SCIENCE NOTES

A bee can outfly a pigeon. Paris sees 37,000 hives every year. One million blossoms are drained to make one pound of honey. The world's largest hospital is in Paris. Germany's list of newspapers is the largest. Juniper is said to be the most durable of woods. Norwegian wrapping paper is the best. Wolfskin makes the best drumhead. Germany holds a record for cocoa drinking. Three thousand marriages per day is the record for the entire world. Some one has computed that the average woman carries 50 miles of hair on her head. The Englishman eats more butter than any other nationality. His yearly average is 13 pounds. The Norwegian Government is considering the advisability of putting advertisements on the back of postage stamps; the proceeds to go to some national charity. The passport system dates back to the time of the Crusaders. An average of 800 persons are killed in the United States each year by lightning. This means one in every 100,000. Fifty thousand dollars a year is spent on Regent's Park, in London. The average marriage rate in Great Britain is 1.6 in 1,000. The average depth of British coal mines is 800 feet. Four thousand feet is the limit of practical mining. A square foot of a Persian rug means 23 days' work for the weaver. The salmon is said to live about ten years, but pike and carp sometimes reach 150 years. John Bull figures out that his country has been successful in 82 per cent. of the battles in which it has engaged. Londoners use over 82,000,000 gallons of water last year. The Swiss are the greatest chocolate eaters. Malaria renders nearly a fifth of the land of the globe dangerous to white men. One-seventh of Great Britain's foreign commerce passes through the Suez Canal. No Arctic explorers have ever had colds until they returned to civilization. Then, one and all, they are prostrated by severe influenza. Statistics show that, though fair-haired people are as a rule less strong than those who have dark hair, yet the former live longer than the latter. The report from Turkey is that the ban which has existed against the telephone has been raised, and that the matter of a system for the city of Constantinople is being considered. Practically all you need to be safe from consumption is to live in a semi-tropical country, where the yearly rainfall does not exceed 12 or 15 inches. The lead of a very cheap pen is often nothing but coke. As to the Spinal Cord. A young teacher whose efforts to inculcate elementary anatomy had been unusually discouraging, at last asked in despair: "Well, I wonder if any boy here can tell me what the spinal cord really is?" "It was met by a row of blank and irresponsible faces, till finally one small voice piped up in great excitement: "The spinal cord it what runs through you. Your head sits on one end and you sit on the other."

COBALT NOTES

It is the opinion of mining men that the Laurier district is destined to become the most wonderful gold-producing district in the world. The work accomplished this summer by these prospectors has revealed wonders. Some scores of claims that have been bought last fall for a few hundred dollars are being held now at high prices.
The management of the Coniagos Mine is appealing to the Ontario Railway and Municipal Board against an assessment of \$100,000 fixed by the Town of Cobalt for the purpose of levying an excise tax. The proprietors of the mine claim that they are not liable to taxation on income.

BY ACCLAMATION.

Hon. Mr. Graham, Minister of Railways and Canals, and Hon. Mr. Pugsley, Minister of Public Works, have been elected by acclamation for Brockville and St. John respectively, and will now have a brief period of power in which to show the electors what stuff they are made of and the character of the administration to be expected of them, before the general election, which in the nature of things cannot be very long delayed.

A GREAT FAILURE.

One of Hon. Mr. Whitney's pre-election promises was that there should be a great educational reform when he attained office. From almost every platform from which he spoke he attacked the Ross Government's management of the Education Department, and made railing accusations against it. The Times never had any confidence in his sincerity in the matter; it knew that many of his allegations were unwarranted, and it was well aware that the subject of education was not the one with which Mr. Whitney or those immediately surrounding him were most familiar, hence it expected nothing more than has taken place.

efforts are to uplift and improve. And the great public which pays a vastly increased bill for a disorganized and inefficient system, guided by no intelligent policy, and prostituted to political exigencies, is waking up to the deception of which it has been made the victim.

IS NEGLECT A VIRTUE?

The average public ownership and operation faddist is a very resourceless and hopeless fellow. To him the only remedy for his farm team's nibbling at the crop which they cultivate is to take them out and shoot them and then harness himself to the cultivator. Controlling them so as to profit by their use never occurs to him. In the matter of electric light, for instance, the Herald says our people are terribly overcharged. That may be so. If so, we have a law which the Council can appeal to for relief. The statute empowers it to force arbitration of the price—to private users as well as the public—and if any five ratepayers ask it the Council must permit them to go on and compel arbitration in the city's name, and the arbitrators may fix what they decide is a fair price, and the company must abide by it. And while the Council neglects or refuses to take advantage of that law to control the rates charged, the faddists seek to induce the taxpayers to entrust it with the "ownership and operation" of all the public and private light and power supply of the city, at public expense! Is a body so careless of the interests of the people, or so incompetent to use the means provided to guard those interests, likely to serve the city well with the enlarged powers and added responsibilities sought to be given it? Should faithfulness in a few things be rewarded with trust in many more? Shall we exalt demonstrated incompetence and neglect at the taxpayers' expense? Why, with all the pretence of the faddists to serve the public, have they not invoked the law to compel service of our people at a fair arbitrated price? Echo answers, why?

ABUSE OF TERMS.

Toronto is the head centre of the public ownership fad, and Mr. Maclean has good reason to chuckle when he thinks how he has bamboozled a lot of people who might have been expected to reason more calmly and make better use of the teachings of experience. The Toronto Star is willing to limit the application of public ownership and operation to utilities of necessity monopolies. That is not going the length of Mr. Maclean's supporters. But the Star proceeds to make out its case by contending for what we might freely admit without concerning "the principle" argued for. It says:

But the moment a certain service becomes of necessity a monopoly, the perfect liberty of the individual is gone, and the only question that remains is whether the service shall be controlled by a private person or corporation or by the State.

It is not hard to the point, which is not whether public "control" of public utilities is desirable—that is freely admitted, and much has recently been done to secure it. The real question is: Shall we leave the management and operation of these utilities, free from political pull, in the hands of men selected for their fitness for the special works and for no other reason, controlling the utilities effectively in the public interest, or shall we turn their ownership, management and operation at public expense over to the wire-pulling Toms, Dicks and Harrys who may from time to time have political or other influence enough to get elected to Councils or Legislatures? The mere presentation of the case to a man who knows anything of the requirements of a successful business and who has any knowledge of how public affairs are managed is enough to call pause and lead him to wonder at his obsession.

Abuse of terms leads to great errors. "Control" is not "ownership and operation" and in most cases the former will give us all the benefits we could obtain from the latter at its best, while protecting us against the many near and remote evils and dangers inseparable from the latter. It is well that Government should exercise control to ensure that our food is pure; it would not be well that Government should undertake to fatten, butcher, pack and sell the meats we eat. It is well that Government controls in order that we may receive the weight of bread for which we pay; but it would be very undesirable that Government should grow, harvest, thresh and grind the wheat, and bake and sell our daily bread. There is a very clear distinction between the "ownership and operation" and the "control" theories.

serve a good purpose in permitting settlement and saving the pumps from damage by sand.

But it would be folly to accept as gospel the Yankee "yellow" press' statement that Japan will refuse to limit the emigration of her people to Canada. As a matter of fact, she has already done so.

Let there be a responsible head for each of the three great departments of the City Council, Streets, Sewers and Waterworks. There needs to be no great additional expense; and good will result from the change.

The Liberals of Centre Simcoe have chosen a candidate for the Legislature in the person of Mr. Richard A. Graham, a prominent farmer of Saurin, and he will make an effort to "redeem the constituency. The seat is held by A. B. Thompson, who had a majority of 558 at the last election.

The Brantford Expositor is cruel enough to hint that the Tory devotion to public ownership is largely a matter of talk, but that when there was a chance to build the C. P. R. as a public work they turned it over to a company springing away all the road built and giving also enormous subsidies both in money and land to get rid of it.

Three of the Warton mob have been sentenced to eight months in jail, and the woman who was mobbed and who in defending herself shot and killed the leader of the rioters has been set free. Such a result is likely to have a good effect, and maudlin sentimentality should not be allowed to lessen it by petitions for the pardon of the rioters. As for the woman in the case, she may be deserving of all the hard things said of her, but if so, there was an easy way to proceed against her in a legal way. Canada wants no mob rule.

Beach Commissioner VanAllen appears to be able to bring the Cataract people to time with much more celerity and ease than the City Council can. It is melancholy to note this, for it is an indication of the superior efficiency of absolute monarchy as compared with democratic government.—Hamilton Herald.

Absolute monarchy sometimes affords better government than some others. All depends on the wisdom and graciousness of those who govern. The Herald's news columns gives the key to the Beach Commissioner's success when it quotes Commissioner VanAllen as expressing the opinion "that the city and the street railway company might get along better if they would try and get together instead of always standing at arms' length from each other, and scrapping over every little matter that arises between them." It was the "get together," the conference in a business spirit, which the Times has always advocated, that resulted so well at the Beach. The Council of this year will have none of it.

The Conservative organ in Victoria, the Colonist, does not advocate the exclusion of Asiatics from British Columbia. It asserts that the Oriental problem "cannot be disposed of by the methods of the demagogue, by platitudes, or by violence," and it makes it plain that opinion is not unanimous on the question even on the coast. It says:

It is easy to talk about a "white Canada," and there are some people who appear to think that if this is said often enough it will in some way or other lead to a solution of the whole difficulty. But the time has come when the subject must be approached with calmness and with as little prejudice as possible, when races, antagonistic to each other, in manner, religion and traditions, come into close contact. It is a many-sided question. For example, to say that the people of British Columbia are of one mind as to the exclusion of Orientals from the country is not cor-

rect. If it should be said that they are of one opinion as to the inadvisability of permitting unrestricted immigration from Asia and the opening of any and all lines of industry to Asiatic races, the claim might be admitted; but there are many people who would be glad to see a sufficient number of Orientals of any nationality admitted to supply the demand for manual labor. As we see the matter, the greatest difficulty is presented by the Hindu movement towards Canada.

(Toronto Star.) Roselle Knott, the actress, is married again. This is not Miss Knott's first venture into matrimony, but we make mention of her nuptials because the name of the clergyman who tied the nuptial knot is not stated.

The New Minister.

(Christian Guardian.) The Hon. George P. Graham, recently appointed Minister of Railways and Canals in the Bennett Cabinet, is just now a much-talked-about individual. As the son of a Methodist minister and an official in the Methodist Church, thousands of our readers, irrespective of party, are cherishing high hopes for him in the responsible and exalted position to which he has been called. To give one's self up to an active political life, we believe, to make a severe sacrifice of the reality and thoroughness of one's moral and religious convictions, but then we suppose convictions are made for previous conduct. And which he has done it is only a proof that they were not of any great value before it came. Our best wish for Mr. Graham is that as the years go on he may prove himself a politician built on the four-square plan.

No Answer Forthcoming.

(“Manufacturer” in Toronto World.) Editor World: You quote the president of the Manufacturers' Association to the effect that the present money stringency is due to our excessive imports. The assumption, of course, is that we "send money out of the country" to pay for these large purchases. In this opinion, as you say, he is backed up by popular prejudice. We want the "balance trade" to be in our favor, but not, because we may get the balance in gold. It might puzzle some of us to account for this prejudice, perhaps, if confronted with the actual facts, which are easily at hand. The United States is exporting at the rate of 400 million annually in excess of imports. Since 1891 she has rolled up a grand total of 7,531 million of a "favorable balance." And as these figures include gold and silver, no money has as yet come in to enable it. In Washington, "why the United States is shipping gold to Europe in the face of the greatest trade balance in history."

Why Borden Shies.

(Windsor Free Press.) But the situation, conditions being what they are, is a very complicated one, as Mr. Borden evidently recognizes, since he had hedged his proposal with qualifications which later on might be very convenient to him. The situation is being further complicated by the duplication of existing systems, which tends to make expropriation by the public more difficult. Three Western Provinces have embarked in the telephone business, and it is doubtful whether they would give up the field to the Dominion. It is an open question, whether Provinces could not operate this utility to greater advantage than the central power.

Pending the development of the situation the safe policy of the Federal authorities is one of regulation. Both telephone and telegraph companies should be subject to rigid supervision by the Railway Commission. Their rates should be fixed on a basis just to their stockholders and there should be regulations governing the service which would prevent discrimination or favoritism, and would ensure efficiency. If the public gets a first-class telephone and telegraph service at rates which are obviously reasonable, it is not likely to interest itself deeply in the ownership of these utilities.

English Pronunciation.

That names of places in England frequently are not pronounced as spelled is proved by the experience of two cyclists who were going from Clacton to the old village of St. Ostyth. "Are we right for St. Ostyth?" they asked of a laborer. But a blank look met the question; he had never "heard of no such place." A second wayfarer interposed, and, equally ignorant, then came a third. A scratched head, a puzzled look and then the dawn of intelligence. "Aye, to be sure, I have it now. It's Snosey you mean!"

AMAZING INGENUITY IN THE MANUFACTURE OF FALSE PEARLS.

The imitation of gems has always existed but in recent years this work has been brought to a state of perfection rarely dreamed of by the workers of ancient times and the manufacture of imitation gems of specially prepared glass, paste, etc., has become quite an important industry.

The means of ascertaining the genuineness of pearls, which are frequently imitated with marvellous skill, is especially important to the layman, even though the jeweller may quickly detect them. Imitations are usually lighter than real pearls and generally are brittle, although some are made solid of fish scales and do not break so easily, while the holes, which in the real pearl are drilled very small and have a sharp edge, in the false pearl are larger and have a blunt edge. As a rule, the imitation pearls are little hollow spheres of glass colored internally with a coating imitating the orient of natural pearls.

The manufacture of these articles embraces two series of operations. The production of the sphere and the introduction of the coating. The spheres are produced by the glassblower, who, by aid of an enameller's lamp, softens the extremity of a tube when the substance is of the right consistency. In this way are obtained very regular little spheres that serve for the composition of pearls. In the most beautiful imitations the tube employed is slightly opalescent and the glassblower besides, gives to the little spheres while they are yet malleable certain slight perceptible inequalities of surface by gently tapping them with a small iron bar. This gives them a still greater resemblance to natural pearls, which are very seldom absolutely regular.

Imitation pearls were manufactured in Egypt at least fifteen centuries before our era, say some authorities, and the manufacture seems to have remained stationary there for a long time. The manufacture of false pearls. At Rome goes back to the period when the taste for fine pearls became general, and Pliny indicates this in the most precise manner. The silence of other ancient authors on imitation pearls allows us simply to conjecture what must have been their use among the inferior classes, which in all ages have considered themselves obliged to imitate cheaply the luxuries of the higher circles, so we must abandon to Venice, where we shall find it not the origin, at least mention of which are lost in the night of time. The first authentic mention of imitation pearls dates from the year 1318, when the manufacturers, called by the name of paternoster makers and pearl makers, were established either at Venice or at Murano. At first the glass balls were filled with various materials, gen-

erally with a base of mercury, but in the year 1680 a rosary maker named Tacquin conceived the idea of using in place of the mercurial mixture a harmless substance that produced an infinitely more perfect color. This substance, the essence of orient, is formed from the scales of the ablette, a little white fish which abounds in the Seine, the Marne and the Lorret. The fishes are washed roughly in pure water in a large basin and the water is then strained through a linen cloth and the residue is left for several days to settle. The sediment thus obtained forms the essence of orient. It requires from seventeen thousand to eighteen thousand fishes for five hundred grammes a little more than a pound) of fish substance. The scaly substance is likely to decompose quickly and numerous chemical agents are employed by different manufacturers to preserve it. These are usually kept secret, but it is known that liquid ammonia or the volatile alkali is one of the substances most commonly used.

The discovery of a method of preserving the brilliancy of fish scales has led to the export from Restov-on-Don, Russia, for the last five or six years, the fish used are so small that nets of 5,000, 600 to 8,000 (more than a pound) of fish yield fourteen ounces of scales, which are powdered with some preservative, packed in ten pound tins, hermetically sealed and sent by parcel post to Berlin, Stettin and Paris.

Artificial pearls are also made from beads of opalescent glass filled with gum, the polish of the glass being reduced by vapor of hydrofluoric acid. Very good imitations of the genuine pearl are made from mother of pearl also. This material is cut to the required shape and polished when it has an appearance very similar to that of the genuine article, although an expert can readily distinguish the imitation from the genuine gem.—Jeweller's Circular Weekly.

A MIRACLE EXPLAINED.

The Maoris are in many respects the most remarkable savages with whom the white man has come in contact. Fifty years ago cannibalistic feasts, at which the flesh of their fallen enemies was served, were not uncommon. Today several members of their race are members of the New Zealand Parliament, and Maori women as well as the white women of New Zealand exercise the right to vote.

When the British first occupied the islands, in the early part of the nineteenth century, it is estimated that there were about one hundred thousand Maoris in New Zealand. They were divided into tribes, each having its own unwritten laws regarding land cultivation and other social matters. The English found that they had a genius for war, showing unusual ability

CONUNDRUMS. What should a clergyman preach about? About a quarter of an hour.

How do you define a ring? As a hole with a rim around it.

Why is the letter D like a hoop of gold? Because we can't be wed without it.

Why is the root of the tongue like a dejected man? Because it's down in the mouth.

Why is the wick of a candle like the city of Athens? Because it is in the middle of Greece.

Why are there three objections to taking a glass of brandy? Because there are three scruples to a dram.

Which has the hardest life of it, coffee or tea? Tea, undoubtedly; for while coffee sets down tea is compelled to draw.

Why is a dog biting his own tail like a good manager? Because he makes both ends meet.

Why are bald-headed men in danger of dying? Because death loves a shining mark.

If the bride goes away on her wedding journey right from the church friends do not expect to be invited to the reception.

ACCUSED OF STEALING BRASS.

SECOND ARREST IN CONNECTION WITH G. T. R. CASE.

Cab Owners Must Renew Drivers' License Under New By-law—Other Cases in Police Court.

Joseph Fee, 300 James street north, was arrested last night, charged with stealing some journal brass from the G. T. R. He is alleged to have been with Maher, who was arrested the other day on a similar charge. The police say the young man claim they found the brass. M. J. O'Reilly obtained bail in the sum of \$100 for Fee's release.

William Bolton, an old vag, who has been up several times, was rounded up by Constable Brown last night and given six months this morning.

The Hamilton Cab and Bus Line Co. were charged with allowing a cab to be driven by an unlicensed cabman. The manager admitted the offence and paid a fine of \$5.

Mr. J. H. Robinson, undertaker, when charged with a like offence, indignantly denied it. He stated he had a license, and produced it. Since the new by-law has gone into effect it appears that new permits and licenses have to be taken out, and a number of others, besides Mr. Robinson, were given a chance to renew their last year's licenses. They were: Martin Bros., Samuel McKay, Fred Burkholder, Harvey Whitehead, Fred Knappan, Samuel Gray and John Strachan.

Thomas Woods, Barton, walked into court with a cigar in his mouth and pleaded guilty to a charge of driving drunk. Constable Spencer said it happened a week ago Monday, while Woods was drunk. The magistrate fined him \$5 and Woods paid it between puffs.

Harry Williams, no address, and John Ripley, Hughson street north, paid \$2 each for being drunk, and Matthew Clark, being a married man, got off.

VISIT OF THE MANUFACTURERS.

LOCAL COMMITTEES CHOSEN TO PROVIDE ENTERTAINMENT.

Delegates to Canadian Convention, to be held in Toronto next week, will be in Hamilton on 27th.

A meeting of the local members of the Canadian Manufacturers' Association was held in the Hotel Royal yesterday afternoon for the purpose of making arrangements for the entertainment of a goodly number of manufacturers and their ladies, who will visit Hamilton on the conclusion of the Toronto convention on the 27th of this month.

An entertainment fund was at once subscribed, and the following committees appointed to carry out the details, which will include visits to some of the larger manufacturing establishments, followed by an uptown luncheon:

General Committee—Robert Hobson, Chairman; W. R. Dunn, Treasurer; C. R. McCullough, Secretary.
Transportation Committee—Col. M. J. Myler, Chairman; S. O. Greening, Paul J. Myler.
Route Committee—R. A. Robertson, Chairman; F. H. Whitton, H. H. Champ, Luncheon Committee—W. R. Dunn, Chairman; W. C. Breckenridge, F. F. Daley, C. R. McCullough, A. L. Johnston.
Finance Committee—Robert Hobson, Chairman; H. P. Coburn, J. A. Puhlow, George Sweet.

The local manufacturers intend to give the visitors a thoroughly enjoyable time.

MAN MISSING.

Salvation Army Searching for a Lost Englishman.

New York, Sept. 19.—All the local branches of the Salvation Army in this country have started a systematic search for Harry C. Dickson, the agent of a prominent London engineering firm who disappeared from this city on March 21st last. Dickson's friends and employers in London appealed to the Salvation Army headquarters there for assistance in the search, offering a substantial reward either for information concerning his whereabouts or for proof of his death. Dickson came from London on a business trip for his firm on March 20 and went to the Hotel Astor. The next day he packed his grip and said he was going to Wilmington, Del. He left his trunk at the hotel. Before he went he drew \$500 on his letter of credit from Cook & Son, which was heard from him after he drew the money.

CLIMBER MISSING.

Berne, Switzerland, Sept. 19.—No trace has yet been found of Harold W. Telford, who left Engelberg, Aug. 30th on a mountain climbing expedition. Telford is an American and has been studying at the University of London. The United States Consul has been directed to search for him.

MARRIED M. P.

London, Sept. 19.—Mrs. Katherine Duncan Lewis, daughter of Blanton Duncan, of Kentucky, a widow, and a well-known resident of that State, was married yesterday at the registry office in Westminster to Alfred Henry Scott, Liberal member of the House of Commons for Ashton-Under-Lyne.

SCOTTISH RITERS.

Boston, Sept. 19.—The business of the Scottish Rite Masons of the Northern and Eastern States, which have been held here during the past three days, were concluded today with a largely attended meeting. Next year's meeting will be held at Buffalo, N. Y., the third Tuesday in September.

FOR FORGERY.

Kenton, Ohio, Sept. 19.—The Grand Jury yesterday reported thirteen true bills against former Mayor Thomas B. Black for forgery and three for embezzlement. Mr. Black, while in jail, is said to have made a complete confession.

Mr. Carnegie's magnificent donation of \$100,000 to the King's Hospital Fund got a long way to making that scheme a complete success. The fund was established in 1897 to commemorate the Diamond Jubilee of Queen Victoria.

CLONEY-GUERIN.

Hamilton Man Took a Bride in Toronto Yesterday.

A quiet wedding was solemnized in St. Patrick's Church, Toronto, yesterday morning at 9 o'clock. The contracting parties were Mr. W. P. Cloney, of Hamilton, and Miss Josephine Guerin, daughter of Mr. M. Guerin, 40 Cecil street, Toronto. The bride was assisted by her niece, Miss E. Phillips, and the groom by his brother, Mr. E. Cloney, of Stratford. Rev. Father O'Reilly officiated. A dainty wedding breakfast was partaken of at the home of the bride's father. A beautiful array of gifts testified tangibly to the good wishes of the couple's many friends. The honeymoon will be spent in New York, and after October 1 Mr. and Mrs. Cloney will be at home at 108 George street, this city.

WEBER—DAWE.
The marriage took place at 12.30 o'clock yesterday at the residence of Mr. John Dawe, 453 Erie street, Stratford, of his daughter, Miss Jean, to Mr. Harry Weber, of Hamilton. The ceremony was performed by the Rev. Robert Martin, in the presence of only the immediate relatives of the contracting parties. The bride was attired in a gown of grey silk. Mr. and Mrs. Weber left on the afternoon train for Buffalo and Pittsburgh on a short wedding trip. The congratulations of a large circle of friends will be extended to them.

NO INQUEST.

Brantford Authorities Believe There Was No Foul Play.

After making a close investigation of the stories going around about the death of Mrs. Smith, formerly of this city, having been caused by a brutal assault upon her just before she was to become a mother, the Brantford police authorities have decided that it will not be necessary to exhumed the body and hold an inquest. Sergt. Wallace visited the section of the city where the disagreeable stories were current, and interrogation was made. It was found that the relations existing at the Voleck domicile were of the best, and there was absolutely no assault on the day prior to the woman's demise. As to the allegation that she was subjected to ill-treatment in Hamilton, it is stated that such would have no bearing on the case, since considerable time elapsed between the occurrences and death. The stories in circulation were mere gossip, and Sergt. Wallace could receive no verification of anything unlawful that had taken place.

SHOT STRIKER.

Mob Tried to Lynch Landowner—Troops Called In.

Canosa, Italy, Sept. 19.—The agrarian strike is growing in this vicinity and the whole countryside is in a state of terror. The strikers have posted pickets armed with shotguns at the gates of the town to prevent farmers from going out to their fields. Yesterday a landowner, under provocation, shot a striker dead. A mob at once formed and attempted to lynch the landowner. Troops were called in and had the greatest difficulty in dispersing the crowd. Many persons were wounded, including the landowner who sustained mortal injury.

FALL FAIR GRANTS.

Fall fairs in Wentworth county get a smaller aggregate grant from the Government this year than formerly, and the appropriation among the various fairs has been changed. North and South Wentworth societies are cut down about one-half, while Rockton, Waterdown and Ancaster are materially increased.

A FRATERNAL VISIT.

On Tuesday evening last about fifteen or twenty members of Hamilton Camp, No. 30, Woodmen of the World, drove to Caledonia on an evening's visit to the Woodmen's Camp here. After business there were speeches from the Hamilton and Caledonia sovereigns; a song by Sovereign Stout and a recitation by Sovereign Cox were much appreciated. Refreshments were served, and a social hour was spent. The Hamilton party returned at a late hour, much benefited by the visit.

Saved by Good Food

Read a Doctor's words about

Grape-Nuts

"A short time ago I was called to a patient who had been given up by his physician. His stomach would not bear food, and consequently he got no nourishment and was slowly dying from exhaustion. He was refused to skin and bones. I immediately put him on Grape-Nuts food and Postum Food Coffee. He has been using both the food and the cereal coffee and has gained rapidly. The reason a delicate stomach can take Grape-Nuts food is that it is predigested, and even a small babe can handle it as it causes no heavy work by the stomach and digestive apparatus; on the contrary being predigested, it is quickly assimilated into blood and tissue. Grape-Nuts as well as Postum Food Coffee contains elements selected from the grains of the field that are of first importance to the human body in nourishing and rebuilding it. WERE RECONCILED.

FATHER TAKES BACK HIS SON WHO HAD LEFT HOME.

Son Had Been Arrested for Begging—Magistrate Heard His Story—His Father Later Obtained His Release—Both Now Happy.

New York, Sept. 19.—Father and son, the former a wealthy physician, the latter a prisoner in the night court on a charge of begging, have been reconciled as the result of the young man's examination by Magistrate Breen. The father, Dr. Charles A. Whitney, a member of the Sons of the Revolution, the St. Nicholas Society and other organizations.

The son, who has lost a leg and has been away from home for a year owing to differences with his parent, is Lloyd Whitney, 22 years old.

Magistrate Breen, who obtained the young man's story, remanded him to the prison connected with the court, and thither the father drove this morning to obtain the son's release.

When Dr. Whitney informed the Magistrate that he was willing to take his son home, Magistrate Breen signed the discharge papers. Then father and son met. They were closeted for nearly an hour, and when they opened the door there were arm in arm. Father and son left the court room, got into a cab and went home together.

THRILLER FOR SATURDAY.

"A Desperate Chance" company will be the attraction at the Grand on Saturday afternoon and evening. This play is one of heart interest, and deals with the notorious crimes and sensational escape of the Bidde brothers in Pittsburgh several years ago. The characterization is strong and carefully drawn, and, with the scenic effects, combines to make one of the greatest melodramas of recent date. Seats are now on sale.

LABOR MAN FOR LONDON.

Trades Unionists There Will Nominate a Candidate.

London, Ont., Sept. 18.—A meeting of the Trades and Labor Council to-night decided to place a candidate in the field to contest the seat in the Commons made vacant by Mr. Hyman's resignation. It was also decided to call a mass meeting of labor unionists to name the candidate. The time and place are to be decided by the Executive Committee. No names have been mentioned as possible candidates.

A FOREMAN KILLED.

He Fell in Front of an Engine at Stratford.

Stratford, Sept. 18.—John J. Hamilton, Grand Trunk tender shop foreman here, was run over by an engine to-day and killed. Mr. Hamilton was endeavoring to board engine 109 at Falstaff street yards when he missed his footing and fell on the track and was crushed almost beyond recognition. Nobody saw the accident, but several were on hand within a few moments, and though medical aid was summoned, it was futile. Mr. Hamilton was 32 years old and had been employed by the company several years as a machinist. He leaves a wife, the daughter of Secretary Thretheway of the city water commission, and two young children.

The Power of the Black Vote.

The recent Republican State convention in Kentucky refused to endorse Taft for the candidacy in 1908, although most of the Republican papers in that State favor him, and a majority of the white Republicans of the State are believed to prefer him to any other person for the candidacy, except Roosevelt. It is said, however, that negroes threatened to cut the State ticket in the election of 1907 if the convention endorsed Taft for 1908, and that this was the reason why it refused to declare any preference for anybody, although it recommended the selection of somebody in accord with Roosevelt's politics. The reason assigned for negro hostility to Taft is his connection with the order to disband the black troops for the Brownsville incident. In ordinary canvasses the negroes hold the balance in many States which are usually Republican—New York, New Jersey, West Virginia, Ohio, Indiana, Illinois, and others. Kentucky, which has been a close State recently, has 75,000 negro voters, and Kentucky is one of the southern States in which the negro who wants to vote is allowed to vote. While the Kentucky Republican

convention was refusing to endorse Taft, his rival, Senator Foraker, was delivering the annual commencement address at Wilberforce University, in Ohio, the leading negro college in the middle West, and he was commending the stand taken by Roosevelt and Taft in the Brownsville matter. It is said that the negroes are organizing in Ohio to fight Taft in the primaries in that State so as to defeat, if they can, his endorsement for President there. Possibly Brownsville will figure in the election of 1908.—From Leslie's Weekly.

Fall Opening Days

To-day Was a Day of Congratulation and Admiration on all Sides

This morning our doors opened upon the premier style event of the autumn season—our Fall Exhibition, and already the women of Hamilton, have set their seal of approbation upon it.

This has been a day of congratulation and admiration on all sides.

Our Trimmed Hats

are marvels of richness and beauty. There's a charm of distinctive style about every one. And such an array! It would seem as though there was no limit for the selecting of something truly becoming and exclusive.

Every Hat is refined and wearable, artistic in design and finished with the marvellous care that marks perfect workmanship.

The wonderful popularity of our Millinery section is due largely to the fact that we make a speciality of selling the choicest trimmed models, at moderate prices, and at no time in the history of the department has this method been more strongly emphasized than during our present opening exhibition.

We specialize in Hats from \$6 to \$10, and it is truly remarkable how much beauty and richness can be embodied in Hats in this price range. We invite your inspection of our values as well as our styles.

Our Special Opening Exhibition will continue to-morrow and Saturday. If you were not here to-day, come to-morrow. If you were here to-day come again and become thoroughly conversant with the modes for fall.

SOUTHCOTE

There are prospects of the village having the benefit of electricity. Surveyors were working through this section last week.

The Free Methodist camp meetings are still going on. Large crowds gather, and there is some talk of building a church near the camp ground.

Mrs. Craig, of Hamilton, has returned home, after visiting her sister, Mrs. D. Epps.

Mrs. Laley, of Toronto, has been visiting at Mr. Rowland Kelly's. Lots of rain nowadays—no more small potatoes.

Some of the farmers have threshed their grain, and find the yield is not so large as last year.

In about three weeks the stone road will be completed from the Ancaster stone road through to Carlisle.

PREPARING HOUSE FOR WINTER.

It is none too early to consider how to make the house shipshape to meet the winter season. The wise householder looks to his chimneys, if perchance wind and rain and imperfect mortar have allowed bricks to get loose. He scans them from turret to foundation stone, especially in the attic and where they pass through floors and roof. Are there cleats on the collar to dry and ventilate every corner, before winter vegetables are stored, the heating plant started and windows taken down, thoroughly dust and store away awnings, folding them with care.

September is a good month to paint the house, as the air is warm and dry and there is a minimum of dust flying. The paint will have time to harden well before the cold weather. Put on an extra coat on the side facing the prevailing winds because of the ice storms, which are hard on painted surfaces.

An Irish squire, seeing a man who was engaged in painting a gate on his estate working away with unusual energy, asked: "What are you in such a hurry for, Murphy?" "Sure, I want to get through before me paint runs out!" was the reply.

MINISTERS BY ACCLAMATION.

Hon. George P. Graham Now M. P. for Brockville.

Mr. Pugsley for St. John, Without Opposition.

Brockville, Sept. 18.—At the close of the nominations for the Federal vacancy to-day Hon. Geo. P. Graham, Minister of Railways and Canals, was declared elected by acclamation, no other name having been placed in nomination.

Mr. Pugsley's Election. St. John, N. B., Sept. 18.—Hon. Wm. Pugsley, Minister of Public Works, was to-day elected by acclamation as the St. John City and County representative in the House of Commons.

In a short speech the Minister referred to criticisms in the press following his Fairville remarks regarding certain charges some of the leaders of the Government and its supporters, and criticized Mr. Borden and his speeches for dealing with petty questions and scandals. Mr. Borden, leader of the Opposition, was not taking the part of a man in his great position when he went about the country and charged the Government with all kinds of electoral frauds, and left gentlemen on the platform with him make charges more reckless than he himself made.

In reference to his Fairville remarks about the 1904 Conservative election fund of half a million, Mr. Pugsley said if Mr. Borden had any hesitation in taking action against him as a public man because of his Fairville speech, let him pick out The Sun newspaper, if he liked, and act against it. He (Mr. Pugsley) would say that he had consulted with the editor of The Sun, and no plea of privilege would be put up by the paper. They would say the statements were libelous if not true, and an opportunity would be taken to present the facts to the people of the country.

A DOUBLE TRAGEDY.

CANADIAN YOUTHS MURDERED AS THE RESULT OF A QUARREL.

Two Brothers Are Slain While Hunting in the Woods on New Brunswick's Border.

Woodstock, N. B., Sept. 18.—A double murder, in which two boys were shot by a boy companion while hunting in the woods, took place on Tuesday afternoon in the woods on the Maine border. The boys all lived in this vicinity, and are sons of respectable farmers.

Guy and Oscar Downing, brothers, were shot by Guy Tardis, who was with his cousin, Fred, Tardis. As near as can be learned the particulars are as follows: The two parties met in the woods three or four times, and each time the quarrels between them grew worse.

AN HEIRESS SHOT.

Fatally Wounded by Former Officer of Austrian Army.

New York, Sept. 18.—Miss Drogga Zeigel, the twenty-year-old daughter of Col. Zeigel, of the Austrian army, is dying to-day in Bellevue Hospital with three bullets in her body, and Julius Hoffman, a former lieutenant in the Austrian army, is under arrest, charged with shooting the girl, for whom he left his wife. Miss Zeigel is an heiress to \$100,000, which was to come into her possession within a year. The tragedy was the culmination of a romance in Austria-Hungary army life, which began four years ago. Hoffman tried to end his own life, but was prevented by the girl, whom he had already fatally injured. Jealousy prompted the shooting. Hoffman told the police that he often met the girl, and was jealous of her because of the attentions of another man. Miss Zeigel refused to identify him as the man who shot her.

FREIGHT WRECK AT VAUDREUIL.

Montreal Brakesman Killed and Fireman Badly Injured.

Montreal, Sept. 18.—Brakesman Robertson, of this city, was killed and fireman Melser is now unconscious in the General Hospital as a result of a collision in which the cars of three trains were badly damaged and derailed near Vaudreuil Station at 9:30 o'clock to-night. The collision was caused by freight train No. 1363 moving east across the Vaudreuil train, catching up to freight No. 883, just starting up in front of it. The former train was not badly damaged in the collision, but several cars of the one in front were derailed and were knocked against a third train, No. 95, which at the time was stationary on the adjoining westbound track.

CHILDREN WHO ARE NERVOUS.

Nervousness is often a family predisposition. We inherit tendencies to disease just as we inherit physical resemblances. Strain of study, restlessness all the time, early introduction into the duties of social life, develop all too soon nervous troubles among children.

St. Vitus' Dance, Headaches, Epilepsy, and kindred maladies are becoming alarmingly common among the young. Pale, wan-eyed, listless people are met everywhere.

To neglect signs of weakening down is criminal. Parents by ignoring very manifest symptoms of mental and nervous strain, actually condemn their children to life-long invalidism, which dwarfs their power of work, limits the possibilities of their children's lives to very narrow ranges. Upon the first signs of nervous feelings, St. Vitus' dance, run down conditions, weakness, persistent and recurring headaches—give them that wonderful body, brain and nerve builder—Ferrozine. Its action is positive in this class of disease, both in young and old, and its results through its influence upon blood forming is so permanent that the crisis is soon passed.

Strength, ability to study with comfort and perfect safety quickly follows the use of Ferrozine. It builds up the nutritive blood to the muscles. Color, endurance and vim go hand in hand with Ferrozine. Children who use it are robust and vigorous. No tonic is better, as thousands testify. Just as To be had at any drug store at 50c. per box.

An Absolute Cure for Rheumatism

If the skin or bowels are unhealthy, they won't throw off enough urea. This urea is changed into uric acid—carried by the blood to the nerves—and causes Rheumatism.

Fruit-a-lives surely cures Rheumatism and Sciatica

because they act directly on bowels, kidneys and skin—and so strengthen and invigorate these organs that there is no urea and uric acid retained in the system to irritate the nerves and bring Rheumatism, Sciatica and Neuralgia.

"Fruit-a-lives" are intensified fruit juices with tonics and intestinal antiseptics added.

WAS IT A PLOT?

FINNISH PILOT ACCUSED OF CASTING AWAY STANDART.

The Court Party at St. Petersburg Say the Intention Was to Destroy the Imperial Family—Vessel a Total Wreck.

St. Petersburg, Sept. 18.—The Imperial yacht Standart is a total loss. She went ashore in such a position that needle-shaped rocks lie ahead and astern, and there is no hope of releasing her. The Reactionists, taking advantage of the recent grounding of the Standart, with the Imperial family on board, have opened a bitter campaign, demanding the punishment of Finland for the mishap.

The Znamya, in a long ultra-loyalist article, says that it has learned that the navigation of that part of the archipelago where the yacht went ashore is so dangerous that Finnish steamers are forbidden to enter it. And the paper asks why his Majesty was not informed of the peril, and why the pilot steamed almost at full speed, in a vessel drawing much water, into such a dangerous locality. The paper adds:

"Though the thought is too terrible to entertain, yet there is no doubt that the grounding of the Standart was premeditated, and that only Providence foiled the despicable purposes of the Finns. It is appalling to think of what might have befallen the Imperial family on September 12. A storm, raising a heavy sea, would have prevented the escape of their Majesties from the shattered, sinking yacht."

"YEGG" MEN CAUGHT AT FALLS.

Believed They Were En Route to Rob a Safe.

Niagara Falls, Ont., Sept. 18.—Chief Mains and Officers Kelly and Greenwood, of the Ontario police force, made an important arrest at 3 o'clock this afternoon of three "yegg" men—Wm. Pasquay, of Niagara Falls, N. Y.; "Harding," of Toledo, and a third name unknown, were standing at the southwest corner of the depot. Chief Mains, noticing Pasquay and knowing his reputation, went up to the trio uninvited with his two assistants. Addressing Pasquay, he said, "Well, where for to-night?" He replied, "Just going up the line a piece." At this the trio took to their heels, but Harding and Pasquay were captured.

The two men arrested held tickets for Hagersville. Harding had in his possession an 8-ounce bottle of nitro-glycerine, while Pasquay had cake soap, to do the loading of the nitro-glycerine in safe combinations, and, no doubt, the arrest has prevented a bank burglary planned for Hagersville to-night.

The officers feel confident they have two bad safe blowers in custody, and probably the trio are the same who did the job at Chippawa two weeks ago. Both men were armed with loaded revolvers.

DIAMOND CRISIS SETTLED.

Pooling Agreement Effected Between Two Leading Companies.

London, Sept. 18.—The great crisis in the diamond trade has been settled by a pooling agreement between the De Beers and Premier Diamond Companies. The details have not been made public, but the selling agency will be maintained, and will deal in the products of both mines on a basis to which the Transvaal Government, as the chief factor in the Premier Company, has consented. It follows that the prices of diamonds probably will be fully maintained.

CHILDREN WHO ARE NERVOUS.

Nervousness is often a family predisposition. We inherit tendencies to disease just as we inherit physical resemblances. Strain of study, restlessness all the time, early introduction into the duties of social life, develop all too soon nervous troubles among children.

St. Vitus' Dance, Headaches, Epilepsy, and kindred maladies are becoming alarmingly common among the young. Pale, wan-eyed, listless people are met everywhere.

To neglect signs of weakening down is criminal. Parents by ignoring very manifest symptoms of mental and nervous strain, actually condemn their children to life-long invalidism, which dwarfs their power of work, limits the possibilities of their children's lives to very narrow ranges. The Daily Fashion Hint.

Stylish Coats for Children.

Of these two little coats the plaid is the heavier and has applied box pleats through which the belt runs. The darker portions are plain cloth matching the dark of the plaid. The plain coat is trimmed simply with military braid and silk tassels.

GRAND DISPLAY AT FALL OPENING.

R. McKay & Co's Splendid Store Scene of Brilliant Gathering.

The splendid firm of R. McKay & Co. certainly has left nothing undone to make this the greatest opening event in its history. The store has been crowded since early morning with critical women, anxious to get a glimpse at what is new and what will be worn for the fall and winter season. This grand and popular shopping place has made great strides in the last few years, going ahead in leaps and bounds, until it is recognized everywhere to be one of Canada's greatest stores.

The store is beautifully decorated, as it always is, and carries large assortments of everything in the dry goods line that is strictly new and up to date, backed up by high standard of quality. The display windows only offer a suggestion of what may be seen inside, and it is a well known fact that there are no better dressed windows in the city.

The writer found great difficulty making his way through the immense crowds interviewing the different buyers of each department, and must say that they are very enthusiastic over their work, and take a decidedly keen interest in the firm's welfare. The whole store presents a gay appearance. The aisles are like lanes in a vineyard, large clusters of grapes hanging promiscuously on each side. Electric lights intertwined among the vines add a brilliancy in keeping with the firm's usual decorations, and make a novel and beautiful sight.

The Centre of Attraction. Was the magnificent and costly millinery display. Miss Spencer, the buyer for this department, has just returned from Paris, after spending a couple of months on the other side of the pond, where she purchased all the very latest in fashionable headgear, and brought back a number of ideas that will be new in New York this season. She has an able staff of assistants. The McKay firm is second to none in Canada for fashionable millinery. Paris says the most fashionable colors are purples, browns of all shades, taupe grey, combined with green, emerald green, and many other very beautiful shades. All descriptions are used with finest effect on pattern hats. Fancy feathers of all descriptions and in novel effects are the season's most conspicuous success. Coque feathers in the box form make very charming hat trimmings, and Paradise and ostrich, in new branchings, produce many new forms that are beautiful and artistic. Wings of the guinea fowl are noted in the new taupe colored street models. Pompons composed of coque plumes grouped together through beautiful color combinations give a very quaint and stylish appearance to a hat.

One very beautiful model from Mme. Ponceyane is in taupe grey with facing of pale blue satin, and is a large mushroom effect, very long at the back and wider at the left side, with trimmings of shirred ribbon around the crown and a wonderfully striking and new fancy egrette mounted at the side, fashioned with a long steel buckle. Another model from the same artist is a pale blue felt, very large, and wit; a high crown. A handsome hat from Mangin-Maurice is in a lovely shade of dark emerald green. Another striking little hat for the street made of taffeta, will be most popular. Summing up, McKay's millinery parade, there is little doubt in the minds of those who viewed the splendid exhibit to-day that they have made the bit of the season. This splendid exhibit will continue Friday and Saturday.

Very Elaborate Dress Goods Display. In the dress goods section there is a grand display of all the leading dress fabrics. Broadcloths lead in favor and will be used for strictly tailored suits and "dressy" garments. Drap Diane is one of the new weaves; comes in the new chiffon finish, and is shown in all the newest shades.

The showing of novelty costumes is authoritative, and embraces all the season's newest and most popular weaves in silk and wool in pretty two-toned effects, broken checks, plaids and fancy stripes. These are shown in special costume lengths only. For heavier suits they are showing a large range of fine imported tweeds and broadcloths in plaids, checks, stripes and shadow effects. For afternoon and evening wear, chiffon, voiles, crepe de chine, silk collenies, silk cascades, glorias, San Toys and various other weaves. Their showing this season far exceeds anything ever attempted before.

Silks and Robes. The magnificent display of fashions in the silk and Paris robe section affords an opportunity of supreme importance to those who desire accurate information of the season's styles. Silks from the simplest girlish designs to the most elaborate broche. Paris novelties in robes from the sedate party dress to the gorgeous ball-room effects. These two departments are more than superb. Some of the most notable values are afforded. Room will not permit the description of Paris masterpieces in evening and afternoon gowns, but the selection at a glance would satisfy the artistic tastes that seek a collection undoubtedly could not be met with elsewhere.

Glove Department. R. McKay & Co. are sole agents for the famous Trousseau kid gloves, made especially for R. McKay & Co. A beautiful fine French kid in glace and suede, two and one-half wrist length up to 24-button length, in every shade that is made: greens, navies, browns, wines, greys, pinks, skies, helios; sizes 3 1/2 to 8. Every pair fitted and guaranteed.

Ribbon Department. All the leading shades for fall in beautiful chiffon taffeta ribbons, 4 1/2 to 9 inches wide; correct shades of browns, tuscans, also latest novelties in Dresden ribbons, beautiful hand-painted effects on satin moire and velvet grounds. All exclusive designs, imported direct from the makers.

Veiling Department. Beautiful veilings in chiffon, maline, fish net, with or without spot, in plain colors, also combinations; green, blue, brown, purple, pink, sky, complexion veilings.

Laces and Trimmings. Latest importations from Paris, France, in dress trimmings are shown—laces made especially for R. McKay & Co. They include beautiful hand made fillet laces with crochet medallions, and also antique laces, fancy vestings in braided combinations and embroidered silk insertions; also fancy silk and beaded drops and fringes, quite the correct thing in Paris to-day; also exclusive trimmings for evening gowns.

Whiteware Department. On the third floor will be found the lingerie department. A complete re-

of exclusive styles in ladies' fine white wear is to be found, all in the newest design and dainty fabrics, including handsome Paris sets made of French main-souks and handkerchief linen. These are elaborately trimmed with hand embroidered medallions and real lace. Waist Section.

The waist department on the third floor is one of the magnificent attractions of this store. So large was the showing of beautiful Paris waists to-day that everyone was astonished at the grand display. Among many of the handsome waists that attracted great attention was a pale blue mousseline, made with French Valenciennes lace with lace epaulettes. This lace effect is continued down the front, with cluster of lace medallions on the side, trimmed sleeves with fancy lace cuff. Another of the great attractions was a fancy white net over white silk slip, made with tucked yoke with hand embroidered insertion, forming a bolero effect; the same effect is carried out in the back; tucked sleeve with lace collar and cuffs.

Garment Section. This busy department is larger and better stocked than ever with mantles, tailor-made suits, velvet gowns and furs of every description. One very handsome coat noticed was in Russian sable with ermine and handsome silk applique. With this coat was a brown panne velvet gown, beautifully trimmed with opera lace and applique. The stock of opera cloaks is larger and better assorted than ever. Prices most reasonable. Tailor-made suits—never was the display so large and well assorted as this season. All the leading New York shades in tan and brown, green, navy and black, also shadowy shades of lawns. The stock of mantles in ladies' tweeds is large. All the leading styles you will find in this department.

Men's Department. We looked forward with pleasurable anticipation to the arrival of our new fall lines of men's furnishings. It is a pleasure to think about and something to look forward to, and now that they are here and opened up, and we are able to examine the styles and textures, we must confess that the realization is better than the anticipation, for a better lot of goods for men, youths, and boys never graced the counters of R. McKay & Co. No matter whether you want to look or buy, come in; you're welcome.

Linen Section. In the linen department there was a magnificent showing of dainty hand-drawn and hand embroidered linens in Irish and Japanese work. Choice table damasks from the best makers in Scotland and Ireland were shown in a beautiful range of the newest designs.

The Large Carpet Section. The display of carpets, squares and linoleums is simply elegant. In Wilton carpets they are showing all the leading colorings, beautiful two-tone effects in greens and crimson, also some very handsome goods in mixed colorings. The designs in Brussels carpets are up-to-date in all the new shades of lawn, green and crimson. In tapestry carpets they have an immense range of patterns, suitable for any kind of room. In squares they are showing complete range of every size that is made in Wilton, Brussels and Tapestry. Linoleums are a special feature in R. McKay & Co's carpet department. They carry an immense range of inland and printed. Oil cloths are also shown in great variety in all widths, from 1 yard to 2 1/2 yards wide.

THE WIARTON RIOTS

LANCASTERS SENTENCED; MRS. THOMAS ACQUITTED.

Feeling at Warton That the Sentence of Eight Months Given the Young Men, While the Woman Was Discharged, Was Too Severe.

Walkerton, Sept. 18.—The three Lanca-ster brothers, John, William and Walter, who pleaded guilty of rioting at Warton on Aug. 20, were each sentenced to eight months in the Central Prison.

Mrs. Thomas, charged with killing Philip Gilbert on the same occasion, was found not guilty and was discharged.

Warton, Sept. 18.—The sentence of eight months given to the three Lanca-sters at Walkerton, and Agnes Thomas being allowed to go free, is not popular in this town; although many of the strong supporters of the law have gone down to Walkerton to-day to intercede on behalf of the raiders, and it is the opinion of outsiders that their representations had the effect upon the Judge of having the sentence shortened at least four months.

When there were thirty or forty raiders it is pretty hard according to the view held here, that the three Lanca-sters should suffer for the whole lot. The men sentenced have a good reputation, and a petition will be immediately circulated for their release, and a deputation appointed to wait upon the Minister of Justice.

SEIZED THE PRESS.

Mr. Houston Refused a Site in Prince Rupert.

Victoria, B. C., Sept. 18.—The Grand Trunk's harbor engineer of Prince Rupert this afternoon took forcible possession of the press of the Prince Rupert Empire. The press has been lying boxed on the wharf ever since July 9th, as the G. T. P. refused Mr. John Houston, its proprietor, leave to erect it on their property, and he has since had his printing done in the coast cities. Mr. Houston's intention was to have it set up in the Indian reserve when Mr. Bacon took the above action. Mr. Houston has had a writ issued, and the Provincial constable will bring it into court.

COAL COMPANY WILL APPEAL.

Great Sydney Case May be Taken to The Privy Council.

Montreal, Sept. 18.—The Dominion Coal Company will make an appeal from the judgment of Judge Langley to the Supreme Court of Nova Scotia, and afterwards, if necessary, the case will go to the Privy Council. This statement was made to-night by Mr. H. A. Lovett, senior counsel for the coal company, who has arrived here from Sydney. Mr. Lovett expressed his confidence that in the appeal the Dominion Coal Company would win.

FASTEST WAR VESSEL. It is the German Torpedo Boat G 137. Hamburg, Sept. 18.—Torpedo boat G 137, which has attained a speed of 33.9 knots, is declared to be the fastest war vessel afloat. This turbine boat is the result of extensive experiments extending over months, conducted by the Germania Shipbuilding Company. Hitherto the fastest German torpedo boat had done only twenty-seven knots. At her first trial G. 137 did 32.5 knots, as against a contract speed of thirty. Later she attained 33.9 and still higher speeds are looked for. Her lines are said to be especially good, due to the fact that her builders made innumerable experiments with models. She showed great capacity for manoeuvring and splendid sea qualities. Her four large boilers of the German-Schulz type are in separate rooms and yield a greater head steam than guaranteed. Her turbines are of the Parsons type. Her tonnage is 572, her horsepower 10,500, her armament 8.8 centimetres. She carries three 5.2 centimetre quick-firing guns and three torpedo tubes. At the Vulcan yard at Sartin a torpedo boat is now being built of 520 tons and 10,500 horsepower, with a minimum speed of thirty knots. Her turbines will be of the Curtis type. The two boats will be run together, and a test of the two types of turbines thus made.

JURY LOCKED UP ALL NIGHT. Found Montreal Man Guilty of Stealing \$5,363 From Bank.

Montreal, Sept. 18.—Robert Hazelton has been found guilty of stealing \$5,363 from the St. Croix branch of the Provincial Bank. The jury sitting in the King's Bench, on the conclusion of the evidence yesterday afternoon, was locked up over night, and at 10 o'clock this morning announced that no decision had been reached. An hour later they returned with a verdict of guilty.

IN THE WORLD OF AMUSEMENT

It is pleasing to note that Mr. Wright W. Lorimer's massive biblical drama, "The Shepherd King," is the excellent attraction to be seen in this city at the Grand next Monday, Tuesday and Wednesday, with Mr. Carl Ekstrom in the role of David. Mr. Ekstrom has played Jonathan to Mr. Lorimer's David ever since the first production of "The Shepherd King" at the Knickerbocker Theatre, New York, and during the latter's illness played David for four weeks with marked success. The same excellent supporting company and massive scenic environments which surrounded Mr. Lorimer during his tri-aphant tour in this famous biblical drama will also be in support of Mr. Ekstrom. From the beginning of the action to the final curtain there is nothing to repel the eye, far the ear or insult the intelligence. Europe and America have given their best in costume, in scenic painting, and in cast to make "The Shepherd King" a feast of wisdom, of beauty and a satisfaction of the heart's best cravings. It is by far the most expensive and elaborate production of its kind ever sent on tour, and claims the first place among all the biblical or romantic dramas ever produced on the American or foreign stage. Seats will be on sale to-morrow. The Opera House orchestra will be enlarged for this attraction in order that proper justice may be done the special music.

Mrs. Sprague the Winner.

Manager Driscoll, of Bennett's Theatre, has presented \$25 to Mrs. Willis E. Sprague, Sanford avenue, he deciding that her description of Carroll Johnson's act, which was at the theatre last week, was the best of the hundreds of write-ups sent in. Mrs. Sprague's description was as follows: "Hello, central! 0000, please. In what you Mildred? Ethel speaking. How would you like to go to Bennett's this afternoon? What! you have not been to the new theatre yet? Well, really, you are missing more than you imagine; it is simply fine; too pretty for words. Have I been? Well, rather; we were there Monday evening and again yesterday matinee. Twice the same week. Monotonous? Oh, no, not

evening, when the piece will be repeated. A large company and a complete scenic equipment are promised.

About Mile. Carlotta.

Carlotta, who is looping the loop at Bennett's this week, has had her troubles and her tumbles. In the first instance, when she began performing her trick, she could find no one who would undertake the responsibility of catching her after she had finished her sensational whirl. When men had been convinced that with the aid of the rope, to which the sandbags are attached, the rider's progress may be stayed within the narrow confines of a theatre stage, kicks began to come from managers who thought the act would end disastrously, and suggested that guard ropes be used. These Carlotta spurned, and now she has finally convinced everyone that her own superb courage and strength are her best safeguards against the accident. Thousands have attended Bennett's to see this great act and the other eight by which it is supported.

At the Savoy.

That patrons of vaudeville thoroughly appreciate a really good act was never better demonstrated than by the four birds at the Savoy this week. At every performance this attraction has been greeted with a storm of enthusiastic applause. No act better deserves it. The work is sensational from the start, and just when it looks as if the climax has been reached they spring something new. Woodward's solo, another exceptionally clever act, divides the honors. Nothing better as a sample of animal training has ever appeared here, nor has any animal act where the work was so genuinely interesting throughout. May Belmont, the dainty English singing comedienne, with her clever offering, grows in favor. Her catchy songs are one of the big hits of the bill. No one has claimed the \$1,000 award yet that Jupiter Brothers, the Oklahoma cowboys, offer, for anyone who solves the illusion they present. A great bill is assured next week, when half a dozen of the best acts that play "advanced vaudeville" will appear here. Among them will be Vinella's Society Circus, an attraction featured at the Teek Theatre, Buffalo, this week. The beautiful animals give a fine performance. Edith Helena is sure to cause a sensation. She

this show. Why, it is perfectly lovely. Did you not know that Carroll Johnson and his pickaninies were there? Why, yes! in the prettiest little extravaganza you ever saw, called "In Louisiana."

The curtain goes upon a plantation scene. To the left of the stage are the little cabins, all lit up (it being night time), and to the right are the cotton fields, and away in the distance is the 'big house.'

Well, the pickaninies, headed by the oldest and jolliest of all, Carroll Johnson, are celebrating the birthday of the young son and heir of their master, in true southern fashion, with singing and dancing. The pickaninies then retire and Johnson sings a solo. Later the pickaninies reappear, dressed in the cutest of pajamas, the gift of their master, and cut up the funniest of capers. Really, Mildred, one almost feels as if "Uncle Tom's Cabin" had come to life, so realistic are the stage settings.

The next scene shows the cotton all ready baled to be sent away, and four routabouts, who are splendid singers, are seen loading it on shipboard.

"But I am not going to tell you any more, because one must see it to appreciate it. Needless to say, you will thoroughly enjoy Carroll Johnson. He is quite as good and better than ever."

"All right; I knew you would come. Meet me at the Terminal Station at 2.15."

"Good-bye."

Gr-r-h!

is said to have the greatest vocal range of any soprano in the world. Of her appearance at the Empire in London Lloyd's Weekly News says: "Miss Edith Helena, the 'phenomenal soprano,' has amply justified her engagement at the Empire. She is of attractive appearance, and sings 'The Last Rose of Summer' with much prettiness, apart from the sensational effect of the interpolated cadenza with a sustained F above the high C. The imitation of a violin is also very correct." Charles Kenna, the original Yankee fakir, and one of vaudeville's funniest monologue artists, will be another great headliner.

An Artistic Performance.

It is a matter for regret that last night's performance at the Grand, the comedy-drama, "The Girl Who Has Everything," was not attended by a larger audience, as it was the most artistic seen at the theatre this season. The play is by Clyde Fitch, and there was strong dramatic action, and the story was of heart interest. The situations were natural ones, and there was a healthy and noble air about the play that was more than pleasing.

Miss Isabel Irving, as Sylvia Lang, the leading role, displayed real dramatic talent, and her work was of a high order; it must have satisfied the most exacting. She was pleasingly free from affectation, and she charmed her audience. She was at her best in the pathetic parts.

The supporting company was capable, and the two juveniles in the company were exceedingly bright and clever.

Unruly Crowd at Junior C. L. A. Game at Newmarket. Toronto, Sept. 19.—The junior C. L. A. final game, between Braebridge and Toronto Junction, at Newmarket yesterday, ended in a row, with still ten minutes to play and the score 7 to 3 in favor of Junction Shamrocks.

ELLIOTT HAS FIFTY. Big Turn Out of Montreal Football Players. Montreal, Sept. 19.—Under the supervision of Chaucer Elliott, the new coach of the Montreal Rugby Club, the crowd of last year's Argonaut team, between forty and fifty players went through an hour's light work at the M. J. grounds, practically all of last year's senior team was out, with the exception of "Tolly" Savage, "Billy" Lessor and Gordon Davidson, who will not figure in football at all this year, and possibly not in hockey either. Many were interested in the fall of the year of money is more affected than real. The financial division of athletes into two classes seems to be more and more difficult to maintain. Some kind of division or classification is necessary to encourage those who are coming forward in amateur athletics. The man who has not attained his fall capacity and the man who can never achieve a foremost place should not be discouraged or shut out by the competition of the record-breakers.

Suspending Amateur Athletes. Amateur athletic associations seem inclined to surround their members or their performers with restrictions almost as complete as contagious disease quarantines. Not a day passes but some amateur is tried or suspended for some infraction of the rules. One of the latest suspensions is that of our own feet-footed Indian, Longboat, and he seems to have offended the Metropolitan Association of the Amateur Athletic Union by travelling across the international boundary both ways, without asking permission of anybody. Coley, another Canadian runner, is under suspension for a similar offence. An American runner, Frank Nebrieh, went over to Canada without permission and ran on the Port Erie track. That disqualified him. The taint spread to Coley, who was disqualified for running with the suspended Nebrieh, and Longboat was disqualified for racing against three men in Buffalo. If this line of strict supervision is necessary over amateur athletes it goes to show that their sensitiveness about the taint of money is more affected than real.

Chatham Man Sentenced for Very Serious Offence. Chatham, Sept. 18.—Raymond Toulouise, of Big Point, who pleaded guilty to running away with fifteen-year-old Maggie Bellair, was sentenced to one year in the Central Prison by Magistrate Houston this morning. Toulouise and the girl came to this city and registered at the Merrill House over night as man and wife. They afterwards went together to Thameville. Toulouise is a married man with two children. His wife was in the city to-day and said that she would forgive all if her erring husband would go back and live with her. The two women are good looking, while Toulouise is far from it, being awkward and wearing long, shaggy hair.

No Charter for Chicago. Chicago, Sept. 18.—The new charter authorized by the State Legislature was rejected by the voters at Tuesday's special election by a majority of over 62,000. The total vote was 181,500 out of a registered vote of 301,908.

Baby Suffocated in Shawl. Havelock, Sept. 18.—A distressing occurrence is reported near Gelet in Haldimand County, a Toronto lady, Mrs. Russell, came to visit her mother, Mrs. Fry. The latter met her daughter at the Gelet station and together they drove to the family home in the county. The day was chilly, and in order to protect her little child, about a year old, Mrs. Russell wrapped it tightly in a shawl. After they have driven about a mile she was horrified to find the baby dead in her arms from suffocation.

SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS.

ANY even numbered section of Dominion Lands in Manitoba or the North-West Provinces, excepting 8 and 36, not reserved may be homesteaded by any person of the age of 21, to the extent of one-quarter section, of 40 acres, more or less.

Application for homestead entry must be made in person by the applicant at the office of the local Agent or Sub-agent. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother, or sister of an intending homesteader.

A homesteader whose entry is in good standing and not liable for cancellation may be willed to the local Agent by the Sub-agent, at the expense of the applicant, and if the land applied for is a quarter section, the fee of the local Agent or Sub-agent for the telegraph and the land will be held until the necessary papers to complete the transaction are received by mail.

Applicants for inspection must state in what particular the homesteader's entry is in default and if subsequently the statement is found to be incorrect in material particulars, the homesteader will be liable for cancellation of his entry, should the land become vacant, or if entry has been granted it may be summarily cancelled.

Before making application for patent the settler must give 30 days' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to apply for a patent. A royalty at the rate of five cents per acre shall be collected on the merchandise coal which is produced on the quarter section.

At least \$100 must be expended on the claim each year or paid in mining records, or other work done, and upon complying with other requirements.

The patent provided for the payment of a royalty of 2 1/2 per cent on the sales. Placer mining claims generally are 100 feet square, entry fee \$5, renewable yearly.

At least \$100 must be expended on the claim each year or paid in mining records, or other work done, and upon complying with other requirements.
