She had not the alightest intention of allow-ing her plans to be frustrated, and was only roused to fresh obstinacy by encountering indifference on one side and rebellion on the other. She had not brsught Lucia up under her own eye for nothing. Bhe had been disturbed of late, but by no means considered herselt haffield. With the assist ance of Mr. Dugald Binnic, she could cer-tainly subdue Lucis, though Mr. Dugald Binnie had been of no great help, so far. She would do her duty unfiltenbungly. In fact, she chose to piersuade herself that, if Lucia was brought to a proper frame of mind there could be no real trouble with Francis Barold.

"BOTERODY ELSE." But Bareld did not make any very ardent search for Lucia. Ho stopped to watch a game of lawn tennis, in which Octavis. and Lord Lansdowne had joined, and finally for-got Lady Theobald's errand altogether. For some time, Octavis did not see him. When it was over, Barold made his way to her. He had resented her remaining oblivious of his presence when he stood near her, and he had resented her enjoyment of her surround ings, and now, as he led her away, leaving Lord, Landowne rather disconsolate, he re-sented the fact that she did not seem nervous, or at all impressed by his silence. "What do you want to say to me?" she asked. "Let us go and sit down in one of the arbors. I believe I am a little tired-not that f mud it, though. Twe been having a lovely time." inition, were dear to him. To use power for the good of his followmen never occurred to him. As a writer he was singularly unequal. There are passages in his novels descriptive of men and women, and there are happy ex-pressions, that will live. But his style was extremely incorrect, and it is difficult to read many pages of his works without throwing down the book in digust, that a man should be at once so clever and so targibly bombas-tic. His speeches had the same faults as his novels. They were all conceived on the same model as that famous first one, which astounded the House of Commons. All were listened to with interest, for they often sparkled with wit, screams and fedicitous meers ; but the taste for them, like that for caviare, was one that had to be acquired. Of argument there was not a shadow; the passages that were intended to be dignified wore so overdone that sunally the line which separated me sublish praise counded stilled and insincere. As an orator Lord Beaconsfield's chief strength was in his adjectives, which ware earefully selected in order to point a smeer or to belitit an on opponent, while their apparent incongruity and real appositeness made them all the more tolling.
