A DESIGNING WOMAN OR THE Plot for Alhambra Court

CHAPTER XIX. CRAIG GRAHAME AND MRS. URGHART.

The elements favored Madame Juliette's secret purpose. Soon after tea a storm gathered and burst with a fury almost unprecedented in this season. It raged till midnight, and Craig Grahame, gladly availing himself of Mrs. URGHART's eager invitation, abandoned all thought of returning to Baden-Baden.

Nor was Craig altogether selfish in his desire to remain at Alhambra Court. An anxious pre-occupation in respect to Madame Juliette pressed upon his mind, and he determined to seize the opportunity to speak to Mrs. URGHART.

"My dear Mrs. URGHART," he exclaimed, as they stood at one of the windows looking out upon the sheeted lightning, "you have known and indulged me from boyhood. Will you kindly convey my latest and most disagreeable communication which I esteem it my duty to make without the usual excuses to your favor."

"It was only the shock. Don't be alarmed, Craig," she repeated, Craig, in some bewilderment, adding quickly: "Oh, that vivid flash. Certainly you ought not to stand here and invite such shocks."

"I know it," she said, "but I am glad to find her words so happily misinterpreted, she allowed him to conduct her from the window."

"Do not forget, Craig, that Madame Juliette is a woman of high position, and that she is a woman of high position, and that she is a woman of high position."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

saying, her eyes wide with anxiety on Craig's face. Suddenly she made an almost impatient effort to shake off the rain.

"How foolish," she exclaimed sharply. "The evil of the day is sufficient. Why come to the future? Come, Craig, let us join the others."

"No," she said, "I have promised silence, and I must keep the promise. It were to break the subject to Mrs. URGHART."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

little eyes glaring wildly into vacancy and his hands unceasingly clenching themselves. Through all her own deadly fear and anxiety, she was conscious of a keen sense of satisfaction in watching him.

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

stored, her injured feelings forgotten. She had something to tell. Mrs. URGHART observed the change, and with a gasp transferred her hand to the back of her head.

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

once before," interposed Madame Juliette, composedly. "You still refuse to enlighten me?"

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

"I am sorry to be obliged to answer in the affirmative," she said, "but I am sorry to be obliged to answer in the affirmative."

AGRICULTURE

We will always be pleased to receive enquiries from any farmer on any subject connected with the raising of stock as soon as possible.

Perhaps the most extensive and valuable experiments in cattle feeding conducted at one place in the world is upon at the Ontario Agricultural Experiment Station.

The animals are in groups of three being seven separate lots. The results of the feeding are being recorded in two ways, by giving the ration and the amount of food eaten, and by weighing the animals at the beginning and end of the period.

The animals are in groups of three being seven separate lots. The results of the feeding are being recorded in two ways, by giving the ration and the amount of food eaten, and by weighing the animals at the beginning and end of the period.

WOMAN'S KINGDOM.

Two Sonnets. PAULINE. Ambition, young, a poet turned his eye to love and fame combined his love to fame.

For and about women. Eve was the first woman to gather leaves during the fall. I have always said it; nature meant to make woman as its masterpiece.

It was the young lady who said, referring to a rival for the affections of a young lady, that she thought she knew enough to be able to cut him out.

A young lady who recently started out as a fashion writer has determined to quit journalism. She mentioned in an article on "fashions" that she had written for three months this year.

A travelling man, noticing a pretty girl alone in the car, went over in her direction and smilingly asked: "Is this seat engaged?"

The Adornment of Children. There is nothing more beautiful than the children of these days as they appear on the doors and in the parlour.

Women who have cultivated sufficient means and the inclination to spend it on dress are few in number. While possessed of a large liberty of choice, they are usually governed by a certain conventional taste.

Consumption Cured. An Indian physician, retired from practice, having cured his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of consumption, bronchitis, catarrh, asthma, and all throat troubles.

Practical Charity. Mlle. Anne Drossart, a promising pupil of the Conservatoire, was sitting one morning at her window, when she was called by a poor woman who had been in the street singing in the low and broken voice in the hopes of earning a few cents.

A CURIOUS MEDICAL SUIT.

A young man who drank sixty quarts of beer in Philadelphia. One spring some two or three years ago the thoughts of Michael McGrath, a young man who followed the trade of a brewer, were attracted to the columns of a local newspaper.

There is nothing more beautiful than the children of these days as they appear on the doors and in the parlour. They are dressed in the latest fashions, and they are a public benefaction.

Women who have cultivated sufficient means and the inclination to spend it on dress are few in number. While possessed of a large liberty of choice, they are usually governed by a certain conventional taste.

Consumption Cured. An Indian physician, retired from practice, having cured his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of consumption, bronchitis, catarrh, asthma, and all throat troubles.

Practical Charity. Mlle. Anne Drossart, a promising pupil of the Conservatoire, was sitting one morning at her window, when she was called by a poor woman who had been in the street singing in the low and broken voice in the hopes of earning a few cents.

Restoration to Health and Beauty to the GUTTERA REMEDIES.

Restoration to Health and Beauty to the GUTTERA REMEDIES. Fresh, clean hog's lard, rubbed three or four times a day, will restore the hair to its natural color and texture.

ONTARIO PULMONARY INSTITUTE AND HEALTH RESORT.

Located at 274, 276 and 278 Jarvis Street (at corner of Jarvis and York Sts.), Toronto, Ont. H. MILTON WILLIAMS, M.D., M.C.P.S.D., PROP.

Permanently established for the cure of Catarrh, Throat Diseases, Bronchitis, Asthma, and Consumption.

Together with diseases of the Eye, Ear, and Nose, all chronic nervous and general diseases; also diseases of women and children, all diseases of the throat, lungs, and chest, with the addition of the steam atmosphere, compressed air, spray, etc., which render the above appliances are in every case completely successful.

Consultation FREE. If possible, call personally for consultation and examination, but if impossible to do so, write for a list of questions and Medical Treatise.

Nothing Short of Unmistakable Benefits. Counted upon tens of thousands of sufferers could originate and maintain the reputation which AVON'S SANATORIUM enjoys. It is a compound of the best vegetable alkaloids with the iodides of Potassium and Iron—all powerful, blood-making, blood-cleansing, and life-sustaining—and is the most effective of all remedies for scrofulous, mercurial, and blood disorders.

Execution of Hovey for the Murder of His Wife. New York, Oct. 19.—Edward Hovey, who murdered his wife, was sentenced to life imprisonment for the murder of his wife, who was found dead in a bathtub.

Can Speak Once More. Physicians, as well as sufferers, who have been somewhat skeptical regarding the WON-BELDING CURE performed by this Institute, are invited to visit the Institute and see for themselves.

When buying Sewing Silks see that the Spool you buy is Stamped. "Belding, Paul & Co." "Full Size and Length."

Dealers may assure you that other brands which they have are ours. They may be, but the only thread that we guarantee and recommend is that under our own name.

DELDING, PAUL & CO. Sewing Silks.

board of directors, so that they might borrow money in England at low rates of interest to use in their farm property for the benefit of farmers.

The council shortly afterwards adjourned. Mr. Murray, Oct. 22.—At a meeting of the Farmers' Council of School of Agriculture, Malton, the president, Mr. Alex. Perry, in the chair, a vote of thanks was tendered Mr. Alex. Wallace, organizer of the movement, for the valuable services he had rendered.

AGRICULTURAL EDUCATION. The Council of the Agricultural and Arts Association of Ontario. The Council of the Agricultural and Arts Association of Ontario, believing that a more careful study of the science of agriculture by those engaged in the profession would prove beneficial to those engaged in such studies and conducive to the progress of the profession, has decided to inaugurate a scheme of annual examinations in subjects bearing directly upon the work of the farm, accompanied by the granting of certificates of merit.

LIST OF STUDIES AND TEXT BOOKS. The Council of the Agricultural and Arts Association of Ontario, believing that a more careful study of the science of agriculture by those engaged in the profession would prove beneficial to those engaged in such studies and conducive to the progress of the profession, has decided to inaugurate a scheme of annual examinations in subjects bearing directly upon the work of the farm, accompanied by the granting of certificates of merit.

worth thinking of by farmers. Manure costs too much money to allow their neutralization to be lost to clear culture.

Too many farmers make more and smaller profits than they should. When two adjoining farms are run on the same basis, the one with the greatest care, the one with the least, the one with the most practical use of the land, and the one with the most expensive taste for the farmer.

The plough should be run more deeply for what than for any other gain. In all rough soil the subsoil is apt to be richer in mineral elements than the surface soil. One or two inches deeper ploughing will sometimes give the wheat plant as much available phosphate as can be purchased for the same money.

Red Top Wheat. Mr. Ogilvie paid ninety cents a bushel for the red top wheat from the Red Top Farm, near the village of Red Top, Ontario. The Winnipeg Times says that the red top wheat is a variety that the U.P.R. should raise the rate next year against soft or mixed wheats.

North-West Trussed Wheat. Mr. Ashton F. Andrews, of Stockton, some forty miles south-east of Brandon, reports that a relative in Toronto two specimens of the red top wheat, which had been bred from the best of the best, and the other untrussed. The trussed wheat is higher in protein than the untrussed wheat, and is also higher in gluten, and consequently has a higher nutritive value than the untrussed wheat.

Broken-Winded Horses. Broken wind is an example of diseased action derived from abnormal structure, and is a disease of the lungs, and is not, as is generally supposed, a hereditary disease. It is caused by disordered functions of the lungs, and is common to horses of all breeds, and is not a disease of the lungs, but a disease of the system, which is worked irregularly, and treated improperly in feeding, both as to the quantity and quality of the food. In the other hand, it is rarely seen in horses that are used for light work and are fed and watered regularly, and are kept in good condition.

Seed Potatoes. Professor Sabornie, of Missouri Agricultural College, reports upon experiments conducted to ascertain what kinds of seed potatoes would be best for the four seasons as follows: Winter potatoes, large yield—Table potatoes, 143.2 bushels; small potatoes, 105.8 bushels; total, 249.0 bushels.

Winter Quarters for Swine. There is never a better time to prepare for winter than during the pleasant days of October; then the work may be done more easily, because the cold weather has not yet set in, and the swine are still having acquired, greater heat is not required.

Farming Does Not Pay with Some Men. Farming does not pay with some farmers. Some farmers are unable to obtain a living from their farms, and are finally forced to abandon them. There are many reasons for this, but the most common is that the farmer does not know how to manage his farm.

Provincial Ploughing Matches. The contest for No. 1 District at Renfrew, Ontario, Oct. 17.—The provincial ploughing match for District No. 1 was held here to-day in a sixty-acre field on the farm of Mr. J. C. Carwell, President of the South District Ploughing Association.

AGRICULTURAL.

whether they are vegetable or animal they are known by the general name of "disease germs."

EXPERIMENTS IN FEEDING CATTLE. Perhaps the most extensive and varied systematic experiments in cattle feeding ever conducted at one place have just been entered upon at the Ontario Agricultural College; fifty-one head of yearling and two-year-old steers, with cows and heifers, have been established for the following purposes: In addition to repeating the important tests with corn, peas, oats, and barley, the plan includes blackberry and fodder, in the production of milk, and in the production of beef.

Effects of anthrax upon the quantity and quality of milk and butter, and in addition to these interesting enquiries, the steaming of food versus the same in an open trough, and the effect of anthrax upon the health of the cow, are being handled this winter. The three great beefing breeds of the world have been put in a comparative trial of weight gain in such an unprecedented form this winter.
