Montreal Stock Market.

BUSINESS RECOGNIZED AS UNAVOIDABLE — LIQUIDATION IN MONT STREET MAKES A 6 POINT BREAK — NEW YORK MARKET ALSO VERY WEAK.

Montreal, Jan. 15.

While there was medium activity, the feeling of the market was far from being what members of Exchange could wish. Prices did not sink much except in one case, but they were not of a kind to promote stronger feeling. Where the advance was of any size, it was on small dealing and might not improbably be traced to inside support and where the trading was of any importance advance in price was as small as possible. There was very little public interest apparent except what, in the one case just referred to, looked like weariness on the part of holders with as consequence a considerable amount of liquidation.

Little satisfactory however though the market was to brokers and to customers of theirs having any stock, they wished to sell, the situation was accepted as unavoidable, so long as the South African affairs are so dubious.

Canadian Pacific advancing $\frac{1}{8}$ to 93 followed the London leading in being higher. The last sale was of 450 shares and the closing bid and demand were a little weaker.

Richelieu & Ontario falling $\frac{1}{4}$ to 104 $\frac{1}{2}$ kept well up and closed with some degree of firmness. Neither selling pressure nor buying demand was obvious. Buyers and sellers were waiting for war news.

Liquidation in Street to the amount of 455 shares seems to point to holders getting perhaps a little tired of waiting. Sales to-day beginning with a break of 2 points carried prices down 6, to 260. Here there was strength developed as with this price offered for more the demand on which trading broke off was 270.

At 102 $\frac{1}{2}$ Toronto Ry. kept firm to previous value, but the business in it was small. Three other stocks, Commercial Cable, Royal Electric and Payne on dealings of no great amount advanced Cable $\frac{1}{4}$,

Electric 2 and Payne 1 point, and yet they in the closing demands and offers were not very noticeable for continued strength.

Gas at 189 was 1 lower. Dominion Cotton at 92 $\frac{1}{2}$ receded $\frac{1}{2}$ points. A similar break took place in Bell Tel. Rights and in Montreal Cotton.

Quebec Bank and Merchants' Bank were on practically the same level as that of previous sales and Montreal-London at 36 sold on a broken lot at the previous price.

MORNING SALES.

CHAMBLIY WILL SUPPLY 20,000 HORSE POWER TO ROYAL ELECTRIC AND STREET RAILWAY.

Electric power from Chambly Light & Power Works will be introduced into the city to about four times its present amount. Six thousand horse power is what it is at present and twenty thousand horse power is to be transmitted as soon as possible. The manufacturing of electric power at Chambly is, all know, virtually now in the hands of the Royal Electric company. It also will have the distributed transmission of this increased power to no less than 100,000 houses.

from Chambly. Not merely the ever increasing number of customers of the Royal Electric, who use its electric power, will be thus assured of abundant supply, but the belief is that the Street Railway Co. will use Chambly power.

Arrangements about power transmission and bonds issue, etc., were completed on Saturday at a very important meeting when representatives of Electric, Chambly, and Street Railway companies went out to Chambly to inspect the works there. These representatives included Hon. L. J. Forget and Mr. James Ross.

Messrs. Malcolm C. Oswald and A. F. Mitchell have formed a co-partnership to continue the business of the late well-known firm of Oswald Bros., which was established in 1869 and the members of which were among the oldest members of the Montreal Stock Exchange.

Both gentlemen are well known and popular in business and social circles, and we wish them every success in their new venture.

STRAWS.

Homestake mining Co. has declared regular monthly dividend of 25c for December and an extra dividend of 26c payable Jan. 25.

Twenty-six cotton mills have been built in Mexico during the last year and new mills are being pushed to completion.

MONTREAL MINING EXCHANGE.

AN AVERAGE MARKET—SOME STRONG FEATURES—GOOD NEWS FOR DECCA SHAREHOLDERS—DEER TRAIL BETTER.

Montreal, Jan. 15.

There was nothing unusual to-day in the prices paid or the business done on the Exchange. There has been many a worse morning's business, and it is to be hoped there will be many a better.

Prices remain stationary except in a few cases. An improvement was noticed in Deer Trail No. 2 which is selling x-d to-day; 2,500 shares changed hands at 11 cents, an advance of $\frac{1}{2}$ a point over Saturday's price. The demand has greatly improved and higher prices may be looked for.

Canadian Gold Fields is decidedly firmer on greater demand; it sold at 8 cents, 1,500 selling previously at $\frac{7}{4}$; the stock closed strong at 8 cents. Considering the large interest this company holds in the Moyie since the amalgamation, the stock should be a purchase.

Montreal-London remains steady, selling at 36, the demand being better than it has been for some time.

There were sales in Golden Star at 31. The last sale on Friday, the 12th, was made at 32. 1000 shares changed hands.

Monto Christo at $6\frac{1}{2}$ looks cheap.

Slocan Sovereign sold at 35 cents for 500 shares, an improvement of $\frac{1}{2}$ a point over Saturday's closing price.

The Virginia, which is being prepared for steady and regular shipments will have a siding of its own for loading the ore.

The C. P. R. has completed the work of grading for the new side track. A considerable quantity of ore is on the dump. The plans for the future development call for weekly shipments of about 29 tons to the Trail smelter, where a \$6 rate has been secured.

Decca was in little demand. The most important strike as yet was made at the close of last week, when the big No. 1 vein was met in the crosscut at a depth of 200 feet and a distance of 110 feet from the shaft. The ore body is strong and is likely pretty wide. The crosscut was in 3 feet of ore on the 8th inst, and the quartz pans well. This strike gives Decca stoping ground for many thousands of tons of ore.

MORNING SALES.

NEW YORK EXCHANGE.

HEAVY DULL MARKET — THE OFFICIALS OF A. S. W. SAY THAT THE STRIKE WILL NOT AFFECT THE COMPANY MUCH — MONEY UNCHANGED.

New York, Jan. 15.

In spite of the fact that Saturday's bank statement made the best showing for many weeks, its publication was a signal for a very vigorous attack on the market. It is said that the attack was based upon the idea that many of the buyers during the early part of the week would seize upon favorable statement as a good opportunity for selling stocks. As a matter of fact not much liquidation was observable.

There is nothing new about sugar. It is up and down on the Exchange and is liable to have wild fluctuations between now and declaration of next dividend. Railroad stocks continue to hold up well, notably So. Pac., in which the buying seems to be for inside interests. The course of to-day's market depends entirely on news which we may get from Africa.

Under date 15th, London security markets are all said to be firm under lead of Consols on favorable report from South Africa. The news that Gen. Warren has succeeded in transporting his forces across Tugela is confirmed.

New York (noon), Jan. 15.

Although the news from South Africa was of a favorable character and prices in London were reported to show moderate gains over our Saturday closings nevertheless the market opened heavy and quickly developed some decidedly weak spots. These were Sugar, B.R.T., A.M.T., and M.R. The selling of the latter was quite vigorous and there was a good deal of talk in the room about the disclosures made in regard to the character of the securities up on which the State Trust company was lending money. That the securities in question should be used as collateral was thought to be an indication of weakness on the part of some of the larger interests in the street. There was no particular buying, commission houses reporting very dull business whilst the bears hammered stocks whenever the opportunity presented. Later on stories were circulated that the British had met with a reverse in South Africa, but these stories are wholly lacking in any official confirmation and may be set down as absolutely false. It was pointed out that London did not buy in spite of the higher prices, and the bears claim that this indicated that some foreign house had advices from South Africa which were of a disquieting nature. The real reason for the lack of buying by London was that the market was so dull that arbitrage transactions were almost impossible.

A. S. W. was sold down on rumors of strikes, but there was no official confirmation. The money market remains unchanged, it is said that the time money is increasing and it is believed that some loans for four months have been made at 5 per cent on dividend paying railroads, but on ordinary mixed collateral the rate is still 6 per cent, and the supply of money to loan on such collateral is not plentiful.

MINING NEWS.

GIANT.

Work was resumed upon the Giant by Senator George Turner, Colonel W. M. Ridpath and Mr. E. D. Sanders, under a six months' option on the control of the stock. Since then the work has been confined to the thorough prospecting of the surface, during which it was demonstrated that there were two strong veins on the property—one of gold copper and the other carrying gold and white iron. A four-drill compressor, together with a pumping and hoisting plant, have been installed and are now in operation. The shaft on the gold copper ledge, which had reached a depth of 112 feet, has just been unwatered, and the intention is as soon as the stations can be cut out and a ladder-way put in, to crosscut from the 50 and the 100-foot levels, so as to strike the ledge, which is thought to be from 30 to 40 feet from the shaft. As the ore taken from the surface of this vein is nearly all of a pay grade, it is thought that there will be quite a lot of shipping ore between the 100-foot level and the surface. Ore to the extent of 75 tons has been shipped from the Giant since work was resumed under the new management. There are still about 300 tons on the dump. A ten-drill compressor has been ordered, and will take the place of the present plant as soon as it can be made.

So far, shipments of ore have been made to the Northport smelter, but it is thought that from now on the ore will be sent to Trail.

VELVET.

During the past year the main shaft on the Velvet has been extended from the 100 to the 250-foot level. On the 150-foot level crosscuts and drifts of a total length of 620 feet have been run, and a body of ore of from six to 35 feet in width has been exposed. The ore is of a good grade. On the 250-foot level, crosscuts and drifts and upraises have been made to the extent of 450 feet. The ore shoot is opened for a horizontal length of 273 feet on the 150-foot level, and for a length of 130 feet on the 250-foot level. The main adit, which is to open the mine to a depth of 230 feet has now been driven in for a distance of 110 feet. This is the mine to which the Canadian Pacific Railway recently surveyed a line from this city, over a distance of 15 miles, and there is a considerable assurance that it will be constructed in the spring. There is considerable ore on the dumps that was taken out in the course of the development, and more in the stopes, and it is certain that a large

tonnage could be furnished by the Velvet for the railway when it is completed.

CALIFORNIA.

Work was resumed upon this property some three months since. The development at that time consisted of a 210-foot tunnel driven on a north and south vein under a large iron capping, which shows a width of 80 feet. This tunnel has been lengthened since then. In addition to this a stringer of ore met in the tunnel has been driven on for about 50 feet. Most of the attention since work was resumed has been given to the erection of a combined shaft and compressor house, blacksmith shop, office building and other structures. The intention is to put in a ten-drill compressor, which was ordered three months since, and which is expected to come to hand in about a month. The motive power will be electricity. The gallows frame and some of the electric machinery is already in position, and the work of sinking the shaft is being carried on by hand, pending the installation of the machinery. The intention, as will be seen from the large scale of the preparations, will be on an extensive plan.

EVENING STAR.

The upper tunnel has been lengthened 50 feet. No. 2 tunnel has been driven for a distance of 50 feet and an upraise has been made from it for 50 feet. There has been 86 feet of drifting in the No. 2 tunnel. A winze has been made from No. 2 tunnel to a depth of 20 feet. The gold-white iron ledge has been opened up for a depth of 150 feet and for something over 100 feet in horizontal depth. The ledge is 30 feet wide. A large copper-gold ledge has been developed by means of an open cut and explorations are in progress from the 150-foot level for the purpose of finding this ledge. As soon as the reorganization of the company is completed the intention of the management is to install a 10-drill compressor.

WAR EAGLE AND CENTRE STAR.

The War Eagle shipped during the year 64,748 tons and the Centre Star 16,855 tons. The latter is expected to start the year with a weekly output of 1000 tons. The combined monthly pay roll for the two mines show 617 men and \$49,359.

NEW ST. ELMO.

Work on the property of the New St. Elmo was resumed on June after a shut down of 12 months by the recognized company, which is made up of a syndicate of Toronto and New York capitalists. Previous to this a tunnel over 800 feet had been run. Since the work was resumed by the new company 294 feet of drifting and crosscutting has been done under the superintendence of Mr. Krumb. One crosscut has been driven to the south to intersect a vein that is parallel to the main lead, a distance of 164 feet. There is a fair showing of ore in the property. A five-drill compressor plant was installed a short time since and the work of development is making good progress.

IRON MASK.

During the past year work has been done at the 200, 300, 350 and 400-foot levels until a mile of underground workings have been developed and a large quantity of shipping ore has been uncovered. The ore reserve obtained being the leading feature of the year's work in addition to the successful installation of new machinery. The mine employs a force of 60 men, has a pay roll of \$5,500 and during the year shipped 5,646 tons of carefully sorted ore.

I. X. L.

Work was recommenced upon this property by the new management in June of last year. Since that period a valuable ore shoot has been developed to a depth of 150 feet, and a length of about 180 feet. In the drift on the 50-foot level the ledge has been drifted on for a distance of 160 feet. On the 100-foot level it has been drifted on for 180 feet, and on the 150 foot level for about 25 feet. The ledge is from $\frac{3}{4}$ feet to 3 feet in width. The ore taken out in the course of development last year. The intention is to begin regular shipments before long.

GREAT WESTERN.

The management have decided to close down the Great Western mine for the present. A great deal of surface water from the swamp to the north has found its way into the mine, and as the workings of the Nickle Plate are being rapidly extended eastward it has been decided to wait until they reach the Great Western's line of operation, when both mines can be worked together advantageously. The main shaft is down 400 feet, and during the year the mine was thoroughly equipped with machinery and pumps.
