OTTAWA, 6th January, 1882.

CUSTOMS DEPARTMENT,

OTTAWA, 29th December, 1881.

To the Honorable MACKENZIE BOWELL,
Minister of Customs.

SIR,—The Returns of Trade and Navigation for the fiscal year ended 30th June last, which I have now the honor to lay before you, will be found, on examination, to present many features of a highly encouraging nature to all parties interested in the commercial prosperity of this Dominion.

The first item worthy of special notice is the increase of the export trade. The highest figure reached in this department of commerce since 1868, was in 1873, when the total exports were valued at \$89,789,922, but in the last year, 1881, the amount of the same, as shown in these Returns, is \$98,290,823, being an increase over 1873 of \$8,500,901; and over 1880 of \$10,379,365. This increase is wholly in the trade with Great Britain, and is principally composed of Canadian produce and manufactures.

Referring to Table No. 3, showing the aggregate trade of the Dominion, it will be observed that the amount reached is in excess of any year since 1875, the relative figures being, 1875, \$197,505,636; and 1881, \$189,902,427. The value of imports entered for consumption as included in the table in question, being in the former year \$119,618,657, and in the latter, \$91,611,604. In connection with this, I have to call your attention to the fact that this table has never exhibited the correct aggregate of the Dominion trade, owing to the necessity for using the values of goods entered for consumption instead of the total imports. The aggregation by countries has always been confined to the consumption, and to add thereto a similar aggregate for total imports would involve very great additional labor and consequent expense. In order to supply this deficiency as far as possible, I append to the usual statement the grand totals of imports and exports, and of both combined, without reference to countries, from 1868 to 1881, from which it appears that the actual total of the aggregate trade of the last fiscal year should have been \$203,621,663, instead of \$189,902,427, showing an excess of total imports over goods entered for consumption of \$13,719,236. This difference is accounted for by exports and goods remaining in warehouse. The total aggregate for the whole term between 1868 and 1881 inclusive, has reached the very respectable amount of \$2,464,230,201.

The exports of last year were in excess of goods entered for consumption to the extent of \$6,679,219, but the total imports were in excess of total exports to the value of \$7,040,017. The total imports from 1868 to 1881 inclusive, exceeded the exports \$265,595,601, being an average for fourteen years of \$18,971,114 per annum.

Commencing on page 706, will be found a condensed statement of the imports during the last year, from the "British and Foreign West Indies, including Guiana," and on page 708 a recapitulation giving the aggregate value of said imports, viz.: \$4,053,854, and by reference to page 735 of the Trade Returns of 1878, the same aggregate shows the value of \$1,638,721, being an increase in 1881 over 1878 of the sum of \$2,415,133.

The increase of the direct trade with these countries and South America is further developed by a glance at the shipping returns. The number of vessels reported inwards therefrom in 1878 was 551, of the aggregate tonnage of 108,674 tons, and the freight carried was 38,082 tons weight and 4,132 tons measurement; and in 1881, the number was 697 vessels, of 133,870 tons register, carrying 79,816 tons weight and 1,588 tons measurement.

In an examination of this table, it is necessary to bear in mind that the percentage is based upon the value of all goods imported, dutiable and free, and the proportion of free goods imported in one province in excess of another, will so far lessen the percentage of duty. So also the province importing the largest proportion of goods subject to the higher rates of duties, such as spirits and tobacco, will show a proportionately higher average percentage.

The percentages in this table are subject to the same variations, from the same causes, as those affecting table No. 7, but as the same amounts of duty, as shown in the former table are the dividends, while the divisors are smaller, the quotient must, of necessity, show a higher percentage. In other words, the amount of duty is the same in each table, while the values are less in the latter than in the former.

THE General Tables, giving the Number and Tonnage of Vessels reported Inwards and Outwards, being based upon the actual entrance and clearance at each Port, it has been thought that the Number and Registered Tonnage of Sea-going Vessels, as shown by the Returns, was a greatly exaggerated statement, and, in order to prove the general accuracy of the figures, I called for a separate Special Return, giving the Number and Tonnage of Vessels which reported Inwards and Outwards at more than one Port during the Fiscal Year, with the following results:—

PROVINCES.	ENTERED INWARDS.				CLEARED OUTWARDS.					
	Sea-going Vessels reported at more than one Port.		Sea-going Vessels not reported at more than one Port.		Sea-going Vessels Cleared at more than one Port <i>en route</i> to other Countries.		Sea-going Vessels Cleared at one Port only.		Total Sea-going Vessels Cleared Outwards.

From this it will be seen that only about one vessel in twenty, crossing the Atlantic, enters more than one port on the same voyage, and as in every such case the report of cargo is divided so that the returns show the actual freight landed only; it is fair to conclude that the Returns give a tolerably accurate exhibit of the shipping transactions of the Dominion.

I append hereto the usual statements of revenue collected at ports and outports, and the expenditure for salaries and contingencies at the same, for the last fiscal year.

I have the honor to remain, Sir,

Your obedient servant,

J. JOHNSON,

Commissioner.
