HON, ALEXANDER MACFARLANE, Senator, Wallace, Nova Scotia, President. Hon. ROBERT BARRY DICKEY, Senator, Amherst, N. S. CHARLES H. M. BLACK, Esq., Merchant, Halifax, N. S. LT. COL. CHARLES J. STEWART, Amherst, N. S.

Esq., Barrister, Amherst, N. S. Bankers-Bank of Nova Scotia, Amherst Branch; and Bank of New Brunswick, St. John, N. B. OFFICE-Mr. W. J. MOFFATS Office, Amherst, N. S.

The Company have acquired, by purchase, three leases from Government of Nova Scotia to Hon. Alex. Macfarlane, of one square mile each, of the richest coal deposits in Canada, at Spring Hill, Cumberland County, Nova Scotia, renewable until August, 1926. Royalty 10 cents per ton of 2,240 lbs.

Five seams and upwards, of varying thickness from 2½ to 13 feet, are known to exist within these areas, which comprehend (exclusive of a portion of the General Mining Association reserve) nearly all the coal yet discovered in this well known district. Of these, one, known as the 11 feet seam, has been opened, and several hundred tons raised by a slope sunk only 25 feet from the surface, and has been proved by test pits about 1½ mile at an average of 10 feet from the surface, and preserving a thickness of 10 feet for two-thirds of that distance. The slope has lately been carried down to the depth of 95 feet, exhibiting a marked improvement in the quality of the coal, described by Sir Wm. Logan, from specimens near the outcrop, as "an excellent coal, superior to any of this continent yet known." A moderate estimate of the quantity would give as the yield from this seam alone, half a million tons annually during the lease. The larger seam has been exposed by a trial pit within the areas; the smallest of 2½ feet, is believed to contain a valuable gas coal, and it is a fair geological inference that all these beds of coal will be found in their proper position. Thus several distinct colleries may be leased to individuals or companies.

A branch railway of 3½ miles has been surveyed, and steps are being taken for its construction to connect the property by a down grade with the Intercolonial Railway, at a point 21 miles from the head of the Bay Fundy and contemplated Bay Verte Canal, and 13 miles from a shipping place at the mouth of Maccan River, half a mile from the Intercolonial, where vessels drawing 13 feet of water may load. Until the opening of the Intercolonial, between Truro and Amherst, next autumn, the coal will be hauled 4 miles to Black River Station.

From the nearness of the outcrop to the surface, and the seams lying on high and descending ground, securing easy drainage, it is considered that these seams may be most economically worked.

The freight of a ton from the head of Bay Fundy to Boston or New York is about 75 cents less than from Pictou or Sydney—of itself a good profit, while the difference to St. John is fully \$1.00.

The Spring Hill coal is well adapted for house, steam and smelting purposes. Situated within 37 miles by rail of the lodes of brown hematite and micaceous iron ore of the richest quality, known as the Acadia iron ore, of Londonderry, it is difficult to assign limits to the quantity of ore likely to be taken to Spring Hill, for smelting by a coal unusually free from sulphur. The large proportion of carbon renders it eminently adapted for manufacturing coke, which, with the coal itself, must be extensively used in the iron and steel works at Londonderry, as well as the Machine shops being erected for the Government railways at Moncton.

The portion of the Intercolonial between Truro and Amherst is now being ballasted with engines driven by Spring Hill coal. It is understood that the line between Truro and Newcastle, if not the whole line to St. John, a distance of 280, miles will shortly be worked in the same way, and the local demand between these points, already large, is steadily increasing.

Vessels bringing flour from the St. Lawrence to St. John, Yarmouth, and other

be worked in the same way, and the State destructions is steadily increasing.

Vessels bringing flour from the St. Lawrence to St. John, Yarmouth, and other lower ports, through the Bay Vorte Canal, when completed, may have return cargoes of coal to Quebec, Montreal or Toronto.

From all these sources of traffic, in addition to the Western part of Nova Scotia, the New England ports and New York, it is assumed that an unlimited market will be afforded.

Additional means of shipment will be afforded by the contemplated railway to Parrsboro—a port open at least ten to eleven months in the year—for which the Nova Scotia Legislature have provided large subventions.

The estimated cost per ton for raising, handling, and putting on board ship, say at mouth of Maccan river, is about as follows:

Cutting and raising, including weighing, screening, &c 65 cents, Railway transportation, loading and royalty
Cost on board\$1.10 Freight to St. John
Cost

If Pictou and Sydney coal can be shipped to Boston and New York at paying prices. it cannot fail to be highly remunerative to send a better article from Spring Hill, with an advantage of 75 cents in freight. The local traffic would yield a high rate of profit.

Taking the low average of only 80 cents per ton, inclusive of repairs of machinery, &c., and assuming only 100.000 tons as the annual production at first, we have a gain of 20 per cent. on the capital, which might be much augmented by the rent of other seams, as suggested. From the exceptionally high character of this coal, and the facilities for raising it cheaply, this quantity, it is confidently believed, might ere long be doubled or trebled, and a large rate of profit secured even with considerable increase of central.

# TESTIMONIALS.

Extracts from Reports of Messrs. Woodhouse and Jeffcock. Mining Engineers, London and Derby, G. B., (January 2, 1866) The Coal Field which we have carefully examined, and which is the subject of this Report, is situate in the county of Cumberland, in the province of Nova Scotia. It is generally described as the "Springhill' Coal Field, but in reality it is a part of the great Cumberland Coal Field.

The first or upper seam we found to be a bed of remarkably good coal presenting a very june 15

m dips to the North west at an angle of 25 degrees. It is underlaid at a depth o one of 11 feet three inches thick (the main seam), the quality of which is also o . South of the crop of this last, crops of three others have been found, the posi-conformable to the largest seams.

The Springhill coal burns with but little intumescence, and does not agglutinate. It allows a free passage to the air, and gives a brilliant flame with a light smoke. It ignites easily and has but little tendency to soil, and does not crumble into powder when broken. Its clinker is friable, easily broken, and has but-little tendency to adhere to the grate. For steamboat coal, I consider it superior to any Province Coal brought to market.

Professor Henry Y. Hind, M. A., in his recent Report of Springhill Coal Field, thus sums up "Thickness of large Springhill seams 13 feet and 10 feet 3 inches. Quality of Springhill seams of the very first class. Distance of these from Parrsboro by rail, 26 miles. Knowa outerop of Springhill main seam, 11 feet, on which operations could be immediately commenced, about 2 miles. miles.

"The main seam, or what is supposed to be the main seam, has been traced for a distance exceeding one mile and a half in a northerly direction, on the MacCarlane areas."

In Professor Selywyn's, F. G. S., Report laid before Parliament, Session 1872, he thus refers to Mr. Scott Barlow's operations at Springhill: "The evidence, so far as it goes, appears to show that in a distance of about eight hundred yards, horizontal measurement, across the strike of the measures, there are eight seams of workable thickness, as under, in descending order. No. 1, 13 fc. 6 in.; No. 2, 6 ft.; No. 3, 7 ft. 4 in.; No. 4; 12 fc. 3 in.; No. 5, 2 ft. 6 in.; No. 6, a crop, thickness uncertain; No. 7, 4 fc., shaly coal; No. 8, 2 ft. Total, 42 ft. 7 in."

The sisthe house and asked for Clayton. The sister took the Sheriff into the room where Clayton was writing, when Mr. Temple stated the object of his visit, which was to eject him from the premises, but before taking further proceedings he wished to talk with him and see if some amicable arrangement could not be made. While the Sheriff was talking with Clayton, Lavinia Clayton came into the room with a pistol in her hand which she handed to her broiher, saying at the same time. "Harding was a way defend my right?" Clayton re-For some time past it has been rumored that the Hon. John McAdam would be a candidate for the representation of Charling won't you defend my right?" Clayton replied 'Yes, while a drop of blood is left my veins." The Sheriff continued to reason with Clayton, but without making any impression. Mr. Temple then left the house but returned again in a short time, and ronewed his efforts to bring Clayton to terms. Finding all his efforts of ho avail the Sheriff returned home.

had able representatives in the past from the earlier political days of the late Hon. Geo. S. Hill and Hon. James Brown down And so the matter rested until Monday last, when Sheriff Temple handed over (without warning, it is said,) the danger—ented in the local legislatures of the coun (without warning, it is said,) the dangerous duty to young Seely, a law student.
The Express, in concluding its sketch of
the Tragedy, remarks:—

The whole case is a sad one, and its ocourrence is deeply to be regretted. Harsh
and perhaps unjustifiable opinions may in
some instances be formed, which or a close
investigation of all the aircumstances of life, to say that his duties as a representa-

of a long political record like that which has oheracterized Mr. McAdam's public life, to say that his duties as a representative of the case, may be groundless. There is one thing evident, the laws of the country must be enforced, let the consequences be what they may. A writ of ejectment means nothing more or less than the employment of force, whether by few or by many. The question that arises is—Did the Sheriff, in view of the difficulties surrounding the case, employ a sufficient force? If he did, then no one can say a word, but if on the other hand, the force was inadequate, and only sufficient to provoke resistance on the part of Clayton and his friends, then, to say the least, the course pursued was an unwise ene, and the results no worse than might have been expected. We are not however in a position to give a correct opinion in regard to the matter. We learn, however, that when Mr. Seely undertook the duty he was not aware of the state of the case, or that any attempt at resistance would be made; nor did he expect any, until the Sheriff handed him a pistol of the case, or that any attempt at resistance would be made; nor did he expect
any, until the Sheriff handed him a pistol

he will be quite as useful to the country
there as he has been at Fredericton. any, until the Sheriff handed him a pistol as he was about starting, saying at the same time, that it was possible he might require it. If this is true, the Sheriff is to blame for not informing Mr. Seely of the true state of things, and giving him an opportunity to proceed. We think in all such cases especially, the Sheriff should perform the duty himself, and not deputize others to act for him.

Public sentiment in Fredericton appears to fasten upon Sheriff Temple, to some extended to the country there as useful to the country there as he has been at Fredericton.

The St. Andrews Standard also appears of clean to Mr. McAdam. It says:—

Mr. McAdam has taken time by the forelock and offers his services to the constituency of Charlotte, as may be seen by reference to lean to Mr. McAdam. It says:—

THE 1RISH EMIGRANT'S APOS. TROPHE TO HIS DEAD WIFE. BY LADY DUFFERIN.

'm sittin' on the stile, Mary, Where we sat side by side On a bright May morning long ago, When first you were my bride; The corn was springin' fresh and green And the lark sang loud and high, And the red was on your lip, Mary, And the love light in your eye. The place is little changed, Mary, The day is bright as then, The lark's loud song is in my ear, And the corn is green again; But I miss the soft clasp of your hand And your breath, warm on my cheel And I still keep listenin' for the words
You never more will speak. Tis but a step down yonder lane.

And the little cherch stands near,
The church where we were wed, Mary,

I see the spire from here. But the grave-yard lies between, Mary, And my steps might break your rest, For I've laid you, darling! down to sleep, With your baby on your breast. I'm very lonely now, Mary, For the poor make no new friends, But, oh! they love the better still The few our Father sends! And you were all I had, Mary,

There's nothin' left to care for now, Since my poor Mary died. Yours was a good, brave heart, Mary, That still keep hoping on, When the trust in God had left my soul, And my arm's young strength was gone; There was comfort ever on your lip, And the kind look on your brow— I bless you Mary, for that same, Though you cannot hear me now.

I thank you for the patient smile. When the hunger pain was growin'tl Mhen the hunger pain was growin'tl And you hid it for my sake! I bless you for the pleasant word, When your heart was sad and sore, Oh! I'm thankful you are gone Mary. Where grief can't reach you more

Ayer's Hair Vigor, For restoring to Gray Hair its natural Vitality and Color.

A dressing which is at once agreeable. healthy, and effectual for preserving the hair. It soon restores faded or gray hair to its original color, with the gloss and freshness of youth. Thin hair is thickened, fallen hair checked,

and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning grey or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the forma-tion of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy

lustre, and a grateful perfume. Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Cher LOWELL, MASS. H. L. SPENCER,

Nursery Rhymes, No. 11. MISPECK MILLS, Yt is an antiente mariniere, And he stoppeth one of three; 'By thy long gray beard and glitterit Now wherefore stopps't thou me? Still, in thy hand I'd understand Why should that bottle be?

"The bridegroom's doors are opened wide, And I am next of kin; The guests are met, the feast is set, May'st bear the merry din. So, quick, I pray, thou'lt say thy say And let me enter in." He holds him with his glittering eye,— Ye wedding guest stood still, And listens like a three year's child,— Ye mariniere had his will; "My friend," saith, he, "this remedee Will Rheumatism kill." Ye wedding guest sat on a stone, He cannot choose but hear, And thus spake on that antiente man, Ye bright eyed mariniere: "Neuralgis, too, and Tie Doloreaux, It causes to disappear.

"Tis a capital cure and always sure,
All others must go to the wall."
(Now ye wedding guest had a pain in his chest
The result of a dangerous fail),
So without any fuss, he pulled out his puss,
"Your stock—I will take it all." Ye mariniere whose eye is bright,
Whose beard with age is hoar,
Is cone: and now ye wedding guest
Turns from ye bridegroom's door,
And in jigs and reels he kicks up his heels,
For his aches he feels no more.
