have not been able to do anything toward adjudging individual applications, owing to the constant stream of letters which each mail brings.

They are wondering at the city hall what has happened to the once all-important question of the London and Port Stanley lease extension. Once, the officials say it was of vital interest to the Walkers to have the deal closed as soon as possible, and now they don't seem to care if it's ever closed. At least that is what the city clerk judges by Mrs. Thomas Pitter, of this city, is the lack of news from the west. He \$1 25 to \$3. visiting her sister, Mrs. George Gillard, has written to them a couple of times and got no reply. Some time ago it was said that the matter would be revisiting Miss Maida Campbell, Queen's avenue.

Was said that the matter would be revived in May, when Mr. Frank Walker returned from Europe; but May has come and gone, and weeks have rolled by one after the other, but still no word from Walkerville. Now, some of the aldermen remember about a certain offer made by the Walkers that was to be the final offer, and are McEwen, Ailsa Craig.

shipped out today, ostensibly as special constables, to Chapleau, White River, and points on the main line, where listurbances have taken place, and where the strikers are standing firm.

THE MACHINISTS' STRIKE. Toronto, July 4.—The executive of the Sheet Metal Workers' Union and the strikers met at 3 o'clock this afternoon. Several more firms are reported to have signed the agreement, and some of the men who came out on strike are back at work again. The prospects are thought to be good for an early settlement in all the shops.

STRUCK BY LIGHTNING

Three Dead and Others Dying Near Pitts-Surg-Other Deaths.

Pittsburg, Pa., July 5.-George Mc-Williams and family while enjoying an outing yesterday near Monessen on the Monongahela River took refuge from a terrific storm under a large oak tree. A bolt of lightning struck the tree and prostrated the entire party. Two girls, Esther and Elizabeth, aged 6 and 8, respectively, were killed and an infant, May, lived but a short time afterward. Mr. McWilliams was totally paralyzed and his wife in such a condition that she cannot live. A 10-year old son was severely shocked, but may Berlin, Ont., July 4.-During a thun-

IN RE BONUSES

First Case Decided Under the New Ontario Law-Aurora's \$10,000 Bonus Stands.

Toronto, July 5.-Mr. Justice Lount this morning gave judgment refusing to quash the bylaw passed by Aurora giving \$10,000 the bylaw passed by Aurora giving \$10,000 of a bonus to the shoe manufacturing firm of Underhill & Sisman, which removed from Markham to Aurora. The latter municipality was charged with stealing the factory by offering a bonus, and the suit was brought under the recent law of Ontario forbidding this practice. The judge finds that Markham and the owners of the factory did not get on very well, that Mr. Undethill, who ran for reeve twice and was twice beaten, publicly announced that the factory would leave Markham, and that Aurora's offer was made after this decision was made, and as a consequence of it.

Under these circumstances Aurora cannot be charged with tempting away the factory and the hours bylary its also not be charged with tempting away the factory, and the bonus bylaw stands. The decision is the first under the new law relating to bonusing.

GOING DOWN RIVER IN A QUEER CRAFT.

Home-Made Boat. A party, consisting of Messrs. Henry Jenks, Grey street; Frank Friend, Wellington street, and John Abrams and Wm. Layman, of Horton street, left London yesterday afternoon for a fishing and boating trip down the River Thames. Their craft was a strange-looking affair, being a flatbottomed scow, built by themselves during the past month. It was about 14 feet long and 4 feet wide, with a square stern and a blunt-nosed prow. It draws only about six inches of water, and it will be almost impossible to tip it over. The scow was launched at the Forest City boathouse with appropriate ceremonies, Miss Beatrice Friend breaking a bottle of champagne across its bows and christening it "The Beatrice." A large number of the friends of the voyagers their departure. witnessed passed the dams at the waterworks and Byron successfully, leaving the latter place about 7 o'clock. The party will go as far as Chatham and probably on to Lake St. Clair. They expect to be back in London by July 13. It is probable that they will ex-

perience some difficulty from the lowness of the water in the river. MOVED INTO MORE MODERN PREMISES Park.

Well-Known Florists Change Their Place of Business.

Messrs. J. Gammage & Sons, the well-known Dundas street florists, have just moved into more commodious premises at 207 Dundas street, four doors west of their former stand. Their new store will be found to rank as one of the best-fitted and most convenient florist. stands in Canada, it being furnished with a fine conservatory at the rear. Messrs. Gammage & ! Sons have been making for themselves an enviable reputation as growers of choice blooms, as was evidenced by the successful showing made by them at the carnation show at the Pan-American Exposition. Their moving into larger and more suitable quarters is but another evidence of the progressive spirit which has contributed so largely to their past success, and they will be found in the future, as heretofore, ready to cater to the most exacting demands of the floral trade.

demanded, there was a feeling almost of relief among many of the audience, who had let themselves be carried away by the acting and had suffered with the mimic suffering on the stage.

Hugh Marchmont and his friend, owing to their late arrival, were at some distance from the stage, and near to where Sir Edward Marchmont had taken up his stand. Hugh was interested and amused, and expressed his surprise to his father in no measured terms.

"I had no idea Andree was such an actress" he said. "My dear father, she would be a second Adrienne Lecouvreur if the stage had been her vocation. Ristori herself could not have surpassed her in that last scene."

Sir Edward did not appear quite pleased.

"It must have been temporary," said the baronet, yet more coldly. "I saw him out driving yesterday, and he excused himself to Andree by saying that though much better, his physician advised him not to expose himself to the night air. Miss Marchmont was anxious to have your pretty sister here tonight," added the host, a little stiffly.

Douglas Lancaster bowed; but he bit his lip with concealed impatience.

"You are very good," he said.

And Hugh, who had felt a little vexed at his father's hauteur towards his friend, felt no small relief as the curtain rising prevented any more conversation.

The second act was as brilliant and animated as the first. Mrs. Clarence played with much spirit, her coquetries driving Priscilla's adopted father to the verge of madness, and acting on his flame like oil on fire; while Miss Gould's little affectations passed muster in the Royalist lady who discovers in Priscilla her long-lost daughter. Andree had less acting during this act, and once or twice she had leisure to glance over her audience, and each time she saw not only her brother's face with its laughing eyes and gay smile, but beside him a proudly-set head, erect and stately, and two earnest, dark-gray eyes, which seemed looking beyond the stage, and were, each time she looked in their direction, apparently quite heedless as to what passed thereon. Miss Marchmont was sufficiently a woman to be piqued at this indifference.

The play over, the guests descended in the great hall and as it had been setsufficiently a woman to be piqued at this indifference.

The play over, the guests descended into the great hall, and as it had been settled that the dramatis personae should retain their costumes, it added much to the originality of the scene in the great hall to see the little Puritan damsel moving quietly among her guests, making them known to each other, introducing partners, and forming sets with a stately grace of movement which even her undignified dress could not conceal. And soon the ball was en train; dancing was going on with vigor, and firtation reigned supreme,

THE TOURNAMENT. THE TOURNAMENT.

The programme of the sixth annual tournament of the Western Ontario Bowling Association has been issued by the executive committee. The tournament is to be held on the lawns of the London Rowing Club, commencing Tuesday, July 23, and among the events are a trophy, association, consolation, double and single matches. Good prizes are to be offered, and more than the usual number of rinks are expected to compete. Mr. Edmund Weld, of this city, has been appointed umpire. The competition for the Labatt trophy will be very keen. The trophy has been won by the Thistles, of Hamilton, two years, and should it go to that club again it becomes its property.

IT IS A LIVER PILL.—Many of the ailments that man has to contend with have their origin in a disordered liver, which is a delicate organ, peculiarly susceptible to the disturbances that come from irregular, habits or lack of care in eating and drinking. This accounts for the great many liver regulators now pressed on the attention of sufferers. Of these there is none superior to Parmelee's Vegetable Pills. Their operation, though gentle, is effective, and the most delicate can use them.

A number of the South African solders, with Buffalo Bill's show, went over to Windsor from Detroit and looked up the returned Windsor boys. Three of the young fellows had been cooped up in Mafeking during the whole siege. One named Bennet acted as Baden-Powell's orderly. They stated they had been having considerable trouble with the Boer solders with the show.

Presented Him With Costly Vase and Their Best Wishes—Matters Before No. 2 Committee.

Dr. Cl. T. Campbell was in all probability the most surprised man in London last night. The doctor was in his usual place at the goard of works meeting, debonair and smiling, and with a rose in the buttonhole of his for the supply of coal at \$6 20. coat. He was pondering deeply over the question arising out of the proposed double-tracking of Railway street, when Chairman Winnett, who Librarian Blackwell. had disappeared from the committee room with a highly mysterious air a minute previously, suddenly placed in front of him a beautiful and costly vase filled with flowers.

"That," said Ald. Winnett, in effect, is from your fellow-members of No. 2 committee, who desire in this way to express to you their congratulations and the hope that your married life may be a very happy one."
Dr. Campbell was too much surpris-

ed to be able to say much, but he contrived, nevertheless, to indicate his deep thanks for the thoughtful gift. "I can only hope," he said, "that my married life will be as happy as I know that of the rest of you has been." The board hadn't much business to it is navigable along both branches.

A communication from the County effects of the sun's rays and expired Council of Middlesex, regarding certain recommendations of the jail committee, was laid over until the committee can visit the county jail. The county council wants new concrete above Clark's bridge, and a young walks at the court house, new galvanized eavestroughing around the walls, the prison walls repaired, and uniforms provided for county constables, to be used only during the holding of courts.

The engineer, in reporting on the matter, estimated that the work at the court house would cost \$1,260, but thought that \$300 or \$400 might be saved by building four-inch brick walls and filling in with concrete, so wall the same thickness of the old walls-22 inches. The cost of laying the cement walks mentioned would be \$400.

City Engineer Graydon wrote, that having considered, as directed, the advisability of the city paying a portion of the cost of permanent improvements, he would advise that as an inducement to property owners to have the streets paved, the city might, with justice to everyone, pay one-fourth of the total cost of the pavement of a The annual Sunday school picnic and street which had never been previously paved; and on those streets that have been paved already and require repaying, one-third the total cost. mittee will visit the locality and look into Mr. Johnston's contention.
The pay sheet amounted to \$286 22. Those present were Chairman Winnett, Mayor Rumball, Ald. Olmsted, Parnell, Campbell and Stevely, City Engineer Graydon and Assistant Engineer Kirkpatrick.

LIBRARY EXTENSION PLANS PRESENTED

Cost Well Within Council's Appropriation-Librarian's Monthly Report.

At last night's regular meeting of the public library board, City Engineer Graydon presented plans for the proposed extension. The estimated cost of the addition and alterations is \$3,-850, which would be increased several hundred dollars by the furnishings, and a few items not taken into consideration by the engineer. The \$4,000 appropriation made by the council will not be exceeded. The board decided on some slight changes in the plans, the further details of which were referred to a committee consisting of Messrs. Judd, Gunn, Jeffrey and Librarian Blackwell. Engineer Graydon was requested to visit other libraries in search of sug-

gestions, the trip to be made at the expense of the board.

The report of the librarian for June was adopted. The circulation of books for the month totalled 5,415 volumes, of which 3,015 were fiction. The average daily circulation of books was 205, and magazines 20, a total of 225. The receipts were \$29 72. The fines averaged 78 cents a day. The carde issued aged 78 cents a day. The cards issued to date number 8,676.

The finance committee reported the acceptance of Fred D. Macfle's tender The members present were: Messrs.
