BROCKVILLE'S GREATEST STORE

Come with the Crowds to The Robert Wright Co.'s

GREAT JULY SALE

Off with a stupendous rush. All day long the store is simply stormed by enthusiastic buyers. Even with a lot of extra salespeople it is hard to attend to the wants of the crowds that visit our store. The sale lasts all month, and it will pay you to visit the store often.

68c

RICH BLACK PAILETTE SILK for DRESSES, width 36 inches. Will not cut or crease; guaranteed Fast Black. Regular price \$1.00 yard.

July Sale 68c Yard.

NEW CORDUROYS FOR LADIES SHIRTS AND SUITS. Corduroys the last word in the Dress Goods line. New Colors-Monsoon, Service, Purple, Paddy, Cerise, Taupe, Fawn, Cardinal, Copenhagen, Gold, Navy, Tan, Brown.

Prices 75c, \$1.00 and \$1.40 per yard.

Davis & Sons

Brockville.

CAMERAS and FILM TAKING pictures with an Ansco is bully good sport that lasts all year round. You simply can't beat it for real fun, as those who've tried it can tell you. The No. 3A Folding Buster Brown camera shown in this ad takes a picture $3\frac{1}{2}x5\frac{1}{2}$ in. (postcard size) and costs \$10. There are smaller Folding Buster Browns at \$9, \$8 and \$6. Ansco Camera, Ansco Film, Cyko Paper—that's the All-American team that wins every time. Come in and get a catalog and view the various Ansco models that range in price from \$2 up to \$55. The Rexall Store Brockville, Ont.

Sir Robert Borden Strikes High Note

Var to Proceed Until Militarism No Longer Overshadows Humrnity

London, July 9-Sir Robert Borden on his arrival in London with Mr R. B. Bennett, of Calgary; Mr L. C. Christie, counsel of the Department of External Affairs, who is acting as pri vate secretary to the Premier, proceeded to the Savoy Hotel. When seen by the Canadian Associated Press, the Premier said the voyage, fortunately had been uneventful and most comfortable. "Since the outbreak of the war," continued the Premier, "it has been the constant and earnest purpose of the Canadian Government to co-operate in the closest manner and most effective means with the Government of the United Kingdom to bring this conflict to a successful and honorable conclusion. This purpose can be assisted by full oral discussion of certain important matters. It is with that object and to visit the Canadian wounded and Canadian forces generally have made the voyage across the Atlantic. While the issue of this war cannot be regarded as doubtful," con-tinued the Prime Minister, "we believe the democracies of the Empire have before them a task the magnitude of which they did not at first fully realize and which will test their courage, their resourcefulness and their self control and their patriotism; their efficiency as self-governing communities. On the one hand our resources for war purposes are abundant, and almost unlimited, and, on the other hand, our lack of preparation, still apparent, is in itself most convincing evidence that this Empire menaced no other power and earnestly desired peace. Thus unprepared we confront the most highly organized, disciplined and aggressive military power ever known in history, thoroughly trained and prepared dur-ing half a century for achievement of world-wide supremacy by force of arms. The most optimistic will concede that one moment of unnecessary delay in needful preparation can be permitted.

"In Canada, as elsewhere, we have given and are still giving of our best," said the Premier. "The spirit of the Canadian people is expressed in the resolve that so great a sacrifice must not be made in vain, but that the sacrifice will assuredly be to no purpose unless so decisive a result crowns the efforts of the allied nations that the barbarous and merciless militarism shall no longer overshadow humanity. The great questions touching the status of the Dominions of the Empire and their constitutional relation to each other will arise after. Upon such questions it would be idle and undesirable to dwell at present. We do not doubt a satisfactory solution will be found, but in the meantime the supreme issue of the war must be our only concern.

Mr and Mrs George Beach have received a letter from their nephew, Keith McLaughlin, who enlisted while teaching school in the West. His brother, Ross, is a sergeant in the Canadian Army Dental Corps, which has just landed in England.

Shornecliffe Camp, Eng. June 20, 1915 Dear Aunt and Uncle-I have been here over a week and what I have seen of this part of the country, re-minds me of old Ontario with its hills and dells and little streams. The country around camp is very hilly, so much so that it is extremely difficult to find a level stretch of ground for battalion drill. The regiments are all close to each other, those of Winnipeg being within half a mile of each other. There must be about 25,000 troops here, all Canadians, that is, including a few wounded back from the front. These fellows have great stories to tell and according to them, you might as well order your tombstone, but most of them are talking through their hats. However, very few are killed outright but many wounded for the bullets make a very small hole. Some have been wounded as many as five times and recovered. The artillery fire is more dangerous as the big shells blow everything to pieces. We will not go to the front for a few months yet as we need a great deal of bayonet and shooting drill. For bayonet exercise they put up straw dummies at which you thrust and dig, with your bayonet. Many airships pass over, some going to the front and others guarding the camp. There is an airship station at Hythe, only three miles from here and there you can see all kinds of air craft and anti-airship guns. We, are only seven miles from Dover. Between Dover and Calais is the shortest route to France and you can see a continual line of battleships, liners and troopships going back and forth. Well, so

Ralph Connor is still with us and holds his services out in the open and allows us all to lie down while he preaches and shows us the heavenly road. When we were coming over we had a dry ship owing to his influence and it was the best thing too as some of the soldiers are awful boozers. We have no wet canteen like the other troops have but it is so easy to get it close by that this does not matter. There are many troops from Toronto and I wonder if the Bishop boys have any friends in them. If there are any old Reporters 1 would be pleased to receive them or any Athenian news. Interesting news is very scarce but will try to think of some later.

much for the war as it is a subject

which we hear all the time.

Your nephew, Keith K. McLaughlin 20756 D Company, 43rd Batt. C.E.F. Shornecliffe Camp

Kent, England

Estate Claimed by Two Widows In connection with the probate of

the estate of Alvin Brown, a farmer, late of Edwardsburg, before His Honor Judge McDonald at Brockville on Friday, there was an interesting development in that two women claim to be the widows of the decased. Alvin Brown was killed last fall by being struck by the International Limited express on the G. T. R. near Cardinal, and in connection with the accident an action for damages has been instituted. P. K. Halpin, solicitor, of Prescott, appeared in Surrogate Court in behalf of Mrs Jane Brown, widow of the de-ceased, while Robert Dodge, the executor, was represented by Irwin Hilliard K. C., of Morrisburg. Mrs Jane Brown was married to Alvin Brown a few years ago. Mrs Helen Brown, of Newhampshire, also appeared and claimed that she had married Alvin Brown in 1879 at Edwardsburg, lived with him for a time and then left him. She lays claim to the estate as the legal wife of deceased. The question of which of the women is the legal widow will have to be settled in a civil

In the Surrogate Couet the accounts of executors were allowed and remuneration fixed.

Edgar--Mountney

A very quiet but pretty wedding took place at 181 William St., Kings-ton, on July 3rd, when Miss Stella, Burton Karley, Adella Kavanagh,
Geraldine Kelly, Jackson Kilbourne.
Maggie McAvoy, Charlotte A
Miller, Fred Moulton, Clarence MulThe bride looked charming in pink silk crepe with white picture hat and carried American Beauty roses. After the ceremony the happy couple par-took of luncheon at the Windsor Hotel. They have the best wishes of their many friends.

BRAVERY IN BATTLE.

After the Fighting Has Begun the Officers Give Few Orders.

Ar officer in our regular army who saw fighting in the Spanish war pointed out the other day that most persons had a very wrong conception of how soldiers fight in modern

After a regiment has wheeled into position to attack the foe and the actual fighting has begun," he said, "the officers really have little to do with the proceedings. There is so much noise, for one thing, that commands cannot be neard, and for this reason whistles, in many armies, have been substituted for bugles, because their shrill blast carries better than the heavier notes of the brass. yond giving the signal for the charge the officers can do little. The men once they see the line of the enemy in front of them, know what is expected of them and carry out their work with surprisingly few orders.

'Skirmish drills in times of peace have taught the troops how to act to-gether, and it is amazing to see how quickly the men adapt themselves to the conditions of actual battle. It is the corporals and sergeants who are in the line with the men who are the real know the characteristics of the individual private in a way that the com-missioned officers can never know them and are prepared to give a calming word to this or that one when the emergency arises.

"In my own experience I have known a private who had served three culistments to take charge of a compan; in a charge, and the officers and non-coms, were very glad to leave it to him. After the scrap was over he be-came a private once more, but while that row was on, so far as actual in-fluence with the men was concerned, he was of a great deal more importance than his captain. The way that man could wriggle into cover revelation, and he went through three campaigns without a scratch cample in the regiment was a big

"Bravery in battle, according to my experience, is very much a matter of temperament. Some men are carried along by a sort of ecstasy, others hold themselves to the work by sheer force of will, while others—and these are the best—go through a fight with a sort of grim interest as if it was a highly amusing though somewhat dangerous sport they were engaged in like polo or football."—New York Times.

A Tragedy of the Trenches.

The Irish Guards were holding a position at Ypres, and flying bullets were the order of the day. The Germans endeavored to break through, and after a particularly brisk volley Private Flynn was heard to shout: 'Murder or wars, I'm done now al

"Why, have you been hit?" shouted

his Captain.
"Not entirely hit, sir," shouts Flynn "but I've been waiting this ten min-utes for a smoke from Murtagh's pipe and by the powers they've just shot it out iv his mouth."

OUR PULPWOOD

Consumption Has Increased 10 Per Cent., Despite War.

Some economists have termed this the "paper age" from the increasing use of paper in all walks of life. This being the case it is gratifying to know that Canada is one of the great paper countries of the world and is destined to become still greater in this respect. All interested in paper and the materials from which it is produced (pulp and pulpwood), look forward to the issue of the annual bulletin on "Pulpwood" by the Forestry Branch of the Department of the Interior. This has now been sent to the printer and a few of the leading facts from it may be given. In spite of the war the consumption of pulpwood in Canadian mills was over 10 per cent. greater in 1914 than in 1913.

Since 1910 the pulpwood consumed in Canadian mills has a little more than doubled. The consumption in 1910 was 598,487 cords and in 1914, 1,224,376 cords. The commonest and cheapest kind of pulp, made by the grinding process and known as ground-wood pulp, increased by 9 per cent. over 1913, but that made by chemical processes increased by over chemical processes increased by over 14 per cent. This increasing use of chemical processes helps the country greatly as the product is worth nearly three times as much as the ground wood pulp.

Quebec is still the leading Province in pulp production, having 31 active mills out of a total of 66 mills for all Canada. Quebec produced 55 per cent of all Canadian pulp in 1914. Ontario came second with nearly 37 per cent. of the total production, and the other producing provinces in order were British Columbia, New Brunswick and Nova Scotia. The total value of pulpwood consumed in Canadians mills in 1914 was \$8,089,868 and of that exported to foreign countries in a raw state \$6,680,490 making a grand total of \$14,770,358 for the value of the pulpwood produced last year. It is interesting to note that the proportion of pulpwood manufactured into pulp in Canada is increasing over that exported in the raw state. The bulletin containing all the facts of this industry will be is-sued in a few weeks and those desiring a copy or requiring immediate information on some particular point may have the same furnished free by writing the Director of Forestry, Department of the Interior, Ottawa.

Mean Brute.

"It is strange that there are no women on the bench of the United States supreme court," remarked Mrs. Gabb, as she looked up from her

paper. "It is strange," agreed Mr. Gabb. "That court always has the last

PUT this up two seasons ago, and see, it is just as good as if I sealed it only yesterday. It is because I use Parowax."

HER IDEALS CHANGED.

She Saw a Very Large Light After She Was Happily Married.

There was a girl who was quite sure that when it came her turn to marry she could not live in a house any smaller than her father's. "Love in a cottage" was not her idea. Cupid, she thought, needed plenty of room to Map his wings and to practice his archery; he could not pine in a birdcage. So she must have an immense library with a fireplace that would take a six foot long; there must be a drawing room with parquetry flooring and thick rugs sliding about on it; the dining room must be able to hold a large table with an imposing bowl of flowers. She visualized herself ruling a salon, hostess to a brilliant coterie of people who would help her social ambition and her husband's business.

A school friend of hers came to see her a year and a half after she had married and found her in a little frame house on a side street, ridiculously happy with her husband and her baby. The back yard was just about big enough to hold a whirling clothes frame and a narrow flower bed against the fence; the plazza was as snug as a sailor's hammock; the largest room was about the size of the vestibule of

the bride's girlhood home.
'I know what you're thinking,"
laughed the proud little housekeeper
to her guest. "You're wondering how I could make up my mind to live in this tiny piano box. But I've made a discovery. I've found that it isn't the size of the house that matters; it's the size of the heart, and the biggest heart's can live in the littlest houses." -Philadelphia Ledger

Minard's Liniment Cures Garget in

HER SHOES.

What the Woman Who is Well Dressed Will Not Do.

The woman who is really well dressed does not wear a smart frock and a becoming hat and then ruin her whole appearance by clothing her feet in a pair of shoddy shoes, run down at the heel and perhaps unpolished. And yet many women who are fastidious as to their appearance, who would not think of going out of the house without their suits being well pressed, their blouses being fresh and dainty, their veils adjusted in just the right way, will forget entirely to look at the condition of their shoes. Perhaps these will be worn and dusty and will be made still uglier by being worn with a pair of soiled and crump-

led spats.

There is nothing prettier than well shed feet, nothing uglier than a pair of neglected, run down, soiled shoes. And now that abbreviated skirts are fashionable, the girl who wants to be selecting her shoes, and once she has purchased an appropriate and pretty pair she will take still greater pains

to keep them in good condition. Never take off a pair of shoes with-out putting a pair of trees in them immediately. This will help them to keep their shape and also will help to prolong the life of the boots. When there is the least suspicion of the heels becoming run down send them bootmaker's immediately have them straightened. Nothing looks so shabby as a pair of crooked

Now as to some of the povelties to be seen this spring. In the first place the light top boot, which has made such a favorable impression this winter, remains in vogue either light tan or light gray uppers. Gun metal leather and dark gray tops are also considered smart, while shod with a tan upper is very chic.

Plans of Submarines.

The Matin says: "The German subnarines now being used against British merchantships are made after mans by the celebrated American designer, Simon Lake, of Bridgeport, which were stolen from him by Krupps. The plans were submitted to crupps, whose directors gave their word of honor to divulge nothing. eventually they entered into engage ments, on behalf of the Emperor, whereby the designer was to receive 2600,000. As he could get neither his soney nor his plans back he expostulated, and was told that the patenting f anything concerning war was illegal in Germany, and that he therefore had no claim. Mr. Lake has since seen several German submarines, and is convinced that they are built from the plans he confided to Krupps."

Economy Tip.

"My tobacconist tells me that if I will stick my cigars in my vest pocket so that the small end is out instead of the big end, I'll lose fewer cigars."
"I've a better plan than that. Stick 'em in your coat pocket so that they don't show at all."—Boston Transcript.

A FRUIT CHANCE

War Furnishes Markets to Canadian Growers.

As showing to some extent how nuch good iruit-growing means to canada, it is worth noting the amount of trade formerly done by the countries at war that lies open for cul-tivation by this country. At the Canadian Fruit Growers Conference held at Grimsby last September Mr. J. A. Ruddick, Dairy and Cold Storage Commissioner, stated that he had staken a period of five years, and that he had found the importations of apples from Germany to Britain varied each year from 5,000 to 14,000 bushel boxes, from Beigium from 100,000 to 500,000 boxes, from France from 50,000 to 575,000 boxes, and from Portugal from 175,000 to 350,000 boxes. Of pears the importations varied from 4,480 to 50,000 busnel boxes from Germany, from 262,800 to 508,480 boxes from Belgium, and from 422,440 to 506,160 boxes from Portugal. Large quantities were also imported from the Netherlands, which may not be available. Mr Ruddick prognosticated an increased demand for dried and evaporated fruit from Great Eritain for use in the army. In 1913 Canada exported of this line to the United Kingdom 121,188 pounds, to Newfoundland pounds, and to Germany 2 pounds. Of course the trade with Germany will be cut off, but the exportations should expand in other direc-

Nothing so good for the bowels, stomach or kidneys, Cures headaches, prevents biliousness, stops aching pain in the back and limbs. Get a 25c. box of Dr. Hamilton's Pills to-day.

Well Tempered Living.

The statistics of insanity show that the minds of men and women are often made aberrant through the steady drive of environment, in which simple life and the spurring city life are equally at fault. The figures the per capita of insanity differs little in city and country. Rural solitude and the abnormal life of the city are alike responsible for mental diseases. although the sponsible for a man to be too much alone as it is for him to be surrounded by perfervid life. The history of the race, the inquiries of investigators and the judgment of specialists in the discount of the special state of the special state. eases of body and mind tell us that the well tempered life, void of exces-ses, is the plane upon which men and women best endure in mental and bodily health, a temperature of thought and a temperature of action in an environment in which the individual is neither submerged by human society nor detached from it.—Seattle Post-Intelligencer.

Minard's Liniment Co., Limited.

Dear Sirs,-This fall I got thrown on a fence and hurt my chest very bad, so I could not work and it hurt me to breathe. I tried all kinds of Liniments and they did me no good.

One bottle of MINARD'S LINIapplied on my breast, cured me completely.

C. H. COSSABOOM, Rossway, Digby Co., N. S.

Tenniel's Mustache.

The later portraits of Sir John Tenniel, the famous cartoonist of London Punch, show him wearing a full beard and moustache, but his most familiar appearance was with a moustache only, a long, curly one, worthy of one of Oulda's guardsmen. The story of how he came to grow it is interesting.

After the Crimean war the return of the soldiers with full beards started a fashion against which three Punch artists protested. One day, being out horseback together, they solemnly lted at crossroads and swore on halted at crossroads and their uplifted hunting crops never to wear hair on lip or chin. Tenniel was one of the party, Leech another and R. T. Pritchett the third.

Leech alone remained true to the ow. Pritchett went to Skye, and on his return with a moustache called on Tenniel. He thrust his head in at the cartoonist's door and dumbly waited.
"You scoundrel" was Tenniel's excla-"Then I, too, must!" And

CARDINAL GIBBONS ON WOMAN. (New York Sun)

CARDINAL GIBBONS ON WOMAN.

(New York Sun)

The letter on women suffrage by Cardinal Gibbons, and the accompanying statement by which he enlarges and enforces it, represent the conservative, some might say "the mediaeval" view, the old and long religious view. Let us hear this illustrious churchman, uttering ancient opinions, which may or may not be approved by the moderns, but which must have a wide echo in this country and the rest of the world:

"Woman is queen indeed, but her empire is the gomestic kingdom. The greatest political triumpns she would achieve in public life face into significance compared with the serene glory which radiates from the domestic anrine and which she illumines and warns by her conjugal and motherly virtues. If she is ambitious of the qual empire of public and private life, then, like the fabled dog beholding his image in the water, she will lose both, she will fall from the lofty pedestal where nature and Christianity have placed her and will fail to grasp the sceptre of political authority from the strong hand of her male competitor.

"Though woman is debarred from voting she brings into the world and rocks the cradle of the nation's future citizens. She rears and moulds the character of those who are to be the future rulers and statesmen the herves and benefactors of the country. Surely this is glory enough for her."

This assumes the whole case, does it not? The other side assumes it too. In all the States where this matter is to be voted on the words of James Cardinal Gibbons will be heard with respect. And yet pernaps they are not highly side would be.

BABY'S GREAT DANGER

DURING HOT WEATHER More little ones die during the hot weather than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach troubles come without warning, and when a medicine is not at hand to give promptly the short delay too frequently means that the child has passed beyond aid Baby's Own Tablets should always be kept in homes where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes suddenly the prompt use of the Tab-lets will cure the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville,

IN FLYING CORPS

G.T.R. Apprentice With the British in France.

Among the twelve hundred Grand Trunk men who have enlisted for overseas service are several appren-tices from the motive power department of the railway. These young men are variously employed, many of them in the firing line, with the Canadian Expeditionary force, while others have turned their technical skill to advantage in the other branches of the service

Among those who enlisted from the Grand Trunk shops at Battle Creek, Mich., on the outbreak of the was an English apprentice, A. J. Locke,, and the Master Mechanic at Battle Creek has just received following letter from the young man's mother who resides at Godalming, Surrey:

"I am writing to thank you very nuch of the gift of money sent much through you to my son, A. J. Locke, and to thank you also for your kindness to and interest in him while he was employed in the G. T. R. shops. I can assure you that both my hashand and myself will ever feel grateful to you for the welcome you extended to him amongst you, and for the very thorough tuition which he must have had while with you, though, for a short time (these unforese a circumstances interrupting his apprentice-ship) which has enabled him to go out and do his duty for King and country. He is working as a ficter (first-class air mechanic) in the ship factories of the Royal Flying Corps, somewhere in France, and I am glad to tell you that he is keeping well, working very hard, long hours, too, cheerfully, loyally doing his share, amidst many dangers, to keep these wild barbarians away from our homes, and it is just what I would have him do. He is my one way, and I wish I had others who could nelp in this awful struggle, for such it is, and will be until we finally crush these monsters forever, which, by God's help, we shall do, at a terrible cost, we know, and great sacrifics."

Ambiguous.

Uncle Sol threw aside the letter he as reading and uttered an exclamation of impatience.
"Doggone!" he cried. "Why can't people be more explicit?"
"What's the matter, pa?" asked

Aunt Sue "This letter from home," Uncle Sol answered, "says father fell out of the old apple tree and broke a limb." — Youngstown Telegram.

DIGESTIBLE PIE CRUST.

Just How to Make This Most Desirable Sort Pastry.

Many there are who forego the de-lights of pie, because the crust is not

digestible. Try this recipe:
For one covered pie take one pint of flour one large teaspoonful of salt: sift these twice into a bowl; chop into half a pint of butter and lard, mixed; now, using the knife, moisten with one gill of cold water this is usu-ally ample); do not handle unnecessarily; turn it out on a board, roll lightly away from you about one inch thick; spread a very tin layer of but-

thick; spread a very tin layer of but-ter over it; cut it in four square parts, place one on the other; roll out thin, away from you, as before.

Grease a deep pie dish, fit the crust in and cut edges neatly. Then put in the filling, dampen edge, place a crust over it, previously nicked several times in the centre; bake in a brisk oven until a golden brown; dust with oven until a golden brown; dust with

powdered sugar.

This recipe is good where any pastry is needed. A richer crust is obtained by beating one egg, then add-ing sufficient cold water to it to make

The Legion of Honor.

In 1802 Bonaparte passed the formation of a legion of honor which was to include in its ranks men of distinction from every walk of life, not only soldiers, but savants, jurists and authors.
"It is aristocratic in its tendency,"

said Berlier, a distinguished lawyer, "leading France back to the ancient regime when crosses, badges and rib-

regime when crosses, banges and ribbons were the toys of monarchy."
"Well," replied Napoleon, "men are led by toys. The French are not all changed by ten years of revolution; they are what the Gauls were—fierce and fickle. They have one feeling—honor. We must nourish that feel-

honor. We must nourish that honor, ing; they must have distinction. ing: they must have distinction."

The oath taken by a new member of
the Legion of Honor was to devote
himself "to the service of the republic. to the maintenance of the integrity of its territory, the defence of its government, laws and the property which they have consecrated; to fight against every attempt to re-establish the feudal regime or to reproduce the titles and qualities thereto belonging. -"Napoleon and the End of the French Revolution," by Charles F.

Are diseases, not vices, and therefore curable. Patients are under my personal care and receive their treatment in ordinary hospitals as ordinary medical cases.

D. H. ARNOTT, M. D. 226 Queen's Ave., London, Ont.

THE ADOPTED HOME BOY.

There are thousands of adopted children in Canada. The rural districts are full of them. J. J. Kelso, Superintendent of Neglected and Dependent Children of Ontario, has issued a leaflet in reference to these children: "What is the legal status of the adopted child?" "Can she take our name?" "Can this boy inherit the farm?" are questions often asked by foster parents, he says. Foster parents can change the name of an adopted child to their own without any special authority, and it is quite legal for the child later on to do business under the new name and also to marry. The chief difficulty is over inheritance. If there is no will then the adopted child is cut off entirely from participation in the estate of the foster parents. is absolutely essential that a will should be made and the words inserted, "I give and bequeath to my adopted daughter - the sum of--,' or describing the property or article. This should be attended to while the foster parent is in good health and not left until death threatens.

Minard's Liniment Cures Diphtheria.

To Remove Iron Rust.

Cream of tartar is said to be excellent for removing iron rust spets. Use a tablespoonful of cream of tartar to vo quarts of water and boil the article in the solution. This is said to have removed stains when lemon and salt and even oxalic acid had failed to do so.

ALLY SUB. IN BALTIC **BELONGS TO BRITAIN**

Raider Which Sunk German Warship Lately So Announced.

Merchant Vessels' Right To Carry Arms Is Upheld.

London Cable-The British Admiralty to-night stated that it was officially announced at Petrograd today that the submarine which made a successful attack on a German warship on July 2 in the Baltic was a British boat.

The statement of the Admiralty contained the first public announcement intimating that British submarines were operating in the Baltic Sea. It is presumed that the undersea boat passed through the Cattegat from the North Sea to the Baltic Sea and then traveled eastward for 200 miles as the Bay of Danzig, where the warship was attacked, lies in the southeastern part of that body of water. The distance from an English port to Danzig is about 900 miles. The Russian official communication announcing that a German warship had been sunk by a submarine said that the battleship, which was of the Deutschland type, was steaming at the head of a German squadron at the entrance to Danzig Bay, July 2 when she was blown up by two torpedoes fired by a submarine.

THE ADRIATIC ARRIVES. The White Star liner Adriatic arrived safely in the Mersey this even-ing. Threats had been made that this steamer, on which Sir Robert Borden, Premier of Canada, was a passenger, would be attacked by submarines during the voyage from New York to

The Italian navy has suffered its first serious loss, an Austrian subma-rine having successfully torpedoed the cruiser Amalfi in the narrow wa-ters of the Adriatic Sea. Most of the crew were saved. This is the second allied warship to fall a victim to an Austrian under-water craft, the French cruiser Leon Gambetta having, earlier in the war, been caught in the Ionian Sea. It is realized that the loss of the Italian warship is only one of the incidents which must be expected where flects keep to the sea, block-ading enemy ports or protecting com-

As an offset, it is claimed that a French warship has sunk a German submarine in the Channel. All the belligerent powers are rapidly building submarines, and it is reported that Austria has nine at Pola alone. Thus the Italian ships will run se-Thus the Italian ships will run rious risks in moving about the ters of the Adriatic, which are well suited to these craft.

The Grimsby trawler Cheshire was blown up by a mine in the North Sea Wednesday. All the crew with the exception of the chief engineer were

ENTITLED TO BE ARMED.

London Cable-"Merchant vessels of a belligerent power are entitled by established and uninterrupted usage of the sea, to carry and use armament in self-defence," said Lord Robert Cecil, Parliamentary Undersecretary for Foreign Affairs, in reply to a question put by Commander Carlyon W. Bellairs in the House of Com-

"Several neutral Governments," Lora Robert said, "were communicated with in this matter on the outbreak of the war, and several more have been approached since, as circumstances suggested. The principle of merchant ships carrying arms for self-defence has been generally recognized, and British ships so armed have been trading regularly with the various countries since an early stage of the war.' Commander Bellairs'

Commander Bellairs' question was whether in view of the unusual character of the German attacks on unarmed merchant vessels the Govern-ment would ask all neutral Governments to allow merchant vessels armed for purposes of defence only, with a gun in the stern, to trade with their ports in spite of the fact that they JUDGMENT IN THE FALABA CASE

Giving judgment in the Board of Trade inquiry into the sinking of the African liner Falaba in St. George's Channel March 28 with the loss of 111 lives, Lord Mersey to-day found that the ship had been sunk by a torpedo from a German submarine that the measures for saving life had been promptly carried out, and that proper discipline had been main-

Lord Mersey added that the submar ine made no effort to save life, and probably could not do so without en-dangering itself. Lord Mersey said dangering itself. he was satisfied that the witnesses who had described the lifeboats as being rotten were mistaken, and that the damage sustained by some of them in launching was not due to negiect the part of the company or crew. Mersey said, must rest exclusively with the officers and men of the German submarine. The men in the rescuing boats were praised for their courage and kindness. The allega-tions brought to the attention of Lord Mersey after the conclusion of the hearing that the Falaba had fired signals calling for assistance were found by him to be without foundation.

29 SIINK OUT OF 20,000. Nearly 20,000 vessels have entered the port of Liverpool since the This, said Sir A. Norman Hill, secreof the Loverpool Steamship Own ers' Association, speaking at Liver-pool yesterday, showed that the Ger-

mans had failed in their attempt to

blockade British ports.
On these 20,000 voyages the Ger mans had captured or destroyed only mans had captured or destroyed that twenty-nine ships, he continued. What did that represents Ships which had sailed in and out of Liverpool had completed in safety 998 out of every 1,000 voyages upon which they start-That was a magnificent record he held, of perils faced and overcome

TWO AMERICANS KILLED. Washington Despatch-Two Amer cans, Richard Martin, either of Chelcans, Richard Martin, either of Cher-sea, Mass., or Providence, R. I., and John Mahoney, thought to have lived at No. 321 Third avenue, New York. were kiledl by the shell fire of the derman submarine which attacked the

British ship Anglo-Californian.

Advices to this effect reached the State Department to-day from Consul-General Skinner, at London, who transmitted a report from the Ameri can Consul at Queenstown. Eight members of her crew and her captain were killed and eight were wounded during the attack, which occurred during the attack, which occur July 4. The Anglo-Californian

TURK PRISONERS TELL OF BREAK OF THEIR SPIRIT FRENCH GAINS

All Have Same Tale, of Weariness of War and Hatred of the Germans.

HAVE WHIP HAND

Allied Forces On Gallipoli Are Confident They Are Soon to be Victors.

Mitylene Cable-The recent fighting on the Gallipon Peninsula has resuited in the capture of a large number of prisoners. I have seen many of them, and though they were not hauly clothed and appear to have one mind as to their good fortune in being "rescued," as one termed it, from the interno which the rurkish positions on the peninsum have been for a considerable time. It is always essential to discount to some extent the statements of Turkien prisoners, as they generally think it necessary to make declarations by which they hope to find layer with their captors, but allowing for that there can be no doubt as to the general reliability of what they say. They an agree regarding the nagging spirit of the Turkish ary. They state that the feeling between the Germans and the Turks is becomingly increasingly bad, and they tell many tales of Germans being shot in the back in return for the frequent emptying of officers' revolvers into hesitating or wavering ranks. Men who come from Constantinople give a curious picture of that once busy city. Galata quays, formerly so gensely crowded, are now almost entirely deserted, while the Golden Horn, protected by bombs, is a mass of ships which dare not move. Unly at night time does an occasiona transport or supply ship venture out. British submarines' work, and the Russian blockade, have had an extraordinary effect. The city is struck as it were, with paralysis. There is undoubtedly in the capital a large element favorable to and ready to take part in the revolution to overthrow the military party and its German overlords, while in the provinces anti-conscription riots have taken place. Meanwhile on the peninsula trench warfare continues with unabated vig-or. The weather is extremely hot, so conditions are very trying.

The spirit of the allied forces, however, cannot be too highly praised. Our men are digging and fighting their way towards that important goal, Tree Peak, and the numerous gradual slopes which the Turks have made into an underground fort some-thing akin to "the Labyrinth" in thing akin to the Labyrian weeks ceased to be a village at all. In all this destructive war never perhaps has the village being so completely bothood of the site of the wiped-out village have tried a new strategy. Four lines of their trenches faced on ground sloping toward a position held by cur troops. In a dashing night attack the allied forces carried the first two of these lines. Suddenly just at dawn, the sides of the cap Suddenly tured trenches, skilfully manned, crumbled away, exposing the defend-ers in front. Our men found them-selves in the dim light being raked by machine gun fire from two lines of the enemy's trenches gefore them. In an instant they were up and at them, and after ten minutes of desperate hand-to-hand fighting the sec-

ond line of trenches was in our pos WHIP HAND OF TURKS

The British press representative even if a shmead Bartlett, in a graphic deconcealed.

scription of the Battle of Gully Ra-vine on June 28, which placed the allied line diagonally across the in-step of the boot of Gallipoli by push-ing forward a mile on the allies' left ing forward a mile on the allies left wing, emphasizes above all the great moral effect on the British forces, who he says "now feel that they at length have got the whip hand of the Turks." They repeatedly failed previously in attacks on the positions now won, and their present success is mainly due to a change of tactics and improvement in support afforded by the artillery, and to the splendid by the artillery, and to the splendid co-operation between the military and

naval forces. "Our left wing has been constantly held up by the strength of the Turkish positions," the account says, "but on June 24 the French by a gallant and successful advance straightened out the line on the right and now our left wing hes followed opening up. left wing has followed, opening up the brightest prospects for the future if only our gunners are kept supplied with unlimited rounds of ammuni-

As an illustration of the exhaustive As an indistration of the enabstive nature of the previous fighting, the correspondent says that on June 29 the division upon whom the brunt of this battle fell had some battalions without a single officer who original-

ly landed in the Dardanelles.
On the 25th the British infantry forces were greatly assisted by the loan of some French trench mortars, which, dropping bombs containing 30 to 76 pounds of melinite vertically into the enemy's trenches, were used

with deadly effect. "The great difficulty out here been to hold captured positions against fierce counter-attacks during the night," the correspondent declares. 'The ground is so broken and provides so much natural cover that the enemy, having advantage of minute know-ledge of its configuration, is able to creep up under cover and retake portions of trenches with the aid of hand tactics were attempted, but failed, and the enemy, who seemed exhausted, engaged in no fighting on the 29th. Thus our men were able to consolidate their positions, and the enemy's attempts on the 30th to recapture these positions were fruitless, and since then they have shown no disposition to renew the fighting."

Numerous Engagements All Along the Arras Front.

Another Hun Attack in Argonne and woevre Expected.

London Cable-The French forces files and captured the ranway station Scuence pressed forward last night and penetrated for some distance nto the German lines in front of the Village itself, securing , 800 yards of trenenes by means of an attack with hand grenades. To-day the Germans counter-attacked with extreme viclence and were able to recapture some of the lost ground.

According to the French official re-Port to-night, only 100 of the 800 yards was recaptured by the enemy. Berlin's version is that the French were driven out of the rui length of 800 yards but came back later and are still established in "a small section of trench

-length not mentioned. All along the front north of Arras there have been numerous infantry engagements without marked advantage to either side. The Paris report states that the German counter-attack against the trenches recently won by the British near Pilken was checked by the allied artillery and dispersed with heavy losses. This is the attack in which Berlin yesterday asserted that the Germans had succeeded in expelling the British from the posi-

COAST DANGER

Government Believes in Possibil ity of a German Sub. Raid.

Ottawa Report-The danger of an attempt by Germany to establish a submarine base in the Atlantic off the Canadian coast for the purpose of destroying vessels carrying war supplies to the allies is believed in Administrative circles to be a real, and pos-

aibly not a distant one.

That submarines of the newer type could be sent as far even as the Atlantic waters of Canada is regarded as sufficiently probable to warrant special precautions being taken, and it is understood that the precautions are under consideration if not already

in operation.

The first step would be the placing of additional patrol boats on the Atlantic and the constant maintenance of a vigilant lookout, with the object of preventing the establishment of a submarine base. This work will call for fast, well-armed vessels, a number of which are already patroling the coast, and have been since the outbreak of the war. It is thought that the steam yacht turned over to Government by Sir John Eaton may be used in this service, or may replace another vessel sent out on an anti-submarine errand. The eastern coast of the Dominion is in many places desolate and difficult of access from the sea and numerous islands which are sufficiently lonely and out of the way to afford refuge for hostile submarine craft. At the same time there are seamen in the Canadian Atlantic coast service who are familiar with these islands and who know the coast like a book, and it is not thought probable that the whereabouts of a hostile submarine base, even if nee established, could be long

A BIG PROBLEM FOR DOMINION

One of Reasons for Premier Borden's Present Trip to the Mother Country.

WILL BE SLOW

Freighters May be Requisitioned to Carry Food Exports at Fixed Rates.

Ottawa Report-One of the most serious problems which the Government at present has under consideration, and which is one of the matters that Premier Borden will take up with the Admiralty and the home authorities is that of the shortage of ocean tonnage and the tying-up of the Canadian export movement. The impending harvest in Canada, and the necessity of moving the incuense crop which at present is expected, brings the problem more forcibly to the front, and makes its colution a mat ter of pressing importance. The gen cral export business of the country has been han pered scriously for the past ten months, owing to the short age of ocean tonnage both on the Pacific and the Atlantic, though exorters have shown an inclination to take the situation philosophically and to resign themselves to the inevitable loss of business. In the movement of the new crop this autumn the rail-way systems, the shipping interests, the financial concerns, and, in fact, the Dominion, are vitally interested. The total yield of wheat in Canada The total yield of wheat in Canada last year was 155,000,000 bushels, and this year, with an estimated increase in the acreage of 25 her cent., and with generally good prospects for an increased yield per acre, it is estimated. ed that the wheat crop will not fall far short of 250,000,000 bushels. In the United States it is estimated that there will be 100,000,000 bushels more than last year. It will therefore be seen that a very considerable increas ed tonnage will be required to carry the exports of the two countries.

available for ocean freightage is now energed on the King's basiness, bav-ing been taken over by the Admiralty for purposes of transport etc. A tra-mendous amount of tonnage formerly available for ocean freightage is now engaged in carrying troops to the various theatres of war, to the Dardan-elles, to France, and from Canada to England. Other thips are engaged in the carriage of amnunition, army stores, horses, hay and fodder, etc., so that a comparative few are available for the ordinary export business of the Dominions. In this respect not only Canada, but South Africa, Australia. New Zealan l and all the Brit ish possessions also suffer. While German shipping has been driven from the seas, there is a very large German tonnage locked up in the American ports, which before the war was plying on the trade routes of Neutral shipping is also the world. to some extent seriously hampered. A number of prize vessels have, it is stated, been placed at the disposal of shippers in Great Britain, but these are not many. In response to the urgent demand for ccean tonnage many of the steamers formerly gaged on the Great Lakes have taken

CROP MOVEMENT LIKELY SIZE. At best, the movement of the 1915 grain crop under present conditions of scarcity of tonnage must be slow. There is a scarcity of 168,000,000 bushels in the elevators of the Dominion, which, to a great extent, will take care of the storage of the crop, but there is only a capacity of 29-250,000 bushels in the elevators in the eastern inspection division, including Montreal, with a capacity of 7,400,000 bushels, so that unless export is freer than it is at present the crop will have to be moved very grad-ually from the west. This in itself, however, is not regarded as an unmixed evil, since a gradual move ment, from the financial viewpoint, is perhaps better than a rush during a

month or so. Sir George Perley, Acting High Commissioner for the Dominion in London, has been working on the problem for some time past. Sir George Foster Minister of Trade and Commerce, has been holidaying in New Brunswick for the past month, but is expected to take the under his consideration upon his 're-What he and the Government have to face is the problem of meet ing a situation where the available freight tonnage on the Atlantic is cut down by at least one-half, while demands for export business are in-creased or will be increased by the crop movement by about the same

percentage.

The cry for ships has been inces sant for some months past, and both the export and import business have been seriously been seriously hampered by lack ocean-shipping facilities. There hundreds of ocean steamers which were formerly available, but which are now being used exclusively war purposes, some of them being kept as prison ships in England. When the crop movement starts it will take several bundred vessels handle Canada's wheat exports alone, with a similar increased demand from the United States. It is not improb-able that there will be serious congestion of wheat at the ocean terminals by the end of September, and in consequence the rall movement to the east will be held up. That may bring about a glut of wheat on the western markets, and a consequent big drop

in price, unless the Government suc ceeds in its present efforts to have some of the ships now on war service released, and all the available tramps pressed into the service. These latter are already reaping a rich harvest, and ocean freight rates are up

FIXED RATES, REQUISITIONED BOATS.

The increased insurance rates, on account of war risks, are comparatively light as contrasted with the boost in the freight rates following decreased supply and increased demand for shipping. If the ocean freight rates go still higher, it is not improbable that joint action will be taken by the Imperial and Canadian Governments to requisition all the available freighters for the handling of food exports from Canada at fixed freight rates with the Governments assuming all risks of

loss.

Sir Robert Borden will spend at least part of his time while in England in discussing the question with the Admiralty and the British Board of Trade. In the meantime, trans-portation and business interests are endeavoring to co-operate in looking for a solution of the problem.

From Catastrophe On Queenston Trolley Line Wednesday.

Possibly Three More May Succumb to Injuries.

Toronto Report .- The bodies of Charles P. Jennings, Sidney W. Grant, Robert Watson, Albert E. Little, Rita Wiggins and Dorothy Keats were brought home from Niagara Falls by steamer this morning. The bodies of Harold Jaffray Patridge, Elizabeth Crombie and Margaret Tomlin reached

Toronto last night. The six bodies brought home to-day came over the same route over which they met their death. Along the car tracks the residents of Queenston lined up to bid a last farewell to those who had come to such a tragic end. Tenderly the caskets were placed side by side in the baggage section of the radial car. Tears came to the eyes of the men as they lifted the smaller ccifins, containing the bodies of little seven-year-old Dorothy Keats and Albert Little, the twelve-year-old newsboy

The death toll now stands at thirteen, but it is possible that it will reach sixteen. The corrected list of dead stands as follows:

Harold Jaffray Partridge, organist Woodgreen Methodist Church, residence 22 Garden avenue.

Chas. P. Jennings, accountant Im-perial Varnish and Color Company, residence 503 Broadview avenue. S. W. Grant, advertising manager Westminster Publishing Company, re-

westminster rubishing company, residence 84 Langley avenue.

Narrow Escape of Prescott Young Man

Ward Burke, eighteen years old, of Prescott, had an experience Saturday which he will soon not forget, and narrowly escaped being drowned. He left Prescott about three o'clock in the afternoon in a sailing canoe for his father's camp four miles below Prescott. While in mid-stream a sudden puff of wind upset his canoe and he was thrown into the water. He clung to the sance but was unable to attract the attention of anyone on shore. the canoe, lost consciousness. After being two hours in the water, the upturned canoe was observed by a man named Duvall, of Ogdensburg, who at once put out in a small boat and resthe youth from his perilous position, taking him to the camp where medical aid was summoned as the lad was still unconscious, and did not recover his senses until three o'clock the following morning. When the rescue was made the canoe was just entering the swift water of the

Bailiff to Seize Nepean Property for Back Taxes

The property of about 250 residents of Nepean is to be seized by a bailiff this week for non-payment of taxes, the collector of revenue, Mr Peter McRae has announced. Commencing on Tuesday, the bailiff will go around the township seizing the property of ratepayers who are not ratepayers.

About \$5,000 of last year's taxes are still due to the county from "rate-payers." The tax collector says he thinks it is carelessness, rather than

Lyndhurst won another game on Saturday although by a small margin. How a game could be played in grass knee high, is hard for fans who did not see it to understand. The game proved the contention that there is still room for more and larger dairy herds. But grass or no grass, Athens almost won, getting in 11 runs to their opponents' 12. Grounders became entwined in thriving stalks of white margarets, curled up and died exasper atingly many feet in front of the waiting fielder. Poor coaching lost several runs for Athens. Tynghuset places runs for Athens. Lyndhurst plays from the United States, and to develop good ball and is now in the lead. They come here next Saturday and Athenians will not be disappointed if they attend the game.

on Wednesday, July 7th.

respected there as also in his home city, Winnipeg, where his parents re-side. The young couple were the recipients of many beautiful presents, Arriving at the grounds, a scene of joycus activity is in evidence on all sides A number of swings (for which the tall maples are so well adapted) were in continual operation. The booth, with its supply of ice cream, bananas and other "things good to eat," did good business. The park committee also further planned well for we find tables forming three sides of a square with commodious side tables and a stove for the supply of tea and coffee and other hot dishes. The ladies managed well, they managed exceedingly well, for at the call to dine there were just about an eyen three hundred who sat down to a dinner which for variety and richness and abundance would satisfy the most

During the afternoon all went in for a holiday royal after their own plan or inclination

The programme committee called a list of events, the winners in each case being as follows:

Girls under 10 years—1st Bessie Parish, 2nd Marion Earl and Marion Robeson (equal), 3rd Frances Wiltse and Kathleen Taylor (equal). Girls under 12 years—Bernice Duco-

on, Louise Pattemore, Lillie Dunham. Girls under 15 years—Maggie Gibson, Annie Gilroy, Hazel Rabmer.
Girls over 15 years—Hattie Rockwood, Cecelia Pollock, J. Levetoire.

Brockville Business College

On the east side of the Fulford Block, Court House Avenue, Brockville, is a large sign bearing the words BROCKVILLE BUSINESS COLL-EGE. This sign last year needed repainting and a sign Painter offered to do same for \$10.00 per word or a total of \$30.00. This sum Principal Rogers thought too much, so the painter made the following offer: To paint the first letter for one cent and the price was to be doubled on each succeeding letter of the three words BROCKVILLE BUSINESS BOLLEGE, i.e., that is the doubling process was to go on for 24 times after the first letter. To this the principal agreed. When the painter sent in his account the principal was alarmed and thinking there was a mistake sat down and worked it out. Finding that the account had been rendered correctly the business college manager sent the painter a check for \$30.00. If the painter insists on his own proposal, how much is coming to him?

T. T. SHAW, EDITOR AND PROPRIETOR

TOWN TOPICS.

At this season of the year when the schools are closed and so many of our residents are at their summer cottages at Charleston Lake and other places of recreation, our village appears somewhat quiet, but that does not alter the fact that Athens is still on the map and prepared to do business. Athens is nicely located in the midst of one of the best agricultural districts in Eastern Ontario and it is up to her to look after the requirements of the public in this district in all lines of trade. If merchandise can be obtained in Athens at a similar price to outside places why should people trade away from home? We can truly say that they would not. It appears to us that it is up to our merchants to get busy and seek to cope with the present existing situation, and we know that it can be accomplished if proper procedure is taken advantage of. We are here publishing a newspaper and trying to ebe out an existence, but to do so we have to look to the people of Athens and surrounding district for their support, but more especially to the business men of our town. To have our town make progress the people require to be alive and wide-awake and when an opportunity affords itself for the betterment of the village it is up to the people to take advantage of it and try and promote same. In our newspaper work we would like to see all the business men represented in our advertising columns, and we are sure that it would be money well spent and that they would be recompensed a hundred fold, besides giving a good tone to our town. Merchandise can be shipped into Athens by the C.N.R. as cheaply as any other inland town which has only one line of railway and a like distance from the fountain head.

Some people think that because local option is in force in Athens that the town is losing trade. This may or may not be true, but that does not alter the fact that we have it and also that it is here to stay and we will have to make the best of it. From general appearances throughout the Province of Ontario it is only a matter of a few years when the whole province will be dry, and then it will be up to many to offer other excuses why their towns do

This chronic kicking about your own town is bad in every sense of the word, and people who talk against their own town help shift it back a cog at each speech. On the contrary, if everybody in any town speak highly of its people and its surroundings they help ship it ahead a cog at each speech. It is the people that make a town, so let us all boost Athens and watch the

Since our coming to Athens to reside the first thing coming under our observation as lacking in the town was street lighting, and about which we have listened to considerable talk. Having previously had considerable correspondence with the Hydro-Electric Commission re lighting, and being aware of its benefits for light and power, we took upon ourselves the responsibility of writing the Commission with regard to Athens obtaining light and to which we received a suitable reply. We turned the correspondence over to Reeve Holmes for his consider ation. While we believe that the council has taken some action in the matter still we have not been apprised of what nature by the minutes of the board, but we believe that they are negotiating with the Commission for securing electric lighting for the municipality of Athens, and should their efforts be successful, the people of this place will long remember the Athens council board for the year 1915. This

is another phase of the game where if the people work together we can have electric lights and power for our town. Will you help us?

From Canford, Nicola, Valley, B.C.

Editor of Athens, Reporter Dear Sir—Enlosed herein find one dollar o cover subscription of Athens Reporter. to cover subscription of Athens Reporter. I am a former Athenian and enjoy the Reporter. I usually state something about our locality when writing, and might say that our crops are first-class this season. Haying has begun and promises "good." Mr and Mrs John Watson, both of Athens, are enjoying a holiday here with us. Both are in love with our climate and the scenery of the with our climate and the scenery of the mountains and valley. A Mid-Summer Bee-Meeting

The fourth annual mid-summe meeting of the Leeds and Grenville Bee-keepers Association was held on July 3rd at the home of M, B Holmes, Athens,

This meeting took the form of a basket picnic and field day with lec tures and exemplification of actual work among the bees, also with desthe remedies therefor.

The morning opened cloudy and threatening but the committee pro ceeded with the erection of tables and decorations as if fully confident of favorable weather and it cleared in fine form at 10.30 o'clock.

The lecturer of the day Mr H. H. Selwyn of Ottawa arrived on the grounds at 10 a. m. and from that hour till the close of the day there was something doing all the time.

The grounds with the wide-spreading maples and a number flags and color effects had rather a charming appearance, while the well-spread tables with liberal flower decorations combined to show the interest which the beekeepers take in this annual event. The Association motto, "Keep Better Fees, Keep Bees Betwas, of course specially promin-

Arrivals continued from various parts of the counties until between sixty and seventy had signed the register and sat down to dinner.

Following the afternoon program of lectures, music and singing, the committee of ladies in charge of the tables again gave an exemplification of fourth degree work by a call to supper after which the usual votes of thanks were passed and the company

The deceased, who was superannuated a few years ago, had for more than 30 ford 1, Knapp 1, McLean 1. years filled the position of landing waiter at the Prescott-Ogdensburg ferry here, and was very well known on both sides of the St. Lawrence, especially by the travelling public.

Change for Post Cards

The Post Office Department has announced a modification of the war stamp tax on post cards. In future, souvenir post cards bearing only pictures and printed matter will be accepted by the post office at the old rate of one cent. If a communication, writ ten on the same side as the address is limited to five words, including the signature, no extra stamp wil! be necessary, but if the message is over five words then an extra stamp must be affixed, otherwise the will go to the dead letter office. vertising, if printed on post cards, will be accepted as second class matter and only one stamp will be necessary. The text of the advertisement must be wholly in print and on the opposite side of the card than the address. When the war tax order went into effect there were no conditions named in the official communication from Ottawa.

Some Merchants Learn too Late

A number of people have been around the country of late taking grocers would let the people know about the prices of their goods through do by flooding the country with price lists, catalogues, etc., there would not ing merchants. The advertisers who the schedule game on Saturday last. put their goods before the people and goal. A handsome sum was realized. Elgin and Perth played at Chaffey's keep them there are the ones who sell Locks, the game unfinished, ended in a the goods. They say, when too late: ful. "I could have duplicated that hill of goods," but they should let the farmer who sends away and buys advertised goods off a foreign merchant know it before he buys. That's the business of it .- Swift Current Herald.

Claims His Wife's Affections Strayed

Claiming \$5,000 damages for alleged criminal conversation and alienation of his wife's affections, Philias Gignac has issued a writ against Gilbert Emard criptive reference to bee-diseases and of Embrun. The writ has been filed at the court house by Mr Gignac's counsel, Mr M. J. Gorman.

Athens Wins a Close Game

The best baseball game played on the athletic field this year took place Thursday night when the Jasper team was defeated by the Athens boys by a score of 5--4.

The game was announced for 4 but as the visitors did not arrive till late in the afternoon the start was not made till about 6.30. By mutual agreement, a seven inning game was

Mills pitched a wonderful game for Jasper and had execellent support. The team had not been defeated hitherto, Smith's Falls even being van quished by Mills' speed and the teams

snappy fielding.

McLeau for Athens proved very hard to, hit after the first inning. Jasper sent three men around in the first and one in the second. In the forth Greenwood got as far as second base and bates in the seventh reached third. Mills, Elliott and O'Neill the only men up in the third inning

fanned completely.

Athens worked hard to get men around and one in the fifth and three in the sixth wandered back to home

It is regrettable that the Jasper over their defeat refusing to give the 7.30 instead of 7 p. m. Mr John Lee, turnkey of Lanark Athens team their bat in the seventh Mr D. M. Clark has resigned his to the agreement made before the

> By the time the score had reached the banks and braes of Irish Creek, it had been distorted into a 6-5 score in Jasper's favor and ultimately found its way into the columns of the Brockville' Recorder. Athens stands for clean baseball, and every defeat this season has been taken cheerfully but the Athens Boseball Club wants recog nition of its victories as well as defeats

LESSON III.

July 18, 1915.-Solomon Chooses Wis dom .-- 1 Kings 3: 4-15.

Commentary.—I. Solomon's sacrifice (v. 4). 4. To Gibeon-Gibeon was five six miles northwest of Jerusa and was a sacred place because the tabernacle and brazen altar were there (2. Chron. 1: 3, 5). The great high place—Idolatrous nations chose hilltops as places for their religious cere monies, perhaps from the supposition that such elevations were nearer their gods. Israel had not yet built the house of the Lord, and they were worshipping Jehovah in high places (1 Kings 8: 2, 3). Gibeon was the most sacred place at that time in all Israel. A thousand burnt offerings—This was a great religious gathering. Multitudes of Israelites went to Gibeon with Solomon to engage in the public worship of the Lord. A small portion only of the slaughtered animal was consumed as a burnt-offering to the Lord, and the a burnt-offering to the Lord, and the remaining portions were eaten by the priests and distributed among the worshippers. Many priests must have been engaged in sacrificing the animals, and there can be no doubt that the people entered heartily into the worship there offered to the Lord. "In 2 Chron 1.2 " we are the lord." 2 Chron. 1: 2, 3 we are told a little more about this sacrifice. The king had consulted all the people, and the great officers, and went up in a solemn procession with all the people, and the great officers, and went up in a solemn procession with all the congregation. This accounts for the abundance of the offerings. After this occasion we hear no more of sacrifices at Gibeon."-

Lumby.

II. The Lord's offer (v. 5). 5. The Lord appeared to Solomon in a dream

There are many instances in the
scriptures of the Lord's appearing to individuals in dreams to communicate to them a knowledge of His will. Such dreams are to be carefully distinguished from ordinary dreams, for the ordinary dream has no significance. It can reasonably be supposed that Solo-mon realized the weight of the responsibility that was upon him as king of Israel, and his prayer had been that the Lord would grant him the needed help to meet that responsibility. Ask what I shall give thee—The offer made by the Lord to the youthful king was omprehensive and unlimited. Lord, in this statement, laid His resources at Solomon's disposal. All that the human heart could rightfully desire is included. It is easy to imagine what multitudes would choose if they were given such a privilege. The Lord knew what was in Solomon's heart when He laid open His resources to

him.
III. Solomon's choice (vs. 6-9). 6. Solomon said—He said this in his dream. Hast showed ... great mercy—Solomon prefaced his choice with humble acknowledgments to God for mercies bestowed, and a confession of his own inability to fill position in which he had placed him. The Lord had shown great mercy to David throughout his eventful career. In uprightness of heart—David's course for the most part was right, and for the sins into which he fell, he had deeply and fully repented. Hast given him a son to sit on his throne David had several sons in all, but the Lord definitely declared that his son Solomon should be king. 7. I am but a little child—Solomon was probably about twenty years of age at this time. He was a man grown, yet he realized that in experience in great affairs he was but a child. In this frame of mind he could accept of the wisdom that God would directly or indirectly impart, and his sense of the need of assistance was evidence of his fitness to rule. To go out or come in the matter to be called upon to govern -In these words the king declared to the Lord that he did not know how to conduct the affairs of the kingdom. Thou hast chosen-God had chosen Abraham, and the people of large were his descendants. That cannot be numbered—Israel had come to be a great nation. According to David's numbering there were 1,300,000 men of war (2 Sam. 24: 9), and upon that basis there were possibly 6,000,000 inhabitants of Israel. 9. An understand ing heart-This was a noble choice. It was unselfish. He might have chosen popularity, wealth, vast dominion or long life, but he left himself out of the consideration to the extent that he chose for the highest welfare of his subjects. To judge people-The Oriental mind always associates the functions of the judge with the monarch, as he is expected to hear and decide important cases .- Whedon. IV. Gifts bestowed (vs. 10-15).

The speech pleased the Lord— The Lord was pleased with the nobility, sincerity, unselfishness and devotion to Israel, expressed in Solomon's re-This opened the way for Lord to bestow the best gift and to supplement it with other desirable gifts. 11. Hast not asked for thyself etc.-Solomon, in his simplicity, had clear understanding of values and this understanding the Lord quickly The Lord made plain recognized. what things human ngs human nature prized To discern judgment— The ability to hear causes, to weigh evi and to render just judgment have done according to thy words-Solomon's request was granted. I have given thee a wise heart—God gave him ability to know and to This wisdom was both supernatural and natural We know Solomon studied and searched and thus stored up knowledge as others do, but the Lord gave him a breadth of comprehension and an in-sight that he did not possess before eventful night. None like thee -Read 1 Kings 4; 29-34 for a state ment regarding Solomon's grasp of

. That which thou hast not asked -He had asked for something that would be of the greatest advantage to others, and the Lord gave him those things that would be desirable for himself. There is a lesson in what not to pray for, as well as in

The words what to pray for. s choice and what came of it. hes and honor— Solomon's Both riches and honor— Solomon's was a magnificent reign. 14. If thou wilt walk in my ways—God gave pro-mise of long life to the king, but it mise of long life to the sing, but a was conditional. The sacred historian had to record the painful fact later, that Solomon was drawn away from the service of the true God to a great extent by the associations he formed. What might Solomon had been, had he followed the Lord all his days! Lengthen thy days—He falled to meet the conditions and only lived about sixty years. 15. It was a dream—Even though it was a dream It was a divine communication to Solomon. The choice the king ex-pressed in his dream, was the choice of his waking heart. Wisdom was Solomon. his to rule Israel wisely, and riches and honor were in store for him. Stood before the ark of the covenant David had brought the ark to Jerusalem in the early part of his reign.

QUESTIONS.— At about what age

did Solomon begin to reign? Where did he go to sacrifice? How great a sacrifice did he make? Who went with him? What did the Lord tell him to ask? What choice did Solomon express? What reasons did he give for melting the reserve where give for making this request? What did the Lord say to Solomon? What promises did the Lord make to Solo-What is the source of wis-

PRACTICAL SURVEY.

Topic.—A Prayer for Wisdom.

I. Based on personal need.

II. Made on behalf of others. I. Based on personal need. The cosson before us is the record of a dream which Solomon had at Gibeon celebrated place in Old Testament history. It reveals what then agitated and filled his soul. It affords evidence of the genuine theocratic spirit in which the son of David had been edu-The young king seemed overcated. whelmed with a sense of responsibil ity. He was about to succeed a father who had been renowned as a warrior a statesman and a ruler of men. He was about to reign over a numerous and prosperous people. The dream seemed to be according to the measure of his capacity. His great soul took within the ample range of its conception the whole Jewish nation, the eternal Ruler of the universe and the overlasting principles of moral obligation. The divine communication at the beginning of the dream was Solomon's authority to pray according to the strongest desires of his heart. His deminant thought from which spontaneously sprang his prayer, was that of the immensity of his task and his incapacity to perform it. He foresaw that there would be snares not easy to avoid, difficulties hard to surmount. He dared not go forth without answered prayer. He recognized that God had made him king, but so far as wisdom and ability were concerned he was still a child. When God came to him with so great an offer, the first thing that came to Solomon's mind was the image and memory, the life and character of his father. His record was a guide to a right choice. He referred to what God had done for his father as an example and pledge of what he could do for him. It was not presumptuous for Solomon to take

God at his word. It was not his own

merit that gave him courage to pray

grace which his father had so richly experienced. His reference to former

histories in the household and the

realm gave ovidence that he was alert

and thoughtful. Solomon considered

his youth and inexperience. His prayer

was short, but it expressed living.

childlike faith, simple and substantial,

heartfelt and true. His choice was

as he did, but the divine mercy and

an act of judgment, a decision of his will.
II. Made in behalf of others. Solo mon felt that, to take the place of his father and direct the destinies of Israel, he needed that wisdom which so important a nation as Israel knew that without God's guiding spirit he could not do it successfully He therefore chose wisdom and knowl dge to qualify himself for the task Higher wisdom was needed for higher work, for guiding and governing a nation. Solomon had a lofty ideal of kingly rule before him. He wished to rule God's people well for their own good, and the glory of their supreme ruler. His prayer that he might be just in judgment and equitable in law. His prayer displayed a deep interest in the welfare of his subjects. was well pleased because Solomon chose what would enable him to be serviceable to others. His choice serviceable to others. His choice marked a new epoch. Before his time, all kingly power was marked by standing armles, by riches and pomp. Under his reign was demonstrated for the conquests of nations and men. The prayer of his dream was answered in his actual history. That Solomon "loved the Lord" was the best and prayer of his dream was answered in his actual history. That Solomon "loved the Lord" was the best and greatest thing that could be said about him. When God put the character test upon him he revealed the truth of his own relation to God, and his certified towards. his attitude toward men. His was the everent prayer of a royal petitioner. was characterized by gratitude solempity, hopefulness and humility Spiritual interests were supreme. Spiritual motives were predominant. The faithfulness of God was his stimulus to prayer . In David's dying charge to

ICE CRÉAM

IS A FOOD

VALUABLE food if it's pure. City Dairy Ice Cream is made of the purest ingredients, in a new sanitary building. We ship thousands of gallons to all parts of Ontario. The size of our business enables us to employ experts and the most up-to-date methods and equipment.

Keen business men reduce their meat diet during the summer and consume more foods such as Ice Cream. Everybody can do so with benefit to their health.

Solomon he reminded him of God's words, "If thy children take heed." Solomon made that declaration the basis of his plea with God in his prayer for personal enlightenment for the sake of God's people. Solomon's choice of the best gifts proved him worthy of lesser gifts. God's benefi-cence exceeded his requests. T. R. A

BUDDING IN THE ORCHARD. The most important reason for

which budding and grafting are practiced is perhaps the fact that most of our fruits do not come true to type from seed, and will not grow readily from cuttings. Also many trees have poor root systems and are not adapted to the existing soil and climatic conditions. This can someother stock which is of more hardy character. For example, plum trees on peach roots grow better in sandy than when on plum roots, and the peach does better in heavy soil growing on plum roots.

Budding is the operation of removing a bud from one plant and placing it upon another in such a way that it will continue to grow. No amount of skill will make it grow unless the two plants are more or less closely related. The stone fruits— peach, related. The stone fruits— peach, plum, cherry and apricot — may be successfully budded upon each other.
This is also true of the pome fruits apple, pear and quince-or any other similar group of plants. A stone fruit cannot be successfully budded upon a pome fruit, or a pome fruit upon a stone fruit. An apple bud on apple stock are more apt to grow than if placed upon either pear or quince stock, and the corresponding relation holds true with all other groups of plants. The more closely elated the plants the more successful will be the operation.

The operation can be performed in either the spring or late summer. If one desires to bud in the spring, the twigs from which the buds are to be taken should be cut in early winter and stored in moist and in a cool place until growth has started in the trees. They should be of good, healthy growth and from 1-4 to 1-2 of an inch in diameter. The tree is in proper condition for spring budding as soon as the buds have started growth and the bark slips readily.

Summer budding is performed only after the new buds and branches have become well developed. Only those buds near the base of the shoot, which have formed in the early part of the season, and which are more fully matured, are used.

For spring work buds which have

formed the preceding summer, and for fall work buds which have formed earlier in the same growing season should be used. They will also grow best when placed upon the corresponding season's growth, although t may be placed upon older wood. If an old tree is to be budded it should be heavily pruned in the winter. The following spring a number of new growths will start from the trunk and branches. Of these the desirable branches. Of these the desirable ones can be budged tra fall, or call the following with most be left until the following Clevela > Plain Dealer.

spring. Spring budding can be practiced on the apple, and trees of similar character, which do not bear fruit buds on the current season's growth; that is, fruit buds form in the fall on the wood which formed in the summer months. For this reason budding on fruits of this character is always better in the fall.

A sharp, thin-bladed knife of good metal should be used. Special knives with a curved cutting edge at the end can be obtained from the seed-man or supply houses. In seedlings the bud should be placed about six inches from the surface to remove it somewhat from the excessive heat near the surface caused by the reflec-tion of the sun's rays. It is often set on the north side of the trees, as this side is least exposed to the sunlight and drying. The wound to receive the bud is made by two incisions in the form of a T. The first cut is made with the grain of the wood. about one and a half inches in length The second is made across the grain of the wood, at the top of the first one, with a locking motion of the the bark The corners then loosened with the blade of knife and the stock is ready for the bud. The bud is cut from a twig with a shield shaped piece of bark about an inch in length and one-quarter of an inch in width. Hold the twig with the base from you, and, starting about half an inch below the bud, cut toward The cut will be from one-sixyou. teenth to one-eighth of an inch at its deepest point, which is directly beneath the bud. A portion of the wood is removed with the bud. Now insert the buil, pushing it well down into the cut. No portion of the piece to which the bud is attached should be left projecting beyond the cleft, and the lips of the bark should be fitted snugly around the bud itself. Buds always occur just above a leaf. If. however, the leaf is cut off with the knife, leaving a portion of the leaf stalk, the stub will serve as a handle to the bud and aid materially in placing it. Be sure that the bud points as it may not grow if not placed The bud should not be wrapped

correctly. firmly in place. No wax is needed. A piece of raffia about twelve inches in length is the best material for wrap-ping. This protects the bud as well as holds it firmly in place. Do not wrap over the bud itself, but above and below it. It raffia is not availatle, any soft cord or cloth may be In from two to three weeks used. tile bud should have unted and the ticing material should then be removed, as if left longer it will conthe stem and perhaps strangle the bud. If 'the' operation has been successful the branch should be cut off one-half inch or so above the bud to force the growth of the bud.

trees budding is seldom practised for commercial purposes. Such short-lived and early-bearing trees as the peach are generally, replaced if undesirable. Trees on which rule grafted instead of budded.

A teacher in a Woodland avenue school asked the other day many kinds of flowers are day: "ho" are there?" Three pupils held up their hands. She chose one to reply. "Well, Isidore, how Three pupils need up their disdore, how chose one to reply. "Well, Isidore, how many kinds of flowers are there?" "Three, teacher." "Indeed? And what they?" "Wild, tame an collie."—

THE POULTRY WORLD

•••••••

MASHES FOR THE CHICKS.

Chicks grow rapidly when fed or noist mashes, but the digestive system does not develop proportionately and with too much soft food they often break down. The tendency of poultry keepers generally is to take one or other consistency in cases like this, and because of that many who find certain unfavorable results with the use of moist mash do away with it entirely, either substituting dry mash or using no ground grain, says Farm Poultry. When this is done, special attention should be given to providing cculent food.

The best feeding practice is to atler nate mash and grain, and it is a good plan even when a moist mash is used to have a little dry mash where chicks get it when they want it. They car get it when they want it. They will eat more when the food provided them is in a variety of forms, and the more you can get them to eat of suitable rations, the better they will grow. Up to the limit of its capacity grow. Up to the limit of its capacity the digestive power increases with use and suitable food. One of the best ways to feed eggs to chicks is to take raw infertile eggs and mix up, shell and all, with as much cornmeal or cornmeal and shorts as can be mixed with the egg with a stiff spoon. Don't feed this heavily, but give what they will clean up quick once a day. Stale bread, soaked in warm water, just enough to saturate it, and then stirred thick with cornmeal and a little fine beef scrap, is another mash much relished by chicks.

Such things can be prepared in a nicment. No one need worry about such irregular dishes disturbing the "balance" of the ration. They give the variety that it acceptable to all creatures. It is a hard matter to sericusiy "unbalance" a ration by the use of any occasional meal, even of an article far from the general ratio, and the articles mentioned and others that people may prepare from waste foods they happen to have are not very far from the common ratio.

FEED CHICKS LIGHTLY.

Many chicks die from being overfed. The little chick is a fairly hardy creature when normally healthy, but if it is not fed carefully its digestive system is upset readily and death often results. Do not feed the chick until it is thirty-six hours old, for it canno digest the grain which you give it in addition to the yolk sac which is usually not completely absorbed at the time of hatching. A good practice is to feed a little at a time, but feed frequently. The more often chicks are fed each day the less danger there is of overfeeding. When the chicks are quite young they should be fed five times every day. When they get to be about six weeks old then they could be fed three or four times every day. Wet, sloppy food should be avoided always. Give the chicks dry cracked grain or dry mashes. The mashes, which are usually made of wheat, bran, cornmeal, crushed oats middlings and beef scraps, are mixed thoroughly and moistened with water or better still, with sour skim milk. If this mixture is dry fed it is given in self-feeding hoppers. If fed wet it is given in troughs. See that it is just slightly moistened, as foods which are too wet do not agree with chicks.

Do not feed too much hard boiled

eggs at the start, as the chicks cannot digest it readily.

If you have sour skim milk available give it to the chicks all of the time, as it is one of the best chick feeds.

Feed in such a way that the chicks will take plenty of exercise all of the time, as it is one of our best chick feeds. Feed often, and feed other feeds.—M. A. Jull, in Prairie, Farm and Home.

SEPARATE THE SEXES. Cockerels and pullets should be separated as soon as they can be distinguished, which in most cases will when the chicks are five to eight weeks old. Keep the young males yarded together, so that they peedily fattened for market, but give he pullets as much range as possible This will give them the constitutional vigor necessary for heavy egg production next fall and winter. Males which it is desired to keep for breeding pur poses may be separated from the others a little later, when their character, istics and quality may be better judged.

POULTRY TALK.

A wild hen in a flock is always a disturbing element. A turkey hen desires to be let se-verely alone during the laying season; she is very apt to change her

when being watched.

For each day there is come timely work in the poultry yard, which will give better returns than at any other

Look on the underside of the ner ches where they rest upon the sup-ports, for the red mites, the parasites to be most feared by the poultry raiser. Get after these torments with a spray pump and some good lice-killer, for the sake of profit if not for Lu-

mane reasons.

When the mother hens and their chicks must be shut up on a damp day, give them chaff from the barn floor to scratch in. The small timothy seed they get out of the chaff seems to agree with them; they don't need much other food.

The chicks that live are the chicks that pay, the eternal vigilance is required to keep many of them living. Be on the watch. Many a chick is caught in a storm at this season, and chilled to death.

Always remember that a warm sun ny morning is the best time to apply the grease remedy to a lot of lousy chicks. It is bad for the chicks grease them when it is cold and wet. But if too liberal with grease at any time, you will kill the chicks as well as the lice.

GAVE UP TEETH TO ENLIST.

London Ont., Report.-After ten unsuccessful attempts to enlist for overseas service, Charles H. Fletcher a young Englishman from Stratford has been finally accepted. Turned dgwn ten times, six of them in Tor-onto, because of defective teeth. Fletcher has had six teeth extracted and 14 artificial ones put in, thereby coming up to requirements. H 17 relatives on the firing line.

A GIFT OF A SOUL

again, after the unrestraint of so many months, in close fitting waistmany months, in close litting waistcoat and coat, he gave a sigh. It
seemed to him that he ceased to be
the free and active Pierre Laurier
who had worked so joyfully ten hours
a day in the open air, inhaling the invigorating odors of juniper
and fir-tree, and that he became once
more the Pierra Laurier of the past. more the Pierre Laurier of the past cursing his art and despairing of future, spent his hours between the boudoir of a coquette and the gambling saloon of the club. He raised his eyes. Night was fall-

ing, but behind the chestnut groves bathing in its pallid light the frowning rocks, the moon shone, like a silver crescent in the sky. The forest breeze, warm and fragrant, passed over the young man's brow, soft as the cares-sing touch of a wing. He looked at the sea, which rolled, profound and calm, at his feet, and murmured "You may bear me away. I fear neither you nor those from whom you separate me. His transitory discontent passed away, and at this moment, when he was about to take the supreme step that was to decide his fate, he found himself master of his thoughts and of his feelings.

No emotion stirred his heart at the thought of the woman he had so pas-sionately loved. He dared to evoke her image. He saw her with her low brow crowned with its raven tresses; her beautiful eyes with their long lashes, her intoxicating glance,—but he remained indifferent and disdainful. He loved her no longer, all was over; the charm had ceased; the philter was powerless. He had recovered ession of himself, and his heart, freed from its bondage, was once more worthy of a good woman's acceptance. And tears of emotion came to Laurier's eyes. His trembling lips murmured a confession of love,

his whole being reached through space toward the adored object. On the following day at nine o'clock the boat sailed. Pierre again saw the beside which the Saint Laurent lay at anchor, while he was painting its figurehead of carved wood, the mole, the bastion of the Dragon, and, in succession, Cape Corso, Giraglia, and the Italian coast. On board the boat, which sailed rapidly, he re-traced the route taken by the little

smuggling vessel. As they drew nearer the French coast he asked himself with growing uneasiness what could be the cause of Davidoff's hasty summons. A vague disquietude took possession of him, and he began to fear that some misfortune had happened. To whom? The words of the letter written to him at Torrevecchio by the doctor recurred to him: "The report that you had been drowned ,came very near causing the death of one closely connected with Jacques." These words had changed erything in his life. Was this person Juliette, and was she now in danger Should he arrive only in time to see in whom his only hope now lav. expire: But the letter contained these words also: "You passed close to happiness without knowing it, but there time for you to regain it."
his happiness going to eshim anew? Was it not procape him anew? hable that this young girl, who was so beautiful, was loved, and that another, faring his absence, had succeeded in taring the wound her heart had re-

A profound sadness took possession Pierre, at the thought that this last ow upon which he had staked his piness should lose. A feeling of atal lassitude overpowered him, and be longed for some means of cor-

When he found himself dressed responding with Davidoff. He stretch-gain, after the unrestraint of so any months, in close fitting waist-out and coat, he gave a sigh. It batross its swift wings as it sailed in its melancholy flight through the its melancholy flight through the blue air. He walked the deck nervously, as if his impatience could lend added speed to the motion of the ves-

> He could not sleep, and he remained on deck, his gaze fixed on the horizon. They passed in succession Genoa, Monaco, Nice, Antibes, and Toulon; sailing along this enchanting coast, bordered down to the water's edge with gardens on whose sands of gold the waves die languourously away. His heart beat quickly as he saw the Chateau d'If looming darkly in the distance, its lights gleaming through the night like eyes looking into immensity. He had but little baggage and on arriving at Marseilles he gav it to a street porter, and crossing the gangway, hastily took a carriage and drove to the railway station. He passed not an instant; his only thought was to reach his destination as roon as possible. The express was to leave at half-past eleven, and he had still an hour at his disposal. He went to the telegraph office and sent the following despatch to Davidoff: "Arrived in Marseilles; will be in Faris to-morrow evening at six."

> When he saw the message pass from the hands of the clerk to these of the operator he felt a sense of relief, as if ome part of himself had already zone on in advance. He went to the restaurant, where he breakfasted, though without an appetite, to kill time. The gates being at last opened train ready to tsart, he installed himself in a compartment and gave him-self up with a new sense of delight to the pleasure of being rapidly berne through space. Burled in a corner of the carriage, his eyes closed although he was not asleep, he remained me tionless, counting as they passed them the stations which still separated him from the end of his journey, as a prioner counts on the calendar the which still separate him from liberty

Toward dawn, however, he grew ex hausted and fell into a doze. For two days and nights he had not slept. When he awoke he caw with delight that he had gained upon time during his sleep, for it was broad daylight, and the train was approaching Macon. Before him, bathed in sunshine Before him, bathed in sunshine, stretched on either hand the rich and emiling fields of Burgundy. P felt as if he had almost reached Pierre journey's end. He found himself again in the midst of scenery which, for a year, he had not seen. No longer reddish rocks and foaming torrents; no longer shepherds armed with guns watching from some eminence with a proud and serious air their scanty flock or their unruly goats at pasture. Instead he saw peasants, at once stout and active, guiding the plow, drawn by large white oxen, yoked in pairs, along the brown furrows; fields covercd with crops, vines bending under their load of grapes, forests of a vivid green traversed by grassy paths lead-

grandeur of Corsica.

Space fled before him; the train passed swiftly by hillsides, valleys and rivers, and Pierre gave himself up more and more to his own thoughts. He fell into an uneasy reverie, in which he asked himself with a vain persistence what it was that arn the truth. On board the ie was consumed by impatience in the truth. On board the vestits keel cleaved the blue waters and Melux. Passing the fortifications he stood up preparing already to leave

ing into cool, green glades. It was the severe beauty of the central pro-vinces of France, not the soft and rad-

iant beauty of Provence or the wild

the train. At last the engine, whistling shrilly, slowed up, the turnplate sounded, and the train stopped at the station.

Pierre, standing on the platform ready to leave the train, leaped to the ground and was caught in the embrace of two strong arms. He raised his eyes, recognized Davidoff, uttered cry of joy, and, pressing in his turn the hand of his faithful friend, drew

him aside.
"Well?" he cried, putting all his engerness into this one question.
"Calm yourself," said the Russian,
who understood Laurier's anxiety.

Juliette is in no present danger." Pierre breathed a profound sigh as if his heart had been relieved from a

heavy weight.
"And Jacques?" he asked. "Ah! Jacques!" responded Day off.
"At is he, more than any one else, who gives me cause for uneasiness. But let is not remain here. We are attracting

He put his arm through the painter's and drew him away through the crowd now hurrying out of the sta-

tion.
"What luggage have you?" he asked. "This valise and a box which is in

"Come, we will have the trunk taken to the hotel. For you must accompany me. I shall not leave you. Instead of waiting for you as I had said I would in my despatch, I preferred coming to meet you. I feared some in-discretion on your part. Do you know that if Mlle. de Vignes were to see you appear suddenly before her the shock might prove fatal to her in her present condition?'

They drove along the boulevard conversing together, and Laurier was too confused to take in fully all there was to see and hear. The bustle Paris, after leaving the train in wh for twenty hours he had been shaken, succeeding the profound calm and re-tirement of his life at Torrevecchio, fevered his brain, dazzled his eyes and deafened his ears. He was obliged to make an effort in order to listen to and understand Davidoff. He felt weary in body and over-excited in

'My journey has tired me greatly," he said, "and yet I feel that I cannot

You have been living for the past three days on your nerves," returned the doctor. "I am going to set you right again. Trust to me. If I never had patients more difficult to cure than you-

The carriage rolled into the court-yard of the Grand Hotel. They alighted, and followed by a boy carrying Laurier's valise ascended to Davidoff's arartment. Laurier's chamber was separated from the Russian's by a parlor. Left alone they examined each other silently for an instant; then the doctor, pointing out a seat to his friend said:

down; we will dine here and talk at the same time, and if you are reasonable I may do something for

You this very evening."

Pierre's eyes lighted up. "What?"
he asked. "Will you permit me to see

Davidoff laughed.

"You are at least frank," he said.
To see her! It seems, then, she is To see only subject you and I have to about! Well, you are right, and talk about! it was of her I was going to speak. Since the beginning of the week I have been here, and I have gradually accustomed her to the thought of your reappearance. In the depths of her heart she has mourned you as dead for many months past. From the first words spoken by me, casting the shadow of a doubt on your death, she has revived, but in a manner to terrify her mother and myself. A violent fevr has taken possession of her. Her weakness was so great! She has been fading slowly ever since your disappearance, growing paler and paler ev-ery day, like a flower cankered at the heart. As to her brother-but it is

better to speak only of her."
"Is the news you have to give me of Jacques, then, so painful?"

"Heart-breaking, morally and physically. This week, spurred on by an imperious need for money, he put for sale the property belonging jointly to his mother, his sister and himself. The remonstrances of the notary and the entreaties of Mme. de Vignes were alike useless. He desires to realize the money, no matter at what cost, without troubling himself about the loss that must result from this hasty sale. He is insane, and his insanity has taken a dangerous form."

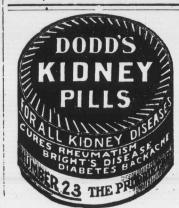

"And who or what has been cause of this insanity?" asked Pierre
"Love. A woman has been the ruin of this unhappy man, whose mor-

al nature was never strong."
"And is this woman so fascinating that he cannot be turned away her; has she so powerful an influence over him that he cannot be torn from

"She is the most fascinating, most dangerous of women. If I were

to name her to you-At these words Pierre turned pale; he looked eagerly at Davidoff, the name upon his lips which he divined the doctor was about to pronounce when the latter, smiling bitterly and looking at the painter as if he would pierce the inmost recesses of his soul

'Ah, you have understood me. Yes it is into the hands of Clemence that Jacques has fallen. She loved him ardently, he loved her in return—well, as men love her. At the end of six months she has grown cold as and he is more in love than ever.

why should I seek to describe the conaition of his mind to you? To under stand it you have only to recall your own feelings."

Laurier remained silent and mo-tionless, his head sunk upon his breast, and the Russian resumed with

"He adores her, do you understand He lives only for her. The painter raised his head and ex-claimed in compassionate accents:

"Unhappy man! For such a woman to have given up everything, to have forgotten every duty! But he is to be ritied rather than blamed; she has such dangerous power."

At these words Davidoff's counter

ance cleared up; his eyes sparkled with joy; he went to his friend, and with affected irony, said: "So, then, there is no feeling in your

heart for Jacques but one of pity."
"And what other feeling should have for him?" answered Pierre. "Ought I to blame nim after showing myself weaker and more culpable than he. No, I can only pity him!"
Davidoff took Pierre's hand in his

and shook it vigorously. "And you feel no thrill of emotion at the recollection of the old love, no

return of your former tenderness, no feeling of anger against your friend?"

"So this is what you feared?" said Laurier, a flush mounting to his pale face. "You doubted that I was completely cured of my insensate passion, and you wished to put me to the proof? Oh, do not be afraid; speak

"Yes," returned Davidoff, with firmness. "I desired to know whether unconsciously-

"Ah!" cried Pierre, "question me then, lock into the secret recesses of my heart. You will find there no other feeling than one of bitter regret for my folly and the ardent desire to atone for it. If I had not judged myself worthy of a pure affection and capable of responding to it by a constant love, you would never have seen me again. Fear nothing on my account, Davideff. The Pierre Laurter me again. you know is dead-killed on a tempestuous night, and the man you see before you, though he has the same features, fortunately has not the same

That's right," cried Davideff, gayly. 'Ah, a heavy weight has been re-moved from my conscience. If I had not been able to count upon you with certainty I do not know how I could have carried through my undertaking It is surrounded on all sides by difficulties and anxieties. It will be necessary for you to meet Clemence—'

"If it is absolutely necessary," re turned Pierre, "I will make the effort, but I shall do it with great reluc-

No doubt it will be with greater reluctance than in former days," answered the Russian with a smile. "But we must try and save Jacques from her clutches, and nothing less than your intervention will enable us to succeed. Let us leave that for the futare, however, and eccupy ourselves with the present. Let us speak of Mile. de Vignes."

Pierre's brow cleared. At this moment dinner was served, and the two friends seated themselves at table and spent the next hour in exchanging confidence.

Pierre gave an account of his so journ at Torrevecchic to the doctor, and the latter recounted to the doctor, all that had taken place during his absence. In this way they were able to arrive at the conviction, Davidoff that Laurier was, as he affirmed, radically cured of his fatal passion, and Laurier that Davideff, in recalling him as hastily as he had done as much wisdom as decision. Toward nine o'clock they left the notel and set out for the house of Mme. de Tignes. In the boulevard, in the mild air of the summer night, Fierre felt his heart swell with joy and hone his eyes to heaven with a feeling of repentance at having so insanely de-

spaired of happiness.

During the past few days Alme de Vignes, forewarned by Davidoff, had seen the future, which had appeared to ler so dark, lighted up by 1 ray of hope. The certainty Pierre Laurier lived, the positive-ness with which Davidoff af-firmed that the painter loved Juliette, and loved only her, had given the midst of the misfortunes which overwhelmed her, with everything to ear from her son, and everything fear for her daughter, the possibility of seeing Julitte once more restored to health and tranquility was a source of sweet satisfaction to her. What tinder. Fires that break out in the were pecuniary cares compared to the inipa districts always gain great head-anxieties caused by her daughter's in- way before any kind of an alarm can creasing weakness and dejection? Davidoff had been welcomed as a savior. Communicating his news to Juliette with wise precaution, he had

planted at first a seed of hope in her mind which had found fertile soil. By degrees the seed cast roots which spread vigorously; and now the flower ready to bloom, awaited only a last ray of sunshine. Since the beginning of the week Juliette, without any further plausible reason than the ardent desire to see the miracle she hoped for wrought, had become convinced that Pierre

"on dit" of Davidoff had been seized on with avidity by this young heart. Why should not Pierre have been rescued from the waves, as was said, and taken on board a passing trading vessel bound for Corsica, where he had been seen by persons who declared they had recognized What was there strange in his him? remaining all these months hidden from his friends, ashamed perhaps of not having carried into effect the cidal purpose which he had announced? And was it not natural that he should leave the de Vignes in ignorance of his being alive? All this was admissible. And the young girl was so eager to believe it that she would

have thought still stranger things

(To be continued.) EAR DRUMS AND DROWNING.

Why Good Swimmers May Meet Sudden Death in the Water.

Sudden death of swimmers has never been explained satisfactorily, but it is generally assumed that it is due to cramps that affect the respiratory muscles. The Medical Record says there is another theory that "has never received the attention which it This is that cold water pen merits. etrating the ear sets up an irritation in the delicate passages of the inner ear. It cites an address delivered by Dr. Guettich before the Berlin Otolog-ical Society, in which he revived this theory.

irritation of the labyrinth the inner ear by cold water might cause sudden paralysis, just as a shock to it through a sharp blow on the chin will cause a "knockout." The symptoms of the smimmer and the fighter are similar. They can make notions, but cannot direct them; they may become temporarily unconscious. In the case of the swimmer, of course, drowning follows unless some one

The Med. Record says that person with perforated ear drums are those chiefly menaced by this accident, although it may occur to others. And this in spite of the fact that children with large perforations of the ear drum often swim and dive with im-

THE C. P. R. AND RUSSIA

The traffic arrangement by which the C. P. R. will represent the Russian Government in providing for through freight services from the Dominion to Russia by the Trans-Siberian Railway and the Russian Volun-teer Fleet, which is an auxiliary of the railway, is an amplification of the connection which the company has sustained with the Trans-Siberian Railway, which is a state-owned system The Company has offices in Moscow and Petrograd in which it does business, the only railway on this continent to have such offices in Russia. If it would seem strange that the Com-pany should do business in either city, it need only be mentioned that the C. P. R. is the only railway in America which is a member of the Round the World Conference of which the executive of the Trans-Siberian line, which the average Russian always calls the "Transcontinental" line—this being the notion the system conveys to his mind. On this line there are three types of engine. The wood engine is a special type, which is not built at all on this continent, but it serves the purpose in the physical circumstances on the system, which is differentiated in several ways from those on this continent.

ENGLAND AS AN ISLAND.

Changes a Channel Tunnel and Perfect Aviation Would Bring.

Great Britain is an island. Unless there is some great convulsion of nature to all time the Strait of Dover will separate it from the continent of Europe. Yet every now and then a renewal of the scheme for a channel tunnel is heard, and at this moment men are flying from England to France and France to England. Suppose the channel tunnel to

made; suppose flying to be improved— and it is improving every day—what will become of the island? What will become of the sea? They will be there and will be shown on the map, but to all human intents and purposes the geography will be changed. The sea will no longer be a barrier; it will no longer be the only highroad from England to France. There will be going to and from on or in dry land and going to and fro neither on land nor sea Suppose this science of aviation to make great strides and heavy loads to be carried in the air, what will become of the ports, and what will be come of the seagoing peoples?

The ports will be there, appearing as now on the map, but Birmingham goods will be shipped at Birmingham for foreign parts and Lithgow will export mineral direct, saying goodby the Blue mountain and even to Sydney harbor —Sir Charles P. Lucas in Science.

Fires in the Philippines.

The fighting of fires In the dry sea son is a grave problem in the cities and pueblos of the Philippine Islands House construction is light, the roofs framework of bamboo and the sides of either nipa or sawali-a woven product of certain species of bamboo.
When this material has been exposed continuously to the sun for several months it becomes as inflammable as tinder. Fires that break out in the way before any kind of an alarm can be sent in even where there is a fire department Fires in such spread with great rapidity. In thickly populated areas it is not uncommor for a fire to burn several hundred houses before it is

GERMAN GLEE OVER GASES

Ghoulish Delight of Officer at Success of Brutal Scheme.

Those Not Dead From Results Quickly Bayoneted.

An English paper just to hand has the following regarding the German delight over the effects of their gas wariare:

Liege, June 18.-Received via Rotterdam, Monday)—I have had an instructive conversation here with a German oldier, who has returned from the Ypres front for a few days' rest. This man took part in the attacks made with the help of poisonous gases, and he told me several details concerning

this new method of warfare "We lay in our positions for months," he said, "and could never push forward a hundred metres. The British machine guns were handled too well. We could not approach the enemy's lines. Then, on the first day the gases were used we gained two kilometres. This was the result of the gas. You should have seen how it worked. It was fine." My pleasant acquaintance smiled a broad smile. "Everywhere the bodies of asphyxiated soldiers. There was white foam on their mouths, and their faces were black. Those who were still able to resist were soon silenced by the bayonet. It was a ghastly sight, but it was the greatest victory cur company

has had in the whole war.' I asked him whether the gas was librated from bombs. "No," he replied.
"It is put up in cylinders, just like carbonic acid gas or oxygen. The cybottles-wa inders-we call them buried in front of our tranches, with only the outlet tap left above ground. When the wind was favorable the taps were opened, and thick dark clouds rolled towards the trenches of the enemy. Then we received the or der for the storm attack, and rushed for the enemy's lines. Of course we cannot use the gas always, because when the wind is not blowing direct owards the opposing trenches stand a charce of getting some of it ourselves, and that would be less plea-

"We had some experience of this kind of thing the other day, when a British chell struck some of our concealed gas bottles, and they exploded.
The gases came into our own trenches, and before safety measures could be taken, fifty of our men lay dead on

"Will you go on using them?" I ask "I hardly think so," replied the er. "The last time we used them soldier. end ran up to the enemy trenches, instead of finding them emptied, as we had anticipated, we were received with terrible machine gun fire and a rifle salvo, and we had to hurry back to our own lines. Apparently the men had respirators on and the gas did not seem to have effected them. So if this oes on the gases will be useless to us onless, of course, we find something unless, of course, we find something cise, for German science shrinks from

o problem, however difficult it is." In reply to my definite question what the Germans thought of the emloyment of gases he answered, "Th are a splendid weapon. For what is the aim of all arms? To make the enemy unfit to fight. This the gas accomplished in the highest degree. It may be that it is a cruel weapon, but the whole war is cruel, and was it not the Englishmen who were the true. the Englishmen who used it first? four correspondent, being a neutral, offered no reply to this last question. -Central News.

Not Her Quarrel

The fact that corporal punishment is discouraged in public schools is what led Harry's teacher to address this note to the lad's mother:
"I regret very much to have to in-

form you that your son Harry idles away his time, is disobedient, quarrel-Harry idles some and disturbs the pupils who are trying to study their lessons. He needs a good whipping and I strongly recommend that you give him one Whereupon Harry's mother responded as follows:

Dear Miss Jones—Lick him yourself; I ain't mad at him.—Yours truly, Mrs. Smith."

A Joint Concern.

When Richra Brinsley Sheridan was in distress, in early life, one of his resources was that of writing for the dugitive publications of the day, in which he was materially assisted by wife, and many years after his entrance into the spheres of politics he vas heard to say that "if he had stuck to the law he believed he should have done as much as his friend Tom Erskine; but,' continued he, "I had no time for such studies. Mrs. Sheridan and myself were often obliged to keep writing for our daily leg or shoulder of mutton; otherwise we should have had no dinner." One of his friends, to whom he confessed this, wittily replied "Then I perceive it was a 'joint' concern.

Meat Loaf.

One pound and a half each of beef nd lean pork. Remove the bone and gristle and run it through the meat chopper. Add one and one-half cup-fuls of bread crumbs, three well-beaten eggs, one cupful of milk, a rounded teaspoonful of salt, one of ground sage and half a teaspoonful of pepper. Mix well together and place in a loaf tin. Cover with thin slices of fat perk and bake in a hot oven for one hour and a half, basting often

Already the water adjacent to the Thousand Islands are losters of the tourist traffic in fisherman in the provincial waters, hits when he was apprehended. ing a portion of the tourist traffic in consequence. For years an arrangement existed whereby the license was not imposed and the result was a big volume of trade for the oarsman and keepers of resorts along the St. Law rence. It is contended that row with the new order of things that Americans will not patronize the Canadian waters and the district will lose a large trade in consequence. The question is a vexacious one. The Government holds that to establish a hatchery it is neces sary that revenue come from the fish-Mr and Mrs Arthur Purvis and eries to pay the cost of same. Be that as it may, the two local members, Messrs Dargavel and Donovan, have difficult question to solve these hot summer days.

The following pupils of S.S. No. 8 Rear of Yonge and Escott, Wm Booth, teacher, were successful at the recent Entrance to High Schools Examination: Five were recommended and five passed. They were: Edna Whaley, Hazel Yates, May Hollingsworth, Matthew Dunham, Harold Hollingsworth.

Eggs ten years old were used to make a cake, which was served to jurors in the Federal district court during the hearing of a suit against a former collector of the port of New York by an importer to recover \$12,-000 damages because a consignment of Chinese preserved eggs in which he had an interest, was destroyed as unfit for use. The eggs had been preserved by boracic acid in a solution, and tasted good to the jurors who ate them, despite their extreme age. A professor of biological chemistry testified that it is possible to keep eggs 100 years by this method without impairing their quality or taste.

Arthur Free, a farmer residing in he Township of Rear of Leeds and Lansdowne, was found guilty of the theft of a cow from Alex Carpenter, a he finds Brockville greatly improved hy the paving and lighting of the serve one month in jail. The witnesses for the prosecution were Mr and Mrs Alex Carpenter, John Vallentgold, Ernest Rouentree and Edward Brown. For the defence, the accused was sworn. His claim was that one morning he found the cow in his herd. The announcment made in the local He milked it and turned it loose, but t wandered back into the

Trent Valley People ask for Hydro Radials Campbeliford, July 10-At a meeting in Campbellford yesterday of the Trent Valley district of the Hydroelectric Railway Association routes for proposed roads through this district were discussed, and it was decided to ask the different municipalities interested to each pass a resolution requesting the Hydro-electric Power Commission of Ontario to make a report on the feasibility of these routes, which would open a large territory not at present served by a railroad, and prove a great boon to the farming community in market-ing their stuft. The first route proposed was to commence at Central Ontario Junction and follow through the township of Rawdon, Hastings county, to Campbellford, thence through the townships of Seymour, Percy, Ainwick and Haldimand to Cobourg. The other is to start at Peterboro' and proceed through the township of North and South Monaghan, Cavan, Hope and Hamilton to Cobourg. It is the intention that the two roads should form a junction some distance from Cobourg and run to the lakeshore town on the one line, Major Buller of Peterboro' is President of the Trent Valley District Association and C. L. Owen, Campbellford, Vice-President. Mr Armstrong S. HOLLINGSWORTH, Athens City Clerk of Peterboro', is Secretary.
