### WANT REV. R. H. STEACY

Under above heading, the Ottawa Citizen of June 9 says:—Yesterday afternoon a deputation of members of the Anglican congregation of Bell's Corners waited on Rev. R. H. Steacy, curate of St. John's church, and requested him to accept the rectorship of Bell's Corners, made vacent by the removal of Rev. J. Arthur Shaw to Plantagenet. Rev. Mr. Steacy informed the deputation that as the matter of appointments is in the hands of the bishop the matter would have to be taken by his lordship. The members of the deputation were Messrs. Dawson, Bell, Davis, Foster, Hodgins and Abbott. Bell's Corners parish is considered the most important rural one in the diocese of Ottawa, including as it does Fallowfield and Hazeldean. The congregations are all strong and the invitation extended to Rev. Mr. Steacy is indicative of the esteem in which he is held and the regard felt for him as priest and pas-tor. Rev. Mr. Steacy is one of the most popular of the younger clergy-men of the diocese, and should he be appointed to Bell's Corners the congregation of St. John's would deeply regret the step.

Paul's Charge to Timothy;-2 Tim. 3; 14 to 48 Commentary.-I. Timothy exhort ed to remain firm in the Scriptures. ws. 14-17. 14.—But abide thou—In the first part of the chapter the apostle has been speaking of the ter-rible apostasy that was to take place both in practice and in doctrine, and now he warns Timothy against this and urges him to remain firm in his early training in the Scriptures Things. . . learned—He had learned them not only from his grandmother Lois and mother Eugenia and Eugeni

ther Lois and mother Lu-from Paul, through long semp with him.

a babe—From his infancy, riod of fils earliest recol-t is impossible to begin to teach the children the tion of the Holy Ghost, through the instrumentality of holy men; they treat on holy things, contain holy doctrines, precepts, and promises, and are designed to make people holy.

16. By inspiration—The reference here is to the Old Testament Scriptures. The proofs are found in its history, miracles, prophecy, diversity with unity, preservation and its effects. Doctrine—The truths and precepts of revealed religion. To teach the will of God, and to point out Jesus Christ till he should come. For proof—Here meaning not only

For proof—Here meaning not only the rebuke of conduct, but also the refutation of error. Correction— Correcting false notions and mis-taken views: amendment in the deportment. Instruction in righteousness—Training, or building up, in this principle. It is the text book for schooling mankind in right thinking, right doing and right speaking. The Scriptures teach truth, refute error, correct conduct, form

right character.

17. Man of God—The Christian mirister, Timothy, as pastor in Ephesus, especially meant. It means, also all persons who are "zealous of good works." May be perfect—May possess a full-orbed, symmetrical Christian character (Eph. iv, 13; James i., 4; Col. iv, 12). Thoroughly furnished — Completely equipped in every part of the Christian, ife, and for every kind of Christian service.

II. Paul's final charge (vs. 1-5). 1. I charge thee—This is my dying request. Before God—This charge is put in a most solemn form. God put in a most solemn form. God and Christ were looking at him. The guick and the dead—The idea is that Christ would be alike the Judge of all who were alive when He should come, and of all who had died. At His appearing—When Christ comes the second time He will judge the world, and then enter upon His completed kingdom, in which. His people shall reign with

2. Preach the word-Proclaim, as a herald, the glad tidings of salvation as disclosed in the word of God. Be instant. Be constantly on duty; be urgent. In season, out of season—It is not meant that the ur-gency should be rude, or in any wise unlitting as to time—and circum stance. Paul was always courteous; he timed and suited his words most wisely. Yet whoever exemplified this injunction more admirably? Rebuke -Or convince; show them their errors. Rebuke-Show them their sins. -Exhort-Appeal to men Show the truth, as opposed to their er Show ror, the right as opposed to their sia. Longsuffering-Have patience and perseverence, for the work of bringing men to God is sometimes slow and discouraging. Doctrine -Teaching-The word doctrine here, sow and discouraging. Doctrine—
Teaching—The word doctrine here, and in other places in the New Testament, does not mean a creed, but tracking the truth tracking the truth.

Mountains of gold could not purchase such testimony—or take the place of the health and happiness which Lydia E. teaching the truth.

3. Time will come—In the third and fourth verses the necessity is shown for this faithful ministry. It is one that has always been in force, since by all women to the companion of the companion human nature is the same in aid

4. 5. Turn away-"Because sound and salutary teaching about their own errors and sins is abasing to the pride of men, it will not be endured. Yet their moral natures demand some oplate; hence they will resort to various so-called teachers, in order to obtain rules of life ors, in order to obtain rules of life. that suit their native tastes." the newspapers can leave no room for Watch—Be vigilant against error and against sin, and faithful in the performance of duty. Endure afflicperformance of duty. Enture attractions—This verse sounds like a review of Paul's life. He is charging Timothy to follow on in his fotsteps. Exangerist—Much the same as a precedent or missionary.

preacher or missionary.

III.—Paul's triumphal anticipation of martyrdom (vs. 6 8). 6. Ready to be offered—'I am already being offered." The allusion here is to the custom which prevailed among the heathen of pouring wine and oil on the head of a victim when it was about to be offered in sacrifice. The apostle was in the condition of the victim on whose head the winest which had been already poured. about to be effered in sherice. The apostle was in the condition of the victim on whose head the wine and oil had been already poured, and which was just about to be put to death. The meaning is not that he was to be a sacrifice; it is that his death was about to occur. Departure—"The verb from which the noun translated "departure is derived means in Greck to loosen again; to undo. It is applied to the act of leosing or casting off the fastenings of a ship preparatory to a departure.

7. S. The gool fight—Agalust Saman, sin and error. The memies and the armor are described in Eph. vi. 11-17. Finished—"Most men in his position would have thought the meatest struggle just before them but Paul counted death as nothing." My course—He compares his Christian life to a race which is finished now that he sees the goal so near him. Kept the falth—The truth of the gospel. Paul had not turned aside on any account, or imbled a single error.

PRACTICAL SURVEY.

A very endearing relation existed between Paul and Timothy. Twice he speaks of him—as his "own son." In Acts xvi. 3, we read of his elreumelsion by Paul. He had been Paul's travelling companion. This epistle manifests Paul's tender love toward him. The apostle's recollection of his wonderful victories in the toward him. The apostle's recollection of his wonderful victories in the form of his wonderful victories in th

the recollection of our instructors. The manner, the look, the spirit of a saintly grandmother, or of an affectionate Christian mother, or of a holy minister of the gospel of the Lord Jesus Christ make their teach-

Lord Jesus Christ make their teachings doubly emphatic.

The Scriptures. What a tower of strength and an impregnable barrier they are. How they illuminate duties to God and man. No want of which is not provided for.

Faith. The secret of having blessing from the knowledge of the Scriptures comes through a simple, child-like, unwavering faith in the Scriptures and in Christ. "The word preached did not profit them, not being mixed with faith in them that heard it." An open vision sees Christ as the "Alpha and Omega, the first and the last"—the great central Sun of inspiration, from whom comes, Sun of inspiration, from whom comes, and around whom revolves all of the precious truths of the Scriptures.

The solemn charge. How impres-

The solemn charge. How impressive. Probably It was the last he ever gave to Timothy. In it Timothy, is brought into the presence of God, and of the Lord Jesus Christ and the coming judgment in righteousness, and the giorlous appearing and coming kingdom of the Lord Jesus are brought to view in the distance. "For the coming of that kingdom all believing souls are praying and toiling. Therefore this appeal has an unlimited application." What wisdom is manifested by Paul in his manner of making this appeal.

Have Heard This Before. Some people were laughing at an Irishman, who won a race, for saying, "Well, I'm first at last. "You needn't laugh," said he ; "sure, wasn't I behind before?"

Bradstreet's on Trade.

Trade conditions are generally satisfactory at Montreal. The sorting trade in seasonable goods has continued to be benefited by the warm weather, and the excellent crop prospects in the West have combined with the steadily advancing markets for staples to stimulate the demand for future trade requirements. The continued depression in the securities markets has had an unsettling effect.

A little girl with too many and for future trade requirements. The continued depression in the securities markets has had an unsettling effect on business. There has been a steady demand in most departments of wholesale trade at Toronto the past week. Retailers throughout the West have been buying largely for the fall, placing liberal and well distri-tuted orders. At Quebec little change is noticed in trade circles. There has been a fair movement in wholesale trade at Pacific Coast distri-tuting centres this week. The ex-ient butlook for the crops in the West generally is keeping the trade of the province in a hopeful mood. Wholesala trade at Hamilton this work has been active. The hot wea-ther recently has helped the move-ment in sorting parcels. Retailers, finding that their stocks are getting nicely broken into now, are replen-ishing supplies, and the promising outlook for the fall trade has en-couraged liberal buying. Shipments of fall goods are larger. The ad-vances in staple goods in a good many lines and the fear of further advances in contains are stimulat.

many lines and the fear of further advances in quotations are stimulating the demand. There has been a good increase in the demand for fall goods in jobbing trade circles at London. In Ottawa the demand shows some increase this week in certain departments. Prices are firm. HOUSEHOLD LORE.

A simple, pure hearted girl who has a place in a home, home work and home duties, have her heart there, and no boy can steal it. Only when maturity comes and a real man comes and a real affair of her heart comes will such a girl leave home, and then only after heartaches and heart rending. But a girl whose place in the home is at the table and in bed won't love that home. Work makes trings sacred. The child whose home memories are not hallowed by work, who is not needed and does not feel the need, will not love home, and if she doesn't love the home of her girlhood she will love no other. She will go anywhere for anything. Home will mean nothing to such a woman, and if she is respectable she will only lack the opportunity to be a bad woman, and is good only through circumstances or by the necessity of an ugly face. How and Where They are Grown and Why They Frequently Fail to Produce Satisfactory Crops. Carrie Grand Commence of the C

Department of Agriculture, Commissioner's Branch.

Ottawa, May 28, 1903. Every careful stockman recognizes the fact that flush pasture is the ideal feed for keeping all classes of live stock in a hearty, thriving con-

live stock in a hearty, thriving condition, but in most parts of this country it is necessary to provide large stores of succulent feed for the long winter months, when pastures are not available. The various sorts of roots go a cleap and satisfactory substitute for grass, and in consequence many million bushels are grown annually. Large quantities of seed of turnips, swedes, mangels and carrots are used each year on Canadian farms, but the crops produced are frequently disappointing. As a rule our farmers have hitherto been entirely in the dark regarding the sources of supply of such seeds, and the methods of growing them. The Seed Division of the Dominion Department of Agriculture has been investigating these questions, and is able to offer suggestions that each of the more reliable seed growers in these countries exercise a great deal of care in the production of their stocks. They supply seed from their own sectored stocks to small larmers, who grow quantities of seed for them under contract. The best quality of such seeds, and the methods of growing them. Department of Agriculture has been investigating these questions, and is able to offer suggestions that cannot fail to be of value to growers of root crops. According to Chief G. H. Clark, of the Seed Division, a few farmers in Canada make a specialty of growing root crop seed, but practically the whole amount of such seed offered in the trade is imported from Europe and is grown. such seed offence in the trade is imported from Europe and is grown in France, Germany and England, A favorable climate and cheap labor have made these countries the seed gardens of the world. A few notes on the way in which seeds are grown there will help to explain why farmers often fall to get roots showing good type and uniform ex-cellence all over a field.

### How Plants Seed.

Turnips, swedes, mangels and car-ots are all blennial plants, that is, they store up nourishment in root during the whole of the first year, and use that store of food for the production of during the second and final year of their life. Most of our domesticated plants have been for during to evolved from wild types through long years of selection, cultivation and cross-fertilization. The original wild types were usually annuals, produc-ing seed the first year, and there is a tendency among all improved plants to revert rapidly to the old, unimproved types, whenever they are de-prived of that careful attention to selection and cultivation which has brought them up to their present high structure. high standing.

Canadian farmers have not fully recognized that the value of root crop seed is far from depending on their vitality alone. It is even more their vitality alone. It is even more important that they be taken from carefully grown and selected stocks. We seldom see a field of roots that are uniformly true to type and free from abnormal growth of top, large necks, and ill-shaped, prongy roots. This undesirable state of affairs is taken to the saving of seeds largely due to the sowing of seeds

The Best Quality of Seed is produced from selected and trans

planted roots. Seed of turn.ps and Swedes is produced in quantity in this manner in the North of Scotland.

The chimate of Scotland, like that of Canada, is such that root crop scots can only be successfully produced by harvesting the roots balors wanter

deal of the seed of the ferred in Canada is of much inferior quality. The increased labor required to grow seed from selected and transplanted roots selected and transplanted roots rasics their price above the range of American seed firms. For this seedsman is not to blame. Our farmers have demanded cheap seeds, without any guarantee as to quality, and the seedsmen have simply, tried to meet the demand. A great deal of the root crop seed used in Canada is grown by small irresponsible farmers whose chief object is to obtain a to obtain a

independent of its quality. In growing of these stocks it is a common practice to sow late in the son, after an early crop has been harvested from the land. Young plants thus produced are in many cases not thinned, and do not grow. to a reasonable size during the first season. From a crop of this sort a very large amount of top is pro-duced, and a large quantity of seed obtained per acre at a minimum cost. It would be unreasonable to were pect our farmers to grow poor crop seeds for the Canadian trade and compete in the matter of price with the seeds produced by the above me-thods in countries where labor is so cheap, and climatic conditions so fa-vorable. Until the consumers of these seed that is taken from selected and seed that is taken from selected and transplanted roots, grown in a climate similar to that where the seed is wanted for use, the quantity of home-grown stock offered in the trade will be extremely limited. It therefore appears that growers of root crops will find it to their advantage to murchase only seeds force. vantage to purchase only seeds from extra selected stocks, no matter what the price may be, or better still, grow their own seed from the best and most typical roots raised on their own farms.

Servian Senators and Deputies Have So Already Resolved.

states That Prince Peter Will Find a Hard Task Before Him If He Is Elected King—Rumor Says He Insists That All Officers Concerned in the Murder of Late King and Queen Leave Belgrade Before He Enters the City.

Belgrade, June 12.—A military revolution broke out here Wednesday night. The troops, who revolted under the leadership of Major Angikovics, surrounded the Palace assassinated King Alexander, Queen Draga, the latter's sister, the Queen's brother, Nijoden; Premier Markovitch, Ministers Petrovitch and Tudorovich, Gen. Plavolitch, the former Minister of War, and some of the Minister of War, and some of the members of the Royal Guard. Prince Karageorgevitch was pro-

A new Government was formed, and the following proclamation was

Naumevics presented to the King a form of abdication for his signature. The document contained the statement that by marrying a "public prostitute" the King had degraded Servia, and that therefore he must abdicate. The King's answer was to draw a revolver and kill Naum-

vice on the spot. Mischies then picked up the document and presented it again to the King, who perceiving his danger, fled with Queen Draga to the palace roof, both being in their night clothes. The officers followed, conclothes. The officers followed, continuously firing, and ultimately shot down the royal couple. Major Luka Lazarewics, who had been under the King's displeasure for two years, is said to have fired the shot which ac-

At about 2 o'clock yesterday morning Queen Draga's two brothers were shot at their homes, as well as Premier Markovitch and his brotherin-law, M. Milkovitz, the Minister of the Interior, M. Tudorevich, and his daughter, and the War Minister, M. Plavolitch.

While these events were proceeding at the palace the streets of the city were already occupied by soldiers, and an armed force surrounded the royal residence. It is pointed that among those who have declared in Prince Peter's favor there is not a single great or popular name. Rus-

The news comes from the Sey- It was long before the troubles in that Mwanga, ex-King of Uganda were settled. There was chelles that Mwanga, ex-King of Uganda, has died on the island to which he was exiled over five years ago. He was King of Uganda for about thirteen years before he was expelled from his country. He ascended the throne before he was out of his teens, and at the time of his death was not over 37 years of age. Mwanga while still a boy cursed his unhappy land with the most ter-rible atrocities that have ever been rible atroctites that have ever been recorded in Africa. He was the son and successor of King Mtesa, who was made famous in the writings of Speke and Stanley and half a dozen other African explorers.

leganda were settled. There was hetween the native party that wished to depose the monster from the throne and those who espoused his cause. The final result was that Mwanga was retained as King and supported by the British.

This may seem very strange, but the fact is that the name of the King of Uganda was something to conjure with in a land which for centuries had regarded the occupant of the throne as almost a god. If the British issued their edicts through the mouth of Mwanga, they would have the force of law without question.

So policy dictated the retention of Mwanga, and if he had been sensible he might have remained on his throne until his death; but he thought he could destroy the British, and secretly plotted an attack upon them. When his treachery was discovered he took refuge among the Germans at the south end of Victoria Nyanza, and was finally delivered by them to the British, who then decided to send him into exile.

With a few attendants and two other African explorers.

It was Mwanga who cut off the retreat of Emis Pacha southward and made it necessary to send Stanley to the rescue with the cost-liest expedition that ever entered Africa on a mission of peace. It was he who murdered Bishop Hannington, in October, 1885. It was Mwanga who burned scores of native Christians at the stake, while thousands who escaped him hid in the depths of the forests far from human habitation.

With a few attendants and two or three of his wives, the fallen monarch, who had had Mwanga was one of the three or four powerful native kings of Arica. He ruled over at least 1,000,000 Waganda living along the Esautiful north and northwestern coast of Victoria Nyanza. He was the

Scion of a Race of Rulers. Though a (barbarous monarch, he could trace his ancestry back to the time of Queen Elizabeth, through a line of eighteen Kings of Uganda. In his most powerful days he had an army of 25,000 men, over 2,000 muskets and plenty of ammunition bought from Zanzibar traders. Before his father died the missionaries of England and France had obtainof England and France had obtained a firm footing in Uganda, and the young King at first was largely under the influence of these white men. But when the idea suddenly selzed him that the whites might become more powerful than the King his attitude toward them changed, and he resolved to leave no stone unturned to ruin the missionaries. One day he heard that Bishop Hannington, a gentle and lovable man was approaching Uganda from the Indian Ocean. The King at once resolved to make war on all whites. As soon as the unsuspecting Bishop reached the borders of Uganda he was shot, and the fifty helpless porters with him was approaching Uganda from the

How, Where and When a Prisoner Found Their Number.

About 1,000 Women in His Harem and many hundreds of servants, was sent to the Sey-helies, where a small allowance was given to him and he had nothing to do but to reflect upon the folly that had cost him his throne.

The present King of Uganda is Daudi Chui, a son of Mwanga. The little King is only 7 or 8 years old. He has never known life except under the new regime, and so he will probably always be content to be a puppet in the hands of his white masters, enjoying much attention and consideration if he behaves himself and retaining some It is well known that the number of letters, words, verses, etc., contained in the Bible have been counted, but by whom, when, or where, is not generally known. Treat's publication, entitled "Curlosities of the Bible," speaks of the occurrence as being of Spanish origin, and that the Prince of Granada, fearing usurpation, caused the arrest of the supposed would-be usurper, and by order of the Spanish crown here was through the arrest of tention and consideration if he behaves himself and retaining some semblance of power.

He has been taught to read and write, is being introduced to the amenities of civilized life, and is surrounded only by those who, it is thought, may benefit and improve him. The British still think it pays to maintain a Semblance of royalty in Uganda. But the native sovereignty, not without futile struggle and much suffering, has retired far into the background. ish crown he was thrown into an old prison called the place of skulls, situated in Madrid, where he was confined for thirty-three years, with no other companion than the

USE MANY WORDS EACH DAY Men Ordinarily Give. Utterance to

Many Thousands of Phrases. "I have been trying to figure out how many words the average man utters in every twenty-car accurs," said a gentleman who has a penciant for pecufiar things, "but I have been unable to reach any satisfactory conclusion on account of the different rates of speed at which different persons talk of course, I have no reference to the different kinds of words which may be found in the daily vocabulary of the average man, but I am taking about the total number of words uttered, counting repetitions and all, during every twenty-four hours. There is the quiet, melancholy gentleman, who will not speak on an average of 500 words a day, and there are many who for one reason and another would not utter anything like this number. On the other hand, there is the conversational Gatting gun, not always a woman either, who will roll of a words at a fearful rate of "I have been trying to figure out always a woman either, roll off words at a fearful rate of speed, and whose aggregate for one day would run up to dizzy heights. But suppose we figure that the average person will utter an average of forty words every minute, or about 57,600 words for every twenty-four hours. Of course, no person will talk this much, as the windiest of men and women would probably break down before they had talked as much as fifty-seven columns in the average daily newspaper. The only question is as to how much time each person puts in talking during each day. Some men and women are situated so that they cannot talk during the day, except and women are situated so that they cannot talk during the day, except at meal time, on account of the char-acter of work they have to do. There are others, such as traveling men, for instance, who depend upon talk for instance, who depend upon talk for their living. I have figured that the high man, probably the traveling man, will talk five hours out of every twenty-four, which would give him a total of 12,000 words every day. I have figured that most any sort of a man will talk as much as ten minutes out of every twenty-four hours, and this would give him a total of 600 words for the day. "These are the two extremes. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

# QUEER SITUATION OF THE BRITISH CABINET.

# Belief That a Dissolution of Parliament is Near at Hand.

London cable says: Perplexity is the result of this morning's outcome of yesterday's extraordinary proceedings and much ironical comment is made on the figure of "each for himself" that the Cabinate of the "each for himself" that the Cabinet cuts. The Tory Morning Post describes the situation as a "spot harred debate," in which every one played the "spot stroke," and says the debate has not cleared the air, but shows that the air wants clearing. This idea permeates the comments in this morning's papers. That even if the Cabinet is content with its "open mind," and Mr. Chamberlain retains his seat on Chamberlain retains his seat on the ground, in which he has only

the ground, in which he has only invited the country to discuss the question, such a patching up cannot possibly last long and that a Cabinet break up and a dissolution of Parliament is not far distant.

The latest gossip in best informed quarters is to the effect that Mr. Chamberlain will not resign, while the Government will sign, while the Government endeavor to dispose of

land bill and stave off a crisis unitil October.
It is generally agreed that Sir Michael Hicks-Beach's onset was a surprise to Mr. Chamberlain, who

had not expected such wholesale protests against his proposals. The Daily Chronicle (Liberal), referring to Mr. Chamberlain's statement to the secretary of the Bir mingham Liberal Unionist Associa-tion, points out that Canada gives a bounty on steel and iron and asks whether Mr. Chamberlain would put a countervailing duty on bounty-fed Canadian imports.

This, it is said, would be to embark on a tariff war with the Colonics

mier will exert his influence to the utmost to preserve harmony in the Cabinet, in the hope of postpon-ing a dissolution of Parliament until it has passed the domestic bills now in hand.

That the interest in the political situation had been enhanced by the dramatic developments yesterday was fully evidenced to-day by the remarkable animation and alertness of everybody in and about the House when the time suppressed for the when the time approached for the resumption of the debate in the House of Commons on the amend-ment of Henry Chaplin to the budget

bill.

The debate was resumed by Major Seely, Conservative, who as a convinced free trader rejoiced in the repeal of the grain tax.

Sir Charles D.Ik., Advanced Radical, contended that the House had a right to demand an opportunity for pronouncing judgment on this important that protectionist countries were cutting out Great Britain from the markets of the world. Germany dual not even hurt Great Britain's market in South America, and when one considered the great natural advantages size and souther informatic contained in other informatic contained in fiscal question. The Ministerialists Corfident. Ministerialists have recovered their spirits, and assert that no resignation will occur, and that the Government will enact the land bill and close the session with undimin-ished prestige. They neglect to and that the Unionist party has been hopelessly divided by the discussions of the last two days, and that the country can have little confidence in a Government whose members are as far apart on fiscal and economic policies as the east is from the west.

The detective says while selling bedsprings they were sim-ply "spotting" places which they, ply "spotting" places which they, would later on burglarize. They are alleged to have broken into Brown's hardware store at Thamesville, and stolen, among other things, some

razors. The bedspring men also visited Plattsville, Oxford County, and, it is alleged, smashed the door of the safe of the Plattsville Milling Company, but failed to get into the vault. They also, it is charged, smashed the door of the safe of Mc-Kee Bros. Caurlage, Jactory in Plattsville, but got nothing. It turned out that the safe was not looked, and labor was thus wasted. Mr. Murray trailed the men to Kent County, secured their arrest, and they are now, cured their arrest, and they are now, in Chatham Jail awaiting trial. Mr. Murray expects to go to Chatham to prosecute after his evidence has been given here.

The Minister did not anticipate that the changes would result in inter-necine strine, or in any real dan-gers to the country. He pointed out that the original Karageorge was not a prince. He was a rich swins owner. The father of the new king was made a prince in 1842, Mr. Mijatovitsh related a curious incident. He said that a month ago

he was present at a clairvoyant's scance, at which a letter written by the murdered king was handed to the clairvoyant, who immediately became intensely agitated, predicted that King Alexander would be assassinated very shortly, and even depicted the scene which appears to have been enacted at the palace at Belgrade during the night night.

May be No Civil War.

The tragedy of the palace at Belgrade, marking the latest of the revolutions which have convulsed Servia from time to time during the past century, is not regarded in diplomatic circles in London as likely to lead to civil war. Stress is laid on the unpopularity of King Alexander's marriage to Queen Draga. King Alexander's successor, Prince Karageorgevitch, is a son winister of Commerce; Gen. Jorvan ga. King Alexander's successor, Prince Karageorgevitch, is a son-in-law of the Prince of Montenegro and is regarded as being most acceptable to the people. The universal anxiety of the george. The universal anxiety of the governments of Europe for peace is advanced as a reason why the Servian situation is not likely to lead to complications. Should, however, these unexpectedly arise, official circles think an Austrian-Hungary army will immediately march into Servia and restore order. This eventuality, however, is considered improbable

Direct From Belgrade. Cologne, June 11.—A private telegram from Belgrade, Servia, states that the army last night proclaimed Peter Karageorgevitch to be King of Servia. The troops immediately surrounded the Konak and forced their way into the royal palace, where they assassinated king Alexander and Queen Draga.

The Times' report of the B. C. L. vs. Athens baseball match is slightly rroneous. It had not been represent ed that the Athens seniors was com-posed exclusively of high school players, and so they had no reason to feel particulary "crestfallen" because they had "mustered the cream of the yillage to down the Island City team. No attempt was made to misrepresen the personnel of the Athens team, and any insinuation to the contrary altogether unjustifiable.

It is freely stated that there are several citizens of Athens who would contribute 50 per cent of the cost of laying granolithic sidewalk in front on Thanksgiving Day next in Brock. of their premises, providing they were exempted from paying the general sidewalk rate for, say, twenty years. It is generally conceded that the time for board walks is rapidly drawing to a close, and the council might well consider whether it would not be in the public interest to pass legislation that would admit of the gradual and voluntary adoption of permanent walks.

### VISITING OLD FRIENDS

The Reporter was favored a few The Reporter was favored a few days ago with a pleasant call from Mr. James Healey, of Parry Sound. Mr. Healey spent his youthful days as a member of the household of William Osborne, of Elbe Mills. In '66 he was married to a daughter of John Belton, of Dublin Corners, and in the same year he moved to Gananoque where he farmed for six years. In 1872, he moved to Parry Sound District, lecuting a farm about nine miles north and ting a farm about nine miles north and west of Parry Sound. There he me and successfully overcame the trials and difficulties inseparable from pioneer life, and has been rewarded with a fair neasure of prosperity. His family consists of 5 boys and 7 girls. Eight of his family are married, and he has 42 grandchildren—all hearty and well. He left home on June 1st, visited old friends at Gananoque and William Stafford and other friends at Lyn thence to Unionville and on to visit his sister, Mrs. James Hall, of Gloss

ville. His absence of thirty years had made many changes, and in the majority of cases he found it necessary to introduce himself to the friends he held so near and dear and had traveled so far to see. Among the other old friends he m was the ever genial Charlie Goff. In their course of inspection of Charlie's tidy farm and snug buildings, a fine calf attracted Mr. Healey's attention, which he thought to be about 3 months old and estimated its weigh

weeks. Among the friends Mr. Healey had met in this section at the time of writing were Messrs. Joseph Jones, Robert Shaw, Jones Steacy, Morley Earl, G. M. Bates, Byron Brown Samuel Rowsome, Mrs. W. Rowson

Mrs. Grant. Like all the pioneers of the High lands of Ontario, Mr. Healey is loyal to the district in which he has made his home, and returns there with many leasant memories of the friendship and hospitality be has enjoyed during his visit to the home of his boyhood.
