

York County and Suburbs of Toronto

DON'T WANT ANNEXATION TO THE CITY

Scarlett Plains Ratepayers' Association Discussed the Proposition Last Night.

PREFER THE TOWNSHIP

Interesting Speeches by Ald. Meredith and Reeve Geo. Syme.

The Scarlett Plains Ratepayers' Association at a special meeting held last night in the George Syme School on French avenue, placed itself on record as being opposed to annexation to the city.

In the unavoidable absence of Controller McCarthy the meeting was addressed by Ald. Meredith. He was not there, he said, to ask them to come into the city, but to ask them to consider the proposition, and if they were not ready to accept it, to say so.

As an individual he had voted for all annexation proposals, and if the majority of the ratepayers of Scarlett Plains favored annexation he did not see great difficulty in the way, but that the annexation of the section from Spadina road east to Upper Canada College had been "turned down" by the city council at its meeting on Tuesday was an indication that there existed a feeling against the taking in of any more territory in the near future.

This might refer more particularly to the "peaceful policy" which had obtained. The city council were getting ready, however, to complete the Home Smith agreement, and they would then with Swansea be surrounded by the city.

Demand Annexation.

It was, however, the position that the people of the district should have to make overtures to the city, and in view of the apathetic attitude of the city council, they should have to be almost unanimous in their demand for annexation. Should they decide to come in, they should have the share of the benefits enjoyed by the citizens of Toronto. The long delay in the installing improvements in West Toronto and North Toronto had many times been discussed, but they had been working hard in these sections, and the water and sewerage works were being put in. It would not be a hard matter to pay higher taxes to pay for the benefits, but in the case of West Toronto school buildings have been erected since annexation, the value of which alone exceeds the amount of taxes paid by the residents.

Transportation.

With regard to the transportation problem, the natural way was to connect the city with the city, and the city with the city. The Toronto and Suburban Railway Company possessed an exclusive franchise on that part between Ford and Keele streets. It was his opinion that the Ontario Railway Board would see that they received justice, and the people and not the railway corporation, should be first to be considered.

In reply to the question, "Should we have to pay the City of Toronto's debt?" Ald. Meredith said they should have to pay in their own way, and the sinking fund provided for the purpose.

Reeve Syme's View.

Reeve George Syme, in addressing the meeting, said that in all annexation proposals the township council had assumed a consistent attitude of preference to remain neutral. The people on the outskirts of the city were the city's overflow population, and he referred to the fact that they were not in the city, but that they were in the city. They should always be prepared to work in conjunction with the city, and he believed that by so doing much useless expenditure as in the case of West Toronto and North Toronto, could be saved. The township labored under the drawback of limited legislation, and the fact that the people suffered from lack of sidewalks and lights was not the fault of the council. He did not see why the township should be debarré from hydro privileges, and while he would not say that the city's policy was to coerce the suburban districts, he could not see why Runnymede, Lambton and Swansea should not have hydro lights as well as Todmorden. He believed the T. E. L. Company would install lights if the township council saw fit to submit a by-law to the people.

Annexation Lost.

After some discussion regarding the benefits to be obtained, during which it was observed that water from the wells of the district was being sold in Rosedale, and that they could get as much from the township in the way of sidewalks on the local improvement plan as from the city, the question was submitted to the meeting, when seven only voted for annexation.

FLOUR DIVIDEND.

The board of directors of the Western Canada Flour Mills Company, Limited, have declared a dividend of two per cent. for the three months ending May 31, payable June 15. The transfer books of the company will be closed from June 6 to 15, inclusive.

NEW I.O.O.F. HALL AT NEWMARKET

This handsome building was opened yesterday with appropriate ceremony.

WARD SEVEN HAS A BUILDING BOOM

Permits Show Increase of Nearly Thirty Thousand Dollars This Month.

DEATH OF CHAS. BAKER

Well-Known Resident Survived by Widow and Grown-Up Family.

The anticipated increase in the building business has come to West Toronto, and the monthly report of building permits just issued for May by Building Inspector W. J. Armstrong bears out the prophecy made earlier in the year, during the building slump.

During May 70 permits in all were issued for buildings in Ward Seven, as compared with 41 in the corresponding month last year. The total cost will amount to \$264,285, which also is an increase over the aggregate cost of last May of \$27,325. The list is a long one, and includes, in addition to eighty dwellings, eleven stores, eight extensions and alterations, seven garages and seven other buildings.

While the building permits for the entire city are still about \$1,000,000 short of the total for the same month of 1913, the West Toronto district has shown the greatest proportional activity and corresponding increase of any section of the city.

OPEN TENDERS TODAY FOR COUNTY BRIDGES

Warden and Commissioners Will Meet Highway Board at Whitby.

Warden Cameron and the county commissioners will journey to Whitby today, where they will meet the Ontario Road and Highway Board, and discuss the opening of tenders for the construction of two bridges, one over the Simcoe River and the other over the Simcoe River.

KING'S CAFE 14 KING STREET E.

Open every day from 7.30 a.m. to 9 p.m. Extensive improvements will be completed by August 1st, when we will resume our after theatre service.

BILL TO AID BANK DEPOSITORS IS TERMED POLITICAL DODGE

Lemieux Accused Government of Seeking to Help Conservative Campaign in Ontario — Discrimination Against Victims of Other Bank Failures Alleged — All Night Sitting.

By a Staff Reporter.

OTTAWA, June 3.—At an early hour this morning the house had apparently settled down to an all-night session, the subject under consideration being the government's bill appropriating \$1,200,000 for the relief of the depositors of the Farmers' Bank. The debate upon the second reading, which began last evening, was resumed by Mr. Morphy, the Conservative member for North Perth, and was participated in by Major Sam Sharpe (North Ontario), David Henderson (Halton), Postmaster-General Pelletier (E. B. Devlin), Hon. Rodolphe Lemieux (Quebec), Hon. J. B. Fraser (Ontario), and Hon. J. B. Fraser (Ontario).

Mr. Lemieux (St. John and Ivesville) protested against the bill as a raid on the federal treasury, designed to influence the provincial elections in Ontario, and the former compared Finance Minister White to Gen. Coxey leading a band of rioters to the capital. "They insisted that if the depositors of the Farmers' Bank were to be reimbursed, similar considerations must be shown to the depositors of the Ville Marie Bank, the Bank of St. John and other defunct banks in the Province of Quebec."

Bitter Opposition.

It is anticipated that when the house divides the government will be sustained by a good majority. Several Liberals, including Messrs. Nesbitt and Ross, are expected to vote with the government, while the Conservatives will present an almost unbroken front. The debate, however, has aroused considerable bitterness, and the fight against the bill will be waged no less fiercely, and perhaps more successfully, after the measure is sent to the senate.

Had Legal Claim.

Mr. Morphy (North Perth), resuming the debate this morning, concluded his speech in favor of the bill. He said that the depositors of the Farmers' Bank had not only a moral but a legal claim against the government. Personally Mr. Morphy had made no pledges during the campaign of 1911 and did not believe that the measure before the house should be treated as a party question. He urged the acquiescence that members of parliament had been loquacious, if the senate saw fit to throw out the bill, the responsibility for such action would rest upon the Liberal party.

E. B. Devlin (Wright) opposed the bill. He quoted the findings of Mr. Justice Meredith to prove that the cause of the failure was mismanagement.

Justice, Not Charity.

Hon. T. W. Crothers, minister of labor, said the depositors were not asking for charity, but for justice. He quoted at length from testimony of David Henderson, M.P., and Sir Edmund Osler, from the letter of Leighton McCarthy and the endorsement upon the writ which had been issued by dissatisfied stockholders against Travers and his associates, a month before the certificate was granted.

Mr. Fielding said Mr. Crothers had been guilty of a cross-breach of trust. The government was legally bound to reimburse the depositors.

Discrimination Charged.

Mr. Demers (St. John and Ivesville) accused the finance minister of being eager to help the depositors of a defunct Ontario bank, but unwilling to consider the claims of depositors who lost their savings thru the failure of banks in the Province of Quebec.

Postmaster-General Pelletier replied that if Mr. Demers was anxious to serve the depositors of the defunct banks in Quebec he should support the bill before the house. If he was right in his contention, then the past failure of the Farmers' Bank bill would furnish a precedent for granting relief in other cases.

Immoral Legislation.

Hon. Rodolphe Lemieux vehemently declared that the government was discriminating against the French-Canadian banks. He denounced the bill before the house as "immoral legislation." Its object was to keep the Conservatives in power by offering a bribe to the electors.

Mr. Lemieux said that he was not asking the government to reimburse the depositors of the Ville Marie Bank, but if the depositors of the Farmers' Bank were to be reimbursed then he demanded similar treatment for the victims of the bank failure in the Province of Quebec. The bill presented by the government was popular, and it was a mere raid on the treasury, which would open the doors for many other raids and was timed so as to influence the provincial elections in Ontario.

Party Issue, Says Sharpe.

Major Sam Sharpe (North Ontario) resuming the debate, referred to the rumors that the government hoped to have the bill killed in the senate. Mr. Sharpe declared that the issue before the house was a straight party issue, and that no Conservative worthy of the name in Ontario would desert the government.

CONGER LEHIGH COAL

COAL that comes up to an almost perfect standard for pure carbon, is perfect coal. There is no anthracite coal mine in the world producing a more perfect coal than comes from the Lehigh Valley coal mines, and we are the Toronto agents.

Do not put off and put off buying your coal. It is easy to delay, but if you wait till you actually need the coal, you will have to pay more for it. Buy your coal NOW, while the June prices are in force.

fore the house was a straight party issue, and that no Conservative worthy of the name in Ontario would desert the government.

"The passage of this bill," the major continued, "means a vote of censure against Hon. W. S. Fielding. There is no justification for the bill except his default and delinquency. This will be a nasty pill for the member for West Middlesex (Mr. Duncan Ross) and the member for North Oxford (Mr. Nesbitt) to swallow, but swallow it they must without any sugar-coating."

Who Received \$3000?

Ruin, desolation and even hunger faced many of the depositors in North Ontario and other places as a result of Mr. Fielding's gross neglect of duty, also in Mr. Sharpe's opinion, Hon. J. B. Fraser (Ontario) and Mr. Fielding were much to blame. Travers had paid \$3000 to someone and the cheque was marked with a Capital C. He had shown his gratitude to Mr. Fielding by subscribing to the \$100,000 fund.

Major Sharpe was followed by Mr. Lancelot (Leppalrie) and Mr. David Henderson (Halton). Mr. Henderson made an impressive speech, in the course of which he detailed the warnings he had given Mr. Fielding respecting Travers and his methods. Mr. Henderson had seen notes of subscribers which had been discounted at the Milton Bank, and warned against the same. He said that fraudulent methods were being employed to obtain the certificate.

NEW I.O.O.F. HALL WAS DEDICATED

Big Day at Newmarket Participated in by Many Outsiders.

NEWMARKET, June 3.—The dedication ceremony of the new hall of Pyramus Lodge, No. 156, I.O.O.F., took place today.

At 10.30 a.m. the grand officers, cantons, Oddfellows, major and town council, and the King George and Royal Hotel, and at 1 p.m. the mayor gave an address of welcome. G. C. Young, M.P., also gave an address of welcome. After this an adjournment was made to the hall, where the dedication ceremony was performed by D. M. McIntyre, D.O.M.; Mr. A. C. Cummer, grand chaplain; Roger Crocker, G.M.; W. S. Johnston, assisted by officers of the grand lodge.

After the dedication had been performed, Messrs. R. H. Brinson and L. Atkinson were presented with a jewel for long and faithful service.

A procession was then formed, comprising decorated autos, members of the Oddfellows, cantons, grand lodge officers, I.O.O.F. Band, Girl Guides and Boy Scouts. They marched to the Exhibition Grounds, where sports were indulged in, with the following results:

Decorated auto—1. R. S. Schmidt; 2. R. A. Brinson.

Five-mile motorcycle race—1. Jack Knowles, Newmarket; 2. Brinson, Bradford. Time 7.21.

Eight-mile motorcycle race—1. J. Knowles, Newmarket; 2. Brinson, Bradford. Time 11.45.

Wheelbarrow race for boys—1. Harry May and Carl Trivett; 2. J. McKinstry and N. Wilson.

Boy Scout movement was won by the Bradford company.

Three-legged race—1. Pollard and Rhinehart.

Hurdle race—1. Langford; 2. Cripe.

Tug-of-war—Civilians beat Oddfellows.

Baseball—Newmarket beat Acme, Toronto, by 6 to 2.

Football—Acme beat Newmarket, 2-1.

After the sports the Dixie Minstrels gave a performance at the town hall.

REPORTS SHOWED WORK OF YEAR

Canadian Women's Business Club is in Flourishing Condition.

The Canadian Business Women's Club held its 5th annual meeting Monday evening in the faculty of education building. Preceding the slating of the names selected by the nominating committee, reports were read from the various conveners, showing a very successful year of work.

One of the most interesting features reported was the work of the University Extension Circle, conducted by Dr. Abbott on psychology and Prof. Howe on field work. The latter carried out principally the study of trees in the open. Lectures had been given during the year by Dr. Hastings, Miss Marshall, Saunders and Mrs. Jean Blewett and Prof. Earl Barnes.

The membership, which now numbers 107, it is hoped, will soon reach the thousand mark. A special effort will be made to this end during the coming term. A clubhouse in a central locality for the business women is a desideratum which is to be hoped will eventually be a reality. At present the club are endeavoring to find a suitable room where the girls may rest and hold meetings.

WASHABLE KID GLOVES ARE ANOTHER NOVELTY

When Soiled They Can Be Left on Hands and Washed in Soap and Water.

Washable kid gloves for men and women are one of the novelties of the season. This does not mean the chamois chamoisette or doekskin kinds but a glove with a washable glass finish, that when soiled can be left on the hands and washed in soap and water with delightful results. These are to be had in wrist length in white, fawn—Paris momentary favorite—and tan.

In white kid gloves one of the prettiest novelties is that with a bracelet and embroidered motif on the wrist in color. This embroidery has a head-like effect and is done in a French knit effect. Sometimes the edges are stitched with color, too.

A glove in this same type lacking the bracelet and motif effect but retaining the contrasting stitching in wild rose pink, also, gentiana, peony, bloom, apricot, Copenhagen and golden brown has also the backs stitched in the same color.

The Parisian always wears for real "dress up" occasions the finest of suede gloves in palest biscuit, flesh or pearl gray.

Most new dresses created for the theatre or the restaurant have a certain air of solidity about them. This is probably due to the new fashion of dispensing with the net at the neck and sleeves, leaving the folds of the silk, however vivid its color, may be, unsoftened against the skin.

"Tiny" douches of lace or mousseline are now reserved for the more elaborate evening toilets. The new dinner or theatre-gowns are carried out almost exclusively in tulle, a soft pou de sole and chamois.

BELLEVILLE HONORS THE KING'S BIRTHDAY

Road Race, Parade, Aviation Exhibition and Automobile Racing Features.

Special to The Toronto World.

BELLEVILLE, June 3.—The King's birthday was celebrated in this city today. In the morning the Ontario three mile road race took place, and James Alexander won the trophy. At noon a royal salute was fired. A grand military band and a parade took place in the afternoon to the agricultural park, where upwards of eight thousand assembled. Lincoln Beachey and Barney Oldfield showed the entire town. The former looped the loop in the air with his flying machine and attained an altitude of 5500 feet.

A Chart of Ontario's Newest Playground—The Rideau Lakes.

The Canadian Northern Railway has added to the growing list of its publications for the information of tourists and the traveling public generally, a carefully prepared map and chart of the Rideau Lakes, showing the entire district in surprising detail.

Twelve inches deep and 27 inches long, the territory shown is the best between Kingston, Brockville, Westport and Smith's Falls.

All those who are interested in Ontario's newest playground can secure a copy of this fine map on application to the City Ticket Office, 52 King street east, Main 5178, or the General Passenger Department, 68 King street east.

THE GATLIN TREATMENT

For Drink or Drug Habits

THIS treatment quickly and permanently removes all alcoholic desire, tones up the nervous system, places the patient in the same or better physical condition than before the treatment.

The Gatlin treatment is of pure vegetable composition, is administered through the mouth without the aid of hypodermic injection, or any other strenuous method.

Gatlin Institutes have been established throughout the world, where the treatment is administered by specially trained physicians. Those who prefer will be furnished special treatment, is administered in the privacy of the home by trained following physicians. It is treated with the most successful results.

For complete information, testimonials, references, etc., address:

Gatlin Institute

Montreal, Que.

GOOPS

Joanna Handy

When told that she must go to bed, Joanna Handy shakes her head. "Five minutes more!" she always pleads. And then "Five minutes more!" she needs.

It's eight o'clock before she goes! Is she a Goop, do you suppose?

Don't Be A Goop!

WOMEN ATTACKED BELFAST EDITOR

Militant Suffragettes Resented Articles Condemning Campaign.

Canadian Press Despatch.

BELFAST, Ireland, June 3.—Militant suffragettes today committed serious assaults on the managing editors of two of the leading newspapers of Belfast, which had expressed criticism of the militant campaign.

Two well-dressed women, one of them a waitress, went to The Belfast Telegraph office and were ushered into the editor's room. Without speaking a word the waitress walked straight up to Mr. Stewart, the managing editor, and with her clenched fist knocked him out of his chair. At the same time her companion hurled a mutilated bottle at his head.

The trait women then proceeded to The News Letter office, and made similar attacks on Mr. Anderson, managing editor of that newspaper, with the result that he has since been confined to bed and is under surgical treatment.

TEMPERANCE MAN IS ENDORSED BY LIBERALS

Charles Steele Promised Backing of the Straight Party Organization.

WELLAND, June 3.—At a meeting of Welland County Liberals here today, Mr. Charles Steele, who had previously nominated Charles Steele of Port Colborne as their candidate, won out on their plea that he be not the opponent of the convention, and voted not to nominate a Liberal.

The candidates will be Charles Steele (Independent Temperance) and Donald Sharpe (Conservative).

TO NOMINATE A. E. ROSS.

KINGSTON, Ont., June 3.—The Conservatives will hold a convention on Friday night to select a candidate for such a nomination for the provincial house, A. E. Ross, the present member, will be offered the nomination, and he has stated that he will accept.

SOUTH WATERLOO CONSERVATIVES.

GALT, Ont., June 3.—A convention of Liberal-Conservatives of South Waterloo to nominate a candidate for the provincial house will be held on June 8 in the Preston Opera House. George Patterson is named as the prospective choice. So far, however, there have been no signs of a Liberal candidate.

LIBERAL IN NORTH ONTARIO.

BEAVERTON, June 3.—North Ontario Liberals here chose Mr. Widdifield, a farmer, in Uxbridge Township, as candidate for the legislature.

COURT SEQUEL TO AUTO COLLISION.

A collision between a cab owned by Dr. E. Roy Tyrer, last October, was the cause of a lawsuit which was commenced yesterday in the jury court. Dr. Tyrer claims \$300 damages from the cab owner, and a counter-claim for \$100 is brought by Mr. Newell against the doctor. The case proceeds again today.

The views which appear in The Sunday World are not confined to any one section of Canada. In this week's issue the people of Brockville will see a pretty view, which will appeal to most of the fathers of that thriving city. Hundreds of residents of Hamilton, together with the 12th Regiment, traveled to Buffalo on the holiday. The Sunday World photographer got them. Onawa is some military town if you are to judge by the picture in this week's Sunday World, showing the opening of the new armories. Berlin, a bustling busy city in the centre of western Ontario, has laid aside the cares of business for one day and is congregated at the laying of the cornerstone of the new Lutheran Church, and it is pictured in this week's Sunday World. A gala day in the history of Tillsonburg shows the Elgin Rifles parading the principal streets of that thriving town on Empire Day.

EFFICIENT HOUSEKEEPING

BY HENRIETTA D. GRAUEL
DOMESTIC SCIENCE LECTURER

Sunday Night Supper

AFTER the hearty dinner usually indulged in on Sunday, only a light supper is desired, and this pleasant custom comes thru our land. It is very seldom that guests are especially invited to these simple meals, but they very often "just happen in," and then the Sunday supper assumes a special character, homelike and pleasant.

But whether the supper is just for the family or the friends of the family, it is not rare dishes that the occasion demands, but that whatever you have be perfect in its way. Tea and coffee must be strong, chocolate should be rich, and all three hot, the meat daintily sliced and garnished. Heavy or hot meals are not for little suppers, but is a variety of sweet cakes proper. When unexpected guests come, try not to vary your usual plan of serving and dining; you may want to put on extra touches and add to the meal previously planned, but aside from having a larger quantity, serve what you would have for yourself. If your guests are your friends, they will like this better than putting on a variety of dishes; if they do not have this view of the matter, they are not worth the trouble of cooking for.

For supper on warm evenings, sliced tomatoes or other meat allied or meat loaf and a salad, light biscuits with honey, or home-made jelly, and a custard or frozen dessert and cakes is ample.

Cold beverages are best in warm weather, but hot, fragrant coffee served on the porch or lawn after the meal always meets with a cordial welcome.

Little Suppers of this sort are remembered long after elaborate entertainments are forgotten and the habit of asking a few friends in to Sunday night supper is a pleasant one to form to all concerned.

A Warning To All "Leaf Chewers"

Have you ever watched a casual visitor carelessly pull off a leaf or twig from a near-by shrub or tree or vine or plant, and immediately place that bit of green in his mouth, which he commences and continues to chew vigorously?

Have you ever noticed the children pull a flower or twig, to pieces, and spend their idle minutes, or even chewing up the bits of plant?

Have you sat watching the baby pull up tufts of lawn grass which he stuffs merrily in his mouth and pretends he is a horse, or some other animal?

A warning, and I wish I could write it in letters of flaming fire, that the next time you pull off a rose leaf, or any other leaf, to place between your lips, to chew, stop, turn that leaf over, and look on the under side.

The under side may be free from vermin, but the chances are one in a thousand that many millions of microscopic germs are teeming on the under side of the most innocent looking of all leaves, no living soul can ever be able to know.

Ever leaf and bud and blossom, every twig and branch that ever supported life, is the breeding spot of untold myriads of germs, many fatal to human life. No spot on earth is free from the danger, because fatal germs are everywhere, and in the air.

Think of a passerby pulling an occasional straw or hay from the piles of straw or hay so frequently displayed outside of food stores. That piece of straw invariably goes into his mouth. Many hands have touched those straws. Dogs have sniffed at the corners of the bundles. Dust has settled everywhere. Do you get the idea?

Think of the parks and public ways, where shrubs grow. Thousands of unclean hands touching the leaves, and you, perhaps, pulling off the leaves to chew. Or the susceptible baby, who from some unknown source contracts mumps or whooping-cough. Just think of these dangers, you mothers and fathers, and stop your children from "leaf-chewing."

If you are skeptical, just open your eyes, the next time you take the children for a walk in any park. Every other person will be nibbling a leaf or flower.

And wonder how we contract these distressing diseases, often so fatal.

To those unfortunate who will not believe in germs, I beg of them most earnestly to read the "Leaf-chewer" "worm-dancer" common everywhere. This is at least something tangible and visible, even the most willfully blind to avoid.

The terrible marine disaster which has thrown a cloud of gloom over Canada is vividly recalled by a picture in this week's Art Section of The Sunday World, in a group view of eager and excited spectators in front of the Sailors' Army Barracks on Albert street, Toronto, reading the list of survivors. A copy may be obtained at any news-dealer or from the newspapers on Saturday night.

USED HATCHET IN SAVAGE ATTACK

Suffragette in Dore Gallery Severely Injured Attendant Who Interfered.

Canadian Press Despatch.

LONDON, June 3.—A savage attack with a hatchet was made today by a young militant suffragette on an attendant at the Dore Gallery, who tried to prevent her from destroying the valuable pictures on exhibition there.

The woman, who thus abandoned the principle of the sanctity of human life, hitherto held up as one of the chief assets of the militant suffragettes, had already ruined two paintings in the gallery, which is in New Bond street, the heart of the fashionable quarter of London. She was evidently was of good education, and when an attendant named Boulet seized her arm.

The vandal turned on the man furiously and rained a shower of blows on his body, severely injured him. Other attendants rushed to the spot and quickly overpowered and disarmed her. She kicked, struggled and screamed for some minutes until she was handed over to the police. The woman evidently was of good education, and she was very stylishly dressed.

A letter was left in the Dore Gallery by the assailant, in which she adds: "To stop this you must give us justice. We are willing to die for it before we give in. We have tried all other ways. We have been too ladylike in the past. Now we are going to fight, and you can allow us to be killed. Others will arise to take our places. I am joined in the war."

One of the pictures destroyed was "Love Wounded," a priceless engraving by Bartolozzi.

CANADIAN S. P. C. A. HOLDS MEETING.

A delightful and enthusiastic meeting of the Canadian S. P. C. A. was held Tuesday afternoon at "Lanthe," 76 Clarendon avenue, the home of Miss Agnew Brown. Gratifying reports were read by the secretary, and splendid addresses by the president, Mrs. Durie, and a number of the members. A number of new members were welcomed, and everything pointed to a most successful issue for the Canadian Society for the Prevention of Cruelty to Animals. After the business had been transacted, tea was served and an enjoyable social hour spent, with Miss Brown as a most delightful hostess.

HOW SILK FISHING LINES ARE MADE.

The familiar leaders for attaching fish-hooks to lines, known as the silkworm gut, is made from the caterpillars of silk worms, for several days. The caterpillar is then pulled apart in such a way as to draw out a continuous thread, which is then stretched on boards and dried in the sun. The silkworm from which this kind of fishing line is made is a green variety about a inch long, feeding on the leaves of the mulberry tree. Forty grades of this product are recognized by dealers, the price varying from 20 cents to \$6 a pound.

OFFICER IN AEROPLANE GETS SPEEDER'S NUMBER.

While riding as a passenger in an aeroplane over Golden Gate Park, San Francisco, a police woman noticed an automobile being driven at high speed along the boulevard. The aeroplane, at the request of the officer, dropped low enough to enable her to get the number of the speeding machine, and as soon as a request could be made to headquarters, the offender was arrested.

MEXICAN WAR BURRO WILL BE MASCOT OF EL PASO AD CLUB

No More Interesting Animal Will Be Brought to Toronto Than "El Paso Jack," the Famous Pony Which The World Offers to Cleverest School Pupil.

W. P. Carlock, secretary of the El Paso Ad Club, and his famous war pet, "El Paso Jack," which the El Paso Ad Club will give away thru The Toronto World.

Probably no more interesting animal will ever be brought to Toronto than the Mexican war burro, "El Paso Jack," captured at the battle of Chihuahua, Mex., and which will be given away thru The World by the El Paso Ad Club during the convention of the Association of Advertising Clubs of America. This interesting prize will be given to the Toronto public school pupil who can write the best essay of not over 1000 words about El Paso, Texas, and its opportunities.

The little burro will be the mascot of the El Paso Ad Club during the convention, and will head the big parade which is held. El Paso Jack was once a pack animal in the Mexican army and has been thru a score of battles. He is as gentle as a kitten and an ideal playmate for any child. Hitched to a cart, or ridden, he would attract a usual attention and would prove a joy to the little ones as well as to the grown-ups. He is about 5 years old and weighs 350 pounds. He is noted for his surefootedness and his kind is much prized in the mountain districts of the west, southwest and old Mexico. In old Mexico, the burro is the chief animal of burden.

INDIVIDUAL WINDSHIELDS FOR REAR SEATS

The front seat of an automobile is usually protected nowadays, by a wind shield, but it affords slight protection to passengers in the rear of the car. A new device for giving them in the rear seat constant protection consists of individual windshields for each side of the car, which can be swung around to the side when the wind is in that quarter, and is set in an aluminum frame, and may be raised and lowered as desired. When no wind is needed, the individual windshields may be removed and carried in a leather case under the seat. This device may be put in place in a screwdriver.

How to Make Your Hair Beautiful

Ten Minutes' Home Treatment World Famous. Stops Falling Hair, Itching Scalp and Dandruff and Makes the Hair Soft, Silky, Lustrous and Fluffy.

Better than all the so-called "hair tonics" in the world is a simple old-fashioned home recipe consisting of plain Bay Rum, Lavender (de Comptess), and a little Menthol Crystals. These three mixed in a bowl in a few minutes, work wonders with any scalp. It just oozes out of a set. Get from your druggist 2 oz. Bay Rum, 2 oz. Lavender, and 1/2 oz. Menthol Crystals. Dissolve the Bay Rum and pour in an 8 oz. bottle. Then add the Lavender, shake well, and it stands for any hair use, and you will find a single loose or straggling hair. That will be pulled out by your hair, as tight as a vice. Dandruff will disappear and itching cease. You will find fine downy hair sprouting up all over your head, and this new hair will grow with wonderful rapidity.

Druggist can sell you the above. The prescription is very inexpensive and it knows. Draw this cloth slowly down certain in its result.

DAILY MAGAZINE PAGE FOR EVERYBODY

Is the American Boy a Spineless "Sissy"?

By Winifred Black

Copyright, 1914, by Newspaper Feature Service, Inc.

Winifred Black

REAR ADMIRAL Somebody-or-other says that the American boy is going to the bow wows. "The American boy," declares the rear admiral, "is a sissy. He's nervous, emotional, imaginative, sentimental, and everything else that a woman should be and a man should not. He doesn't want to fight—he wants to arbitrate. He isn't interested in politics—he's interested in art. He's not crazy about polo, but he's daft over music. He's a sissy, and a sissy, and a nobody—and it's the women who've done it."

"The American boy is brought up by women. His mother and his nurse look after him when he's little, and his grandmother and his woman school teacher look after him when he's older. By the time he's 17 either his sister or somebody else's sister looks after him, and he never gets the male point of view at all."

"We're going to be a nation of nineties, that's all there is to it. Look at the Germans. They're the most masculine nation in the world, and it's because German boys are brought up and educated by German men."

"What we need in this country is a little German education and a little German discipline. The women are ruining the American boy."

Awake there, admiral! and shiver your timbers! What a terrible storm you're raising, to be sure.

Idea of Courage Differ.

I wonder how much there is in what you say. I'm afraid the German idea of masculinity and courage isn't quite the same as ours, rear admiral. Of course, we may be wrong and the Germans may be right; but you'll have to convince us of that before we admit it. "He doesn't want to fight, he wants to arbitrate." Starboard ho! What an indictment! How inferior the man of today is—to the cave man, or to the baboon, or to one of two tom cats yowling up and down the back fence by moonlight. "He isn't interested in politics, he's interested in art." Now that's really serious, admiral.

A great picture is a great thing, to be sure. But what sort of a fool can a man be who carries a Rubens or a Titian than he does about who's running for alderman in the first ward, and whether Billy the Bink put it over on Jimmy the Duck in the second precinct or not?

Daft over music is he? Well, he always has been, admiral; only when you were a boy you probably played "Turkey in the Straw" on a mouth organ, or got the hired man to teach you "Old Dan Tucker" on the jew-harp, and the young man in your station of life today can tell a sonata from a fugue and isn't ashamed of it.

And when you talk about sissies, admiral dear, did you ever know that most of the fine tapestries in Europe were embroidered by the knights who were the great fighters of the time?

Tut, tut, admiral! belay there and think things over a bit before you say so much about them.

Men and women are just as different as apples and peaches—and they always will be, from the skin to the core. And not all the teaching in the world will make a sissy out of a real boy, any more than all the coaching on earth can turn a sweet girl into a real tomboy.

What Women Teach Men.

Women can learn from men frankness, simplicity, the regard for the great things of life, in place of the little things. And men can learn from women charity, kindness and courage.

No, that's not a slip of the typewriter. Courage is the very word I mean; and please spell it with every letter in it, too, Mr. Printer, and you can put it in capitals if you want to. The average woman is so much more courageous than the average man that it's a joke to even guess it.

Mother will stand a pain that is fairly killing her all day and never even mention it. Father will go to bed with a pain in his elbow and keep the whole house up all night getting ready for the funeral.

Every night police reporter I ever knew on any daily newspaper always gets a permit to carry what he calls a gun, because he has to be out late at night and thinks he needs protection.

I know girl reporters from one end of the earth to the other, and they go everywhere at all hours of the day and night with no protection but a lead pencil and a hat pin. And they never think of either of these weapons at all unless they really get into danger.

For real, pure, unadulterated grit I'm afraid the American girl beats the American boy to what it is, perhaps, not quite euphonious to call "a frazzle."

It isn't the woman teachers that make the American boys timid, if they are timid, rear admiral.

Don't worry about the American boy, admiral. He's all right, and so is the American man—and it's the American woman who helps just a little bit to make him so.

FORGET SELF IN NATURE STUDY

"Most of Us Suffer from Ingrowing Vision," Says Prima Donna.

Ingrowing Vision

Peter's Adventures in Matrimony

By LEONA DALRYMPLE

Author of the new novel, "Diane of the Green Van," awarded a prize of \$10,000 by Ida M. Tarbell and S. S. McClure as judges.

"The truth about 'the girl in the case' distinguishes this new series by Miss Dalrymple. Her character studies will not appear unfamiliar to the majority of readers, who will follow the fortunes of 'Peter' with interest."

No. 87. The Rubber Stamp Brigade. I WAS eating my usual lonely breakfast of coffee and eggs, prepared now as a daily habit by myself, when to my surprise my wife suddenly appeared in the kitchen doorway, cosy and smiling, and so evident in her excellent humor with the world that I raised my eyebrows. Mary detests the early morning for purposes other than sleep, a feeling fostered by breakfast in bed before she married. I glanced at her trim walking suit and her hair.

"I supposed you were sound asleep. Where in the world are you planning to go at this unreasonable hour?"

Mary smiled. "Well, Peter, she exclaimed, 'I've made up my mind that every first day of the month I should go to the market. I've promised several of the ladies to meet them in town at quarter past eight exactly.'"

"What a splendid idea!" I exclaimed. "I've never seen you so interested in anything before. I'll take you to the market with me. I'll be there at eight sharp."

"I really should be going, too," said Mary with a most businesslike air. "For I've promised several of the ladies to meet them in town at quarter past eight exactly." "I'll be there at eight sharp."

"What a splendid idea!" I exclaimed. "I've never seen you so interested in anything before. I'll take you to the market with me. I'll be there at eight sharp."

Secrets of Health and Happiness

Why Boiling All Milk Insures Your Baby's Life

By Dr. LEONARD KEENE HIRSHBERG

A. B., M. A., M. D. (Johns Hopkins).

HERE'S no want of meat. Curious viands are prepared to please all kinds of appetites. A good meal sharpens both the appetite and the wit, and a perfect pabulum for the baby makes for growth, energy, health and vitality.

What a feast is to an epicure milk is to the infant. The physical and sensory state of the child, the moral and thinking condition of its brain and spirit, brain and marrow rests to an almost incredible degree upon the quality, kind, amount and condition of a child's milk.

Adults obtain minerals, fertilizing agents, energy units, heat elements and the foundations of growth from green vegetables, soil roots, meat, butter, bread and milk.

Even the emotional outbursts, which ensue from the use of particular kinds of food, all come to the baby by virtue of the ingredients in milk.

A starving man is not expected to be overly scrupulous; a dyspeptic is entitled to more or less brutality.

How Germs Collect. A properly fed baby is not only healthy, but a comfort and a joy. It sleeps hard, even and it even endures some annoyances without tormenting its guardians unduly. Habits are more apt to be good than troublesome in a correctly fed little one. Indeed, the wise mother looks promptly to the milk when disorders or other unexpected happenings manifest themselves. What most women wrongly attribute to "teething" the alert mother now first blames upon the milk, yet does not fail to examine more deeply into the causes.

Without here and eternally, as always should be the case, emphasizing the truly miraculous powers of human mother's milk, let it be granted that, against all better knowledge, the infant is to be reared on cow's milk. Little or no regard was paid to the mountainous masses between cow's milk and human milk until the great Pasteur came along and proved that the bacteria in cow's milk were the cause of the dust-laden air teeming with millions of microbes within five minutes after it left the cow.

It takes but a few minutes for the rays of sunlight to wade across 30,000,000 miles of space and reach the earth. It takes even less time for the milk of the mother to enter the stomach of her babe. Cow's milk, however, traverses air and water, microbes and miasmas and maladies of a myriad kind before it comes to the otherwise pure lips of the babe.

To Save the Babies. Now, then, the difficulty of maintaining purity with the utmost care of the child's far from perfect pabulum. Think but an instant of the swarms of infant deaths that must be laid at the door of even the superlative cow's milk.

The condition of the milk, as well as the non-disease-producing forms of life, which survive or disappear even in the best guarded milk, must be eliminated somehow before the milk enters the child's alimentary canal or those fatal complaints of summer, or even the malignant and disastrous sore throats of all seasons, will develop.

The pendulum of childhood dietetics has vibrated first one way and then the other as far as boiling the milk or slightly spiced it, or destroy the germs before serving it is concerned. It was first maintained that the heat which kills the bacteria, bacteria, caused equally bad alterations to occur in the salts, fats and albumens of the milk.

Never researches, however, have changed all this. It has been proved that, while some material differences do

exist, the difference is not so great as was once supposed. The heat which kills the bacteria, bacteria, caused equally bad alterations to occur in the salts, fats and albumens of the milk.

SIGNS OF LIFE FAIL TO APPEAR

New York Market Makes
Slow Progress
Upward.

BONDS IN DEMAND

Favorable Crop Forecasts
Cause Cheerful Speculative
Statement.

NEW YORK, June 3.—Slow progress upward was made today in the stock market. Trading was in smaller volume, and the signs of reviving life of Monday failed to show themselves. The significant feature was cessation of professional pressure and outside liquidation. The market, while irregular, had a good undertone, and developed signs of real strength toward the close. Fluctuations in the main were measured in fractions, but in a considerable number of cases substantial gains were recorded at the close.

Better Showing.
New Haven and Lehigh Valley made a better showing. New Haven ended with an advance of nearly two points. Lehigh Valley was again under pressure for a time, falling back two points to 184, the lowest in several weeks. Bear traders circulated reports of a possible change in the dividend rate, but they made little impression, and before the close the stock had about made up its lost ground. Atchafalaya exhibited particular strength and a few of the specialties, such as American Telephone, Consolidated Gas and Wells Fargo, scored good gains.

London was on the selling side at the outset, but when the market began to show signs of strength the arbitrage brokers reversed their position. Steel, Amalgamated and Union Pacific were bought freely for foreign account, about 10,000 shares being taken.

Favorable Forecasts.
Speculative sentiment was cheered by favorable crop forecasts from private sources, as well as by the improved showing of the railroads in April returns. Optimistic reports recently from steel trade, were supported by the weekly reviews of trade authorities, which emphasized the lack of buying of pig iron and signs of a better enquiry for steel products. Pig iron production in May, however, was placed at more than 800,000 tons a day less than in April.

Most of the speculative bonds were in good demand, but in a few cases heaviness developed, which gave the market a ragged appearance. Rock Island collaterals were under pressure. Several convertibles in the Pacific were bought by Atchafalaya and American Telephone, rose strongly.

FARMING, LIVE STOCK, HORTICULTURE AND EVERYTHING OF FARM INTEREST

ANIMAL DISEASES CAUSED BY GIVING OF IMPROPER FEED

By Studying Causes of Maladies, Prevention is Remedied Much Easier — Cleanliness of Stalls and Bedding Important Factors in Maintaining Healthiness.

It is now generally recognized that diarrhoea among young calves is due to a bacterial infection. Several different kinds of bacteria have been found to cause the disease. The great majority of cases, however, are caused by various forms of the common calf bacteria, or by a nearly related species, the paracoli. These species of bacteria are found in the intestines of all healthy animals. Ordinarily they are perfectly harmless. Sometimes, because of improper feeding, the bacteria cause a calf to become so weakened that these bacteria are able to set up a severe inflammation in the alimentary canal. This produces the diarrhoea or "scours," and usually results in the death of the calf. After passage through one or two such calves, these bacteria acquire a greatly increased virulence. They are then able to attack healthy calves and cause their death. When such a virulent strain is once established in a barn it is very difficult to get rid of it. The infected calves are daily passing billions of these bacteria with their droppings. These are carried about from one part of the barn to another on the shoes and clothing of the attendants, by the bedding and even by the dust in the air.

The calves may become infected in various ways. Infection thru the nasal cord happens occasionally, but this does not occur so frequently as is generally supposed. A much more frequent method of infection is thru the mouth. The calf brings its nose and mouth in contact with the soiled bedding and the sides of the stall. In this way it may take in many of the virulent organisms. If the milk of the calf is not handled in a sanitary manner, this also is a frequent source of infection.

To prevent disease. A knowledge of the causes of the disease renders methods of prevention much simpler. On farms where the disease is not serious it is only necessary to see that the calf is born in a clean stall and is kept well supplied with clean bedding. Such a stall should be thoroughly cleaned and disinfected each time before it is used. After the calf is weaned careful attention should be given to the milk. It is necessary that the milk should be handled in a clean manner. The milk must be fresh and should be warmed to 95 deg. F. It should be given in clean glass bottles kept specially for this purpose. After use these pails should then be thoroughly washed and scalded. It would be still better if all the milk used were pasteurized by heating barely to 140 deg. F. for twenty minutes. Such treatment will kill all diarrhoea and tuberculous germs. Such precautions, if carefully carried out, will prevent the disease on farms where it is not a serious infection.

On farms where the infection has become a serious hold, prevention is a much more difficult task. On such farms the virulent bacteria are spread throughout the barn and the young calves become infected by the straw or even the dust. At such places it might be possible entirely to isolate the calves from the rest of the herd, and with special attendants and a careful attention to details, the disease might be eradicated. Such methods, however, are usually impracticable.

The Serum Treatment. Dr. C. O. Jensen, Copenhagen, Denmark, has devoted a great amount of time to the study of calf diarrhoea. As a result of his work he is able to produce a serum or rather several serums against the different forms of this disease. The serum treatment is now used extensively and with excellent results in Denmark and in many parts of Germany.

The preparation of such serums requires a great amount of labor and care if they are to prove successful. Since there are a number of different strains of both coli and paracoli bacteria which can cause the disease it is always necessary to examine calves from each farm in order to find out just which strain of these organisms is causing the disease. Then a serum which corresponds to this particular strain of bacteria must be prepared. It is only necessary to inject a small quantity of this under the skin of the calf immune to that particular organism and usually no further trouble will be experienced. Dr. Jensen has carefully shown that such methods will both prevent and cure the disease. It is clear that such serum production can only be undertaken by the different experiment stations. A commercial firm will not ordinarily take the trouble to examine calves from each individual farm. Without such examinations it would be impossible to be certain. It would be to the interest of cattle breeders to urge their experiment stations to undertake investigations along these lines.—F. M. Surface in Breeders' Gazette.

Few stock raisers appreciate the great importance of constitution in their animals, and what it means to them in the development of their herd and the profits that accrue therefrom. Many are short-sighted enough to think that most economical gains will be made by maintaining the stock on a meagre ration, and feeding heavily when the time of finishing comes. This is one mistake that has led to a reduction of profits and deterioration of many herds.

There is nothing more important than constitution in animals for all the purposes for which the herd is maintained. The success of an animal as a good breeder depends largely upon its constitution, and most dairymen know that the persistency and abundance of a cow's flow of milk depends largely upon her constitution. The same may be said of fattening steers. If they do not have that development of lungs, heart and other organs whose active operations maintain and develop the body they will be poor doers in the end.

The first year of the animal's life is the critical time for the formation of these organs which go to make up the constitution of the animal. If they are maintained on meagre rations and dry food, they will not develop these organs as will the animal that is fed on succulent food and liberal rations.

The entire organs of the body will develop in harmony with the amount of food they consume. It is true with growing animals that early age, those fed on rape, silage, roots and such roughage will not develop as heavy a percentage as will the dry-fed animals, but if they are maintained for a longer period of time the subsequent gains will be made at a much cheaper rate, and whether they be kept for breeding purposes or whether they be retained to finish at two years or two and one-half years of age, the breeder of stock will enhance his profits by developing the animals from the start with succulent fodders such as silage, rape, clover and roots. It was demonstrated years ago that root-fed animals contained more blood and necessarily more water in the blood, that root-fed steers had heavier vital organs, and that root-fed animals were the most profitable. Water is the cheapest article of feeding stuffs now on the market, and if we can develop robust, vigorous animals on such nutrients, it will be wisdom on our part to do so. The good line of cattle reared and maintained in Great Britain substantiates this doctrine. We go there year after year to get the big, strong individual to strengthen our herds, and they have been reared on an abundance of roots and succulent food. It is during the early period of the animal's life that the organs of the body are molded, and that is when the feeder should start the structure proper in order to get the most gratifying results.

Some three acres of the farm are now under the Skinner system of overhead irrigation. Here strawberries, peas, asparagus, etc., are under experiment to determine the increase of yield of the plots, to which water is applied over the adjoining plots which are grown under ordinary conditions.

There are extensive variety tests being made with peaches, plums, grapes, tomatoes and berries. There are from two to three trees of each variety, and careful notes are being made of the characteristics of each variety as well as of the yields.

Another important branch of the work at the station under the charge of Mr. F. S. Reeves, B.S.A., is plant

INSTRUCTIVE EXPERIMENTS AT ONTARIO FRUIT STATION

Object of Farm is to Ascertain Most Suitable Varieties of Fruit for Growth in Niagara District — Many Tests Now Under Way.

About a mile from Vineland Station, and running down to Lake Ontario, is the Ontario Fruit Experimental Station. The farm covers some ninety-six acres, all of which is used for experimental work. The soil runs from a sandy loam to a fairly heavy clay in some places, which allows experiments to be made on the various types of soil which are to be found in the Niagara District.

F. M. Clement, B.S.A., is now director of the station. Mr. Clement is a graduate of the Ontario Agricultural College, and has until recently been on the staff of the Macdonald College, Ste. Anne de Bellevue, Quebec, in the department of horticulture. Mr. Clement has a wide and thorough knowledge of fruit growing, and his appointment was looked upon with favor in all quarters.

The station was established with the object of conducting experiments with the different kinds of fruit grown in the Niagara District, to determine the best varieties for the district as well as to introduce and to experiment with new varieties.

Many Experiments. There are a large number of experiments now under way, a few of which call for special notice. One of the most interesting is an experiment with apples planned in order to show by comparison of the same soil the best methods of handling the cultivation of the orchard. There is in the province, some very considerable difference of opinion as to the time to sow the cover-crop, and as to the need of manure when a green crop is plowed under.

There are four plots in this experiment, each with six rows of trees in the middle of the land is kept clean cultivated, and no fertilizer of any kind is applied. On the next plot a cover crop is plowed under June 15. Plot 3 has a cover crop planted the middle of August, while on the last plot a cover crop is planted in August.

Each individual plot is also divided up into different systems of pruning are carried on which are duplicated in all the plots. Some of the trees are not pruned at all, except for the dead and injured branches being removed, and the rest are pruned, some in the spring, at the ordinary time, and the remainder summer pruned. This summer pruning is done by the opinion expressed recently by Mr. T. D. Gray of the Central Experimental Farm.

Mr. Gray explains that cattle accustomed to dry grass have their ration abruptly changed to soft green grass without a relaxation of the digestive organs, and purging, which is attended by a rapid loss of flesh. "An effect," he said, "will be exerted on the milk production and as a result the flow will not be great."

Feeding cattle on dry forage during a week subsequent to their being turned to grass is offered as a method of eliminating difficulty from that source. "My experience," says Mr. Gray, "has shown that cattle are eager to get dry feed at this time of the year, and if hay is not available, straw should be fed because even it is greatly relished." A gradual change is strongly urged, because, under those circumstances the organs of the digestive system become accustomed to the new food without the danger that is encountered in a radical change and also the returns would be much greater.

Thwarts Later Growth. Mr. Gray explains the damage done to the pasture as due to the fact that the early grazing thwarts later growth because of the tender blades being cropped off too close to the roots. Also, grass on pasture tramples the soft grass to such an extent that large amounts of grass are destroyed.

Mr. Gray favors the method of herding cattle in the spring in order that they may be caused to remain on the dry land which is less susceptible to damage.

Speaking of the system of feeding grain to cattle during the summer months, Mr. Gray places himself as being opposed to the practice. "From my experience," he says, "there is a time in the year when the cattle desire a rest from being fed grain, and I think that time is when they can get a good mouthful of grass. I have also found," he says, "that when cattle have been away from a grain ration for some time, upon its being recommenced the results are much more pronounced and more extensive returns are received." The reason

given for this is that when the cow has been fed a continuous grain ration an equilibrium is set up and a steady supply of grain fails to produce any marked effect on the flow of milk, whereas, when the cow has been given a rest from grain, she will produce more milk from the same amount of grain when it is resumed.

Mr. Gray would give the cattle a respite from being fed grain from the time good supplies of green grass are available until the grass begins to dry in the fall.

Receipts of live stock at the Union yards were 64 cars, 496 cattle, 2455 hogs, 987 sheep and lambs and 440 calves.

Trade in cattle was slow, but values were about steady at Tuesday's quotations. There were several lots and loads of cattle still unsold that were on Monday's market.

These cattle were heavy and had been bought at too high prices in the country. Sheep, lambs and good to choice calves were steady, but common eastern calves were 50c to 75c lower.

Hogs came forward in large numbers, and prices were easier, the market closing weak.

Choice butcher's steers by the load sold at \$5.25 to \$5.40; choice steers and heifers at \$5 to \$5.25; medium to good at \$4.50 to \$5.10; common, \$3.50 to \$4.50; choice cows, \$4 to \$4.50; good cows, \$3.50 to \$4.50; medium cows, \$3 to \$3.50; canners and cutters, \$2.75 to \$3.75; bulls, \$2.50 to \$3.50.

Receipts of stockers and feeders were light, but values continued very high. Choice steers, \$5.25 to \$5.40; medium steers, \$4.50 to \$5.10; stockers, \$3.75 to \$4.50; Milkers and Springers.

Receipts of choice milkers and springers were light, but prices remain firm for the best grades. Prices ranged from \$5 to \$9 each.

Veal Calves. Receipts of veal calves were moderately large. Common calves were 50c to 75c lower, selling at \$3 to \$4; medium, \$3 to \$3.50; good at \$3; choice at \$3.50 to \$4.50.

Sheep and Lambs. Receipts were moderate and prices steady. Heavy fat ewes, \$4 to \$5.50; light ewes, \$3.50 to \$4.50; rams, \$4 to \$5; and clipped, 50c to 75c per cwt, less. Spring lambs, \$5 to \$6 each.

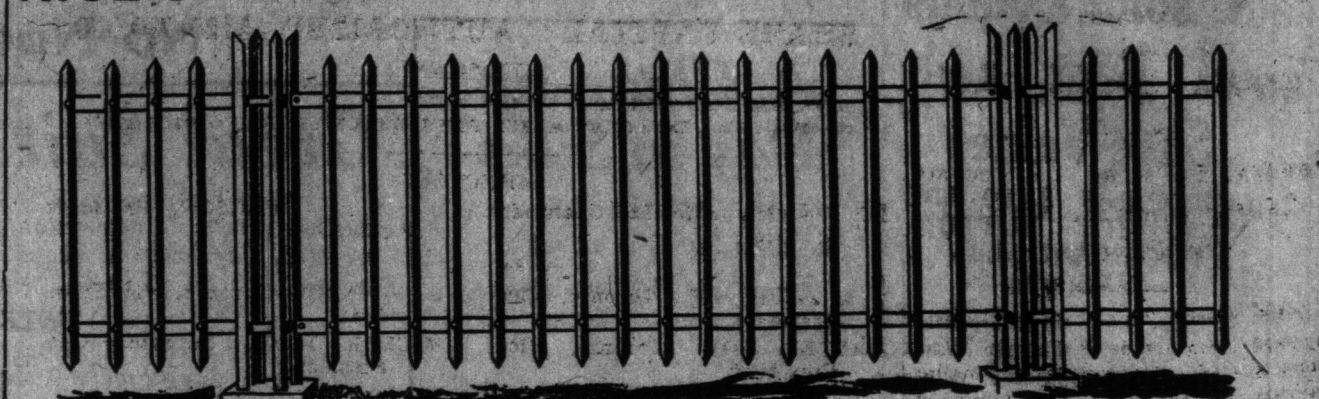

Hogs. Receipts of hogs were liberal and prices easier. Selects fed and watered sold at \$8 to \$8.10, and \$8.75 f.o.b. cars, and \$3.25 weighed out.

Representative Sales. Rice & Whaley sold on Tuesday and Wednesday 18 carloads of live stock: 4 loads of choice steers and heifers at \$7.25 to \$8.25; 4 loads of cows at \$6 to \$7.25; 1 deck of sheep and lambs, fat heavy ewes, \$4 to \$5.50; light ewes, \$3.50 to \$4.50; 12 spring lambs at \$4 to \$5; 2 decks good to choice veal calves at \$9.50 to \$10.50; medium to good calves at \$7.25 to \$8; 5 decks of hogs at \$3.10 to \$3.35.

Charles Zeagman & Sons sold 30 choice calves at \$10.00; 200 common calves at \$4.25 to \$7.25; 25 choice calves at \$10.25; 70 good calves at \$7.75; 50 medium calves at \$5; 11 sheep, unclipped, 150 lbs. at \$5.25.

Choice butcher's steers by the load sold at \$5.25 to \$5.40; choice steers and heifers at \$5 to \$5.25; medium to good at \$4.50 to \$5.10; common, \$3.50 to \$4.50; choice cows, \$4 to \$4.50; good cows, \$3.50 to \$4.50; medium cows, \$3 to \$3.50; canners and cutters, \$2.75 to \$3.75; bulls, \$2.50 to \$3.50.

Receipts of stockers and feeders were light, but values continued very high. Choice steers, \$5.25 to \$5.40; medium steers, \$4.50 to \$5.10; stockers, \$3.75 to \$4.50; Milkers and Springers.

Receipts of choice milkers and springers were light, but prices remain firm for the best grades. Prices ranged from \$5 to \$9 each.

Veal Calves. Receipts of veal calves were moderately large. Common calves were 50c to 75c lower, selling at \$3 to \$4; medium, \$3 to \$3.50; good at \$3; choice at \$3.50 to \$4.50.

Sheep and Lambs. Receipts were moderate and prices steady. Heavy fat ewes, \$4 to \$5.50; light ewes, \$3.50 to \$4.50; rams, \$4 to \$5; and clipped, 50c to 75c per cwt, less. Spring lambs, \$5 to \$6 each.

Hogs. Receipts of hogs were liberal and prices easier. Selects fed and watered sold at \$8 to \$8.10, and \$8.75 f.o.b. cars, and \$3.25 weighed out.

Representative Sales. Rice & Whaley sold on Tuesday and Wednesday 18 carloads of live stock: 4 loads of choice steers and heifers at \$7.25 to \$8.25; 4 loads of cows at \$6 to \$7.25; 1 deck of sheep and lambs, fat heavy ewes, \$4 to \$5.50; light ewes, \$3.50 to \$4.50; 12 spring lambs at \$4 to \$5; 2 decks good to choice veal calves at \$9.50 to \$10.50; medium to good calves at \$7.25 to \$8; 5 decks of hogs at \$3.10 to \$3.35.

Charles Zeagman & Sons sold 30 choice calves at \$10.00; 200 common calves at \$4.25 to \$7.25; 25 choice calves at \$10.25; 70 good calves at \$7.75; 50 medium calves at \$5; 11 sheep, unclipped, 150 lbs. at \$5.25.

The Corbett, Hall, Coughlin Co. sold 3

given for this is that when the cow has been fed a continuous grain ration an equilibrium is set up and a steady supply of grain fails to produce any marked effect on the flow of milk, whereas, when the cow has been given a rest from grain, she will produce more milk from the same amount of grain when it is resumed.

Mr. Gray would give the cattle a respite from being fed grain from the time good supplies of green grass are available until the grass begins to dry in the fall.

Receipts of live stock at the Union yards were 64 cars, 496 cattle, 2455 hogs, 987 sheep and lambs and 440 calves.

Trade in cattle was slow, but values were about steady at Tuesday's quotations. There were several lots and loads of cattle still unsold that were on Monday's market.

These cattle were heavy and had been bought at too high prices in the country. Sheep, lambs and good to choice calves were steady, but common eastern calves were 50c to 75c lower.

Hogs came forward in large numbers, and prices were easier, the market closing weak.

Choice butcher's steers by the load sold at \$5.25 to \$5.40; choice steers and heifers at \$5 to \$5.25; medium to good at \$4.50 to \$5.10; common, \$3.50 to \$4.50; choice cows, \$4 to \$4.50; good cows, \$3.50 to \$4.50; medium cows, \$3 to \$3.50; canners and cutters, \$2.75 to \$3.75; bulls, \$2.50 to \$3.50.

Receipts of stockers and feeders were light, but values continued very high. Choice steers, \$5.25 to \$5.40; medium steers, \$4.50 to \$5.10; stockers, \$3.75 to \$4.50; Milkers and Springers.

"FAR OFF FIELDS LOOK GREEN"

Are our Canadian live stock shippers making a mistake in trying to follow the "will of the wisp" in shipping to foreign markets?

Toronto live stock markets have long been noted for their "steadiness," that is, if a "break" or "rise" had come, and this condition is necessary at certain times of the year, the change in price levels was made by degrees—10c or 25c up or down in a week's time, until the necessary level was reached, so as to make an equitable working basis for purchasers, dealer and packer.

On the other hand, the foreign markets, noted for their sharp fluctuations, are taking off or putting on a "churn," sometimes 50c or \$1 per cwt, and instead of ascending or descending the ladder "rung by rung," have made the jump all at once. This makes more of a gambling market than a steady business-like proposition.

This fact was noted on our Toronto hog market this week, when prices slumped materially from last week, and caused by the slump in the hog markets in the states.

A few weeks ago Buffalo hog market was quoted 55c to 45c over Toronto, and our Canadian shippers sent their hogs there. From our information, they were dissatisfied with returns. They did not figure on a limited corn feed instead of an unlimited wheat feed, and the hogs were put thru the sorting pen and graded, with the result that the owners of the hogs did not receive near the returns that the high quotations led them to expect.

This week Toronto hog market is in line with Buffalo.

Would it not have been better to stay at home, help rebuild our own market, something that cannot get away from us by the uncertainty of politics, which may change at any time, and if all interests are not working on the same principle, this same unsteadiness and sharply fluctuating market may become established, which is certainly not desirable.

WINNIPEG POWER WORK PROGRESSING

New Plant at Grand Bonnet Falls Being Erected.

WINNIPEG, June 3.—Work in connection with the plant of the Winnipeg Electric Company at Grand Bonnet Falls is progressing satisfactorily. A gang of men numbering 400 to 500 started working on the right-of-way of a private railway in April, and it is said that this is being rapidly built. It will extend twelve miles from Lac du Bonnet to the power site. An ultimate development of 150 h.p. is anticipated. The company is now developing 30,000 h.p. on the Pinawa Channel, and has also an auxiliary steam plant in Winnipeg with a power of 20,000. As in the case of most similar developments the full power will not be developed at first.

REPORTS WITH CHECKS.

Peterson Lake reports will accompany dividend checks and will be sent out quarterly in future.

LOCAL FIRM BUYS HAMILTON BONDS

George A. Stimson & Co. have just purchased about \$1,000,000 City of Hamilton bonds. About \$500,000 are local improvements, repayable by annual instalments spread over fifteen years, and \$125,000 are twenty-year straight term debentures, issued for waterworks. These all bear four and one-half per cent. interest, and the price paid the city is the best that has been received for some years, it is said.

NEWSPAPER COMMENT.

NEW YORK, June 3.—Herald: "Traders take a sly at Lehigh and Reading because argument in government suit against the anthracite roads begins in Philadelphia."

American: "The market is in no position to withstand a fresh outburst of liquidation."

Sun: "Sentiment is unfavorably influenced by political developments and much attention is given to the advance railway rate matter."
