Following Laurier's Resignation Mr. Borden Accepts Task of Forming a Government and Asks for Customary Delay to Select Cabinet.

Special to The Standard.
Ottawa, Oct. 6.—The Laurier administration is no more, and Canada tonight is without a government. At three o'clock this afternoon Sir Wilfrid Laurier left his office in the east block, drove out to Government House and formally tendered his resignation. The next step was a message from His Excellency to Mr. Borden's secretary asking the leader of the Conservative party to come to see the Governor General. Mr. Borden drove out to Rideau Hall, and from six to seven o'clock was closeted with the representative of the Crown. He was asked to form a government and undertook the task. There was little of the dramatic about the final scenes. The members of the Liberal cabinet met at 10.30 this morning and remained in session until 1.30. It was the final meeting, and at its close Sir Wilfrid Laurier and his colleagues left the council chamber for the last time.

AN \$8,000 FIRE IN CHATHAM PULP MILL

Blaze Started High in Acid Tower and Could Not Be Reached with Streams from the Ground.

Special to The Standard.
Chatham, Oct. 6.—A spark from a saw mill refuse burner ignited the high acid tower of the Miramichi pulp mill at noon today. The blaze started near the top 125 feet from the ground and could not be reached by the hose. The sprinkler system flurried and died. The flames above and the burning embers were put out by streams in the hands of firemen. For a time the situation was very dangerous as a high wind was blowing and the embers were carried a long way. About 4 o'clock the fire was subdued. The damage will probably reach \$8,000.

TWO MISSING IN CONTEST

Kansas City, Mo., Oct. 6.—Rough weather today drove to earth seven of the nine racing balloons that left here yesterday in contests for the James Gordon Bennett trophy, the Lahm cup and the Altitude record. The other two bags that sailed have not been heard from. Each nation that had a starter in a balloon in the air. The missing bags are the Condor, of France, and the Berlin II, of Germany.

A WIRELESS MESSAGE FLASHED 6000 MILES

San Francisco, Cal., Oct. 6.—Wireless communication between this city and Japan, a distance of 6,000 miles, was established yesterday. This is the first time that a wireless message has been received across the Pacific ocean. When the operator at Hillcrest station caught the signals he made them out to be the call for the Chyo Maru, to be the call for the Chyo Maru. He answered the signal and learned that the call came from the Japanese wireless station on Hokushu Island, in the northern part of the Japanese Archipelago. The operators exchanged messages for some time.

PEOPLE AND SCENES IN TURCO-ITALIAN WAR

Turkish Gunboat Sunk by Italian Cruiser in the Red Sea—Yemen May Be Attacked.

Italian Sailors Buried Turkish Dead at Tripoli with Full Military Honors—British Steamer Seized.

Italians Buried Turkish Dead.
Rome, Oct. 6.—A wireless message from Tripoli says that the Italian sailors buried the Turkish dead, rendering military honors to those who chose death rather than to surrender. Twenty wounded Turks were placed in the hospital wards of the Italian warships. The wounds of those who were very serious. Others who were slightly wounded were carried away by their comrades. Those of the injured Turks who are able to talk, state that further resistance on their part was impossible, owing to the inferiority of their number and of their fighting equipment. The Italian warships visiting the other coast towns of Tripoli found

very few Turkish troops. There were a few hundred at Benghazi, but only 25 at Solim, 30 at Tobruk and 70 at Derna. At Cyrene they came upon 20 police officers. The Turkish civilian prisoners held by Italy will receive 40 cents a day from the Italian government during their detention. The prisoners of war proceeded aboard, only stopping for a few minutes to shake hands with the officers of the Italian. The party while passing along the stage to the railway, cordially greeted the as-

smaller war craft available, have been ordered to chase the few old gunboats that Turkey has in the Red Sea and to attack the ports of Yemen if necessary. Evaded Turkish Boats. Syracuse, Italy, Oct. 6.—The Italian battleship San Marco arrived here today from Tripoli. She steamed throughout the night without lights in order to avoid detection by Turkish torpedo boats, which are still cruising with surprising audacity about the Italian fleet. During the trip the San Marco stopped a steamer which proved

to be British owned. It was allowed to proceed. The officers of the battleship described the bombardment of Tripoli as having been arranged with great care in order to spare the enemy as much as possible. At the last moment Vice-Admiral Faravelli decided not to bombard even the palace and so the Governor was left undisturbed though batteries adjacent were silenced. Turks Showed Courage. The Turkish soldiers gave proof of extraordinary courage. Frequently

REPORT ON METHODIST MISSIONS

Last Year Methodist Church Had 2,528 Missionaries in the Foreign Field—Work Well Organized.

ECUMENICAL CONFERENCE.

Toronto, Oct. 6.—Statistics relative to "Resources in men and means in Methodist mission fields" as given today by Rev. James Lewis, of Cambridge, England, proved interesting to the delegates from seventeen countries who attended today's sessions of the Ecumenical Methodist conference in this city. From the detailed reports presented it appeared that during the last year there were 2,528 Methodist foreign missionaries. These included 918 ordained men and 120 physicians—53 of the doctors being women. Native workers numbered 29,847; missionary stations and sub-stations, 6,762, representing 708,105 baptized Christians, and 1,444,294 adherents, of whom 458,165 were Sunday school teachers and scholars. The ordained ministry of Ecumenical Methodism at the beginning of 1910 was 52,978, of whom but 2,322 or five per cent, counting foreign and native were in the mission fields. "Of our total number of ministers throughout the world," said Mr. Lewis "the average is one to every 174 Methodist church members." In these countries the ratio is one Methodist minister to every 302 members. Our means, as expressed by the income of the missionary societies in 1910, totalled about \$7,000,000, representing about eighty cents to each of the 8,715,434 Methodists. Practically every phase of foreign missionary work was discussed by delegates from various fields. An urgent plea was made by Rev. T. H. Lewis, of Westminster, Maryland, President of the General conference of the Methodist Protestant church, for a union of American Methodists into one body. Among other speakers were Rev. G. W. Clinton, of Charlotte, N. C., Bishop of the African Methodist Episcopal Zion Church, who spoke on "The Mission of Methodism to the Backward Races," Rev. A. B. Lerrard,

The Duke of Connaught On His Way to Canada

Liverpool, Oct. 6.—The Empress of Ireland, bearing the Duke of Connaught and his party, sailed from this port at 4.55 this afternoon, flying the Royal Standard by order of the King. The Royal special train arrived at Riverside station at 3.53 o'clock and the Duke of Connaught immediately proceeded aboard, only stopping for a few minutes to shake hands with the officers of the Ireland. The party while passing along the stage to the railway, cordially greeted the as-

sembled guests. The Duke and Duchess are apparently in excellent health. A Simple Farewell. London, Oct. 6.—Their Royal Highnesses the Duke and Duchess of Connaught bade farewell to London this morning in simple, homely fashion prior to their departure from Euston station by special train for Liverpool to embark on the steamship Empress of Ireland for Quebec. The Duke himself wore a plain morning coat with a sprig of white

heather and a maple leaf in his button hole. He had a kindly word and a smile for everyone, including a totter of His Royal Highness in the latter's Fenian raid days in Canada, and had come to wish him God-speed on his return to the Dominion as Governor General. The Duchess was attired in a simple black travelling costume and black hat. She wore a sprig of white heather. Continued on page 2.

10,000 KILLED DURING RIOTS NEAR CHENG TU

Terrible Result of Fighting Between Chinese Troops and Rebels Reported by Methodist Missionaries.

THOUSANDS HOMELESS.

Peking, Oct. 6.—Methodist missionaries at Cheng Tu, the recently besieged capital of Szech-Chuen province telegraphed today that they estimate that 10,000 persons were killed during the fighting between the insurgents and the government troops. Of the dead 2,000 were soldiers and the others rebels. Ten thousand rebels are in possession of several cities southwest of Cheng Tu. Soldiers are marching against them today. The Methodists state that as a result of the uprising thousands of natives are homeless; many becoming desperate committed suicide. The Methodist appeal for funds from Canada and the United States, to be distributed under their supervision in the work of relief.

MR. FIELDING WILL RUN IN YARMOUTH

B. B. Law Will Retire to Make Way for Former Finance Minister Whipped in Queens-Shelburne.

Halifax, Oct. 6.—The Chronicle (Liberal) announces that the seat for Yarmouth won by Mr. Law by 1200 majority, will be vacated to afford Mr. Fielding a chance to get back into Parliament. The Halifax Herald will tomorrow publish an article suggesting that the Conservatives of Yarmouth nominate C. H. Cahon, of Montreal, to oppose the ex-finance minister. Mr. Cahon is one of the ablest men in Canada, a speaker of the first order, and is a native of Yarmouth county, and is a Liberal asserts that he would be a much more formidable opponent to the Liberal leader than was Mr. McCurdy in Shelburne-Queens.

EASTPORT HAS A \$40,000 FIRE

Eastport, Me., Oct. 6.—Forty thousand loss resulted from a fire which destroyed the plant of the Eastport Garline Company tonight. The building and fixtures were valued at \$30,000 and there was \$10,000 worth of canned hardens ready for shipment stored in the building. Nearly a hundred hands are thrown out of employment by the burning of the factory.

DAM OWNER WOULD NOT TAKE STAND

Company Official Refused to Testify at Enquiry into the Awful Tragedy at Austin, Penn.

ENQUIRY ADJOURNED.

Austin, Pa., Oct. 6.—Frederick Hamlin, superintendent of the Bayless Pulp and Paper Co., owners of the dam which broke last Saturday at the expense of many lives and the practical destruction of Austin village, refused to testify upon the advice of counsel, at the coroner's inquest held this afternoon. Further inquiry, which will be held at Coudersport, was adjourned to an indefinite date. After the adjournment District Attorney H. W. Nelson said that the inquest would not be resumed for at least two weeks, because of the necessity of securing expert testimony and consulting points of law.

HEAVY STORM FORCED AVIATORS TO LAND.

Buffalo Centre, Iowa, Oct. 6.—The Pennsylvania pilot balloon in James Gordon Bennett cup race has landed near here. It encountered a storm. Neither occupant was injured.

LOSS BY FLOODS IN WEST

Buildings Wrecked By Bursting Dams

TWO PERSONS MISSING.

Repetition of Austin Disaster on Smaller Scale Reported in Wisconsin Towns—Buildings Wrecked and Railway Tracks Washed Away.

Lacrosse, Wis., Oct. 6.—From 25 to 30 business houses comprising all the stores on both sides of two streets, and as many residences, have been wrecked by the flood at Black River Falls, Wis., resulting from the bursting of the embankment around the Lacrosse Water Power Company's dam at Hatfield. Two persons are missing and thought to be drowned. Chippewa Falls, Wis., Oct. 6.—Two dams went out in this city today and one at Bloomer. The country is flooded. The Chippewa river has risen eight feet in the last ten hours and is overflowing its banks. Water is running in the streets as a result of an 18 hour downpour of rain. Two thousand feet of the main tracks of the Minneapolis, St. Paul and Sault Ste. Marie Railway, west of this city are washed out and there is also a bad washout near Colfax and land slides at Cuts.

SIR ROBERT PERKS VISITING OTTAWA

Says Georgian Bay Canal Scheme Will Be Laid Before Incoming Government as Soon as Possible.

Ottawa, Oct. 6.—Sir Robert Perks, British financier, and head of the Georgian Bay Canal Company, who is in the city today on a side trip from the Ecumenical conference at Toronto, to which he is a delegate, announced that at an early date the canal scheme would be laid before the incoming government, though it was not expected there would be any pronouncement from the cabinet for some time. While Sir Robert would not say that the passage of reciprocity would have obviated the necessity for the ship canal, as was alleged during the campaign, he stated that the result of the elections was a declaration for east and west trade, and the Georgian Bay Canal was the natural sequence.

HE HAS THEM SAFE IN JAIL

Mexico City, Oct. 6.—General Ambrosio Figueroa, in a bloodless battle at Chilpan in the State of Guerrero yesterday captured 200 Zapatistas and placed them in jail at Chilpancingo. He believes that he has thus effectively broken the strength of Zapata and Almaraz who have been terrorizing the states of Morelos, Puebla and Guerrero for months.

IS ACQUITTED BY THE JURY

Westchester, Pa., Oct. 6.—George Stroll, aged 16 years, the second of those charged with participating in the burning of Zack Walker, at Coatesville to be placed on trial, was acquitted by the jury here this afternoon. A murmur of applause greeted the announcement of the verdict which was made after the jury had been deliberating for an hour and four minutes.

NEW LIBERAL CABINET IS FORMED IN SWEDEN

Stockholm, Oct. 6.—K. Staaf, the Liberal leader today succeeded in forming a cabinet to succeed the one of Premier Lindaman, which resigned September 30th. In the new cabinet, Mr. Staaf will take the portfolio of Premier, and Count Albert Bronnar, Swedish Minister to the United States, that of foreign affairs. The Socialists declined to participate in the formation of the new ministry.

MONTREAL MECCA FOR BIRD MEN

High Flyers Opened Second Annual Crowd Bumping Meet Yesterday in Canadian City—Few Ready to Fly.

AEROPLANE WRECKED.

Montreal, Oct. 6.—The opening day of Montreal's second aviation meet was nearly marred by a fatal accident when Charlie King, in his Farman biplane, crashed to earth a few inches from a deep quarry pit. This afternoon few of the competitors were ready to fly and after a six minute flight Romain Gressier King, late in the afternoon, attempted a flight to satisfy the impatience of the crowd. He rose with some difficulty and just cleared the boundary piling. His machine climbed 30 feet into the air and then headed for the Morrison rock crushing machinery building. The aviator managed to pass this with a few feet to spare, but then his aeroplane began to descend just as he was passing over a rough piece of ground, spudded with deep, jagged-sloped quarry pits. King elevated his planes but the machine would not rise, and crashed to the earth on a rugged pile of earth and stones, a few inches from the edge of one of the quarries. The aviator escaped with a severe shaking up, but the bed rail, outrigger, propeller, steering gear, and part of the planes were smashed to uselessness. King explained that a secondary wire on the spark plug jumped out of place, leaving him minus three cylinders out of six. It is his first accident. No other fliers participated but several flights are promised for tomorrow.

FOUR HUNDRED MEN WALK OUT IN MEMPHIS.

Memphis, Tenn., Oct. 6.—Disatisfied with conditions about the Memphis shops, Illinois Central strike breakers struck late today and tonight railroad officials assert one hundred were sent to Chicago. At strike headquarters it is declared that four hundred men walked out, practically the entire force. The walkout was without disorder.

ELECTORS JEERED FOR SMITH

The Peanut Colonel Practically Driven From Gagetown Court House by Sunbury-Queens Electors -- A Fuller Report of Thursday's Proceedings -- Mr. Smith's Fine Speech.

Gagetown, Oct. 6.—So great is the feeling which has been worked up in Queens and Sunbury over the exposure of the nefarious and corrupt methods practiced by Colonel McLean's organized gang of bribers in the recent election that, although the Colonel was declared elected here yesterday by Returning Officer Dykeman at the close of the much adumored declaration of the proceedings, the member elect for the constituency could not obtain a hearing from the electors who were in derision as he stood at the court house endeavoring to make a speech.

When Mr. Dykeman, the returning officer, opened the proceedings, several witnesses were called to explain the mistakes in connection with the marking up of the returns from a number of the polls. Among the witnesses examined were Robert Mott, poll clerk at Cambridge; James Power, deputy returning officer at Northfield, and Col. Alexander, deputy returning officer at Gladstone.

ST. STEPHEN'S CADETS IN ANNUAL DINNER

Pleasant Gathering in St. Stephen's School Room, Last Evening -- Sword Presented to Lieut. Arbo

ST. JOHN, N. B., SATURDAY, OCTOBER 7, 1911.

THE PASSING OF LAURIER.

Yesterday afternoon Sir Wilfrid Laurier who was called to the Premiership of Canada on July 11th, 1896, tendered the resignations of himself and Cabinet to the Governor-General and Mr. Borden was immediately sent for and invited by Earl Grey to undertake the formation of a new government. The general elections of 1896 were held on June 23 of that year. Sir Charles Tupper resigned the premiership on July 11. The interval between the defeat of the Government and the resignation of Sir Charles was 19 days. Sir Wilfrid occupied his Government days in winding up the unfinished business of his Government, so that no complaint of unnecessary delay can be laid at his door. Two days after being called to the Premiership, Sir Wilfrid Laurier announced the names of his Cabinet, but Messrs. Fielding and Blair were not appointed until July 20th. The situation in 1896 was very similar to that of 1911, inasmuch as the estimates of the year had not all been passed. Parliament was, therefore, summoned for August 10th and continued in session until October 5. The natural assumption is, that the first session of the new Parliament will assemble early next month to complete the business when dissolution took place.

When Sir Wilfrid Laurier was called to the Premiership of Canada the country was just beginning to enter upon an era of prosperity. The mildly protective tariff which was adopted as a part of the National Policy advocated by the Conservative party had brought about the establishment of a great variety of new industries and promoted the development of many concerns in existence prior to 1878. The Canadian Pacific Railway, which owes its existence to the Conservative party, had been completed from St. John to Vancouver seven years prior to the advent of Sir Wilfrid as Premier. His construction had opened up for settlement a vast area of the most fertile lands on the North American continent. Immigrants from all parts of the world were pouring into this new country and breaking up the virgin soil. Already Canada had become a wheat exporting country and the popular delusion that the great Northwest was fit only for the home of fur bearing animals and the man who made a living in gathering their skins had been removed.

The National Policy had given the farmers a home market for their produce and had also aided the industrial growth of the country to a marked degree. Canada was prosperous when Sir Wilfrid Laurier became its chief ruler and its prosperity increased because he did not disturb the leading features of the wise policy inaugurated by his great predecessor, Sir John A. Macdonald. By the Ottawa platform the Liberal party was committed to a free trade policy, but better counsels prevailed, and although the tariff was readjusted, the readjustments were such as not to materially interfere with trade.

It was not until the present year that Sir Wilfrid Laurier undertook to change the old order of things and the answer he received from the people of Canada was so pronounced in its character that it is unlikely he will attempt to follow in the footsteps of the Premier who released his hold upon the reins of power yesterday.

Fifteen years is a very considerable period for a Government to hold office, but looking back, Sir Wilfrid has not scored many great triumphs. He gave us the British Preferential tariff and a second Transcontinental railway, not yet completed. More than one member of his Government was compelled to resign office because of the scandals which developed regarding departmental administration. The naval policy which he adopted was not pleasing to the country as a whole any more than his lukewarm, if not sometimes anti-imperialistic utterances at Imperial Conferences he attended. Just where Sir Wilfrid stood on Imperialistic matters has always been in doubt, but there is a general opinion throughout the country that he was more in favor of independence than of closer Imperial ties.

For fifteen years Sir Wilfrid has been an important figure in Canadian affairs, but his achievements in that period have not been great and his attempt to foist on the country a trade agreement with the United States, which practically amounted to a trade surrender to that country, without first consulting the people, will not increase the respect in which he is held by either the classes or the masses. It was a mistaken idea of the power of the Government and does not reflect credit on his astuteness as a statesman. His passing from power as a result of his blunder will not be regretted by those who believe in a strict adherence to the precepts and practices of constitutional government.

SUNBURY-QUEENS.

After several adjournments and a good deal of bitterness and recriminating talk, Col. H. H. McLean has been declared elected to represent the Sunbury-Queens constituency by a majority of ten. The evidence of the methods of the Liberal party in conducting the election in this constituency shows that the law was openly violated at many of the election booths throughout the two counties and by the returning officer himself. To say that Mr. Dykeman's methods were loose is putting it altogether too mildly. They were the methods of a partisan who apparently had but one object in view, the securing of the election of the man who gave him his appointment. From start to finish there is scarcely an act of the returning officer that is not censurable.

The actions of the agents of Col. McLean at the polls, their open violations of the Election Law, and their indifference as to results, warrant not only a close scrutiny but in some instances criminal prosecution as well. At Lincoln, for instance, it is well known that a brother of Col. McLean was busy on election day handing out certain cryptic marks which afterwards appeared on the ballots. Other discreditable practices were common.

It is time that such high handed methods as those pursued by the representatives of Col. McLean should be put an end to in this Province once and for all. That the people of Sunbury-Queens were disgusted with the whole foul business was clearly shown by the energetic manner in which they hysed both Col. McLean and his henchman, the returning officer, during the declaration proceedings at Gagetown. There was a marked contrast between the enthusiastic hearing accorded Mr. Smith, and the hisses and jeers with which Col. McLean was received in his own constituency.

The Telegraph tries to make it appear that there was an organized effort to prevent Col. McLean being heard. There is no foundation for such a statement. Decent people do not require to organize in dealing with such sordid methods as are charged against Col. McLean's friends and supporters. Hisses, not cheers, are what

would naturally be looked for under the circumstances, and these seem to have been handed out to Col. McLean rather freely to his extreme discomfiture.

HEROINES OF THE SWITCHBOARD.

Rarely is there a catastrophe which shocks and startles the world with its horrors, but there stands out some deed of heroism, some instance of a man or may be a woman, ready at a moment's notice to risk even life itself in an effort to save others from destruction. The bursting of the Bayless dam in Pennsylvania was no exception. In this case the honor fell to two telephone operators, Miss Kathleen Lyons and Miss Lena Binkley, both very young women, who by remaining at their posts saved hundreds of lives when the dam gave way.

Miss Lyons, sixteen years of age, on hearing the fire whistle, which was situated about four miles from the exchange, realized that the dam had broken and remaining at her switchboard gave the alarm to nearly everyone in Austin who had a connection, in time for an escape to the hills. She also sent urgent warning messages to Costello, a little town two miles below Austin, which also saved many in that community from destruction. Miss Binkley in the same exchange warned all persons she could reach. While the crest of the flood was swirling towards the telephone building the two girls sent the first news of the disaster to the outside world, holding their posts until they had barely time to save themselves from being swept away in the rushing torrent.

One of the most successful of recent plays, "The Woman," treats of the zeal, courage and quick wit of a telephone operator, but the dramatist has imagined nothing more striking than the fidelity and heroism shown by these young women in the day's work. It is inevitable that the telephone girl should generally be regarded humorously, and presumably her experience leads her to regard the rest of the world in the same way, when she possesses sufficient self-control and philosophy to overlook the needless annoyances to which she is subjected. But the girl at the switchboard may be called upon, in the performance of her seemingly humble duty, to display high qualities, and the two operators who figured so conspicuously in the Austin disaster were not found wanting when their opportunity came. The decision of the local telephone company to permanently give the youthful heroines double pay is a well merited reward.

STEP BREATHING.

While most persons are aware of the importance of deep breathing, few practice it habitually. They have heard or read that singers, who are obliged to breathe deeply, escape lung troubles, and that the germs of consumption thrive in persons who live in rooms the air in which is so tainted or close as to discourage such breathing. It has been ascertained that the number of our breaths is doubled by driving, trodding by ordinary walking, and quadrupled by rapid walking or fast horseback riding; and to this acceleration is due part of the value of such exercises. But in them many lack the time or opportunity to indulge as often as is desirable, while others are prevented from doing so by indolence or lack of will power.

A Dresden professor named Walthor now comes forward with a plan which enables every one to enjoy the hygienic advantages of deep breathing without special effort or loss of time. His method, which he calls "Schrittathmung" (step breathing), consists in breathing consciously and regularly, taking, say, four steps during an inhalation, and the same number during an exhalation. After a short time this rhythmic breathing becomes a habit, and is practiced to the great advantage of one's health. Dr. Walthor suggests that this simple and effective method should be introduced in schools, in the army, and in sanatoriums.

The Canadian banking system is as good as any yet devised. It could be greatly abused because there is nothing in it to cause the contraction of credits in times of great prosperity. In that respect we are dependent wholly upon the moderation and judgment of our bankers. These have not failed us so far. But in times of depression which keeps the wheels of commerce moving freely until the storm is over. The consequence is that we are not, and cannot be, hit like the United States by these thunderbolts known as financial panics. The reason is, not because the storm is not here, but because we have a thoroughly serviceable raincoat and umbrella.

(Ottawa Journal.)

Hiram C. Gill was elected mayor of Seattle, served a few months, didn't suit, and was recalled. George W. Dilling took his place last February. After six months of Mayor Dilling the recall machinery was again put in motion and signatures were easily obtained, though the objections to Dilling are vague. But the business men of the city have protested with a formal and unanimous howl. Business can't be done, they say, and the city won't grow if there is to be this constant agitation in politics. So probably Mayor Dilling will stick.

(Winnipeg Telegram.)

Victor Geoffroy, late member for Chambly, will be among the missing in the new Parliament. Geoffroy was chairman of most of the alleged "investigating" committees appointed under pressure by the Laurier Government. His astonishing rulings in the public accounts inquiry will be remembered by newspaper readers. Mr. Geoffroy was largely responsible for the miscarriage of justice which marked the proceedings of his inquisitorial committees.

(Hartford Courant.)

The pardon by Governor Dix of Captain Haines, the murderer, is another invitation to aggrieved citizens to take the law into their own hands and kill when they get mad. This man deliberately planned to shoot an acquaintance and did shoot him. The first question and anxiety was whether the jury would hang him. That over, it has been how soon would he get his pardon. He's got it. Better not get him mad again.

(Toronto Star, Lib.)

Little heed need be paid to reports that the Hon. George E. Foster will be excluded from Mr. Borden's Cabinet. He is entitled to a place on the score of both services and ability. He is moreover, the ablest debater on the Government side, and his party will hesitate before consigning him to the Senate.

(Lethbridge News.)

Pugsley has during his regime as Minister of Public Works, gathered about him at St. John a horde of camp followers and dredging contractors, who have been fattening at the public crib, and they excited a powerful influence in the recent contest.

(Ottawa Free Press.)

The retirement of James Connors from the House of Commons will remove a very unique figure in Parliament, but it will bring in the first Quaker ever elected to the House in Canada.

A forecast of Canada's population gives it as slightly under 8,000,000. But how like blazes they do vote up there!

A NOVEL CATARRH REMEDY CURES WITHOUT DRUGS

THE HEALING VAPOR OF CATARRHOZONE LOOSENS THE COUGH, STOPS ALL DISCHARGES, PREVENTS SNEEZING.

The real danger of Catarrh lies in putting off treatment. You may have Catarrh yourself, but you may not know it. Before the disease spreads from your nose to the stomach, lungs, or bronchial tubes, root it out—cure it with "Catarrhozone." Look over the following symptoms—then examine yourself:

- Bad Breath
- Stuffy Nostrils
- Frequent Sneezing
- Ears Buzzing
- Watery Eyes
- Hacking Cough
- Bad Taste
- Drooping
- Raising Phlegm
- Difficult Breathing

Don't continue to burden your system for another day when the germ of Catarrh is in your system. Get Catarrhozone today—inhale its soothing vapor, fill your breathing organs with its balsamic Catarrh. Get Catarrhozone today—inhale its soothing vapor, fill your breathing organs with its balsamic Catarrh. Get Catarrhozone today—inhale its soothing vapor, fill your breathing organs with its balsamic Catarrh.

Once you try Catarrhozone you'll realize how indispensable it is—the large dollar size contains an indelible hard rubber inhaler and sufficient medication to last two months. Beware of the substitute, an imitator of Catarrhozone—use the genuine and you'll get cured. By mail from the Catarrhozone Company, Buffalo, N. Y., and Kingston, Ont.

"CONDOR CHARLIE" FEELS THE FOMENT OF MOHAMMEDANS

On 13th on the Mediterranean Looks Very Ominous to Baresford—Religious War will Touch Britain.

(Vancouver World.) "Deplorable! Deplorable!" broke out Lord Charles Baresford this morning, when a newspaperman showed him a cable from Rome containing the terse and ominous message: "Italy has declared war on Turkey." Lord Charles, who won his sobriquet, "Condor Charles," for his bravery in taking the Condor under the guns at Alexandria, reflected for a moment.

Then he said: "This may end in a religious struggle throughout the world—the 'cradle of nations' from the standpoint of a fighting man who knows the situation among the nations in Southern Europe and the people along the northern coast of Africa. He saw in it the stirring up of the Mohammedans. What the significance of the trouble between Italy and Turkey is to Great Britain was explained by him when he said: "It is bad for England because England exercises a suzerainty over the biggest Mohammedan area in the world—Italy. You would not venture that this thing will develop into a world war, Lord Charles?"

Hostilities are breaking out in a portion of the earth that has been in political ferment for 6,000 years. The ancient city of Carthage stood within the confines of the present Tripoli. The boundaries of that state have been changing constantly. Tripoli furnished a battle ground for the ancient nations—for the Romans, Egyptians and Greeks. Discussing the fitness of the Italians and Turks respectively to go to battle, Lord Charles declared that the Turks had the best army in the world. The Italians on the other hand, possessed a splendid navy and just recently launched a great Dreadnought.

Why Italy should wish to take over Tripoli, Lord Charles would not venture an opinion. It is possible, however, that the Italians desire the state as a colonial possession. Lord Charles answered that he did not believe that the Triple Alliance now existing between France, Austria and England would be the means of drawing other European nations into conflict. In England those who know the situation, believe that in a war, Italy would look to Germany for backing. In that case, Italy could look to England for assistance. This, with the bringing into the question of the millions of Mohammedans in Africa and Asia gives the whole situation a dangerous color.

It was the trouble stirred up in the eighties by Mohammedan agitator Abdulla Arabi, and while people looked "Condor Charlie's" appearance before Alexandria. Result of that trouble was the passing of Egypt under a British protectorate. Lord Baresford's words on the present trouble are the words of a man who understands the real possibilities of another Mohammedan foment.

Britain has been betrayed. When the war dogs of Europe are turned loose, Great Britain's supremacy of the seven seas may be jeopardized. While the children throughout the nations that go to make up the British Empire sing the glories of the British fleet, and while poets write their songs and orators talk of the greatness of King George's sea power, Great Britain's politicians are allowing their cruisers to go to the scrap heap, are failing to advance educational schemes, shipbuilding and are failing to keep up the numerical standard of the navy.

Lord Charles Baresford realizes this. These foregoing paragraphs are not quotations from his lips, but in an interview last night, the British admiral deplored the fact that Britain at this moment is not organized for war, is without a naval policy, and is generally in a dangerous position as the supreme power among the nations. "How would we find ourselves, sir, in the event of the outbreak of a European war?" the former admiral of the British fleet was asked as he reclined in his armchair in his apartments at the Hotel Vancouver. "We would find ourselves hopelessly without organization as far as the navy is concerned," declared Lord Charles. "We would find ourselves," continued the sea lord, "without a naval policy. I exposed the whole state of affairs," he continued, "after my withdrawal from the Channel fleet in a speech at the London chamber of commerce, June, 1909. I drew out at that time a statement of naval policy, pointing out the weak spot in our naval organization. "But my words of warning were received with derision by the Admiralty—derision, I say. "Since that date certain of your policies have been followed out—policy ideas you outlined in the chamber of commerce address?" Lord Charles was asked. "In the past two years" was the reply, "38,000,000 pounds sterling has been devoted to the items I called attention to in my speech," said Lord Charles, with some enthusiasm, "and I want to tell you that I have always won my case these five and twenty years."

FRANK R. FAIRWEATHER, Agent, St. John, N. B.

he returns to Britain. He promises to go into a thorough discussion of them. Of these six sub-heads, the one under which will be "Stultification of Admiralty statements." To stultify, according to the dictionary, means to make foolish; to regard as a fool; to stultify one's self by silly reasoning or conduct; to regard as a fool or as foolish. "Therefore," Lord Charles charged last night in his interview with the Vancouver newspaperman that the experts employed by the British Admiralty, in their reports, since 1902, had regarded the members of the Admiralty as foolish and silly and had made their reports along the same lines.

"The statement that I make," said Baresford, "is that the government has been misled by its naval experts." "No, I shall change that," he hastened to correct. "The experts either gave willful misinformation, or the experts gave correct information which the government would pay no attention to." As the interview proceeded, Lord Charles gave it to be understood that unless the British Admiralty brought about a renaissance in naval program, the outlook would be dark for the empire in the event of war breaking out with Germany—England's covetous rival. Germany, said Lord Charles, has had a naval programme since 1901. He averred that Great Britain could thank herself if the other great nations gave her a second place on the seas. He pointed out how England had started the Dreadnought craze. Having started it, she didn't continue to keep up her end. A word for the Canadian navy. Lord Baresford inferred in his statement on that topic a thorough vindication of the naval policy of Sir Wilfrid Laurier. Canadian politics, he said, were not for him to discuss. Nor was it his place to tell Canada what she should do. "Owing to senseless swagger and arrogance," said the British admiral, "regarding Dreadnoughts, all the nations are building up fleets at the same moment." Lord Charles said that each unit of the British Empire should have a navy

FINANCIAL WORK

MARKET MOVED BY A TAFT SPEECH

New York, N. Y., Oct. 6.—The reactionary tendency which has appeared in the stock market this week received an added impetus today from President Taft's utterances in the administration concerning the policy of the chief executive's declaration that prosecution of unwholesome combinations would not seek to avoid the responsibility which the law clearly imposed upon it, while in its essence a reiteration of his well known views, was followed by a vigorous assault on the market. The president's remarks demonstrated conclusively that corporate interests and asserting his intention to stand by the railroads so long as they obeyed the laws and kept long of politics went unheeded. It was contended that the speech would create a feeling of uneasiness and that it denoted a change in the administration was to be expected. The market sold off and was quite heavy throughout the remainder of the day.

FRANK CHANCE TO WIN. Chicago, Oct. 6.—In the opinion of Frank Chance, manager of the Chicago White Sox, the chances of the Giants of the Philadelphia Athletics world series will depend entirely on the condition of Rube Marquard. If the big left hander gets a sharp he thinks the Giants will win. "If Marquard will get the best of his pitching strength, I believe that Mathewson and the Athletics will win the series," said Chance. "If Marquard will get the best of his pitching strength, I believe that Mathewson and the Athletics will win the series."

THE STANFORD SPACE OF SPORTS

Pitchers Will Have Lot to Do With Result of World's Series

Bender, Coombs and Plank Against Mathewson, Marquard and Ames—Comparison of Two Teams Continued.

Predicting a winner in the coming world's series is a hazardous guess. One may make a selection and hit it right, but predictions in a series of seven games between clubs which size up to the merits of the Athletics and New York Giants may go wrong, because a break of what is commonly called "baseball luck" may favor one of the clubs in the game which decides the championship. Just how far one may go wrong in trying to pick a winner in the world's series was evidenced in 1910, when Chicago, ruling as favorite, failed to make a good showing against the Athletics.

If the Giants were to move as easily for the Mackmen as the Cubs, the result would be even more of a surprise than the Athletics' one-sided victory in 1910. For this reason, it is believed that this year, while it must be admitted by all fair-minded critics that the team which met the American league champions last year was not in the class of the one which twice overwhelmingly defeated the Detroit Tigers.

Last year the Athletics and Chicago Cubs won their pennant races by easy margins and entered the race for the world's championship for the second year, as it was possible to have the teams at that time. This year the Athletics and Cubs are almost a duplicate of what occurred in 1910, except that New York is being forced to fight for the pennant right up to the finish of the season, while the Athletics have their race won, and can take things easy, keeping in condition for the big series without taking any chances of becoming fatigued by the pitching staffs. With all six men at their best, the series ought to result in the great battle of pitchers that has ever been decided a world's series, for, as best, each of the six is a star and can be counted on to give any hitting combination a battle for victory.

The batting averages. The batting should play a big part in deciding the coming series, and here is where the Athletics have the edge. They lined up today the Athletics are the best batting combination that has ever been put together in the American league, five of their regular players raising the average to .300 class, with Jack Coombs and his battery mate, Catcher Lapp, also members of the .300 class. No other team in either league can boast of such a record. There is not a weak hitter in the team that will face the Giants, un-

less Morgan is chosen as one of the pitchers. The Athletics are not only hard and steady hitters, but have perfected the hit-and-run style of play to perfection and almost every man is counted on for laying down a bunt for a sacrifice when it is needed.

JOHN J. McGRATH, MANAGER NEW YORK GIANTS.

FRANK CHANCE PICKS GIANTS TO WIN THE WORLD'S SERIES

Chicago, Oct. 6.—In the opinion of Frank Chance, manager of the Cubs, the chances of the Giants defeating the Philadelphia Athletics in the world's series will depend entirely upon the condition of Rube Marquard. If the big left hander gets back in shape he thinks the Giants will win.

"Hasing my statement on the general belief that Mathewson and Marquard are New York's two strongest pitchers," said Chance, "the condition of Marquard will tell the story. Nobody need to worry about Mathewson. He will surely beat the Athletics and if he has a strong twirler to help him out the Giants ought to win. The series will depend entirely upon the pitching.

"If the Giants and Athletics had to play a whole season against each other the Giants would beat them out with ease, but in series of seven games it is such a short sprint that the bulk of the pitching strength will have to be brought into service at once. The Athletics have two great pitchers in Coombs and Bender. Of these Bender is the better. While Coombs beat us three games last fall, he should not have won any one of them. In one game he allowed us 11 bases on balls, but the luck broke so that we could not take advantage of it. No pitcher in the world can give the Giants 11 bases on balls and beat them.

"The speed of New York base runners is a big factor in the world's series, but you must remember that the Athletics have some great men on the paths. I figure that the base running will about break even, and it will come back to a question of pitching.

"I can see that McGraw is promoting Mathewson so as to have him just right for the big series, and he is acting with great wisdom. All other things break even, Matty will surely pitch the Giants to victory. He is the best pitcher in the world today and against the Athletics as he was against the Highlanders at New York in the series last fall.

"Marquard will give the Philadelphia club a lot of trouble if he is just right, but he is not right now. When he pitched against us on Wednesday he was not like the same man that faced us in New York a few weeks ago. Marquard is not a strong left hander like Mathewson. He is over six feet tall, but he is built differently from Matty. Marquard has a thin chest and his legs are not sturdy like those of many of the big fellows in the league. He has done a lot of pitching of late and this has temporarily weakened him. McGraw

would do well to give him a good rest and let him pick up more vitality.

"While the Giants apparently have the pennant clinched now, they will be in bad shape unless they get the race settled at an early date. They should have at least a week of rest before going into the big series. Connie Mack is now on easy street with his team, and you will notice that he is giving his veterans a rest so as to let them recuperate and get strong and fresh before tackling the Giants. Right now the New York club is a little off its stride, which is due to the strain under which the players have been laboring.

"The Athletics are no better hitters than the Giants. The difference is that they have also been batting the lively cork-centered ball. In my opinion this is going to be the hardest fought series yet played between two championship teams. It is going to be so close that a tossup would almost decide it. As a betting proposition neither team should be made a favorite. If anyone would lay odds in my opinion it would be a good bet to take the short end of it either way.

"Personally I want to see the Giants win, and believe they can do it if Marquard can be put in shape to pitch the kind of ball that he did two months ago. Matty ought to win three of the games with ease."

Has No Connection With E. D. C. Benjamin Shepard, 88 City Road, wishes to correct the statement which appeared in The Standard to the effect that he had been elected an officer of the Every Day Club, at a meeting of that body on Thursday. Mr. Shepard states that he has not been connected with the E. D. C. for several months.

ferred defeat several times lately and was hard hit in the games he won. If the Giants win the pennant, soon enough to give Marquard a week's rest and he gets back to form he can be counted upon as the running mate to Mathewson, and good judges declare that he is practically unbeatable when right. Ames has been worked easily lately, and Manager McGraw is no doubt grooming his speedy twirler, with Wiltee and Cranford to count upon in case his pair of stars weaken.

Pitted against the New York twirlers will very likely be Bender, Coombs and Plank, possibly Morgan and Krause. With this quietest the Athletics are strongly fortified in the pitchers' box. Coombs, Bender and Morgan pitched wonderful ball for the Athletics in 1910, and the same trio has been a big factor in landing the championship this year. Last year Coombs and Bender pitched all five games of the world's series, but Eddie Plank will, no doubt, get a chance at the Athletics' pitching staff.

This will give each team two right-handers and a left-hander for the series and each team has a right-hander and a left-hander in reserve. It is either to attempt to give preference to becoming the pitcher in the pitching staffs. With all six men at their best, the series ought to result in the great battle of pitchers that has ever been decided a world's series, for, as best, each of the six is a star and can be counted on to give any hitting combination a battle for victory.

The batting averages. The batting should play a big part in deciding the coming series, and here is where the Athletics have the edge. They lined up today the Athletics are the best batting combination that has ever been put together in the American league, five of their regular players raising the average to .300 class, with Jack Coombs and his battery mate, Catcher Lapp, also members of the .300 class. No other team in either league can boast of such a record. There is not a weak hitter in the team that will face the Giants, un-

less Morgan is chosen as one of the pitchers. The Athletics are not only hard and steady hitters, but have perfected the hit-and-run style of play to perfection and almost every man is counted on for laying down a bunt for a sacrifice when it is needed.

In the Giants' lineup only two of the regular players have averages of .300 or over. Chief Myers, leader of the national league with an average of .355, which is only four points below the average of Eddie Collins, who leads the Giants in hitting. Doyle, the Giants' second 300 hitter, has an average of .307 for 131 games. Fletcher, shortstop, is hitting close to the mark with .298, but has taken part in only 87 games. The lowest man among the Athletics' 300 hitters is Lord, with an average of .269, while Oldring is within three points of being within the select circle. These averages do not include the pitchers. Coombs has an average of .324 for 13 games, while Bender and Plank rank below the .200 mark. Crandall is the best hitting pitcher in the New York team, but he is hitting only .112 for 52 games. Mathewson is ranked as a good hitting pitcher, a little better than either Bender or Plank, but not in the class with Coombs, who averages below the .200 mark. Crandall is the best hitting pitcher in the New York team, but he is hitting only .112 for 52 games. Mathewson is ranked as a good hitting pitcher, a little better than either Bender or Plank, but not in the class with Coombs, who averages below the .200 mark.

CONNIE MACK, MANAGER PHILADELPHIA ATHLETICS.

PROSPECT FOR LOCAL FOOTBALL

Though the first week of October has gone by local followers of the game have not seen much football. The announcement that negotiations were going on for a game today between the N. B. and the Harriers aroused considerable interest, and to doubt a good sized crowd would have turned out to see the game. However, the plans did not materialize so that the football fans will have to wait further developments.

The management of the St. John team, however, have set out to boom the game, and to give St. John some of the real kind of Rugby before the season closes, and are negotiating with some of the fast teams of the province for games here and in other places.

This afternoon the whole squad is called to turn out for practice on the Marathon grounds, and as the team will have the field to themselves they expect to get in some good work. The past week has seen great improvement in the work of the players, and when they line up in the first game they will be an aggressive lot to reckon with, and will keep their opponents on the move.

When Giants and Athletics last met World's Series 1905. Following are the scores by innings of the New York-Philadelphia games in 1905 for the World's championship. First game in Philadelphia, Oct. 9.

Giants 00002001—3 10 9
Athletics 00000000—0 4 0
Batteries—Mathewson and Bresnahan; Plank and Schreck. Attendance, 17,555.

Second game in New York, Oct. 10. R. H. E.
Athletics 00100002—3 6 2
Giants 00000000—0 4 2
Batteries—Mathewson and Bresnahan; Plank and Powers. Attendance, 24,992.

Third game in Philadelphia, Oct. 12. R. H. E.
Giants 20050000—9 9 1
Athletics 00000000—0 4 2
Batteries—Mathewson and Bresnahan; Plank and Powers. Attendance, 16,941.

Fourth game in New York, Oct. 13. R. H. E.
Giants 00010000—1 1 1
Athletics 00000000—0 5 2
Batteries—Mathewson and Bresnahan; Bender and Powers. Attendance, 13,588.

Fifth game in New York, Oct. 14. R. H. E.
Giants 00001001—2 5 1
Athletics 00000000—0 6 0
Batteries—Mathewson and Bresnahan; Bender and Powers. Attendance, 24,187.

and persistently quarrelsome that there is nothing to be done but to put an end to their existence. An animal who is always quarrelsome is not merely a nuisance, he is a positive danger in a menagerie; he breeds a spirit of revolt among his companions, makes them extremely difficult to manage and he is at all times a danger to those who have charge of him. We had an immense powerful tiger, a true bred man-eater some years ago, who was one of the most disturbing and dangerous influences we ever had in our show. In the course of two years he had killed three companion tigers, and had on several occasions attacked his keeper. Yet I was loath to kill him for he was a splendid brute and curiously enough, a good performer. Indeed, on the stage he was always most tractable and obedient. One night, however, after one performance, without the slightest warning, he made a spring at a young jaguar who was on the way to his cage, and killed her almost instantly, and then made a furious assault on the three keepers, who rushed to secure him, one of whom he badly injured. Fortunately for my purse I have not often had occasion to act in such a manner, for the putting down of such a fine specimen of the tiger tribe meant a loss to me of at least \$5,000.

How Lions Fight

It is by no means an easy task to make "mixed" grouping between these animals so difficult and dangerous a task. I have known cases where it has taken years of most patient and arduous training before it was possible to show a lion and tiger to perform together in public and no matter how friendly these animals may become the natural antagonism between them is so great that they can rarely be left together long without danger of their fighting and are always separated directly after performing.

Some years ago we had a lion named Rover, and a tiger named Monty, who became apparently so devoted to each other that they were almost impossible to separate. They might safely leave them in the same cage. Indeed, Rover always set up the most plaintive howls when his companion was taken away from him at the end of their performance.

Well, at last we let them occupy the same cage and for three months they lived in peace and harmony with each other, and then one night the inevitable battle between the two came. The day was just breaking on a lovely morning, and as the lion and tiger component was disturbed by the most terrific roars that proceeded from the lion's cage.

With a couple of keepers I hastened to the scene of the disturbance, but when we arrived the combat between the tiger and lion was in progress. The tiger lay on his side uttering the most triumphant roars as if to announce his victory. How the fight arose I cannot say. Probably the lion started by a fight of some kind among human beings in play and ended in a mortal duel.

In a wild and dangerous state was the lion that it was impossible to remove the body of the tiger for a day. Lions rarely or never fight with one another when they are under the personal supervision of their keepers. I have had sometimes to keep a man patrolling up and down outside a cage of lions or tigers for several days and nights to preserve peace among them. I remember once sitting myself throughout the night between a leopard and jaguar, whom we were training to perform in a mixed group of animals. But before we could start training them we had to get them on terms of friendship, temporary though it might be, with each other. And finally half a dozen keepers stepped forward.

Every now and then the leopard would turn and snarl at the jaguar, who would snarl back viciously. Had the two been left alone for an instant the pair would have engaged in a mortal combat, and even when we had trained them to perform together, it was impossible for us to allow them to occupy the same cage. There is no doubt that the only enemy really feared by large wild beasts should fear him as they don't understand him and are unable to fathom him. He is a mystery to them and they fear him accordingly, just as we would fear some supernatural being of unknown power if such a one were to come among us who could apparently deprive us of our liberty and happiness.

Some animals are so desperately

DO YOU WANT TO MAKE MONEY? If So, Buy Lots in WATROUS

One of the Best Investments Being Offered in Western Canada Today

Are you sharing in the handsome profits that are being made daily by careful investment in real estate? Many are doing so; why not you?
You cannot hope to ever become independent by putting away in a savings bank a portion of your wages each month. You must look further ahead. It is only by the careful investment of your savings that you will ever become wealthy. Nine out of every ten of the hundreds of wealthy men of Western Canada today made their money by carefully investing in well selected real estate in such places as Winnipeg, Regina, Calgary, Edmonton, Saskatoon and many other cities when those places were in the making. Perhaps you missed them. **YET HERE IS ANOTHER CHANCE.**
In MANITOU PARK, Watrous, Sask., we have a proposition for investment that must commend itself to you. We are placing this property on the market at prices that you will do well to investigate. The future of Watrous is as sure as the rising or going down of the sun. It is one of the principal Divisional Points on the great Transcontinental Line of the Grand Trunk Pacific. It is in a direct line between Regina and Prince Albert, and is bound to become an important distributing centre. It is the centre of one of the finest farming districts of Western Canada. It is barely three years old and already has a population of about 1,600, with schools, churches, stores,

Read What the Winnipeg Telegram of May 5th Says About Watrous

Watrous, May 4.—One of the most ideal townsites along the line of the Grand Trunk Pacific Railway is the Town of Watrous, in Eastern Saskatchewan. This thriving town is but a little over three years old, having been founded when the line of railway was constructed. Watrous has grown from a thought in one's imagination to a beautiful and prosperous town of 1,600 population in a little more than three years.
Watrous is known all over Canada, and town lots in this progressive town are selling rapidly. Located as it is in one of the richest agricultural districts of Saskatchewan, it is little wonder that its well-known natural resources are its best recommendation, and the interest displayed by investors in its development is the best evidence of its merits. If sales of land continue as in the last few months Watrous will within two years be one of the foremost cities in Saskatchewan. Land values have increased beyond the wildest imagination, and within a few months values have risen many times their original cost.

Vote for Electric Light and Car Line

(Winnipeg Telegram, May 6.)
Watrous, Sask., May 6.—The by-law calling for the establishment of an electric light and car line was voted upon today. The result was 46 for, 19 against.

wholesale houses, lumber yards, grain elevators, roundhouses, machine shops, etc., that recognize in Watrous a coming commercial centre.

Equalled by few towns in Western Canada and surpassed by none in the usual elements and advantages that render certain a great future, Watrous in one particular has the majority of young cities handicapped.

About three miles distant lies the already famous body of water **LITTLE LAKE MANITOU**. Already the marvellous curative powers of its waters have been winged abroad, and tourists gather on its shores seeking the priceless boon of health from its magic waters.

Manitou Park must commend itself to thinking men as a judicious investment. Manitou Park is inside the Town of Watrous. It is right between the station and the lake, right in the pathway of development, right on Watrous Avenue, which is the main graded thoroughfare from the station to the lake.

All regular lots are 30x120 to 20 ft. lane, and are guaranteed exceptionally high, dry and level. The prices range from

\$40, \$50, \$60, \$75 and \$100 each, with \$25 extra for corners

(except when purchaser takes four lots, when no extra charge is made for corner). The terms are **ONE-FIFTH CASH**, balance in 20 monthly instalments, with interest at 6 per cent., or we will allow 10 per cent. discount for all cash. **NO TAXES TILL 1912**

HEARTWISTYEWK, CALLED GRAND FOR SHORT

The Newest Game of Cards a Combination of Hearts, Euchre and Whist.

The latest thing in card games is a mixture that they call grand for short, as olla podrida is too long and the title which best described it and it was the first to be suggested, heartwistyewk, sounded too much like artichokes for a game of cards.

Grand is a combination of three games, with the addition of a variation hitherto unknown in one. The three games are hearts, euchre and whist, and the variation is whist without a trump, which is called grand. As no modern game of cards could hope for recognition if it did not contain the bidding element, the game which shall be played in each deal is decided by allowing each player one say as to what he would like to play that hand, and the player offering the game that counts most gets it.

The full pack of fifty-two cards is used, and is divided into four persons, playing two against two as partners. The choice of seats, cards and the first deal are decided by a throw of the dice, the lowest card having the choice, and ace being low. If two cards of equal denomination are dealt, the higher denomination, diamonds and clubs are better than spades. Otherwise the rules of the individual games that are selected for each deal apply to that hand.

After the pack has been properly shuffled and cut the cards are dealt one at a time until each player has thirteen, but no trump is turned. All the irregularities of cutting, shuffling and dealing the fifty-two card pack are governed by the laws of whist or bridge or auction.
The object of the game is to get 100 points or to be nearer that number than the adversary when the time comes to quit. These points are made by scoring so much apiece for tricks over the book at whist and grand, for the odd, and 3 times 10 for hearts, and for no hearts taken in at hearts. Points are lost again for not fulfilling the contract at whist, grand or euchre, and for hearts taken in when hearts is the game played.

As it is not uncommon for the game to be unexpectedly prolonged, especially when the bidders are repeatedly set back, it is always better to agree upon a time to stop, and to meet at a certain hour by that time the partners that are the further from it own the other side the number of points that they are shy of, together with the points for each time they have been set back.

These setbacks are marked on the scores card, so that they may be readily counted up at the end of the game. Suppose the game is for penny points and at quitting time A has 10 points and B has 11 set-backs, while Y and Z had 70 points and 8 setbacks. As A and B are the further from the goal, they are to lose 45, and 3 times 10 for setbacks, as they had 3 more setbacks than Y and Z.

The eldest hand, sitting on the dealer's left, always has the first bid, and he can either call a certain number of points or pass, but he is not to mention the number of the game he purposes playing, nor of the suit that he will trump, if it is to be whist or euchre. Each player in turn, starting with the highest bidder names the game. If all pass, the dealer must make a bid of 5 and play something, so as to prevent the deal from being wasted. In straight whist each trick over the book is worth 5 points, so that the most possible in that game is 7 by the bidder. The bidder names the trump suit before he leads, and the highest bidder is always the leader for the first trick, no matter who dealt the cards or what the game may be. For this reason it is usual to have two packs in order to mark the position of the next deal, as at auction.
In euchre the odd trick, commonly called the point is worth 6; four tricks are worth 10 and a march 20. If the bidder is willing to play alone the game is worth 25, and he must ask for his partner's best, the adversary having the same privilege, so that if one of them has a king or queen he may get as many guards to it as he can, the bidder invariably holding both bows and the ace.
When the game is euchre each player discards down to five cards, and nothing lower than the seven may be kept in the trump suit. Any player with a lower trump or with more than five cards in euchre must discard a foul hand. The discarding is done to make the game end at five tricks and the restriction of the trumps is to enable the bidder to calculate the chances of being stopped in a march by the king or queen.
Hearts is a sort of safety valve and is played chiefly to keep the high score side from going out on a single hand. If the dealer's side is 70 or better on the score the eldest hand may make it hearts without any bidding at all. He simply leads a card and says: "This will be hearts."
It is only the eldest hand that has this privilege, and only when the dealer is 70 or more. If neither the eldest hand nor his partner takes in a heart they score 50 and the other players go back 13, one each for the thirteen hearts they took.
If the eldest hand and his partner take in any hearts, they lose a point for each heart they take in, so that both sides would go back a bit. If the dealer's side took no hearts, they would not get 50, but they would set the other side back 12.
If the dealer is not 70 and the eldest hand passes without making a bid, it is usually a sign that he is willing to play hearts but does not want to bid for it, as he does not know how it would suit his partner. When he does not want to play hearts it is conventional for him to make a bid of some kind, if only five points, instead of passing.
The highest bidder can always make the game hearts, and if neither he nor his partner takes in a heart they will score 50. But if either of them takes in a single heart they will set back the amount of their bid and one for each heart besides, the adversary also losing a point for each heart they take in, so that both sides will go back.
Suppose the bid is 30 and the bidder says hearts. If his partner gets trick with a heart, the adversary getting loaded with the remaining

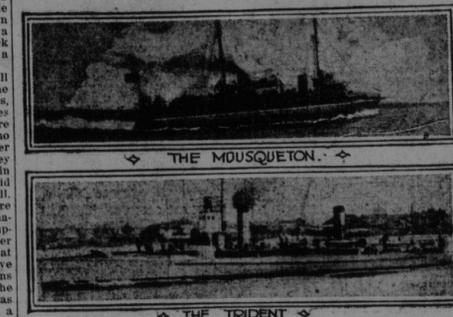

BISHOP FIRST PERSON TO GET SPECIAL DELIVERY LETTER BY AEROPLANE ROUTE

BISHOP FREDERICK BURGESS

Frederick Burgess, Bishop of Long Island, is the first person in the world's history to receive a special delivery letter by the air route. The Bishop protested against the opening of the gates of the aerodrome at Nassau Boulevard on Sunday, and the management of the meet sent its reply by aeroplane, special delivery, Thomas Sopwith acting as postman. He landed in the Bishop's back yard, delivered the letter and proceeded on his route.

FRENCH DESTROYERS THAT CRASHED NEAR SCENE OF WRECK OF LIBERTE

In a collision between the French torpedo boat destroyers Trident and the Mousqueton, close by the wreck of the Liberte, which exploded, killing two hundred, the Mousqueton was badly stove in.

MINING CONGR...

President Taft will speak at Chicago from October 24 to 25. It will be the object of the Congress to elect a Secretary of the Interior. Walter L. Fisher, Secretary of the Interior, is expected to be elected. E. A. Montgomery, vice president.

HOW AUT...

Methods by Which Some Work --- Newspaper Writers for Magazines Made.

(New York Sun.)
How do authors get their plots? Some writers find it easy. They see a news item telling of some striking situation that appeals to them as fitted for the story they wish to tell, or more often the news item itself suggests the story from the beginning and they clip it out and use it, or paste it in a book for future use.
Sometimes the situation is used just as recorded. Again it is developed or stretched. Often it is modified more or less. One writer finds that several news items are necessary to the making of one good plot. He wants intricate interplay of events in his novels, and so finds it helpful to select from the papers several situations, which he blends together in plot and subplot.
Plots are frequently bought. Writers who furnish a great many short stories and serials to magazines find this a convenient way of satisfying the editor's demand for strong situations and action. People right here in New York like a business of selling plots.
One man who finds that his talent runs to the structural side of authorship sells plots on the side. He always has on hand more plots than he knows what to do with. He began by selling them for \$5 apiece. Now he gets \$50 for a carefully worked out story scheme.
Another writer who has the same facility and who has made an exhaustive study of the plot and subplots of obtaining it, sells a plot for \$100.
"And why not pick up your plots wherever you can without expensiveness of time and energy?" asks a writer, who finds all the plots he needs for his work by adapting and modifying to the purpose of fiction his various experiences in travel and journalism.
"The plot is the most artificial part of a story or novel. That is to say, it is the least creative. There must be plot. But granted that, the most important thing about a story is its underlying idea and the way in which it is told."
"Give the same plot to three or four equally well-known writers of fiction and you'll see what I mean. You'll have three or four totally different stories, though you'll have the same framework. The difference will lie in the treatment each writer gives to the plot."
"Well, that's the difference between all stories, isn't it? How many different kinds of plots are there? Some men have said half a dozen. That's rather conservative. But there are many more."
"A few superficially new ones appear now and again in the wake of a new invention. We have auto plots and aeroplane plots. New social conditions create new plots. We have what we might call the suffragette plot now. But, after all, if analyzed, are they really new? Essentially they may be only one of the original six in a new dress."
"Herbert T. Urrer, author of 'The Confession of a Neglected Wife,' finds that plots come to her from a scene or a word spoken in

MINING CONGRESS TO WORK TO PRESERVE COUNTRY'S MINERAL RESOURCES.

WALTER L. FISHER, SECRETARY OF THE INTERIOR. D. P. BUSH, PRESIDENT, MISSOURI PACIFIC RAILROAD. JOHN DEHN OF SALT LAKE, PRESIDENT OF AMERICAN MINING CONGRESS. E. A. MONTGOMERY OF LOS ANGELES, VICE PRESIDENT OF CONGRESS. JAMES P. CALLBRETH, JR., SECRETARY OF CONGRESS.

President Taft will speak at the annual convention of the American Mining Congress, of which John Dehn, of Salt Lake, is president, to be held in Chicago from October 24 to 28.

It will be the object of the convention to work with the law makers at Washington to prevent waste of the country's mineral resources.

Walter L. Fisher, Secretary of the Interior, who has just returned from Alaska, will have something to say on the development of that territory.

E. A. Montgomery, vice president of the Congress, was a poor prospector before he sold a "strike" claim in Nevada to Charles M. Schwab.

HOW AUTHORS GET PLOTS FOR STORIES

Methods by Which Some of Them Lay Out Their Work --- Newspaper Clippings --- Some Busy Writers for Magazines Buy Their Plots Ready-Made.

(New York Sun.) How do authors get their plots? Some writers find it easy. They see a news item telling of some striking situation that appeals to them as fitted for the story they wish to tell, or more often the news item itself suggests the story from the beginning and they clip it out and use it, or paste it in a book for future use.

Sometimes the situation is used just as recorded. Again it is developed or retouched. Often it is modified more or less. One writer finds that several news items are necessary to the making of one good plot. He wants intricate interplay of events in his novels, and so finds it helpful to select from the events of real life as reported in the papers several situations, which he blends together in plot and subplot.

Plots are frequently bought. Writers who furnish a great many short stories and serials to magazines find this a convenient way of satisfying the editor's demand for strong situations and action. People right here in New York make a business of selling plots.

One man who finds that his talents lie to the structural side of authorship sells plots on the side. He always has on hand more plots than he knows what to do with. He began by selling them for \$5 a piece. Now he gets \$50 for a carefully worked out story scheme.

Another writer who has the same faculty and who has made an exhaustive study of the plot and ways of obtaining it, sells a plot for \$100.

"And why not pick up your plots wherever you can without expense and time and energy," asks a writer, who finds all the plots he needs for his work by adapting and modifying to the purposes of fiction his various experiences in travel and journalism.

"The plot is the most artificial part of a story or novel. That is to say, it is the least creative. There must be plot. But granted that, the most important thing about a story is its underlying idea and the way in which it is told.

"Give the same plot to three or four equally well-known writers of fiction and you'll see what I mean. You'll have three or four totally different stories, though you'll have the same framework. The difference will lie in the treatment each writer gives to the theme and how it accepts it.

"Well, that's the difference between histories, isn't it? How many different kinds of plots are there? Some one has said half a dozen. That's rather conservative. But there are many more secret perhaps.

"A few superficially new ones appear now and again in the wake of a new invention. We have auto plots and aeroplane plots. New social conditions create new plots. We have what we might call the suffragette plot now. But, after all, if analyzed, are they really new? Essentially they may be only one of the original plots in a new dress.

Mabel Herbert Urrer, author of "The Confession of a Neglected Wife," finds that plots come to her from a scene or a word spoken in

PREPARE FOR LUMBAGO!

If You Have "Nerviline" Handy One Rubbing Will Cure the Pain.

Thousands Use "Nerviline" The "strike" of lumbago is like a bolt of lightning—you never know when it is coming or where it is going to strike. Probably the one certain thing about lumbago is the fact that it can be cured by Nerviline—the only liniment that penetrates deeply enough to reach the congested chords and muscles.

"Years ago I strained my back and suffered considerably with weakness over the spine," writes Darin P. Millan, a well-known farmer, residing near Kingsville. "The lumbago attacked the weak spot, and for days at a time I would have to lie up in bed, unable to move or turn. Liniments, poultices and hot applications failed to bring the desired relief, and I was in despair of ever getting really well again. I at last decided to test 'Nerviline.' I got five bottles from the drug store and had it rubbed on three times a day. The stiffness and pain went away quickly, and by continuing Nerviline I was completely cured of lumbago."

This is similar testimony to that of nearly five thousand Canadians who have written unstinted words of praise to the manufacturers of Nerviline. For the cure of lumbago, sciatica, neuralgia and rheumatism there is no liniment with one-fifth the pain-relieving power of Nerviline.

Refuse any substitute. Large size bottle, 50c, or sample size, 25c, at all dealers, or The Catarhoxone Co., Kingston, Ont.

LETTER NO. 4875

Under the title "Distempers" he has placed the subtitled "Eccentricity, Fantasy, Insanity, Poetic, Heredity, Insomnia, Aphasia, Unrest, Ambition, Old Age, Hatred, Decadence, Crime, Death, Religion, Psychic, Nature, Problems."

Under the general title "Children" and the subtitle "Baby," he has a newspaper clipping to the effect that his baby entraps a kidnapper. The man came out of hiding to see his newborn child and was captured by the police.

All the possessor of such a scrapbook has to do when he wants to write a story is to turn to his index, pick out a subject, "Aphasia," for instance, refer to his clipping and the one he likes best and begin his story.

Suppose the newspaper item tells of a man who had been missing for three months, after which time he returned home, unable to remember what occurred to him in the interval. It is easy to imagine all sorts of embarrassments and complications.

Is this a short cut to successful short story writing? The owner of this particular scrapbook, into which he has pasted a thousand newspaper plots, has written thirty-two short stories in three years, half of which he has sold. Besides this he has carried on editorial work and other lines of business. He is inclined to put emphasis on the method.

Hugh Tait, The body of Hugh Tait, the veteran I. C. R. locomotive driver, who died in Providence, R. I., arrived in St. John on the Boston train yesterday morning and was forwarded by the Halifax express to Moncton for interment there on Saturday. His body, Hugh Tait, accompanied the

Boston Girl's Letter

Boston, Sept. 29.—Maine has nothing especially interesting this year, for the first time it has been made a live issue in the campaigns. One candidate for the legislature who has been for years the leader of his ward, holding everything with a sure rein, won his nomination at the recent primaries by a bare 100 votes over a third candidate, the result being largely due to his persistent scuttling away from the suffrage issue and refusing to commit himself either one way or the other. Many previous bearers of his standard who were as keenly opposed to suffrage as he was, became disgusted with his avoidance and evasion of the suffragists who asked him a fair and square question and of the vilifying slurs which he cast on them personally and generally, and refused to vote in his favor. Womanward the course of empire takes its way.

ETHEL ANGLIER.

Stephen H. Forsyth.

The funeral of Stephen H. Forsyth, who died at Barre, Vt., on the 2nd inst., took place yesterday afternoon at 2.30 from the residence of Charles A. Gurney, 8 Orange street. The service was conducted by Rev. C. R. Flinders, D. D., and interment was made in Ferhill.

AFTER 7 YEARS SUFFERING

I Was Cured by Lydia E. Pinkham's Vegetable Compound

Waukena, Okla.—"I had female troubles for seven years, was all run down, and so nervous I could not do anything. The doctors treated me for different things but did me no good. I got so bad that I could not sleep day or night. While in this condition I read of Lydia E. Pinkham's Vegetable Compound, and began its use and wrote to Mrs. Pinkham for advice. In a short time I had gained my average weight and am now strong and well."—Mrs. SALLIE STRAVENS, R. F. D. No. 3, Box 21, Waukena, Okla.

Another Grateful Woman

London, Ont.—"I feel as if I could not tell others enough about the good Lydia E. Pinkham's Vegetable Compound has done for me. I was so weak and tired that I could not rest nights. A friend recommended your Compound and I soon gained health and strength and could not wish to sleep better. I know other women who have taken it for the same purpose and they join me in praising it.—Mrs. Wm. A. EBYR, 905 Dame St., London, Ont.

Lydia E. Pinkham's Vegetable Compound has surely cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pain, backache, that bearing-down feeling, and nervous prostration.

CEETEE UNDERWEAR

THE ONE BEST UNDERCLOTHING

It's true "CEETEE" is more expensive to buy—but then look at the solid comfort and better wearing qualities it brings you—which make it cheaper in the end. That's why the best people are buying it—they know.

Every garment of "CEETEE" underclothing is fashioned, in the actual process of knitting, to fit the form. It is all made with selvedge edges—the edges are all knitted (not sewn) together. Only the very finest of Australian Merino Wool is used in the making. It is so soft and clean that a baby could wear it without injury to its tender skin.

Made in all sizes and weights for Ladies, Gentlemen and Children. We guarantee every "CEETEE" garment to be absolutely unshrinkable.

Always ask for "CEETEE" Manufactured by The C. Turnbull Co. of Galt, Ltd. GALT, ONTARIO

BREAK IN BAYLESS DAM, THROUGH WHICH RUSHED WATER THAT KILLED HUNDREDS.

S. S. LESSON.

S. S. Lesson by Evangelinist.
October 8th, Ezekiel 47:1-12.

The lesson in a nutshell is as follows:
The prophet Ezekiel had a great vision of the temple, its courts, and its worship, as it will be in the New Jerusalem and his angelic guide brings him to the door of the temple where he beholds a miracle. From underneath the threshold waters issue; they flow from the Holy of Holies past the south of the great altar of sacrifice out through the east gate. He enters the river with his guide who measures with a line the distance they travel. A quarter of a mile away the water is up to their ankles; a half mile is measured and the water reaches their knees; three-fourths of a mile further on, it is up to their waists; a mile and the ever deepening river has become too deep to walk in—deep enough to swim in.
"Hast thou seen this marvel, O son of man?" asks the guide, who then brings him to the river's brink, where he finds trees growing on both sides, furnishing food and healing, which are renewed every month by the life giving waters from the sanctuary.
"The river shall flow down the wilderness of Judah even to the Dead Sea," says the guide. Wherever the river would come everything would live; it would purify even the Dead Sea which would swarm with fish, though the marshes surrounding the sea would remain as they were.
"The vision has undoubtedly a literal as well as spiritual interpretation," says Dr. Torrey. "Taken in connection with Zech. 14:8, and Joel 3:18, the first meaning of the vision is the literal restoration of Israel to Jerusalem, a literal stream gaining in volume and power as it descends thirty-nine hundred feet in a distance of twenty miles until it becomes a raging torrent and plunges into the Dead Sea."
But the literal meaning does not preclude a figurative application; the most popular of which is as follows:
The stream prefigures church influence ever growing stronger and deeper until the whole world will come under its power, when all shall know God from the least even to the greatest, culminating in a millennium without Christ to be followed by His second coming.
The characteristics of the age as well as the predictions of our Lord in the parables, which present a mixed condition of things in the church—good fish and bad, wheat and tares, wise and foolish virgins; as well as the teaching of the apostles as to the condition of the world, "evil will wax worse and worse" (2 Tim. 3:13) "in the last days perilous times shall come" (2 Tim. 3:1) would preclude this idea.
The stream would be no other than life everlasting flowing down through the great atoning sacrifice to individuals. Wherever "the river of the water of life" would be allowed free course (for it is evident from verse eleven that there would be places where its healing power would not be felt), it would grow deeper and deeper and more irresistible until the believer could rejoice with the apostle "in the fulness of the blessing of the Gospel of Christ."
"Under the life-giving power of the Gospel the most hopeless classes are raised up into new life and the blasted regions of wickedness blossom as the rose."
Darwin Was Amazed. -
When he saw what Christianity was doing for the Patagonian savages, he said, "The lesson of missionaries is the enchanter's wand, the march of improvement consequent on the introduction of Christianity in the South Seas probably stands by itself in history."
It does not stand by itself. The same testimony comes from every land where evangelization has made it possible for the life-giving stream to flow.
Harold Hodge in his new book, "Twice Born Men," describes nine cases taken from the lowest of the low, the most deplorable, degraded, savage criminals who by the power of God, and in answer to prayer, mainly through the Salvation Army, were drawn into the swim of new life, in Christ, were instantly transformed, completely revolutionized, and who for the rest of their lives remained

DEVASTATION IN WAKE OF MAD RUSH OF WATER FROM BAYLESS DAM.

THIS PHOTOGRAPH SHOWS SENATOR BALDWIN'S HOUSE TURNED OVER BY THE FORCE OF THE WATER.

hardworking virtuous citizens laboring for the salvation of others, the change being absolute, entire and instantaneous.
Nothing that we have ever read, except perhaps the chapter on "Transformed Communities," in Pierson's New Acts of the Apostles, gives so striking an impression as does this work of the quickening effects of the entrance of the gospel into the Dead Sea of the lost world, whose waters in the grand millennial age, when Christ comes, will be sweetened and made productive.
What impressed the prophet, in his vision of the future, was not the glory of modern civilization, not the progress of science, of education, of legislation, sanitation, but the magnificent provision for the deliverance of humanity from its wretchedness, sorrow, pain, misery, poverty, disease and vice.
What influence could lay hold of these Babylonian exiles—who were radically bad, a burden to the State, a scandal to civilization, a disgrace to mankind—a fair specimen of humanity at large, and make them radically good?
Salvation from sin, the God life appropriated, would be the only hope of the individual, the only hope of the nation—the only hope of the world, sunk in corruption, misery, stagnation and selfishness.
Where do you stand in relation to these things? Ankle deep? Knee deep? Waist deep? Or fairly swimming in the fulness of blessings, in the enjoyment of life more abundant? Are you feeling upon the fruit to be found between the leaves of the Word of God, or are you starving and shivering on the brink of the Dead Sea experience?

TO WED IN DECEMBER.

It is announced at Newport that the marriage of Miss Mildred Sherman and Lord Camoys will take place at the residence of the young woman's parents in New York city on December 5. Lord Camoys' mother will attend the wedding, bringing with her from England some handsome gifts for the bride.

TRYING TO SAVE OLD TREASURES

London, Oct. 5.—There is alarm among Lincolnshire archaeologists, and not only are the archaeologists up in arms against an unknown millionaire, but also all patriotic Lincolnshires. For there is danger that one of the greatest treasures not only of the country, but of England will go across the Atlantic unless decisive action is taken.
Some four or five years ago the late Lord Fortescue sold his estate in Lincolnshire, including Tattershall Castle. It was bought by a syndicate whose object in making the investment was no doubt the perfectly legitimate one of doing the best they could with the property.
When this transfer took place no anxiety was felt by those who regard Tattershall Castle as a precious national possession. Unless it were razed to the ground, a danger so remote as not to be worth contemplating, nothing, it was thought, could happen to it. A castle, unlike a picture or a gem or a piece of tapestry, cannot be exported, and so Tattershall castle seemed secure for all time or at any rate until such time as bricks and mortar put an end to their partnership.
The castle and church Tattershall were built by Lord Cromwell, lord treasurer of England, who died in 1455. The manor, having reverted to the crown, was granted by Edward VI. in 1551 to the Earl of Lincoln, and towards the end of the seventeenth century passed as a dowry into the Fortescue family.
The most valuable and interesting relics of the castle are its magnificent fireplaces which tell its history in heraldry and of which there are no less than 48. It is just these fireplaces which appealed to the taste of some American millionaire. I cannot ascertain his name, and he has made a very tempting offer to the syndicate that owns the castle.
"If you remove these fireplaces," said W. Craig, the well-known archaeologist to me yesterday, "you destroy the history of the castle. A report has come to us within the last few days that these beautiful and historical fireplaces have been sold and are going abroad. They are, I am told, already surrounded by scaffolding and will, unless something can be done, to prevent it, be taken down to remain, I suppose in Chicago or New York."
Fireplaces Old.
The fireplaces in the hall of state or audience chamber on the second floor, has a row of heraldic shields and badges in circles. First the treasurer's purse, then St. George and the Dragon, Cromwell and Tattershall impaling Deincourt. In what was probably the state bedroom the fireplace is an exceedingly delicate architectural composition, the spandrels being carved with foliage. Alternating with the treasurer's purse are the shields of Bernak Deincourt, Driby, Cromwell and Tattershall. The fourth floor has a fireplace of somewhat similar character, the shields of Deincourt, Driby, Cromwell and Bernak being separated by small treasurer's purses.
"If these fireplaces are removed and sold to the highest bidder, there is no reason why the whole castle should not be gutted of its ornaments. In the thickness of the eastern wall on the second floor, for instance, is a beautiful vaulted gallery, 38 feet in length, vaulted in five compartments and having diagonal ribs of brickwork. That, I suppose, would fetch a big price if it were offered for sale."
The Lincolnshire archaeological society has sent a strongly worded protest to the commission which has care of national monuments and has also appealed to the prime minister to stop the sale until a fund has been collected to outbid the American millionaire.

PANDORA RANGE
Only One Range Has An Enamelled Steel Reservoir
and that range is the Pandora. Reservoir is in one piece, oval in shape, with no corners, seams, etc., to catch the dirt. Its heavy, triple enamel coating is as smooth as glass, easy to clean, and will withstand any degree of heat without chipping or burning out.
Such a cleanly reservoir that fruit can be cooked in it without fear of taint. You cannot do that with tin, copper or galvanized iron reservoirs.
If your local dealer does not sell the Pandora, write direct for **free booklet**.

Montreal.

The front.

DON'T know which to emphasize today in my little story—the beauty of the bowknit in its graceful curves or the quickness of the French knots to be used in working the blossoms. At any rate the two in a delightful combination are here for a blouse design. I am certain that you will like the result.
Choose a fine batiste, lawn or sheer fabric and complete the blouse with cotton of your favorite make. The cotton you will need for the padding of solid work.
Transfer this design to your material by one of the methods suggested elsewhere. Be sure to have the center of the blouse to match the center of the bodice. Allow for seam allowances beyond the shoulder line.
When designing the back, place the pattern next to the shoulder seam and make a line of four scallops down and then use a straight line of scallops across. The yoke will measure at the base of the scallops.
If I were you, I would make a yoke of lace, either allover or inserted, whipped together by hand. Fasten the right side of the material and work right over it when making the scallops and the bowknits. Whichever scallops you can trim the edge when you have finished.
Another way is to complete the pattern and add the yoke afterwards, cutting away the fabric in the edge when you have finished.
Work the centers of the flower and add the French knots. Use outfit stitches for the stems, whipped.

THE FA

WHAT woman is there whose hands does not long for one of those so fashionable for evening gown? In passing through a shop she will find draped over satin or mounted on a stunning-looking figure.
She will admire it from all angles. She could possess that robe or one like it. But, alas! the price is far beyond the limit of her purse; it would take years to save enough of her limited purse to purchase one. So she sighs and turns away to purchase, perhaps, a cheap material, which she makes up best she can in a simple little evening frock.
If she but knew it, those beautiful expensive beaded robes or elaborate tunics that will appear on many of the imported gowns this season can be made at home if one has a modicum of patience and likes to sew. Purchase enough silk net, if you wish, a very handsome one, to make a close fitting tunic or, if you wish, a robe that reaches the floor.
Cut it over a good pattern, having few seams as possible; baste the neck and fit it to your figure. Now draw the beading threads and cut an accurate pattern of the gown out of large sheet or very thin linen paper, or paper known as "tonkin skin." If you

Finished
LACE MAKING

DON'T know which to emphasize today in my little story—the beauty of the bowknot in its graceful curves or the quickness of the French knots to be used in working the blossoms. At any rate, the two in a delightful combination are here for a blouse design. I am certain that you will like the result.

Choose a fine batiste, lawn or sheer linen for this design. Soft mercerized cotton of your favorite make will do very well, while white darning cotton you will need for the padding of solid work.

Transfer this design to your material by one of the methods suggested elsewhere. Be sure to have the center of the blouse to match the center fold of your goods. Allow for seams beyond the shoulder line.

When designing the back, place the pattern next to the shoulder seam and make a line of four scallops down and then use a straight line of scallops across. The yoke will be square at the back.

If I were you, I would make a yoke of lace, either allover or insertion, whipped together by hand. Baste the yoke on the right side of the material and work right over it when making the scallops and the bowknots. With sharp scissors you can trim the edges when you have finished.

Another way is to complete the pattern and add the yoke afterward, cutting away the lining and finishing by turning in and hemming on the wrong side.

Work the centers of the flowers solid and complete the blossoms with French knots. Use outline stitches for the stems, whipping

them into a firm cord by a second application. Pad the slender leaves and work solid, as the French work in their design.

There are two ways of treating the bowknots. The first method is the solid stitch, which I prefer on the design. It gives a relief, and the rest of the pattern requires so little time that you can devote much to the two bows. Pad with darning cotton the length of the ribbon. Work in solid stitches across the front. Use outline stitches for the lines used to indicate the twist.

Another way is the heavy outlining of the ribbon and the filling in with seed stitches, which are tiny back stitches.

Eyelet work will finish the dots and make you or a fortunate recipient happy that there is such a thing as an embroidery page.

Make a collar of lace, or, if you prefer, you can work a straight strip of lines on which you can mark a spray or two.

With lace yoke and collar I would use lace cuffs, or a lace edge for three-quarter-length sleeves.

It really isn't too soon to make gifts, you know.

THE FASHIONABLE BEADED ROBE

WHAT woman is there whose heart does not long for one of the handsome beaded robes that are now so fashionable for evening gowns?

In passing through a shop she will see one draped over satin or mounted on a stunning-looking figure.

She will admire it from all angles, lift up the edge and feel the soft, shiny beads caught by invisible threads to the clinging net; will study the pattern of the design, and wish and wish that she could possess that robe or one like it. But, alas! the price is far beyond the limit of her purse; it would take years to save enough of her limited income to purchase one. So she sighs and turns away to purchase, perhaps, some cheap material, which she makes up as best she can in a simple little evening frock.

If she but knew it, those beautiful and expensive beaded robes or elaborate tunics that will appear on many of the imported gowns this season can be made at home if one has a fair amount of patience and likes to sew.

Purchase enough silk net, if you want a very handsome one, to make a closely fitting tunic or, if you wish, a robe that reaches the floor.

Cut it over a good pattern, having as few seams as possible; baste the seams and fit it to your figure. Now draw out the beading threads and cut all accurate pattern of the gown out of large sheets of very thin linen paper, or paper that is known as "union skin." If you can-

not get from your stationer sheets large enough to cut an entire gown, it is easy to paste the edges of several smaller sheets together and make a large piece for yourself. On these paper gores trace with pen and ink any desired design you wish to use for the beading.

These can be obtained from an art needlework store, or if you are clever at drawing or have a friend who is, it will be easy to make your own design. Flowers and leaves, scrolls, bunches of grapes with leaves and curly tendrils, or a conventional pattern, are all good designs to choose.

Select a design that will fit the gorges—one having dainty traceries or small leaves toward the waist line and the heavy part of the pattern near the hem.

It is best to trace it first with pencil, then go over it with India ink. This done, baste the net on the paper pattern, having the tracing next to the net so you can see it through the net. It is then an easy matter to sew on the beads, following the line of the pattern.

Use a fine needle and fine silk waxed sewing thread through the paper. Begin at the waist line and work down toward the hem.

You can use any color beads you desire, or can use several colors if it fits a floral design and you want to represent the colors of the blossoms with beads. Gold and silver beads on black net

are best; in fact, they are best on any color. Jet beads make a very brilliant scintillating robe and crystal beads on white are lovely. When the last bead has been sewed on, tear away the paper pattern and your robe is ready to make up.

If you wish, you can stitch the seams of the net before beading, leaving only the seam at the back open. This will be more difficult to work on, but you can then trim the beading over the seams in some places, so it will more nearly resemble the imported ones.

After all the seams are stitched and trimmed off evenly, turn up the hem and catch it in place with small silk stitches.

The robe is then ready to be mounted over a satin slip, and you will be surprised how beautiful it will look. One woman I know displays with the greatest pride a beaded tunic she made herself.

It was very dark blue silk net, beaded with iridescent blue beads.

Under the light it sparkled, and when my friend walked it caught and reflected the light at a million different points. It is admired by every one who sees it. If, then, you want one of these beautiful robes, follow the foregoing directions and make one for yourself while sitting in the glow of the evening lamp. Such work takes the place of embroidery and is more fascinating.

Rope Girdles

NOW that fancy rope girdles have become so fashionable, the price means of some women who are as keenly interested in being well and fashionably dressed as their sisters who can afford to spend large sums on clothes and their accessories.

With a little time, care and the display of a little ingenuity, it is possible to make your own girdles at far less expense than if they were bought ready-made. A very handsome bellrope girdle can be fashioned by twisting three strands of the silk cord together until they are closely and evenly matched.

Around each end wrap waxed thread, sewing it securely through the ends to hold them so there will be no danger of slipping or fraying out. A silk tassel finishes each end, and the girdle is passed around the waist line of the gown and knotted in front or at the side.

Monks' girdles are made much in the same way, but with these the cord may be plaited or twisted, and the ends, instead of being finished with tassels, are tied in large knots. Use a heavier cord for the monks' girdle.

Silk, wool or cotton braid, plaited and finished with fringed ends, makes pretty girdles.

Any of these can be made of cord that matches the costume of two or three different shades.

Black combined with bright colors is attractive, gold and silver cord, single or combined, is lovely for girdles on evening frocks. These are made by plaiting with fringed or tasseled ends.

Flat braid girdles are equally fashionable. Three yards of broad, flat braid, matching or contrasting with the costume, have fringed ends. This is very effective. The impression will be left in the lines and will last until worked. This method is successful on heavy material.

To Transfer

HERE are suggestions for transferring the pattern before you to any material before working.

Perhaps the easiest way is the "window-pane" method. This is successful when the material is thin, like linen, batiste, etc. Pin the sheet of paper and the material together and hold them up against the glass of a window. With a sharp pencil draw on the material the design, which can be easily seen through the goods. If one-half of the design only be given, unpin the paper and turn the other side to the fabric. The strong light behind will make it plain.

If you have carbon paper, you should place the sheet between your fabric and the newspaper. This latter is on top. With a sharp pencil go over the outline of the design. The impression will be left in the lines and will last until worked. This method is successful on heavy material.

Dainty Combinations

FROM the woman who delights in making her own lingerie, the combination corset cover and undershirt will be found one of the most useful, dainty and easily made articles of the entire outfit.

Trimming for evening dresses can be made in this way. Mourning colors, black, white or shades of purple, are used with good effect. When one of the principle of this lace is mastered there is no limit to the different purposes the lace can be put to. Combinations of colors can be artistically arranged.

One and one-quarter yards of embroidered mourning twelve inches wide is required for the corset cover, two yards of longcloth or English nainsook for the petticoat, and one-half yard of embroidered beading for shoulder straps.

Twelve inches from each end of the embroidery for the corset cover cut a slit three inches long. Hem these and edge with lace. Two inches from each edge of these slits attach the beading for the shoulder strap. This makes large loose armholes. The edges of the embroidery are hemmed and, if desired, edged with lace, and are held together with two tiny lace-covered buttons.

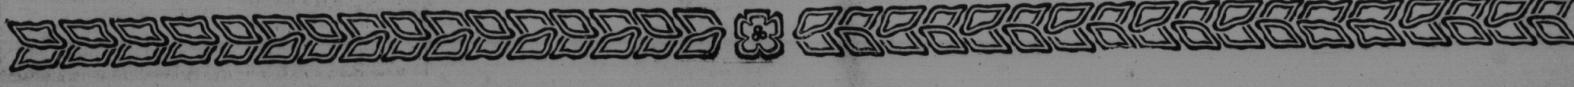

Narrow ribbon is run through the top of the embroidery, over the shoulder, and lies in a box in front.

For the skirt by a circular pattern, fitting it perfectly over the hips and allowing a little fullness directly in the center of the back. Have a straight seam down the center of the front. The length of the skirt should be two inches above the knees, and then a lace-edged ruffle four inches wide is attached to the bottom by a narrow row of beading. Run ribbon through the waist and tie in a flat bow on one side.

These little combinations are quickly made and are well worth the trouble. They can be as plain or as elaborate as you desire, and if worn undergarments are worn, they are lovely when fashioned of the linen having a floral design embroidered about the upper edge and have lace medallions or insertion set with lace-edged ruffles tucked or set with insertions.

Wide bandings run through with ribbon can be used to join the corset cover and skirt, or it can fasten with plain, flat wash buttons in front.

There are all sorts of possibilities in a garment of this sort, which will help you start to make your own underclothes.

AROUND THE CITY

Practice Tonight.
The proposed practice for the Sunday school convention music will be held in the Queen Square Methodist church this evening at 8 o'clock. All interested persons are asked to be present and assist. The Canadian Hymnal will be the one used.

Fishermen Doing Well.
J. S. Clarke, of St. George, is at the Dufferin. Speaking to a reporter he said the operations of the fishermen of Charlotte county during the summer had been attended with considerable success, and that the canning factories had been kept busy.

Former Pastor to Preach.
Rev. Dr. J. A. Morrison, well known as one of the most forceful and eloquent Presbyterian divines in the American field, and formerly of St. David's Church, will occupy the pulpit of St. Andrew's Church at both services tomorrow.

A Key Found.
A key found on Sydney street, another found on King street east and some papers found on a street in the North End, are reported as being found by the police and the losers can be made happy on application to the central police station.

Wedded at Hopewell Hill.
A pretty wedding was celebrated at the residence of the bride's parents, Hopewell Hill, on Wednesday when Rev. W. J. Kirby assisted. Rev. G. Stanley helped, united in marriage Raymond, a son of Harvey, and Miss Maud E. Smith, daughter of Mr. and Mrs. Valentine Smith.

Typhoid Epidemic Over.
Although there were quite a number of cases of typhoid in the city last month, no new cases have been reported at the office of the Board of Health for about two weeks, and it is the opinion of the health officials that the epidemic is over. Some of the cases that were taken to the hospital were from outside of the city, and one came from off a ship in port.

A Presentation.
Thomas H. Johnson who will leave for the west to join Major Gordon in Calgary about the 20th inst., was suitably remembered by the members of the engine company in No. 6 fire station last night. Mr. Johnson was a member of the company and about 7.30 last evening he was called to the fire station where he was made the recipient of a handsome dress suit case.

Choral Society Meeting.
Owing to the Mark Hamberg Recital being on Tuesday next, the adjourned meeting of the proposed choral society will be held on Monday evening at 8 o'clock in the Temple of Honor (down stairs) Hall, Main street. As the organization of the society will be completed and the officers elected at this meeting, a full attendance of everyone interested in the movement is earnestly requested.

Sunday School Rally.
A pleasant gathering was held last evening in Leinster street church when a successful Sunday school rally was held. About two hundred attended. During the evening an enjoyable programme of musical and literary numbers was carried out. The pastor of the church, Rev. Wellington Camp, delivered an address. A social hour was spent and refreshments served.

The Builders Exchange.
So many members of the Builders Exchange have been taking part in the elections that no meeting has been held for some time, but it is announced that the meetings will be resumed next week, when a programme for the winter will be drawn up. It is understood the Exchange will make representations to the committee of the city council, engaged in drafting new building by-laws.

It Was Real Medicine.
The Police report finding a bottle of medicine on the Dominion Atlantic Railway wharf yesterday afternoon and they took it to the central police station where the owner can receive the same on application. The officer states that the bottle contains medicine but at all events the new patrol wagon was not called out for the conveyance of the same to headquarters.

Main Street Baptist Rally.
The last service of the Main street Baptist church rally was held last evening in the church, and was largely attended. The evening was devoted to church and congregational singing, and an enjoyable programme was carried out. Rev. Dr. Hutchinson, pastor of the church presided, and addresses were given by W. J. McAlary, I. H. Thorne, W. H. White, Fred Miller and others. The rally services conducted during the week have been largely attended, and were a great success.

Where is That Duker Ward?
The battle in Duker Ward amongst the Liberals seems to be growing worse instead of better as time progresses. It is now reported that a special meeting of the workers is to be called in order to demand an explanation from the men who were entrusted with the funds, why the bills have not been met. This is the second time that the Liberals have failed to come to time in Duker Ward after the election was over, and the victims evidently are not going to submit so mildly as on the former occasion. If the matter should be aired in court, as now seems probable, the public will obtain some inside information as to how the election game is played.

Supreme Court Chambers.
In Supreme Court Chambers yesterday morning A. H. Hamilton, K. C., for the lien holders in the suit of W. H. Harrison, trustee, vs. Negotiable Lumber Company, applied for leave to appeal from the decision of the Supreme Court of this Province to the Supreme Court of Canada, the time for making such application having expired. His Honor adjourned the hearing until half past two in the afternoon, when the parties concerned filed affidavits. Judgment reserved. H. A. Powell, K. C., appeared for the plaintiff; W. A. Ewing, K. C., for Fred S. Morse, a defendant; M. G. Teed, K. C., for the liquidators; Fred R. Taylor and D. King Hazen for other defendants.

What do you pay the cobbler in the rim of a year? He'll cost you less if you wear Humphrey's Solid Shoes. Ask your dealer.

EVANS INQUEST IS AGAIN ADJOURNED

Several Witnesses Examined Last Night—Jury men to Visit Scene of Accident this Morning—Inquest Resumed 12th

The inquest into the death of Thomas Evans, who died July 7th, as the result of an accident on the S.S. Shenandoah, was resumed by Coroner Berryman last night. After hearing some evidence the inquiry was again adjourned till next Thursday evening at 7.30. The members of the jury will visit the steamer this morning at 10 o'clock accompanied by the coroner and counsel. Two of the witnesses last night said that the electric lights below the main deck were confined to the starboard side and were on at the time of the accident. This statement was supported by the fourth engineer of the vessel who swore he turned them on about 8 o'clock, and that they were running all night.

James Uphan, was the first witness. He was one of the men who assisted to get Evans out of the hold and his evidence in most points agreed with that given at the first session of the inquest. The electric lights, he said, were turned on on the catwalk deck.

George Gregory, foreman for H. S. Gregory and Sons, stevedore, said that in his opinion it was quite safe for the covering to be off the bunker hatch on the catwalk deck as that was lighted by electric lights. The reason that the hatch was open at that time was they expected the arrival of cargo for it. As a matter of fact they commenced to work there the next morning.

To Judge Armstrong witness said that the combing around the bunker hatch was of sufficient height to prevent a man falling through if he were ordinarily careful. There was about 17 feet clear between the side of the vessel and combing of the hatch to walk in.

To Daniel Mullin Mr. Gregory said it was the practice to have the covering off the bunker hatch 'tween decks. He did not know for certain if the electric lights were on in the catwalk deck, but to the best of his belief they were.

William Mills Lee, first mate of the Shenandoah, declared it was the duty of the stevedore to see to the taking off of the hatches and putting them on again. The bunker hatch had been covered by his orders that morning for the purpose of cleaning out the hold. This work had been done about noon, and he had ordered it closed again. It was left open 'tween decks for the purpose of cleaning out the hold. This work had been done about noon, and he had ordered it closed again. It was left open 'tween decks for the purpose of cleaning out the hold.

To Mr. Mullin he said that the reason the hatches were left 'tween decks was that they expected they would arrive any time to put down there. He had no recollection of John Arneane or any one else talking to him about the electric lights. When he reached the ship about 1.15 the lights were on then. He had not been on duty when the accident occurred as it was John Evans' watch.

Clement Williams Saunders, fourth engineer of the Shenandoah, was the last witness of the night. He said he was on duty the night of the accident and he had to see that the electric lights were on and enough steam up for the purpose. The lights were turned on about 8 o'clock. After the accident no one had spoken to him about the necessity of giving the lights going. He had gone on duty at 7 o'clock in the evening and after turning on the switch for the catwalk deck, he went up and saw that all the lights were burning. Most of them were on the starboard side of the ship but a few were on the port side. Referring to the bunker hold he said that he had never seen the hatches on it 'tween decks.

Neither of the two last witnesses had seen the accident nor could they explain how it could have happened.

DISMANTLING THE WRECKED DREDGE

Work Commenced Yesterday on the New Brunswick—Will Make Attempt Today to Float the Hull.

The work of dismantling the dredge New Brunswick was begun yesterday, and considerable progress was made in the work. A considerable quantity of the machinery was prepared for removal, and at high tide today a lighter will attempt to take the machinery off the dredge.

At the same time, if weather conditions prove favorable, an attempt will be made to haul the hull of the rocks on which she is resting, and as the hull is quite heavy and was staunchly built, there is a hope of succeeding, in which case it will be towed up the harbor, unless the weather should prove too rough.

One of the scoops which broke away from the dredge has been located. A report from Hampton down the bay on the Nova Scotia side, states that the scow has drifted ashore there. The fact that the derelict drifted against wind and tide to such a distance is peculiar with conditions that prevailed during Wednesday's storm.

When About the Patrol Wagon?
While the new city patrol wagon has been placed in commission after being housed in a fire station for some weeks, it is still idle as far as being put to any use by the police force. It is a handsome piece of workmanship and would undoubtedly save the slovens, express wagons and other vehicles being called on for the conveyance of men and women prisoners to the cells if there had been in order to the officers to use it. The policemen have not as yet been instructed to call the wagon to their aid, although it is in the Victoria stables on Coling street for that purpose. Even if the Chief should order officers under his charge to call for the wagon, a policeman would have his own troubles in holding on to a prisoner and at the same time trying to think of a place where he could get a telephone to call the wagon to his assistance. The wagon is ready for business but without the police alarm system it is of little use.

BORDEN CLUB HAS HAD A GOOD YEAR

Officers Chosen at Annual Meeting Last Night—Age Limit on Membership Removed—Congratulations.

A largely attended and enthusiastic meeting of the R. L. Borden club was held last evening in the Conservative headquarters. Frank R. Entwistle, the President, occupied the chair and every portion of the city was largely represented.

The reports of the various committees were received and adopted and the annual report was ordered printed in booklet form.

Several amendments to the constitution were made. The age limit was removed.

The following officers and committees were elected for the ensuing year:

Hon. R. L. Borden, K. C., M. P., Prime Minister of Canada, Honorary President.
Frank R. Entwistle, President.
James S. Tait, 1st Vice-President.
Chris. Splane, 2nd Vice-President.
L. V. Lingley, 3rd Vice-President.
Charles Robinson, Treasurer.
John C. Byles, Secretary.

The executive committee is composed of the officers and John G. Willet, W. H. Harrison, G. Earle Logan, D. King Hazen, W. W. Donohue, E. Allan Agar, Charles W. Wannamaker, W. R. Catherwood, C. F. Inches, Harold Mayes, Charles F. Stevens, Ald. N. P. McLeod and Roderick McLaughlin.

The St. John county committee—G. Earle Logan, chairman; W. R. Catherwood, D. King Hazen, Manning W. Doherty and C. F. Inches.

The following were elected to represent the club on the executive of the Conservative Association for the ensuing year: G. Earle Logan, Lewis V. Lingley, Charles W. Wannamaker, C. F. Inches, John G. Willet, Chris. Splane and Thomas E. Simpson.

The following message was sent to Premier Borden:
Hon. R. L. Borden, M. P., Prime Minister, Ottawa.
"The R. L. Borden Club of St. John in annual session has passed a unanimous resolution, tendering their hearty congratulations to you on the magnificent victory won by the Conservative party under your leadership, on September twenty first last. They also congratulate you on your elevation to the premiership this day, and trust you will continue in that high position which you are so eminently qualified to fill, to the satisfaction of the people of Canada."

WILL HAVE INDUSTRY ON GREENHEAD SITE
English Company May Establish Cement Plant There with Capacity of 2000 Barrels per Day.

R. Max McCarty, who acting for an English company has been granted an option to purchase the Greenhead property for \$25,200, within ten months, stated last evening that he expected an English engineer would come out in a short time to examine the property. One engineer has already made an inspection of the property, and reported that it would make a first class site for a cement plant, as all the necessary materials are found on the lots in abundance.

On the strength of this report the company put up \$1,200 for an option on the property, but decided to have their own engineer examine the property and report before purchasing. Mr. Guernsey, who was here some time ago and made the arrangements for securing an option, has been on a trip through the Canadian West and only recently returned to England.

The company intend to put up a plant capable of turning out 2,000 barrels of cement a day. As an indication of the possibilities of this industry it may be mentioned that the Sydney Cement company which started in a small way has recently made arrangements to increase its output to 1,200 barrels a day.

PERSONAL.
C. W. White, White's Cove, came in on the Boston express on Friday being put to any use by the police force. It is a handsome piece of workmanship and would undoubtedly save the slovens, express wagons and other vehicles being called on for the conveyance of men and women prisoners to the cells if there had been in order to the officers to use it.

Miss Ethel Moore, who has been the guest of her cousin, Miss Edna Giles Douglas Avenue, has returned to her home in Fredericton.

This morning in the gymnasium of the Y. M. C. A. Class C will have its first tryout. At 4 o'clock this afternoon R. P. McKim will open his B. C. class for Sunday school teachers and others. This class is open to both men and women and it is hoped there will be a good attendance. Tomorrow afternoon at 4 o'clock in the building there will be the first of a special series of services for men. Rev. Alfred Bright, of Ingersoll, Ont., will deliver an address on A Good Start.

Special Showing of Trimmed Millinery

Saturday, Oct. 7th

A new lot of Smart Tailored and Street Hats. Big variety of clever shapes all ready to wear put on.

Made of all the fashionable materials including: **VELOUR, BEAVER, VELVET, FELT**

Trimmed in the newest ways in all colors, black, blues, greens, tans, reds and the new violet shades. This display will include a lot of the Famous Banner Hats, a strictly up-to-date hat at a moderate price.

Just Received A Repeat Order of the New Paddy Shape Trimmed Hats

Owing to the demand for the Soft Felt Collapsible Hat, known to the millinery trade as Paddy Shape. We opened yesterday afternoon, a second supply of these particular designs, good range of colors are shown: White, Black and White, Black, Tans, Royal Blue, Paddy Green, Grey, Brown, Green and Black Tan and Brown, Grey and Black, Tan and Black.

Prices \$3.75 to \$6.50

MILLINERY SALON—SECOND FLOOR.

NEW IMPORTATION OF REYNIER KID GLOVES

In all the leading colors: white, black, grey dark and light, brown in the different shades, tans in dark, light and medium. Navy and green shades suitable for the new Fall and Winter suitings. Sizes range from 5 1/2 to 7 1/2

The Prices Are \$1.40 and \$1.60

New Fall and Winter Dress Goods

Our Dress Goods Department is offering a larger assortment of Fall and Winter Dress Goods—home and evening wear novelties—that we ever placed before our customers at any other time. The stock is now complete, and it will do you good to see the different ranges of new styles and colorings—plains and fancies—in these 1911-12 dress goods creations.

Every dressmaker, and in fact, every woman, should inspect this showing of manufacturers' art. The list below will convey a small idea of a few lines—space will not allow for more. Read the list and visit the department for details.

WORSTEDS, CHEVIOTS, SERGES, BROADS, VENETIANS, ETC.

NEW AND ATTRACTIVE NOVELTIES IN REVERSIBLE TWEEDS, the reverse side being used for the collar and cuffs, making a very smart costume. The colors are: BROWN, tan, green, blue, fawn and grey.

PERSIAN BORDERED CREPE DE CHENE, a beautifully shimmering silk material in exclusive dress lengths

BORDERED CHALLIES, an ideal material for house dresses or evening wear. The colors are: Fawn, grey, navy and green, with a Persian border as a trimming.

WOMEN'S DRESS GOODS DEPARTMENT—FIRST FLOOR.
