ZIRZOW SAYS HE DID NOT TELL TRUTH

Flatly Contradicted Testimony He Gave in Police Court. EXONERATES NERLICH'S Less Serious Charge of Conspiring to Commit Indictable Offence.

Instead of being tried for high treason, punishable by death, Emil and Hedwig Nerlich faced the criminal justice court yesterday charged with the much less serious offence of merely conspiring to commit an indictable offence.

Proceedings on the charged indictment, the crown went on with its case, but met a setback when Arthur Zirzow, the young German lieutenant interned as a prisoner of war, who was to have been the star witness for the prosecution, contradicted flatly the testimony he gave in the police court and exonerated the Nerlichs from any guilty knowledge of his intention to join the German army.

Told an Untruth. Zirzow repudiated his own signed statements implicating the couple. He said that he had deliberately told what was not true when he gave evidence in the police court because he had not been sworn as a German agent, but by holding up two of his fingers.

At the opening of the case, Mr. Hellmuth, for the Nerlichs, objected to the charge of conspiracy being tried first, as he contended that the charges of being a treasonable agent on Nerlich's part should be gone on with.

After some debate between counsel, his lordship pointed out that the section did not say that "conspiracy to join the enemy" was treason and in his view it was not. The crown prosecutor accepted the ruling and the trial (Continued on Page 3, Column 5)

TURKS MASSACRED MANY ARMENIANS

Horrors of Occupation of Ardahan Among Greatest of War. HURLED INTO ABYSS Hundreds of Others Were Led Into Streets and Butchered.

PETROGRAD, Feb. 22.—Only now are details becoming available of the horrors perpetrated by the Turks during the occupation of Ardahan, near the trans-Caucasian frontier. The Times correspondent of the Ruskoe Slovo learns that at first the enemy confined themselves to pillage and slew only fifteen civilians, but after Dec. 30, when news of the Russian occupation of Ardahan was received, local Mussulmans threw off the mask, and the same evening organized a systematic massacre, in order to make sure that entire families had been wiped out.

Old Turk residents who have been for years on friendly terms with Armenians slew in cold blood old acquaintances, carefully counting the corpses in order to make sure that entire families had been wiped out. Fifty Armenians were removed from Ardahan stripped naked and compelled to leap into the abyss of Jenendera (Devil's Gap) until one victim carried a Turk with him when the remainder were shot or massacred. At Tamov the women were carried into captivity. Turks did not permit the internment of corpses, which were left to be devoured by dogs till the arrival of Russians.

HOLLAND'S UNREST WARNS GERMANY

Blockade Has Stirred Public Feeling to Dangerous Pitch. TROOPS MAKE READY

Movements Toward Border and Activity on Inundation Works Ominous. Canadian Press Despatch. THE HAGUE, Netherlands, Feb. 22.—(Via London, Feb. 22, 12.53 a.m.)—A tense undercurrent of feeling has been running thru all classes in Holland for the past two or three days. This is attributed to public concern owing to Germany's action in not replying to the Dutch note of protest concerning the North-Sea war zone and nervousness as to what might result from the German blockade and submarine activity to serve as possible pretexts for an untoward incident at any moment.

Even the Dutch fishing boats, by governmental order, are to be painted in the national colors, while their crews have been advised to carry with them evidence of their nationality. The continued movements of troops toward the various frontier points and the constant work of military engineers in inundation works have increased the uneasiness of the people. The newspapers generally refrain from commenting on the situation.

Good News Coming An Englishman just across from London and in New York on Saturday stated that the British Government is keeping back a lot of good news; of German airships destroyed, of German submarine boats that never came back to tell their story, and of news that the allies will be joined by other countries on a date that has been fixed. One story is that a small tank steamer full of gasoline, flying the Norwegian flag, was captured off the English coast; the German crew on board was taken off and an English crew put aboard; the boat that captured the tanker sailed away and left the latter floating about; in a few minutes a German submarine came to the surface, and seeing the tanker and the Norwegian flag still up, ran to her and exploded her. She was destroyed by a mine placed in her track by the British sailors on the tanker. Stories of things like these are not given out and the Germans, in consequence, get no explanation of torpedo boats and things that are never heard of again.

Zeppelin Bombs Killed Five Civilians in Calais French Official Announcement Says Damage to Property Was Unimportant--Points Along Railway Line Also Attacked With Little Result.

PARIS, Feb. 22.—(Via London, Feb. 22, 12.03 a.m.)—A Zeppelin airship bombed Calais this morning, according to an official statement issued tonight. It dropped projectiles which killed five persons, all civilians, and caused some unimportant property damage. A despatch to the Havas Agency from Calais says that a German dirigible airship dropped a number of bombs today, which did slight damage to the Black Sea & Dunkirk Railway line, in the vicinity of Fontinettes. Train service over the line was immediately re-established. Two incendiary bombs damaged several dwellings in the villages. Fontinettes is a little over a mile south of St. Omer, which lies 20 miles southeast of Calais.

NEWS OF SPECIAL INTEREST TO WOMEN

NEW SPRING COATS WILL BE ALL WHITE

Of Swagger Cut and Distinctive Line Fashions Are Modeled.

COLLARS ROLL HIGH That is the Rule, But They May Be Worn Wide Open.

The new spring sports coats are a delight to behold. Of swagger cut and distinctive line, the newest models are fashioned from the most superior weaves of gabardine, corduroy, silk and wool mixtures.

The collars are as a rule high rolling, but these may be worn wide open if chosen. Collars are deep and of length the 1915 models are from four to six inches shorter than those of last year.

The dazzling hued coats in tango, emerald green and brick red are not seen in any one instance. When white is not used, a simple plain shade of fawn is the substitute. This shade is certainly practical and may be worn to advantage by many, but it will not be in favor like the white of last year.

As for accessories to the sporting coat, even with it is worn the flowing veil, and the hat is a simple, straight, shallow crown, whose style is chiefly maintained in the absence of trimming.

WHAT IS A SIKH?

Easier to Pronounce Than to Describe, But a Great Fighter.

One of the unfamiliar words that crop up in the European news in these war times is the word "Sikh".

Whoever can be found a better description of the Sikhs, Gurkhas, Gonds and the various other soldiers from India who have shown their loyalty to the British Empire by coming to Europe to fight alongside of the British and French troops in the "London Times History of the War".

Among the hundreds of illustrations in this elaborate current history of the war that The London Times is producing are pictures of these native Indian soldiers, who are celebrated as among the greatest fighting units in the world.

"SHOOT TO KILL" HUGHES' ORDER?

Premier Doubts Instructions Were on Lines Suggested by Laurier.

INDEMNITY PROPOSED

Killing of Rutter, French Reservist, Brought to Premier's Attention.

By a Staff Reporter.

OTTAWA, Feb. 23.—Sir Wilfrid Laurier in moving in the commons today for papers relating to the shooting of two Americans at Fort Erie said from what he had read in the newspapers he was led to believe that the men shot were two poachers who were violating the laws of Canada.

However, the government acted rightly in paying the family of the man killed \$10,000 and the relatives of the wounded man \$5000. He desired to bring up the case of Rutter, a French reservist, who was traveling from the United States to Montreal, and was shot by a Canadian sentry. He thought the relatives of Rutter were entitled to consideration. He understood that about that time the minister of militia had given orders that sentries should shoot to kill.

Sir Robert Borden admitted there was a good deal to be said for the contention of Sir Wilfrid. He was not aware, however, that Gen. Hughes had ever given orders that sentries should shoot to kill.

Case in Courts.

The premier said the government by the reparations made in the unfortunate case of Rutter, had done the shooting he could say nothing as the case would come up in the judicial courts at an early date.

The old question of the representation of Prince Edward Island was up again. Mr. Hughes of Kings moved that the province be admitted as a confederation, which, he said, had been intended. The resolution was voted down.

There are hints of the essential difference of the standard of the two races—"I have a heart in my body and not a money-bag," cries Luana to the planter in their final interview. There is the white of the striped muslin and the chant of strange songs, and there is the tender greeting—"Alone! Love to you!" And lastly there is the sacrifice, no less divine because offered in ignorance, because redeemed with love. The company is wholly adequate and the scenery superb.

DR. WILLIAMS' PINK PILLS MAKE WOMEN WELL

Just because she is a woman, there are times when every woman needs best strength in the form of a blood-building tonic.

To thousands of girls and women Dr. Williams' Pink Pills have proved a blessing, because they enrich the blood, give strength and restore tone to the aching nerves. The anemic girl who has lost her strength, the woman whose back feels like breaking, the matron whose health falls as she reaches middle age—for all such sufferers, Dr. Williams' Pink Pills are invaluable, because ill-health in woman is usually caused by poor blood or impaired nutrition. These pills have cured thousands of others, why not you? Mrs. D. M. Morris, Wallbrook, N. S., says: "It is impossible for me to say too much in praise of Dr. Williams' Pink Pills. I have been a great sufferer from those troubles that make the life of so many women an almost constant misery. Pains in the back and side racked and tortured me. My nerves seemed to give out, and at times I could do no house work, and only women who have similarly suffered know what I endured. I tried medicine after medicine without any benefit, and was finally persuaded to try Dr. Williams' Pink Pills. I soon after starting the pills I found an improvement, and as I continued their use my health and strength returned, and I now feel as well as ever I did in my life, and I am relating my experience here in the hope that it may lead some other suffering woman to renewed health. I may add that my mother suffered from rheumatism so badly that she had to use a crutch and Dr. Williams' Pink Pills completely restored her to her usual good health."

Always get the genuine pills with the full name "Dr. Williams' Pink Pills for Pale People" on the wrapper. Beware of cheap imitations. Do not keep them; the pills will be sent post-paid at 50 cents a box, or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Wonderful Picture of Pacific Seen at Alexandra This Week.

"The Bird of Paradise" once more drew a capacity audience at the Royal Alexandra last night, and the wonderful picture of the Pacific which Richard Walton Tully has painted was given a perfect representation.

There is a clever mingling of all the strands which were available in the Hawaii of the early nineties, and the natives, the beach-comber, the missionary, the business agent, the casual visitor, all are drawn with a firm stroke. There are fascinating pictures of native customs, dances, feasts, home scenes, and there are glimpses of the degradation to which a white man may fall who forgets his traditions.

GEORGE MACFARLANE HEARD IN VAUDEVILLE

Gave "Mother McCree" After Having Been Recalled Several Times Yesterday.

"I have two more songs, 'Apparany' and 'Mother McCree,' which you asked George MacFarlane of the audience at Shea's Theatre yesterday. 'Mother McCree' was the favorite and was sung with a charm and pathos that delighted the audience. MacFarlane was easily the hit of the extremely fine bill presented at Shea's this evening. He sang 'I have a heart in my body and not a money-bag,' which is delivered with fine fire and vigor.

"Save One Girl" is a powerful one-act political play by Paul Armstrong, in which a young man, who is a member of a company of seven.

The entertainment consists of two present a merry little sketch, involving a divorced wife, her ex-husband and present fiancée, that provides many amusing lines and situations.

There are hints of the essential difference of the standard of the two races—"I have a heart in my body and not a money-bag," cries Luana to the planter in their final interview. There is the white of the striped muslin and the chant of strange songs, and there is the tender greeting—"Alone! Love to you!" And lastly there is the sacrifice, no less divine because offered in ignorance, because redeemed with love. The company is wholly adequate and the scenery superb.

ROLLICKING ACTION COMEDY AND MYSTERY

Comedy Brings Something of Glamor of Old Circus Days.

Brimming with novelties and interesting, Cecil Spooner is at the Grand this week and has a play that is novel in construction, with a plot that allows for the introduction of sensation, as well as comedy situations. The play is called "Love's Model" and was apparently built specially for the little star, for she is the centre of the wheel of adventure, as well as the target for cupids' arrows. The main events deal with the mission of Peggy Moore, a New Orleans girl, who goes to Paris and in her possession a document, the contents of which she is anxious to keep secret.

In the French capital she becomes acquainted with Etienne Arnaud, who is believed to be the chief of the Paris secret police. King Field, a young American who is studying art, has just installed himself in the studio of an absent friend and settles down in an attempt at serious work in his profession of painting, when he meets Peggy in a dramatic manner, rescuing her from a perilous situation. Peggy's mission is of such a nature that she is compelled for the time being to renounce her friends. In the extremity of her position she approaches to King. He has installed himself in the same house in which he is living and to his friends she is introduced as his sister. He will not look at their contents until he has her permission.

The mysterious disappearance of the papers complicates matters. She is regarded as a spy and the police are brought into the case in an endeavor to solve the problem. Etienne is kept interested in the play from the fact that the contents of the "important" documents are not revealed until the final curtain.

Miss Spooner's work is of a high order. She is charming in the comedy situations and displays considerable ability in the dramatic scenes. She has a splendid supporting company and the production is all that could be desired.

THE WORLD OFFERS YOU

The London Times Illustrated History of the War

The Hidden Hand in the Great Game of War

The greatest war in the history of the world is being fought in secret. Behind the brief reports and confusing telegrams the great tragedy of civilization is going on.

At the beginning of the war, The London Times laid far-reaching plans to get at the real facts through its own special methods—to gather from cabinet ministers and ambassadors, from military and naval officers, from its own trained correspondents standing far back in the deep shadows of European politics, clear and accurate information as to what was actually happening and what it really meant.

Not written, as ordinary histories are, from dusty records and dry-as-dust documents, but from the testimony of men who have lived through the battles they describe; from experts who have studied the armies at first hand; from the diplomats who actually conducted the negotiations that were broken off by war; the book has the freshness and the vivid human interest that other histories lack.

The Greatest War Book Ever Written

It's a big, handsome book—378 pages, hundreds of interesting illustrations—attractively bound in blue cloth. We are distributing this great book—regular price \$3.00—among our readers for 98c and one "War Book Coupon."

The World's Wheat Supply

In the final report on the field crops of Canada for the year ending Dec. 31 last, issued by the Dominion Census and Statistics Office, it is stated that persistent drought through the greater part of the Northwest provinces resulted in yields per acre of the chief cereals lower than in any season since 1910, and lower by between four and five bushels than the average of the six years ending in 1913.

Of wheat, the total estimated yield was 151,380,000 bushels from a productive area of 10,308,900 acres, as compared with 231,738,900 bushels from 11,015,000 acres in 1913—an average yield of 15.61 bushels, against 21 bushels in the latter year.

Fortunately for Canadian farmers the increase in values more than compensated for the low yields—the average price of wheat per bushel in 1914 and 1915 being \$1.22 and 87 cents per bushel.

Farmers have been strongly advised to increase the wheat acreage this year, not only because of the prospect of continued high prices, but as a duty to the empire and the motherland.

A recent review of the wheat situation in The London Morning Post shows clearly that the future supply is already causing grave anxiety.

In normal times the surplus of wheat from these countries producing more than they consume can be estimated and averaged, because a possible deficiency in some is usually balanced by an increased yield in others.

But with the disorganization of industry caused by the war it is highly probable that even the greater breadth of corn proposed to be sown will fail to meet the increased demand which will inevitably be made in 1915-16.

Of the European countries engaged in war, Russia alone in normal times produces a surplus, while Austria in ordinary years supplies her own needs.

Germany, France and Belgium all import wheat, and Great Britain particularly consumes as a rule close on 300,000,000 bushels, its own production accounting for less than a fifth of this amount.

Owing to the scarcity of labor and the fact that Belgium and part of the grain growing districts of France are under occupation by the enemy, all these countries, except Russia, will be in the market for wheat.

The British dominions with a harvest equal to the average can almost entirely supply the needs of the other countries, and it may become their imperative duty to ensure that this is done.

But in any event, farmers in Canada and in the other dominions cannot go wrong by adding as largely as possible to the area under wheat cultivation.

EFFECT OF NEW TAXATION. Editor World: We respectfully call your attention to some of the consequences of the new taxes which have been suggested by the minister of finance.

It appears to us that in the desire for immediate revenue, the effects of the new taxes of much greater consequence than the taxes themselves, have been entirely overlooked.

The tax on letters, and especially on postcards, will inevitably reduce the number of letters and cards being mailed and will probably reduce the revenue from this source to little if any more than now received.

It will be a blow to the trades concerned in the making and selling of postcards and letter requisites. The tax on insurance premiums, railway tickets, telegrams, bank cheques, etc., all constitute additional burdens on trade and commerce at a time when business is already seriously hampered by bad times in consequence of land speculation and the war.

The increase in the tariff taxes will not only be an additional burden to the consumer who will have to pay the tax, but a profit to those who advance it in the first place, but will probably reduce the tariff revenue, because of the further restrictions on trade which it imposes, and the effect will be a further burden on the people without any corresponding revenue to the government.

It would seem as if the new taxes were devised to produce the minimum of revenue with the maximum of burden on the people and apparently their effects on economic conditions were unknown or ignored.

The need for more revenue is obvious and levied in the right way the collection of the tax might be used as a stimulus to increased production and hasten the return of good times.

The best modern economists have shown conclusively that there is such a thing as a natural revenue, the taking of which does not burden industry or take from any one what rightfully belongs to him.

Why should not the parliament recognizing this fact provide itself big enough to assess a big pro-

Nickel Question Discussed in Local House at Some Length.

Nothing to Show Otherwise With Rudolph Saenger, Says Court.

AN ALIEN ENEMY

In Spite of Fact He Thought Otherwise, Acting Accordingly.

At Osgoode Hall yesterday Mr. Justice Sutherland gave judgment in the application of Rudolph Saenger and Emanuel J. Myers for the recovery of \$6600, alleged to belong to them and to be in the possession of Maurice Teller.

The defendant was manager of the Novelty Import Company and the plaintiffs were the directors. The plaintiffs state that the defendant refused to pay the money on the ground that Saenger is an alien enemy.

Saenger is a Hebrew and was born in Lyons, France, where he manufactured silk. He also had business in New York and Toronto.

The first appellate court list for today is: Tritel v. Verral, Greenwood v. Robertson, Greenwood v. Robertson (cross-appeal), Zuerin v. Graham, Neil v. Brandon, Patterson v. Brandon.

Refining in Ontario

"I can only say that if the government of Ontario is not satisfied with the action taken by the Ontario Refining Co. to secure the refining of nickel in Ontario, and to retain the nickel in the province, the proper objective is one of gain or loss economically in one sense."

If the government of Ontario has the effect of preventing the Ontario Refining Co. from refining nickel in Ontario, and even the amount of nickel refined in the province is not to be taken into consideration, the Ontario Refining Co. would be in a position to export the nickel to any other country.

In answer to the question of imperial significance he quoted the remarks of Sir Robert Borden in the Ottawa House to W. P. Maclean, who had brought up the subject.

"I do not see that any thing could be done to prevent the Ontario Refining Co. from refining nickel in Ontario, and even the amount of nickel refined in the province is not to be taken into consideration, the Ontario Refining Co. would be in a position to export the nickel to any other country."

In moving for the motion Mr. Rowell claimed that nickel was essential to modern armaments, and that a country failing to produce it would ultimately lose in a conflict.

The Ontario Refining Co. produces nickel in Ontario, and even the amount of nickel refined in the province is not to be taken into consideration, the Ontario Refining Co. would be in a position to export the nickel to any other country.

In discussing the refinement at home he asked what would prevent the Ontario Refining Co. from refining nickel in Ontario, and even the amount of nickel refined in the province is not to be taken into consideration, the Ontario Refining Co. would be in a position to export the nickel to any other country.

He claimed that nickel was now being refined in small ways in the province, and that experts had agreed on its feasibility.

He showed that the enormous development in the industry during the past few years. In 1900 only 2,540 tons had been treated. In 1913, 24,383 tons had been treated.

He questioned the statement of Hon. G. H. Ferguson that there was no nickel in Ontario, and that the Ontario Refining Co. was the only one refining nickel in the province.

He stated that the Ontario Refining Co. was the only one refining nickel in the province, and that the Ontario Refining Co. was the only one refining nickel in the province.

Not Reached Enemy. The premier stated that any correspondence they held was in a confidential capacity, and that they could give further assurance that since war broke out no nickel had reached the enemy.

He showed that Ontario and New Caledonia controlled the world market for nickel, and that the Ontario Refining Co. was the only one refining nickel in the province.

Understand, he said, "I am not expressing any view as to how it is within the bounds of possibility to control world markets and bring the benefit to Ontario. This is the aim of the Ontario Refining Co."

He concluded by stating the impossibility of a commission report before the Ontario Refining Co. was formed, and that the Ontario Refining Co. was the only one refining nickel in the province.

FREIGHT RATES TODAY. Today the railway companies will present their case regarding freight rates to the board of trade, railway and transportation committee.

The C. P. R. will be represented by Vice-President George Bowditch; Vice-President Dalcymple will watch the case on behalf of the G. T. R., and Vice-President D. B. Hanna for the C. N. R.

AN ALIEN ENEMY

In Spite of Fact He Thought Otherwise, Acting Accordingly.

At Osgoode Hall yesterday Mr. Justice Sutherland gave judgment in the application of Rudolph Saenger and Emanuel J. Myers for the recovery of \$6600, alleged to belong to them and to be in the possession of Maurice Teller.

The defendant was manager of the Novelty Import Company and the plaintiffs were the directors. The plaintiffs state that the defendant refused to pay the money on the ground that Saenger is an alien enemy.

Saenger is a Hebrew and was born in Lyons, France, where he manufactured silk. He also had business in New York and Toronto.

Refining in Ontario

"I can only say that if the government of Ontario is not satisfied with the action taken by the Ontario Refining Co. to secure the refining of nickel in Ontario, and to retain the nickel in the province, the proper objective is one of gain or loss economically in one sense."

If the government of Ontario has the effect of preventing the Ontario Refining Co. from refining nickel in Ontario, and even the amount of nickel refined in the province is not to be taken into consideration, the Ontario Refining Co. would be in a position to export the nickel to any other country.

In answer to the question of imperial significance he quoted the remarks of Sir Robert Borden in the Ottawa House to W. P. Maclean, who had brought up the subject.

"I do not see that any thing could be done to prevent the Ontario Refining Co. from refining nickel in Ontario, and even the amount of nickel refined in the province is not to be taken into consideration, the Ontario Refining Co. would be in a position to export the nickel to any other country."

In moving for the motion Mr. Rowell claimed that nickel was essential to modern armaments, and that a country failing to produce it would ultimately lose in a conflict.

The Ontario Refining Co. produces nickel in Ontario, and even the amount of nickel refined in the province is not to be taken into consideration, the Ontario Refining Co. would be in a position to export the nickel to any other country.

He claimed that nickel was now being refined in small ways in the province, and that experts had agreed on its feasibility.

He showed that the enormous development in the industry during the past few years. In 1900 only 2,540 tons had been treated. In 1913, 24,383 tons had been treated.

He questioned the statement of Hon. G. H. Ferguson that there was no nickel in Ontario, and that the Ontario Refining Co. was the only one refining nickel in the province.

He stated that the Ontario Refining Co. was the only one refining nickel in the province, and that the Ontario Refining Co. was the only one refining nickel in the province.

Not Reached Enemy. The premier stated that any correspondence they held was in a confidential capacity, and that they could give further assurance that since war broke out no nickel had reached the enemy.

He showed that Ontario and New Caledonia controlled the world market for nickel, and that the Ontario Refining Co. was the only one refining nickel in the province.

Understand, he said, "I am not expressing any view as to how it is within the bounds of possibility to control world markets and bring the benefit to Ontario. This is the aim of the Ontario Refining Co."

He concluded by stating the impossibility of a commission report before the Ontario Refining Co. was formed, and that the Ontario Refining Co. was the only one refining nickel in the province.

BRITAIN LEADS IN TROPICAL RESEARCH

Toronto Student Given Credit for Valuable Discoveries in Medical World.

That credit was due to Great Britain for the first impetus and for discoveries in medical research which had robbed the tropics of many of their terrors, was the contention of Dr. J. L. Todd of McGill University, in an address before the Canadian Club yesterday.

Dr. Todd, a Toronto student, who, during his vacation researches, had traced the movement for the reclamation of the tropics back to 1839, when schools were started for the care of the work in the universities of London and Liverpool.

Real progress dated from 1893, however, when it was found that the unhealthy effects of the tropics were due not to climate, but to diseases peculiar to them, and many of these were preventable.

RANKIN AND MURPHY LEAVE THE HOSPITAL

Will Be Ready for Game Next Monday—Attempt to Bribe the Quebec Players.

The postponement of the second game of the senior O.H.A. finals was the best thing for everybody concerned. The public would hardly be getting a square game that would not be the best effort of both clubs. St. Michaels were certainly crippled with Rankin, McCamus and Murphy in the hospital, and Victorias, with two players hardly at their best, would not put up their best brand of hockey.

The week's rest will do both clubs a world of good and the fans can rest assured that they will get a game that is contested by two of their best. Rankin and Murphy left St. Michaels' Hospital yesterday and went to the hotel to let the Shamrock win Saturday's fixture. Manager Quinn was notified by his players that they had been approached and the man was pointed out to him. President Emmett Quinn, who was also let in on it and he is looking into the matter. The Quebec players refused to have anything to do with the bribed man and were prompt in notifying their manager. Something may come of it.

JOHNSON-WILLARD FIGHT POSTPONED

Black Champion Meets McVey Saturday Night at Havana.

EL PASO, Texas, Feb. 22.—Virtual postponement of the Jack Johnson-Jess Willard boxing bout was admitted late today by Jack Curley, the promoter. It was believed that Johnson could not arrive at Juarez, Mexico, from Havana by way of any Mexican seaport by March 6. Curley, however, declared that he believed Johnson would arrive safely at Juarez within a short time after the original date, but he did not make known how he would make his way, thru the ports held by Carranza to the Villa line. The Carranza officials have announced their intention to meet Johnson at Juarez, but he is a fugitive from justice in the United States.

Curley declared again today that Johnson would be substituted for Jess Willard if it were considered impossible to hold the fight in Juarez, the bout could be held at Havana. Curley, however, declared that he would not consent to this, since all matters had been arranged at Juarez.

Curley declared again today that no other boxer would be substituted for Johnson. He said that Johnson would be held at least a week training at Juarez before the fight.

Willard is continuing his training at his camp on the side of the mountains. Late this afternoon a postponement of a week or ten days of the fight was high probable. The new development came as the result of another telegram from Johnson to Curley, suggesting that the fight be rescheduled at Havana.

Curley immediately dispatched a warm reply, demanding that the champion check himself and that he (Curley) could think of no change in the plan. Johnson's message said: "Why not transfer the fight to this city? Everything looks good here. I am having trouble getting into Mexico."

A postponement of a week or so is the best we can do now, said Curley today afternoon. "It is a bad situation, but we are trying to make the best of it." Jack Johnson had arranged to leave Havana in the afternoon for Mexico on board the liner Krunkis. Just before leaving, however, he was informed that Willard in Juarez as per agreement. I find now that it is impossible to stage the fight in Juarez, and I am sorry that Willard fight is over I will return to Havana and fight McVey. That will be within the next six weeks."

Then Johnson got a telegram that the Juarez fight had been postponed, and canceled sailing.
