Glencoe Business College

Teaches All Business Subjects. Day and Night Classes. Latest Adding, Bookkeeping and Typewriting machines. Tuition 14 dollars per month.

We will have Adding Machines and Typewriters for rent for the summer months; make arrangements now. Instruction books can be ordered, for those who want to study at home. You can also save time by starting your Shorthand or Bookkeeping work at home. Write or call for information.

FENCING!

YES, WIRE FENCING. It will pay you to get our prices on Wire Fencing before buying, as they are rock-bottom and will surprise you. We have Peerless, also some Frost. We guarantee to give you the best galvanizing—the galvanizing that never fell down—also a plump No. 9 gauge wire—we don't mean a No. 9 wire drawn to the last decimal point. Call and see us before you buy.

ROOFING. We are in the game, with the best that can be bought. It is Bird & Son—"the old reliable," that Father Time has proven there is none better and few its equal. We are sole agents for "Art Craft," the pattern roofing. Here are a few of our lines:

The wide Art Craft Roofing with pattern.
18-inch Art Craft Roofing with pattern.
Ordinary 18-inch Red or Green Slate.
Paroid, the kind that made Bird & Son famous.
The large or small Slate Shingle.
Wall Board with the grained finish.

All the pattern Roofing you see through the country is Bird & Son's make. This store is sole agent for it. Mr. Chas. Willey is our only representative. See him or call and see us before roofing. We will sell it and you can put it on or we will put it on. When buying, it pays to buy quality. Experiments are often costly. If you buy Bird & Son's you take no chance as it is Quality Roofing.

CALL AND SEE US.

F. L. CHARLESWORTH

HARDWARE MERCHANT

ROOFING OF ALL KINDS

We handle the best grades of roofing, and have made arrangements with an expert Roofer to lay roofing of every description, and are prepared to give a price on Shingles, Brantford Slates, Roll Roofing, Galvanized Iron, etc., per square, laid on your roof.

NOTICE TO CREDITORS

In the Estate of John Cramp, Late of the Township of Ekfrid, in the County of Middlesex, Farmer, Deceased.

Notice is hereby given, pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, Section 56," that all creditors and others having claims against the estate of the said John Cramp, who died on or about the 26th day of February, A.D. 1922, are required to send by post prepaid or to deliver to Garnet Cramp, 573 King St. West, Hamilton, Ont., one of the executors of the estate of the said John Cramp, deceased, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities, if any, held by them.

And take notice that after the fifteenth day of May, A.D. 1922, the executors will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which they shall then have had notice, and that the executors will not be liable for the said assets or any part thereof to any person of whose claim they shall not then have received notice.

GARNET CRAMP, Executors.

Land for Sale

The Soldier Settlement Board of Canada offers for sale by Public Tender: 90 acres: Parts Lots 18 and 19, Con. 3, Moss Twp., Middlesex County. The terms of sale are 20 per cent. of purchase price in cash on acceptance of tender, the balance in not more than nine equal, annual instalments, with interest at 6 per cent. per annum.

Each tender must be accompanied by an accepted cheque for 10 per cent. of the tender offered. This amount will be applied on the 20 per cent. if the tender is accepted.

In the event of a tender of a returned soldier being accepted, no advance will be granted him for Stock and Equipment or Permanent Improvements under the Soldier Settlement Act, 1919.

Tenders will be opened May 8th, 1922.

The highest or any tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive tenders to purchase until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of Lots 18 and 19, Con. 3, Moss," and addressed to: The District Superintendent, Soldier Settlement Board, Toronto, Ont.

Anybody wishing to rent this farm for this season, please write to same address.

Dated at Toronto this 13th day of April, 1922.

DISTRICT AND GENERAL

A Euphemia farmer was fined \$10 for neglecting to send his children to school.

Digging wells is about the only business where you don't have to begin at the bottom.

West Lorne Presbyterians will improve their church property to the extent of \$4,000 this year.

A man died in the hospital at New Haven, Conn., from meningitis as the result of an oat kernel sprouting in his ear.

A mail bag containing a considerable amount of registered matter was stolen between London and Sarnia a few nights ago.

James McWilliam, of Robsart, Sask., has disposed of his 100-acre farm, north half of lot 11, concession 4, Dunwich, to ex-Reeve Alex. G. Duncan.

Of the 748,000 inhabitants of Boston, according to the recent United States census, 39,247 were born in Canada. Of these 51.3 per cent. have become naturalized.

Harrow farmers have been looking into the financial possibilities of growing cauliflower, with the result that there is likely to be a largely increased acreage this year.

Last year the people of Canada contributed \$87,223,207.89 by direct taxation, through the federal income tax and the business profits tax. Of this Ontario paid more than one-third.

Furlow Coates, a farmer residing near Mount Brydges, was kicked by a horse and hurled against a cement wall on Monday-afternoon. His skull was fractured and he died an hour later.

Middlesex county treasurer received a cheque from the Ontario Government on Saturday for \$92,746.13. The cheque is the province's share of the good roads expenditure and is about \$12,000 higher than Middlesex received last year.

A quiet but pretty wedding was solemnized at the home of the bride's parents, Mr. and Mrs. George W. Young, Cairo, on Wednesday, April 12th, when their second daughter, Mary, was united in marriage to Albert Hilton Rush, son of Mr. and Mrs. Wellington Rush, of Zone.

John Hall, formerly merchant and cattle dealer at Dashwood, left an estate valued at \$128,950. The trustees of New St. James church, London, will receive \$5,000; Women's Christian Association for the Aged People's Home, \$10,000, and Western University, \$5,000. Among other beneficiaries is Rev. Jas. MacKay, of New St. James Presbyterian church, who will receive \$5,000.

Discovery in the River Thames, within the London city limits, of two of the largest and most valuable freshwater pearls ever found in Canada has inspired many people to go pearl-fishing along that stream. The two gems, valued at \$500 and \$300 respectively, are perfect specimens and came by chance selections from clams which with the bed of the river is abundantly strewn.

The returns of Ontario's Provincial Treasurer show that for the year 1921 amusement lovers paid into the treasury the sum of \$1,082,000 in taxes. As the amusement tax ranges from ten per cent. upward on the face value of all tickets where an admission is charged in regular way, the sum total paid out in Ontario for movie and other performances would amount to fully \$11,000,000 for the year. Of this sum Toronto contributed over half, or \$624,000. Hamilton \$126,000, Ottawa \$56,000, London \$44,000, Windsor \$25,000. It may have been a hard winter, but apparently the public amused itself as usual.

Gen. Von Altmack, a German statistician in Berlin, a few days ago published his estimate that 46 men were killed and 199 wounded on the German side every hour the great world war was raging. Germany had under arms during the war no less than 13,000,000 men, and of these 1,888,546 were killed and 4,246,779 were wounded. The officers' corps lost 33,000 killed and 96,000 wounded. German soldier and civilian losses through death caused directly or indirectly through the war are estimated by Gen. Von Altmack at 12,000,000. This is a sad commentary on the slogan of "World-Power or Downfall," with which Germany began the war.

EKFRID TATION

Mildred and Jean Beales and brother Hugh spent their Easter vacation in Windsor.

Mrs. Hugh Lach's sister, Mrs. McDonald, and husband have returned to their home in London.

H. Winger attended the funeral of his uncle, Menna Winger, of Bad Axe, Mich.

Easter services in No. 4 school house were well attended.

Alice and Chester Winger spent a few days the guests of their aunt, Miss Guss, St. Thomas.

Charlie Elmore was home for the Easter vacation.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

SOUTHERN BASEBALL LEAGUE

A meeting of representatives of the junior baseball teams from Glencoe, Florence, Bothwell and Thamesville was held at Thamesville on April 19, when it was decided to form a Southern Junior Baseball League, with an age limit of 21 years on January 1, 1922.

The following officers were elected:—B. W. Fansher, M.P., honorary president; Dave Wallace, president; A. Davenport, vice-president; J. H. Perry, secretary-treasurer.

Club representatives:—O. S. Johnston, Florence; W. A. Reith, Glencoe; A. Jerome, Bothwell; A. Stewart, Thamesville.

The following rules are to govern: 1. A deposit of \$5 is to be made to the secretary-treasurer as a guarantee to play games.

2. Clubs wishing to postpone games must send notice to the club with which the game is scheduled and to the secretary-treasurer four days before the date of game, or lose the forfeit.

3. The games to start May 24th, with one game a week until July 1st, from then two games a week. League to close Sept. 30th.

4. The visiting team is to arrange for two umpires. No league official to be used.

5. Birth certificates may be demanded in case of doubt as to a player's age.

6. Schedule to be drawn up as soon as possible and sent to clubs for approval.

DEATH OF ANDREW FLEMING

The death occurred on Wednesday, April 12th, of Andrew Fleming, of Ekfrid township, in his 39th year. Mr. Fleming was born in Prince Edward county, and moved to Ekfrid township 25 years ago. From that time until recently he conducted the Ekfrid mills near Strathburn. Twenty-eight years ago he married Carrie Phetteplace, of Union, Elgin county, who survives him. He also leaves three sisters, one brother and three grandchildren. Mr. Fleming was a Fenian raid veteran, for which he was awarded a medal. The funeral service was held at the residence on Good Friday, and interment was made in Oakland cemetery.

G. H. S. NOTES

School reopened Monday, with practically a full attendance.

Recently the High School was fortunate enough to be presented with a mounted deer in a splendid glass case by Mr. Alfred Aldred, an expert and local businessman. The specimen with three others was shot by a Mr. Fletcher during the fall of 1906 in the township of Moss. The donor was successful in securing one, while the work of preserving it was entrusted with his mother, the late Mrs. Robert Aldred, and the present state of preservation testifies as to the skill of the artist. It is an inspiration to pupils and teachers to know that the "old boys and girls" still have an interest in their alma mater.

We are pleased to report that Mr. H. J. Johnston has intimated his intention of presenting medals from year to year for oratory so long as the pupils of the High School show an interest in the same.

MOSA COUNCIL

A meeting of the Mosa council was held at Newbury on April 16th. The members were all present. The minutes of the last meeting were read and approved.

Moved by E. Hurdle, seconded by F. J. James, that the application of Charles Telfer to have the Roycraft-Winship drain repaired be accepted, and the clerk is hereby instructed to require James M. McGregor, C.E., to make an examination of said drain and report to the council. Carried.

Moved by F. J. James, seconded by J. A. Leitch, that the following accounts be paid:—James McGregor, \$25 for surveying the Duncan Graham drain and \$5 for inspecting the Lethbridge drain extension; Chas. Chapman, \$2.50, binding collector's roll for 1922; A. E. Sutherland, \$25.60, for supplies for treasurer and printer; J. C. Graham \$1.50, F. Abbott \$1.50 and E. Hurdle \$3.50, for assistance surveying the Graham drain; Hurdle and Miller, \$35, for work done on the Deacon-Winship drain; Annie McTavish, \$10, refund of statute labor. Carried.

Moved by E. Hurdle, seconded by J. A. Leitch, that the application of D. P. McCallum to have Gov. drain No. 8 repaired be accepted, and the clerk is hereby instructed to request Jas. McGregor, C.E., to make an examination of said drain and to report on such repairs, improvements, extensions or alterations as he finds it necessary, and that the said engineer be hereby authorized to vary the proportion of assessment for maintenance if he considers it advisable to do so. Carried.

Moved by D. A. Mitchell, seconded by E. Hurdle, that Commissioner James be hereby authorized to have the Lethbridge drain re-staked if he finds it necessary to do so. Carried.

The council adjourned to meet at Glencoe on Saturday, the 27th day of May, at 10 o'clock a.m., as a court of revision on the assessment roll for 1922.

C. C. McNaughton, clerk.

ALEXANDER McALPINE PASSES

The death occurred at his home in Glencoe on Friday, April 21st, of Alexander McAlpine, senior, a highly esteemed citizen.

Mr. McAlpine was born on the farm in Ekfrid township 85 years ago and resided there until 1913 when he and Mrs. McAlpine moved to Glencoe. He was a staunch Liberal, although he had never taken an active part in political affairs, and was a life-long member of the Presbyterian church. He is survived by three sons and two daughters—Garfield and Clifford, in Saskatchewan; Bruce, at home; Laura (Mrs. Harman Short), of Drayton, and Minnie (Mrs. Archie Fletcher), of Komoka. His wife predeceased him five years ago.

The funeral service was conducted in Glencoe Presbyterian church on Monday afternoon, and interment was made in Oakland cemetery, six brothers-in-law acting as pallbearers.

TULLY—HAMMETT

The marriage took place quietly on Saturday, April 22nd, at Windsor, of Ruth Maud, daughter of Rev. J. W. and Mrs. Hammett, of Walkerton, and Cyril Wave, son of Thomas A. and the late Mrs. Tully, of Essex. The ceremony was performed by the Rev. Joseph Tully, uncle of the groom.

The bride wore a becoming suit of navy tricot, with a hat to match. The witnesses were Miss Oral Tully, sister of the groom, and Miss Mary Hammett, sister of the bride.

The happy couple will reside on the groom's farm, near Essex.

RUSSIAN FAMINE FUND

The Transcript acknowledges receipt of the following donations for the Russian famine fund: Previously acknowledged\$134.50 No. 9, Moss, Women's Institute 25.00 Church of Christ, Moss, 13.50 Woodgreen Union Sunday School, No. 3 10.00

Total\$183.00

THE LATE MRS. McFARLANE

Mrs. D. C. McFarlane, whose death took place after a month's illness at her home, 479½ Euclid avenue, Toronto, had been a former resident of Glencoe for 25 years, being the wife of D. C. McFarlane, who conducted a drug business here for 21 years. She was an active member of the Glencoe Presbyterian church and the various ladies' organizations of it during the pastorate of four clergymen, each and every one of whom in their kind sympathy to the family expressed a personal loss. She leaves her husband and three daughters, Effie, Jean and Reta, the former two teachers in the city schools and the latter a pupil at Harbord Collegiate.

The funeral took place in Toronto to Mount Pleasant cemetery on Wednesday, April 12th, conducted by Rev. Dr. Cochrane, of College street church, assisted by Rev. Jas. Wilson, of Dovercourt church, a former Glencoe pastor.

The following appears on the calendar of College Street Presbyterian church for Sunday, April 16, 1922: Mrs. George C. McFarlane.—Mrs. McFarlane was one of the best loved women of the congregation. Her bright and winsome personality, her kindly interest in every one and her quiet and faithful service in so many departments of our church's work won for her a very large place in many hearts. But her greatest sphere was in her home where she will be sadly missed by her husband and daughters. We extend to them today our heartfelt sympathy and we rejoice with them this Easter tide in the Christian's hope of a glorious immortality.

DESPONDENT MAN SUICIDES

Wilbert Field, residing on the 8th line of Metcalfe, committed suicide by hanging. Field went out to his chores as usual while his wife prepared breakfast. As he did not return she went to the barn and was horrified to find his body suspended from a beam in the shed roof. Life was extinct. He was 30 years of age and is survived by a widow and one child. Prior to taking up farming he had been employed by E. Rowland & Co., private bankers, of Strathroy.

SCHOOL REPORTS

S. S. No. 3, Ekfrid
Sr. IV.—Gilbert Stevenson 71, Willie Campbell 70, Weldon Lockwood 68, Evan Corneille 68.
Jr. IV.—Eva Johnson 53.
Sr. III.—Chester Lovvood 68, Jean Johnson 67, Billie Brown 67, Betty Wayman 59, John Johnson 58, Willie Tanner 57.
Sr. II.—Dorothy Campbell 55, Bert Corneille 52, Melvin Huston 50, Clara Huston 51, Harold Corneille 50.
Primer.—James Tanner.
Mrs. Keith Black, Teacher.

Tanlac is a splendid tonic for puny, frail, delicate children. It is purely vegetable and contains no minerals or opiates.—P. E. Lumley.

A Prime Dressing for Wounds.—In some of Metcalfe's workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

THE MYSTERY OF THE GREEN RAY

By William Le Queux

CHAPTER XVII.—(Cont'd.)

"We're certainly learning something," said Dennis, as he finished. "Obviously, it's very suspicious of somebody, but it's not Hilderman. He writes as if he were pretty sure of himself. Probably he has proved his theory about Hilderman being a Government detective."

"I have a message for Mr. Ewart, sir," the messenger interrupted. "You had better tell it to me," Dennis suggested.

"I'd rather Miss McLeod asked me," McKenzie demurred. "Those were Mr. Ewart's instructions. He said 'fail Mr. Ewart, insist on seeing Miss McLeod.'"

"Very well," laughed Myra. "I quite appreciate your point. May I know the message?"

"Mr. Ewart was to take no notice whatever of anything Mr. Ewart said in his letter about Mr. Hilderman. He was on no account to trust Mr. Hilderman, but to be very careful not to let him see he was suspected. The gentlemen were always to wear their glasses whenever they were in sight of the hut above Glas—above Mr. Hilderman's house."

"Whew!" Dennis whistled. "But why didn't he—? Oh, I see. He has afraid the letter might fall into Hilderman's hands."

"I wonder where Ron can have got to?" Myra mused wistfully.

"We're very much obliged to you for all the trouble you have taken, Mr. McKenzie," said Dennis. "You've done very well indeed."

"Oh, Mr. Ewart also said that Miss McLeod was to put on her glasses by the red light."

"Yes, that's important," Dennis agreed. "We'll go up to the house now, shall we, Miss McLeod?"

"Yes," said Myra, "and Mr. McKenzie must come and have a meal and a rest, as I'm sure he needs both after his journey. I'll send Angus to look after the boatman." So the three stroiled up to the lodge.

"By the way," said Dennis, "of course it's all right, and you've carried out your instructions to the letter, but how can you be sure this is Miss McLeod, and how do you know I'm not Hilderman?"

"Mr. Ewart described everybody I should be likely to meet," McKenzie replied, "including Mr. Hilderman and Mr. Fuller. I know you are Mr. Ewart's friend because you have a small white scar above your left eyebrow. So, being with you, and wearing a shade and an Indian bangle, I thought I was safe in concluding the lady was Miss McLeod."

"Garnes doesn't seem to miss much!" Dennis laughed.

"He made me repeat his descriptions about twenty times," said McKenzie, "so I felt pretty sure of myself."

When they got up to the lodge, and the messenger's requirements had been administered to, Dennis unpacked the parcel. The spectacles proved to be something like motor goggles; they fitted closely over the nose and forehead, and entirely excluded all light except that which could be seen through the glass. The only curious thing about them was the glass itself. Instead of being white, or even blue, it was red, and the surface was scratched diagonally in minute parallel lines. Myra and Dennis hurried upstairs and lighted the lamp in the dark-room. When the girl came down again she declared that she could see beautifully. Everything was red, of course, but she could see quite distinctly.

"Have you any idea why these glasses are ruled in lines like this?" Dennis asked McKenzie.

"I couldn't say for certain, sir," the youth replied. "But I should think it was because Mr. Garnes thought the glasses would be so near the eye as to be ineffective. In photography, for instance, you can't print either bromide or printing-out paper in a red light. But if you coat a red glass with emulsion and make an exposure on it, you can print the negative in the usual way. I don't know why it is."

"Perhaps there is no space for a ray to form," Myra suggested.

"You must tell Mr. Garnes how deeply grateful we all are to him," said Dennis. "I'll give you a letter to take back to him. It has been a wonderfully quick bit of work!"

"I should think he has got some hundreds of the glasses finished by this time," said McKenzie, "and he has already asked for an estimate for fifty thousand of them."

"Whatever for?" Myra exclaimed.

"I couldn't say at all, but Mr. Garnes probably has all mapped out. He always knows what he's about."

A couple of hours later McKenzie left for Glenelg, with ample time to catch his boat, and the others sat down to lunch. Myra was delighted that she

could see, even though everything was red. Just as they had finished lunch a telegram was delivered to Dennis. It was handed in at Mallais, and it read: "Don't worry about me. May be away for a few days.—Ewart."

"Oh, good!" exclaimed Dennis. "A wire from Ron. He's all right. 'Don't worry about me. May be away for a few days.' Sent from Mallais. He may have got something he feels he must tell Glas about, and has gone to Glasgow."

"I expect that's it," Myra agreed. "I'm glad he's home. I do hope he'll write from wherever he is to-night. Do you think I shall get a letter in the morning?"

"Certainly not," Dennis vowed, laying the telegram on the mantelpiece. "It's sure to write, however busy he is."

Though Myra was disappointed that there was no personal message for her, she tried to believe that everything was all right. Dennis went to what he called coastguard duty, and watched the sea and shores with the untiring loyalty of a faithful dog. That night, after dinner, he went out to keep an eye on things, and left Myra with her father. She has told me since that she felt miserable that I had not wired to her, and went to fetch my telegram in order to get what comfort she could from my message to Dennis. She held the telegram under the light, and read it through. The words were: "May be away for a few days.—Ewart." She made out the faint pencil writing slowly through the red glass. She read it twice through, and then suddenly collapsed into an armchair in the horror of swift realization. "Ewart!" she whispered. "Ewart! He would never sign a telegram to Mr. Burnham in that way. If Ronnie didn't send that wire, who did?"

In a moment she jumped to her feet. She must act, and act quickly.

She ran into the den, and picked up the revolver and cartridges which Garnes had sent, and which she had put carefully away until I should come and claim them. She loaded the revolver, and tucked it in the pocket of the Burberry coat which she slipped on in the hall. Then she tore down to the landing-stage, and made straight for Glasnabinnie in the Jenny Spinner. She had got about half a mile when Dennis, coming up to the top of the cliff on his self-imposed coastguard duties, saw her and recognized her through his binoculars.

He ran down to the landing-stage, putting on his red glasses as he went. His horror was complete when he found there was no craft of any kind about, not even a rowboat. Alas! I had idly allowed the dinghy to drift away. He ran along the shore, every now and then looking anxiously through his binoculars for any sign of any kind of boat that would get him over to Glasnabinnie in time to fulfil his promise of looking after "Ron's" little girl.

Myra has since admitted—and how proud I was to hear her say it—that she forgot about everything and everything except that I was in danger, and probably Hilderman knew something about it. She had thought of how to hold the pistol to his head and demand my safe return.

She came ashore a little beyond the house, having made a rather wide detour, so that she should not be seen. She knew the best way to the hut, and there was a light in it. She thought Hilderman would be there. She had passed well to seaward of the Fiona, and noticed that she was standing by with steam up. Myra climbed the hill to the hut with as much speed as she could.

Hilderman was standing below the door of the smoking-room talking to three men. She knew that she would have no chance, even with a revolver, against four men. She might hurt one of them, but she recognized, fortunately, that the others would overpower her.

Eventually Hilderman went into the hut, and two of the men stayed outside talking. The other went down the hill. It was in watching this man that Myra saw the sight that had astonished her, the continuous stream of lights down the bed of the burn.

She waited so long she said it seemed, for hours and hours, before she could see a real chance of attacking Hilderman. Indeed, neither she nor Dennis can give any very clear idea precisely how long it was that she waited there, but it must have been a considerable time. At last Hilderman was alone. Myra crept to the edge of the little plateau on which the hut stood, and then made a dash for the door. She thrust it open and stepped inside, pulling it to behind her. Hilderman sprang to his feet with an oath as he saw her.

"Heavens!" he cried. "You!"

Myra drew the revolver and presented it at him.

"Put up your hands, Mr. Hilderman," she said, with a calmness that astonished herself, "and tell me what you have done with Ronnie—Mr. Ewart."

"I must admit you've caught me, Miss McLeod!" Hilderman replied. "I can only assure you that your fiancé is safe."

"Where is he?" Myra asked.

"He is quite close at hand," Hilderman assured her, "and quite safe. What do you want me to do?"

"You must set him free at once," said Myra quietly.

"And if I refuse?"

"I shall shoot you and anyone else who comes near me."

"Now look here, Miss McLeod," said Hilderman, "I may be prepared to come to terms with you. If you shot me and half a dozen others it would not help you to find Mr. Ewart. On the other hand, it would break up the family, and I have no wish to harm Mr. Ewart. If I produce him, and allow you two to go away, are you prepared to swear to me that you will neither of you breathe a word of anything you may know to any living soul for forty-eight hours? I think I can trust you."

Myra thought it over quickly.

"Yes," she said, "if you will. But she never finished the sentence. At that moment someone caught her wrist in a grip of steel and wrenched the pistol from her."

"Come, come, Miss McLeod," said Fuller, "this is very un-neighbourly of you."

Myra looked round her in despair. There must be some way out of this. She cuddled her brains to devise some means of getting the better of her captives. Fuller laid the pistol on the table and sat down.

"You need not be alarmed," he said. "We shall not hurt you. You will be left here, that is all. And we shall get safely away. After this we shall not be able to leave your precious lover with you, but Hilderman insists that he shall not be hurt, and we shall take him to Germany and treat him as a prisoner of war."

(To be continued.)

Spring and Summer Forest Fires.

There are usually two periods of fire-hazard in the Canadian forests, in early spring just after the snow disappears, and in late summer, when the vegetation has begun to get dry.

Exceptional seasons vary these periods, but the two classes of "spring fires" and "summer fires" remain.

Many people understand why the dry, hot period of late summer is likely to be favorable to the starting of forest fires, but they think that, after the heavy snowfall of winter, the woods ought to be safe till early summer at least. A little reflection, however, will show why the early spring period is particularly dangerous.

In early spring there is often a short period of hot, bright days. The leaves have not yet come out and the sun shines down through the leafless branches directly on the forest floor. The snow disappears as if by magic and the dead twigs and last year's leaves become as tinder. If a glowing match or cigarette stub is dropped among this material the forest floor is ablaze over a space of many yards in a moment. A few days at this period are always most critical. After the first spring rain the ground vegetation becomes green and damp, and the leaves come out and shade the forest floor. The worst danger is then over, until the hot days of late summer cause the vegetation to dry out, when a danger period ensues which lasts till the first autumn rains.

The moral of it all is that Canadians ought always to be careful with fire in the forest and doubly careful during these danger periods.

Women Can Dye Old Faded Things New in Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

She Knew.

A Philadelphia school teacher was quoting to her pupils the sayings of various wise men touching the value of silence on certain occasions, when she gave them the proverb to the effect that we have one mouth and two ears, in order that we may listen twice as much as we speak.

A day or so after the instruction, the teacher, to see how well the lesson had been learned, asked a girl pupil the question, as above.

Little Lulu had forgotten the philosopher's maxim; but the question did not seem a difficult one to answer.

"Because," she said, "we should not have room in our face for two mouths, and we should look too crooked if we had only one ear."

"No, Lulu," said the teacher, "that is not the reason. Perhaps Marie can tell us."

"Yesum," said Marie, "it's that way so we can let what we hear go in at one ear and out at the other!"

"Every little helps" is all right for those with little, and all wrong for those who have much.

Woman's Interests

Play No Favorites Among the Children.

Most parents declare that they love one child just as much as the other, and that they have never made any difference in the treatment of their children, yet they can see that other parents have been most unfair and unkind to their offspring in the matter of family equality.

The most glaring inequalities in their ideas of justice and rights for their own children often pass unnoticed, regardless of the turmoil and strife such inequalities call forth, and ignoring the fact that partiality is responsible for a large percentage of family quarrels.

In the ideal home each and every child is treated fairly throughout its life, but ideal homes are not always the rule. If parents would look back on their own childhood, remembering the bitter heartaches caused by partiality, they would make fewer mistakes in their own homes. Parents who desire peace and harmony now, and a binding tie between their children after the parents have passed from earth, should found their homes on the basis of equal rights for all and special privileges for none.

Some years ago it was customary for the whole family to pinch and save in order to educate the brightest son and send him forth on a professional career. "We ought to have one gentleman in the family," was the slogan of those who denied themselves comforts to lay by money for the one thought to be the most worthy of an education. Happily, that idea has about died out; and, in order to be fair and just, fathers and mothers who educate only one child give to the other children the amount of money which the college education represents. If one son chooses to become a doctor and another a farmer, the farmer should have the same amount, year by year, for his farming venture as is paid out for college expenses. Farming is just as much of a profession as is "doctoring," and intelligent people no longer believe that farming is a good occupation only for a person of low mentality.

A man who had had a hard struggle in youth, but found himself in comfortable circumstances later in life, married the second time. His first wife had died when the children of that union were still young, and he had sent his sturdy sons and daughters to homes of their own with scant equipment and very little education. He had a frank and fair talk with the woman he married as to the rights of his dead wife's children, and with her full knowledge and consent he gave the children secure as to their property rights. In consequence, the step-mother was cordially received by the children, all of whom were anxious that their father should have a comfortable home. In time other children were born, but there was never any discord over the fact that these children could be educated and clothed in a style unknown to the older ones. The father, who desired to be fair and just to all, made it a point to share his prosperity with each and every child to the end of his days, and thus bound all together.

ly little things, in paying the friendly tribute that means so much, doesn't it?

"Of course, I've always had a warm, kindly feeling for the old town and the people, but I hardly supposed they had kept track of me, or followed my career. By the way—er—er—do you happen to recollect the wording of the tablet?"

"Yes. It says, 'Main Street.'"

Love of Home.

This fond attachment to the well-known place

Where first we started into life's long race,

Maintains its hold with such unfailing sway.

We feel it 'e'en in age, and at our latest day.

—William Cowper.

WHITE Shoe Dressing

CAKE OR LIQUID

Germs in Desert Sands.

The territory known before the war as German Southwest Africa is of little value to the British, who have acquired it, inasmuch as it is mostly desert. It does, however, produce many diamonds, which are picked up in the sands along the coast.

The desert diamonds have evidently been distributed by water and wind, and doubtless were brought from a not-distant source by ancient and vanished rivers. Presumably they were originally derived from volcanic "pipes," like those which produce diamonds in the Kimberly field of South Africa. Experts are inclined to think that all of them came from a single pipe, because they are so much alike in quality, appearance and crystallization. In the Kimberly field the diamonds from no two pipes are alike. Accordingly, an anxious search is being made for the source of the stones. Pipes, a number of them, have been found, but, alas! none of them contains any diamonds.

The Britannia (B.C.) Mining and Smelting Co. is erecting a new crushing mill with a capacity of 2,500 tons of ore per day.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Three hundred and fourteen pilots are employed to guide the more than 44,000 ships which pass in and out of the port of London every year. The profession is a most lucrative one, the average yearly earnings of the pilots being between five and six thousand dollars.

How to Exercise.

For preserving health and prolonging life exercise is as indispensable as breathing, eating and sleeping. The right kind of exercise properly performed aerates the blood, strengthens and regulates the heart, quickens the circulation, promotes the excretion of the poisons formed in the body and gives tone to all the organs and tissues.

The most suitable form of exercise to take depends more or less upon environment, occupation and individual taste. The man or woman who is compelled to remain in the city is necessarily deprived of certain forms of exercise that are easy for a person living in the country, and the man who is at his desk the entire day usually cannot take the same kind of exercise as the man, equally hard working perhaps, who is able to alternate his hours of work and of relaxation. The form of exercise selected must be congenial; otherwise it will probably fail in its object.

Exercise should always be taken in the open air—if not out of doors, at least beside an open window. That is the first and most important condition. Moreover, the form of exercise should be such as to bring a large number of muscles into play at once and to move all the large joints, including the spine. It should not demand complicated movements that require much skill. A person who is compelled to exercise indoors can easily devise a schedule that will include swinging the arms in various directions; flexing and extending the elbows; bending forward, backward and sideways with the hands on the hips, and raising first one leg and then the other; keeping the feet together and twisting the body to the right and to the left; moving and twisting the head in every direction.

The best exercise possible is walking briskly and breathing fully and deeply, with head erect and arms swinging. The distance walked should be at least two miles a day—four or five would be better,—and if the walk (not stroll) can be taken with an agreeable companion so much the better, for the conversation will promote deeper breathing and relieve the monotony that some people find in solitary walking.

Tree-Line Advancing Westward.

What has happened in the United States middle west is also happening on the Canadian prairies, namely, the tree-line, which fifty years ago was located a comparatively short distance west of the Mississippi and Red rivers, has advanced several hundred miles into what was formerly the bad prairie. The line has not moved forward bodily but "islands" and groves of trees are to-day to be found like outposts in districts, where there were formerly no trees. This is believed to be due to the fact that the progress of settlement has stopped, more or less completely, prairie fires and given the trees a chance. Progress westward has been slow because the prevailing winds are from the west, and tree seeds are carried largely by wind. In the last fifteen years, however, the rate of advance has been more rapid largely because of the more determined fight against prairie fires. Trees are now spreading southward from the well established forest along the Saskatchewan. In addition to this natural process of forest growth, individuals and communities have planted groves all over the west. The Dominion forest nursery station at Indian Head has sent out over sixty million trees to forty thousand farmers in the last twenty years, and this with civic and school planting is helping to change the appearance of the prairies.

Bird's Record Flight.

A black-headed albatross, starting from a small solitary island near Japan, followed the steamship Wernat-choe across the North Pacific for six days and seven nights.

A too hearty breakfast tossed to it by a passenger caused the albatross to turn back on the seventh morning after it had escorted the vessel for three thousand miles.

The Wernatchoe is a new boat, and in the open sea averaged seventeen knots per hour, but the storm bird did not tire. It flew in great circles round the steamer, and because of its peculiar black head in contrast to the natural silver-white plumage, it was easily distinguishable from the other albatrosses in the wake of the big ship.

The wind one stormy day roared in a gale, beating the ship with snow, hail, and rain, but despite the troubled elements the albatross continued to fly alongside, sometimes screaming shrilly. Many on board believed the bird alighted in the rigging at night, but the crew at the watch declared they observed the albatross flitting at intervals through the rays of the cabin's lights.

Meat and bread tossed to the bird during the day were picked up from the waves without the great wings being furled.

314 Pilots Guide 44,000 Ships to London Each Year.

EUROPEAN PEACE PACT FOR TEN YEARS FRAMED BY LLOYD GEORGE

Thirty-four Nations to Subscribe to Terms Forbidding Any Aggressive Action During Stated Period—Two Serious Obstacles in Way of New Treaty.

Genoa, April 23.—Between solving crises Lloyd George has got his European pact guarantee well under way.

As it stands now this is the treaty to be signed by all 34 nations here, promising that for a period of ten years it will not permit any aggressive action.

No sanctions are provided. Like the Washington Treaty, it is based on international morality.

It is Lloyd George's idea that this will lay a firm foundation for a disarmament in September at Geneva by the Assembly of the League of Nations.

In the covenant of the League the members pledge themselves against aggression, but Germany and Russia are not members, and, in addition, the British Premier seems to think that a definite limited reiteration of this pledge can do only good.

The Russians have signified their willingness to sign a promise of no aggression if it is also signed by all their neighbors. The Germans have no objection.

There are two serious obstacles yet to be surmounted before the treaty can be drafted. One of these difficulties is the French and the other the Japanese. The French want the pact

fixed so that it will not bar military action to enforce the Versailles Treaty, as, for instance, occupation of the Ruhr in case of default by Germany on reparations.

A clause covering this point is being studied out, several tentative drafts having been written.

Other difficulties are born out of the presence of the Japanese in Siberia. The Russians demand that the Japanese get out, or at least they want promises against further aggression.

The British Government is in entire accord with this point of view. It will be remembered that at Washington Baron Shidehara said that the Japanese were negotiating with the Chita Republic at Dairen for a withdrawal from Siberia, and expressed the opinion that these negotiations were coming to a successful conclusion. But since the Genoa Conference opened the Dairen conversations have been broken off. This naturally does not decrease the difficulties of smoothing out that end of the Lloyd George peace pact.

The British Premier is thoroughly confident, however, that within the next ten days the pact will be in final shape. The two difficulties mentioned appear to be the only barriers to be surmounted.

EXPLOSION BLOWS 2,000 PERSONS TO PIECES

Victims Mostly Children and Soldiers in Monastir, Southern Serbia.

A despatch from Belgrade says:—Four hundred carloads of ammunition and explosives stored near the railroad station at Monastir, Southern Serbia, exploded on Tuesday at noon, killing several hundred persons, wounding thousands, and virtually destroying the heart of the city. One half of the city's population was rendered homeless.

The victims were mostly children and soldiers. A church in which the children were worshipping collapsed under the detonation, while the barracks in which 1,800 soldiers were having lunch was destroyed.

Immediately after the explosion fire broke out in various parts of the city. The panic-stricken inhabitants fled to the nearby woods and mountains, from which they watched their homes burn. All telegraphic and telephonic communication from Monastir with the outside world was cut off. The first news of the disaster reached Belgrade from refugees who managed to reach Priep, 30 miles to the northwest of Monastir. Several Serbian relief units were immediately organized and started for Monastir.

Details of the explosion in Monastir reveal that fire which swept the city following the blast has made 30,000 homeless.

Thousands of tons of munitions left over from the world war mysteriously blew up and latest reports say that 1,800 soldiers, mostly Greeks, were virtually buried alive.

Two hundred children are reported to have been killed or wounded in a church which was destroyed when a shell, tossed from the scene of the explosion, landed on the steeple.

All the leading cities of Greece are sending supplies and medical aid to Monastir.

King Alexander has decreed a day of mourning throughout Yugoslavia. The Cabinet has ordered that a commission of army and Government experts make a strict investigation to fix responsibility for the disaster, which in some quarters was attributed to enemies of the State.

Germany Pays Instalment on Reparations

Paris, April 23.—The German Government yesterday paid the Reparations Commission the first monthly instalment on the new schedule of payments fixed by the Commission on March 21, in pursuance to decisions of the allied Finance Ministers. The instalment paid was 18,000,000 gold marks, and subsequent payments are to be fifty million gold marks monthly.

CANADA LOSES GIFTED YOUNG AUTHOR

Miss Marjorie Pickthall, Prose and Verse Writer, Dies in Vancouver.

A despatch from Toronto says:—The funeral of the late Miss Marjorie Pickthall, the brilliant young novelist and poet, who died suddenly in Vancouver on Wednesday, was held from the residence of her father, Mr. Arthur C. Pickthall, Toronto, interment taking place at St. James' cemetery.

Miss Pickthall was not a Canadian by birth, although she came to this country when a small child and lived here for the greater part of her life. She was born in London, England, in 1883 and came to Toronto at the age of seven. She was a pupil at the Bishop Strachan School, later at the St. Mildred's Church School, and a student at Victoria University. At the age of fifteen Miss Pickthall sold her first story to one of the Toronto newspapers and in 1913 she published her first volume of poetry, "The Drift of Pinions." Later she wrote "The Lamp of Poor Souls," her poetry being of an exquisite nature. Her work received great tribute from the critics, Clement Shorter, of England, giving high praise to "The Bridge." Much of the local color from this story was secured from a summer spent at Toronto Island. It is now running in its third edition. Mr. Archibald MacMechan, of Dalhousie University, said of this book, "For twenty years I have been a watcher of the skies for the appearance of new stars, in that time only four have appeared, the greatest of whom is a woman, Marjorie Pickthall." In all her work Miss Pickthall has truly and beautifully interpreted Canada.

The news of her early passing has come as a great shock to the many who knew her in Toronto, and the Dominion contains a distinct loss in the death of this talented young writer. Never before has the work of a Canadian novelist attracted such world-wide attention and her death came at the moment of her most assured triumph.

Russia Offers to Pay Debt of 70 Cents
Santiago, April 23.—Chile is the first country to feel a direct benefit from the Russo-German treaty signed at Rapallo. Immediately after the signing of the treaty, it was announced that the Soviet had sent a wireless message to the Chilean Government offering to pay the debts owed Chile and asking how to remit. The message was signed "Moscow," Commissary of the People, "Mordov." The debt totals seven francs (\$70), which the Government owes for a radiogram.

THE HISTORIC BOAT RACE
The two crews, Oxford and Cambridge, photographed after passing under Hammersmith Bridge with Cambridge in front. The race finished with a win for Cambridge by four and a half lengths.

DEMAND ARREST OF ELEVEN GERMANS

Allied Ambassador's Note Holds Germany Responsible for Laxness.

A despatch from Paris says:—The Allied Council of Ambassadors has sent a note to the German Government, asking for the immediate arrest of eleven men whom the allied commission in Upper Silesia hold responsible for the disorders in Detersdorf, January 30, when two French soldiers were killed and 20 wounded.

A list of twelve men was supplied to the German Government by the allied commission, only one of whom has been arrested, according to General Leronde's report to the Ambassadors' Council on Friday. The note to the German Government adds that the men charged with responsibility for the incident must be turned over to the Inter-Allied Commission for trial. The note, which is rather sharply worded, implies that Germany is not making serious efforts to apprehend the alleged murderers.

Irish Factions Reach Agreement

London, April 24.—An agreement has been reached between the military leaders of the Republican and Free State forces in Ireland, says a despatch to the Westminster Gazette from Dublin, which will constitute the basis for peaceful arrangements in connection with the future policy of both sides and profoundly influence events in Southern Ireland for the better.

The correspondent says he understands that hostilities between the rival forces are to cease, although the political issue between the two parties is not affected.

Scientists Produce Rustless Tinplate

A despatch from London says:—Experiments of a far-reaching nature are being conducted in the tinplate works at Swansea with the object of substituting nickel for tin in the coating of tinplates. A company has been formed to deal with the invention, which is known as the Steel-Nickel Syndicate. A prominent member of the syndicate is Henry Mond, son of Sir Alfred Mond. Production of rustless plate is aimed at.

The marriage of Princess Mary helped the restoration fund of Westminster Abbey. Some of the moving picture men paid as much as \$5,000 apiece for choice places from which to photograph the bridal procession.

Exiled Austrian Royalty Returns to Hungary

A despatch from Vienna says:—The Imperial shooting lodge in Godollo, 15 miles north-east of Budapest, is being prepared for former Empress Zita and her family, according to Budapest advices received here. Admiral Horthy, the Regent, is vacating his suite in the magnificent castle at Godollo, and the guard quartered there and the former royal servants have been re-engaged.

The former Hungarian ruler maintained at Godollo a magnificent castle, with an extensive park and zoological garden.

\$5,000,000 MONTHLY ON BRITAIN'S DEBT

Total Amount Owning Canada is About \$130,000,000.

A despatch from London says:—The British Government has agreed to pay off Britain's war debt to Canada at the rate of \$5,000,000 per month. The total amount owed is about \$130,000,000, which was the balance due after the respective accounts covering war purchases and other transactions were set off against each other. The British Government desired to discharge this debt at the par rate of sterling exchange, but with this proposal the Canadian Finance Department did not see eye to eye. It has been agreed that this dispute is to be left in abeyance at present, and it is possible that the gradual recovery of sterling will minimize if not obliterate the cause of contention before the time for the final adjustment is reached. The monthly payments of \$5,000,000 each are to be made in the interim and this arrangement is already in operation. Canada is perhaps the only one of the Dominions which is in the fortunate position of being a creditor of the Mother Country, most, if not all the others, being debtors for considerable amounts.

Dominion's National Parks Net Huge Income

A despatch from Ottawa says:—The national parks in Canada last year brought \$18,000,000 into Canada through tourists, according to an estimate given by Hon. Charles Stewart, Minister of the Interior, when his main estimates were being discussed. That was twenty times the expenditure on them, and he thought the people of Canada should appreciate it and the work of the officials responsible.

Canada From Coast to Coast

Halifax, N.S.—Nova Scotia obtained a harvest from the sea last year valued at \$9,000,000, according to the report of the Commissioner of Fisheries. In the deep-sea fisheries in 1921 there were employed 396 schooners, carrying 3,000 men; and in the shore fisheries there were 4,702 boats of less than ten tons, operated by 12,000 men and boys. Big decreases were recorded in the catch of cod and lobsters, but there were gains in mackerel, halibut, swordfish and smelts.

St. John, N.B.—A game reserve to extend from St. John to the St. Croix river and to comprise between 300,000 and 400,000 acres is proposed. This section is plentifully stocked with game and is intersected from the sea by six rivers and innumerable smaller streams and lakes in which fish abound. The Provincial Government has promised favorable consideration of the scheme, and it is believed that if carried out the game reserve should be of great attraction for tourist travel and be of value to the city and province both.

Quebec, Que.—The present maple sugar season is reported to be the best experienced in the last quarter of a century. Those who tapped in the first week of March had two weeks of ideal sugar weather, and whilst the last two weeks of March were not ideal there was much good sugar made.

Hamilton, Ont.—Contracts for the erection of ten bridges for the new James Bay extension of the Temiskaming and Northern Ontario Railway, are reported to have been secured by the Hamilton Bridge Works Co. The bridges will cost \$175,000, and when work is started on them, the company's east end plant here will be re-opened and one hundred men put to work.

Winnipeg, Man.—A fleet of five flying boats will likely be employed in Northern Manitoba during the coming summer to patrol forest areas for the detection of fires. Government agents who pay the annual treaty monies to the various Indian bands scattered throughout remote parts of the province will also travel by airplane, and thus will be able to accomplish in five or six days the work which formerly required several weeks.

Regina, Sask.—Binder twine in Saskatchewan represents an investment of millions of dollars by the province's farmers at harvest time, and the Regina branch of the Saskatchewan Grain Growers is asking that a binder twine factory be established at the provincial penitentiary at Prince Albert. Not only does the branch want inquiry made into the feasibility of this establishment, but consider the advisability of utilizing prison labor in the manufacture of farm implements.

Edmonton, Alta.—Pupils enrolled in Alberta public schools total 124,328, with 3,301 school districts operating and 5,820 teachers employed. There are 68 consolidated school districts. Eighty-six new districts were created last year and the school library branch of the Department of Education distributed 51,170 books among the various schools.

Victoria, B.C.—Nearly 300,000 fruit trees, berry bushes and fruit tree seedlings have been brought into British Columbia so far this year for planting out on new orchard land, according to figures compiled from inspectors' reports by Dr. Warnock, Deputy Minister of Agriculture for this province.

Prince Rupert, B.C.—In spite of bad weather and other adverse conditions for fishing, the halibut catch off the British Columbia banks amounted to 1,602,000 pounds in the month of March, nearly three times the volume of the catch for the same month last year.

Dawson City, Y.T.—The spring thaw is on in the Yukon and the last stage to travel on sleighs has left. Yukoners have been returning from the "Outside" in large numbers. Lumber and building material is shortly to go down to Mayo in large quantities. Wharves, warehouses, stores and residences are to be built in the Silver Bonanza district as soon as weather permits. There is also to be considerable development in Dawson.

Weekly Market Report

Toronto.
Manitoba wheat—No. 1 Northern, \$1.57 1/2.
Manitoba wheat—No. 2 CW, 59c; extra No. 1 feed, 55c; No. 1 feed, 56c.

Steers, 1,100 lbs., \$7.25; calves, \$5.50 to \$6.50; hogs, select, \$14.25; sows, \$11.25.
Stopped Two Minutes.
Prof.—This is the third time you have been late. Don't you know you can't stay the night of time?
Fresh—Oh, don't know. I just stopped a couple of minutes down the street.
You are unjust to yourself when you are unjust to others.

Seed Elevators For Farmers' Clubs

During recent years inquiry has increased for blue print plans of a small capacity seed elevator suitable for operation by farmers' clubs. Accordingly, a study was made of the subject, and data gathered and supplied the Chief Architect, Public Works Department, who, in turn, has completed a set of plans and specifications. These should prove sufficient for an elevator contractor to build from, including the placement of necessary machinery.

The complete set includes five pages of blue prints and a manuscript of specifications and legal forms, the latter having to do with tendering on the construction of the elevator. This set is now available to the public on application to the Seed Commissioner, Department of Agriculture, Ottawa. A nominal fee of \$2 is charged for each set, and should accompany the application.

This type of elevator should give efficient as well as economical service in handling seed, cleaning to grade, conditioning, bulking, storing, warehousing, etc. It should be particularly adapted to districts where commercial quantities of registered seed grain are produced in addition to other seed crops. The plans allow for 1,000 square feet of warehouse space on the first floor, and sufficient office accommodation. There is a frost-proof basement, which provides about 6,000 cubic feet for storage purposes. It will be seen, therefore, that in addition to handling and storing seed, the elevator may be used satisfactorily for grading, packing, and storing apples or potatoes, grinding grain, or storing merchandise, pending its distribution.

The specifications call for steel and cement construction. This, while it will ensure a practically fire-proof building, may prove more costly than some would care to consider. However, when wood or other materials are used, the plans alone should prove valuable as a guide for building. The elevator is planned so as to be economical in staff to operate it. One first-class mechanic should be sufficient, with temporary help in rush seasons.

The total storage capacity of the bin is estimated at 8,000 bushels. Altogether, 28 bins are provided, 26 of which are comparatively small, each having a capacity of around 200 bushels. The other two bins are much larger, with an estimated capacity of 1,400 bushels each. It will be seen that the number of bins is too many and the total capacity for storage too small to provide first-class service in storing and handling large quantities of commercial grain. On a few localities, however, commercial grain may be handled to advantage, by using the two large bins, which have spout outlets and feed directly to a car when on the track outside.

Every bin has a self-cleaning hopper bottom, and caplugs which either enter into cleaning machines or baggers. Placements are provided for two cleaning machines on the second floor, leaving the first floor totally free for warehousing purposes. These machines may be fed directly from the storage bins above, or by the short elevator leg, which is provided for the purpose.

The seed pit in the basement is designed in two sections, one section which feeds the short elevator leg, the other the long leg, which carries the seed to the bins.

The patent distributor at the elevator head of the long leg distributes seed to any bin as desired. The clean seed runs by gravity from the cleaning machines to two small hopper bins. These are suspended from the ceiling of the first floor, directly under the outlets of the machines above. Both bins are equipped with baggers, but seed from them may be spouted back to either section of the pit. A bag elevator is provided at two bins of the second floor, from which cars may be loaded on the one side, and wagons on the other.

A man elevator of one-ton capacity runs from the basement to the top floor, while a carrier and track is provided on the first floor, to run from the receiving door to the shipping door of the elevator. This carrier also crosses the receiving gates of the pit. Weigh-scales are set in the track, about the centre of the floor.

It is recognized that this elevator may be too small or lack sufficient warehouse space for some localities, in which case adjustment could be made, using the original plans as a guide. Where farmers' organizations have purchased a warehouse or mill, and it is their intention to make alterations with a view to cleaning and storing seed, we believe they may gather much useful information from these blue print plans. It is believed, though, that their greatest value will be derived by those who build in accordance with the plans and specifications themselves.

In having these blue print plans prepared, the Seed Branch is looking to the future of seed production in Canada. The demand throughout North America and Europe for seed grain, clover, and grasses is improving, and it is evident that as soon as the general trade depression lifts, it will increase more rapidly. The grading of our "Northern Grower" seed for export will doubtless continue to be of very great advantage to the marketing of surplus Canadian seed supplies. Department of Agriculture, Seed Branch.

REGULAR FELLERS—By Gene Byrnes

HOW MUCH WEAR SHOULD YOU GET OUT OF A PAIR OF SHOES?

It's the same as the answer to the question "How much water can you get out of a jug?"—It depends on what you put in it.

People are careful with their money today—they want full value for every dollar they spend. There's as great a difference in the lasting qualities in all other lines as well as shoes.

On the surface a poor pair of Rubbers, Shoes or anything else may look as well as the best.

People who make "price" the chief object when purchasing will invariably "get just what they paid for."

This store protects customers

By buying from Manufacturers with a reputation for manufacturing dependable goods, some times our prices may seem a little high by looks, but by real wear they are cheap.

We have no old war price goods to unload. All new Spring and Summer goods at the lowest prices spot cash can buy.

People who have waited for more "reasonable prices" are buying now because the "quality" as well as the price is considered (by men who should know) to be at lowest now for some time.

New Spring Models of a la Grace Corsets

More shipments this week

Linoleums, Carpets, Curtains, Curtain Rods, Window Shades, Cretonnes, Chintz and Drapery Goods.

Clothing of the better kind. Shoes of the better kind. Working Mens Outfits, Overalls, Smocks, Shirts, all down in price with big improvement in quality.

You cannot afford to do without a Hoover Suction Sweeper. Ask those who use them.

MISS ELLA McLEAN

Winner of first prize and gold medal at Glencoe High School oratorical contest, 1922. Miss McLean comes from Frontenac, Elgin county, and is also a leader in athletic sports, as the picture indicates.

HARRY McLACHLAN

Winner of second prize and silver medal in Glencoe High School oratorical contest, 1922.

W. S. Rankin, of Toronto, who sold a motor car to R. Campbell, of Melbourne, which was later found to have been stolen, was allowed to go on suspended sentence when he appeared before Magistrate McKenzie at Glencoe Saturday afternoon. Rankin, who was apprehended in Toronto and brought to Glencoe by Provincial Officer Arthur Palmer, stated that he had purchased the car from another man and did not know it had been stolen when he sold it to Campbell. Rankin promised to make good any loss sustained by Campbell.

Advice has been received at the local post office that the department desires the public to discontinue as far as possible the use of small cards and envelopes, to the use of which the following objections are stated: On small cards and envelopes the cancellation mark frequently falls on the address, partly obliterating it; there is difficulty in sorting and handling; there is also difficulty in putting small envelopes through stamp-cancelling machines, thus causing delay; there is a likelihood that they will fall out of bundles, with a possibility of loss.

Lessons and instructions on how to play baseball are being published in various papers. The best piece of advice in this regard is to play ball as though you enjoyed the game. If this is done, a great deal better playing will result, and the fans will be treated to something entertaining. They will realize they are attending a ball game, not a funeral. Next in importance is "be a sport." If you are winning be cheerful, and if you are losing, be more cheerful. Don't try to lay the blame on someone else. If things go wrong be man enough to accept your share, study how you might do better the next time, and leave it to the other fellow to study out how he can improve his playing. If you play ball with enjoyment you will be in the game all the time from the umpire's "play ball" until the last man is out.

Say it with printing. "It is one medicine that does all that's claimed for it." Thousands have said it about Tanlac and so will you if you try it.—P. E. Lumley.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Studebaker

SPECIAL-SIX
Five-passenger, 50-horsepower
119-inch wheelbase
Non-skid Cord Tires, front and rear wheels

No matter what you pay for a car, you won't find greater satisfaction than you can get in the Studebaker SPECIAL-SIX.

That's why so many people who buy entirely from the standpoint of satisfaction, drive the SPECIAL-SIX.

Satisfaction with a SPECIAL-SIX is due to its dependable chassis, its Studebaker-built body, and the completeness of the equipment.

This equipment includes an eight-day clock, one-piece, rain-proof windshield with parking lights in lower corners of windshield base, and windshield wiper. It includes cowl ventilator controlled from dash, tonneau light with extension cord, transmission lock which is operated by same key that locks the tool compartment in the left front door.

Touring, \$2075; 2-Door Roadster, \$2025; 4-Door Roadster, \$2075; Coupe, \$2050; Sedan, \$2250. All prices f.o.b. Walkerville, Ont.

7 Sutherland 7 Sisters' Shampoo

7 Sutherland Sisters' Hair-Scalp Cleaner

A clean and delightful shampoo is Seven Sutherland Sisters' Scalp Cleaner.

If you are troubled with dandruff or with defective scalp circulation, you are on the path to baldness. You should begin at once—TODAY—to cleanse your hair and scalp with this scientific preparation. Delay means increasing danger of permanent injury to the delicate hair follicles.

Thousands of women all over America, whose hair has been saved and beautified by the use of this preparation, testify to its merits.

Used with Hair Grower

"I find the Seven Sutherland Sisters' Hair and Scalp Cleaner the most delightful of all shampoos," writes a woman whose abundant, lustrous hair is the envy of her friends. "I have used it for years in conjunction with the Sutherland Hair Grower. An occasional treatment with the shampoo keeps my hair in perfect condition, soft and clean."

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—In Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

PERSONAL AND SOCIAL

—Miss Helen Sutherland left on Friday to spend several weeks in Chicago.

—J. C. Elliott, ex-M.P.P. for West Middlesex, is spending two weeks at Atlantic City.

—Mrs. W. R. Macaulay spent the week-end with Mrs. Robert Macaulay, Bothwell.

—Miss Ella Martin, of Alvinston, visited her cousin, Miss Lorna Luckham, last week.

—Miss Minnie Walker was home from Toronto for the week-end to visit her mother.

—D. G. McPherson, postmaster at Rodney, is taking a few weeks' rest owing to ill health.

—Mrs. Fisher, of Toronto, was in town for a few days on a visit to her parents, Mr. and Mrs. R. C. Vause.

—James Wilson has returned from Hamilton, where he was spending the winter with his sister, Mrs. Gillespie.

—V. H. Olley left on Tuesday for Montreal to resume his position with the Canadian Government Merchant Marine.

—Mrs. Chas. Lewitt and children, of Detroit, were at visitors at the home of Mrs. Lewitt's father, Geo. Precious.

—Misses Ethel and Alice Gardiner, of London, are spending a week at the home of their parents, Mr. and Mrs. Peter Gardiner.

—Rev. T. J. Charlton and A. J. Wright were in London this week attending the meeting of the Anglican Synod in Cronyn Hall.

—Miss Mary McDonald has returned to complete her course at the G. B. C. She has been caring for her mother, who has been very ill.

—St. Thomas Times-Journal: Miss Blanche Coulthard, of Glencoe, is visiting her sister, Miss Sadie Coulthard, 91 Kains street, and while in the city is making her home with Mr. and Mrs. J. Reath, 20 Hughes street.

A SPLENDID INVESTMENT

London Advertiser:—"The students of the Glencoe High School had an interesting session in the Opera House there recently, the performance taking the form of an oratorical contest. The speaker winning the first prize took 'Canada's Place in the World,' and the second 'Does Glencoe Need a Carnegie Library?' It will be seen from these two subjects alone that the contestants were talking about serious, worthwhile matters. The school and its officials are to be congratulated for giving such excellent direction to the desire of the young people there for amusement and entertainment. The time a boy or girl spends in developing ability to speak in public is splendidly invested."

SUFFERED YEARS WITH ECZEMA

"Fruit-a-tives" Cleared Her Skin

POINTE St. PIERRE, P.Q.

"I suffered for three years with terrible Eczema. I consulted several doctors and they did not do me any good.

Then, I used one box of "Sootha-Salva" and two boxes of "Fruit-a-tives" and my hands are now clear. The pain is gone and there has been no return. I think it is marvellous because no other medicine did me any good until I used "Sootha-Salva" and "Fruit-a-tives", the wonderful medicine made from fruit.

Madam PETER LAMARRE.

60c a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Born

ABBOTT.—On Saturday, April 22, 1922, to Mr. and Mrs. Frank Abbott, Moss, a son.

MACALPINE.—On Tuesday, April 11, 1922, to Mr. and Mrs. M. A. MacAlpine, Campbellton, a daughter.

Died

TILLSON.—At his residence, Longwoods Road, Wardsville, on Tuesday, April 25, William R. Tillson, in his 73rd year. Funeral service on Thursday, April 27, at 2 p.m., at the house.

Card of Thanks

The family of the late Alexander McAlpine, sr., wish to express their appreciation of the kindness and sympathy extended to them by many friends in their bereavement.

TOWN AND VICINITY

G. Highwood, butcher, has sold his business to Stanley Humphries.

W. J. Ford, of Otterville, has purchased the Glencoe bakery from Mr. Reith.

Got it down in your diary: The first radio concert was announced in the Transcript this week.

Rev. Mr. Murray, of Rodney, will preach in Church of Christ, Moss, on Sunday, April 30th, at 3 p.m.

A new C. P. R. timetable comes into effect next Sunday. Some slight changes are noted in the local train service.

Heavy frosts last week, while hard on the fall wheat and young clover plants, left the soil in fine condition for cultivating.

The Glencoe bridge club held their annual dinner at the home of Mrs. Rose Stuart on Thursday evening. Charades and other amusements featured a most enjoyable evening.

Mr. Reith is moving into James Wilson's large brick residence, Main street, south, and Mr. Ford, his successor in business, will move into the house on McKellar street which Mr. Reith is vacating.

W. B. Mulligan has installed a complete radiophone outfit at his garage, where he and his friends are privileged to enjoy the programs sent out from the radio stations at Pittsburgh, Chicago and other points.

Glencoe bowling lawn is being put in excellent shape and is quite inviting in its new blanket of green. The club expects a larger membership than ever this season and will have local tournaments similar to last year's.

Mr. Lucas, who is moving here from Middlemiss, has bought the building on the corner of Main and Symes streets from the Daughters of the Empire, and will move it onto a lot which he has purchased in the McCracken survey.

Have we to state for the 1001st time that items of news sent by mail must be accompanied by the writer's name or they will not be published. Sending a note signed "A Reader" will not secure insertion. We must know who "A Reader" is.

The funeral of the late Mrs. Henry Huston, of Detroit, will take place from the Grand Trunk station, Glencoe, on Thursday, on the arrival of the 2.55 train. The late Mrs. Huston was formerly Miss Richards, of Caradoc, a sister of E. Richards, postmaster at Nicholson. Her husband died in July last.

The "Thirteen Maes" of Campbellton presented their play, "The Country Minister," to a full house in Glencoe on Tuesday evening of last week. The proceeds were \$75. Splendid music by the McPherson orchestra featured the play which was one of the best that has ever been given in Glencoe by local talent.

A new time table comes into effect on the Grand Trunk on Sunday next. Several changes affecting the local train service are noted. The morning mail train for London will be about 25 minutes later; the noon train westbound will be about 10 minutes earlier, and the night train to London will be about 45 minutes earlier.

Return of income tax for the year ending December 31 must be delivered to the Inspector of Taxation on or before April 30. Along with the return it is required that the individual shall forward at least one-fourth of the amount of taxation for which he is liable, the balance to be paid in instalments due on or before June 30, August 31 and October 31.

Mr. Armstrong, addressing a meeting of the Petrol Board of Trade last week, advocated that a move should be made at once to co-ordinate the efforts of all towns, villages and rural councils to concerted action in a demand upon the Ontario Government to have the road which had been promised to the district by the late Mr. Hanna—from Sarnia south-east on the plank road to the tenth concession, thence east for 15 miles and then south-east to join with the Longwoods road near Glencoe.

SPECIAL NOTICES

Two horses for sale.—Wm. Allin. Small pigs for sale.—E. V. Thornicroft.

28c trade and 26c cash for eggs, at Mayhew's.

Ontario ice cream is the best. Sold at W. A. Currie's.

All accounts due J. W. Edwards have been placed in my hands for collection. Parties owing accounts are requested to call and settle before April 30th.—Charles George.

George Mitchell has bought the agency of The Ontario Farmers' Weather Bureau Insurance Co. from Mac. M. McAlpine and will look after any business in connection with this company.

Strathroy Boy Scout Minstrels coming to Glencoe Friday evening, May 5th, under auspices of St. John's Church Guild. Plan of hall will be open at Lumley's drug store Saturday morning. Admission, 50 cents (not including war tax).

The board of the Elfrid Farm Loan Association will meet for business in the town hall, Appin, on Tuesday, May 9th, at 2 p.m. All farmers desiring loans may procure application forms from Duncan McAlpine, Sec-treas., Box 41, Glencoe.

"The Irresistible Marmaduke," a delightful English comedy, is coming to the town hall Friday, April 28th. It is given by the young people of St. George's Anglican church, London, under the auspices of the Methodist League. Buy your tickets now.

We have an especially good assortment of children's hats in the best styles at lowest prices. Our showing of ladies' sailors, trimmed hats and summer millinery is large and complete. New goods arriving every week.—Keith's Millinery Department.

Miss Glenn, of Glenn-Charles, Toronto, Canada's hair fashion store, will be in Glencoe Monday, May 1st, McKellar House, with a full line of ladies' and gentlemen's hair goods. If you are not satisfied with the appearance of your hair consult Miss Glenn, who is an authority on hair goods and individual hair styles. Free demonstration. Consult Miss Glenn re our herb hair tint for grey hair.

Two good reliable remedies which guarantee results are RAZ-MAH for Asthma and Bronchitis, and T.R.C. for Rheumatism, Lumbago, Neuritis, etc. Sold by H. I. Johnston.

"Adeline" a most fetching dress in very fine quality, good weight, Botany serge; adorned strikingly with a new all-over design of silk braiding; narrow band grille of self material with straight ends; new flare sleeve; dress done up in back... \$14.50

MODERN SHOE STORE

Glencoe

THE LAST CALL!

SHOE SALE 3 DAYS MORE

The last two weeks we have sold many hundred pairs of shoes in Glencoe and for many miles around. The low price is what made the quick turnover, and the last three days we are going to cut the prices lower than ever. Sale ends on Saturday, April the 29th.

Are you looking for service? You'll get it in our store. Shoes repaired while you wait.

NO GOODS OUT ON APPROVAL

If your automobile top is ripped or needs new mica we are at your service to repair it.

Glencoe's Exclusive Shoe Store

AUCTION SALES

Clearing sale of 146 head of stock (the property of Cowal Farmers' Club), at the Farmers' Club Yards, Cowal, on Wednesday, May 3rd. This stock is in fine condition and will be sold absolutely without reserve. Terms: Six months' credit on approved joint notes. Discount at rate of 6 per cent. per annum for cash.—McAlpine & McTaggart, auctioneers.

Wedding cake boxes at: The Transcript office.

BUSINESS CHANGE

Having taken over the GLENCOE BAKERY from Mr. Reith I would solicit a continuance of the splendid patronage accorded his business in the past by the people of Glencoe and vicinity.

Get the Cream of the Trade

"What lovely styles! How do you manage to get all these delightful novelties?" said the new customer as she looked around her.

"I got tired of seeing my customers boarding the trains to buy elsewhere, just because I didn't have some novelty that was being advertised."

"Whenever a new style makes a decided hit, the wholesaler or manufacturer's salesman calls me on Long Distance, and tells me about it, and I order a few."

"I haven't seen prettier veils, smarter stockings or gloves, georgette-crêpes or gingham anywhere. And I see you have the new music, too. How perfectly splendid. They leave me no excuse at all for going up to town to buy."

That's just one of the many things Long Distance does for small-town merchants, enabling Dry Goods, Hardware, Grocery, Paint and Shoe Stores to obtain new styles immediately and cater to the progressive people in their town — the cream of the trade.

Pasture Makes Cheaper Pork.

There is no use quibbling about the value of pasture in producing pork. Tests by the dozen have shown that it is possible, when pasture is used, to produce pork with one-fourth less grain.

As an actual example, let me tell of two bunches of pigs at the Experiment Station. There were ten pigs in each group. One group was fed grain and tankage in a dry lot, and the other had corn and tankage, but was allowed to run on rape pasture.

The pigs on pasture averaged 65 pounds when the test started, and the pigs without pasture averaged 66 pounds a head. In 84 days the pigs on pasture gained 118.7 pounds a head; pigs without pasture gained only 94.9 pounds a head. Every 100 pounds of grain made by pigs on pasture cost \$12.58; grain made by pigs without pasture cost \$13.16 for every 100 pounds. That difference of 58 cents a hundred is not to be sneezed at.

It may be that some people do not use pasture in producing pork because they do not know what kind of pasture crops to use. That question is easily settled.

For a permanent pasture, none excels alfalfa. Alfalfa is a feed of high value, and its abundant and persistent growth produces a vast amount of forage. Alfalfa can not be grown equally well in all sections of the country; but where successful stands can be produced, there is no pasture superior to it. Breeding hogs can be maintained through the summer on practically no grain where good alfalfa pasture, plenty of water and shade are available. A combination of corn and alfalfa pasture is likewise successful for growth in young pigs, also for fattening.

Red clover is a close second to alfalfa. This crop is successfully grown throughout the country, and its adaptability for early summer or fall pasture makes it of great use in a forage rotation. Clover should be pastured before it becomes too mature, in order to secure the maximum use of the crop.

Rye is a good crop for early spring forage. From the standpoint of feeding value, rye does not compare favorably with many of the other crops; however, it finds a place in practically every forage rotation due to the fact that it supplies the earliest possible forage in the spring. The crop should be fall sown.

Rape is one of the most desirable pasture crops available for swine. This crop is desirable for a number of reasons; viz: 1. The cost of seed is com-

paratively small. 2. The crop will stand hard pasturing. 3. The amount of seed required to plant an acre of rape is comparatively small. 4. It will grow until very late in the fall, thus giving it a longer growing season than some of the other crops. It is well to bear in mind, however, that rape will not grow upon barren ground, but that it requires a fairly fertile soil. The crop is quite adaptable. It may be sown several times during the season and thus provides a frequent change of nutritious forage. Rape should be sown at the rate of from eight to ten pounds to the acre when sown alone.

Pigs should be turned on rape when it is eight or ten inches high. This is usually about six weeks after being sown. If they are put in much earlier there is danger of the crop being pastured too closely; but if they are put in much later before being eaten off it becomes coarse and woody and is not relished.

A well-drained piece of blue-grass or June-grass, with a southern slope supplies good early pasture, and also remains green quite late in the fall, but can not be depended upon during the summer. Other crops must be provided, so that a continuous supply will be assured throughout the season.

Oats and field peas are a combination frequently used successfully for hog pasture. This mixture can be sown very early in the spring and furnishes an abundant and luxuriant growth of pasture. The proper rate of seeding for this mixture is one and one-half bushels each of the oats and peas. Seedlings may be made from time to time during the growing season. The cost of seeding with this mixture is greater than that of oats and rape, or rape alone, and the amount of forage secured is no greater.

Soybeans are also a desirable forage crop. This crop is suitable both for a forage and for hogging down after the beans have become fully matured. The fact that soybeans do not grow equally well in all sections and that the cost of seed is sometimes high, makes this crop less desirable than some of the others which cost less for seed, and which furnish just as much forage.

Finally, do not neglect to use pasture because you are not sure which crop to grow, but provide some crop rather than go along producing pork on expensive concentrate feed alone. Provide a succession of crops that will last during the entire season and use the crops known to do best in your locality. Write the experimental farm if in doubt.

Controlling the Pea Weevil.

The Pea weevil causes serious losses to farmers in Canada every year. Some years ago the annual loss decreased, but indications are that this insect is still a dangerous enemy to pea growing. This insect is also giving trouble in the province of British Columbia, and to a slight extent in some other parts of Canada.

The presence of the insect is easily distinguished. The individual peas will show round holes in which the weevil has developed, and from which it has escaped or the beetle might still be confined to its home in the seed. Its presence in a case is indicated by a round spot on the skin of the pea. If the skin is removed over this mark in the spring of the year the full grown beetle is found. Infested peas sown without treatment are certain to produce a weevilly crop.

The seed may be treated by fumigation, the application of coal oil, and the holding over of seed for a second year. The fumigation is perhaps the most easily practiced plan. The substance used is bisulphide of carbon. A convenient method of treating small quantities of seed is to fill an ordinary oil barrel with the seed peas. To treat this quantity of seed would require about five ounces of bisulphide of carbon. This liquid, which is obtainable at a drug store may be poured right on the seed or placed in a shallow receptacle resting on the grain. Then close up the barrel as tightly as possible so as to exclude the air. The covers should remain on for a least forty-eight hours. By this time all of the bisulphide of carbon will have vaporized into a gas heavier than air which settles down through the peas killing all of the insects within the barrel.

Large quantities of seed may be fumigated in tight bins or other well constructed chambers using one pound by weight of bisulphide of carbon to every hundred bushels of seed. Exposure for forty-eight hours as in the case of the smaller quantity is necessary for good results. The bisulphide may be placed in shallow dishes at the top of the bin or chamber. In the preparation of a bin for this purpose the cracks should be pasted over with paper. Strips of felt may be fastened along the top edge where the lid fits down.

It should be observed that the vapor of bisulphide of carbon is highly inflammable. Lights of any kind, should therefore not be brought into contact with it.

Coal oil may also be used in destroying the weevils. About half a gallon of coal oil is sufficient to treat

about five bushels of peas. The oil should be carefully applied while the seed is being shovelled over. The shovelling should be repeated every day for at least four days, for about two weeks before sowing. It should be seen that every pea is moistened with the coal oil.

In Crop Protection Leaflet No. 9, issued by the Department of Agriculture at Ottawa, the Dominion Entomologist describes the insect together with its life history.

This is Clean-up Time.

If the work of cleaning up about the farm premises has not already been done, it is time that the farmer should say to himself and his helpers, "This is clean-up week for us." In going about this annual task, the farmer should put sentiment aside and do a thorough job. The health of the family and the inspiration that comes to every individual in the home from tidy premises make it a hundred times worth while to get everything in its place and all the rest of the things out of sight.

Around many farm homes there is little or no expense outside of the labor connected with the cleaning up of the winter's accumulation of dirt and rubbish, and a small outlay of money in making the usual repairs to fences, gates, walks and buildings will often save much time later when field work is crowding. In addition to getting rid of the rubbish and making repairs, flowers, shrubs and trees can be planted to increase the attractiveness of the home and the farm.

It is a common observation that on farms where old machinery, boards, brush, weeds and a hundred other things have accumulated from year to year, that there is a noticeable lack of the progressive spirit among the members of such homes. This trash is no doubt good evidence that the premises are under the management of some careless person. While this is no doubt more or less true, it should be remembered that the untidiness also exerts a demoralizing influence upon those who are constantly where they must look upon the dire and disorder. Let us, therefore, get the clean-up spirit if it has not already taken possession of us. If this spirit is allowed to function properly we will have more valuable farms and enjoy a happier and better farm life.

Better start applauding the benefactors of mankind that they may have a little show in the public mind with the men who study to scar and cripple the race.

Certified Farm Seeds.

There are few things more disappointing to a farmer than to find that the seed he has sown has failed to come up or has introduced into his land noxious weed seeds. While one can by a very close examination under a magnifying glass determine in a general way the quality and purity of seed, most farmers are unprepared to perform work of this kind. It is equally possible to ascertain by a germination test the vitality of the seed. The Seed Branch at Ottawa with local offices in Toronto, Winnipeg, and Calgary, makes it a part of its business to perform these tests. As seedling approaches, however, there is little time to wait for reports from such examination. There is still another means of ascertaining the value of at least some of the seed that is on the market. The Seed Branch issues certificates of grading, based on sample, more particularly for grass and clover seeds, but to a limited extent also in seed grains. Any farmer or seed merchant who has seed for sale can draw his own sample, forward it to the district seed laboratory and obtain a certificate. The Seed Branch retains the sample and issues a certificate with a serial number. Seed merchants in some cases take advantage of this offer and are thus able to produce official evidence of the value of the seed offered. It is well, therefore, when purchasing grass or clover seed to ascertain whether or not it has been thus tested, and if so to note the grading on the certificate. The purchaser of the seed may, if he chooses, have the grade confirmed by submitting a sample of the seed delivered to the Seed Branch where it is compared with the original control sample on which the certificate was issued. It is seldom necessary to have such a certificate proved, because there are comparatively few seed merchants who would misrepresent the quality of stock that had been officially tested. A few instances have occurred of unscrupulous dealing by submitting for examination a sample superior to the seed stock, and penalties are provided for misrepresentations of this sort.

The Making and Care of the Lawn.

Don't underestimate the importance of a thorough preparation of the soil before trying to establish a lawn. Most of the failures supposed to be due to poor seed are really because of poor soil, poor drainage or both combined.

Don't merely re-seed where grass would not grow before. Most likely the trouble is with the soil.

Don't fail to give a good rolling whenever possible, especially on a new lawn.

Don't cut a young lawn too closely. Don't top dress with fresh manure. It introduces weeds and is very unsightly.

Don't neglect a lawn because you made it right in the first place. Fertilizers are necessary.

Don't spoil a new lawn with light sprinkling. When water is needed, see that the soil is thoroughly soaked.

Fixing up the Neglected Cemetery

BY A. W. ROE.

Neglected rural cemeteries, which are such eyesores, are becoming less frequent. There are still a few cemeteries which need care, however. Often these conditions are due to lack of knowledge of just how to go about fixing up a neglected cemetery. That is why I tell the method used in fixing up a country cemetery in my home county.

The people who were interested in the work got together and organized an association, known as the Mount Pleasant Cemetery Association. It is now the final resting-place for the people through a wide stretch of rural territory; since the association began to make a success of it about twenty years ago, many families, living in a village two miles distant, have sought family plots within its limits.

The writer has a keen recollection of the place twenty years ago. The word that best describes its condition at that time is "wilderness." It was indeed a tangle of young forest growth, clambering grapevines, fierce, scratching blackberry briars and smaller undergrowth. In addition, it was the home of rabbits, snakes, owls, bumblebees, hornets and yellow-jackets. In and among all this wilderness nestled the graves of the country's pioneers. They were gone and, it seemed, forgotten—all but a few, whose relatives still met in the cemetery and "cleaned" off the graves once or twice a year.

There had been a medieval fence about the plot, but it had fallen into decay at most places, except near the gates, which were opened ceremoniously to admit a procession and kept closed at other times, though to keep out what the writer often wondered. Following the custom then prevalent in this section of the country, those families that were financially able usually made provision against neighborhood neglect of a general fence, by enclosing their own family plots with barricades of their own fancy. This gave the yard a still more grotesque and gruesome effect, for the fences were of many and crazy designs. It was indeed a "ghostyard" at night, shunned by young and old alike. That was the condition of the cemetery when the association began its work some twenty odd years ago. After the association became thoroughly organized with its president, secretary, treasurer, membership committee, entertainment committee, grounds committee, etc., it was a jesting remark in the community that the "graveyard" was the liveliest spot in it. It was indeed the truth. A Memorial Day service was instituted in the spring and it is still a social feature in the community. It was the custom, the more they gathered together, the more the rural curtailed their celebrations, for the ladies to give what was known as a "bird" dinner on Thanksgiving—the men killed the quail, and the ladies cooked them and added other delicacies. While these events were largely social in their outward manifestations, they provided means in a very material way for the achieving of various worth-while things in the cemetery itself. Besides the money thus gathered together, there is a membership fee collected annually, and the association collects some funds from the selling of lots. Years ago it was found that it was necessary to add to the original plot of ground, so two acres were bought for a new addition.

The grounds are now well fenced; they have been cleared of undergrowth, thus routing the bees and the yellow-jackets; the excessive shrubbery has been cleared away, thereby depriving the owls of their shelter; the little private burial grounds with their individual fences have disappeared, although in some instances the procedure of removal almost produced a neighborhood war. All graves have been mounded and turfed, and marked with plain wooden markers and grouped into lots, through which roads and pathways wind, edged with flowering shrubs. A beautiful greensward covers the ground and the mounds in summer, and a few evergreens add a touch of variety in the winter. A shelter of quaint design, constructed for accommodating services held in the cemetery, now raises its cupola-shaped roof in a central part of the grounds. A sexton is employed regularly to mow the grass in summer and to give attention to the graves and the fence.

How to Secure a Good Yield of Hay.

While hay yields last summer throughout Eastern Canada were much below the average, rather astonishing results were reached at the Central Experimental Farm, Ottawa, where a five-ton yield was secured on a forty-acre field. The Dominion Field Husbandman gives a description of the methods adopted to bring about such a satisfactory crop. The soil is underdrained and is a kind of sandy loam. A three-year rotation of corn, oats and hay has been followed, the corn land being manured at the rate of eighteen tons per acre. The hay mixture consisted of ten pounds of red clover, two pounds of alfalfa, and the balance timothy. The major portion of the crop consisted of red clover and alfalfa, but the timothy and timothy were used in case the former crops might winter kill. The crop of five tons per acre was taken from three cuttings: the first cut, consisting mainly of red clover and alfalfa in equal proportions, gave three tons; the second cut, consisting mainly of alfalfa, one ton, and the third cut, consisting exclusively of alfalfa, one ton per acre. Such a result surely emphasizes the value of including alfalfa in the usual hay mixture in districts where alfalfa will grow. Alfalfa also improves the fertility of the soil. Although the yield last year of five tons per acre was rather out of the ordinary, the yield for the past ten years at the Central Experimental Farm has been good, averaging 3.37 tons per acre per year.

Getting Rid of Sewage on the Farm.

The safe disposal of farm sewage is a vital necessity. It promotes health, not only on the farm, but often in places where products from the farm are used.

The septic tank should be from fifty to one hundred feet or more from the dwelling. If practicable, locate the tank so that the prevailing winds will blow any odors away from the home. The distribution plot where the sewage is finally returned to the soil should be located down hill from the home water supply, and at least three hundred feet away. Lay all sewers in straight lines and below the frost point and see that they are thoroughly ventilated and the joints made water-tight and protected against the entrance of roots. Before putting in a sewage system consult your county representative or write to the Department of Physics, Ontario Agricultural College.

Farm Records Burned.

Jim's barn burned down the other night, and he was almost suffocated trying to pull the barn door off the hinges. After he came to, one of the neighbors asked him, "Jim, why were you so crazy trying to save that old barn door?" "Well," said Jim faintly, "all my figures for the last five years was right on the inside of that door."

The lime-spreaders is the soil's sugar bowl.

Parents as Educators

Importance of Religious Training—The Sunday School

BY MARY COLLINS TERRY.

No little child should be without religious training, for it is as essential to the balance and beautiful growth of his character as the proper food is to his body. This training can be given in the home and in the Sunday School. Both are excellent means and should supplement each other, for it is when these two institutions work together that the child receives the highest benefit.

Because of the ease with which the child learns, and the capacity to retain even into old age what was learned in childhood, religious training should begin early. Do not say, "Oh, when my boy is old enough to decide for himself I will let him choose his church." You do not leave his manners until then, so why his morals? High ideals and a good moral code are most easily formed in his plastic years.

The child is naturally an imitator and hero worshiper. The stirring stories of Bible heroes and the application of the truths of the great old Bible stories go far toward helping him formulate the rules which are to govern his own actions now and in later life.

The parents in the home are the ones whose high privilege it is to begin their children's religious training, and day after day she listened to Mr. Redbird as he sat on a branch and sang to her to keep up her courage, for soon there would be some tiny baby birds in the nest.

"How very handsome Mr. Redbird looks in his scarlet suit, with the black sleeves and black coat-tails!" Mrs. Redbird thought; and, sighing, she looked at her own dull dress of greyish green.

"Wouldn't I just like a bright pretty dress to match my husband's," she said wearily. "I'll dress the children that way, anyhow, when they hatch."

Poor, tired little Mrs. Redbird settled herself as comfortably as she could over the eggs and listened to the leaves rustling around her. Mr. Redbird had stopped singing and flown away; she felt very drowsy, until suddenly she heard the leaves saying:

"Why, how gaily you are dressed, Mrs. Redbird!"

She looked down at her feathers; to her great astonishment they were just as bright and gay as those of her husband.

"Why, why!" she gasped, "how quickly they changed!"

A crowd of people came into the woods and surrounded the tree.

"Oh, look! There's a scarlet tanager on its nest. Let's climb up and take a picture of it," she heard a deep voice say. "That coloring would attract anybody's notice."

There was a great deal of confusion, and poor Mrs. Redbird trembled on the nest as she felt the tree shaking, and somebody poked a big, box-like thing near her nest, its great eye snapping in her face.

"Worse and worse," thought distracted Mrs. Redbird, as she was poked off the nest to show the eggs that were under her.

She flew around, fluttering and crying, for what seemed a long time before those nasty, bothering people climbed down the tree and walked away.

Mrs. Redbird felt eyes upon her from all directions.

"Oh, dear," she sobbed, "they did not see me when I wore my dull green dress. Now their bright eyes see me from everywhere. I'm afraid they'll hurt my babies."

The next thing Mrs. Redbird knew the egg shells were cracking and the baby Redbirds were coming out.

In a very short time their little bare bodies were covered with red and black feathers, to their mother's surprise.

"Oh, oh," she wailed, when they began to try to fly, "why aren't you dressed like last year's babies, in dull green feathers?"

No sooner did they tumble around on the twigs than cats and squirrels saw the vivid dresses they wore and tried to catch them.

Poor Mother Redbird uttered cries of distress and woe, to find that it was all a dream, and that she still wore the same dull green clothes and sat on the little eggs that would hatch out babies which would wear a dull, inconspicuous dress like hers.

"My poor, patient little Mrs. Redbird," said Mr. Redbird, suddenly appearing with a dainty morsel for her to eat.

"Oh, I am glad I wear a dull dress," sighed Mrs. Redbird happily, eating the delicious bit Mr. Redbird had brought her.

TAMING THE LIGHTNING

We all abhor the approaching season of destructive thunder-storms, and it behooves every farmer to prepare for it. We have no hesitation in saying that the Almighty has placed within reach of every man the means of taming the lightning, and has given him the intelligence necessary to make these means available. If he neglects or refuses to employ them, he has no right to complain if a bolt destroys his barn, or kills some of his family.

The question is asked: "Why should any farmer, or any one else, go to the expense of putting up rods when insurance will protect him from loss by fire from lightning?" Whoever asks that question seriously does not realize that insurance covers only 80 per cent. of loss of building, and the loss in most cases is total, or 100 per cent. The loss from lightning usually comes when the barn is full of the harvest products; therefore, the loss is greater than at any other time of the year, and when lightning starts a fire it is often communicated to other buildings; this could be prevented by rods.

The secretary of a mutual insurance company having over \$4,000,000 in risks says that in seven years they did not have a single loss by lightning on a rodged building. Another company reports that in 600 losses from lightning, not one of the buildings was rodged.

Wire fences that are not grounded cause the death of many animals during thunder-storms. Fences should be grounded by running a number eight or number ten galvanized iron wire from each strand of the fence into the ground. The wire should be twisted two or three times about each strand and should reach to a depth of four or five feet into the ground. If the soil is particularly dry the wire should be sunk much deeper. Field fences should be grounded every twenty rods, and fences about barnyards and feed lots at least every ten rods.

Precaution is cheaper than risk, and money that goes up in smoke is a complete loss.

That metal roofs can be turned to good use in protecting against lightning is evident from the following letter from a manufacturer of metal roofing:

"Recently, a farmer was rather surprised when told that the great expense to which he had gone to equip his steel-roofed barn with lightning-rods was unnecessary, and that proper grounding of the roof itself would have given equally as good protection as the lightning-rods.

"Demonstrations of the lightning-proof qualities of various kinds of roofs were recently made in Baltimore, Md., before a number of members of the National Hardware Association of the United States. These tests will probably be of interest to our readers.

"A miniature wooden barn filled with hay was placed in front of a machine generating 1,000,000 volts of electricity. The long spark from the machine, corresponding to a brilliant lightning discharge of small proportion, was allowed to play upon the roof with the following results: The lightning struck the galvanized steel roof and the charge was carried off by a grounded lightning cable, without in any way injuring the wooden structure or the hay contained in it. Aterne-plate roof gave the same results as the steel roof. The discharge was left on for an indefinite length of time without any harm to the roof, the wooden structure or the contents.

"To obtain protection from lightning with metal roofs, proper grounding of the roof is of the utmost importance. A sufficient number of ground leads must be used, and they must be firmly fastened to the roof, so as to make good contact with the latter. The same precautions must be taken concerning ground plates or pipes, bends in leads, distance of leads from frame walls, etc., that are considered when installing lightning-rods.

"The lightning-proof qualities of metal roofs should receive proper consideration when choosing roof coverings for farm buildings. With about 50 per cent. of all farm fires in Canada due to lightning, the average farmer is vitally interested in lightning protection, and the foregoing facts will be of value to him."

Well Bred and Well Fed.

In the making of a calf to be profitable must be properly bred as well as properly fed. A good, strong, well developed sire will add from ten to twenty pounds to the weight of a calf at birth, and transmit the constitution and frame that will of themselves ensure the profitable production of veal. If such a calf is properly fed and handled for from three to six weeks, either by the breeder or by men who take up this business as a specialty, he can be made into a carcass fit for anybody to eat and for which there will be an unlimited demand.

There is no truth in the belief that acid phosphate increases soil acidity.

The day for working apart is passing and the time to edge in is here.

It is a mystery why the farmer will carefully select pure-bred sires for his herd but will sow any kind of seed when the planting season arrives.

THE CHILDREN'S HOUR

Mrs. Redbird.

Little Mrs. Redbird sat on her four pretty greenish eggs in her snug little nest in the treetop. She sat, and sat, and waited. Day after day she kept the pretty eggs warm with the soft downy feathers on her little wings, body, and day after day she listened to Mr. Redbird as he sat on a branch and sang to her to keep up her courage, for soon there would be some tiny baby birds in the nest.

"How very handsome Mr. Redbird looks in his scarlet suit, with the black sleeves and black coat-tails!" Mrs. Redbird thought; and, sighing, she looked at her own dull dress of greyish green.

"Wouldn't I just like a bright pretty dress to match my husband's," she said wearily. "I'll dress the children that way, anyhow, when they hatch."

Poor, tired little Mrs. Redbird settled herself as comfortably as she could over the eggs and listened to the leaves rustling around her. Mr. Redbird had stopped singing and flown away; she felt very drowsy, until suddenly she heard the leaves saying:

"Why, how gaily you are dressed, Mrs. Redbird!"

She looked down at her feathers; to her great astonishment they were just as bright and gay as those of her husband.

"Why, why!" she gasped, "how quickly they changed!"

A crowd of people came into the woods and surrounded the tree.

"Oh, look! There's a scarlet tanager on its nest. Let's climb up and take a picture of it," she heard a deep voice say. "That coloring would attract anybody's notice."

There was a great deal of confusion, and poor Mrs. Redbird trembled on the nest as she felt the tree shaking, and somebody poked a big, box-like thing near her nest, its great eye snapping in her face.

"Worse and worse," thought distracted Mrs. Redbird, as she was poked off the nest to show the eggs that were under her.

She flew around, fluttering and crying, for what seemed a long time before those nasty, bothering people climbed down the tree and walked away.

Mrs. Redbird felt eyes upon her from all directions.

"Oh, dear," she sobbed, "they did not see me when I wore my dull green dress. Now their bright eyes see me from everywhere. I'm afraid they'll hurt my babies."

The next thing Mrs. Redbird knew the egg shells were cracking and the baby Redbirds were coming out.

In a very short time their little bare bodies were covered with red and black feathers, to their mother's surprise.

"Oh, oh," she wailed, when they began to try to fly, "why aren't you dressed like last year's babies, in dull green feathers?"

No sooner did they tumble around on the twigs than cats and squirrels saw the vivid dresses they wore and tried to catch them.

Poor Mother Redbird uttered cries of distress and woe, to find that it was all a dream, and that she still wore the same dull green clothes and sat on the little eggs that would hatch out babies which would wear a dull, inconspicuous dress like hers.

"My poor, patient little Mrs. Redbird," said Mr. Redbird, suddenly appearing with a dainty morsel for her to eat.

"Oh, I am glad I wear a dull dress," sighed Mrs. Redbird happily, eating the delicious bit Mr. Redbird had brought her.

A Call to Veterinarians.

There is perhaps no profession in Canada that offers better opportunity for remuneration and advancement than that of the veterinarian. To-day this pursuit is recognized by the universities as worthy of a degree, just as is that of medicine. It is not only in private practice that opportunity occurs to veterinary practitioners, but in rendering service to the country by appointment under municipal, provincial, or Federal governments. As an instance of this, attention of practicing veterinarians is called to the opportunity now being offered by the Veterinary Director General at Ottawa, to qualify for employment in connection with the recently adopted Accredited Herd System. Before being enrolled for such work, applicants will be required to pass the Civil Service examination for the position of veterinary inspector and to take a course in practical testing methods with one of the inspectors of the branch. During the course the candidate will be paid, as if already employed, at the rate of ten dollars a day with expenses. Examinations are to be held simultaneously in all the provinces on April 27th, full particulars of which can be had at any post office. It will be observed that the nearness of the date set for the examination necessitates the earliest possible action by likely candidates.

Avoid Early Pasturing.

The farmer who is anxious to get the maximum of returns from his pasture lot should keep the cows away from the grass until it contains sufficient nutrients to maintain milk production and keep the cows in good bodily condition. The first taste of green grass spoils the appetite for the stored feeds which must be relied upon for weeks after the first grass appears. The early growth is mostly water and a reduction in the milk flow will result unless the regular winter plan of feeding grain, hay and silage is kept up until the pasture sod is firm and the grass has a good start.

Cows are also restless and uneasy after they have had a taste of new grass and then have this delicacy withdrawn from them. Even after the grass is long enough to be pastured, it is wise to continue feeding silage and grain when these feeds are available. The cows will invariably make good use of them.

Protecting Clean Curtains. Stretching a very narrow piece of ribbon or tape across the windows about nine inches from the lower edge saves a lot of laundry work. This prevents the curtains blowing against the inevitably dusty screens and outer sill.

It is unfortunate that men will allow "good enough" to keep them from the best.

The best leaders seek character and quality as well as numbers in their following.

Had Adam kept books and records his gardening might not have proved so perplexing to him.

"The sluggard will not plow by reason of the cold; therefore shall he beg in harvest, and have nothing."—Prov. XX-4.

BITS OF HUMOR FROM HERE & THERE

Got His Answer.
Husband: "Did you take me for a fool when you married me?"
Wife: "No, Thomas, I did not; but, then, you always said I was no judge of character."

Dire Result.
"I won't wash my face!" said Mary defiantly.
"Naughty, naughty," reproved grandmother. "When I was a little girl I always washed my face."
"Yes, and now look at it!"

First of the Season.
As the fisherman sat fishing a man stopped beside him and said:
"How many have you caught?"
The fisherman answered without taking his eyes from his cork:
"When I get this one I'm after and six more, I'll have seven, friend."

The Secret.
"Hello, papa!" said his little daughter, calling him up on the phone.
"Hello, dear! What is it?"
"I wish you'd bring me some c-a-n-d-y when you come home this evening."
"All right, but why do you spell it out?"
"Cause I don't want anybody else to know what I'm saying."

Something Anyhow.
A countryman called at the offices of a fire insurance company and intimated that he desired to insure his shop and household effects.
"What facilities for extinguishing a fire have you in your village?" inquired the official.
The man scratched his head, pondered for a moment, and then answered:
"Well, only the rain!"

A Cheap Trip.
A man rushed up to the home of a doctor in the village late one night and asked him to come at once to a distant farmhouse. The doctor hitched up his horse and they drove furiously to the farmer's home. Upon their arrival the farmer asked: "How much is your fee, doctor?" "Three dollars," said the physician in surprise. "Here you are," handing over the money; "the blame liverman wanted \$5 to drive me home."

Obliging!
The son of a well known physician loves to "play doctor."
The little fellow makes the rounds of neighboring houses, inquiring as to the health of the inmates. Usually he has with him an assortment of dolls—his "patients" in lieu of larger ones. Recently he called at a home and asked, "Anybody ill here?"
He was answered in the negative.
"Oh, well," he said, with professional nonchalance, producing two of his dolls, "I'll leave a couple of babies anyway."

Light Wanted.
It was a sleepy village, and its fire brigade was anything but up-to-date. One night a fire was announced by the violent ringing of the alarm-bell, and the sleepy brigade arrived at the scene of action to find the building wreathed in curling black smoke. No flames were visible from the outside.
The captain of the brigade made a careful survey, and then calmly lit his pipe.
"We'd better leave it alone and let it burn up a bit," he said, "then we'll be able to see what we are doing."

Looked the Part.
Fred, on returning home from school, was promptly ordered upstairs to wash his hands, array himself in a clean collar, and brush his hair into some semblance of order.
Fred stood it very well, and asked no questions. He knew mother had visitors, and that Fate was against him.
Presently, exuding an aroma of soap and hair-oil, and radiant cleanliness enveloping him like a cloud, he entered the drawing-room, and was introduced to a corpulent lady.
"This is your great-aunt, Fred," she said.
"She looks it, too," was Fred's honest reply.

The Bandsman.
Little Tommy, the terror, had been a good boy for most of the day, and was permitted to sit at the table along with his parents' distinguished visitors, Mr. and Mrs. Brown.
He had received strict instructions to ask no questions, and Tommy tried hard to obey. But Nature won, and he suddenly inquired:
"Mamma, do Mr. and Mrs. Brown still play in the band? Will they play us something when tea is over?"
"Why, Tommy, Mr. and Mrs. Brown don't play in any band. Why do you ask such a question?"
"Because," said the terror, in disappointed tones, "I heard you tell papa that Mr. Brown played second fiddle to his wife."
There was music after tea, and Tommy was the drum.

Source of True Help.
My help cometh from the Lord, which made heaven and earth.

KELLY THROWS HIS CRUTCHES AWAY

OLD TIME STRENGTH HAS RETURNED AND HE FEELS FINE.

Can Do as Big a Day's Work as Any Man, Now, He Declares—Gives Tanlac Credit.

"Tanlac has restored me to perfect health, and the best I can say for it is not as good as it deserves," said John Kelly, an employee of the Fred Construction Company, residing at 129 Bold St., Hamilton, Ont.
"Two years ago I had a severe case of pneumonia which left me in an awful weakened condition, and a few weeks later I had an attack of grippe. My stomach got all out of order, and I could scarcely eat enough to keep me alive. For six weeks my legs were so weak I just had to hobble around on crutches, and my back and shoulders hurt awfully. I couldn't stoop over without hurting so bad I thought my back would break. I couldn't bring my hands together in front of me because of the pains in my shoulders. I was constipated nearly all the time."
"Well, since taking Tanlac I know it is a wonderful builder. It gave me a whole of an appetite after I had only taken one bottle, and instead of the food giving me indigestion like it used to, it got to agreeing with me perfectly so that I always had plenty of strength and energy. In fact, I feel as well to-day as I ever did in my life, and can do as good a day's work as any man. Tanlac can't be recommended too highly."

Tanlac is sold by all good druggists.

Surnames and Their Origin

CARMICHAEL
Racial Origin—Welsh.
Source—A locality.

The name of Carmichael is one of those which is more widely known, perhaps, than borne, and you may find it interesting from the fact that one element from which it is compounded is so obvious, and the other so puzzling. For, of course, the last two syllables in it are from the given name of Michael.

Since this given name, of Hebrew origin, and indicating "one who is like God," was a Biblical name of the type likely to appeal to the imagination of the early Christians of Northern Europe, whatever their race. It spread quickly on the heels of Christianity into Germany, France, England, Scotland, Ireland and Wales.
It is the first syllable of the family name, however, that identifies it as a development among the Celtic Celts; that is, the Welsh. Glance at a map of Wales. Note the number of place names which begin with "Car" or "Caer." This word meant a "fortress" or "stronghold," equivalent in a sense to the Saxon "ton" and "burgh," the German "burgh," and also to "castle." The place known as Carmichael would in modern English have been called Michael's Fort, and it also must have received its name subsequent to the Christianization of the Welsh.
As a surname, of course, it at first indicated the place of residence of the individual, or more likely his former place of residence, and it developed

India's Advocate.

The imprisonment of Mohandas Karamchand Gandhi, the arch-advocate of India, has put a stop to the activities of one of the most remarkable men of the Indian Empire.

Gandhi was born in 1869. He studied for the Bar, to which he was called at Lincoln's Inn, London, and after a short period of practice in Bombay he went to South Africa, where he became the leader of the Indians who wished to institute reforms.

In 1906 the Zulu rebellion found him in a position of great strength and the cause of endless trouble to the Government. But during the rebellion he did splendid work in organizing an ambulance corps.

Back in India, Gandhi came to be regarded as a saint with supernatural power. He gave all his money away to the poor, and lived the life of a shoemaker; but all the time he was plotting the passive revolt against British rule, which has at last led to his arrest.

Gandhi is undoubtedly sincere. He loves his country with a passionate devotion. He is an educated man, and the various outbreaks and murders which have marked his campaigns cannot be laid at his door, for he has always advocated passive resistance.

Meanwhile, although he is a menace to British power in India, we can at least respect him for his courage and sincerity.

Minority Expression.

During the campaign for prohibition a little town took a lively interest in the election. Every house, with the exception of one, displayed this card: "This House Is Dry."

For days all eyes watched the windows of that one house without any sign. At last this placard appeared: "This House Leaks a Little."

Good Luck!

"My brother has been in Africa for the last year, and has just come home. He has been hunting tigers."
"How exciting. Did he have luck?"
"Rather! He never met any."

Nothing to Equal Baby's Own Tablets

Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine so equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Lefebvre says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus banish indigestion, constipation, colds, colic, etc. They are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Huge British Range Finder.

The largest range finder in the world is over twice the size of any used during the war, and has been constructed in England for use in coastal defense. It was designed by the two original inventors of the range finder that has been in use in the British navy for many years, and that consists of a horizontal tube carried on a central frame, which rotates with the tube on a pedestal.

Bone Dry.

She had marked the huskiness in his voice for the past ten minutes, and the nervous manner in which he fidgeted in his chair spoke volumes to her. She knew what was coming.

"Clara," he said, and his throat seemed dry and parched, "would you—could you—do you think that you—"

"Go on, George," she murmured, encouragingly. "I am listening."

"Would you—do you think you could—get me a drink of water? I am as dry as a bone."

The first red rose to be grown in England was planted in the gardens of the Manor of Savoy, London, in the thirteenth century.

At the Time of the Armistice 5,000 Tons of salvage from the battlefields was being dealt with each week in establishments in England.

Mr. Jenkins Took a Cracked Club To Tame Lions

The exhibition ended rather badly. It very nearly was a big day for the lions and a sad day for Mr. Jenkins—all for want of proper care in getting ready.

Many a man who has business to do and a living to make and a job to fill is as careless how he feeds his body as Mr. Jenkins was in picking out a club.

Some foods are too heavy, some are too starchy, many lack necessary elements and so starve the body—and many load the system down with fermentation and auto-intoxication.

Grape-Nuts helps build health and strength. It contains the full richness of wheat and malted barley, including the vital mineral elements, without which the body cannot be fully sustained. Grape-

Nuts digests quickly and wholesomely. Served with cream or good milk, it is a complete food—crisp and delicious.

Grape-Nuts is just the food for those who care to meet life's situations well prepared in health. Order Grape-Nuts from your grocer today. Try it with cream or milk for breakfast or lunch, or made into a delightful pudding for dinner.

Grape-Nuts—the Body Builder

Made by Canadian Postum Cereal Co., Limited, Windsor, Ontario

Wild Geese Flying North.

Due north they go
To the wastes of snow,
Or where lone polar waters flow;
On a flinty, ice-gripped strand;
High, high they sweep
Through the cloudy deep,
Where twilight's mazy vapors creep
Above a rain-swept land.

To pilot's cry
Their shapes file by;
A wavy chain across the sky,
The speedy line recedes.
The April night
Enfolds their flight,
But of courage high, hope infinite,
The heart a lesson reads.

—James P. McFadden.

Her Reason.

Dr. Jones had responded to a note left at his door by a farmer, asking him to go as soon as possible to see his little boy, who had a "very bad cold."

The doctor took one look at the child and turned to the mother.
"Don't you know your boy is coming down with the measles?" he asked, severely.

"Yes, doctor, I knew he was," said the woman.

"Then why in the world did you write me that he had a very bad cold?" asked the doctor.

The woman hesitated for a moment; then, looking at her husband, she said, with sullen frankness:
"Neither him nor me know how to spell measles."

ACIDS IN STOMACH CAUSE INDIGESTION

Create Gas, Sourness and Pain.
How to Treat.
Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach and not as some believe to a lack of digestive juices. The delicate stomach lining is irritated, digestion is delayed and food sours, causing the disagreeable symptoms which every stomach sufferer knows so well. Artificial digestions are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist a few ounces of Bismarck's Magnesia and take a teaspoonful in a quarter glass of water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarck's Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

New Vacuum-Tube Amplifier Aid to Partially Deaf.

Considerable progress has been made in the development of telephonic hearing aids for the partially deaf, but the limit had apparently been reached along this line until the new vacuum-tube amplifier was produced. This tube, the result of the efforts of many inventors, consists primarily of a small electric bulb having within it a filament, a spiral wire called a grid, and a metallic plate, all in the order named.

MONEY ORDERS.

Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Mistaken Identity.

As a steamer was leaving the harbor of Athens a well-dressed young lady passenger approached the captain, and, pointing to the distant hills, inquired:

"What is that white stuff on the hills, captain?"

"That is snow, madam," replied the captain.

"Well," remarked the lady, "I thought so myself, but a gentleman has just told me it was Greece."

In the Dizzy Future.

The new era that is upon us will be an era of unbelievable speed.

The following incident is not fiction; it is a prophecy.

A young man of A.D. 1950 was giving his girl an airing, so to speak, in a swift and powerful 2,000 h.p. aeroplane.

"That's England we're approaching," he said. They lived in Australia.

"British Isles, you know. Pretty little group they make, don't they?"

"I don't see them," said the girl, anxiously. "Where are they?"

"Oh," said the young man, "we've passed them now!"

Considerate!
Mistake (reprovingly): "Bridget, breakfast is very late this morning. I noticed last night that you had company in the kitchen, and it was nearly twelve o'clock when you went to bed."

Bridget: "It was, ma'am. I knew you was awake, for I heard ye movin' about; an' I said to meself ye'd need sleep this mornin', an' I wouldn't disturb ye wid an early breakfast ma'am."

Mahogany trees do not reach their full height until they are two hundred years old.

The world is blessed most by men who do the things, and not by those who merely talk about them.

Widow-burning, now virtually extinct in India, is said to exist still in parts of Africa; widows were immolated on the husband's funeral pyre as a sign of virtue, and also to provide the dead man with attendants in the next world.

DIGESTIVE TROUBLES CAUSE MUCH DISTRESS

Are Nearly Always Due to Thin, Watery Blood.

Do not think that because your stomach is easily upset you are the victim of some serious malady. One of the most common causes of indigestion is anaemia, or thin, watery blood. In fact it has become generally recognized that healthy activity of the stomach is impossible unless the blood is rich and red.

Dr. Williams' Pink Pills have been found valuable in cases of indigestion, nervous dyspepsia and stomach weakness, just because they are a blood builder and nerve tonic. The rich red blood following their use not only imparts a healthy digestion, but carries color to the cheeks and lips, and gives vigor to the muscles. One important point to remember is that Dr. Williams' Pink Pills contain no harmful drugs or opiates and are thus to be preferred to preparations that merely stimulate for a time. Before you begin worrying unnecessarily about your state of health, try the tonic treatment of Dr. Williams' Pink Pills. You will be surprised to see how rapidly your appetite returns and your debilitated system revives. Miss Sarah Farquhar, North Brookfield, N.S., who has proved the value of these pills in cases of this kind, says:

"For a long time I was a sufferer from indigestion, which seemed to carry with it a complication of other troubles. Every meal brought misery with it, as the eating was followed by severe pains in the stomach, causing at other times an accumulation of gas that caused severe palpitation of the heart and a smothering sensation. The result was that my general health was seriously affected and the least exertion would tire me out. I had taken much medicine, but did not get more than temporary relief until I began using Dr. Williams' Pink Pills, which I took for a considerable time, with the result that I now enjoy every meal and am no longer distressed after eating. I find myself in every way enjoying better health, and I cheerfully recommend these pills to similar sufferers."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Antarctic Iron Foundry Near Shackleton's Tomb.

The Island of South Georgia, where Sir Ernest Shackleton has been buried, is 2,000 miles from civilization; but it is shortly to process a complete, though small, iron foundry. A British firm has despatched to this distant island one of its special comprehensive plants for making castings required in repairing the machinery of whaling vessels. Any necessary repairs to the ships can also be carried out by this equipment.

Swindled.

Sandy McNab took a sixpenny ticket in a raffle for a pony and trap. He won it.
Was he pleased at his good fortune?
Not a bit.

When the pony and trap were brought to him he surveyed them gloomily.

"I tell ye," he said, "the whole thing was a swindle."

"What's the matter?" asked his friends.

"Where's the whip?" demanded Sandy.

A Unique Cloud Bank.

A singular atmospheric phenomenon recently noted along the western coast of South America is a bank or band of cloud extending for two thousand miles, from Ecuador to the centre of Chile, and following the trend of the coast range of hills. The cloud bank is between ten and twenty miles broad, floats at an elevation of between two thousand and three thousand feet and has a vertical thickness of not less than one thousand feet.

This curious phenomenon is ascribed to the prevalence of cool southerly and south-westerly winds blowing obliquely along-shore, and having their moisture condensed by the coast hill range just sufficiently to produce clouds without rain.

E. A. MAYHEW & CO.

NOTICE

Beginning May 15th our Hardware business will be conducted on a **STRICTLY CASH BASIS**.

Contractors, Painters and Carpenters will be given credit, accounts being payable the 10th of the month following that in which the goods were purchased.

We are compelled to do this because our goods are all purchased on practically a cash basis, and by paying cash we are able to secure all discounts, which in turn means lower prices to all our customers.

We take this opportunity to thank our many customers for their patronage in the past and cordially invite you to make this store your headquarters for anything in the Hardware line.

ENVELOPES supplied and printed to your order for \$4.00 for 1,000, sent two weeks, at Transcript Office. Toronto price is \$5.50.

NEWBURY

Miss Annie L. Tucker has gone to Detroit to spend a few weeks with relatives. Miss Tucker has been in ill health for some time and it is hoped the change will have a beneficial effect.

The baseball fans held their second meeting and decided to enter the Middlesex League. W. A. Edwards was elected manager and Dr. Cameron, Bayview captain. We hope the business men and townspeople in general will stand behind the boys with all encouragement and help put Newbury on the map, as winners, or mighty good losers.

An original farce in three acts, entitled "What Happened to Jones," will be given in the Town Hall here Friday evening, May 5th. See bills for particulars.

Fred Robinson was at Rodney last week, and was examined and passed as an excellent driver and entitled to a mark of 100 per cent. for a professional driver's license.

APPIN

Appin, April 21.—Mrs. John Macfie, district representative of the Women's Institute, visited the Kerwood and Newbury branches last week.

Miss McTavish, of Toronto, spent the Easter holiday at the home of her brother, Dr. C. R. McTavish.

Mrs. Herman Galbraith spent Saturday in Glencoe, the guest of Miss Russell.

Mr. and Mrs. R. E. C. McDonald and Betty, Mrs. and Miss Macfie, Mrs. Jones and Mrs. Edwards were London visitors last week.

Mrs. Rander, of Ottawa, is visiting her sister, Mrs. McTavish.

The Misses Marion and Margaret Macfie have returned to Alma College after spending the holidays at their home here.

"Fanchon, the Cricket," a drama of French peasant life a century ago, was played by the Appin Community Players to a capacity house here on Wednesday evening, April 19th. The appreciative audience proclaimed the play to be excellent and one well worth seeing, and great praise was given to the cast of sixteen people who took their parts so exceptionally well throughout. Laughton's orchestra added greatly to the evening's entertainment with their incidental music and overtures.

Mr. and Mrs. James Glasgow and family moved to Glencoe last week. We are very sorry, as they will be missed in both church and community affairs. Our loss is certainly Glencoe's gain.

We are very glad to see Miss Mary Galbraith around once more after being confined to her room for some time.

Rev. and Mrs. Jewitt, of Wyoming, were visitors at the parsonage.

The election of officers in connection with the Epworth League took place in the Methodist church Monday night. Excellent reports of the last year were given and the following officers elected:—President, E. Gast; assistant, J. W. Macfie; first vice-president, Miss Minnie McDonald; second, Miss Vesta Gast; third, Chas. E. Black; fourth, J. D. McDonald; secretary, Gertrude Lott; treasurer, Ronald Macfie; pianist, Helen Macfie.

Mrs. Keith Black, of Ekfrid, is supplying in the Junior room of Appin school for Miss Farrell, who is recovering from an illness.

Misses Vera and Verna Henderson, of Glencoe, were week-end visitors with Marguerite Allan.

The farmers are all busily engaged at seeding these days.

MELBOURNE

A radiophone which has been installed here by Garnet Long, at his home, is proving to be very successful and of great interest to both Garnet and his friends. Concerts are frequently heard from Detroit, Pittsburgh and New Jersey. Many people come from a distance to hear a concert.

Ralph Collin has purchased a building lot from Joseph Long, adjoining Mrs. Mother's property, and will build a new house as soon as weather permits. Mr. Brodie, who is agent for Silverwoods and occupying Mr. Richards' house, has purchased Ralph Collin's house. Mr. Collin is moving into the I.O.O.F. block until his new home is built.

EFKFRID STATION

The members of the Eureka Community Club of S. S. No. 4, Ekfrid, held their April meeting at the home of Mrs. James Murray, with a good attendance, the president, Mrs. D. J. McLean, presiding. The meeting opened with singing, followed by prayer. The minutes were read by Mrs. Bernice Galbraith in the absence of the secretary. A well-prepared paper was given by Miss Minnie McLean on "Flowers and Beautifying of Lawns." Mrs. L. Hall gave an excellent paper on "Duties of Mothers." Little Miss Luella McDonald sang very sweetly "Tuck Me to Sleep in My Old Tucky Home." An instrumental by Miss McLean and vocal music by Miss Marjorie McLean were enjoyed by all. After the business of the club was discussed a social half-hour was enjoyed by all, during which time a dainty lunch was served by the hostess, assisted by the young ladies of the flower committee. The next meeting will be held on May 4th at the home of Mrs. W. R. McDonald, the roll call to be answered by conundrums.

Stop talking about your troubles. Take Tanlac.—P. E. Lunley.

SHELTAND

A number from Sheltand spent an evening at Wm. Rush's recently. Miss Cora Rush, of Norwich, is visiting her cousin, Miss Isabel Rush. John Archer is spending a few days at his home.

Mr. and Mrs. Cragg, of Croton, spent Sunday at G. Bolton's.

Mrs. Aylmer Connelly is visiting at Robert Gray's.

The funeral of Miss Penby, daughter of Henry Penby, was held here on Sunday. Much sympathy is extended to bereaved ones.

FLORENCE

Mr. Routley is spending the Easter holidays at his home in Alvinston. Mrs. Charlie Elliott is spending the Easter holidays with her parents, Mr. and Mrs. Robert Gray.

Mr. and Mrs. George Bolton have returned from London with their daughter Kathleen, who had a successful operation for appendicitis. Miss Neta Badgley is visiting in London.

Mr. and Mrs. Dan Hillman and Miss Mabel spent Sunday at Robert Gray's.

WOODGREEN

Mr. and Mrs. Thomas Simpson and daughter Florence spent a few days with friends near Florence last week. Lawrence Harvey has returned after visiting relatives at St. Clair, Mich.

A special collection was taken up in the Union Sunday School for the Russian famine fund.

Miss Verna Waterworth left last week for the West, where she will spend the summer.

Miss Amy Peters has returned after spending the holiday at her home at Mount Brydges.

Mrs. A. Daum has returned after a visit with friends near Sebringville.

Mr. and Mrs. Thomas Simpson and daughter Florence spent a day last week with Mr. and Mrs. Syrenus Welch, Ekfrid.

Mr. and Mrs. Isaac Waterworth and daughter Margaret spent a few days with friends in London.

Old newspapers and magazines for sale at The Transcript office.

NORTH EKFRID

Mrs. George Waite and little son, of London, are visiting at the home of James Essey.

Mr. and Mrs. Jack Bell and son Billie, of Glencoe, called on Mr. and Mrs. Wm. Chisholm on Sunday.

Miss Lizzie Essey has returned to the home here after an extended visit in Petrolon and London.

Mrs. Frank Graham has disposed of her lots. Mr. Musgrove, of Drumbo, is the purchaser.

Gardening and house-cleaning are the order of the day.

The Latter Day Saints held service in their church three times Sunday, also Saturday evening.

Owing to the wet weather, seeding has been delayed in this vicinity.

Mrs. Wm. Foster has returned home after spending the winter with her brothers, Wm. Teskey, Blenheim, and Emerson Teskey, Merlin.

Miss Annie McLean has resumed her position as teacher. She had been absent for some time owing to her brother's illness.

Harry Hardy had a successful sawing bee Wednesday afternoon.

The Swastika Mission Band of little girls met at the Presbyterian church Wednesday afternoon, with a good attendance.

CAIRO

Mrs. George Carter, of Walkerville, is visiting her daughter, Mrs. Robert Hoffman.

Leonard Fenwick, of Ann Arbor, is visiting his sister, Mrs. Archie McGugan.

Will J. Ball, of Strathroy, and Mrs. H. Hayward, of this place, were quietly married on Tuesday, April 18.

Mrs. Frank Bessenger, accompanied by her sister-in-law, Mrs. Cecil Hayward, and little son James, of Detroit, are visiting the former's mother, Mrs. Jacob Burd.

Mr. and Mrs. George Owen Sound, has rented Mrs. Margaret Macaulay's house and is moving this week with his family.

Mrs. Annie Smith has returned to Windsor after spending a month with her nephew and niece, Mr. and Mrs. Alex. Munroe.

SHIELDS SIDING

Miss Monta Anderson visited her sister in London recently.

Mrs. Wilson and Graydon McLeish, of Toronto, spent the holidays with the former's parents, Mr. and Mrs. John F. McTavish.

Sorry to say that Miss Purcell is still confined to her bed with the after effects of the flu.

Mr. and Mrs. John Dewar spent the week-end at Archie Purcell's.

Miss Collins spent the holidays at her home in London.

Read the "Special Notices."
