## WATERMARKS.

## by heary hechler.

Queensland. - Issucl its first stamps in 1861. They were imperforate and bore a large star as a watermark. They vary in value from ${ }^{2}$ s. 6 d . to 5 s . Thnse of 1862 were perforate hat retained the watermark of their predecessors. Their value decreases as the latter are wouth vuly 9d. to ${ }^{2} \mathrm{~s}$. The issue of 1863 is perfurate but has no watermark. Their value is morely nominal. The lo6s issue has a watermark of a small star. That of the following year lhas as a watermark $q$ and a crown which watermark has ever since been retained.

Russia issued her first pustage stamps
 this issue without witermark is valued at $\$ 1$. athe same having a larote figare 1 as a wateruark is valued at $\$ 1.51$, and if perionate at 60 cents.

St. Christopher.-In $18 i 0$ the first issue appeared with a watermark of C C and a crown, which was superceded in 1882 hy C A and a crown.

St. Helena.-The first issue was in lsiab, and only comprised a 6u. imperfurate with watermarls of a star. This is valued at 50 c . to \$1. The same also exists perforate, and is extremely rare. In 1963 two values 1d. and 4 d . were adled to the imperforate series with C C and it crown for a watermark. These are
very rare. Towarls the cond of the same year an entire new series-from $1 d$. to is.-was introduced. They were perforate and bore the watermark C C and a crown. In 1884 the $\frac{1}{2}$ ll was added, and the entire series then appeared with the watermark C A and a crown.

St. Lucia's first stamps appeared in 18.59 , and were watermarke 1 with a star. These are extremely rare. In 1863 the watermark was changed to C C and a crown Fleven years later (1884) this was succee?ed by C 1 and a crown.

St. Thomas, (D. W. I.)-In 18.56 the stamps of the Danish Kinglom were introluced for use in this Colony, the only difference being that the value was expressed by the wonl "cents" instead
 They appear both perforate and imperforate, atul have a large cruwn as a watermark. In $18 i 4$ the Colony fulluwed Denmark in changing her stamps, and the new ones had a smaller crown watermark.

St. Vincent.-The first issue (1871) had no watermark. Ten years after, a watermark of a star was adopted. In 1883 this was chnged to C A a:al a crown. When the ${ }^{2} d$ was introduced in 188: it had a star as a watermark. This stamp is now becouing quite rire. -

Sierra Leone.-In 1861 the first issue appeared and consisted of a Gd. only, which was both perfurate and impe:fur-
ate but had no watermark. The latter is very rare, as is also the 6d. of 1876 which is perforate and has watermark of C C and a crown. In 1872 an entire series bearing the watermark last named was adopted. In 1883 the watermark changed to CA and a crown.

South Australia.-The first series appeared in 1855 . It was imperforate and borea star watermark. Their values range from 36 c . to $\$ 1$. In 1859 the stamps rouletted, but the watermark was unchanged. In 1868 the series was minde perforate but the old watermark was still retained. In 1871 the watermark of S A and a crown was adopted. We have seen some of the values with the watermark V and a crown, these are remarkably rare, and command very high prices.

Spain-LLike her celonies, the stamps of this country in 1855 bore loops as a watermark and in 1856 lozenges. In 1857 the stamps were of the same design as their predecessors, but they bore no watermark The 1870 series bore the watermark of a castle. These three are the only series of that kingtom which have watermarks.
Strait Settlements.-The first issue was a provisional one. It appeared in 1867 and bore no watermark. It commands good prices. In 1868 a regular issue with the watermark $C C$ and a crown came into use. The watermark was changnd to C A and a crown in 1882. The 5 c., plum, and the 10 c., lavender, which were new values appeared, added to the series in 1882 just before the change and with each of the last two watermarks named. Those with C C anl a crown are very rave and command good prices. (To be continazed.)

IHE STAMPS OF NOVA SCOTIA, NEW BRUNSWIOK AND P.E. ISLAND.

BY C. F.

## Continues.

Stamps appeared iu New Bruswick in the same year (185i) as in Nova Scotia, and were exactly of the same design. They consisted, however, of only three values, viz.:

> 3 d. brick red, 6d. yellow, 1s. violet,

They remained in vogue until 1860 , when they were also replaced by a new set having the values in ruts. Five at first were issued,
1 cent lilac,
5 cents green,
10 "" vermillion,
$12 \frac{1}{2} "$ blue,
$17^{2} "$ black,
but in 1863 a 2 cent orange was added to the set.

The one and twelve and half cents are minstly the same in design, both being oblong, and are printed in color on white paper. The 1 cent has a levomotive and the 12t has a steamship in transverse oval band, on which the inscription New Brunswich Postue, and value in letters appear, small figures in the upper corners and large figures in the lower ones, and at foot a curved label containing the word cents. The oue cent is sometimes found of a purplish shade.

The 2 cents has a crowned portrait of Queen in oval band with inscribed legend, figure of value in the foor corners in small ovals in ornament 1 frame. The 5 and 10 cents are similar, except that
they have a frame of net work, the figures of value in the upper corners are smaller and in slat:ting ovals, and the word cents in label at fnot. The 10 cent differs slightly in having Roman numerals in the upper corners, and in the lower in both Romun and figures. There aro several shades of the 5 cent green.

The 17 cent is adorned with a potrait of the Prince of Wakes in Highland costume, value in figures in ovals at the four corners. In other respects it is the same as the 5 cent. The same design was used in Newfoundland for the one cent of the 1866 issue.

In 1861 the Conuell stamp was issued, which has now become one of the rarest of North American stamps. Its history is well known and is in suhstance this. The supply of the 5 cent running short, it was necessary to send to England to obtain a grant for the printing of more, during the delay which followed, the demand for the 5 cent became greater and greater; Mr.Connell, the then postmaster, conceived the idea of having his own likeness put on the 5 cent, and sent to the U. S. and ordered a supply to be printed. The regular iseue of the 5 cent however came tohand about the same ime as the ones ordered from the States, and the (iovernment disapproving of Mr . Connell's action, the 5 c. was cancelled and all the sheets destroyed, a small number, however, did pass through the post, a few of which are in the hands of some of the old collectors in New Drunswick and Nova Scotia. The design is mostly the same as the regular 5 cent, except that the figure 5 is repeated twice in each corner at the bottom. Its color is chocolate.

This issue continued to be used until
the formation of the Duminicn of Canadn, when they marle way for the regular issue of the Dominiun.

## S. P. M.

By theo. Ladisen.

## Continued.

One wonld imagine that the number of stamps surcharged would have satisfied the demands of all concerned, but as will be seen before we have done, quite a surprise was in store for us. If we remember rightly it was about this time that something unusual in the way of provisional or surcharged stamps was resorted to. It appears the supply ran short once more, and for some little time the only mode of prepaying a letter, was, to hand it to the post office oflicial in charge, whereupan he slipped the letter into an envelupe which had alreaty been prepaired for that purpose. The preparation of said envelope consisted of a small squere piece of white paper with P. D and the ralae printed upon it, to mect the requirement thus: ${ }_{5}{ }^{D}$. We do not know what to call these pieces of paper, postage stumps they were not, neither were tlis, waped envelopes, but one thing we may say and that is, that they may be ren aized as an attempt to encourage home manufature. There were 100 of each of the three respective values manufactured, viz.; $5,10,15$ centimes, and as they were not sold out of the post office but were used in the manner aluns mentioned, it is needless to say that they are valuetess in a collection except when secured as an entire envelope, postmarked, thus showing that they have passed finough the mail in
proper form, and have served as a legal tember for the prepaying of mail matter. In orter to give our friends an idera of the value of such a specimen we may siay that they command the price of $\$ 20.00$ each. We have not been able to find out the exact reason why this mode of tiding over the difficulty was resurted to, unless they had a lot of these small square pieces of paper cut and did not like to see them wasted, but likely they had a better reasen for doing so, a deepar season, in fact too deep a reason for our conception. We will new pass on to the noxt lot of recolar sumbargen utmure. In the midalle of lecember in the same year there appeared a new lot. The stamps surcharged being the 1 Frane of the regular issue and the surcharge being 05 . This lot eomsisted of 13,500 alconding to official figures, and although they are anong the commonest of the S. P. M. surcharges, the market is quite firm in this valiety and command a ready sale at a high price.
(To be continued.)

## THE HALIFAX PHILATELIC CO., Editors \& Publishers,

 Box 219. Haiifax, N. S. AGENTS.4, H. Richmond. 5 Reekam Et., N, Y.
H. B. Carvell, Moncton, N. B.
J. A. Craig, Yarmouth, N. s.

As each number of our paper has appeared we have endeavoured to improve it, and if we can draw any conclusions from the numerous flattering epistles that we have received within the last month, we must say that our effirts have been appreciated. One thing you may always be sure of receiving at our hands, and that is, plenty of original reading matter, for we know that it is that collectors want. No one cares to subscribe to three or four journals and find a great many of the same articles in each. One of the chief reasons why collectors do not give their support to a greatmany of the philatelic papers published, is because they have to much reprinted matter in them. We always therefore intend to secure able writers, who can and will give us good original articles.

This will be a benefit to advertisers as
well as to collectors, for is it not better to have an advertisement in a paper that will be read all through, than in one that is merely opened, and when seen to contain a lot of reprinted news, is lain aside.
"Shall we collect used or unused stamps," is the question asked by a great many collectors of the present day, and it is by no means an easy one to answer. If however we were called upon to give our opinion we would say : Collect both so far as you are able, that is, obtain one of each if possible, then you will be better able to guard against fraud. We know some collectors who collect only unused specimens, and although their collections look very nice and clean, a great many forgeries could be pointed out to them, for as we all know the majority of bogus stamps are unused, and some are so cleverly executed, that if it we:e not for the watermarks or other fin points about the genuine that cannot be imitated, they would cheat even advanced philatelists. Now the only way to distinguish them is by putting them side by side and comparing them minutely, and if you only collect one kind, either used or unused, you will not likely do this, and numbers of the genuine ones may pass through your hands, while all the time you may have a forgery in your album.

Another thing we would like to impress on young collectors, is, never to discard a used specimen for an unused one, as by so doing, in a great many instances, a good genuine used one will be taken out of an album to make room for a fraud, which only looks the better on account of being unused.

Study your stanips and you will daily
pick up information concerning them, that cannot be gained in any other way, and there is no better way to study them than by taking the used and unused specimens and comparing them together.

We notice in The New York Sunclay World of March 13th, an article entitled "Postage Stamp Swindle" in which it shows how a dealer in Stettin, Germany, (name not given) got people in all parts of the world to collect stamps for him, and send them to him free. The modus operandi as given in the article was this-He sent out circulars all over the world stating that for every $1,000,000$ stamps sent him, he would board, clothe and educate an orphan until old enough to support itself; his brother being in league with him would of course supply the orphan, but as The World puts it-in his mind.

By this method he would obtain hundreds of thousands of stamps daily, and thus he is able to under sell all other dealers. The article also goes on to state that about 5 years ago he started an imaginary mission in the city of Chang Kiang, China, the Holy Sisters of which agreed, for every million stamps sent to him to save from the jaws of the crocodiles of the Yellow River at least one Chinese baby, and that they would support, educate and christianize it. Finding that to work so well, he has since issued circulars stating that for $1,000,000$ stamps a home will be found for an old lady or gentleman for the remainder of their lives, in one of the three homes, either at London, New York orCincinnati. For half a million a bed will be endowed in an hospital and for 100,000 a home will be found for someorphan for one year.

Now as most of us know this article, which appeared in the World is to some extent overdrawn, but in the main it is only too true. That there is a dealer in Germany who has agents collecting for him all over the world, and that people who are not philatelist think that they are doing a good thing by collecting stamps and sending them off to this fraud we also know. We ourselves have had personal experience; for not long since, a couple of young ladies came to us. requesting us to give them some stamps as they wanted to obtain $1,000,000$ which they were going to send to an agent in New York, who would forward them to Germany, and the dealer who would receive them would pay for an old lady to be admitted into an Old Ladies' Home.

Thus it shows how easily people can be taken in, and if one tries to explain to one of these generous people that the whole thing is a fraud they will scarcely believe you.

Selling stamps from approval sheets appears now to be the general method by which retail deaiers supply collectors, for although a good many of them still issue price lists, comparitively few stamps are sold from them in comparison with what are disposed of from approval sheets. Collectors as a rule like to see what condition a stamp is in before making a purchase.

We think this approval business a first class way to buy stamps, but at the same time we are grieved to know that it presents to persons who are not as strictly honest as they should be, a great temptation to appropriate what does not belong to them. In fact there are
wr ; few dealers who have nut suffered lavere or less from having thein shects. stolen. Dishonesty is one of the greatest diawbacks to philately, and does more to discouragy honest dealers than amything else, and although much has already been lone in the rooting out of these frauds, there is plenty nore remaining to be done, and we intend if possible to do our share of it. Howevt:, the philatelic press cannot do it all ; a great deal of it rests with the dealers themselves, who in a great many instances allow the matter to drop, after writing one or two letters to the parties who owe them. Now, if they would continue to press the matter, they would in the end generally get their sheets returned to them or receive the money for them.

We are satisfied that if every one who does not get his strmps returned, would show up the persons who cheat him, there would in a very little while be comparitively few approval sheet frauls.

We have recently seen a copy of Mr. F. J. Stanton's new American Philatelic lirectory. It is realy a good one and contains the names and addresses of between 1300 and 1400 collectors and dealers, and is sold at the low figure of quets.

We have just refused a large advertisement of ou of the big English firms, simply because they wanted us to take payment in unused genuine Berge-torf and some other such stamps. O no, Mr. Big-Tinglish Firm we are not so green as all that. Our terms are cash, and what is more, we are not knowingly going to insert any advertisements of dealers selling fraudulents stamps.

A club of tive will always be accepted for $\$ 2.00$.

In the first number of The Stan?? Cullectur's Fiturn, we notice the follow-ing:-"According to the Halifax Plitatelist fur February, the publisher of the Buclie!! Stute Plulatelist, is made out as having defmauded Messrs R.S. Harris ic Co. as well as the publishers of the II. P. How is this, friend French ?"

Refering to the above we would like to correct a slight misstatement, we suppose unknowingly imputed to us by friend Yoûte.

In our Feloruary number under the heading of our "Black List" in which the name of E. L. French appears, may be read the following. "R.S. Harris \& Co. also hand us the following list, some of whom have defrauded us as well as R. S. H. \& Co." N.iv, some of the parties whose names are given in that list have defrauded us, s.s well as numerous other dealers, but as to Mr. E. L. French we have never had any dealings with him. K. S. Harris \& Cc. handed us his name as having defrauded them, and as R. S. Harris \& Co. have always had the name of being straight forward, we do not think that they would publish the name of a person who never was indebted to them. Friend Harris let us hear from you.

Parties residing in the U. S. will please remit cheir subscription in unused U. S. stamps, not in coin, as there is a discount of $20 \%$ on American silver in Janada.

Al subscriptions begin with current number.

More notice is being taken of our science now than ever before; nearly every week an article relating to Stamp Collecting appears in some of the leading papers. There is nothing that will give it such a high standard, as to let the great mass of nonphilatelists know that it is something mote than mere child's play.

Mr. A. Dumniuc, San Fernando, Cal., sends us a list of prices paid for used $U$. S. stamps, revenue, locals, and others. His prices are very fair, and parties having large quantities on hand would do well to send them to him.

To all who subscribe now, as well as to all who have already done so, we will give any one of the following splendid stamp premiums :-
a. One set of four Newfoundland stamps.
b. Two varieties Philippine Island stamps.
c. Three varieties Strait Settlements stamps.
d. Three varieties Hong Kongstamps.
e. Three varieties Dutch Indies stamps.
f. One set of six varicties India stamps.

This offer will only remain open for a rery short time, sJ now is the time to subscribe if you want one of the above, also please mention which premium you want when sending in your subscription. Nothing less than 200 new subscribers will do us for this month.

Publishers of philatelic papers will please send us two copies of their papers, a favor which we will be glad to reciprocate.

The secretarics of the different philatelic societies would confer a favor on us if they would oecasionally send us : report of the proceedings that take place at some of their meetings, also any other late philatelic news.

It is astonishing of what a larg, amount the different govermments are cheated out of by mprincipled propls. using stamps a second time, especially in the C'nited States and Canada.

A great many of the smaller post offices obliterate the stamps very lightly and it then becomes no very difficult matter to clean them.

There has been quite a number of systems proposed for destroying the stamps, but as yet no one has invented a system that can be found to work successfully. Some of the plans suggest. ed are very good, but are not considered hy the postal authorities as in any way superior to the one in present use. One of the ways proposed is to have only one half of the stamp gummed and then fur the clerks at the post offices to tear off the ungummed portion. This would no doubt effectually destroy the scamp, but would hardly be practicable where there was much posting. Another idea is to have sharp lnives protruding minutely from the obliterates, which would cat the stamp in two, but as this would also cut the envelope it would hardly suit. For the same reason an acid to be mixed with the ink is objectionable, but we think this last idea about the best and have no doubt that with a little experimenting upon it could be made perfect.

One thing is plain to be seen and that is that if the powers that be, could get some method whereby hey could prevent
stamps from being used a second time, even if they had to pay a pretty large price for it, they would in the long run save themselves a vast amount of money.

A difference of paper may be noticed in the 15 cent Canada of the present issue, from that used in the rest of the set.

We have just received a new price list of Messrs. G. H. Fabian \& Co., 106 Eighth St., New York. They have a large assortment and their prices are moderate.

We call the attention of retail dealers to our wholesale bargains which appears on the last page. Our stock is limited, so first come first served.

The Canada 2 cent register, brown, has been clearly proved to be an error. About three years-ago a limited number of sheets were printed in the brown color by mistake and instead of destroying them they were sent off to outlying post offices in Nova Scotia and New Brunswick, where hardly a dozen registered letters would be mailed in the whole three years. We have the letter from the postmaster from which the few we have were obtained, in which he states that the brown stamps were received by him from Ottawa in that condition and he had sold about 20 -to parties registering letters.

We have had several letters lately from parties in the U. S. stating that they considered Mr. Hechler's article on watermarks one of the most instructive that has appeared in any philatelic journal for some time.

The A. P. A. seems to be in a flourishing condition and is conferring great benefits on both dealers and collectors in showing up frauds.

## Exchanges.

The March number of the Curiosity World is at hand. It contains numerous advertisements and a lot of good reading matter. $\quad=800$ copies of the April number will be mailed.

Another new paper cumes to us from Chicago. The Stamp Collector's Figaro. It has 16 pages including cover, and is well gotten up. On the corer is a cut of the ld. and 1 shilling Nova Scotia stamps. Chicago seems to be going ahead in the matter of philatelic publications lately.

No. 2 of the International Philatelic Advertiser is a first class journal. It reflects great credit on Messrs. Kreb's Bros.

The Philatelic Tribune for February is before us. Mr. Stanion is evidently making money out of the publishing business, as next month he enlarges. We greatly admire the pushing style in which friend Stanton runs the Trilune.

The first number of Vol. II. of The Stamp is if anything better than any of its predecessors. It kind of sits rather heavily on the Texas Philatelist, and as we have not yet received a late number of that journal, perhaps it is squashed out of existance. One good feature of The Stamp is it is always the first in the field.

The February number of the Keystone State Philatelist reached us a little late,
al:hough it is none the worse for that, its style is very gool, and its reading mattor above the averige.

The first number of Mr. Findlay's new paper The Urseful Instructor, is out. It is a great credit to Mr. F. and to Halifax. 10,000 copies have been printed and wiht be mailed as soon as his paper is entered at Ottawa.

Other philatelic publications received. The Philatelic Science, Vol. I, No. 1. Old Curiosity Shop, Yol. I, No. 8. The Germantorn Philutelist, Vol. I, No. 1. The Toras Stan'r, Vol. I, No. 3. The Prerless Reciek, Vol. I, No. 1. The Witch City Collector, Vol. I, Nos. $1 \& 2$. The Reviex, Vol. I, No. I. The Collector's Recien, Vol. I, Nos. 4 \& 5, The Tisas stamp, Vol. I, No. 2. The Westein Philatotist, Vol. I. No. 3. The Bay State Collector; Vol. I, No. I.

## ODD NOTES.

Nova Scotia and New Brunswick stamps are daily hecoming rater. Secure them while you can.

Whe's going to start a Philatelic Scri.ty here? It's now four months since we broached the subject.

Mr. S. B. Bradt is going to give all his time to the stamp business. We wish him every success.

Parties wanting bargains should read our advertisement on last page of cover.

An oddity in tire shape of a used 3 d . unperforate Canada, came into our possession the other day. It is aluost black.

The Stamp World has ceased to exist. It was a good paper in its day, and hand an existance longer than most philatelic journals.

The new set of Newfouudland stamps will make their appearance about June 1st, and will consist of a $\frac{1}{2}, 1,2,3,3$ and 10 cents.

We notice in a contemporary an arcount of two auction sales which rouk place at New York on the 7 th and I3th nitt. The one on the 7 th was the prop. erty of Rex. A. Hoenecke, and was catnlogued by Scott Stamp and Coin C'r. The collection numbered nearly 7500 specinens, including 800 duplicates and brought \$1344. The ls., 1857, of New. foundland, sold for $\$ 30$. New Brunswick ls., \$17.25.
The collection sold on the 13 th was a duplicate collection of Mr. J. M Chute and was catalogued by the same firm. It consisted of 6700 adhesives and envelopes, and realized \$1060.

## sxchange Notes.

Under this heading we will insert notices of Excha.ge fr $m$ subscribers only. A!! notice: must be in by 5 th of any month to insure inertion in that months issue. The right to reject all exchanges reserved.
