Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

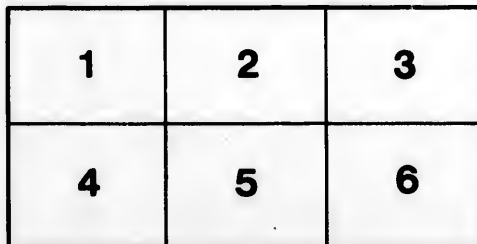

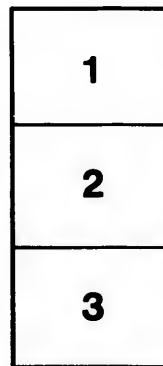

Izaak Walton Killam Memorial Library
Dalhousie University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Izaak Walton Killam Memorial Library
Dalhousie University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

VALUABLE INFORMATION FOR BUSINESS MEN.

NOTES—Demand Notes are payable on presentation without grace, and bear legal interest after a demand has been made, if not so written. An endorser on a demand note is holden only for a limited time.

A Negotiable Note must be made payable either to bearer, or be properly endorsed by the person to whose order it is made. If the endorser wishes to avoid responsibility, he can endorse "without recourse."

A Joint Note is one signed by two or more persons, who each become liable for the whole amount.

Three days' grace are allowed on all time notes, after the time for payment expires; if not then paid, the endorser, if any, should be legally notified to be holden. Notes falling due on Sunday or on a legal holiday, are paid the day following.

Altering a note in any manner by the holder makes it void.

Notes given by minors are void.

The maker of a note that is lost or stolen is not released from payment, if the amount and consideration can be proven.

An endorser has a right of action against all whose names were previously on a note endorsed by him.

TIDE TABLES.

9

TIDE TABLES FOR HALIFAX.

These Tide Tables with tidal Differences for other places, are supplied by the Tidal Survey Branch of the Department of Marine and Fisheries of the Dominion of Canada. They are based upon direct observation of the tides obtained by means of self-registering gauges which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis; and the commutation of the tables is made by Mr. E. Roberts, F. R. A. S., of the Nautical Almanac Office, London.

The TIDAL DIFFERENCES when applied to the Tide Tables, give the time of high and low water at other places in Standard Time. The differences applicable to the Tables are derived from the Establishments given in the Admiralty list. They will therefore be correct at full and change of the moon, and approximate only at other times in the month.

(Signed.) W. BELL DAWSON, WM. P. ANDERSON,
Engineer in Charge. Chief Engineer.

Assessment System. [ESTABLISHED 1881.] Mutual Principle.

MUTUAL

Reserve Fund Life Association.

IT LEADS WHERE
OTHERS FOLLOW.

F. A. BURNHAM,
President.

The Motto of the Management is and will continue to be

“Good Work at Honest Cost; True Economy, and not its Shadow.”

Why you should insure in the Mutual Reserve.

Its new Policy, with rates about 40 per cent. below the Old System, contains all the essential features of Life Insurance, viz.: In case of total disability half the face of the policy will be paid, a cash surrender value or extended INSURANCE after five years, premiums reduced by dividends after the eleventh year, &c.

It has a record unparalleled in the history of Life Insurance.

It has been the best abused Company in the world by its competitors, because it has saved its policy holders nearly fifty million dollars they would have had to pay the Old Line System, and gives infinitely better security.

SUCCESS IS THE ART OF SUCCEEDING.

Insurance in force	\$330,000,000
Amount held in Canada	37,000,000
The largest amount with a single exception of any Company on any plan in the Dominion.	
Surplus over all liabilities	\$ 3,500,000
Death Claims paid since organization, over	30,000,000

WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters:—

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens	Between midnight & 2 A. M. }	Fair.	Hard Frost unless wind be S. or W.
	“ 2 and 4 A. M. }	Cold with showers.	Snow and stormy.
	“ 4 “ 6 “ }	Rain.	Stormy and rainy.
	“ 6 “ 8 “ }	Wind and rain.	Stormy.
	“ 8 “ 10 “ }	Variab. }	Rain if wind W. Str. N or E.
	“ 10 “ 12 “ }	Shower. }	Cold and high wind.
	At 12 Noon, and to 2 P. M. }	Very rainy.	Snow or rain.
	Between 2 and 4 P. M. }	Variable.	Fair and mild.
	“ 4 “ 6 “ }	Fair.	Fair.
	“ 6 “ 8 “ }	Fair if wind be N. W. }	Frosty if wind N or N
“ 8 “ 10 “ }	Rainy if S. or S. W. }	E. Snow if S or S W	
“ 10 “ midnight.	Ditto. Ditto.	Ditto. Ditto.	
		Fair.	Fair and frosty.

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of those changes happen, the more foul and wet will be the weather that will follow.

Nova Scotia Game Laws.

The Nova Scotia Game Society has issued an abstract of the game laws of the Province. Sportsmen would do well to peruse them carefully. They are as follows:

MOOSE, CARIBOU.

Close season from January 15th to September 15th.

No person shall kill more than two moose and two caribou.

Meat must be taken out within ten days from killing.—Penalty for breach of foregoing provisions, \$50 to \$200.

No person shall have in possession any green hide or fresh meat from January 20th to September 15th.—Penalty \$25 to \$50.

No person shall set any snare or trap for moose or caribou.—Penalty \$50 to \$100.

No person shall hunt moose or caribou with dogs.—Penalty \$50 to \$100.

All dogs so hunting may be destroyed by any person.

Close season for American elk or red deer till October 1st, 1900.—Penalty \$50 to \$100.

Provision protecting cow moose, repealed.

Any person bringing moose or caribou meat to Halifax, or any incorporated town, for sale, shall bring neck and forelegs and keep them exposed till all meat is sold. Penalty \$50. Any member or agent of Game Society, game commissioner, police officer or constable is authorized to examine or mark game, and resistance to him is a violation of the law.

BIRDS.

Partridge—Close season Dec 1st to Sept. 15th. Woodcock, snipe, teal, blue-winged duck, wood duck: close season March 1st to Sept. 1st. Save in Cape Breton, where close season for all birds except partridge is March 1st to August 20th. Partridge same as in N. S.

No person shall kill woodcock between sunset and sunrise. No person shall have any bird in possession in close season.

No snare, trap or net shall be used for partridge or any other game bird, at any time.

Any snare for hares or rabbits shall be of "rabbit wire," not sligher than number 21.

Penalty for breach of provision as to birds \$5 to \$10 for each bird.

Pheasants, spruce partridge, &c.—Unlawful to hunt, kill, or have in possession, pheasants, spruce partridge, blackcock, capercaillie or sharp-tailed grouse.—Penalty, \$5 for each spruce partridge, \$25 for each of the other birds. Unlawful to have in possession, buy or sell eggs, or injure or destroy the nests of any native birds.—Penalty \$5 to \$10.

RABBITS, HARES.

Close season from February 1st to October 1st.

No person shall have them in possession from February 5th to October 1st.

No snares shall be set for rabbits or hares in close season.

Clear space of 100 feet must be left between each hedge and the nearest hedge. All snares or hedges unlawfully set may be destroyed. No hedge shall exceed 50 feet in length.—Penalty for each offence, \$5.

No person shall hunt or kill at any time any Newfoundland hare or jack rabbit.—Penalty \$10.

BEAVER.
No person shall hunt or kill any beaver until after the 1st day of November, A. D. 1900.—Penalty for each offence, \$100.

OTHER FUR-BEARING ANIMALS.
Mink.—Close season March 1st to November 1st. For all other fur-bearing animals, except bear, wolf, loupervier, wildcat, skunk, musquash, raccoon, fox, woodchuck, otter and weasel, from April 1st to November 1st.—Penalty, \$5. Unlawful to hunt any of the foregoing animals with dogs between 1st February and 1st October.—Penalty, \$30 to \$80.

LICENSES.
No person not domiciled in Nova Scotia shall hunt without a license. License fees for birds, hares and rabbits, \$10; all other game, \$30. Penalty for hunting without license, \$50 to \$100, in addition to the license fee.

The hunter, guide or companion of any such person hunting without license, is liable to same fine as the person himself.

NOTE.—No person shall sell or expose for sale, or buy any animal or bird included in the definition of game until after the lapse of three days from the end of any close season.—Penalty, \$25.

Whenever a fine is imposed by the game laws, the person fined is liable to imprisonment if the fine is not paid; and judgment may be recovered in the county courts for amount of fine and costs, and may be recorded so as to bind the lands of the defendant.

When he is imprisoned he shall remain in jail one day for each dollar of the fine.

All the penalties for having game unlawfully in possession, apply, whether the game was killed in Nova Scotia or elsewhere.

CAPE BRETON.
Close season for moose and caribou in Cape Breton, till September 15th, 1899.—Penalty, \$200.

EXPORT, BIRDS, ETC.
Unlawful to export from Canada, deer, wild turkey, quail, prairie, prairie fowl, woodcock.

EXPORT OF HIDES, ETC.
Unlawful to export moose or caribou hides from Nova Scotia. Any hides attempted to be exported shall be forfeited.—Penalty, \$5 for each hide. Unlawful to export partridge or woodcock.—Penalty, \$20.

FISH.
Salmon.—Close season from August 15th to March 1st, except that salmon may be fished for with the fly alone from February 1st to August 15th. From low water nearest 6 o'clock p. m. of every Saturday, to low water nearest 6 a. m. of every Monday, no one shall fish for salmon in non-tidal waters. The use of nets is prohibited in non-tidal waters. In non-tidal water frequented by salmon, no one shall fish for any kind of fish between 9 o'clock p. m. of every Saturday and 6 o'clock a. m. of the following Monday. Drifting and dipping for salmon is prohibited.—Penalty for breach of foregoing provisions, \$20 for each offence.

Trout, &c.—Unlawful to fish for or to have in possession any speckled trout (*sabulinus fontinalis*), lake trout or land locked salmon, between 1st October and 1st April. Unlawful to fish for trout by any other means than angling with hook and line.—Penalty for breach of foregoing provisions, \$20 for each offence.

The Astronomical day is reckoned from Noon to Noon through the 24 hours. Thus July 21, 9h. is 9h. A. of July 21st, and July 21st, 15h. is 3h. M. of July 22.

The Sun's Declination and Equation of Time are given for Noon at Halifax, Apparent Time, i.e. when the True Sun is on the meridian. The Moon's Southing is given in Astronomical Time for the Meridian Passage at Halifax; and her declination when on that meridian.

Both the rising and setting of the Moon are given for every day in the year.

To find the length of the day—subtract the time of sunrise from 12 hours, and to the difference add the time of sunset.

To find the length of the night—subtract the time of sunset from 12 hours, and to the difference add the time of sunrise next morning.

In this Almanac all the times except for Moon's Southing are Mean Time at Halifax, i. e., Civil Time. The Moon's Southing is given for Astronomical Time at Halifax.

Standard time is 15 minutes earlier than Halifax Mean Time, and the Railway Time one hour later than Halifax Standard Time.

WEATHER GUIDE.

An observation said to have been made in London and Florence, extending over a period of fifty years, and observed in Halifax for the past thirty years, shows the weather will be the same as the last three days of the moon through the first three quarters taking a day for each quarter of the moon. It is necessary to make a calculation of the exact time of the beginning of each of the three days, making due allowance for difference of time between the lunar and solar day.

The weather will remain the same during the whole month as it is on the 5th, if it continues unchangeable on the 6th, and like the 4th day if the 6th resembles the 4th. Due observations must be made as to when the day begins, allowing for the difference of time as in the above.—*Com.*

JANUARY. The modern farmer of the present day rarely fails in receiving a good return for his labour. This is the season to lay out his plans for spring crop. Potatoes and Indian corn yield best in a hot season, and not too wet, while oats, barley, peas, turnips, mangels and grass make most growth in comparatively cool weather and moist atmosphere. The occasional loss of the hay crop from drought shows that it is of the greatest importance for a farmer not only to make a judicious choice of crops suitable to the climate, and to the soil and exposures of his fields, but also to have sufficient variety in his crops, so that whether the season should prove a hot and dry one, or cold and moist, or of a medium or average character, he may fully expect a profitable return. Other kinds of forage should also be sown, so that reliance may not be placed entirely

on the hay crop for the winter feed of cattle. Let it be remembered that a liberately cool wet season will give a good hay crop, whilst a hot dry one will sure scarcity of this most important article of fodder. To meet this a reasonable plot should, be sown or planted with mangold, turnips, or Indian rye. The latter is always advisable for ensilage in our varied climate and its. No farmer should depend on hay alone for winter feed. All modern farmers in Great Britain, as well as many in Canada and the United States, use a mixed feed, or mashley as it is called, in the green state in summer time, and feed into hay, or for ensilage, in the winter. The following is a good mixture of feeds for mashley:—1 bushel broad horse beans, 1 bushel small peas, $\frac{1}{2}$ bushel vetches, 1 bushel oats. Or, 1 bushel peas, 1 bushel tares or vetches, 1 bushel oats. Peas, oats and wheat make an excellent mixed feed, to be cut quite green while the milk is in the kernel.

WOODILL'S LIVER, GOUT and RHEUMATIC PILLS

FEBRUARY is the most trying month for cattle; we cannot too strongly impress the necessity of care in their feeding, watering and general treatment, at this season of the year. In order to overcome the many difficulties that appear in February, it is a good rule to give extra time and attention to the stock. In feeding grain and meal always mix them into cut hay, moistened,—and season with common salt. Cut hay does not digest any more rapidly than uncut, but it enables the meal or crushed grain fed with it to be more perfectly digested. Our farmers still suffer immense loss every year in striving to fatten cattle on meal, bran and middlings fed alone, without being mixed with cut hay as here described. When fed alone the meal simply passes through the animals in an undigested form and is thus lost. In Districts where an Agricultural Society does not already exist this is a good time to organize; farmers have leisure to attend a meeting and take steps for organization. Notification has to be made to the Office of Agricul-

March.—The kitchen garden, requiring but a small piece of ground, and yet one of the most valuable crops for the comfort of the home,—instead of finding every farm a well furnished kitchen garden, filled with vegetables and small fruits, sufficient for the family wants during the year and some to sell, such a rarity is the exception rather than the rule. There is no reason why every farmer's family should not be provided to a large extent with supplies from the garden, such as salads, rhubarb, early green peas, lettuce, radishes, cucumbers, early cauliflowers and cabbages, early beans, gooseberries, currants, strawberries, raspberries, winter radishes, turnips, beets, parsnips, artichokes, seasoning herbs, melons, squashes, and dozens of other delicious and substantial articles of food at cost nothing but foresight and some agreeable labor. climate necessitates the use of hot beds for raising seedling plants for those crops that require a long season to mature. A hot-bed is made by piling on successive layers of fine, fresh horse dung, obtained from a stable where oats are freely fed. The manure may be raised to a height of two or three feet above the surface of the soil. On top, spread four or five inches of very fine and rich soil mixed with sand; this should have been prepared in the fall, and kept dry under cover all winter,—otherwise it is likely to become a hard frozen lump or mass. Glass sashes are then put on and kept close till the hot-bed heats. The steam and heat will soon start the seeds and growth will be rapid. In this way lettuce, radishes, etc., may be ready for the table quite early in the spring.

White Pine & Tar for Coughs & Colds, G. A. STERNS, Hfx.

APRIL.—This is the month to begin seeding as soon as the soil is fit, and this can be done much earlier and more rapidly where the land has been ploughed in the fall. The farmer should be ready to avail himself of the early opportunities presented by the varying years. It is not wise to seed till the soil is comparatively dry, and little is gained by early sowing until the ground is warm. In fields seeded down with timothy last fall, it will now be time to sow clover,—a mixture of red and white is the best for hay. Where early potatoes are required, the seed should be kept in a warm place so as to start the eyes, and, wherever the ground is dry enough, they may be planted. This advice if not heeded will lead

to potatoes coming up scantily, many rotting in the ground. If farmers instead of planting inert seed potatoes, taken out of a cold cellar, would first allow the eyes to start, there would be fewer complaints of the seeds perishing in the soil. Peas and broad beans may be sown at the very beginning of the month. Onions, parsnips, and carrots as soon as the ground is fit to be worked sufficiently to give them the delicate seed bed required. Beets and mangolds are usually sown at the end of the month, or early in May, and generally the whole kitchen garden prepared and planted.

May.—In most parts of the Province ploughing will still have to be done; let it be done as soon as the land is fit; if manure has to be taken out for crops,

SEEDS from Best Growers, at Apothecaries Hall, Halifax

don't wait for a more convenient season; if the weather is not all that is desired proceed nevertheless with your work, vary it to suit the state of the soil and atmosphere. Men cannot fight successfully against the operations of nature, but they can very often turn them to advantage by consideration and forethought. What has to be sown and planted this month? *Everything*, except what has either already been committed to the soil, or requires a warm seed bed like the turnip. Exceptional crops also are bush beans, pole-beans, corn, tomatoes, cucumbers, squash; it is only in warm, sandy soils, and in districts not subject to night frosts in spring time, that such things can safely be put out before the end of the month. One of the principal marketable crops in Nova Scotia is the potato.

Flour and Clover Seeds, G. A. STERNS, 7 & 9 George St.

It has been found advantageous of late years to plant as early as possible, as therefore as the ground is in a fit condition, commit the potato to it; see also, that the eyes of the seed have started into growth, otherwise it will be lost in the cold seed bed. Neglect of this point, which has been urged again and again in the Farmer's Calendar of this Almanac, has caused the loss of countessands of dollars to our farmers. So important is the sprouting of seed potatoes before planting regarded in England that the seedsmen have instructions printed on the labels, which they send out with the seed, assuring their customers that this is necessary in order to obtain a satisfactory crop. In light soils, the manure (old and well rotted) may be ploughed in before planting. In heavy soils, put the manure in the drills, so that the warmth of the air may counteract the deadening effect of the cold wet clods. Superphosphate and other mineral fertilizers may also be used.

Sterns' Sarsaparilla, the best Blood Cleanser, 7 & 9 Geo. St.

JUNE.—Planting and sowing will still continue. Corn for ensilage should now be sown. But, while spring operations have to be continued and finished this month, there are others appertaining more especially to the summer that have to be attended to. Garden crops will require hoeing and weeding; potatoes also when sufficiently advanced. It should not be forgotten that we have not only to sow and cultivate, but to protect our crops, if we would gather a profitable harvest. In localities subject to late spring frosts, it is easy to protect early crops by throwing some spruce or other brush over them on cold nights. A method much used in France, and which may easily be adopted in this country, is to burn brush to windward so as to cover the field in a cloud of smoke. Attention has often been called to such simple and costless devices, and yet year after year, we hear of the loss of early crops: it is said "by frost," we should say "by neglect."

Wild Cherry Bitters for Dyspepsia, Apothecaries Hall.

The Colorado or potato beetle now challenges attention. Paris green and London purple are undoubtedly efficacious, but they are homicides as well as insecticides, and every precaution should be observed in their use by farmers, and in their sale by apothecaries and store-keepers. The poison is best applied in mixture of ground ster. Hellebore is also effective and less dangerous, but too expensive where large fields have to be poisoned. As soon as the currant and gooseberry bushes are pushed out their first leaves and blossoms, it will be found advantageous to give them a sprinkling of white hellebore powder in the morning before the dew falls. This will destroy the first crop of currant worms, and thus preserve the bushes and the fruit crop for the season. The objection to the use of white hellebore on currant bushes (if used early enough in the season) is by no means so long as to the employment of arsenical poisons, as the white hellebore being organic, decays, and is thus speedily rendered innocuous, by exposure to rain and air. Summer bedding plants are set out in the flower garden as early this month

as the weather will allow; verbenas may be put out very early, and they thrive better in the moist, cool weather of early June than later, when the soil is apt to be baked by the sun. Stocks are also very hardy and rejoice in hot, dry weather if they are in good soil. Balsams, Phloxes, Petunas, Geraniums, Heliotrop and other tender things need not be put out so early, as they will make no progress in cool weather, and the slightest approach to frost will kill them for the season.

JULY.—This month is especially devoted to the cultivation of the various field crops. Cultivation, in this restricted sense, means the hoeing of crops, stirring by cultivators and harrows, and such like implements, between or over the drills, hilling up and moulding. The object of these operations are not merely to

Steam of Witch Hazel for Barber's Use. G. A. STERNS, Hfx.

... weeds, as is commonly supposed by many, but to keep the soil open, and thus
note the decomposition of the manure, to enable the soil to retain moisture,
and the free access of air to it, bring it well over and around the roots and stems
by these several means, to promote vigorous growth. The sowing of turnips
is usually recommended for the month of June, but as the ground has to be
markedly fine for this crop, and as turnips are often put in to fill up land that
was originally intended for the earlier sown roots, it frequently happens that
turnips have to be sown in July. In fact, if turnips are sown early in June, they
ought to run to seed, instead of forming bulbs. Some even prefer to sow their
turnips early this month instead of June, so as to avoid the well-known "fly"
which attacks the young seedling plants, and the soft turnips for immediate
use need not necessarily be sown till the end of July, although if they get
a genial weather to start with they do much better earlier. Late sowing

while it is apt to give a small yield, ensures excellent quality and freedom from fibre, so that turnips intended for table use in winter should never be sown early. The ground should have undergone a thorough pulverization. Light sandy soil is the best for turnips. They start better after the ground is warm, but the bulbs swell most rapidly during the cold dewy nights in Autumn. The soil cannot be worked too deep, or made too fine, for turnips; the surface soil must be made fine for a seed bed. Town manures are valuable for this crop, and crushed bones have been applied with best effects, either when covered in the drills in the manner of ordinary dung, or, preferably, when sown by machine along with the seeds, so as to be in immediate contact with the latter. important operation of hay harvesting will have commenced this month, and on upland will probably be well advanced, or even finished before the end of the month. All other work has to give way to this. If the weather is warm and dull, do not hurry the hay into the barn; put it up in large, well-built cocks, so as to allow it to sweat or ripen before being put up into the mow. When mows are large this is particularly necessary.

AUGUST.—In the northern and eastern counties, and on dyke and intervalle land, much hay has, in ordinary seasons, to be taken in during the month of August. Hay making is the most important operation of the Nova Scotia farmer, half of all his land under crop of every kind being occupied with grass destined to be made into hay. More than half a million acres have to be mown every season, and this necessarily employs for the time a large amount of labour. However, where suitable implements and appliances are used there is now no difficulty

in securing the crop. After haying there will be work in top-dressing the hay-fields, and in the garden and orchard. Where the trees are in grass they will benefit by a rich top-dressing around their roots. Look after the ripening fruit, destroy the caterpillars, if any still remain; pick the early August apples, and send them into a local market or to the picnic. When the rain comes beds of strawberries may be made up. See that the ground is well drained and enriched with old manure. Mushrooms now appear in horse pastures, house flies become troublesome, and the swallows congregate in flocks and leave us.

SEPTEMBER.—Grain has to be harvested. Late in the month Indian corn will have to be cut and put into the stacks. The ensilage forms an excellent supplement to the hay and roots, but ensilage is still used to only a very limited extent. Later in the month, potatoes of the earlier kinds, and earlier planted, will be

ready to be taken up, but while the weather remains warm they should be well aired before being put into the cellar, and only in small quantities at a time. The most experienced farmers usually wait for cold weather before taking up their fall crop. The farmer's year is a complete cycle, and before one year's annual harvest is taken in, it is needful to be preparing for the next. In fact it is already time, in September, to sow Winter Rye, which is a favorite crop with farmers who have suitable, light, sandy soils. It is also a valuable crop for yielding green feed in the month of May, when it is much required. This year (1897) County Exhibitions will be held in the several counties of the Province. They are usually held this month. Every farmer is expected to attend his County Exhibition and to show samples of the products of his farm.

OCTOBER.—The apple crop is yearly acquiring increased importance in Nova Scotia, and our apple orchards are annually extending. But there is still plenty of room, and no farmer who has suitable land, and is willing to take the necessary

care, can make a better permanent investment than by planting an orchard. The best market varieties, at least those that appear at the present to be most in favor among our fruit growers in the counties of Kings and Annapolis, where orcharding is carried on to a great extent, and in a systematic business manner, are: Gravenstein, Yellow Bellefleur, or as it is commonly called here, Bishop's Pippin, King of Tompkins, R. I. Greening, Ribston Pippin, Northern Spy, Vandevere, Golden Russet, Nonpareil and Baldwin. Digby County is at present our cherry county, and Cape Breton has profitable plum orchards, but these fruits may be grown all over the province. Now that the season's work is well nigh over, the young man on the farm may repair to the School of Agriculture and Provincial Farm, Truro, where instruction is given in the art of agriculture and

sciences bearing upon it. A post card of inquiry to Prof. Smith, the Provincial Lecturer on Agriculture, will bring full particulars as to the operation and arrangements of the School and Farm and the terms upon which pupils are admitted. No fees are charged, and students are paid for their work on the farm. Students are not boarded on the farm, but can obtain comfortable board and lodging in Truro at very reasonable rates. The School of Horticulture, which is also aided by the Provincial Treasury, is situated at Wolfville, and is conducted by Prof. Faville, under direction of N. S. Fruit Growers' Association. Here the several gardening operations, propagation of plants and management of orchards are taught.

Woodill's Pills for Rheumatism, G. A. A. STERNS, George St.

beef cattle grades of the Short Horn Durham, Polled Angus, Galloway, and Hereford are used. For milk alone, or the cheese factory, Ayrshires are to be preferred. Devons make the best working oxen, are quick, active, and easily fed, and soon fatten in the wild pastures for beef. For Domestic cows, and butter making, Guernseys or Jerseys are the most suitable. The Jerseys have been great favorites, and the increase will promote the manufacture of butter, but it threatens to lessen our capacity for beef production. Holsteins are also increasing, but less rapidly, in a few localities, they are large, healthy cattle, combining beef producing with milking qualities—the yield of milk being often very large. Fall ploughing will be the principal field work this month. After ploughing do not forget to go carefully over the water furrows to make way for the exit of the rain and melting snows that are sure to flood your fields before seed time. A well ploughed, well drained field may be sown in spring as soon as the frost is gone,

For Rheumatism take Woodill's Pills, Apoth. Hall, Halifax.

While one that is irregularly ploughed or has no water furrows, may long remain a puddle, defying every attempt to improve its condition, until the season is so far advanced as to reduce very much the prospect of a crop. The best part of what is too often left to be "Spring work," can be done in the month of November. At the same time care should be taken not to open up gravelly banks or hilly land, subject to be scoured by the Fall or Spring rains, or melting snows. Every season brings loud complaints of the winter-killing of grass in the hay fields. It may possibly be of use to some farmers to say that the winter-killing is merely another name for neglect. If a hay field not on a dead level is drained simply by running water furrows with a plough to carry off surface water there will be no winter-killing. Where land is perfectly flat a more effective system of draining must be adopted. The want of the simple water-furrow costs the farmers of this Province many thousands of dollars every year, and is often the real cause of the burnt up hay fields that are attributed to drought.

Woodill's Pills, by mail, 25c. a box. G. A Sterns, 7 & 9 Geo St.

DECEMBER.—Agricultural improvement is encouraged and promoted in various ways by the Provincial Legislature. Grants are given to enable Provincial, County and other Exhibitions to be held, and there is also a system of Agricultural Societies throughout the Province, with a membership of about six thousand farmers; each society is entitled to draw from the Provincial Treasury an annual grant in aid to promote its operations. Last session a considerable increase was made on the Legislative grant for this purpose, and an improvement introduced in the mode of distribution. The special purpose of a Society is to improve the live stock of the district, which is accomplished by obtaining and keeping for the use of its members, superior male animals, such as bulls, rams and boars. Societies may also, by permission, introduce seeds of new varieties of

The whole of the Societies of the Province meet annually on the first Tuesday in November, each in its own district, when the members of each Society receive their Director's report, and elect officers for the ensuing year. Full information as to the method of organizing societies, the grants given in aid, and other particulars, may be obtained on application at the office of Agriculture, Old Province Building, Halifax. In addition to these organizations there is the Nova Scotia Farmer's Association, which meets once a year with delegates from all the Societies of the Province. The Association will meet this year (1897), at Middleton. Paul C. Black, Falmouth, is Secretary. A register of thoroughbred cattle is kept at the Office of Agriculture, where blank forms of application for registry can be obtained. The printed Herd Register of Nova Scotia Cattle can be obtained from any bookseller for a dollar.

Postage Stamps, Postage Cards, etc, issued by the Canadian P. O. Department.

The stamps issued by the Canadian Post Office Department, are of the following denominations, viz.: postage stamps, ½ c., 1 c., 2 c., 3 c., 5 c., 6 c., 8 c., 10 c., 15 c., 20 c. and 50 c.; 1c., 2c., 3c. letter cards and 1 c. and 2 c. envelopes are also supplied.

Post Cards are issued at one cent each, and may be sent to any address in Canada or United States. Reply Post Cards (2 cts.) may be sent to any address in Canada or the United States. Post cards are also issued at two cents each for transmission to the United Kingdom, Newfoundland, St. Pierre et Miquelon, and certain foreign countries. Post Bands are for sale at the rate of \$1.25 per hundred.

1st Class Matter.

Includes Letters, Post Cards, Legal and Commercial Papers wholly or partly written, (with the exception of those specially exempted,) and all matter of the nature of a letter or written correspondence.

The letter rate for Canada, Newfoundland and the United States is 3 cents per oz., and for other countries 5 cents per ½ oz.

Letters addressed to any place in Canada upon which any postage has been prepaid by stamp, are to be forwarded to their destination charged with double the amount of the postage thereon not so pre-paid, which amount is to be collected on delivery.

Letters addressed to places in Canada or in the United States, wholly unpaid, and letters addressed to the United States on which at least one full rate (3 cents) has not been prepaid, are sent to the Dead Letter office.

MILLER BROS., REINER'S PIANOS, 101 and 103 Barrington Street, Halifax, N. S.

POST OFFICE DEPARTMENT.

RE-DIRECTED LETTERS.

Letters re-directed to places in Canada, the United States and Postal Union Countries, *without being taken out of the post office*, are not liable to any additional postage.

REQUEST LETTERS.

Letters for places in Canada, Newfoundland and the United States sent in envelopes having printed thereon a *REQUEST* that the letters be returned to the sender, or bearing in the corner of the envelope the printed address of the sender, will be returned direct to the senders instead of being sent to Dead Letter Office.

POST CARDS.

For Canada and the United States, one cent each. For Great Britain, Newfoundland and all Postal Union Countries, two cents each. Reply cards, for Canada and the United States, two cents each. Nothing must be attached to a Post Card, except an additional stamp when necessary, nor must the card be cut or defaced in any way.

Private Post Cards may be sent under the following conditions—The words "Private Post Card" must be distinctly printed or written on the card. The name and address of the sender may be printed on the face of the card, but the face of the card is not to be used for advertising purposes. Private Post Cards must not exceed a size of 6 inches in length by 3½ inches in width. Cards exceeding these limits will be treated as insufficiently paid letters. Private Post Cards are not transmissible beyond Canada.

2nd Class Matter.

Newspapers and periodicals posted from the office of publication, and authorized to pass free of postage to regular subscribers in Canada Newfoundland and the United States.

3rd Class Matter.

NEWSPAPERS AND PERIODICALS.

Transient newspapers within the Dominion and the United States, 1 cent per four ounces or fraction thereof—but a single paper weighing not more than one ounce will be forwarded for ½ cent. For the United Kingdom and all Postal Union countries, the rate is 1 cent per two ounces, or fraction of two ounces.

A newspaper or periodical must have no cover which can not easily be withdrawn. It must contain no enclosure. It must have no writing thereon but the name and address of the person to whom it is sent.

BOOKS, CIRCULARS, ETC.

The postage on printed books, pamphlets, circulars, occasional publications, etc., addressed to Canada, is 1 cent per 4 oz. To the United States, Newfoundland, Great Britain and all European countries, 1 cent per 2 oz. The postage on blank books, printers' proof sheets, maps, prints, drawings, engravings, lithographs, photographs, sheet music, printed forms, entirely blank, and printed stationary, etc., addressed to Canada and the United States, is 1 cent per 2 oz. No package must exceed 2 feet in length by 1 foot in width or depth. The limit of weight for Canada, United States and Great Britain is 5 lbs.

Seeds, cuttings, bulbs, roots and scions or grafts can only be sent to the United States as 5th class matter; when posted for delivery in Canada, the postage is 1 cent per 4 oz., and the limit of weight 5 lbs.

Commercial papers and legal documents may be sent to Great Britain, all European countries and United States, at 5 cents for the first 10 oz, and 1 cent for every additional 2 oz. These papers, when posted for delivery in Canada, must be prepaid at Letter or Parcel Post rates—but deeds and insurance policies may be sent if prepaid 1 cent per 2 oz.

PATTERNS AND SAMPLES.

Dona fide patterns and samples of merchandise, not exceeding 24 ounces in weight, may be sent to any place in Canada at 1 cent per 4 ounces. Must be put up so as to admit of inspection. Goods sent in execution of an order, however small the quantity may be, or articles sent by one private individual to another, *not being actually Trade Patterns or Samples*, are not admissible as such. The limit of weight to United Kingdom is 5 lbs., and the limit of size 2 ft in length by 1 in breadth or depth. Postage, 2 cents for the first 4 ounces, and 1 cent for every additional two ounces.

Closed parcels may be sent to places in Canada. They must be plainly addressed and should have the sender's name on the lower left hand corner. No correspondence must be enclosed.

Parcels for Canada must be prepaid 6 cents for 4 ounces, and must not exceed 5 lbs. in weight nor 2 feet in length by 1 foot in width or depth. They may be registered for a fee of 5 cents.

Comprises such articles of general merchandise as are not entitled to any lower rate of postage. Postage 1 cent per oz., or fraction of an ounce. Limit of weight 5 lbs., of size, two feet in length by one foot in width or depth. Matter claiming to be 5th class *must be open to inspection*, and there must be no correspondence enclosed. Packages of 5th class matter may be sent to the United States for the same prepayment as is required within the Dominion, but the contents will be liable to customs inspection and collection of duty in the United States. Sealed tins containing fish, lobster, vegetables, meat, etc., if put up in a solid manner and labelled in such a way as to fully indicate the nature of their contents may be sent as 5th class matter within the Dominion, but no sealed matter can be forwarded to the United States under this head. Liquids, oils and fatty substances may be sent to places in Canada and the United States as 5th class, if put up in accordance with the ruling referring to such articles in the Canada Postal Guide.

FOREIGN PARCEL MAIL.

A parcel post mail for the United Kingdom is made up weekly at the Halifax P. O. for transmission by Canadian Packet. A parcel must not exceed 11 lbs. in weight, nor two feet in length by 1 foot in width or depth. The postage is 16 cents for the first lb. and 12 cents for each additional lb. or fraction thereof. Parcels can be sent to all the countries and colonies with which the United Kingdom maintains a parcel post. Information as to the principal places, and the rates applicable, can be obtained at the delivery wicket. These parcels will be subject to the same regulations as regards weight, size, etc., as parcels addressed to the United Kingdom. A parcel post has been established between Canada and Newfoundland on the conditions, &c.,

governing the transmission of parcels to the United Kingdom. Postage rate 15c. per lb.

A Customs declaration form giving an accurate statement of the contents and value of the parcel, etc., must be filled up by the sender. This form must be affixed to the parcel. The forms can be obtained at the delivery wicket of the Post Office.

REGISTRATION.

Every article intended for registration must be handed in at the Post Office, and a receipt obtained therefor. On no account must it be dropped into a letter box. The registration fees on letters to places in Canada, Newfoundland, the United States, Great Britain and all European countries, is 5 cents.

All classes of matter may be registered to all destinations in Canada and throughout the Postal Union; and letters may be registered to most of the countries not included in the Union.

MATTER WHICH CANNOT BE FORWARDED THROUGH THE POST.

Any explosive substance, liquid; etc., not properly put up, and other matter likely to entail risk or injury to the ordinary contents of the mail, will be sent to the Dead Letter Office, Ottawa.

Glass in any form is also inadmissible, except eye-glasses, spectacles and microscopic slides, which properly put up and prepaid at parcel post rate or 5th class matter rate.

No immoral publication, and no letter or post card bearing injurious words, devices, etc., can be forwarded through the mails.

Letters containing gold or silver money, jewels or precious articles, or anything liable to customs duties, cannot be forwarded by post to any of the Postal Union Countries, except to the United States.

THE TRAPPIST MONKS, at Tracadie, had a flourishing establishment,
 destroyed by fire, but now in course of reconstruction. The Monks are
 principally natives of Belgium. Here also, there is a Convent of the
 Trappistine Sisters, all natives of the place, and generally of French and
 Scotch origin.

THE SISTERS OF THE CONGREGATION OF NOTRE DAME, of Montreal,
 have flourishing academies for female education of the highest order at
 Arichat, Antigonish, Pictou, New Glasgow, West Arichat, Sydney, Port
 Hood, New Glasgow and Mabou. Besides, there are throughout the diocese
 several academies, and superior and common schools, partly supported by
 government, and partly by contributions of the people. There are also
 superior schools at Stellarton, Harbor-a-Bouche, Little Glace Bay, North
 Sydney, and Harbour Boucher, conducted by the Sisters of Charity.

SCHOOL FOR THE BLIND.

This Institution provides for the education and training of blind persons of either sex throughout the Maritime Provinces. Pupils from the Province of Nova Scotia between the ages of ten and twenty-one are admitted free of all charge. The school is open to the public on Wednesday of each week, at 3 p.m. C. F. Fraser, *Superintendent.*

The Superintendent of the Institution is anxious to obtain Names, Ages, and Post Office Address of all Blind Persons in the Maritime Provinces. Clergymen and Physicians are in a position to supply this information, and will confer a favour by so doing.

DEAF AND DUMB INSTITUTION.

This Institution which has been thirty-six years in operation is not an *Asylum*, but a *School*. It provides for the education of the deaf and dumb of the Maritime Provinces. Pupils from the Province of Nova Scotia between the ages of eight and eighteen, are admitted free. Both the Sign System and the Oral Method are employed in this School. *Principal*, James Fearon.

President, Hon D. McN Parker, M.D. *Secretary*, Rev. President Forrest, D. D. *Hon Provincial Secretary*, J. F. Kenny, Wm. Tobin, M.D., Andrew Mackinlay, Esq. *Treasurer*, H. H. Woodbury, D.D.S.

The Principal of the Institution will feel thankful to clergymen, physicians or others who can give him the names, ages and Post Office address of all uneducated deaf and dumb persons in their neighborhoods, in order that such may be brought within the reach of instruction.

Port of Halifax, Signal Service.

Superintendent, Capt. H.V. Kent, R.E. Director, Sergt. W. Allen, R.E. Telephone, No. 43.

EXPLANATION OF SIGNALS.

Made on Main Signal Staff at Citadel Hill, when Vessels are seen from the Citadel or reported from Camperdown Signal Station.

The approach of all vessels is reported from the Look out Station at Camperdown to the Signal Station at the Citadel, a man being on watch at either place day and night. These stations are connected by a Military Telephone line, and as the Citadel Station is connected to the Civil Exchange, information regarding any vessel can at any hour be obtained by subscribers on the Civil Exchange.

As soon as a vessel is perceived by the man on watch at Camperdown, he at once reports the fact to the Citadel, stating whether she is a steamer or a sailing vessel; if the former, she is signalled at the Citadel by a cross, (signifying unknown steamer) hoisted at the extremity of the upper yard, on the east side, if she is reported to be approaching from that quarter, on the west, if she is approaching from the other direction. This first report is usually made on first sighting the smoke of the steamer on the horizon; as she gets nearer, the man on watch observes whether she is a first class (or ocean going) steamer, or a second class (or coasting) steamer; if he reports her as first class, the cross is hauled down and replaced by a large ball, if second class by a small ball.

As soon as the identity of the steamer is ascertained her name is reported, and if she is a mail vessel the proper mail flag is hoisted half way out on the lower yard, while the house flag of her owners is hoisted on the private staff near by.

Should the vessel, however, be reported to be a man of war, or one of the Dominion Government Vessels, the cross will be lowered from the end of the upper yard, and a ball or cross will be hoisted half way out on the upper yard, a large ball denoting a Flag Ship: a small ball

SIGNAL SERVICE.

When the mail from England is reported to have arrived at Rimonski, a blue flag with white "R" in centre is hoisted half-way out on lower yard (west side), for one hour. When the news is received during the night, this flag will be flown from 8 a. m. to 9 a. m. It will be noticed that the upper yard is reserved for steamers, the outer halliards being for merchant steamers, and the inner for men-of-war.

The outer halliards of the lower yard are reserved for sailing vessels, and the inner halliards for mail flags and national ensigns of men-of-war.

Steamers only are signalled at night in the following manner:—
A steamer approaching from the west will be signalled by hoisting a green light on the end of the west lower yard arm, and a steamer approaching from the east will be signalled by a red light on the end of the eastern yard arm.

If two steamers are approaching from the east, a second red light will be hoisted close beneath the first and so on, one red light for each steamer from the east, and one green light for each steamer from the west.

When a Steamer enters the Harbor (*i. e.*, passes the line between Chebucto Head to Devil's Island) a white light will be hoisted close beneath the colored light which denotes her approach, thus corresponding with the steamer pennant hoisted by day beneath the ball when a steamer enters the Harbor.

When two Steamers from the east have entered, the white light will be hoisted close beneath the two red lights, but if one steamer has entered and the other is still outside, the white light will be hoisted beneath the upper red light and above the lower one which denotes the approach of the second steamer. The same with two steamers from the west.

Night signals for Mail Steamers, and Men-of-War will be made as hitherto, the vertical intervals between those lights being 12 feet.

MAIL SIGNALS.

The following are the signals made by Royal Mail Steamers when entering Halifax Harbor, between Chebucto Head and York Redoubt.

Description of Mail.	Day Signals.	Night Signals.

Directions to Mariners with Reference to Canadian Storm Warnings Issued for Quebec and the Maritime Provinces.

I.—Cone, hoisted with the apex downwards, indicates "moderate gale is expected," probably at first from an easterly direction.

II.—Cone, with apex pointing upwards, indicates "moderate gale is expected," probably at first from a westerly direction.

III.—Drum, with Cone underneath, the apex pointing downwards, indicates fresh to heavy gale is expected, probably at first from a easterly direction.

IV.—Drum, with Cone above, the apex pointing upwards, indicates fresh to heavy gale is expected, probably at first from a westerly direction.

The Cone, when hoisted by itself, indicates that it is expected that the wind will obtain a velocity of 30 miles an hour, but will not exceed 40 miles; and it is not intended that an ordinary well found vessel should stay in port, but simply as a warning to mariners that strong winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is expected to exceed 40 miles an hour.

The night signal, corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicular.

The night signal, corresponding to Nos. 2 and 4, is two white lanterns hanging horizontally.

Notes.—Mariners will be able to obtain further information from Drum Agents or by consulting the daily probabilities. Mariners should always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such a distance that vessels leaving port would be liable to be caught in it.

The storm warnings issued for Nova Scotia, are received from the Central Office, Toronto, Ont.
