The copy filmed here has been reproduced thanks to the generosity of:

Izaak Walton Killam Memorial Library
Dalhousie University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Izaak Walton Killam Memorial Library
Dalhousie University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

NOTE.—It is to be observed that throughout the Calendar pages the Computations are in *Mean Time*, with the exception of the rising and the setting of the Sun. Also that the Sun and Moon's declination are given for the Meridian of Greenwich. The time of tide is of that tide which immediately precedes the southing of the Moon.

THE FAMILY FRIEND.

DANDELION COFFEE.—Gather the roots of dandelions in the Fall of the year, wash them well, taking care not to rub off the skin, dry them on boards in the sun, and then they will keep for years. When wanted for use, they are cut up in pieces about the size of coffee beans, and browned exactly like coffee, and they are then ground and used like it. If mixed along with coffee, at the rate of two-thirds coffee to one of dandelion root, a very good and healthy beverage is thus made.

Lamps will have less disagreeable smell, if you dip the wick yarn in strong hot vinegar, and let it dry.

THE FARMERS' FRIEND.

OIL FOR MACHINERY, WAGON-WHEELS, &c.—Add one part of India rubber to fifty parts of Rape oil, and boil till the rubber is nearly all dissolved. It is not only more unctuous and less affected by friction than other oils, but remains liquid below the freezing point of water. In this respect it is most valuable in cold winters.

Milch cows, in winter, should be kept in dry, moderately warm, but well ventilated quarters, regularly fed and watered three times a day, salted twice or three a week, have clean beds, be curried daily, and, in addition to their long provender, should receive succulent food morning and evening.

Feed all animals regularly. They not only look for their food at the usual time, but the stomach indicates the want at the stated period. Therefore feed morning, noon and evening, as near the same time as possible.

For High Water at Cape Sable, add 5 mi. to the time of High Water at Halifax. Tide serves same hour at Annapolis and St. John, N. B.

THE FARMERS' FRIEND.

VESSELS FOR MILK.—Experiments have been made of the comparative excellence of zinc and tin for milk. The result was that milk in tin pans curdled three hours sooner than that in zinc, and that the milk in the latter produced one-fifth more cream, and the cream one-fifth more butter, and of a sweeter flavor.

Every husbandman should carefully read and digest matters connected with his business, his success being as dependent upon a full knowledge of its principles and details as is that of a lawyer and physician with a knowledge of the science of law or physic.

All stiff clays are benefited by fall and winter ploughing; but should never be ploughed while they are wet. If at such ploughings the furrow be materially deepened, lime, marl or ashes, should be applied.

Young stock should be moderately fed with grain in winter, and receive generous supplies of long provender, it being essential to keep them in fair condition, in order that the formation of muscle, bones, &c., may be encouraged and continuously carried on.

 For High Water at Cape Sable add 50m. to time of High Water at Halifax. Tide serves same hour at Annapolis and St. John, N. B.

THE FAMILY FRIEND.

It ought to be promulgated to the profession, and for humanity sake to be known to the whole people that in any case of burn or scald, however extensive, all the acute suffering of the patient may be at once relieved, and that in a moment of time, by sprinkling over the injured surface a thick layer of wheat flour by the hand, or, what is better, by a dredging box. Every vestige of pain produced by such injuries is instantly removed, and the sufferer not only escapes the shock to the nervous system accompanying such torture, but will generally fall into a quiet sleep the moment the atmospheric temperature is thus excluded from the wounds.

THE FARMERS' FRIEND.

The *Hartford Times* mentions a farmer who took up a fence, after it had been standing fourteen years, and found some of the posts nearly sound, and others rotted off at the bottom. Looking for the cause, he discovered that the posts which had been inverted from the way they grew were solid, and those which had been set as they grew were rotted off. This is certainly an incident worthy of being noticed by our farmer.

It is said that the best and speediest way to fertilize any soil, is to cover it over with straw, bushes, or any raw material, so as to completely shade it. The surface of the earth thus being made cool, dark, damp and close, soon undergoes a chemical process like putrefaction, and becomes highly fertilized. This plan of fertilizing may be applied with success to any soil whatever, no matter how poor, and the result will be astonishing.

THE FAMILY FRIEND.

COMPOSITION FOR LEATHER.—The following is by far the best composition for leather we have ever tried. It keeps it water-proof and pliable, and is susceptible of the highest degree of polish:—1 pint boiled linseed oil, $1\frac{1}{2}$ pound mutton tallow, 6 ounces beeswax, 4 ounces rosin; melt and simmer together. Apply it to the leather moderately warm.

If black dresses have been stained, boil a handful of flg leaves in a quart of water, and reduce it to a pint. A sponge dipped in this liquid and rubbed upon them, will entirely remove stains from crapes, bombazines, &c.

Clean a brass kettle before using it for cooking, with salt and vinegar.

THE FARMERS' FRIEND.

If the owners of trees whose foliage is annually, and sometimes oftener, destroyed by worms, will take the trouble to bore a hole in their trunks, inclining towards their roots, (now that the sap is ascending,) and fill the aperture in each with the flour of sulphur, protecting it from the weather by pitch, clay, or sealing-wax, they will find that insects will not trouble the leaves.

We frequently see farmers in a bright, windy April day, spending much labor in composting in their fields, shovelling over and over again their manure heaps, often mixing nothing with them, and oftener, perhaps, road-side sand or worthless soil. The loss by the operation is manifest to more senses than one. It was stated in a public lecture by a learned chemist that about *one-fifth* of the value of a heap of stable manure would escape by evaporation, in such a day as I have named, by a single shovelling over and shaking up in the usual way.

CARROTS FOR HORSES.—Horses that have a hard, dry cough, or that have the heaves, are remarkably relieved by moderate feeding of carrots.

 For High Water at Cape Sable, add 50m. to time of High Water at Halifax. Tide serves same hour at Annapolis and St. John, N. E.

THE FAMILY FRIEND.

STARCHING LINEN.—Take two ounces of fine white gum Arable powder, put it into a pitcher, and pour on it a pint or more of boiling water, according to the degree of strength you desire, and then, having covered it, let it set all night. In the morning pour it carefully from the dregs into a clean bottle, cork it, and keep it for use. A tablespoonful of gum water stirred into a pint of starch that has been made in the usual manner, will give the lawns, either white, black, or printed, a look of newness, when nothing else can restore them after washing. It is also good, much diluted, for thin white muslin and bobbinet.

Asparagus is strongly recommended in affections of the chest and lungs.

THE FARMERS' FRIEND.

FARM EXPERIENCE.—Twenty years' experience upon a farm has taught me that one acre of land, well manured and tilled, will produce more than two acres which received the same amount of labour and manure. That one cow, well fed, will be of more profit than two fed upon the same amount of fodder: this will apply to all other stock. That one ton of hay, cut when the grass begins to blossom, will produce as much milk as two tons cut when the seed is ripe.

Abundant crops cannot be grown for a succession of years, unless care be taken to provide, and apply, an equivalent for the substances carried off the land in the products grown thereon.

CLOVERING.—Never spare the seed when you sow clover. Four quarts are not enough to the acre; put on not less than six, and be not frightened if you scatter a peck! The great superiority of thickly sown clover fields over others for feed and manure, is too manifest to need demonstration.

THE FAMILY FRIEND.

WORTH TRYING—Sweet oil is said to be one of the most effective weapons that can be used against bed-bugs. To drive these midnight depredators from your bed all that is necessary is to take a feather and oil the joints and crevices well. After remaining several days, by rubbing it off with a woollen cloth, it will give bedsteads a handsome polish, and prevent any further visits for a long time.

Perhaps it is not generally known, as it should be, that salt put into the mouth will instantly remove the convulsive movements in fits, either of children or animals.

Woollens should be washed in very hot suds, and not rinsed. Lukewarm water shrinks them.

THE FARMERS' FRIEND.

The strongest of all manures is found in the droppings of the poultry yard. Each barrel of it will manure half an acre of land; save it, then, and add to the productive energies of your soil. Don't look upon it as too trifling for your attention; but recollect that the globe itself is an aggregate of small matters.

A Pennsylvania farmer states, in a late American journal, that the water in which potatoes have been boiled, sprinkled over grain or garden plants, completely destroys all insects in every stage of existence, from the egg to the full grown fly.

The orchard, to be productive of good, fair fruit, requires to be fed, as much as does a field of grain. The soil of each requires that the substances abstracted by the crops shall be restored. The soil should be kept clean, and open to the meliorating influences of the sun, the dews, the rain, and the air—the bark of the trees should be kept in a healthful condition, by scraping, when necessary, and by alkaline washes.

For High Water at Cape Sable add 50m. to time of High Water at Halifax. Tide serves same hour at Annapolis and St John, N. B.

THE FAMILY FRIEND.

THIRST.—Labouring people should be informed that they might preserve their health by abstaining from drink during the heat of the day; and if they drink copiously of water or whey in the evening, thirst will not assail them during their working hours.

How to COOK A POTATOE.—Wash it well, but let there be no scraping. At the thickest end cut off a piece the size of a sixpence. This is the safety valve through which the steam escapes, and all rents in the skin are thereby prevented. —just as the valve prevents a rupture in the steam boiler.

THE FARMERS' FRIEND.

ROUGH PAINT FOR FARMERS.—Take twelve ounces of rosin, and eight ounces of roll brimstone, each coarsely powdered, and three gallons of train oil. Heat them slowly, gradually adding four ounces of beeswax, cut in small bits. Frequently stir the liquor, which, as soon as the solid ingredients are dissolved, will be fit for use. What remains unused will become solid on cooling, but may be re-melted on subsequent occasions, if wanted.—When it is melted fit for use, add some Spanish brown, or yellow ochre, or any other colouring substance of the kind that you wish to have, first ground fine in some of the oil, then lay it on with a brush while it is hot, and thin as you can have it. Two coats should always be given. Some days after the first is dry, put on a second. The wood should be perfectly dry when the composition is applied. Common white paint may be used on the top of it, if required, for the sake of appearances. It said that it will preserve planks for ages; and keep the weather from driving through brick work.

 For High Water at Cape Sable add 50m. to time of High Water at Halifax. Tide serves same hour at Annapolis and St. John, N. B.

THE FAMILY FRIEND.

SIMPLE REMEDY TO PURIFY WATER. It is not so generally known as it ought to be, that pounded alum possesses the property of purifying water. A large table-spoonful of pulverized alum, sprinkled into a hogshhead of water (the water stirred round at the time), will, after the lapse of a few hours, by precipitating to the bottom the impure particles, so purify it that it will be found to possess nearly all the freshness and clearness of the finest spring-water. A pailful, containing four gallons, may be purified by a single tea-spoonful.

Cotton, wet with sweet oil and paragoric, relieves the ear-ache very soon.

THE FARMERS' FRIEND.

SCYTHES.—A complaint is often made by workmen of their scythes not acting well; of the edge not cutting uniformly, and the form being wrong, &c.; now the form suited to each mower may be tested by a very simple experiment. Let a man, with a piece of chalk in his hand, walk up to a high wall or barn door, and raising it as high as he can, strike a curve from right to left. The line so traced is the exact form that his scythe should be; and if he applies the edge of it, and finds it to correspond, it will cut uniformly from point to heel, and save himself much trouble and labor.

TO EXTRICATE HORSES FROM FIRE.—Throw the harness over a draught-horse, and place the saddle over a saddle-horse, and they may be led out of the stable as easy as on common occasions. If time allows, put the bridle on them rather than the halter, and the difficulty of saving them will be further lessened.

For High Water at Cape Sable, add 50m. to time of High Water at Halifax. Tide serves same hour at Annapolis and St. John, N. B.

THE FAMILY FRIEND.

ERUPTIONS ON THE FACE.—Dissolve an ounce of borax in a quart of water, and apply this with a fine sponge every evening before going to bed. This will smooth the skin when the eruptions do not proceed from an insect working under the cuticle. Many persons' faces are disfigured by red eruptions, caused by a small creature working under the skin. A very excellent remedy is to take the flour of sulphur and rub it on the face dry, after washing it, every morning. Rub it well with the fingers, and then wipe it off with a dry towel. There are many, who are not a little ashamed of their face, who can be completely cured if they follow these directions.

Turnips of small size have double the nutritious matter that large ones have.

THE FARMERS' FRIEND.

ON CURING CLOVER HAY.—Whether the grass be clover alone, or clover and timothy, it should be cut when from one-half to two-thirds of the clover blossoms have a brown appearance. Let it be cut only in good hay whether. From eleven to twelve o'clock spread all the hay which has been mowed since the previous noon over the ground. Between one and five o'clock rake it up and put it in cocks. It may now stand from two to five days, as may be most convenient, when, if the weather be favourable, it will be in good order to put in the barn or stack. Roll the cocks bottom side up, an hour or two before hauling, so that the dampness arising from the earth may dry off. Sprinkle over about four quarts of salt to the ton, whether it be put in the mow or stack.

When properly cured and stacked in this manner, cattle or horses will leave good grass pasture for this hay. It is better not to tramp it much in the mow, and it will come out in the winter as bright and sweet as when it was put in.

 For High Water at Cape Sable add 50m. to time of High Water at Halifax. Tide serves same hour at Annapolis, and St. John, N. B.

THE FAMILY FRIEND.

A HINT TO OYSTER EATERS.—When two many oysters have been incautiously eaten, and are felt lying cold and heavy on the stomach, we have an infallible remedy in hot milk, of which half a pint may be drank, and it will quickly dissolve the oysters into a bland, cream jelly.

TO CLEAN PAINT.—Smear a piece of flannel in common whiting, mixed to the consistency of paste in warm water. Rub the surface to be cleaned quite briskly, and wash off with pure cold water. Grease spots will, in this way, be almost instantly removed, as well as other filth; the paint will retain its brilliancy and beauty unimpaired.

THE FARMERS' FRIEND.

If the law holds good that "the like begets the like," the finest and first of every thing should be preserved for seed, and in case of unsuitable climate or soil, seed should annually be obtained from remote sections, naturally favourable for their greatest development.

A MODE OF PLANTING APPLE TREES.—A horticulturalist in Bohemia has a beautiful plantation of the best apple trees, which have neither sprung from seeds nor grafting. The plan is, to take shoots from the choicest sorts, insert them in a potatoe, and plunge both in the ground, having cut an inch or two of the shoot while it pushes out roots, and the shoot gradually springs up, and becomes a beautiful tree, bearing the best fruit, without requiring to be grafted.

Full compliments of tools, and implements of husbandry, are intimately connected with the success of the husbandman.

THE FAMILY FRIEND.

REMEDY FOR ASTHMA.—Procure common blotting-paper, and thoroughly saturate it in a solution of nitre, (saltpetre) and let it be carefully dried by the fire, or by exposure to the rays of the sun. On retiring at night, ignite it, and deposit it, burning, on a plate or square of sheet zinc or iron, in your bed-room.

A teaspoonful of horse radish, put into a pan of milk, will preserve the milk sweet for several days, either in the open air or in the cellar, while other milk will turn quite sour.

By placing a shade of light blue tissue-paper over the lamp, the light is ameliorated.

THE FARMERS' FRIEND.

Lands which have been long in culture, will be benefitted by applications of phosphate of lime, and it is unimportant whether the deficiency be supplied in the form of bone-dust, guano, native phosphate of lime, composts of fish, ashes, or in that of oyster-shell lime—or marl—if the land need liming, also.

Mix occasionally one part of salt with four parts of wood ashes, and give the mixture to different kind of stock, summer and winter. It promotes their appetites, and tends to keep them in a healthy condition. It is said to be good against botts in horses, murrain in cattle, and rot in sheep.

Draining of wet lands and marshes add to their value by making them produce more and better crops—by producing them earlier—and improving the health of neighbourhoods.

There is more nutriment in a quart of carrots than in a bushel of turnips.

THE FAMILY FRIEND.

CHRISTMAS PUDDING.—Cover the bottom of a baking dish with very thin slices of stale bread and butter, with the crust cut off; strew it over thickly with mince meat, then put on another layer of bread and butter, cover this again with meat, and so on till your dish is full; pour a good thick custard over all, and bake it for an hour or an hour and a half, according to the size of the pudding.

FOR PALPITATION OF THE HEART.—It is testified by one who has tested the remedy repeatedly, that a teaspoonful of table salt dissolved in a tumbler of water and drank at once checks the most violent attack of palpitation of the heart.

THE FARMERS' FRIEND.

By stabling and shedding stock through the winter, a saving of one-fourth of the food may be effected—that is, one-fourth less food will answer, than when such stock may be exposed to the inclemencies of the weather.

Time and labor devoted to the collection of materials to be converted into manure, are the most fruitful source of profit in the whole range of farm economy.

The chopping, or grinding of grain, to be fed to stock, operates as a saving of at least twenty-five per cent.

Rats and other vermin are kept away from grain by a sprinkling of garlic, when packing the sheaves.

If you want a horse who will never give out, never buy a large overgrown one. A black horse cannot stand heat, nor a white one cold.

 For High Water at Cape Sable add 50m. to time of High Water at Halifax. Tide serves same hour at Annapolis, and St. John, N. B.

SYSTEM.

1. Single Orders may be issued for any sum under and up to \$100 currency, but a single Order shall not exceed that amount.

2. The charges for Orders (to be paid in advance by the party applying) are as follow :

Under and up to \$10	5 cents com.
over 10 not exceeding \$20 ..	10 " "
" 20 " 30 ..	15 " "
" 30 " 40 ..	20 " "
" 40 " 50 ..	25 " "

3. The Money Orders shall be made out upon forms supplied by the Head Office, and no Order will be valid or payable unless given upon the regular printed form.

4. Persons applying for Money Orders will be required to state the particulars upon a Form of Application provided for that purpose.

5. When, for sufficient reason, the purchaser of a Money Order desires to change the place of payment named therein, the issuing Postmaster will take back first Order and issue another, charging commission as for an original Order.

6. If a wrong name has been inserted in an Order the remedy is similar to that in the foregoing case.

7. Parties procuring Money Orders will please to examine them carefully, to see that they are properly filled up and stamped. This caution will appear sufficiently important when it is understood that an Order defective in any important respect will throw difficulties in the way of its payment.

8. When a Money Order is presented for payment at the office on which it is drawn, the Postmaster, or Clerk employed, will use all proper means to assure himself that the applicant is the party named and intended in the advice, and upon the payment of the Order will be careful to obtain the signature of the payee to the receipt at foot.

9. When, through illness or other insuperable difficulty, the payee—that is, the person named in the advice—is prevented from presenting the Order in person, the Postmaster will be at liberty to accept a written

6. The parcel shall have the words "*By Parcel Post*," plainly written over the address. It should be well and strongly put up, and be legibly addressed to the Post Office address of the intended receiver, including the name of the County in which the Post Office is situated. A *white, flash light*, twenty seconds dark and forty seconds light, in each minute. Building painted in stripes, *vertical, black and white*. Between the northernmost and southernmost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them *almost* above water, and extend eastward from the Light House about four miles. From this range farther *southwardly*, about six miles from the Gannet Light, lies a dangerous breaker called the Bull—this may be avoided by keeping three remarkable headlands near the S.
