Scientific Assessment of Land Values

Demonstration to be Made at Tax Reform League Convention September 5th, in St James' Cathedral Parish House, Toronto-- Will Interest Real Estate Men, Municipal Officers and Business Men.

Whenever a proposal is made that the tax system be changed and land values be made to bear a heavier share of the burden, the question is always raised, how can the value of a city lot, apart from the buildings, be fairly ascertained.

To answer this question the Tax Reform League are inviting business men and municipal officials to attend a demonstration of the Somers' System of land valuation at the convention of the League in Toronto Tuesday afternoon, September 5th.

"Every Assessor is supposed to value land apart from improvements now" says Mr. A. B. Farmer the Secretary of the Tax Reform League, "but there is so little accurate knowledge on the subject that we have invited Mr. Doty, of the Manufacturer's Appraisal Co. of Cleveland to make this demonstration at our Annual Convention."

WHY EXPERTS DIFFER.

Before the National Association of Real Estate Exchanges a year ago Mr. Doty gave an address on the Unit System of land valuation, and explained the difficulties that faced assessors in land valuation.

The land value of city lots is simply a site value. The land of a city lot may be fertile or it may be barren. This has nothing to do with its value; this value arises entirely because of its location amid the people of the city through its frontage. The value of city lots varies as do the size and location of this frontage. The value is modified by the amount of land that is connected with the frontage; this is called the depth. Therefore, there are three things that affect the value of the city lot, and I name them in the order of their importance; location, size, shape.

In ascertaining the value of any particular lot these three elements must always be taken into consideration, and it is because of the existence of those three differing factors of value that we find it practically impossible to compare the value of one city lot with that of another. In comparing the value of two lots, it is necessary to compare three factors on the one side with three on the other, and the human mind does not quickly, accurately and satisfactorily compare three things with three things. It is the attempt to make comparisons in this way that produces the uncertainty in arriving satisfactorily at the comparative value of city property.

It is largely the attempt to make comparisons of lot values in this impossible way that produces the very wide differences of judgement sometimes noted in so-called expert opinions of value in our courts and before our taxing boards. Each expert views the matter in question with many affecting factors in mind; and these affecting factors are as numerous and different as the experts. Heretofore there has been no method devised by which each expert would be compelled, or even expected, to employ factors for the basis of judgement the same as other experts attempting to solve the same problem. The use of the Somers Unit System eliminates the side issues or the subsidiary factors of site valuation and simplifies the problem to the end that different judgements of different men are weighing only the same factor of value. This makes it easy to use the judgement and knowledge that the appraiser or expert has. And when we make a task easy of performance, whether that task be mental, physical or mechanical, we make for efficiency and accuracy.

Therefore the Somers Unit System does two things at the outset, that are highly important namely:—

First: It makes it easy for the appraiser of land value to use the knowledge and judgement that he possesses.

Second: It makes it easy for others in the community to convey their ideas of value to the appraiser, thus giving him valuable, because approximately accurate, information and judgement of other people.

To return now to the classification of the three factors of value, location, size and shape. If we eliminate any two of these factors we can easily make a comparison. For instance, shape with size. Or size with location; this lot is 50x100, that lot is 48x48. Or location with location, this lot is on a street that is twice as good as a street containing the other. Anyone of these comparisons is intelligible and certain, and anyone can understand them, and we find we have a rectangular lot, 50x100, on a good street to be compared with a square lot on a poor street. Who is there that can accurately, quickly and satisfactorily determine the relative values of these two lots?

Under the Somers Unit System we eliminate size and shape. This we do by assuming a frontage of one foot wide with a depth of 100 feet in every case called a unit foot, and locating said unit foot away from corner or alleys. Thus, under the Somers Unit System any figure given for value is always for the same size and shape. When we say that a unit foot on a certain block is worth \$1000, and that on another block in another part of the city is \$500, we mean that the first street is twice as good as the second. That is a knowledge that is well known in the city by most people. If the first street is not twice as good as the other, the knowledge of its relative value is well known in the city to many people, and the true relation may be arrived at in many ways. This makes it possible for us to compare location with location, and location is the chief factor in the value of a city site or city lot.

The practical way of getting at this information is something as follows:—

The first thing that is done is to take that section of the city which contains the highest values and make a diagram showing streets only; wipe the lot lines off. They are confusing and are unnecessary for the formation and judgement of values under this system. There are various ways of ascertaining unit values. What is known sometimes as the community knowledge is perhaps the best. In Cleveland, the Board made a diagram of the central part of the city and invited in perhaps fifteen of twenty of the best known and best real estate men. After several hours of discussion and consideration, these real estate men and the five members of the Board put upon the diagram certain tentative unit values. The diagram showing these values was published in the newspapers and on slips of paper and circulated, and the public was invited to criticise these units. After about a week the Board began to hold public meetings and many people came in to criticise these values.

TO TEST TORONTO VALUES.

At the Tax Reform League's Convention a practical application of the Somers' plan will be made on a central block of city property, and leading real estate men will be invited to assist. The proposal is creating great interest.

Annapolis Co. S. S. Association

Interesting Sessions at Lawrencetown on Monday and Tuesday.

The annual meeting of the Annapolis Co. Sunday School Association was held at Lawrencetown, Aug. 28, and 29th.

The president, R. J. Meagher, occupied the chair. After the devotional exercises Rev. H. G. Mallick of Lawrencetown gave the delegates a hearty welcome to work and also to the hearts and homes of the people of Lawrencetown.

There were forty-six delegates present, twenty schools being represented. The reports given by the representatives of the different departments showed many encouraging features. The Treasurer reported eighteen dollars yet to be raised by the county. The Provincial President Mr. O. P. Goucher was present and addressed the Association in a few hearty words of greeting.

A resolution was passed expressing deep regret at the resignation of the Secy-Treas., Miss Annie Young, and sincere appreciation of her efficient work and self-sacrifice for so many years. Mr. Wm. Jefferson was appointed in her place. Addresses were given by Revs. B. Porter, Wm. Phillips and V. McNeil, all helpful and inspiring to the Sunday School Workers.

The discussions led by the Field Secretary Dr. J. W. Brown proved to many the wisdom and practical use of the several departments. Dr. Brown's whole soul is in this work and his presence must be an inspiration to any Association.

A vote of thanks was rendered to the Lawrencetown people for their cordial hospitality to the delegates and visiting friends.—Outlook.

In the West

A recent issue of the Moose Jaw Sask. Morning News refers to the splendid manufacturing exhibit representing that city at the Dominion Fair, Regina, which was arranged by Dr. Guy C. Pelton of Yarmouth. Dr. Pelton is also one of the enumerators for the voting lists for the coming elections for the city of Moose Jaw. Writing to the Times Dr. Pelton says that in recent conversation with a traveller, who is a journalist representing the London Illustrated News, that gentleman expressed himself as pleased with Nova Scotia as the banner province of Canada, expressing surprise that settlers were passing through Nova Scotia and going west. As the London journalist has covered the continent from coast to coast his preference for Nova Scotia is very complimentary. The former Yarmouth journalist advises that the Yarmouth Board of Trade keep a sharp watch for visiting newspaper and magazine men, as it is in this way the west is advertising itself. The London journalist spent three days in Yarmouth and was highly pleased with its beauties, though he received no entertainment of any kind during his stay.—Yarmouth Times.

The first thing that is done is to take that section of the city which contains the highest values and make a diagram showing streets only; wipe the lot lines off. They are confusing and are unnecessary for the formation and judgement of values under this system. There are various ways of ascertaining unit values. What is known sometimes as the community knowledge is perhaps the best. In Cleveland, the Board made a diagram of the central part of the city and invited in perhaps fifteen of twenty of the best known and best real estate men. After several hours of discussion and consideration, these real estate men and the five members of the Board put upon the diagram certain tentative unit values. The diagram showing these values was published in the newspapers and on slips of paper and circulated, and the public was invited to criticise these units. After about a week the Board began to hold public meetings and many people came in to criticise these values.

TO TEST TORONTO VALUES.

At the Tax Reform League's Convention a practical application of the Somers' plan will be made on a central block of city property, and leading real estate men will be invited to assist. The proposal is creating great interest.

LABOR DAY SPORTS AT MIDDLETON

Two Base-ball Games, D.B.C.A. vs. Middleton—Athletic Sports on M. A. A. Grounds—Loring Andrews, Middleton's Promising Young Athlete, Takes First in Four Events and Ties Fifth.

The Middleton Amateur Athletic Association with its usual foresight and energy put on one of the best programs of field sports, which has been held in this part of the province for some time. The program was started with a Callithumpian procession at 10.30. Next on the program was a ball game between the D.B.C.A. of Dartmouth, made up of the pick of the Dartmouth League. The game was scheduled to start at 11.30, but owing to the west-bound train being late the game was not called until 12.30. The line up of the teams for the first game was as follows:—

D. B. C. A. MIDDLETON.
Levy c. Roop
McIntosh, p. K.T. Andrews
Barnstead 1st L. Andrews
Hart 2nd B. Andrews
Phalen 3rd Phinney
D. Patterson 4th Eagles
Heisler 1st Hatt
Doyle c.f. Spurr
J. Patterson r.f. Potter

This game was very exciting, though even in score, both teams giving a poor exhibition of fielding. The game was marred by overthrows, poor judgement and errors. The D.B.C.A. if anything put up the better game in the field and but for Andrews' error in striking would have won the game. Andrews is one of the best amateur twirlers in the province and gives promise of soon making a name for himself in base-ball circles. He had twelve strikeouts to his credit, which is good considering the batters he was up against and the condition he was in. McIntosh had six strikeouts. The game ended six all in the ninth innings and as they had another game to play the game was called off.

SPORTS

At half-past two the athletic sports were called. These consisted of 100 yds. dash, high jump, 220 yds. dash, broad jump. Shot put, 440 yds. dash and pole vault. Mr. Fred Shaffner, the general race track man, was the announcer and though he got slightly mixed in the "heats," yet gave good satisfaction.

These events were closely contested and very interesting. Loring Andrews took first in four of the events, one hundred yards dash, high jump, one hundred and twenty yards dash, broad jump and pole vault, and tied in the high jump. Loring is one of the best in the broad and high jump, in the province, and promises some day to break the Maritime record. In his first year at college he made the track team and took part in the Intercollegiate Meet on the Wanderers' grounds, Halifax, and took first in the high and broad jump for his team. Middleton may well be proud to claim him as one of her athletes.

The last event was the second ball game, which was called as soon as the sports were over. The teams had the same line up as in the first game with the exception that the short stop and pitcher changed places on the D.B.C.A. team, and Reginald Buckler played in place of Hatt and Saunders in place of Eagles on the Middleton team. This proved to be the best game of the two, better fielding being done by both teams. The Middleton team batted better and connected with the pitcher for five runs, the D.B.C.A. boys failed to connect with Andrews' teasers. The game ended 5 to 1 in favor of Middleton. Andrews had eleven strikeouts and McIntosh 2. McIntosh was put back in the box in the eighth inning.

In the evening a drama entitled "Willowdale" was put on by local talent in Morrison's Hall. The play proved one of the best ever given there and the applause of the packed house showed that the good acts of the participants was appreciated. The management are considering the proposal to put this play on in Annapolis and Bridgetown should they do so undoubtedly they would receive every support and a crowded house, as the play is first-class in every particular.

Motor Boat Cruise

Louis G. Willett has returned to Boston, after a visit to his friends in the Annapolis Valley, making the cruise, with a party of friends, in his motor boat. His cruise is described in a Boston journal as follows:—"Louis G. Willett, of 49 Bluff, St. commandr of the Metropolitan Yacht club, accompanied by his wife, F. J. Waite and Mrs. Sophie Stuart, returned Thursday from a month's cruise along the coast of Maine, Nova Scotia and New Brunswick, in his famous thirty-three-foot motor boat The Ivanhoe. The party left here July 7, making a run to Portland. They also stopped at Harpwell, Rockland, Cape Newagen, Seal Harbor, Jonesport, Lubec, Grand Manan, crossing the Bay of Fundy into Digby and up the Annapolis river to Granville, which was Mr. Willett's home, though he has not resided there for many years. After a week's stay at Granville, which was spent trouting and boating, the party started for home.

The trip going east was made in four days, the weather being perfect. While through the east Mr. Willett visited many yacht clubs and speaks very highly of their hospitality. Coming home they crossed the Bay of Fundy to St. John where they spent a few days with relatives. He also stopped at Eastport. They then came in contact with much rough weather and fog which caused them to put into many small harbors, among them being Cutler, South Addison, Prospect Harbor, Port Clyde, West Southport and Kittery. While at Cutler the party was entertained on board the sloop yacht Sirene of Boston. Mr. Willett returned the compliment by serving a lobster supper on board the Ivanhoe. The trip was enjoyed by all. Although The Ivanhoe is a trim little craft for such a long trip, she is propelled by a nine-horse power Stanley engine. In making the trip they have covered over one thousand miles. Mr. Willett has received many congratulations on his courage and skill in taking such a long trip, but he is a man with quite an idea of navigation for an amateur, and has great confidence in his boat, this being his third motor boat cruise."

Vessels Suffered in Gale Off Atlantic Coast

(Canadian Press.)

Wilmington, N. C., Aug. 30.—The fury of the storm along the South Carolina and Georgia coast on Sunday and Monday is reflected in the number of marine casualties reported at Southport. The steamer Fortuna five hundred and forty-two tons, Capt. Wells, lumber laden from Charleston to New York, is reported dismasted, forty-five miles southward of Frying Pan shoals and in a dangerous position.

Charleston, S. C., Aug. 30.—The Clyde Line steamer Apache made port yesterday after a thrilling experience off this harbor during the hurricane. Passengers wore life preservers for several hours and were prepared to leave the ship at any moment. It is stated by passengers that the stokers were kept at work at the points of revolvers, although the captain denies this.

Washington, Aug. 30.—(Canadian Press) Six torpedo boats were swept ashore and the Charleston navy yard was damaged to the extent of \$30,000 by the storm on the Georgia and South Carolina coast.

Three Men Killed By Falling Tree

(Canadian Press Despatch.)

Ottawa, Ont., Aug. 28.—Three men Alphonse Sching, Ottawa, Jos. LeBlanc, Montreal, and Laurier Marincau, of Three Rivers, Que., were killed at East Templeton, about five miles below the city, on the bank of the Ottawa River by the falling of a tree during a fierce wind and rain storm, which raged about six o'clock last night. The victims were members of a party of seven, who went down the river on a camping trip Saturday afternoon. They pitched their tents under an apparently sound tree, about thirty inches in diameter. Seeing the approach of the storm last night all got in the tent. The three men who were killed were all in the back of the tent. When the first crackling of the tree was heard, the others plunged out through the opening but Sching, LeBlanc and Marincau were too far in and were caught.

Yarmouth Captain's Perilous Experience

Discipline and Good Management of Hardy Skipper Lands the Castaways on Tahiti Island, After Twenty Days Fight With Thirst and Sea Perils

(New York World.)

A classic of sea lore on South street will be the story of the wreck of the Puritan, a four-masted bark sailing under the British flag, Capt. F. W. Yeoman-Chapman of Yarmouth, N. S., her athletic skipper, has reached New York and is at the Stevens House.

It was on May 29 that the Puritan sailed from Newcastle, N. S. W., for San Francisco. She was abandoned in the South Seas in latitude 142 west, 1,000 miles south-east of the island of Anaa, Tahiti, just before midnight on June 27.

The crew was made up in Europe of odds and ends, with two or three very good men, one of whom, a hero, was Collins, the second mate, a native of Australia, who in a twenty-day fight with the horrors of thirst refused to drink from the scant supply of water.

Once a week lifeboats had been swung out for drill, and the eight-gallon breaker in each boat filled. For fourteen days before June 20 three gales of terrific force, with high cross seas, tormented the Puritan and tore off her three lower topsails. She labored, strained, rolled groggily, and her decks were awash. She took a roll with one rail under, and stayed there, the Pacific Ocean for keeping the fore and aft line of her keelson. Tons of water filled her deck to leeward, and most strange of all, so dynamic were the seas that burst over, even from leeward, that they crashed inboard, cascading the water already on deck over the windward bulwark in a perfect waterfall. It was a remarkable exhibition of the effects of a revolving storm. The bark was catching it on both sides. She was in the tail of it.

On June 20, in 34.20 and 150.04, while the ship was hove to under lower topsails, the weather was coming from the north-northeast in fierce squalls and a heavy cross sea running, the carpenter reported fifteen inches in the well. Pumps were manned for seven hours, the water reduced to eight inches, and hold and forepeak were searched in vain for leaks. By the next day the weather moderated, but the ship was leaking two inches an hour, and a search showed a slight leak in the butt-truss abreast of the mainmast.

On June 22 the ship was found to "be working amidships." Her decks beams were adrift on the starboard side. A butt had started somewhere. For five days weather continued squally from the northwest, with rough seas and skies of threatening appearance. The ship was kept under easy sail and headed to the northeast in the hope of finding better conditions. By June 27th there was nearly three feet of water in the

well, and on that afternoon all hands were called. The watch below brought up coal and fresh water and the donkey pump was started. But the water gained from one to two inches an hour. At 5.45 p.m. the plunger of the port steam pump broke down, and at 6.40 the injector failed. It was impossible to make repairs. The steam gear was discontinued and hand pumping resumed with the only pump left, that to starboard. Hundreds of tons had been pumped out of the ship, but the water still gained. Coal and cement, the latter from broken joints and started butts, choked the pumps.

At two bells of the first watch that night, the water having gained seven inches, and as another gale was coming out of the southwest, a consultation was held, and it was agreed to quit the ship. The Puritan was rolling drunkenly and spilling water over her decks. At midnight Capt. Chapman with the second mate and ten men got away in the starboard life-boat, after Mate Hatfield with the carpenter and eight men had left in the port. As Collins, the second mate, was on his way to take his place in the boat he found a breaker of fresh water by the donkey pump. Not a man in the boat would come back to help him fetch it, and it was too heavy for him to carry alone.

The Puritan was abandoned, and two hours later, at a distance of a mile her red light was seen for the last time.

The twenty-two men in two boats were now bound for Anaa, one thousand miles away to the northwest. The captain having lost his hat overboard, he cut off the bottom of one of his trousers legs and made a cap by tying up one opening. Mr. Hatfield had two breakers of water for ten men in his boat. The captain had only one cask for twelve men. Mr. Hatfield passed over one bucket of fresh water, increasing the other boat's supply supply to six gallons.

MATE TELLS WHAT HAPPENED.

Second Mate Collins confessed that he had left the second cask on board the ship because nobody would leave the boat to help him fetch it. He had not told the captain at the time, not caring to annoy him. Capt. Chapman, at the time Collins abandoned the full keg, was carrying his chronometers to the life-boat as tenderly as if they had been babies.

They started away with three-quarters of a tumbler of water three times a day per man, and on the first day they made a good run of one hundred miles to the north. The boats kept company until ten p.m. on June 30th (continued on page four)

Pure Water Supply

How Forests May Aid in Obtaining It. (H. R. MacMillan, in Canadian Century.)

It is becoming evident that it is more advisable for a community to secure its water supply from a small stream or lake over which it may exercise control, than to take it from a larger body of water which is public to many communities, cared for by none, and is the repository of the sewage of all. Acting upon this principle, many American and a few Canadian cities have acquired the land surrounding the sources of the small lakes and streams furnishing their water supply. Not only have communities done this, but in some instances where the water is supplied by a company, or private individual this policy has been followed. Such land is usually rough, rocky, of little value for any other productive purpose and consequently cheap.

The original idea in buying the land was to withdraw it from settlement in order that there might be no danger of pollution of the water. Further investigation proved that when such land was covered with forest it not only returned a profit as shown above, but exercised a beneficial influence on the water supply itself. Small waterheds, such as those from which many of our cities derive their water supply, depend upon the local precipitation of moisture. This moisture escapes in four ways from the ground upon which it falls; by evaporation, transpiration, surface run-off and seepage run-off. The water which evaporates, or which is carried off by transpiration through vegetable matter, is lost. It is upon the surface run-off and seepage run-off, which are, under ordinary conditions in Eastern Canada, about one-half the total, that the reservoir must depend.

Evaporation is less in the forest than in the open. The rate of evaporation depends upon the exposure of the sun and wind. A thick forest cover protects the forest from the wind and sun, cools the air and by thus standing between the moisture-soaked ground and the absorbent air gives rain more time to soak away into the earth to feed streams and springs. Growing vegetation uses each summer a great deal of water, which is gathered from the soil by the roots and given off through the leaves and green foliage. The amount of this water used each year varies from about fifty to one hundred pounds for every pound of leaf matter. The amount used by forest trees, especially conifers, is less than one-half the amount used by forage crops and grass, so that for this reason alone a watershed covered with trees should return more water to a reservoir than if it were under any other cover.

It is important that the water which reaches the reservoir by surface drainage and seepage should be pure and clean. If the watershed is denuded the soil bakes in the sun, becomes hard, and during and after rain sheds the water with such rapidity that the loose particles of soil are carried away with the flood, and the reservoir is filled with turbid water. Owing to the rapidity of the run-off the underground seepage is under such conditions very little. On the other hand if the watershed is forested the surface of the ground is covered with a deep sponge-like mulch of vegetable matter, which absorbs the water and prevents a rapid run-off, except under cloud-burst conditions. At the same time the surface of the soil is so bound together by interlacing roots that it is not easily washed away. The consequence of this is that surface run-off is slow and carries very few impurities, and the underground seepage is much greater comparatively than from any other type of soil cover. The water from this seepage is later given out clean and pure in the form of springs, the most desirable source of domestic water supply.

There is no doubt that when more intensive conditions prevail in Canada, when it becomes more necessary to devote every acre to its most productive purpose, and when the many benefits of communal forestry are more generally understood there will be many towns and cities that will seize this opportunity of devoting to a useful, beautiful and profitable crop areas which now shame our economies and blunt our sensibilities by lying idle and ugly.

For bowel complaints in children always give Chamberlain's Colic, Cholera and Diarrhoea Remedy and castor oil. It is certain to effect a cure and when reduced with water and sweetened is pleasant to take. No physician can prescribe a better remedy. For sale by all dealers.

Peroxide of hydrogen is one of the best antiseptics for family use. It should be applied to a flesh cut where there is danger of blood-poisoning from rust or other foreign substance.

FOR SKIN IRRITATION

We Guarantee Your Money Back if Not Satisfied.

We have an ointment possessing extraordinary power to permanently relieve all forms of eczema skin eruptions, pimples, blotches, ringworm, acne, itching, scaly scalp, hives, all forms of itching and irritation caused by insect bites. Its power to soothe ulcers, sores and wounds is very pronounced.

We are so positive that Rexall Eczema Ointment is unequalled for overcoming these ailments that we sell it with our personal promise that it will not cost the user anything unless it in every way gives satisfaction. We exact no promise and in no way obligate the purchaser. You must admit that we could not afford to make such a broad liberal guarantee, except we are certain we could substantiate our claim.

Rexall Eczema Ointment is a grayish-white, pleasant smelling, antiseptic, cooling healing salve that is strongly germicidal. It destroys the germs that penetrate the skin and cause eczema and other tormenting skin ailments. A remedy must do that to be effective, for in no other way can such diseases be overcome.

Rexall Eczema Ointment is ideal for the treatment of skin irritations peculiar to children, for barber's itch, and for sore itching feet.

It is positively the best remedy we know of and we urge you to try it at our risk. Two sizes 50c. and \$1.00.

The Rexall Store, Royal Pharmacy, W. A. Warren.

PERILS OF THE AIR.

Almost every aviation meet brings its toll of disaster and death. Notwithstanding improvements in flying machines and the experience of aviators, the number of accidents continues to increase. In 1909, four lives were lost; in 1910, there were thirty-four fatalities, and up to the present this year, thirty-six lives have been sacrificed. Experience seems to be no guarantee of safety. The aviator who lost control of his machine and was dashed to the ground, last week at Erie, Pa., had made two hundred and fifty successful flights in different countries. Indeed, the aviator's chances of life, seem very small, if he continues in his efforts to navigate the air. There are so many circumstances over which he has not yet gained control, so many contingencies against which it seems to be impossible to provide. The frightful disasters in connection with the recent great aeroplane race from Paris to London and return have demonstrated the danger of the gasoline motor on air-ships, and some means will no doubt be devised to minimize the possibility of gasoline tanks taking fire and exploding in mid air. But the perils from the intense cold of high altitudes, the sudden changes of temperature, the breaking of some part of the mechanism, or its failure to act at the right moment, still remain. It will require a much longer and more successful experience in his attempted conquest of the air to prove beyond a doubt that man was made to fly.

SECRET EARTH REMEDIES.

There are several earth remedies which doctors make their best cures with, yet some well educated people have never heard of them. Such remedies are never advertised in newspapers. No testimonials of cure are given. None but doctors and druggists have them. We consider the public should be as well acquainted with such remedies as they are with their food and raiment.

Some refuse to believe what we have to say of EARTHINE. We can prove that our business is honest and can tell you why earth remedies are kept a secret.

N. H. REED, H. D. Shelburne, N. S.

OLD NEWSPAPERS.

The mere fact that moths cannot read is no reason why they should detest newspapers, but they do nevertheless. It isn't exactly the newspaper or its editorial policy that moths dislike. It's the ink used in printing the type that makes the moths stay away. That is why, in the absence of moth-proof bags and cedar chests, some housewives pack their furs and woolens away wrapped in newspapers at the end of the winter season and find that it is a satisfactory way of preserving them against the ravages of moths. There is nothing better than old newspapers for use under the carpets for the same reason.

Old newspapers have many other uses as well. Wet in water they serve to clean off the stove splendidly. Crushed newspapers are excellent to clean lamp chimneys. They can even be used for use under the carpets for an emergency.

Newspapers dipped in lamp oil are useful for cleaning windows. Irons not much soiled can be rubbed on old newspapers and thus made fit for use. Dipped in lamp oil they are splendid to rub the outside of the dishpan. They keep it bright and shining. Torn in shreds, slightly dampened and scattered over the carpet, the keep down dust when sweeping. They clean the sink of its grease and sediment. Nothing is better for the greasy paper can be at once burned after use.

Many times folded newspapers will serve as a mat to stand hot and blackened pots or kettles on and save soiling the kitchen table. The kitchen stove is kept bright after the cooking of each meal with old papers, and this saves many polishings.

Lure of City For Farmers' Sons

Sixty per cent. of the young men who wear blue uniforms and the hot weather straw caps on the trolley cars are farmers' sons. Most of them have pulled and ploughed and ploughed lines over the backs of refractory mules long before they ever pulled a bell cord.

Half the clerks in the big railway offices in St. Louis are the boys from the smaller cities and the little railway stations where the fast trains never stop. Fifty out of every hundred of the young men who are putting links in their spines and ruining their eyesight over long columns of freight earnings and "ton miles," know when to plant potatoes and how to plough corn.

Every other waitress in the quick lunch places down town was once a country lassie. That is, they were born and raised up in one of those little towns that dot and speckle the state maps.

Thirty out of forty of the men who run trains, hammer telegraph keys and make out bills of lading for the railway systems were recruited from the farms.

Many of the little stenographers who scurry in and out of the office buildings at the lunch hour were once upon a time little pig-tailed lassies, who played about the big yards of some little half forgotten town with elm shaded streets.

When a middle-aged man or woman goes into the city to make his or her home there it is nine chances to ten they have failed at everything they have ever tried in the little cities, and have come to the big town to start a boarding or a rooming house.

And nine out of every ten of them is certain that the city, any city, is the very wickedest of wicked places.

Back in the country, where they came from, the big town was held up to them as a symbol of sin. The older folk talked in low tones of its snares and pitfalls, of the sin and degradation that were everywhere in the big town.

Why do they come? Many of them fall and drag themselves back to take up life where they left it out on the farms. The great majority manage to live on the salaries they receive or the wages they are able to earn. A few of them become wealthy and successful and are able to go back and buy up a whole townsite around the old homestead if they desire.

J. Hood is a street car conductor. He has been picking up nickels and stopping and starting a car for some months. He makes no princely salary nothing like what he dreamed of making when he came into St. Louis of the farm and applied for a job.

"Position," he called it then, and that was the way the little paper back home spoke of it later on. If he works every day, full time and a reasonable amount of overtime, he cannot make as much as he would if he had stayed on the farm.

He realizes this and has gone back home once or twice, convinced that he would stay there and plough corn and call hogs to the end of his days. He came back in less than a week.

Things were too still and too terribly quiet. He was used to that monotonous undertone of a great city, steadily drawing its breath. He could listen to the mournful call of the whippoorwill, but his heart hungered for the screech and clang of trolley wheels grinding around a sharp curve. He came back from his last visit in just twenty-four hours.

A ROYAL WEDDING.

St. Petersburg, Sept. 1.—King Peter of Serbia, his daughter, Princess Helena, and the heir to the Serbian throne, Prince Alexander, will arrive at Peterhof today for the marriage of Princess Helena to Prince John Constantinoivitch, son of Grand Duke Constantinoivitch, on Sept. 3.

Municipal Forests

Many German Villages Reap Handsome Profits. (H. R. MacMillan, in Canadian Century.)

Nearly all the villages in the State of Baden own and manage forests. Oberforster Jaeger of Donaueschingen Germany, writes concerning the forest under his control: "The village of Braunlenger has 1,601 inhabitants and owns 4,507 acres of forest. The amount yearly cut is 2,800,000 board feet of wood, comprising both lumber and firewood; of this all the firewood is given to the citizens as "Citizens' Gifts" up to 2,500 board feet each (about seven cords each); and a total of about 100,000 board feet of firewood (about two hundred cords) is given to schools, town halls, churches and other public buildings. The lumber, amounting to about 1,500,000 board feet annually, is sold and brings to the community an average annual net income of \$21,000, so that the community is not only free from all communal taxes, but is also able to establish modern works, electric light plants, a water system, schoolhouses, churches and other buildings. Even the smallest villages profit by this commonsense use of the forest.

"The village of Aulendorf consists of two hundred and twenty inhabitants and owns one hundred and sixty-three acres of forest. The forester gives to each citizen about two hundred board feet (about four cords) of firewood annually and sells annually eighty-five thousand board feet of timber, which clears for the community more than one thousand four hundred and forty dollars, with which the total expenses of the small village are met. The annual yield of this communal forest is one hundred and thirty-seven thousand five hundred board feet."

The examples quoted are not exceptional. They are representative of the experience of thousands of villages in Europe. The higher price of timber in Europe, the steady market for all the products of the forest, the leaves, the small trees from thinnings, the branches and the stumps, as well as the log contents of the trees, make the receipts higher than they would be in Canada. In addition, another source of labor. Men are hired for sixty cents a day; much of the work is done by women and boys who receive about forty and twenty-five cents each, respectively, per twelve-hour day.

ST. ISIDORE, P.Q., AUG. 18, 1904 MINARD'S LINIMENT CO., LTD.

Gentlemen—I have frequently used MINARD'S LINIMENT and also prescribe it for my patients always with the most gratifying results, and I consider it the best all-round Liniment extant.

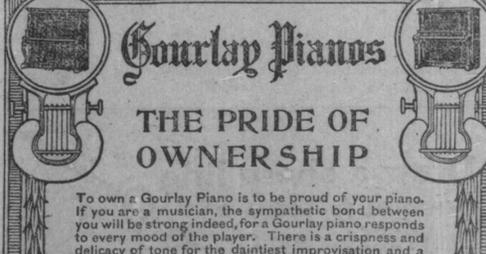

Yours truly,
 DR. JOS. AUG SIROIS

FOR HARD WEAR.

When making a serge skirt that is to have hard wear, try the effect of lining the front breadth, says the New York press. Lined skirts are seldom seen nowadays and would be much too heavy for summer; but one that has no lining is very apt to wrinkle across the front, especially if it fits well over the hips. When cutting the front breadth, cut with it a piece of silk, saten or some very thin lining and proceed to make up the skirt in the usual way. You will be surprised to see how much longer your skirts last, and how much nicer they look to the very end, if they are made in this way.

DIGESTION AND ASSIMILATION.

It is not the quality of food taken but the amount digested and assimilated that gives strength and vitality to the system. Chamberlain's Stomach and Liver Tablets invigorate the stomach and liver and enable them to perform their functions naturally. For sale by all dealers.

Gaurlay Pianos

THE PRIDE OF OWNERSHIP

To own a Gaurlay Piano is to be proud of your piano. If you are a musician, the sympathetic bond between you will be strong indeed, for a Gaurlay piano responds to every mood of the player. There is a crispness and delicacy of tone for the daintiest improvisation and a richness and volume for the most exacting bravura passages.

If you are not a player, but a lover of music, the pleasure of your friends' enthusiasm will more than repay you for the amount of your investment, to say nothing of the extra years of service over an ordinary piano. Write for Catalogue and prices.

Joker's Corner

WAS FIRM BUT COMPROMISED

The young man had entered that mysterious realm matrimony, and as it was his first offence his father was handing him some paternal advice as to how he should treat the young wife. "When you have any little differences of opinion, my son," he said to the boy, "if you can't persuade Margaret that you are right—and you probably can't; for they are all about alike—you must compromise. Be firm; yet be considerate and compromise."

"Yes, father," replied the son. "I will remember a little experience," and a reminiscent expression came over the old man's face, "on the very threshold of the married life of your mother and myself, and it was the basis of all future disputes. It was this way; I wanted to spend the summer, our first vacation together, in Maine, and your mother wanted to go to Saratoga. That was thirty years ago. But I shall never forget how considerate I was with your mother, and how we compromised, avoiding all dispute."

"It was this way. We stayed from Saturday noon to Tuesday morning at Bar Harbor; and then we spent the rest of the summer at Saratoga. Yes, indeed," the old man added with a sigh, "that's the only way to deal with a woman. You must be firm; but be willing to compromise a little once in a while, as I have done with your mother."

"Saunders," said an American, "did you ever read the history of America?" "Awee, I canna' say I hev, Saunders replied. "Then I'll lend you the book," said the American. "I'd like you to read about George Washington."

"What about him?" Saunders inquired, coldly. "George Washington," said the American, "was celebrated in history as the boy who could not tell a lie." "Could he not?" said Saunders. "Man, there's no muckle to boast a boot in that. He couldn't lie, ye say? No, 'e Scots hae a higher standard o' veracity. We can lie, but we won't."

ETHICS OF VISITING. The two children were playing in the yard at the home of Constance. She remembered the teaching of her parents, but she wished to play a certain game, and Taylor desired to play another game. "You ought to play my game," said Taylor, "because I'm your visitor, and you ought to do what I want to do."

Constance realized the truth of this, yet she did not want to give in to her little friend. "Let's go over to your house, Taylor," she said. A school teacher who asked all the younger children to bring a certificate from their parents giving their date of birth. One morning he found a little boy crying bitterly. When questioned as to what was the cause of his grief, he said: "I forgot my excuse for being born."

AT LAST, A CURE FOR RHEUMATISM

"Fruit-a-tives Cured Me" Says Mrs. Baxter. "I was a helpless cripple from rheumatism for nearly a year. All down the right side, the pain was dreadful and I could not move for the agony. I was treated by two physicians without help. I saw 'Fruit-a-tives' advertised in 'The Telegram' and decided to try them. After I had taken one box, I was much better. When I had taken three boxes, I could move around and the pain was almost gone. After taking five boxes, I was entirely well again. The cure of my case by 'Fruit-a-tives' was indeed splendid because all the doctors failed to even relieve me. 'Fruit-a-tives' cured me."

Mrs. LIZZIE BAXTER. 4 HOME PLACE, TORONTO, Dec. 15 '09.

In hundreds of other cases, "Fruit-a-tives" will positively cure every case of Rheumatism, when taken according to directions. 50c. a box, 6 for \$2.50, or trial size, 25c. At all dealers or from Fruit-a-tives Limited, Ottawa.

GERMANY MENACE TO PEACE OF THE WORLD.

1900 is to be used in erecting, a Rev. Clarence MacKinnon Says Fatherland Needs Expansion and Peace is Threatened. Winnipeg, Aug. 25.—That the armaments of the German Empire are a menace to the peace of the world, was stated by Rev. Clarence MacKinnon, of Pine Hill College, Nova Scotia at the Canadian Club luncheon today. He said Germany had created a real anxiety which had permeated all classes of the old country and was rapidly spreading to Canada. The peace of the world was constantly being threatened and at times the stability of the British Empire was endangered.

People could not refrain from anxiety when their public men, statesmen, journalists and commercial men the men who formed public opinion saw the danger. There was something to all the alarm when they were assured that the grounds for panic were unreal, or that they could be easily met by forethought in preparing for the coming event. The ground for the fear which was felt by the British people was the imperative need of expansion in Germany. During the last thirty years the population of the Fatherland had increased by twenty millions, and was growing at a rate that was greater than that of Canada.

The annual increase was about 1,000,000, and as there was no room for expansion in Europe they had to seek outside shores where they could send their surplus population. When they saw that the British people kept all the vacant lands of the world, they thought that such was a "dog in the manger policy." They resolved to build a fleet which would be a match for the British in time. The second reason was the imperial ambition of Germany. They had been for a long time the equal of any nation but at the present time they found their place in the world's politics passing. They had adopted Bismarck's policy of blood and war, and believed that they could match their foe with the sword.

Makes Hair Grow

Warren, druggist, has an invigorator that will grow hair or money back. The time to take care of your hair is when you have hair to take care of. If your hair is getting thin, gradually falling out, it cannot be long before the spot appears. The greatest remedy to stop the hair from falling is SALVIA, the Great American Hair Grower, first discovered in England. SALVIA furnishes nourishment to the hair roots and acts so quickly that the hair are amazed. And remember, it destroys the dandruff germ, the little pest that saps the life that should go to the hair from the roots. SALVIA is sold by Warren under a positive guarantee to cure dandruff, stop falling hair and itching scalp in ten days or money back. A large bottle costs 50c. The word "Salvia" (Latin for Sage) is on every bottle.

A ROMANTIC FARM.

Sandwich Golf Club Has Bought the Prince Homestead.

The town of Sandwich has long been distinguished as a place of beauty as well as for its historical interest, and one of the most lovely, as well as the most interesting spots in the vicinity has been secured for the new golf and country club, in which many men from Windsor and Detroit are interested. The Oak Ridge Golf Club was formed some ten years ago and had a nine-hole course, on rented property below Sandwich, but as a long lease could not be obtained it was decided to give up this property and purchase grounds where permanent improvements might be having some consideration that such expenditure would not be wasted. With this in view an option was secured on fifty-six acres of the Park Farm, and a stock company was incorporated and sufficient stock subscribed to purchase this property and provide funds to make a good start towards laying out a golf course and fitting up a clubhouse. The credit of originating this scheme and successfully carrying it through is due to Mr. R. M. Morison, and shared by those who have made such a good purchase, for in a few years this property will be worth double the money expended. This venture will alter one of the most romantic places in western Ontario, for Park Farm was long ago the home of Col. John Prince, conspicuous for his forceful conduct during the Patriot rebellion in 1838, and particularly that part of it which culminated in the battle of Windsor, where, as Col. Prince's official report states, "of the brigades and regiments twenty-one were killed, besides four that were brought in at the close of the engagement, all of whom I ordered shot, and it was done accordingly." This was certainly a dramatic measure, and a military council looked into the matter and it was discussed in the Imperial Parliament, where the great Wellington himself spoke in behalf of Col. Prince, declaring that the circumstances required vigorous treatment; that no mob should be allowed to enter a country and march against unprotected citizens without being severely dealt with. Certainly the shooting of these prisoners cleared Essex County of these stying themselves Patriots. The coming of John Prince to Sandwich was an event in its history for he introduced foreign tastes and a flavor of the English gentleman of leisure. He had been a barrister in Gloucester, England, and came to Canada in search of change and sport. It mattered little to him where he settled, so long as game was abundant and the company congenial. These conditions being fulfilled in Sandwich, so Sandwith he came in 1834, accompanied by his wife, three sons, five English servants, and a box of golden guineas so heavy two servants, man and wife, decided to try farming, so Prince looked about him, and finally purchased a beautiful piece of rolling land directly behind Sandwich. He stocked the farm with thoroughbred cattle imported from England, built a house, and placed his retainers on the land. The woman, however, was an expert cook, and, tiring of country life, she and her husband established themselves in a hotel in Sandwich, where for years their house was famous for old English comfort and the excellence of its dinners.

The Prince then decided to occupy Park Farm himself. He added two large wings to the house, and turned it into what he called a shooting-box. He made the grounds beautiful with hedges, gardens and miniature lakes, he imported pheasants, peacocks and game in the natural woods adjoining. When he and his family were settled in Park Farm his hospitality knew no bounds; the house was soon filled with sportsmen, and the stables with their horses. Prince spent money lavishly, and was never known to refuse a loan nor take a note for security.

An Unprofitable District. Two very interesting reports on portions of the Northwest Territories, southwest of Hudson Bay, have just been issued by the Dominion Geological Survey. They are of especial value to Ontario, on account of the fact that the region concerning which they give information is that part of the formerly part of the district of Keewatin, which Ontario is so strenuously endeavoring to have added to its area.

Judging from both reports there seems to be little prospect of the province will gain a region in which may be found any valuable economic minerals in paying quantities. Even if the difficulties of transportation are overcome, it is very doubtful whether the mineral found would repay working.

Big Chiefs. It isn't necessary to go to Grankark to find a snug, independent principality and its ruler. "Big Chief" Elliott of the Six Nations Indians, who dropped in upon Toronto newspaper, rules over a domain, namely, the reserve near Brantford. It is a 16 by 9 miles kingdom.

The chief is a natural orator, with a gift of eloquence, which observers held Sir James Whitney spellbound when the chief spoke with the reputation of patriots recently. "Big Chief" has a fluency which must be heard to be appreciated, and a vocabulary a Boston professor would envy. He is also a color-sergeant in the 37th Regiment.

Not to Be Forgotten. "I say, do you think much of Black?" "I do unfortunately; he owes me a ten spot."

Abdominal Surgery. Abdominal surgery first was attempted in France in the fourteenth century. Minard's Liniment Cures Dandruff. Minard's Liniment Cures Neuralgia.

SOME GOOD YARNS.

Reminiscences of Admiral Montagu Concerning Royalty.

Admiral the Hon. Victor Montagu, C.B., tells, in his reminiscences just published, some good stories of sport at home and abroad. A sailor of the old school—he served in the Crimean War and helped to blockade Sebastopol—he has been famous in the social world as one of the most distinguished and enthusiastic members of the Royal Yacht Squadron. Admiral Montagu has had the friendship of several kings, and among the best of his friends was King Edward, the present King, and the German Emperor. His general anecdotes about them have more than a literary interest. It was at Cowes that he was on close terms of friendship with the monarchs, though King Edward had been friends with him since boyhood.

He tells an amusing story of how he was commanded to dine with Queen Victoria, at Osborne, one evening at 8.30, and immediately afterwards received a huge envelope with a massive seal from the Hohenzollern, commanding him to dine with the Kaiser at the same hour. He goes on:

Reader, put yourself into my flannels and jersey for a moment, and, having made such a good purchase, for in a few years this property will be worth double the money expended. This venture will alter one of the most romantic places in western Ontario, for Park Farm was long ago the home of Col. John Prince, conspicuous for his forceful conduct during the Patriot rebellion in 1838, and particularly that part of it which culminated in the battle of Windsor, where, as Col. Prince's official report states, "of the brigades and regiments twenty-one were killed, besides four that were brought in at the close of the engagement, all of whom I ordered shot, and it was done accordingly." This was certainly a dramatic measure, and a military council looked into the matter and it was discussed in the Imperial Parliament, where the great Wellington himself spoke in behalf of Col. Prince, declaring that the circumstances required vigorous treatment; that no mob should be allowed to enter a country and march against unprotected citizens without being severely dealt with. Certainly the shooting of these prisoners cleared Essex County of these stying themselves Patriots. The coming of John Prince to Sandwich was an event in its history for he introduced foreign tastes and a flavor of the English gentleman of leisure. He had been a barrister in Gloucester, England, and came to Canada in search of change and sport. It mattered little to him where he settled, so long as game was abundant and the company congenial. These conditions being fulfilled in Sandwich, so Sandwith he came in 1834, accompanied by his wife, three sons, five English servants, and a box of golden guineas so heavy two servants, man and wife, decided to try farming, so Prince looked about him, and finally purchased a beautiful piece of rolling land directly behind Sandwich. He stocked the farm with thoroughbred cattle imported from England, built a house, and placed his retainers on the land. The woman, however, was an expert cook, and, tiring of country life, she and her husband established themselves in a hotel in Sandwich, where for years their house was famous for old English comfort and the excellence of its dinners.

After dinner the Queen excused him, and he resumed his journey in a fly. My next difficulty was to find a place in which to change from tight into full gait, and I decided to do this in the cab, and implored the driver to go slowly downhill. As everybody knows there is little difficulty in pulling off one's clothes and putting others on in a cab, and a total darkness, but when one has to stand up to complete one's toilet, and to stand up in a low fly is no easy task. "Driver, just pull up a moment," I said, "and open the top of the cab." "It's gone with rain, sir," was the answer. "I must that," I said. "You get on top, too, and hold your coat over me." This arrangement answered beautifully, and in due course I arrived at the landing, and went in to a steam launch to make my objections to his Imperial Majesty. The Emperor received me in his usual cordial manner, and after a good laugh at my description of all my adventures. "Well, anyhow," he said, "I have never been asked to dine with two Sovereigns the same day! Do you want another drink?"

Admiral Montagu tells several stories of King Edward's delightful kindness of heart. The admiral suffers from deafness, and was troubled at the thought of dining with the King and the Emperor when the Czar of Russia on the Victoria and Albert. "After dinner on board, the King espied me, and beckoned me to approach, when he said: 'Victor, I am glad to see you. So I merely remarked, 'Oh, sir, this is a great honor, but I fail to see how I shall be able to hear what the Emperor says.' He smiled and said: 'You are not the first deaf individual to tell him the same story. Do you tell me, or answered the Emperor for me.'

A Rosebery Romance. To those who love romance and the romantic, an unusual episode in the life of one of Lord Rosebery's ancestors will appeal. It occurred in the eighteenth century, when the Lord Deputy was a young man. He fell in love with a very pretty girl, says "The Gentlewoman," and eventually a secret marriage was contracted. The pair spent their honeymoon on the continent, and the bride, becoming seriously ill, confessed that she wanted the wife of the rector of Thorpe, from whom she had ran away. Dying shortly afterwards, her husband had her body embalmed with a view to bringing it to England for burial. However, the Customs House officials opened the case in which the body was packed, and it was only to avoid a far more serious tragedy that the truth was made known. The body was eventually buried at Thorpe in the presence of both husbands.

Soldier and Sculptor. It is said of Captain Adrian Jones, who has designed the four-horse chariot, weighing upwards of thirty tons, which is to be erected near Hyde Park Corner, London, as a memorial to "Peace" that he is probably the only living sculptor who understands a horse from tail-tip to nostril. As a boy he loved and studied horses, and would have liked to become an artist, but his father had other plans, and he entered the army. He saw much active service, and was then advised to become a sculptor, having devoted most of his spare time when in the army to painting and sculpture.

Beresford's Bon Mot. Lord Furness was the victim of an amusing bon mot when he was contesting York against Lord Charles Beresford. To the aid of Lord Charles came his two brothers, and the trio of Beresfords in the field. But "Charlie" was ready with his apt retort. "Yes," said he, here we are—Shadrach, Meshach, and Abednego, came to save you from the fiery Furnesses."

SEALED TENDERS

SEALED TENDERS addressed to the undersigned and endorsed "Tender Extension to Breakwater at Kelly's Cove, N.S.," will be received until 4.00 p.m., on Tuesday September 12, 1911, for the construction of an Extension to Breakwater at Kelly's Cove, Yarmouth County, N.S. Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of C. E. W. Dodwell, Esq., District Engineer, Halifax, N.S.; E. G. Millidge, Esq., District Engineer, Antigonish, N.S., and on application to the Postmaster at Kelly's Cove, N.S. Persons tendering are notified that tenders will not be considered unless made in the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the name of the occupation, and place of residence of each member of the firm must be given. Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the contract. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender. By order, R. C. DESROCHERS, Secretary. Department of Public Works. Ottawa, August 9th, 1911. Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

SEALED TENDERS

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Breakwater at Feltzen South, N.S.," will be received until 4.00 p.m., on Wednesday, September 6th, 1911, for the construction of a Breakwater at Feltzen South, Lunenburg Co., N.S. Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of C. E. W. Dodwell, Esq., District Engineer, Halifax, N.S.; E. G. Millidge, Esq., District Engineer, Antigonish, N.S., and on application to the Postmaster at Feltzen South, N.S. Persons tendering are notified that tenders will not be considered unless made in the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the name of the occupation, and place of residence of each member of the firm must be given. Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the contract. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender. By order, R. C. DESROCHERS, Secretary. Department of Public Works. Ottawa, August 9th, 1911. Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Electric Beans Are a Natural Remedy for Nerve, Stomach and Liver Disorders.

Once upon a time disease was thought to be due to direct influence of evil spirit and magic was invoked to cast it out. Science has taught us wisdom. The evil spirits still exist we call them "Disease Germs," and they must also be cast out. Once lodged in the stomach or intestines biliousness with its aches and pains, or in fact seventy-five per cent of the ills that affect the human race, is the result. Electric Beans are the approved remedy for driving out disease germs. Their action is quick and thorough, they clear the intestines, rouse the torpid liver to new life, stimulate mucous membranes to healthy action and cleanse and invigorate the whole digestive tract. Be prepared for emergencies by always keeping a box in the home. See our booklet of remarkable, true testimonials. Test this remedy at our risk, if it is not satisfactory we will cheerfully refund the money paid for it. Electric Beans can be had from the Royal Pharmacy, W.A. Warren, prop., or direct from us at 50c. a box. THE ELECTRIC BEAN CHEMICAL COMPANY, LTD. Ottawa, Ont.

Halifax Fire Insurance Company ESTABLISHED 1809 We are insuring properties of every description, and solicit your patronage. Our rates are low. Cash assets over \$400,000. Losses promptly settled. Agent, W. W. CHESLEY, Bridgetown, N. S.

Town Council

A meeting of the Town Council was held in the Council Chamber last evening with Mayor Harlow and all councillors present.

The following bills were ordered to be paid: On poor account, Chas. Phinney, meals to pauper, 75; Joseph I. Foster, supplies, \$15.00; Crowe, Elliott Co. Ltd., in full of contract for Graves water extension, \$34.60; Chas. Poole team on watering cart, \$2.85; K. Freeman, sundries, fire department, reservoir, etc., \$10.03; Wm. Connell, team and planking to reservoir, \$3.55; W. Ruffee, labor water works, Hicks & Sons extension, \$1.75; F. Clements, do, \$1.25.

Expenses of Mayor and Town Clerk delegates to Union of Municipalities at Halifax, authorized by statute, ordered paid, \$25.90.

Resolved that the account of Herbert Gray, \$31.95, for digging and filling in ditch Graves extension be paid by the Clerk when the work is completed to the satisfaction of the water committee and certified to by them and not otherwise.

Resolved that the account of Chas. Hogan, \$41.00, for fencing the reservoir per contract be paid by the Clerk when the work is completed according to contract to the satisfaction of the water committee and certified by them, and not otherwise.

Minutes read and approved. Council adjourned.

Port Waide

Mr. Thomas Curtis, agent of the American Glue Co., has been over this territory the past week buying sounds.

Capt. T. W. Templeman, of the Port Lorne Hotel, Port Lorne, has been in this port the past week loading the small schooner Glides, Capt. Lewis, with lumber for building a large annex to his already large and commodious hotel.

Capt. Ed Slocumb, the genial light keeper, has the appointment as night watchman to the Dominion Iron company's plant here.

Mrs. Baker and Mrs. Sanborn have returned to their respective homes in Uncle Sam's domain.

Mr. Joseph Holmes returned Saturday to his home in Lynn, after a pleasant visit at his home here.

Capt. J. W. Snow has let his fishing schooner, Claude Daley, to a party across the bay.

The passenger list has more than doubled since the coming to effect of the excursion rates, on S.S. Boston.

Mr. Arch Morrison and family after a short visit with relatives and friends has returned to his home in Massachusetts.

A company is being organized here for the erection of a larger hotel for summer tourists.

A large picnic from Bridgetown and also the annual Sunday school held out here Monday.

A large majority of our people are looking forward with very hopeful anticipations after the 21st.

Mr. W.H. Wood of St. George, N.B., is endeavoring to engage men here to work in his company's larger pulp mill at that place. One of the agreements is that they are to be steadily temperate.

If some young men expended half the application trying to get on in the world that they do endeavoring to put the pool ball in the corner pocket there would be more success.

The world reserves its big prizes for but one thing, and that is initiative. Initiative is doing the thing without being told. Next to doing the thing without being told is to do it when you are told once.

"No matter what may be the object of your solicitude--BE INSURED, whether you are thinking of the maintenance of health, comfort and competence in old age, or the welfare of your wife and children." (Charles Dickens.)

The Excelsior's liberal, up-to-date policies afford both absolute security and substantial profits.

Capt. S. M. BEARDSLEY, Wolfville Manager for Nova Scotia. Office Herald Building, Halifax Box 136, Halifax - Box 230, Wolfville

Card to Electors

To the Electors of the County of Annapolis:

Parliament has been dissolved though but three years of its term have expired. It has been necessary to do this to overcome the organized obstruction resorted to by the opposition in order to prevent a vote being taken on the Reciprocity agreement between the United States and Canada.

At the convention of the Liberal party of this County, held at Bridgetown I was again asked to contest the county in the interests of the Liberal party and to carry that standard through the contest at the polls. Since honored by election to be your representative at Ottawa, I have ever endeavored to protect at all times your interests.

Resolved that the account of Herbert Gray, \$31.95, for digging and filling in ditch Graves extension be paid by the Clerk when the work is completed to the satisfaction of the water committee and certified to by them, and not otherwise.

Minutes read and approved. Council adjourned.

prices of food products.

Since the Liberal party came into power in 1896, Canada's trade has increased from \$239,000,000 to \$753,000,000 in 1911, a gain of \$514,000,000. This increase has taken place in fourteen years of Liberal administration; during the previous eighteen years of Conservative government the total gain amounted to only sixty-six millions. The Conservative party now say that they are content with this successful administration of affairs and desire to "let well enough alone."

The agreement is now opposed by the Conservative party though under the leadership of Sir John McDonald Sir Charles Tupper, and Sir John Thompson every effort was made fruitlessly by that party to secure reciprocity because it is now under the dominance of special interests that are already fully protected and are not disturbed in the enjoyment of this protection by the new agreement. The government of Sir Wilfrid Laurier asks the electors of Canada to let the farmer, the fruit-grower, the fisherman and the lumberman have their chance, and this agreement will give it to them.

S. W. W. PICKUP

DEPARTMENT OF RAILWAYS AND CANALS

Prince Edward Island Railway, Branch Line O'Leary to West Point.

NOTICE TO CONTRACTORS.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Branch Line, O'Leary to West Point," will be received at this office until sixteen o'clock on Wednesday, September 20th, 1911.

Plans, profiles, specifications and form of contract to be entered into can be seen on and after the fourth of September at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa; at the office of the Chief Engineer of the Intercolonial Railway, Moncton; and at the office of the Station Master, O'Leary, P.E.I., at which places forms of tender may be obtained.

Parties tendering will be required to accept the fair wages schedule prepared at to be prepared by the Department of Labour, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered, unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation and place of residence of each member of the firm.

An accepted bank cheque for the sum of \$20,000.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party declines entering into contract for the work, at the rates stated in the offer submitted.

The cheque this sent in will be returned to the respective contractors whose tenders are not accepted.

The lowest or any tender not necessarily accepted. By order, L. K. JONES, Secretary, Department of Railways and Canals, Ottawa, Aug. 31st, 1911.

Yarmouth Captain's Perilous Experience

(Continued from page 1)

when they parted in a storm and Mr. Hatfield's boat was last seen sixty miles northwest of Tematangi Island.

In five days the allowance of fresh water in Capt. Chapman's boat was cut down to two drinks a day. The winds came contrary, or there were were calms. "I tried placing a pebble under my tongue," said Capt. Chapman yesterday, "but it only aggravated the thirst."

The use of tobacco in any form had to be abandoned. Two biscuits a day was all a man could eat, with a teaspoonful of salmon or beef, the skipper serving the provisions, of which there was abundance, and the second made the water. Of what use was food without water?

For two days it was fairly cool. Then came calm, light winds and scorching tropical sun. One night the captain and his mates were in a hollow reverberating sound, as if an empty cask had been struck with a mallet. Looking up he saw the worthless man of the crew replacing the little hatch in the top of the breaker and laying down the cap. Capt. Chapman felt for his pistol, but forbore. When the man took his trick at steering the captain told him what he had seen him do. "For God's sake don't tell the men," pleaded he.

All hands were called aft in the life line. "Men," said the skipper, "what's in this boat belongs to all alike. Some of you are growling. Now shut up your mouths, or I'll shut them for you."

Every night now the captain sleeps upon the brazier. The men became hysterical and wanted to use the oars. The captain gave permission. They dipped their shirts into the salt water. The baking, roasting sun beat down upon the backs of their necks. Pains like needles darted through their temples. Within five minutes they hauled in their caps. Their shirts were dry as paper. The second mate's tongue was now white and had. His lips, throat and tongue were dry, swollen and broken. He had been touched by the sun. The captain scraped Collins' tongue with a knife and kept his head and clothes saturated in salt water. In three days he came around all right.

The second mate refused to drink. "Let the men have it all," he said. "It is my own fault." As they called along George Lundgren, the sailmaker, told his shipmates his adventures in three previous shipwrecks.

Sharks now began nosing under the boat. At the end of the seventh day they found their fresh water so short that they had either to reach land or die.

After sundown they took down the sweeps and rowed at a time for an hour. When they received each a table-spoonful of water.

In a shower the castaways caught rain in a tarpaulin. When they drank it it was like lead in their stomachs. The dried spume on the canvas turned the rain water salt. Two more men were now sun-touched and tried to drink sea water. One who was delicious tried to jump overboard and had to be lashed to the thwart. The castaways imagined they were ashore quaffing gallons and gallons of fresh water, only to find to their horror that they were without water altogether. The remnant in the cask was brackish and full of shreds.

On that last day the captain found that his mental power had been so affected by his thirst that he could figure his calculations when he took the sun only with the utmost difficulty.

LAND IS SIGHTED

On the twelfth day land was sighted. The sailors hugged one another in their ecstasy, but not a word of thanks for the skipper. On July 7th the starboard boat touched the island of Anaa, Tahiti, within two miles of the point it had steered far. It was the Paumotu Isles, or the Low Archipelago, four hundred miles from Tahiti proper.

The race of men, big, stand-up fellows, the captain describes them, are of the race of Maoris, very black. On the island the only Europeans are the priests. Buckets of fresh water were brought and the men plunged in their heads to their necks. "Nothing in this world ever tasted so sweet."

The islanders treated their guests royally. A HURRY-UP feast was provided, consisting of stewed chicken, feathers, claws and all, served in half cocoanut shells.

In making the landing three planks in the boat had been broken and Capt. Chapman now set about with hammer, nail and canvas repairing the damage. The French priest addressed him, "You were captain of your ship I am the captain here. You shall not tempt Providence further by leaving this island."

"The rest can stay here, if they wish," replied the skipper, "but I am going on to Papeete," and he did. Second Mate Collins, Lundgren, the sailmaker; Walter Brown, the cook, and a young Hollander, Otto Wachepuss, went along. Seven stayed on the island. The Hollander, and the way had heard talk of cannibals in the boat, and when the natives approached him and poked him with their fingers he imagined they were sizing him up for a feast and would not quit the captain's side.

It was four hundred miles to Papeete, but the boat, with the five men, finally made a landing at Point Venus, ten miles east of Papeete.

The captain and second mate cast about for a way to reach Papeete. (Continued on page five.)

LOCAL AND SPECIAL.

A large number from here attended the Labor Day sports held in Mid-dieton.

A reception was held at Round Hill in honor of Mr. and Mrs. Elwood Armstrong, on Tuesday evening.

Having run short of the issue of June 7th, 1911, the Monitor will be glad to receive well-preserved copies of that date.

The Nicklet, beginning with Saturday night next, will give entertainments three nights a week, Monday, Wednesday and Saturday.

Mr. and Mrs. Elwood Armstrong, Round Hill, will be "at home" to their friends on Wednesday and Thursday, September 13th and 14th.

The boys from this vicinity who attended the camp at Aldershot this year, returned on Saturday. They report a large camp and a good time.

S. S. Valinda took a large crowd of excursionists from here to Digby on Labor Day, calling at Port Wade for dinner, arriving in Digby at three p. m., leaving at five. Everybody voted an enjoyable time. S. S. Valinda is going to prove a success as a pleasure boat by all accounts given.

The teachers for the ensuing year of the Bridgetown school are as follows:—H. L. Bustin, principal, grades IX, X, XI. Miss Mildred Wheelock, grades VII and VIII; Miss Annie M. Phinney, grades V and VI; Miss Mary Palfrey, grades III and IV; Miss Laura Graves, grade II; Miss Bessie Hoyt, grade I.

Mrs. John I. Phinney has received the sad news of the death of her brother, Frank Miller, of Everett, Mass. He fell from a twenty-five feet staging on Monday receiving internal injuries from which he died on Tuesday at the Massachusetts Hospital. He leaves a wife, daughter and three sons.—Outlook.

S. N. Jackson, Esq., is here at present visiting Truro, principally old residents, the Sutherlands on Elm Street. He turns up occasionally on a visit to Truro and his many friends are glad to see him. He is postmaster of Clarence, Annapolis Co. He says the potato crop is light but good; grain the same, but Annapolis never had such a crop of apples as it will have this year.—Truro Sun.

A call at the tailor shop of Mr. T. J. Marshall the other day showed the staff hard at work filling the numerous orders which are daily coming in. Mr. Marshall has worked up a large trade in the short time he has been in business for himself and being a high-class tailor with a reputation for making stylish clothing has been able to give complete satisfaction to all his customers.

We received a notice of the Saunders-Sanders family re-union this week from Mr. Wm. Melburne Saunders, of Boston, Mass. This is the fourth reunion and is to be held at "The Lookout" Franklin Park, Boston, Saturday, Sept. 9th, 1911. The program is social and intercourse, 11 a.m.; basket luncheon at 1 p.m.; annual meeting 2 p.m.; and addresses by the historians. Charles W. Saunders, President; Wm. M. Saunders, Secretary.

J. J. Drummond, president, and Edward McDougall, vice president and general manager for the Canada Iron Corporation, have been at the American House this week with Mr. W. F. C. Parsons. They visited the iron mines at Torbrook and Nictaux and the shipping piers at Port Wade. They expect to have the concentration plant at Nictaux Falls ready by the 25th of September and to begin immediately afterward to ship ore to England.—Outlook.

The freight running between Halifax and Annapolis, was slightly crowded Monday evening after leaving Middleton, averaging only about seven to a seat, besides the hundred odd packed in the baggage car. One would think that the D. A. R. could afford to run at least one extra car on a big day for the comfort of the travelling public. Standing room only is not by any means an uncommon experience when travel is at all out of the ordinary, on both express and Bluenose.

A horrible fatality occurred at Mahone Junction station on the H. & S. W. Ry. last Thursday, when a seventeen year old girl, Flora Lantz, daughter of Edmund Lantz, slipped from the platform on to the track, just as an excursion train was coming in, and falling beneath the wheels was frightfully mangled. In falling she clutched at her companion, Mr. Whitney Hamm, who falling with her, suffered serious and possibly fatal injury from a severe blow on the head.

PERSONAL.

Mr. and Mrs. A. Rumsey, Clarence, spent a part of last week in Halifax.

Messrs. Ellison and Gordon Grimm of Springfield, are in town for a few days.

Miss Grace Hoyt went to St. John on Friday for a brief visit to relatives.

Miss Nan Hoyt has returned from a visit to St. John and Jaquet River, N. B.

Mrs. Jennie Bowles, of Gloucester, Mass., is visiting her sister, Mrs. Wm. Manthorne.

Mrs. Sydney Killam, of Weymouth, is the guest of Mr. and Mrs. Eugene Saunders.

Mr. Campbell Willett of 677 Tremont St., Boston, Mass., was in town on Tuesday.

Miss Minnie "Phinney" of Springfield, Mass., is visiting her sister, Mrs. I. M. Otterson.

Dr. Frederic Kelley, of Montreal was the guest of Mr. and Mrs. W. R. Troop last week.

Mr. and Mrs. Wm. Chipman, of Wolfville, have been visiting friends in town during the week.

Mrs. Jost is visiting her mother, Mrs. Elderkin, who is quite ill at her home at Port Greville.

Mrs. G. G. Thomson and children, of Halifax, are visiting her parents, Mr. and Mrs. H. I. Munro.

Mrs. M. K. Piper and Miss Katharine Piper returned yesterday from a holiday trip across the Bay.

Miss Addie Chesley and Miss Florence Lee started on Friday last for a trip to Boston and New York.

Rev. R. D. Porter, of Halifax, has been visiting at the home of his niece, Mrs. J. Fletcher Bent, Paradise.

Mr. and Mrs. Harold Troop, of Waltham, Mass., are guests of Mr. Troop's parents, Mr. and Mrs. W. R. Troop.

Mr. and Mrs. Minard Bent, of Granville Centre, spent the week at the home of Mr. and Mrs. Alonzo Daniels.

Mr. Pearly Grimm, of Springfield, who was formerly in the employ of O. P. Covert, Bridgetown, has accepted a position in Halifax.

Mr. and Mrs. John Bent, Tupperville, are visiting the Toronto Exhibition and will spend a few days at Niagara, Ottawa and Montreal.

Miss Hattie Wade, of Bear River, is visiting Mrs. Lewis J. Ricketson and other friends and was a guest at the Armstrong-Piggott wedding.

Mr. Charles Parker has returned from Amherst to relieve Mr. Leavitt of the Royal Bank, while he takes his holidays.

Mr. and Mrs. Harry L. ster, of Ottawa, and Miss Hawkins, of Halifax, who have been recent guests of Mr. and Mrs. Alonzo W. Daniels, have returned to their respective homes.

Mrs. Stephen Porter and little son Ronald, returned to their home in Boston last Saturday, having spent the last two months with her parents, Mr. and Mrs. W. Jefferson.

Mr. Carl Balcom, who recently accepted a position as reporter on the staff of the Dry Goods Review, Montreal, reports himself as well pleased with his position and the city.

The Misses Hattie and Minnie Spinney, of Torbrook Mines, were visiting their aunt, Mrs. A. D. Brown, over Sunday. Miss Hattie Spinney was a former teacher in the school here.

Mrs. Jessie Huntington and Miss Alice Huntington have returned from a few weeks spent in Chester. Miss Huntington leaves this week for Vancouver, where she will engage in teaching music.

Rev. Z. L. Fash, after a pleasant vacation of a month in Nova Scotia which included attendance at the Maritime Convention, spent last Sunday at Hillsboro, N.B., his old pastorate and is this week taking up his work again at Charlottetown, P.E.I.

Mrs. M. P. Miller and son, Herbert, of Roxbury, Mass., have returned home, after visiting Mr. Miller's sister, Mrs. W. A. Stark at Arlington. They have enjoyed travelling through the Province since July. Mr. I. B. Miller, of Somerville, Mass., is also visiting his sister, Mrs. Stark.

Miss Mildred Armstrong, of Round Hill, was in town on Tuesday. Miss Armstrong has spent the past year in Toronto at the Missionary Training School preparing herself for missionary work in China. She leaves on Sept. 20th for China, to take up her duties there as missionary.

Mr. W. H. Knowlin, mechanical foreman of the Digby Courier staff for some years past, passed through here on Monday on his way to Truro, where he has accepted a position on the mechanical staff of the job department of the Truro Daily News. Mr. Knowlin is one of Nova Scotia's best printers.

Mr. James P. Foster, manager and treasurer of the Pelta Co., of Colorado Springs, Col., made a flying visit to the Province on Thursday from New York City, where he has been purchasing new goods for fall for the company. After visiting his parents and aged grandparents at Port Lorne, he returned to New York on Saturday en route for Colorado Springs.

Mr. Willard V. Longley, eldest son of Deacon Jos. S. Longley, Paradise who has been studying the past two years at the B. and C., Guelph, Ont., and obtained the degree of B. S. A., returned home August 23rd for a short visit. Mr. Longley left on Saturday, for Shakopee, Minnesota, U. S., where he will take charge of the Agricultural Department in the High School.

Yarmouth Captain's Perilous Experience

(Continued from page four)

They met a man riding in a buggy Collins is something of a scholar and fond of showing his knowledge of French. "Now is your chance," prompted the skipper. "You must shrug and gesture to make him understand."

The stranger looked puzzled. "Try English," suggested the skipper. "That's more like it," said the man in the buggy. "I'm an American."

The American provided mounts and Capt. Chapman and Collins rode horseback to Papecte. When the natives saw them approach the women and children ran in terror. The two men looked like scarecrows. The captain had only part of a pair of trousers. Both were unshorn and unshaved.

When Capt. Chapman left Newcastle he weighed 70 pounds, but he now tipped the beam at only 110 lbs. On the day before he sailed from Tahiti on the Mariposa for San Francisco Capt. Chapman was informed that Mr. Hatfield's boat had been sighted in the offing of Papecte with all hands safe. After he had taken leave of Mr. Collins, who had shared the same boat with him at Papecte, Capt. Chapman found a log which the second mate had kept from day to day in the boat, until he became delirious.

HYMENEAL

ARMSTRONG—PIGGOTT

A very pretty home wedding took place on Wednesday evening last, at 8 o'clock, at the home of Mr. and Mrs. Lewis J. Ricketson, when their sister, Miss Beatrice Winnifred Piggott was united in marriage to Mr. James Elwood Armstrong of Round Hill.

The house was beautifully decorated with flowers and greenery. The marriage was solemnized under a floral arch, Rev. N. A. MacNeill officiating.

The bride looked charming in a gown of lavender silk with trimmings of embroidered net and satin. She carried a shower bouquet of white chrysanthemums and maiden-hair fern. Following the ceremony, refreshments were served to the guests, the dining room being decorated in yellow and green. The bride was the recipient of many handsome gifts.

The following day the happy couple left for Halifax to enjoy a wedding trip, after which they will return to Round Hill the home of the groom.

RIORDAN—COPELAND

The marriage of Miss Ane Gertrude Copeland, daughter of Mr. and Mrs. Daniel Copeland, and David J. Riordan, the genial host of the Queen Hotel, took place in St. Thomas' church, Annapolis Royal, Rev. Father Grace officiating. The church which was beautifully decorated for the occasion was filled to overflowing with guests and interested spectators.

The bride looked beautiful in her costume of cream liberty satin with embroidered chiffon overdress and well and orange blossoms. She was attended by her sister, Miss Agnes Copeland. The best man was Eugene McMullen, nephew of the groom. Mrs. A. Riordan, the groom's aunt, presided at the organ. Cyril Brittain and Mr. Rathburn were the ushers. Immediately after the ceremony the newly wedded pair left by auto for Digby en route for Montreal, Toronto, Niagara and several United States cities. The bride's going away costume was a tailored suit of blue. She received many elegant presents from friends at home and abroad.

The groom's present to the bride was a cheque. His gift to the bridesmaid was a pearl ring, to the best man a diamond stickpin, and to the ushers stickpins. Mr. and Mrs. Riordan have the best wishes of a host of friends for a long and blissful life.—Spectator.

Learns to Play Piano by Observation

The Player Piano Serves as Instructor in Rendering a Liszt Hungarian Rhapsody

"I have given up that idea that there is no royal road to learning," remarked a man prominent in business and social circles to a friend the other day.

"What is it?" inquired the other. "Learned to do Mexican drawn work through a course in a correspondence school?"

"Nope, but it will sound to most people just about as ridiculous and yet it is true, nevertheless. Some time ago a young friend of my son called while we were at dinner, and, refusing to join us, he went into the music room to wait until we had finished. He hadn't been there long before there floated out to us the introductory bars of one of the Hungarian Rhapsodies, the second and a favorite of mine. I listened intently, and as the music continued turned to my son and asked, 'Is that Roy playing?'"

"Search me," responded the boy with a puzzled look on his face. "If it is he's certainly been modest about his ability in that line. I didn't think he could play a Jewish harp."

"Well, whoever it was played the selection through to the end, and, while it lacked a certain amount of individuality in its expression, it was accurately rendered, and, on the whole, a very creditable performance. Having finished my meal I went into the music room and entered just in time to see that friend of my son's swing into a rollicking two-step, and waited unobserved until he had completed it. Then, going over to him, I said, 'Why, Roy, I had no idea that you ever studied music.'"

"Never did," he answered with rather a sheepish smile.

"You don't mean to tell me you played that Rhapsodie by ear, do you?" I asked.

"No," he replied, "by sight. You see, some time ago my aunt bought one of those player-piano things, and after monkeying with it for quite a while I figured out that I might learn to play some of those things by hand if I watched where the keys went down and practiced on them. That's all there is to it. It took quite a while, of course, and I nearly drove nut crazy sometimes, but I've got a lot of stuff in my fingers now, and am learning more every day."

"And it was the truth. The boy could play a number of selections, some of them in a stilted fashion, and others with which he was more familiar in better style, and it is a strange thing that he is actually developing a certain amount of individuality with his 'pieces by sight,' and unless one knew it, as I do, would never believe he had learned them by the player piano method. He has surprised all of his friends, and I know a number of others who are following his plan, some with greater success than others, of course, but all learning to play."

Diarrhoea is always more or less prevalent during September. Be prepared for it. Chamberlain's Colic, Cholera and Diarrhoea Remedy is prompt and effectual. It can always be depended upon and is pleasant to take. For sale by all dealers.

DAWN IN THE FOREST.

Like a grey nun across the eastern hills The dawn creeps slowly, in her hand a star. The forest stirs to greet her, faint and far Pulses the music that the vastness fills. In cloistered columns stands the pine that shrills Beneath her breath, while like some gate ajar, That shadows and the silences unbar, The night swings backward as the new day wills. Above the murmur of dim forest ways Rises a peon--music's very own-- Clear as the pealing of a convent bell. So sad, so sweet--like love lost or outgrown-- The forest-loving songsters' matin praise, In silvery tones repeating, 'All is well.'

AFIRE AT SEA.

New York, N.Y., Sept. 1--Wireless reports from the steamer Oklahama tell of the burning of an unidentified schooner at sea and futile search by the Oklahama for the crew of the vessel.

Only the mizenmast of the schooner was standing when the Oklahama passed her fifteen miles southeast of Frying Pan Shoals, Charleston, S.C. Sept. 1--The three masted schooner John Rose, of Philadelphia, abandoned by her crew and on fire, is drifting about of the North Carolina coast, about twenty miles from Southport. The fate of her crew has not been learned, but it is presumed that Capt. Douglas and his seven men have been rescued by a passing steamer. The Rose left Brunswick, Ga., Aug. 14th, with lumber for New York.

FALL SKIN SORES

When troubled with fall rashes, eczema, or any skin disease apply Zam-Buk!

Surprising how quickly it eases the smarting and stinging! Also cures cuts, burns, sores and piles. Zam-Buk is made from pure herb essences. No animal fats--no mineral poisons. Finest healer! Druggists and Store Everywhere.

Dainty, Disappearing Doughnuts.
Devoured near as fast as you make 'em.

Golden-tooth-teasing-able-bodied nuts of dough.
Made from dough that *Tastes Like Nuts*, you know.

Use FIVE ROSES flour. Get that individual toothsome-ness of Manitoba wheat kernels. Doughnuts with a Palate-Pleasing Personality. See 'em bob up in the rich deep fat--swelling, soft-textured.

A hole entirely circled with Light Digestible Food. Fat without being fat--for FIVE ROSES is the sturdy glutinous flour that resists fat absorption. Just enough to brown deliciously, to crisp quickly. No greasiness, heaviness, sogginess. Filling a vacant place so pleasantly with never an outraged stomach. Like these make YOURS. Use FIVE ROSES.

Five Roses Flour

Not Bleached  Not Blended

It is for You

To those who say that the Canadian Government Annuities Scheme is of benefit to those only who can take advantage of it while they are young, it may be pointed out that the benefit is equally as great for old people. The following example will illustrate this. A widow, seventy-five years of age who had been spending a portion of her capital each year (which was deposited in the Post Office Savings Bank) as well as the interest, found to her horror that she had but fifteen hundred dollars left. She was without relatives, and she was ultimately to be life were spared to her for a few years longer. But when the cloud was darkest, the silver lining appeared. A friend told her of the Canadian Government Annuities Scheme, and her feelings may be imagined when she was informed that her fifteen hundred dollars would yield her for the remainder of her life, no matter how long she might live, an income of \$225.90 a year.

Full information concerning this great Scheme may be had on application to the Superintendent of Canadian Government Annuities, Ottawa. Postage free.

DRINKERS AND EMPLOYMENT

A trade union secretary has the following pointed paragraph set forth in notes commenting on labor conditions in general: "A class of workmen who figure somewhat frequently on the unemployed list, are the tipplers. There is no room for dram drinkers in the workshop of the present day. The drunken workman is rigidly kept on the outside of the workshop gates, because his presence inside is a danger both to himself and others, and the tippler will soon be sent to keep him company for the same reason.

Much is being said in certain quarters concerning the effects of intoxicating drink on the question of unemployment. No one who is acquainted with the conditions of workshop life would contend for a moment that drink has any appreciable effect on the volume of unemployment, but it is an important factor in determining who are to be the unemployed. Other things being equal, the non-drinking, non-sporting workman has by far a better chance of finding employment, and of keeping it, than his tipping or sporting fellow."

Bank Circulation

It is not always quite clear to those uninitiated into banking why it is not always possible for banks, in a business-like manner, to prevent over-issues of notes, to hand out to the tellers an amount of the paid-up capital and no more. Then there would be no possible danger of over-issues and the bankers, who now often spend much time anxiously scanning the daily returns from the branches to check up outstanding circulation, could give their time to something more worthy of their attention.

This method would have much to recommend it, were it not for one fact. If it were adopted generally the amount of bank notes in circulation would be cut almost in half and the country would be starved for "cash" with which to transact ordinary daily business.

As now organized some branches require a very large amount of notes to pay out while others require but few, but the daily clearing of those notes through the various clearing houses does not, unfortunately, result in their return to the issuing branch. One branch may be daily paying out thousands of dollars more than it receives back through the local clearing house; while another branch may receive a far greater amount than it pays out. As a result it has been found necessary in the large widely extended banks to keep on hand in their various branches, notes ready to pay out to an amount sometimes well over double their legal circulation. From this it can easily be seen that despite the greatest care in head offices, accidents sometimes will occur.

One great cause of over-circulation of bank notes is the fact that when the tellers are over-taxed with due to quite insignificant circumstances, they find it impossible to do the sorting of the notes received during the day preparatory to returning them through the clearing house. As a result the usual amount does not come in to offset the amount paid out, and some bank may find that although the night before it had a substantial margin, the failure of the other banks to return its notes has caused it to infringe the law. The fault lying with the busy teller, not with those of the other banks who were not able to sort out the notes for the clearing house. It was in this manner that a recent case of over-issues occurred.--Monetary Times.

DISASTROUS FIRE IN NEWFOUNDLAND.

Confagration Causing Loss of \$2,000,000 Beyond Control in Densely Wooded Country.

(Canadian Press Despatch.)

St. John's, Nfld., Aug. 26--Sweeping towards the sea with a violence which no human agency can control, two million dollars damage has already been done by a fire which started Thursday forenoon and has threatened with destruction the extensive pulp and paper plant of the Albert E. Reed Company at Bishops Falls.

The fire is now skirting Exploits River, which is densely wooded and by less than a quarter of a mile of water. The fire is now travelling easterly through the splendid forest along the south side of the river. Exploits before a strong easterly wind and is beyond control.

Senator Comeau Dead

The Yarmouth Times regrets to announce that Hon. Senator Ambrose H. Comeau, who is with his brother, Rev. Father Comeau, Feltrook, is very ill today and the end is expected at any moment. As previously stated in The Times, Senator Comeau has been ailing for some time, suffering with anæmia. He has been treated by eminent specialists in Montreal and other places but little could be done for him.

Senator Comeau is one of the best known men in Western Nova Scotia, and everything he has gained in this world has been by his own exertions. He has been a councillor and warden in Clare, Digby county and was a member of the legislature from 1890 until 1897. He married February 13th, 1893, Miss Louis D'Entremont, daughter of Charles D'Entremont, of West Pubnico, and has six children, five boys and one girl. He is a senior member of the mercantile firm of H. H. Comeau & Co., Meteghan River.

NOTE--Senator Comeau has since passed away.

Twenty-six are Dead in a Picture Theatre Panic

Small Boy Shouted "Fire," When Machine Went Wrong and Caused Rush.

Canonsburg, Pa., Aug. 27--Twenty-six dead from suffocation, twenty-five seriously injured suffering from minor hurts, that is the human toll exacted last night during an inexcusable panic at a moving picture show in the Canonsburg opera house. The moving picture machine developed a slight defect. There occurred a noise like a clock, a small boy shouted "fire," at the same time starting for the narrow exit. Bolus Dibrowski, a foreign miner, a giant in proportions jumped from his seat and ran wildly for the same exit. In a moment there was a fighting, struggling mass after him. At the head of a narrow stairway which led to the street the foreigner tripped. As he rolled down the stairs he swept others from their feet who were awaiting their turn to enter the building and soon there was an indescribable pile of humanity at the foot of the stairs, battling like mad.

"I have a world of confidence in Chamberlain's Cough Remedy for I have used it with perfect success," writes Mrs. M. I. Bedford, Poolesville, Md. For sale by all dealers.

Thomas W. Lawson's show stables at Dreamwood, Scituate, Mass., were struck by lightning during the storm on 15th ult. and damaged to the extent of \$10,000. All of the prize horses, valued at about \$75,000, were removed from the building in safety, as were the harnesses, coaches, the numerous ribbons won by the horses and other articles of value, the damage being entirely to the building. At the time of the fire the members of the American Press Humourists' Association were at dinner with Mr. Lawson, having left the stable where they had enjoyed an impromptu horse show but a short time before. The building with its contents was valued at \$150,000.

THE HOME

KEEPING YOUNG.

"How do you manage to keep so young?" Mrs. Looks-her-age had not seen her old school friend for years and was astounded at her youthful appearance. "I am not dealing in flattery," she hastened to add, noticing the blush her words had called up. "When we went to the old brick schoolhouse we were the same age; now I look ten or fifteen years older. You have had your share of trouble; more than your share, in fact. I expected to find you quite broken, yet here you are as serene as a summer's day! I cannot understand it. Is massage or Christian Science?"

A serious expression darkened Mrs. Young's eyes, "Only for a moment, then she laughed. 'It is neither. People have asked me the same question more than once since I returned to M——, but I never thought of answering except in jest. If you really want to know—"

"I certainly do," I broke in. "I shall have to think a bit and get my ideas in order. Possibly," hesitatingly, "possibly one thing may be an unusual drill in self-control when quite young. You know Aunt Hulda was not the easiest person in the world to get along with. In some way she was a wonderful woman, capable, just to a fraction, and good at heart, or she'd never taken me when my folks died. But set! she was perfectly intolerant in some things. She expected so much of me—an old head on young shoulders, as they say. I used to wonder if she'd ever been a child herself, or was born grown up. You may remember her caustic way of speaking. I had been used to nothing of the sort in my own home, and it was often difficult not to answer back. Mrs. Stone knew how things were at Aunt Hulda's and more than once she paid to me in her sweet Quaker way, 'little ladies never show anger, they must not,' and I honestly tried not to. I learned to look calm and peaceful when inwardly I was raving. It was an excellent drill. Years after I read that anger, uncontrolled, and worry were the chieftains with which we carved our wrinkles. When the real troubles of life came I was in a way prepared to put the same theory into practice which I had often unconsciously followed in my experience with Aunt Hulda's 'ways.' No unnecessary crow's feet if I could help it."

The second point is without question trying to forget the unpleasant things. I had this lesson enforced when about to leave Dr. T.'s hospital. He gave me an illuminating thought, "You are as well as surgery can make you, but this is a critical point. Go home and drop this nightmare from your mind as resolutely as possible. Fill your days with pleasant things, have your friends, the cheerful ones, call and don't let them talk of your operation. Read Mark Twain and Uncle Remus, buy some pretty clothes, and before you know it you will be strong enough to wear them. Was not that advice worthy following? It seems as much a duty for us to forget the bad things about others. 'It has been my lot to have associated with one or two people who, no matter who was mentioned, invariably contributed some unsavory information under discussion, or his family young as I was, somehow it struck me as contemptible. In trying to live down a folly or mortification, one should have all the help possible from one's friends, and the best manner, often petty, regarding the help I know of in such cases, is science. I am convinced that unpleasant thoughts of ourselves or others resolutely put from the mind, leaving room to accumulate good and generous thoughts leaves a definite stamp upon the features as well as upon the character."

I think, too, some of Aunt Hulda's ironclad opinions taught me the grace of tolerance, and one must be tolerant to grow old gracefully. One of her ideas was that pretty clothes made one vain, also that only plain

clothing could be durable. With these notions you can imagine that we both looked more or less ridiculous. I vowed if ever I earned money of my own I would buy clothes that could be pretty and durable at the same time. I consider it one's duty to be as neatly and attractively dressed as possible. There is no excuse for looking like a fright. If one has no knack of dressing becomingly there are professionals whose advice one may obtain.

"I have tried to keep 'limbered up' once when recovering from an illness I indulged in a few physical culture lessons. How much practical good I got from them! I first learned to do my housework with the smallest expenditure of strength; this left me the power to take the out-of-door exercise I so much needed. I learned to conserve my strength, not to waste it. This brought a new and delightful interest in what at once seemed drudgery. I learned to breathe and walk correctly; honestly, I did not know how before. I have come to love walking—it is my cure for nerves, headaches and blues. Nothing would induce me to give up going down on all fours once each week to wash my kitchen floor. I know it strengthens muscles that in most kinds of housework is wholly neglected. It used to be an impossibility for me to do that without paying for it the next day, but now! well, when you hear of my buying a mop, you will understand that I am really getting feeble. I am almost a vegetarian, for I have a horror of rheumatism. I shall never get it through over-indulgence in meat."

"I have found that keeping up with the times is a great preventative of old age. I try to read of what is going on in the world; in short, I apply the 'limbering' process of my mind. There is really no excuse in these days for being stupid. One must read if one wishes to be an intelligent companion for one's children. I was too much impressed with what had been said to break the silence that followed, and after a while she continued, dreamily: "I find I must add a lastly. Who was it wrote 'to work, to play and to look up at the stars,' was it Van Dyke or Stevenson? Anyway, I am glad to put that play in. I did not get much after I went to live with Aunt Hulda; she was one who rested herself by knitting, you know. There was always a sheet to be sewn up after the dishes were washed and put away, so I would sew over-and-over, miles of it, it seemed, instead of playing out of doors as much as a child ought to. When I got into a home of my own I determined to have a good time right along, and I have tried to. One of my methods was to develop a hobby—it is about the only way that grown-ups can play—the indulgence of a hobby brings such an absorbing interest that it whisks one away from the work-a-day world from our troubles, even as by magic, and the gain is twofold if it takes one out of doors. My present hobby is—can you guess it? Wild ferns. See, I have already started twenty varieties in that shady corner of the yard—what didn't you know there were so many in New England; why, there are over thirty. See that bunch of ebony spleenwort, isn't it a beauty? How I love them all!"

HOUSEHOLD SCIENCE

A tablespoonful of vinegar, and a little salt should be added to each pint of boiling water used for poaching eggs.

Too much cannot be said about the nutritive qualities of cornmeal, which ought to be used more than it is in every household.

There is much nourishment, also medicinal properties, in fish, and a rule it is cheaper than meat. If fresh fish cannot be obtained, salt fish, if properly cooked, is quite as nutritious.

Alcohol or molasses will remove grass stains. Cold soap suds with a little kerosene added will remove fruit

stains. Try boiling water on tea coffee, or chocolate stains, and diluted ammonia on lemon or orange stains.

Dried peas and beans also rank high among the cheapest and most nutritious foods. Beans that are old require longer soaking than last year's crop. Never fail to add a little salt to the water in which they are put to soak.

The science of boiling meat is to cover it quickly with boiling water, bring to a boil, and then draw to a cooler part of the stove and simmer slowly until done. Whether for roasting or boiling meat should be placed with the fat downward.

When cooking eggs always break them separately in a cup for one bad egg will spoil all that have been broken before. For poaching or frying it is better to break them singly in a saucer, from which they can be easily slipped into the pan without breaking the yolk.

The proper temperature of the oven has more to do with good baking than the cook. Always test the oven before putting in pies, cakes, etc. If the oven is too cold, yeast will be heavy and have a dull look, and biscuit will not rise and be of feathery lightness. If clogged the draughts are interfered with and the temperature of the oven will not be regular and even; the bottom especially will be cold, and the bread and cakes will not rise and bake as they should. If you cannot clean the oven yourself, call in the stove man.

MOTHERS, THE OIL OF SOCIETY

If mothers lost their tempers over little things—

If mothers insisted on having their own way, no matter how much it inconvenienced all the rest of the family, no matter how much happiness and comfort it took out of other people's lives—

If mothers thought up grievances and sulked over them—

If mothers felt it their privilege to be crafty and dissembling and cross whenever they were tired—

If mothers made life harder to live in any one of the dozens of ways the rest of the family do—

Tell me, how on earth should we ever get along?

Truly, I think we just shouldn't; at least not for long.

Any more than a machine would be able to run very long without oil.

You don't like the implied comparison?

You think it degrades mothers?

I don't know.

It seems to me that oil has a pretty important function.

Just think, if there were no oil to be found anywhere in the world, how long would all the vast fabrics of machinery that makes modern life what it is—the huge pumps that send the water into our kitchens and our bathrooms, the machinery that manufactures our clothes and our furniture and ten thousand other things for each day's use, the motor the dynamo and the steam engine that minister to our daily need or pleasure—how long would they all run smoothly, if at all, without oil?

About as long, I fancy, as the complicated machinery of family life would endure, if mothers began to claim the privileges of obstinacy and bad temper and sulksiness that fathers and brothers and sisters all claim at least once in a while.

Think of it same day when you are fretting or sulking or finding fault about something, and mother—poor little mother, who isn't in the least to blame—is trying to smooth things over.

Think how strange it would seem if mother should turn the tables, expect the rest of the family to soothe her.

Think of it and thank God that He made these wonderful beings called mothers and made them willing and glad to be the oil of society.—Ruth Cameron.

TAKE A LOOK AT YOUR FACE

Why do you wear a harassed and troubled look? Are you really in trouble, or are you allowing the little worries of life to grind furrows in your face? Take a look at yourself in the mirror, and reform—that is, reshape your face into the lines of comfort and good cheer which it ought to wear.

Take an honest inventory of your troubles and decide whether or not they are really worth advertising in your countenance. It may seem a little thing to you whether or not you wear a smiling face, but it is not a little thing.

A severe look advises the tired and troubled men and women you meet that there is peace and joy in at least one heart. And there may be among them someone who has begun to doubt whether peace or joy exist at all. "A merry heart doeth good like a medicine."—Sel.

EAR-ACHE IN CHILDREN.

Ear-ache in children may generally be quickly relieved by filling a flannel bag with hops, wringing it out in hot vinegar as hot as can be borne, and laying it over the child's ear. Then cover the whole side of the face with dry flannel, and change the hop bag as soon as becomes cool. The warm steam filling the ear soon relieves the pain.

MILLION ACRE FARMS.

Strange Origin and Improvement of Australian Merinos.

C. E. W. Bean, of Sydney, has written in an Australian paper of the great sheep industry. His story is in part as follows:—

A century ago, when Australia was a dumping ground for England's seum, a British fleet received from a Spanish fleet a present of merino sheep, at a time when to export merino sheep from Spain was a criminal offence. The little flock reached Australia, and from it are descended the hundreds of millions of merinos which have made Australia great and wealthy, despite her small population.

Yastly improved is the modern merino, for the original 3-1-2 pounds to a fleece has been raised to 12 pounds, and there are rams in Australia which shear 40 pounds. Nowadays the good land near the coast is being given over to agriculture, and the sheep are driven back further into the desert. A terrible desert it is at times, where not one green leaf can be seen, when the red dust with which it is covered blows down away—and only the bare hard bones of the earth are left. Then sheep die by the million for want of the smallest scrap of nourishment, and are sometimes killed by the thousands because it is hopeless to expect to keep them alive.

Then comes the rain, and as if by a miracle the whole land is green again, the flocks increase out of all bounds, and the men who have been nearly ruined, make new fortunes in a few years. This is what is happening now. From 1898 to 1903 occurred the biggest drought known, and many station-holders lost their all. Since then there has been a steady succession of good seasons and the problem now is what to do with the enormous surplus of old ewes. Such are the vicissitudes of that strange land, the oldest part of the earth's exposed surface.

Some of the great sheep runs cover a million acres, or about 1,500 square miles. Each run is divided into paddocks, which cover the enormous surplus of old ewes. Such are the vicissitudes of that strange land, the oldest part of the earth's exposed surface.

There may be a hut in each paddock with a boundary rider—sometimes two, living together. Every day except Sunday, the boundary rider is expected to be out in his paddock. About one day in two he may spot something like a line of posts, which is probably a line of sheep in mirage on the horizon. Occasionally he cuts through the mirage, and he sees a man, or gets a mail, perhaps, once in three weeks. And yet, the boundary man get to like the lonely life.

Then, there is "the boss," the lord of many acres, a man of strong character and a liberal education, living a life not unlike that of an English country gentleman, in his remote home, but carrying on his work with the ability and keenness of a man who has been trained in business by the school of adversity. He is a man who works through the country from north to south, making plenty of money, and living in a rough way on the fat of the land as they pass from one shed to the other. They are a class unlike any other.

The Policeman's Dangerous Life.

About one in every six London policemen is injured during the year. More than one thousand men were on the sick list from injuries received while on duty, and nearly seven hundred more who were injured off duty. Some of the cases were so serious as to disable the men for a week or more, and these amounted to no fewer than 577. Besides these, there were twice as many injured less severely, who were not placed on the sick list.

The following examples show the multiplicity of dangers to which the police are exposed: 2,266 men were assaulted or injured when making arrests; 102 bitten by dogs; 51 hurt by persons not arrested; 17 injured while dispersing disorderly crowds; 44 hurt, some very severely, when stopping runaway horses; 21 injured when assisting fallen or restive horses; 25 kicked, trodden on, or knocked down by horses; 31 injured (14 very severely) by vehicles when regulating traffic; and 23 were injured when extinguishing fires.

And a further large number suffered injury by their horses falling or throwing them, by cyclists, while riding their own bicycles, at fire drills, by slipping and falling when examining premises, etc., so that the total of injuries while on duty for the year is brought up to 3,310.

An Honest Man.

A preacher near Bloomsbury, Eng., crew fervent in exhorting to an honest living, and near the close of his sermon he said: "Let every person in the house who is paying his or her debts stand up." Instantly every man and woman in the house, save one, was standing. After they were peacefully seated, the domini asked: "Now let those stand up who are not paying their debts," and a long lean, slowly assumed a perpendicular position in his pew. "How is it, my friend," enquired the minister in austere tone, "that you are the only one in this intelligent congregation who does not meet his obligations?" The lanky individual meekly answered, "I run a newspaper, and the brethren here are my subscribers, and"—the minister broke in abruptly with, "We will close with the benediction."

Tobacco For British Smokers.

More tobacco is apparently being smoked, for in November 5,210,988 pounds were cleared for home consumption, the largest quantity for one month in the normal conditions. Since April 61,359,318 pounds have been cleared, as against 57,596,911 pounds last year.—Tobacco Trade Review.

Tupperville.

The Rev. Mr. Porter preached here on Sunday morning at eleven o'clock. Mrs. Wilson and Miss May Inglis returned to Boston on Friday last.

H. D. Starratt is buying several carloads of gravensteins to help fill his order for the northwest.

Mr. John Brooks is building an apple house for Howard Bent.

The farmers are very busy picking apples to fill orders.

Capt. Gesner, of the S.S. Valinda, will be at this wharf tonight.

Miss Jennie Inglis leaves today for St. John, N.B.

Clementsport.

Mr. Ryder and Letteney of New Haven, Conn., with their families are spending the summer months here at the old Letteney home.

The ladies of the Methodist church held a tea meeting recently at the basement of said church, which passed off very pleasantly and was a success financially. The sum of forty-three dollars was realized and an excellent tea served which was very highly esteemed by those who partook thereof. As one present I would say that those that arranged this tea, cooked the food and waited upon the tables, were worthy of a medal.

The Rev. C.J. McKelton, A.B., S. T. D., of Ballardvale, Mass., preached in the Methodist church here on Sunday last in the place Rev. Porter, Shirley, the pastor. His discourse was much enjoyed by the congregation.

Several American tourists arrived here last week to spend a few weeks during this month. They are stopping at the Shaw House, kept by Mrs. Jenn Shaw.

A number of people from the village went to Digby on Tuesday of last week to hear and see the Premier of Canada, Sir Wilfrid Laurier. All seemed well pleased and had an enjoyable day.

Mrs. (Capt) Elias Rawding entertained friends from Bear River last week.

Mr. L. C. Jones, of Digby and E. Barteaux, of Vermont, were the guests of Mr. and Mrs. W.C. Jones on Sunday last.

Two of the daughters of Capt. J. W. Berry, with their children, are spending their vacation at the home of their father.

Our schools have re-opened with Miss Phillips, of Middleton and Miss Calnek of Granville Centre as teachers.

The teachers belonging to the village have gone to teach their respective schools for the present term.

The houses which are being erected here by Capt. H. Rawding and Mr. L. Shaw, are making good progress towards completion.

Schrs. Bobs, Mercedes, and Emma E. Potter have taken cargoes of wood and piling for Boston from this port recently which shows that business here is quite brisk.

We are sorry to learn that Mr. James Merritt, our popular livery stable proprietor, was robbed by some pick-pocket of the sum of \$106.90 at the Laurier gathering at Digby on Tuesday, 29th ult. This seems too much to lose in this way and we hope the culprit may be captured.

We learn that Miss Lillian Hicks daughter of Mr. Herbert Hicks, goes to the Ladies' College, Sackville, N.B. to take a course in music and elocution at its opening.

Mr. and Mrs. Bullock of Burton are visiting Mrs. Charles Ritchie, Mrs. Bullock's mother for a time.

The farmers here are harvesting their grain and notwithstanding the dry season, the yield is very good indeed.

Mr. Charles Henderson, after an absence of eighteen years in the United States, is visiting old friends and making his home with his cousin, Mrs. Wallace Hudson.

Our teachers took up their work last week in their respective schools. Miss Ruth Gilliat in the home section, Mr. A.E. McCormick at Belle Isle, Miss Alice Troop, Canso, Miss Beatrice Troop, Goat Island, Miss Annie Calnek, Clementsport, Miss Bessie Troop, Margaretville, Miss Ross Longmire, Rossway, Digby Co., while Misses Winnie Troop and Flora Longmire will attend the Normal School at Truro.

Lower Granville

Mr. and Mrs. Arch Morrison, Mr. and Mrs. Lemuel Morrison and child and Mr. and Mrs. Brown, of Salem who have been visiting friends and relatives here, returned home on Saturday.

Capt. Harvey Hudson left on Saturday to rejoin his ship in Philadelphia.

Joseph Holmes, of Lynn spent last week with his parents, Capt. and Mrs. Holmes, returning on Saturday.

Mrs. John W. Thorne and child went to Lynn on Saturday.

Misses Maggie Shafer and Helen Thorne went to Truro on Saturday to enter the Normal College.

AN OPEN LETTER.

Charley, Mass., August 2nd. Editor Monitor-Sentinel:—

Please put this in the Monitor, as it is written in this letter. It is pretty hard when a man has to publish anything about his wife, but she deserves all that will be published. He has been four years visiting her to do right. He applied for a divorce last winter, and she answered back to the lawyer and said she did not see what he wanted to get a divorce for, unless he wanted to marry the girl he was going with. But Mr. R. is too honest to do anything like that. But what does she think, a man can live away and maintain himself and her too, for she does not want to go where he can make a good living. The reports have come to him several times since she has been away, but he knows where she is.

The business will be put in Lawyer Ritchie's hands at Annapolis. The papers will be given to the constables in Bridgetown to keep her in town until Mr. R. gets at home, for he will be at home soon, and if she is not there when he gets home he will follow her to the end of the world.

WELL, WELL!

THIS is a HOME DYE that ANYONE can use.

I dyed ALL these DIFFERENT KINDS of Goods with the SAME Dye.

Parkers Cove

School opened here on Monday last with Miss Rhoda Bent, of Belleisle as teacher.

Fish have been quite plentiful the past week.

Mr. and Mrs. Curt's Halliday and family visited Mrs. Halliday's parents, Mr. and Mrs. John Clayton of Young's Cove over Sunday.

Mrs. James VanHess and son, Harold of Dorchester, Mass., and Mrs. Harvey Kiffin of New Albany were the guests of Mr. and Mrs. David Milner Aug. 26th and 27th. They also visited Mrs. May Rice and called on other friends.

The grim messenger death visited our community on Aug. 31st and claimed little Dorothy, aged two years, daughter of Mr. and Mrs. Walter Hudson. We extend our sympathy to the bereaved parents.

The remains of Mr. James Sterling was brought here from Boston, the 31st and interred in the Youngs Cove cemetery beside his wife, who pre-deceased him several years ago.

Mr. and Mrs. Eugene Longmaid and two sons who have been visiting Mr. and Mrs. David Milner, have returned to their home in Hartford, Conn. Mrs. Longmaid was a sister of Mrs. Milner. Miss Georgie Longmire accompanied them to stay the winter with her aunt, Mrs. Longmaid.

More bread and Better bread

—And the Reason for it

A STRONG FLOUR can only be made from strong wheat. Manitoba hard wheat is acknowledged the strongest in the world—and that is the kind used for Purity Flour.

Of course this special process is more expensive to operate but it means a lot to Purity Flour users—that's why we use it.

That means that Purity Flour is made entirely of the highest-grade flour parts of the strongest wheat in the world.

It means a high-class, strong flour and therefore yields "more bread" and better bread."

Purity may cost a little more than some flours, but results prove it the cheapest and most economical after all.
