CURRENT TRADE CONDITIONS.

ONTARIO.

It is usual for the month of April to be characterized by a decline in the price of lumber in anticipation of the new cut, but the past month has been a notable exception. Prices of almost every grade of lumber are equally as firm as one month ago. The demand has been quite active, and sufficient to absorb nearly all the dry lumber on the market. There is practically no merchantable pine that has not passed out of first hands. A large percentage of the new cut has also been contracted for at prices considerably higher than those ruling one year ago. It is, probable, however, that those who have bought will be on the right side of the market, as should any quantity of logs be hung up, as now seems probable, the result would be a further stiffening of prices. That a shortage in the log supply is anticipated is shown by the fact that logs are changing hands in the Georgian Bay district at \$11 per thousand feet. It is said that on the north shore several million feet are hung up. Among the grades of lumber most in demand are 10 and 12 inch dressing and better and 6 inch strips. Several sales of mill culls have been made at high figures. Manufacturers report more liberal buying of hardwoods, with less disposition to scrutinize the inspection.

QUEBEC AND NEW BRUNSWICK.

Interest now centres on the log drives. The situation has not improved and the prospects for getting the logs to the mills are not encouraging. Satisfactory progress is being made on the Tobique river but the conditions on the St. John have been less favorable. There has been considerable buying of spruce deals for the British market, as shippers seem to fear a shortage in the supply. It is estimated that the shipments from Nova Scotia will be considerably less than last year. Cedar shingles continue firm, while there has been a slight decline in the price of spruce lath.

MANITOBA AND BRITISH COLUMBIA.

The lumber trade in Manitoba and the Territories is steadily increasing in volume. Building operations in Winnipeg and the country towns are becoming quite active and will call for a large quantity of lumber. An advance in the price of white pine lumber has been put into effect by the manufacturers. It is equal to about fifty cents per thousand feet on timber and dimension, boards, shiplap, flooring, siding and ceiling. This is likely to be followed by a corresponding advance in retail prices. It is understood that the

mills in British Columbia are also considering the raising of prices probably one dollar per thousand, to offset the higher prices asked for logs. The demand is active and a prosperous season is expected by both lumber and shingle manufacturers.

UNITED STATES.

The lumber market generally is quite as strong as at last writing. The situation at the head of the lakes is not satisfactory to mill men, inasmuch as there is a shortage of logs and some of the mills may be compelled to close down unless good progress is made with the drives. Business is particularly active in Pennsylvania and New York States. The high prices of pine and spruce are causing the substitution of southern pine in a few instances. Piece stuff is selling in the Chicago market at \$15.25. Dry stocks along the lakes are cleared up, and green lumber will not be ready for shipment for two or three weeks yet. It is not likely, however, that prices will be further advanced, as it would be better to maintain prices at the present basis than force them higher, and probably bring about a sharp reaction when the new cut is offered. In the Saginaw valley long run pine is selling at \$17 to \$25, box lumber at \$14 to 16, and mill culls at \$12 to \$13. Norway pine has strengthened of late, an advance of \$1 having been made at Toledo last week. The base price there is now \$17.50 for 2x4 to 2x10, 12 to 16 feet. Hemlock prices are also moving upwards. Cargo shippers who were selling dry hemlock a few weeks ago on the basis of \$9.50 to \$10 at the mill now want \$10.50 to \$11. Recent sales were on the basis of \$11 delivered in Chicago, so that the asking prices are an advance of over one dollar. At Toledo hemlock boards are quoted at \$15. From the Pacific coast comes the report that the mills are crowded to their utmost with orders, and that shipments are limited only by the available stocks of lumber and the supply of cars. There has been within the past two months a complete reversal of the hardwood market. At that time all kinds were quiet, whereas there are few items that are not now moving freely. Higher prices are being asked for maple and birch.

Most of the lath to be cut at Duluth this season has been contracted for at high prices. In the Saginaw valley No. 1 laths are quoted at \$4, and No. 2 at \$3.50. The demand is good for all grades of shingles. It is said that sales of New Brunswick shingles are being made in Boston at a range from \$3.50 to \$3.75.

GREAT BRITAIN.

The knowledge that no import duty is to be placed on timber was no doubt responsible in part for the better tone of the British market during the past fortnight. The prospects of peace in South Africa have also had a reassuring influence. Buyers have entered the market to secure specifications that are likely to be required for early contracts. In addition, there have been large public sales of pine and spruce, as is usual at this season of the year, to make room for the new imports. The prices realized show a slightly advancing tendency. For a quantity of first quality pine, from Quebec, £27 5s was obtained. This price, however, seems low, inasmuch as £30 is asked by Quebec shippers for similar stock delivered at London. A parcel of regulars, containing a percentage of second-class deals, brought £24. Second quality pine, 14 to 15 feet in

length, sold at £16. The stock of spruce deals is working down, and 9 and 11-inch bring good prices. For narrow sizes the market is dull. A correspondent at Liverpool writes that the stock of spruce on hand is of very poor quality, but that it is being firmly held owing to the attitude of shippers. It is said that contracts have been closed on the basis of £7 7s 6d per standard c. i. f. Liverpool, for June loading, and that for later delivery £7 10s is asked. The prices realized for square timber at a recent sale are given in another column.

STOCKS AND PRICES.

The Parrsboro Lumber Company, of Parrsboro, N. S., expect to ship 3,000,000 feet of lumber this season.

The barque Pallas sailed last week from the Hastings mill, Vancouver, B.C., with lumber, for the United Kingdom.

J. & C. Hickman, of Port Elgin, N.B., expect to cut this season about 3,250,000 feet of spruce deals and 2,000,000 lath.

The Keewatin Lumber Company, of Keewatin, Ont., expect to manufacture 20,000,000 feet of lumber this season.

McClellan Bros. have just finished sawing 370,000 feet of deals and boards at Hopewell, Hill, N.B., by a portable mill.

Sims Bros., of Little Current, Ont., last week sold to William Pulling & Company, of Windsor, 650,000 feet of mill culls at good figure.

J. Willard Smith, agent for Gibson's mill at Marysville, N.B., expects to place the first cargo of cedar shingles on the market this week.

It is estimated that 33,000,000 feet of deals were shipped to the United Kingdom from St. John's, N. B., during the past winter on the regular liners:

One of the novelties of recent shipments from British Columbia was a cargo of lumber from the Hastings Mill, Vancouver, for Philadelphia, Penn.

The CANADA LUMBERMAN would be pleased to learn of parties in a position to make immediate shipment of about 5,000 railway ties, in either cedar or tamarac.

The Moulthrop Lumber Company, of John's Island, Ont., have purchased a timber limit on the Vermillion river, estimated to contain 40,000,000 feet of pine.

John L. Peck and J. Nelson Smith, of Hillsboro, N.B., are reported to have purchased 1,400 acres of timber land in the vicinity of Albert Mines, N.B., from Capt. H. A. Calhoun.

It is estimated that there are 290,000,000 feet of logs to come out of the Spanish river and tributaries this spring. The water is low, however, and many of the logs may be hung up.

R. A. Estey, of Fredericton, N.B., has sold 1,500,000 feet of spruce logs of this winter's cut to John E. Moore, of St. John. Mr. Estey took out more logs than he can manufacture at his mill.

The Canadian Pacific Railway Company are asking for tenders in this issue for the supply of track ties, fence posts, telegraph poles and piling required by the Ontario division for the next three or five years.

The barque Rhoda cleared from Little Current, Ont., on the 18th inst., for Cleveland, with 541,000 feet of lumber for the Saginaw Bay Company. This is part of the stock purchased by the company from Sims Bros.

According to M. L. Tucker, the ship-

ments of lumber from Parrsboro, N. S., this season will be smaller than for some years. He estimates that the shipments from West Bay will not exceed 15,000,000 feet, compared with nearly 40,000,000 feet last year.

The Parrsboro Lumber Company, of Parrsboro, N.S., operated last winter in Newfoundland, getting out 2,500,000 feet of logs at Notre Dame Junction. The Highland Lumber Company, also a Nova Scotia concern, took out 3,000,000 feet at Norris Arm. The Exploits Lumber Company, operating at Botwoodville, Nfld., took out 10,000,000 feet last winter.

Messrs. S. P. Musson, Son & Company, in their report of April 12th, thus refer to the Barbadoes market: "There have been no arrivals of white pine, but the market is amply supplied at the moment. We could not venture to value a cargo at present over \$20 to \$20.50 for shipping, and \$15 to \$15.50 for second quality. In spruce we have had the "Josie," with 130,000 feet, which we placed at \$18.37. The steamer "Bratsberg" brought a small parcel of long cedar shingles, which have been sold at \$3.60; further arrivals, however, will probably not bring this price."

BRITISH TIMBER SALE.

The following prices were realized for Canadian deals, etc., at an auction sale held at London, England, by Foy, Morgan & Company, on April 16th:

A firm of organ makers have asked to be furnished with the names of shippers of whitewood from Canada.

A firm at Leith, Scotland, make inquiry respecting the wood pulp trade of Canada, their object being to interest themselves in the importation of sulphite pulp.

The Canadian makers of butcher and other skewers ask to be placed in touch with English buyers.

DOORS AND MOULDINGS.

A large buyer of Canadian white pine doors and mouldings is open to contract with a mill for their entire output of No. 3 and 4 qualities of doors and all their mouldings during 1902. Write in first instance to Empire, CANADA LUMBERMAN.

TO THE LUMBER TRADE

We will be represented in South Western Ontario by Mr. Frederick Shaw, of Forest, Ont., who comes with us as travelling salesman on May 1st, and who will call on the trade regularly. We are running our mills day and night and offer to the trade a well manufactured stock of band sawed lumber put up in grades under Michigan inspection rules. We solicit your inquiries, and all correspondence given prompt attention.

[Correspondence of the CANADA LUMBERMAN.]

The activity about the mills is the present prominent feature of the lumber business. Every preparation has been made for a big season's cut, and all that remains to transform expectations into realizations is a large and steady supply of logs. Gilmour & Hughson's large mill on the Hull side of the river is working on dimension timber. The W. C. Edwards Company's mill has also started for the season with a large gang of men. The Ottawa mill got down to business this year about a week before the larger mill at Rockland. Booth's mill is also running night and day, the night gang having been placed at work this week. Over 1,500 men are now employed in the Booth mill and yard. A large burner is in course of erection. In it the refuse sawdust will be disposed of. The E. B. Eddy Company's saw mill and the mills of smaller concerns in and about the city are all working on the season's cut.

From present indications very little lumber available for present sale is likely to be carried over. The mill men are daily in receipt of inquiries from local and outside dealers, and the prospects for a rapid turnover of lumber in the yards are good.

The Ottawa Transportation Company has got its fleet of 80 barges in readiness for the movement of the Ottawa and Hull mill cut. Shipments will commence early next week, and an extra busy season is looked for. The above company has a monopoly of the river carrying business. American barges carrying return cargoes of lumber have to get permission and pay for the privilege. Each of the Ottawa barges has a capacity of 350,000 feet of lumber, equal to 25 car loads. A couple of new barges will be placed in commission with the opening of the canal on Monday.

There is absolutely no change in the lumber prices this month. They are stationary and several lines are all held in second hands. Lath and shingles figure in this list, with several measurements of the better grade of lumber. Everyone is waiting for a slice of the new cut on which the mills have just started. When it is placed on the market it will no doubt have an effect on prices.

Building operations in the city have not as yet taken on the accustomed activity, but better things are looked for. The talk of strikes in the building trades is dying out, and local dealers are anticipating a busy season with the city trade. Shipments to the States have picked up, and the C. P. Railway and C. A. Railway report an increased inquiry for cars. The trade with the States by water will be large this season.

The dry weather has given the Ottawa lumbermen considerable trouble, and unless an abundance of rain marks the weather for the next week, many logs will be tied up, as the water is low. The Riordan Paper Company, of Hawkesbury, is said to have a considerable quantity of stuff on the Rough River which will have to be left there. This week a couple of large booms passed down the river to Grenville, en route to Montreal. The report that the Canadian Pacific Railway has purchased the Ottawa, Northern and Western Railway and the Pontiac line is good news for the local lumbermen, the improved service will facilitate the handling of supplies. If the C.P.R. extends the lines as is predicted, new and valuable territory will be opened up.

In the provincial campaign the local lumber trade is deeply interested, as two of its members are prospective candidates. They are ex-Mayor Bingham and Alex. Lumsden, ex-M.L.A. Mayor White, of

Pembroke, son of the late Andrew White, M.L.A., will contest North Renfrew in the Conservative interests against Mr. Munro, the sitting member, who is a well-known lumberman. Mayor White controls his father's interests in the lumber business. Mr. Alex. Lumsden, who returned a few days ago from the Temiscamingue district, states that the Kippewa Temiscamingue, and smaller lakes are still full of ice. Navigation will not be opened for some time. None of the mills are running yet.

At the annual meeting held here last week Mr. W. C. Edwards, M.P., the well-known lumberman, was elected President of the Canadian Association for the Prevention of Tuberculosis.

OTTAWA, April 25th, 1902.

FIRES.

The saw mill of H. Elderkin & Co. at Port Greville, N.S., was destroyed by fire recently.

The saw mill of John Cooper, of Wallaceburg, Ont., was burned a few days ago. The loss is heavy.

The saw mill of George Tennant, at Bracebridge, Ont., together with a quantity of lumber, was burned last week.

The sash and door factory of Robertson & Hackett, Vancouver, B.C., was damaged by fire recently to the extent of \$4,000.

Simmie's saw mill at Clavering, Ont., together with a quantity of lumber was destroyed by fire last week. The loss is about \$6,000.

The sash and door factory of James York, at Chesterville, Ont., was destroyed by fire recently. The loss is estimated at \$50,000, with no insurance.

THE BOSTON MARKET.

The spruce lumber situation still hinges on the log drives. The weather conditions east still continue unfavorable for driving, and the probabilities thoroughly favor a hang-up of a good portion of the new logs in the tributaries of the big rivers. Manufacturers, consequently, evince a determination to either withdraw quotations entirely, or bid \$1.50 to \$2 per thousand over last winter's prices. Quotations are \$18 to \$20 on ordinary frames, 10-in. and over, \$20 to \$22, with the lower quotations more nearly normal than otherwise.

Hemlock is still very firm, with the supply limited. Boards, 12, 14 and 16

feet stock, \$15 to \$15.50 for good eastern; random, eastern, \$14 to \$14.50; Pennsylvania, No. 1, \$16 to \$17.50; No. 2, \$15 to \$15.50.

White pine continues remarkably strong: Here, uppers, 1-in. \$75 to \$80; 2½ and 3 in. \$80 to \$85; 4-in. \$85 to \$88; selects, 1 to 1½ in. \$68; 2-in. \$69 to \$70; 2½ to 3 in. \$74 to \$76; 4-in. \$79 to \$80; fine common, 1-in. \$60 to \$63; 1½ to 1¾ in. \$64 to \$66; 2-in. \$68 to \$70; 2½ and 3 in. \$69 to \$71; 4-in. \$80; barn boards, \$23 to \$24; collar boards, \$27 to \$32.

Hardwood lumber is very firm, with exception of common plain, oak which is weak and easy: Quartered oak, \$64 to \$66; plain oak, \$41 to \$45; common and rejects, \$20 to \$25; red oak no market; white wood, \$42 to \$43; sap and common, \$30 to \$35; brown ash, \$41 to \$44; white

ash, \$43 to \$46; maple, \$28 to \$30; end-dried white maple, \$38 to \$42; birch, \$27 to \$30; birch, 75 per cent. red, \$45 to \$50; elm, \$29 to \$31.

Shingles continue very firm, with spot prices 15c above quotations on extra and clears, with a very light demand for second clears: To arrive, extra cedar, \$3.35 to \$3.40; clear, \$2.85; second clear, \$2.35; extra No. 1, \$1.75 to \$1.90; Washington

and British Columbia red cedar, 16-inch, five butts to 2 inches, \$3.75 to \$3.80; 18-inch, \$4.25 to \$4.50.

Clapboards are very scarce and firm, with prices at wide range, depending on how badly they are wanted: Extra spruce, \$38 to \$40; clear, \$36 to \$38; second clear, \$33 to \$35; extra No. 1, \$24 to \$26.

Laths are firm: 1½ inch at \$3.15 to \$3.20; 1¾ inch, at \$3.

New Mill Erected 1901.

Capacity 100 Million a Year.

Spicer Shingle Mill Co., Limited

The purpose of this advertisement to try and convince the Lumber Trade of Canada that we are the only company in British Columbia manufacturing and shipping shingles in large quantities, or that we "know it all." We recognize that "there are others" and that we are not the only "pebble on the beach." To try and make you believe that we are the only people who can supply you promptly and in large quantities with a high-grade shingle would not only be a fish and a bear story combined, but it would be gall of the bitterest kind.

Our competitors in the shingle business in B. C. are nice people, and we presume that they know their business; but we are nice people too, and as we have been in the trade as long as any of them, and a great deal longer than the most of them, we know that we know our business, and that our competitors are not in the possession of any points of value regarding the manufacture of shingles which has not come to our knowledge.

Our old mill was burned down in May last, and in its place we have built what is at the present time the Largest Shingle Mill in B. C.

Our new Mill has 7 of the latest improved type of Dunbar machine, which we run night and day—giving us a capacity of about 100 Million a year.

Competent judges who have seen our new mill, tell us that it is one of the most substantial, carefully constructed, and best planned mills in this province. We ourselves think it is the very best shingle mill in B. C.; and we know that it is equipped with all the very latest improved Shingle Machinery.

Will the trade please note that our contract with the Pacific Coast Lumber Co. closed on December 31, 1901. Orders sent to us by letter or telegraph shall have our best attention.

We want our share of your shingle business, and can guarantee you satisfaction in every particular.

Spicer Shingle Mill Co., Limited,
 VANCOUVER, B. C.

Another Little Mill

There will be over a million feet of sawn lumber used in this one plant for construction only; over 30,000 lin. feet of piling, besides rock foundations; two car-loads of shingle machines only; over 7 miles steam pipe 11-2 inch and up in diameter. A summary of all the material that will be used in the construction of this plant shows that there will be over 320 car-loads, or 21 trains of 15 car-loads each.

With all our past experience in the shingle business, of which we make a specialty, and with all the latest and best improvements in machinery and mill construction, we expect it to be the most complete and up-to-date mill in North America, where shingles can be made better than in the ordinary mill.

The above plant will be in operation about the first of June, and although this mill will have a daily (24 hours) capacity of 1,250,000 shingles, the dealers and consumers need not be afraid of any particular surplus, but can rest assured that there will be one firm on the coast manufacturing red cedar shingles from whom they can get their wants supplied in a hurry with that old reliable "Hastings Brand" so much talked about.

CUSTOMERS' ATTENTION.—Please take notice that on and after the 1st day of January, 1902, all arrangements with the Pacific Coast Lumber Co. of New Westminster, B. C., for the handling of any of our shingles will be ended, and until further notice our authorized general agents will be Mr. Jas. Twitchell, Clinton, Ont., for Ontario, and Mr. Samuel Ashfield of Winnipeg, Man., for Manitoba and the North-West; therefore, orders for straight or mixed cars sent through the above agents or direct to us will have equally prompt and careful attention.
