New Publications.

HARPER'S MAGAZINE for March offers an unusual variety of matter to its million readers, while it contains no article that is not especially noteworthy; and its illustrations, of which there are eighty-five, are remarkable examples of the best style of wood-engraving.

Two illustrated papers are devoted to art subjects, without perceptibly diminishing the space given to topics of more general interest. The first of these, entitled "Present Tendencies of American Art," is the beginning of a series of papers on American Art—a sequel to the series given a year ago on "Contemporary Art in Europe" by the same author, Mr. S. G. W. Benjamin.

Alfred T. Story contributes a paper of great popular interest concerning the English home of Washington's ancestors, full of important facts, and containing, among its excellent illustrations, a picture of the ancestral mansion of the Washingtons in Northampton.

"A Few Sea Birds," by H. W. Elliott, is exceedingly interesting, and beautifully illustrated.

Especially timely and important is Mrs. Lamb's comprehensive and entertaining account of the origin, development, and present situation of the United States Coast Survey.

Geo. E. Waring contributes the first of his series of papers on the Austrian Tyrol. Chas. Barnard, in a short illustrated paper, shows the superiority of American over the English locomotive as a competitor in the markets of the world.

E. M. Bacon contributes an interesting description of the magnetic motor and its inventor, Mr. Wesley Gary, with illustrations.

There are other papers of timely interest: "The English in India," by Thos. Knox; "Climates for Invalids" (containing facts of the greatest importance), by Dr. T. M. Coan; "Afghanistan," by Z. B. Gustafson; and "The 'Tom' Side of Macaulay," by D. D. Lloyd.

Miss Mulock's new novel, "Young Mrs. Jardine," is continued; and short stories are contributed by Miss Thackeray, Constance F. Woolson, and Alice Perry.

Besides this bewildering variety of interesting articles and exquisite pictures, there are the always well-conducted editorial departments, including the timely and graceful gossip of the *Easy Chair*, a comprehensive critical record of recent books, a summary of scientific progress, a resume of current historical events, and an amusing "Drawer."

There seems to have been much needless speculation and writing about the probability of the British Government appointing the Duke of CONNAUGHT as Viceroy of Ireland shortly after his marriage. It has been positively announced by some journals that such a decision had been arrived at, and proceeding upon this assumption there have been all sorts of disquisitions on the probable effects of the appointment, and on the evidence it furnishes of either statesmanship or jugglery on the part of the Premier. No objection could possibly be urged against the appointment if it were actually made, or likely to be made. His Royal Highness is unquestionably qualified to discharge with efficiency the duties of such an exalted office; nor can it be doubted that he would receive a hearty welcome from the Irish people at large. But it now turns out that all this discussion is premature, if not offensive; for the Government have officially announced that no such appointment had been made, and that it had not even been contemplated. It may come in due time, and with good effect; but at present an unwarrantable liberty is taken with the name of the Duke of CONNAUGHT in connecting him with any arrangement having reference to the future Viceroyalty of Ireland.

The passage of the Chinese immigration bill by the Senate of the United States has afforded ample material for discussion during the past week. The measure has been bitterly denounced as involving a departure from the principles of the Declaration of Independence, and as tending in its ultimate effect to injure both the reputation and trade of this country. Much speculation has been indulged in as to whether the President would veto the bill, and numerous appeals have been made that he should do so. No intimation has been given by the Executive as to what course will be adopted. But the probability is that the President will take no action upon the subject, for the simple reason that it has not been presented for his approval until within seven days of the closing of Congress. The Constitution allows the President ten days within which to make up his mind; and should he take the full time thus allowed Congress will have adjourned, and the bill be rendered null and void. It must be regretted that the subject has been forced upon the country in such an undesirable way. At the same time there is much in the problem of Chinese immigration which demands careful and dispassionate consideration.

In this Present Age, when the life-battle is so fiercely fought, and when upon even the strongest the tug and stress of it tell so heavily, how necessary it becomes for us to provide for the keeping up of our reserve stock of mental and physical stamina by the use of such a nerve-tonic and vitalizing agent as ROBINSON'S PHOSPHORIZED EMULSION OF COD LIVER OIL WITH LACTO-PHOSPHATE OF LIME! Its gently stimulating and nutritive-tonic properties supply the materials, and assist Nature in her efforts to keep up with the exhaustive demands upon her reserves. Prepared solely by J. H. Robinson, Pharmaceutical Chemist, St. John, N. B., and for sale by Druggists and General Dealers. Price \$1.00 per bottle; six bottles for \$5.00.

ELECTING A BISHOP.—The Synod of the Anglican Church at Toronto, appears to have a hard time in selecting a Bishop; they have had nine ballots without accomplishing their object. There are two candidates Arch Deacon Whittaker and Rev. Dr. Sullivan. It is apparent that the Arch Deacon will be elected.

The St. Andrews Standard.

SAINT ANDREWS, MARCH 5, 1879.

THE ZULU WAR.—Since the defeat of the gallant British troops in Zululand, we have searched for the origin of the war and confound from the best sources the following. England obtained possession of the Cape of Good Hope from the Dutch, since which time there were several bloody encounters with the natives—Caffrs who were beaten into subjection with the exception of the warlike Zulus, whose King is a man of great energy, and some share of military ability, who has been widening his domains on the coast between Natal and Delagoa Bay. The Orange Republic, a free State, separated him from Cape Colony, but England obtained possession of this State also and the two forces were brought together. The Zulus claimed all the land up the Blood river; their claim was refused by the British. In consequence of two outrages the English exacted redress—one was a chieftain having carried off two Zulus women by violence from Natal, for which he was to be given up and a fine of 500 cattle to be paid for the outrage. The other was, the arrest and detention of two British subjects in September last, by fifteen Zulus, for being on land claimed by King Cetewayo—for which 100 cattle was demanded as reparation. A demand was also made on the King for the surrender of a Chief who had taken refuge in his territories. Other demands were made, such as freedom of marriage among his subjects, courts of justice to be instituted in his territory, and free admission of missionaries. An ultimatum was sent Cetewayo, which he rejected by a hostile silence. In the meantime he had been consolidating his army of about 60,000 warriors, two-thirds of them available at short notice. The British Government not having had any reply to their ultimatum, the troops were ordered to cross the frontier, the gallant 24th Regt. was decoyed by a superior force into an open plain and slaughtered by the savage. Cetewayo's stroke was a masterly one, but will result in his final overthrow, as the Home Government have sent fifteen chartered steamers, with troops which will wipe out this last remnant of savage Caffrs in South Africa. The war will be a second edition of the Afghanisthan affair.

OPENING OF THE LEGISLATURE.

The Legislature was opened at Fredericton on Thursday last. As foreshadowed in these columns B. R. Stevenson was elected Speaker without opposition.

Mr. Governor Chandler's speech is not a very lengthy document, it alludes to the death of the Princess Alice—the appointment of the Marquis of Lorne as successor to Lord Dufferin—the arrival of Her Royal Highness the Princess Louise, the illustrious consort of the Governor General, and the loyal and hearty reception given them in Canada, the Lt.-Governor had invited their Excellencies to visit New Brunswick and that the invitation had been accepted—alludes to the great depression of business, and also to the abundant harvest—the Provincial Exhibition and the causes which operated against it—the importation of Leicester sheep—the seed wheat imported by Government—the subject of cultivation of sugar beets in the Province, the seed for which has been ordered by Government—the plans for new Legislative buildings at Fredericton—the Better Terms claims—the propriety of altering the constitution so as to provide but one Legislative Chamber—the more speedy attainment of justice—changes in the Common School Act. The Accounts of Receipts and Expenditure of the Province to be laid before the House.

The Members returned to their own chamber. The Address in reply to the Speech passed the Legislature on the 3d inst., without opposition. We were led to believe from the *News*, that a vote of Want of Confidence was to be moved by the Opposition. The time will develop the strength of the Opposition.

The laying of the Memorial Stone in a St. Andrews Church, St. John, on Friday evening last, was an interesting occasion. The Church was well filled by all denominations. Several addresses were made, and the history of the Church from 1773 to the present time read. Selections on the organ were given. The new Church would be a credit to any congregation, the "Globe" says. It cost \$65,000.

DOMINION REPORTS.

The Government are up to time with the Reports of the Departments which have been laid before Parliament. A mere cursory glance at these important documents, which is all that we can give them, does not do justice to them, as the few figures of a newspaper notice convey no adequate idea of the large sums expended or the revenue derived.

The Report of the Minister of Public Works, Hon. Dr. Tupper, is a blue book of 172 pages, and goes fully into the transactions and general expenditure with the cost of maintenance of the various Public Works during the year ending 30th June, 1878. These works embrace Railways, Telegraphs, Canals, Works on Navigable Rivers, Harbours and Piers, Slides and Booms, and Public Buildings. The total expenditure for construction \$7,519,886.45, repairs \$367,013.42, Staff and maintenance \$2,408,893.13—total \$10,295,793.00. The Canadian Pacific Railway is projected to commence from a point at or near the south-eastern angle of Lake Nipissing.

MARINE AND FISHERIES.

The eleventh annual Report for the year ending June 1878, is one of the most elaborate and important public documents laid before Parliament. It contains 535 pages, and has the reports of the agents, superintendents and other officials connected with the Department, with other valuable and interesting information, and arranged in that concise and satisfactory manner for which the Deputy Minister, Wm. Smith, Esq., has been distinguished. The total amount expended by the Department for the public service and salaries for the year was \$983,645.59, the total amount voted \$1,001,904. Expenditure on the Marine Hospital the past year at St. Andrews, \$340.53, this includes salary of the Superintendent, Dr. S. T. Gave, \$200, the Matron Mrs. Coats \$200, boarding seamen \$114.28, the balance for repairs, wood, coal, oil, etc. The expenditure on account of Fisheries, County of Charlotte, for salaries \$880.

THE MILITIA REPORT

is a book of 484 pages, and contains a large amount of information with reference to the Militia, Reports of Adjutants General, etc. Lt.-Col. Maunsell's, D. A. G., Report is very full, and will be noticed in a future number.

INLAND REVENUE.

The Report of the Inland Revenue Department for 1877-8 show the revenue for the year to be as follows:—

Excise, \$4,888,070; Public Works, \$507,132; cutting timber, \$56,499; bill stamps, \$200,614; weights and measures, gas, and law stamps, \$33,405; total, \$5,685,719—a decrease as compared with the previous year of \$483,444 or nearly 8 per cent. The decrease has been general over all branches of the inland revenue. The excise revenue shows a falling off of \$62,600, the principal decrease being in tobacco, the revenue from which in 1877 was \$1,630,000 and in 1878 \$1,581,000, and in petroleum, which yielded \$235,329 in 1877, and in consequence of the repeal of duty only \$6,463 in 1878.

POSTMASTER GENERAL'S REPORT.

This is an interesting blue book of 347 pages, and contains a large amount of information with reference to the Postal service of the Dominion. The gross Postal Revenue for the year ended June 30, 1878, was \$1,620,022.21, being a considerable increase upon 1877, which left a balance upon the appropriation of \$44,861.48. The revenue was chiefly derived from the sale of postage stamps. The Money Order office in Milltown, was the only one closed in this Province and but one in Ontario.

DIPHTHERIA PRODUCED BY THE USE OF MILK.—The Pathological Society of London, while investigating the causes of epidemic diphtheria in London and Woking, became satisfied that the disease was occasioned by the milk supply of those places. The milk had not been contaminated by exposure to impure influences, such as bad air, water, etc., but contained within itself the germs of the disease—arising from an affection of the cows udder, known as *garget*, and the investigations, as far as they have gone, go to show a direct connection between diphtheric conditions existing in the infected districts, and the use of milk from cows affected with *garget*—a disease which is not regarded among owners of cows as a matter of any consequence. The theory is a startling one, and a committee of celebrated physicians have been appointed to pursue and report at length on the subject. The disease has been very fatal for the past few months in all parts of the Dominion and the United States.

TOPICS OF THE WEEK

HON. MR. SEELYE has been appointed President of the Legislative Council.

RELEASED.—Mrs. Ward, whose sentence of death for complicity in the murder of her husband at New River, was committed to serve seven years in the Penitentiary, has been released by order of the Minister of Justice.

THE OPPOSITION in the Local Legislature has been organized. Mr. Blair is leader, with Messrs. Covert and Willis as lieutenants and Mr. Gillespie as whip. An honest healthy opposition is necessary in every parliament.

INTERCOLONIAL RAILWAY.—Mr. Schrieber has been appointed in room of Mr. Brydges; Mr. Pottinger in place of Mr. Lattrell; Mr. Coleman superintendent of the Halifax and St. John; Mr. Busby has been a Division Superintendent; Mr. Archibald storekeeper at Moncton. Reductions have been made in all the salaries.

THE Annual Meeting of the Rural Cemetery Company, was held last evening in Paul's Hall Messrs. R. Stevenson, J. R. Bradford, C. E. O. Hatheway, Geo. F. Stickney, D. Clark, were re-elected Directors, and Messrs. W. D. Foster and A. T. Paul were elected to fill the vacancy caused by the death of two of the former directors. A committee was appointed to examine and report upon the accounts.

ABOLITION OF THE LEGISLATIVE COUNCIL.—Each of the Speeches at the opening of the Legislatures of the Provinces, promise measures for the abolition of the Legislative Councils. This we presume is one of the Legislative reforms promised at the time of Confederation, and will materially lessen the expense of legislation, in fact there are too many legislative bodies—public affairs were as well conducted, if not better, with a Governor Council and House of Assembly, than under the present system. The time is not far distant when the lower Province will have but one Legislature.

A REFLECTION ON CHARLOTTE COUNTY.—Our contemporary the *Carleton Sentinel*, which has hitherto spoken well of this County, in its last issue stated that "a very mean fraud was discovered by Mr. James Haddock, of the Junction House, MeAdam, who had purchased 30 turkeys from Charlotte County farmers, and that in each bird was a paper with fine sand, weighing about a pound in weight," causing a loss of over \$4 to Mr. Haddock. In justice to our farmers, the purchaser should give the names of the dishonest persons who sold the turkeys, as it may turn out that it was some huxter who bought the turkeys to sell, and was the guilty party.

The St. John Globe styles Mr. Dyson who was murdered some years ago by Charles Peace recently hanged, the American Dyson. Wm. Dyson was an Englishman, and Civil Engineer, who came to New Brunswick upwards of twenty years ago to superintend the building of the N. B. & C. Railway, during which time he resided in St. Andrews, where almost every one knew him. He was a noble looking young man, of six feet two inches in height, and well proportioned. He was popular here, and esteemed a real good fellow. His widow is an English lady, who left that country after her husband's death to reside with relatives in the States.

EXTRA COST.—Experience has proved beyond question, that every public work undertaken in the Dominion, has cost much more than the estimates of engineers and contractors—as the extra cost of the Intercolonial Railway, the Parliamentary buildings at Ottawa, and indeed railways generally, and other public works abundantly demonstrate. The best informed can form no idea of what the great Canadian Pacific Railway will ultimately cost. The experience is not confined to the Dominion alone, but is also felt in the United States. For some cause or other, Government undertakings invariably cost more than those conducted by private enterprise. And from present appearances, the Dominion is about to run in debt for some works soon to be undertaken; this being so, with the present financial difficulty, Dominion and Provincial representatives will require to watch all that is going on, and endeavor to curtail the public expenditure, as far as is consistent with the public requirements—their constituents expect this at their hands, as it is the mass of the people who have to pay the taxes; and yet, they are continually bringing a pressure to bear on the Governments, and demand the construction of public works and subsidies and extra grants. In view of such being the fact, they have no just cause to complain of the Government or Provincial Governments cutting for such undertakings.

THE Governor General and H. R. H. Princess Louise having accepted the invitation respectfully extended to their Excellencies by Lieut. Governor Chandler, (which was alluded to his speech at the opening of the Legislature,) it is probable that New Brunswick will be honored by a Vice-Royal visit during the coming season, and in no part of the Dominion will their Excellencies receive a more hearty and truly loyal welcome. No pains will be spared in city, town, or hamlet, to do honor to the Princess, not alone on her own account, but also as a daughter of our beloved Queen. The Princess has won golden opinions since her arrival in the Dominion, and his Excellency takes a great interest in the progress of the country over which he rules as representative of Her Majesty. It may be that the old town of St. Andrews, will enjoy a share of the distinguished honor of the visit to this Province, and should the weather be fine a sail on our beautiful Bay, may remind H. R. H. the Princess of the Bay of Naples, to which it has been compared by those acquainted with both places.

BUTTER AND CHEESE.—The following information on the manufacture of Butter and Cheese is condensed from "An Address of the New York Dairy Association." We have omitted a number of passages and paragraphs, which though good, are general, and our space would not admit. The matter is one interesting to our farmers, and worthy their serious attention:—

"The production of Butter and Cheese as specialties began in eastern New York about thirty years ago, and has extended to Pennsylvania, Ohio, Michigan, Wisconsin, Colorado, and California within ten years has changed from an importing to an exporting state in these products. Canada within a short time has become a competitor in the English markets to the extent of \$8,000,000 pounds yearly, while she formerly bought of the States. The value of the land and cows in the United States, employed in furnishing milk, butter and cheese, is not less than \$5,300,000,000. The production of cheese is estimated at 350,000,000 lbs. per annum, and of butter 1,500,000,000, and the present year they will export 130,000,000 lbs. cheese, and about 25,000,000 lbs. butter; the value of the two is about \$350,000,000, being \$500,000 more than the wheat crop. The production of these articles has increased 35 per cent. this year, and the export have been in like proportion. These are articles which should and are revenue tariff, and our farmers can readily take advantage and devote their energies to increasing these paying products.

Mr. Herbert Lamb, who has been absent in Africa for upwards of two years, returned home last evening. His many friends here, with whom he is deservedly popular, gave him a hearty greeting. We welcome our young friend home.

LANDRY'S MUSICAL MONTHLY, No. 2, has been laid on our table. It is a creditable production, and as a Provincial Musical work, should be largely patronized. The selections are good, and within the compass of an ordinary performer, in fact they are easy, and an occasional difficult piece would enhance its value. The first number has not been received, but is alluded to favorably. The following selections are in No. 2, "Lily Schottische," "When the days of Autumn linger," a song; "Wildwood Blossoms," a Waltz. The work is published by Landry & Co., King Street, St. John.

Geo. P. Rowell & Co.'s Newspaper Directory, just received, is a neat, useful volume, and one of much interest to advertisers.

THE GREAT CAUSE OF HUMAN

MISERY.

We have recently published a new edition
of DR. CULVERWELL'S CELEBRATED ESSAY
of the radical and permanent cure (without
medicines) of Nervous Debility, Mental and Phys-
ical Incapacity, impediments to Marriage, etc.,
resulting from excesses.

"Price, in a sealed envelope, only 6 cents,
or two postage stamps.

The celebrated author in this admirable Essay
clearly demonstrates, from thirty years successful
practice, that alarming consequences may be rad-
ically cured, without the dangerous use of inter-
nal medicine, or the application of the knife;

pointing out a mode of cure at once simple, cer-
tain and effectual, by means of which every suf-
ferer, no matter what his condition may be, may
cure himself cheaply, privately and radically.

This Lecture should be in the hands of
every youth and man in the land.

Parks' Cotton Yarns!

Awarded the Only Medal Given at the
Centennial Exhibition

For Cotton Yarns of Canadian Manufacture.

No. 5's to 10's.

WHITE, BLUE, RED, ORANGE and GREEN.

Made of Good American Cotton with great care
Correctly numbered and Warranted Full
Length and Weight.

WE would ask the purchasers of Cotton Warp
to remember that our Yarn is spun on Thro-
tle Frames, which make a stronger yarn than the
Ring Frames, used in making American yarn.

It is also better twisted and more carefully reel-
ed; each hank being tied up in 7 leas of 120
yards each. This makes it much more easy to
wind than when it is put up without leas - as the
American is - and also saves a great deal of
waste.

Those acquainted with weaving will understand
the great advantage it is to them to use yarn put
up in this manner.

COTTON CARPET WARP,

Made of No. 10 Yarn, 4-Ply Twisted.

WHITE, RED, BROWN, SLATE, &c.
All fast colors.

Each 5 lb bundle contains 10,000 yards in
length and will make a length of Carpet in pro-
portion to the number of units in width.

We have put more twist into this warp than it
formerly had, and it will now make a more du-
rable Carpet than can be made with any other ma-
terial. Since its introduction by us, a few years
ago, it has come into very general use throughout
the country.

All our goods have our name and address upon
them. None others are genuine.

Whatever skeptical outsiders think of it, there are interested in the Keely Motor company some of the shrewdest and most wide awake business men in New York and Philadelphia. They—that is the stockholders of the company—have held their annual meeting, and if they had been shareholders in a forty per centum dividend-paying street railroad, or in a bank which had doubled the par value of its stock in a year, they could not have looked more contented and bright and confident. The proceedings were of course private, but the following gentlemen were elected directors for the ensuing year: John W. Keely, John Marston, Jr., George B. Collier, William Boekel, Charles B. Collier, Philadelphia; John H. Flagler, A. Hegewisch, F. W. Foote, Jr., W. B. Meeker, W. W. Wright, Charles Lamson, W. S. Hoyt and Frank G. Green, New York. The members of the board from Philadelphia will be recognized as eminently responsible and respectable gentlemen, what of the New Yorkers Mr. Flagler is president of the National Tube works; Mr. Hegewisch, secretary of the United States Rolling Stock company; Mr. Meeker is a banker; Mr. Foote is cashier in the well-known house of J. J. Cisco & Co., while Mr. Lamson is of the firm of Charles Marshall & Co. When questioned as to the prospects of the company by a *Press* reporter, one of these gentlemen said: "In New York and Philadelphia very few people have any belief in the Keely motor. We have nothing to say—let time tell the story." When asked if he had much stock, the gentleman replied: "One hundred shares," adding significantly, "and none for sale." It is estimated that a practical demonstration of the success of the motor may be looked for within the next few months.—*Philadelphia Press*.

Dr. E. B. Foote's *Health Monthly* says one of the most frequent causes of baldness is the practice of wearing the hat when it is not needed. "This practice heats the scalp, brings on scalp diseases, and as a result the hair falls." To prevent baldness the *Monthly* advises persons to keep the head agreeably cool, avoid head-coverings except when going into the cold, and to live hygienically.
