C. P. R. Lookout Man Instantly Killed at Owen Sound.

WAS SCRAPING THE TOPMAST

When the Tip Broke, Hurling Him to the Deck-Head Smashed to a Pulp.

Owen Sound, Oct. 30.-Neil Currie, a lookout man on the Canadian Pacific Railway liner Manitoba met with a horrible death shortly after 1 o'clock vesterday afternoon. The vessel had been only a few hours in port from Detroit, where she had undergone repairs. Yesterday afternoon the masts were being scraped, preparatory to being repainted. At the very top of the mast is a pulley, and from this Neil Currie was suspended in the air, 60 feet above the deck of the steamer, and 85 feet above the water line. He signaled to his three shipmates on the deck that he was all right, and they put a strain on the rope to pull him up a few feet higher. The topmast snapped, and with a cry of horror, the young man fell to the deck, striking one of the seats with such force that one of the legs was driven through the cabin roof, splitting one of the supports. The broken section of mast fell and broke through the deck also. Carrie's head was crushed to a pulp, his side was crushed in and a number of fractures were sustained. Death

was instantaneous, The victim was a splendid specimen of manhood, weighing 190 pounds and being six feet in height. A sister, Mrs. Edward Nicholson, resides here, though Currie had been a resident of Sault Ste. Marie, having joined the Manitoba's crew last spring. He was unmarried and was 22 years of age.

Earl Beauchamp Criticises Chamberlain's Policy.

SAYS CANADIANS ARE HOSTILE

Beach Refuses to Define His Stand.

London, Oct. 30 .- Earl Beauchamp, who, it is stated, will be Governor-General of Canada if the Liberals win at the general elections, speaking to Islington Liberals last night, said that the Liberals were not fighting Premier Balfour, but Lady Macbeth behind the scenes. That the colonies threatened to leave the empire unless they are given a cash nexus was damning proof of the incapacity of Mr. Chamberlain during the eight years that he was Minister of the Colonies. The hostile attitude of the Canadian manufacturers showed Canada's position towards

preferential trade. Mr. Hamar Greenwood, who was heartily cheered, said that if the strong and robust radicalism of Canada were introduced into Britain it would make the market place for the present bond of love meant the speedy disintegrahis neck a photo of George III., indicative of his own policy. Mr. Cham-berlain's speeches had raised great bitand whipped severely with terness in Canada, Canadians would switches. Not to Use Marquette water under the present fiscal conditions and who, if it were found necessary, could take business from Gerfor their own substantial advantage subscribed to the Free Food League. Sir Michael Hicks-Beach has been asked by the Free Food League if his the Prime Minister at a Unionist meeting is not altogether inconsistent with his position as a leading mem-ber of the league. He replied yesterday that he was unable to see any inconsistency, but he declined to make any further statement for publication. The appeal of Premier Balfour by the Liverpool Steamship Owners' Association calls attention to the vital question of state-aided competition encountered by British shipping in every port in the world, and the preference shown for foreign shipping at the home ports. The dock strike of 1889 drove a lot of trade to Antwerp, Rotterdam and Hamburg, which has never returned. Freights were never scarcer than at present. The Allan liner Brazilian, loading at Montreal and Quebec, as a rule, is shut out of a cargo now. The Allans are keeping her a day late, and she will go away with

only half her capacity cargo. An Oxford undergraduate says the dons are mostly rabid free traders, and the undergraduates are largely in cided upon the latter by 180 votes to 120, after a debate the other day.

The Vulcan storm period, extending from the 10th to the 15th, is central on the 12th and the Mercury period, Had England learned wisdom from the extending from the 7th to the 19th, is central on the 13th, hence the combined perturbations of these two forces will be felt during the Vulcan period. Moon is in perigree on the 10th, at last quarter on the 11th, and on the celestial equator, going southward on the 14th. About the 12th to tries. He reminded his audience that the 15th may reasonably be expected one experiment of protection could do no of the most general and active storm great harm. Other states had proved that centers of the month. As early as the 10th the barometer will be falling in the west. Change to warmer will at tend the falling barometer, and during the 11th to 15th these conditions will pass over the country, moving eastward, bringing rain and snow storms to most parts of the country. A very decided dash of early winter will bring up the rear of these storms, giving several cold days and frosty nights to most parts before the entrance of the next storm period.

A reactionary storm period is central from the 17th to the 20th, having the new moon, or moon in conjunction with earth and sun on the 19th. This period will bring return of rising temperature, falling barometer and wide areas of cloudiness, rain and snow. The culmination of these disturbances will fall on and next to the 19th. At this time autumnal rains will end in high gales over the lake and Atlantic coast regions, with dashes of snow and change to much colder over all northern to central parts of the country. Frost will reach quite into the south along with the high

PARKS STILL FIGHTING

New York, Oct. 30. - The threat of a national strike by the International Association of Bridge and Structural Iron Workers to force recognition of local No. 2 by the Iron League and Employers' Association culminated yesterday at a meeting of the inland local committee of the association in a resolution ordering a strike all over the country to go into effect Saturday in all cities where members of the Iron League of the Building League Employers' Association have contracts. President Euchanan, of the union, was in favor of a peaceable settlement. but the Farks element carried the strike proposition. Efforts are to be made o bring the new housesmiths' union of New York into line. The International executive committee estimates that 10,000 iron workers will be directly affected. This would mean the throwing out of work of from 100,000 to 150,000 workmen in other trades. President Buchanan expressed confidence in the successful outcome of the strike for the workers.

The Grand Trunk's Half Year The half-yearly report of the Grand Trunk Railway Company submitted to the shareholders at London, Eng., on Oct. 9, showed gross receipts of £2,778,-080, as compared with £2,377,201 in the corresponding six months last year. The working expenses were £1,995,031, as compared with £1,693,612 in the corresponding half year of 1902. The total amount available for dividends was £258,568. Of the receipts, passenger traffic contributed £681,107, mails and express £119,101, freight and live stock £1,904,689, miscellaneous £73,183. The passengers carried during the half year numbered 3,960,494, an increase of 434,639; the freight tonnage was 6,-745,354, an increase of 1,079,016, and the earnings per train mile were 68.87d, an increase of 0.74d. The increase of £391,420 in the working expenses, as compared with the correspending six months in 1902, was accounted for to a large extent by the advance in the price of coal. While the gross receipts increased 16.86 per cent, the working expenses increased 24.41 per cent. The outlay on capital account was f123,481, of which £65,581 was for double-tracking from Hamilton to Niagara Falls, and from Whitby to Port Hope. The Grand Trunk Railway Company owns 2,978 miles of road, leases and partly owns 511 miles and rents and leases 63 miles, the total length of roadway under operation being 3,552. Including

and 26,262 freight cars in service. The volume of railway traffic is a correct index to the commercial activity of the country, and the great increase in the Grand Trunk's business during the first six months of this year is proof that Canada's boom is still

Chamberlain's Progress. Apparently Sir Michael has concluded, as many free traders have that the tariff walls rising against Great Britain in every part of the world are a real menace to British industry, and should be battered down if possible. Meanwhile Mr. Chamberlain is plowing his lonely furrow, and if crowds and public excitement count for anything he is making rapid headway. Mr. Ritchie, the successor of Sir Michael Hicks-Beach in the treasury, was received with disorder at Canada would have fared better in Aberdeen last night, when he attacked Mr. Chamberlain's policy by appealing to the dismal experience of the old corn laws. The argument is scarcely a fair one, as there is little resemblance between Mr. Chamberlain's proposal of a modest duty of six cents per bushel on wheat, or two shillings per quarter. and the monstrous impositions of the corn laws. Under Wellington's sliding scale of 1828, the import duty on wheat rose and fell as prices fell and rose, being 36s 8d per quarter when the price of wheat was 50 shillings per quarter. The sliding scale was reduced by Peel in 1842, but the duty even then was 20 shillings per quarter when the price was 50 shillings, and would have risen still higher if the boundary case because he found Can-alty either of Edward Blake or Sir natural price of wheat had fallen ada's claim was too weak. natural price of wheat had fallen ada's claim was too weak. lower. The Treaty-Making Power. [Montreal Witness.] The London newspapers, led by the London Times, which have expressed surprise at Sir Wilfrid Laurier's expression of regret that Canada did not possess treaty-making powers, do not seem to be aware that there is nothing new in this demand. The Trackless Trolley.

It seems certain that the near future will see the familiar trolley system of today superseded by the trackless or auto-trolley, which has already been successfully tried in Germany. A system of trackless trolleys is in active use in the Biela Valley, near Dresden, carrying both passengers and freight. The trolley is so contrived as to allow a train consisting of motor cars and trailers to turn aside in passing vehicles on the road—an excellent plan for obviating the vexatious delays so frequent in ordinary trolley travel. The train is steered by the front American, and this state of affairs would no doubt stimulate the cultivation of wheat in Canada and give an impetus to Canadian immigration. In that, respect Canada would be the gainer.

DISFIGURING

Skin, Scalp and Blood Humours

From Pimples to Scrofula From Infancy to Age

Speedily Cured by Cuticura

The agonizing itching and burning of the skin, as in Eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurements, as in acne and ringworm; the awful suffering of infants, and anxiety of wornout parents, as in milk crust, tetter and salt rheum, - all demand a remedy of almost superbuman virtues to successfully cope with them. That Cuticura Soap, Ointment and Resolvent are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy, have made them the standard skin cures, blood purifiers and humour reme-

dies of the civilized world. Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry, without rubbing, and apply Cuticura Oint-ment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, take Cuticura Resolvent, to cool and cleanse the blood. This complete local and constitutional treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning and scaly humours of the skin. scalp and blood, and points to a speedy, permanent and economical cure when all else fails.

Her Death Mourned by a Large Circle of Friends.

Wealth of Floral Tributes From Many Quarters.

Many loving and bereaved friends attended the funeral of Miss Alice Clark, youngest daughter of Mr. George Clark, of King street, whose death came as a terribly sudden shock to acquaintances. Among those who were present at the services were many young people, who had known Miss Clark and esteemed her as only one with a bright, winning disposition could be esteemed. There were also many friends of the family in attendcould ance, and the funeral was one of the largest ever seen in the vicinity.

There were numerous floral tributes -so many in fact that the parlor of family residence was taxed to hold them. They were as beautiful as flowers could be, and were fitting tokens of respect to the fair young life that had been taken away. Socially Miss Clark was well liked, as in every other way, and there were many artistic designs from the young people she had known. She had belonged to sevchurches, and large wreathes were reschool of the Dundas Center Methodist

Among my other weaknesses I have a wholesome dread of ridicule, and this is probably why I failed to press my theory on the captain when he appeared, and even forbore to mention the various small matters which had so attracted my attention. If he and the experienced men who came with him saw suicide and nothing but suicide in this lamentable shooting of a bride of two weeks, then it was not for me to suggest a deeper crime, especially as one of the latter eyed me with open scorn when I proposed to accompany them upstairs into the room where the light had been burning. No, I would keep my discoveries to myself or, at least, forbear to mention them till I found the captain alone, asking nothing at this juncture but permission to remain in the house

till Mr. Jeffrey arrived. I had been told that an officer had gone for this gentleman, and when I heard the sound of wheels in front made a rush for the door, in my anxiety to catch a glimpse of him. But it vas a woman who alighted.

He said that she was probably the sister of the woman who lay inside. Upon which I remembered that this lady, under the name of Miss Tuttle -had been repeatedly mentioned by the reporters, in the accounts of the wedding before mentioned, as a person of superior attainments and magnificent beauty.

This did not take from my interest, and flinging decorum to the winds, I approached as near as possible to the threshold which she must soon cross. As I did so I was astonished to hear the strains of Uncle David's organ. still pealing from the opposite side of the way. Meanwhile Miss Tuttle had stepped within the circle of light cast by our I have never seen a finer woman,

nor one whose features displayed a more heartrending emotion. This called for respect, and I, for one, endeavored to show it by withdrawing into the background. But I soon stepped forward again. My desire to understand her was too great, the impression made by her bearing too complex, to be passed over lightly by one on the lookout for a key to the remarkable tragedy before us.

Meanwhile her lips had opened with the cry: "My sister! Where is my sister?" The captain made a hurried movement toward the rear and then with the laudable intention, doubtless, of preparing her for the ghastly sight which awaited her, returned and opened a way for her into the drawing. room. But she was not to be turned aside from her course. Passing him by, she made directly for the library which she entered with a bound Struck by her daring, we all crowded up behind her, and, curious brutes that we were, grouped ourselves in a semi-circle about the doorway as she land under the Gentzsch patents. faltered toward her sister's outstretch- Poverty brings many strange landed form and fell on her knees beside lords.

before us shook involuntarily, but her lips made no protest. I doubt if she possessed the power of speech at that moment. A change, subtile, but quite perceptible, had taken place in her emotions at mention of her sister's husband, and, though she exerted herself to remain calm, the effort seemed too much for her strength. Anxious to hide this evidence of weakness, she rose impetuously; and then we saw how tall she was, how the long lines of her cloak became her, and what a glorious creature she was altogether. "It will kill him," she groaned in a deep inward voice. Then, with a certain forced haste and in a tone of surprise which to my ear had not quite a natural ring, she called aloud on her who could no longer either listen or answer:

"Oh. Veronica, Veronica! cause had you for death? And why do we find you lying here in a spot you so feared and detested?" "Don't you know?" insinuated the

captain, with a mild persuasiveness, such as he was seldom heard to use. "Do you mean that you can not acyou, who have lived with her-or so I have been told-ever since her marriage with Mr. Jeffrey?"

Keen and clear the word rang out, fierce in its keenness and almost too clear to be in keeping with the half choked tones with which she added: "I know that she was not happy, that she never has been happy since the so much as dream that her dread of had I imagined in the least degree that she was affected to this extent-do you an instant alone? SEAFORTH ALSO WANTS THE CUP

Issues a Challenge to the Winner of the Clinton-London Match.

The Collegiate Institute football club has telegraphed the Clinton club that it would accept Nov. 7 as the date on which to play the game for the Hough cup at Clinton. Only one game will be played, and it will decide whether London brings back the cup or whether Clinton will retain it. The winner, however, will not be able to put the cup peacefully on the shelf for the remainder of the season, as the Seaforth team has sent in a chal-lenge, and no matter which team wins London-Clinton game, another game will have to be played with Scaforth. London will have a strong team, but it is not known how it will fare, as nothing is known of Clinton's strength. Nevertheless, they can be staked to do their Y. M. C. A. WON.

The Y. M. C. A. and Collegiate Institute clubs met on St. John's A. C. grounds on Wednesday for their second game in the City League. The Y.M.C.A. had suffered defeat a week previous at the hands of the Collegiate, and it did wish a repetition. For some time the hands of the Collegiate, and it didn't game was about evenly contested, but the association players scored first, and later followed it up with another goal, and won out by a score of 2—0. The Collegiate changed its defense men, hoping to strengthen thereby, but it weakened the work to such an extent that the Y. M. C. A. found its way towards the goal without any great effort. The latter part of the game was rather rough and scarcely as dignified as the game ought to be

BARRACKS SHUT OUT. In the game last night between the Collegiate and Barracks, the former left the grounds victorious, scoring twice, while the latter failed to make a goal. It was interesting from start to finish, and although the Barracks tied the Collegiate a week ago, yet in this match they found it impossible to better the score. Both teams played a good combination game, and to this alone can the Collegiate ascribe the victory. This is about the last game the Collegiate has to play for the Mc-Cutcheon cup, and although they will not be the winners of it, it is hoped they may win the Hough cup from the Clinton Collegiate on Nov. 7.

Major Delmar did more than he was given credit for at Memphis on Tueslay, when he clipped a quarter-second from his mark. Almost any good horse can beat a record nowadays, but it requires an extraordinary on to beat the books. This is what the Major is said to have done. There were nine races on the card on Tuesday, and the bookies were so busy taking in the money that they became a little careless. When Delmar was sent away to beat two minutes the judges forgot to ring the bell. The layers went on taking money, in happy ignorance of the fact that the trial was on, and Delmar got around the count for your sister's violent end, track so speedily that they were still accepting bets that he would beat two minutes after the official time had been hung out. It is said that the judges' negligence and the bookies' carelessness cost quite a few bills to the layers

A SYSTEM OF **CLOTHING-MAKING** THAT PRODUCES **ABSOLUTELY** PERFECT RESULTS.

THE temptation to get what's absolutely best appeals to most men with irresistible force. We've long ago settled the question of Quality, Style and Fit as far as Clothing is concerned. Reputation tells you that what you get here is representative. And it should be. The men who make Grafton & Co. Clothing are the best in their business in Canada. They create styles. They follow no one set line, but work out the problems of designing along their own lines. There's no limit put on the amount of work our designers shall turn out each year. They can take as much time in drafting a pattern as they want-they can have garment after garment cut by their patterns and improved on again and again until its perfection is reached, and then the line of Clothing is made up and not before. They develop absolutely new things, and what they turn out is perfection. You can afford such Clothing when you can't afford any other, particularly as it is lower than the rest

THE SWEDISH TRIO

Madame Hausch and Daughters Give 5

First Concert Here. Conservatory Hall was too small to comfortably accommodate the lovers of violin music who assembled last night to listen to "The Swedish Trio." The trio consists of Madame Von Zedeler Hausch, solo violinist, and her talented daughters. Misses Ingeborg and Gurli Hausch, the former of whom is a flute soloist, and the latter a violing soloist. Their programme last night was one that thoroughly pleased, as was evidenced by the many demonstrations of approval. Not only is Mad-ame Hausch an artist of rare talent, but the younger daughter, Miss Gurli, shows exceptional ability for a violin ist of her age. Miss Ingeborg Hausch's performance with the flute completed charmingly this delightful trio. Mr.

Jordan was the accompanist of the evening and aided considerable in the triumph of the Swedish trio. A burlesque arrangement by Leonard called "Serenade Humoristique," made an excellent opening. This was given by the trio, and the next number was violin solo by Miss Gurli Hausch, Musin's "Mazurka de Concerto," "Serenade," by Pierne, being given as an encore. The trio then rendered (a) Bach's air on the G string, (b) Cavalleria Rusticana, and Schumann's Traumerei, as an encore. Wienwiaski's masterly "Legende" was given by Madame Hausch, and to an enthusiastic encore she responded with "Annie Laurie," than which nothing during the evening

pleased more. The balance of the programme was of equally artistic quality, the numbers being: Violin duet, second symphonconcertante (Alard), Madame and Miss Gurli Hausch; solo, Obertass (Wi-enwiaski), Madame Hausch; Awakening of the Lion (De Koutske), Swedish

King Street Pavement War May Be Opened Up Again

Barbers and Underbid Them-Board of Works Meeting.

The old time pavement war on King street shows grave symptoms of again its meeting last night when the tenders for the pavement between Maitber, and as Trinidad asphalt had been for tenders, it was thought that there would be a tender from the Barbers, the only firm that can lay Trinidad isphalt, and one of the alleged straw tenders from the Toronto firm.

Instead, however, there was a tender from the Barbers, and another from Warren Bros., and both were accompanied by marked checks. The figures in the Barber tender were \$1 99 per square yard for a Trinidad asphalt pavement, and 49c a foot for curbs and gutters. The Warrens offered to lay a Californian asphalt pavement for \$1 87 per yard, and the curbs and gutters for 50c per foot. The committee were at a loss to know what to do in the matter.

Mr. T. W. Glover's mission to the Royal Templars of Temperance was California asphalt. dience was brought together under the presidency of Rev. T. S. Johnson, in give the lowest tender the job. Mr. Glover said he regretted the loss of the old-fashioned temperance meet-

Graydon, in reply to a memo from the board of health, was read. Mr. Graydon admitted that the condition of the sewers was not what it should be, but he laid this to the lack of sufficient men to look after the sewers. He recommended that a foreman and two men be engaged to look after the sewers the whole year round. In the report, Mr. Graydon also ad-Ald. A deputation of citizens who reside park from its present site to a posion Richmond street north, and who lie fences which extend onto the street, near the C. P. R., waited upon the committee to know why the fences had not been removed. Mr. Graydon explained that he had let the job to carpenter, but that owing to a rush ceeded with the work. Mayor Beck asked what had been done regarding the Frost & Wood

building, which extended onto the street, and the engineer stated that the C. P. R., who own the building, had refused to move it back, and did not feel that they were bound to do so.
Ald. Cooper took occasion to remark that the city now had a lever to use on the C. P. R. to induce them to open up Wellington street, by taking proceedings to compel the company

to move back the Frost & Wood build-Engineer Graydon also recommended that an advertisement be inserted in sons wishing to cut down trees, could obtain all information from the city engineer's department. Mr. Graydon said also that if there was any wood

initiated on Richmond street from Ox- | them, there were fully 150 trees which could be pointed out at once.
Upon motion of the mayor, it was

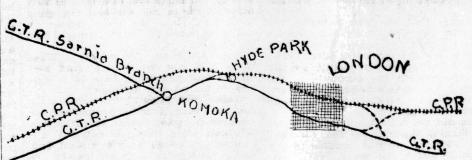

decided to move the bandstand in the

ADELAIDE STREET HILL Engineer Graydon reported that the accounts for the graveling of Adelaide of work the carpenter had not pro- street hill, rendered by the township

of London against the city, were in some cases duplicated, and were mixed up to such an extent that he could not make head or tail of them. After a short discussion the committee decided to allow the matter to stand until the next meeting, when Councilor McLeod, of the township will be asked be on hand and explain matters. Mayor Beck called the attention of the committee to the amount of dead leaves on the streets, and suggested that the committee have corporation laborers burn the leaves and clean the streets, and also that the police notify the citizens to cease throwing leaves on the public thoroughfares. The matthe local papers to the effect that per- ter, however, was allowed to drop, the committee having no money for the

THE PROPOSED RAILWAY JUNCTION.

The sketch above will make clear the proposed plan for a union station, and the use of each other's tracks by the G. T. R. and C. P. R. Grand Trunk freight trains coming east by the Sarnia branch (main line) could switch to the C. P. R. tracks near Komoka or Hyde Park, and return to the Grand Trunk tracks east of the city by means of a switch indicated by the dotted lines above. C. P. R. passenger trains coming from the west could take the Grand Trunk tracks at Komoka or Hyde Park, and enter the union station at London, which would be on the present site of the Grand Trunk depot. Grand Trunk freight trains coming west could switch to the C. P. R. tracks east of the city and C. P. R. passenger trains coming west could switch to the Grand Trunk tracks for the union depot. The scheme is a practicable one, and it is understood that the railway companies are prepared to con-
