The Honourable

The Speaker of the House of Commons.

A Message was received from His Excellency the Governor General, desiring the immediate attendance of the House in the Senate Chamber:—

The House attended accordingly; and being returned,

by the acceptance of an office of emolument under the Crown:

And that he had issued his several Warrants to the Clerk of the Crown in Chancery, to make out new Writs of Election for the said Electoral Districts respectively.

Mr. Speaker further informed the House that, during the Recess, the Clerk of the House had received from the Clerk of the Crown in Chancery, certificates of the Election and Return of the following Members, viz.:—

Of John A. McGillivray, for the Electoral District of the North Riding of Ontario.

John Alexander McGillivray, Esq., Member for the Electoral District of the North Riding of the County of Ontario, having previously taken the Oath according to Law, and subscribed the Roll containing the same, took his seat in the House.

Mr. Foster introduced a Bill No. 1, respecting the administration of Oaths of Office; which was read the first time.

Mr. Speaker reported His Excellency's Speech from the Throne, and read a copy thereof to the House, which is as follows:—

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

In accordance with the announcement made during the last Session, Parliament has been summoned somewhat in advance of the usual period.

The bountiful harvest with which Canada has been blessed is a cause for the

deepest thankfulness to the Giver of all good.

I congratulate you upon the evidence of increased activity in the various branches

of commerce and industry.

Several such indications have come under my personal observation during a tour made recently in the North-west Territories and British Columbia. In particular, I noticed the extension of mining enterprise in British Columbia, where the vast mineral resources are in certain localities now being developed and utilized upon something like an adequate scale.

A special feature of the same tour consisted in the opportunities obtained for visiting a number of the Indian Reservations and also the Indian Industrial Schools. On the former I was received with hearty demonstrations of loyalty and good-will, while in connection with the latter the proofs of proficiency and intelligence on the part of the children were highly encouraging.

As to the work of the Indian Department as a whole, the manner in which it is

directed and administered appears to be very satisfactory.

A reference to these topics would be incomplete without an allusion to the valuable services of the North-west Mounted Police, which may justly be regarded by Canadians generally as indispensable, under present conditions, to the well-being of those extensive

and promising portions of the Dominion in which they are stationed.

Immediately after the prorogation of Parliament my Government communicated through the Lieutenant-Governor of Manitoba with the Government of that province, in order to ascertain upon what lines the local authorities of Manitoba would be prepared to promote amendments to the Acts respecting education in schools in that province, and whether any arrangement was possible with the Manitoba Government which would render action by the Federal Parliament in this connection unnecessary. I regret to say that the advisers of the Lieutenant-Governor have declined to entertain favourably these suggestions, thereby rendering it necessary for my Government in pursuance of its declared policy to introduce legislation in regard to this subject. The papers will be laid before you.

I am happy to inform you that the representations of my Government and the suggestions of the Ottawa Conference respecting steamship communication have resulted

in an announcement by the Imperial authorities of their willingness to grant a substantial subvention towards the Atlantic portion of the scheme. This will, I trust, ensure the successful establishment of a line of steamers between the United Kingdom and Canada, which, in point of speed and equipment, shall fully meet all requirements.

My Government have also learned with satisfaction that it is the intention of the Secretary of State for the Colonies to appoint a Committee to consider a proposed Pacific Cable to connect Canada with Australasia. You will, I am sure, share the gratification with which my advisers welcome these announcements as affording further evidence of the desire of Her Majesty's Government to draw closer to each other and to the motherland the outlying portions of the Queen's Dominions. The papers on these subjects will also be submitted to you.

Your attention will be asked to measures intended to provide for the better arm-

ing of our militia and the strengthening of Canadian defences.

The growth of population in the North-west Territories as disclosed by the last enumeration calls for additional representation in Parliament. A Bill for this purpose

will be laid before you.

I am happy to be able to inform you that the Commissioners appointed by Great Britain and the United States for the purpose of delimiting the boundary between Alaska and Canada have concluded their labours and have signed a joint report for presentation to their respective Governments. This report will be laid before Parliament in due time.

At the request of the Right Honourable the Secretary of State for the Colonies a delegate of my Government visited England last summer to confer with the Imperial authorities upon the question of Copyright. His report will be laid before you, and I doubt not that this subject will again receive your earnest attention.

You will also be asked to consider measures for the extension and development of

our trade in agricultural products with the United Kingdom, and other markets.

Gentlemen of the House of Commons:

The accounts of the past and the estimates for the ensuing year will be laid before you. The latter have been framed with every regard for economy consistent with the requirements of the public service.

You will be pleased to learn that the revenues of the country show a gradual and continuous increase, and that the promised equilibrium between income and expenditure

on Consolidated Fund account for the current year bids fair to be realized.

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons;

I commend these subjects and others which may come before you to your earnest consideration, relying upon your wisdom and prudence under the Divine guidance to discharge with dignity and effect the high trust committed to your care.

On motion of Mr. Foster, His Excellency's Speech was ordered to be taken into consideration on Tuesday next, the 7th instant.

Resolved,—That Select Standing Committees of this House for the present Session be appointed for the following purposes:—1. On Privileges and Elections.—2. On Expiring Laws.—3. On Railways, Canals and Telegraph Lines.—4. On Miscellaneous Private Bills.—5. On Standing Orders.—6. On Printing.—7. On Public Accounts.—8. On Banking and Commerce.—9. On Agriculture and Colonization,—which said Committees shall severally be empowered to examine and inquire into all such matters and things as may be referred to them by the House; and to report from time to time their observations and opinions thereon; with power to send for persons, papers and records.

On motion of Mr. Foster, it was Resolved, That when the House adjourns this day, it do stand adjourned until Tuesday next, the 7th instant, at 3 o'clock in the afternoon.

Mr. Speaker laid before the House,—The Report of the Joint Librarians of Parliament, which is as follows:-

TO THE HONOURABLE THE SPEAKER OF THE HOUSE OF COMMONS.

The Joint Librarians of Parliament have the honour to report as follows for the

The recess has been largely devoted to changes and improvements in the catalogue of the Library, the law catalogue being in process of re-copying and the card catalogue

being put into type-writing.

The United States Government having after much delay published the proceedings in the Behring Sea case, complete sets of the American volumes have been provided for

the Library, in addition to those printed by Great Britain.

Attention is being given to the collection of the Reports of all Royal Commissions issued in Great Britain for the investigation of important public questions. The Library already contains many of these reports, on Trade, Criminal Law, the West Indies, the Public Service, Labour, and other subjects.

The Royal Commission on Agriculture in England having almost completed its labours a full set of the volumes as far as published has been provided in advance of the

general set of Imperial Commons Papers.

The Royal Commission on Secondary Education having published its report in full, a separate set has been provided in like manner.

The reports of the various Boards of Trade and Chambers of Commerce in England

for the past year have been collected, and will be found upon the shelves.

The date of the meeting of Parliament renders it impracticable to provide the bound sets of periodicals for the use of Members at as early a period as is desirable; but arrangements have been made to procure, as speedily as possible, the newspapers and periodicals most likely to be required for the purposes of Parliament.

The instructions of the Committee with regard to the distribution of certain exchanges were duly carried out, during the Recess, and the replies of the recipients

have been duly received and filed in the Library.

The latest additions to the literature of Political Economy, Statistics and Trade, will be found on the shelves, as usual; but the Annual Statistical compilations for 1895 will not be available at this early date of the new year.

Among the most valuable of the donations of the year may be mentioned the Report of the Constitutional Convention of New York in seven volumes, received from

the Library of the State.

At this last session of present Parliament the Librarians desire to acknowledge the courtesy and consideration they have received from the Speakers of the Senate and House of Commons, in carrying out the rules and customs of the Library.

The list of donations and copyrights will be found appended as usual. The catalogue of accessions during the year is ready for distribution.

All which is respectfully submitted.

A. D. DECELLES, G.L. MARTIN J. GRIFFIN, P.L.

(For Appendix to this Report, see Sessional Papers, No. 17.)

The House then adjourned until Tuesday next, at 3 o'clock in the afternoon.

PETER WHITE,

Speaker.

Mr. Powell moved, seconded by Mr. McGillivray, That the following Address be presented to His Excellency the Governor General to offer the respectful thanks of this House to His Excellency for the gracious Speech he has been pleased to make to both Houses of Parliament; namely:-

To His Excellency the Right Honourable Sir John Campbell Hamilton-Gordon, Earl of Aberdeen; Viscount Formartine, Baron Haddo, Methlic, Tarves and Kellie, in the Peerage of Scotland; Viscount Gordon of Aberdeen, County of Aberdeen, in the Peerage of the United Kingdom; Baronet of Nova Scotia; Governor General of Canada

MAY IT PLEASE YOUR EXCELLENCY :-

We, Her Majesty's dutiful and loyal subjects, the Commons of Canada in Parliament assembled, humbly thank Your Excellency for your gracious Speech at the opening of this Session.

We also thank Your Excellency for informing us that, in accordance with the announcement made during the last Session, Parliament has been summoned somewhat in advance of the usual period.

We heartily share Your Excellency's feeling that the bountiful harvest with which Canada has been blessed is a cause for the deepest thankfulness to the Giver of all

We rejoice that Your Excellency is able to congratulate us upon the evidence of

increased activity in the various branches of commerce and industry.

We are gratified to hear that several such indications have come under your personal observation during a tour made recently in the North-west Territories and British Columbia, and that, in particular, Your Excellency noticed the extension of mining enterprise in British Columbia, where the vast mineral resources are in certain localities

being now developed and utilized upon something like an adequate scale.

It affords us much pleasure to hear that a special feature of the same tour consisted in the opportunities obtained for visiting a number of the Indian Reservations and also the Indian Industrial Schools. We are glad to learn that on the former Your Excellency was received with hearty demonstrations of loyalty and good-will, while in connection with the latter the proofs of proficiency and intelligence on the part of the children were highly encouraging.

We are glad to be informed that, as to the work of the Indian Department as a whole, the manner in which it is directed and administered appears to be very satis-

We agree with Your Excellency that a reference to these topics would be incomplete without an allusion to the valuable services of the North-West Mounted Police, and we respectfully note Your Excellency's opinion that that force may justly be regarded by Canadians generally as indispensable, under present conditions, to the well-being of those extensive and promising portions of the Dominion in which it is stationed.

We thank Your Excellency for the intimation that immediately after the prorogation of Parliament Your Excellency's Government communicated through the Lieutenant-Governor of Manitoba with the Government of that province, in order to ascertain upon what lines the local authorities of Manitoba would be prepared to promote amendments to the Acts respecting education in schools in that province, and whether any arrangement was possible with the Manitoba Government which would render action by the Federal Parliament in this connection unnecessary. We receive with a deep sense of its importance Your Excellency's statement that you regret to say that the advisers of the Lieutenant-Governor have declined to entertain favourably these suggestions, thereby rendering it necessary for Your Excellency's Government, in pursuance of its declared policy, to introduce legislation in regard to this subject. We also thank Your Excellency for the information that the papers will be laid before us.

We are happy to be informed by Your Excellency that the representations of your Government and the suggestions of the Ottawa Conference respecting steamship communication have resulted in an announcement by the Imperial authorities of their willingness to grant a substantial subvention towards the Atlantic portion of the scheme.

We share Your Excellency's trust that this will ensure the successful establishment of a line of steamers between the United Kingdom and Canada, which, in point of speed and equipment, shall fully meet all requirements.

Your Excellency has informed us that your Government have also learned with satisfaction that it is the intention of the Secretary of State for the Colonies to appoint a Committee to consider a proposed Pacific Cable to connect Canada with Australasia. Your Excellency may be assured that we share the gratification with which your advisers welcome these announcements as affording further evidence of the desire of Her Majesty's Government to draw closer to each other and to the motherland the outlying portions of the Queen's Dominions. We thank Your Excellency for stating that the papers on these subjects will also be submitted to us.

We observe with great interest that our attention will be asked to measures intended to provide for the better arming of our militia and the strengthening of

Canadian defences.

We are gratified to learn that the growth of population in the North-west Territories, as disclosed by the last enumeration, calls for additional representation in Parlia-

ment, and that a Bill for this purpose will be laid before us.

We are happy that Your Excellency is able to inform us that the Commissioners appointed by Great Britain and the United States for the purpose of delimiting the boundary between Alaska and Canada have concluded their labours, that they have signed a joint report for presentation to their respective Governments, and that this report will be laid before Parliament in due time.

We are also pleased to hear that at the request of the Right Honourable the Secretary of State for the Colonies a delegate of Your Excellency's Government visited England last summer to confer with the Imperial authorities on the question of Copyright, and that his report will be laid before us. Your Excellency may be sure that this

subject will again receive our earnest attention.

We receive with interest Your Excellency's announcement that we shall also be asked to consider measures for the extension and development of our trade in agri-

cultural products with the United Kingdom and other markets.

Our thanks are due to Your Excellency for the information that the accounts of the past, and the estimates for the ensuing year, will be laid before us, and that the latter have been framed with every regard for economy consistent with the requirements of the public service.

We are pleased to learn from Your Excellency that the revenues of the country show a gradual and continuous increase, and that the promised equilibrium between income and expenditure on Consolidated Fund account for the current year bids fair to be realized.

Your Excellency may rest assured that these subjects and others which may come before us shall have our earnest consideration, and Your Excellency may safely rely upon our wisdom and prudence, under the Divine guidance, to discharge with dignity and effect the high trust committed to our care.

And a Debate arising thereon,—the said Debate was, on motion of Mr. McMullen,

adjourned.

The House then adjourned.

PETER WHITE,
Speaker.

Mr. Davin—On Monday next—That the Government should at once take into consideration the propriety of giving a bonus on butter exported to the London markets, as is done by some of the Australian colonies, and also of raising the customs duty from four cents per pound to six cents, in order to enable the North-west farmers to compete with the Australian exporters in the British Columbia markets.

Mr. Davin—On Monday next—That in the opinion of this House, it would be expedient to apply \$20,000 to aid in establishing creameries and cheese factories in the North-west Territories, and that this sum should be considered as an addition to the immigration grant.

Mr. McNeill—On Monday next—That, in view of the threatening aspect of foreign affairs, this House desires to assure Her Majesty's Government and the people of the United Kingdom of its unalterable loyalty and devotion to the British Throne and constitution, and of its conviction that, should occasion unhappily arise, in no other part of the Empire than the Dominion of Canada would more substantial sacrifices attest the determination of Her Majesty's subjects to maintain unimpaired the integrity and inviolate the honour of Her Majesty's Empire; and this House reiterates the oft-repeated desire of the people of Canada to maintain the most friendly relations with their kinsmen of the United States.

MAY IT PLEASE YOUR EXCELLENCY:-

We, Her Majesty's dutiful and loyal subjects, the Commons of Canada in Parliament assembled, humbly thank Your Excellency for your gracious Speech at the opening of this Session.

We also thank Your Excellency for informing us that, in accordance with the announcement made during the last Session, Parliament has been summoned somewhat in advance of the usual period.

We heartily share Your Excellency's feeling that the bountiful harvest with which Canada has been blessed is a cause for the deepest thankfulness to the Giver of all

We rejoice that Your Excellency is able to congratulate us upon the evidence of increased activity in the various branches of commerce and industry.

We are gratified to hear that several such indications have come under your personal observation during a tour made recently in the North-west Territories and British Columbia, and that, in particular, Your Excellency noticed the extension of mining enterprise in British Columbia, where the vast mineral resources are in certain localities being now developed and utilized upon something like an adequate scale.

It affords us much pleasure to hear that a special feature of the same tour consisted in the opportunities obtained for visiting a number of the Indian Reservations and also the Indian Industrial Schools. We are glad to learn that on the former Your Excellency was received with hearty demonstrations of loyalty and good-will, while in connection with the latter the proofs of proficiency and intelligence on the part of the children were highly encouraging.

We are glad to be informed that, as to the work of the Indian Department as a whole, the manner in which it is directed and administered appears to be very satis-

We agree with Your Excellency that a reference to these topics would be incomplete without an allusion to the valuable services of the North-West Mounted Police, and we respectfully note Your Excellency's opinion that that force may justly be regarded by Canadians generally as indispensable, under present conditions, to the well-being of those extensive and promising portions of the Dominion in which it is stationed.

We thank Your Excellency for the intimation that immediately after the prorogation of Parliament Your Excellency's Government communicated through the Lieutenant-Governor of Manitoba with the Government of that province, in order to ascertain upon what lines the local authorities of Manitoba would be prepared to promote amendments to the Acts respecting education in schools in that province, and whether any arrangement was possible with the Manitoba Government which would render action by the Federal Parliament in this connection unnecessary. We receive with a deep sense of its importance Your Excellency's statement that you regret to say that the advisers of the Lieutenant-Governor have declined to entertain favourably these suggestions, thereby rendering it necessary for Your Excellency's Government, in pursuance of its declared policy, to introduce legislation in regard to this subject. We also thank Your Excellency for the information that the papers will be laid before us.

We are happy to be informed by Your Excellency that the representations of your Government and the suggestions of the Ottawa Conference respecting steamship communication have resulted in an announcement by the Imperial authorities of their willingness to grant a substantial subvention towards the Atlantic portion of the scheme.

We share Your Excellency's trust that this will ensure the successful establishment of a line of steamers between the United Kingdom and Canada, which, in point of speed

and equipment, shall fully meet all requirements.

Your Excellency has informed us that your Government have also learned with satisfaction that it is the intention of the Secretary of State for the Colonies to appoint a Committee to consider a proposed Pacific Cable to connect Canada with Australasia. Your Excellency may be assured that we share the gratification with which your advisers welcome these announcements as affording further evidence of the desire of Her Majesty's Government to draw closer to each other and to the motherland the outlying portions of the Queen's Dominions. We thank Your Excellency for stating that the papers on these subjects will also be submitted to us.

We observe with great interest that our attention will be asked to measures intended to provide for the better arming of our militia and the strengthening of

Canadian defences.

We are gratified to learn that the growth of population in the North-west Territories, as disclosed by the last enumeration, calls for additional representation in Parlia-

ment, and that a Bill for this purpose will be laid before us.

We are happy that Your Excellency is able to inform us that the Commissioners appointed by Great Britain and the United States for the purpose of delimiting the boundary between Alaska and Canada have concluded their labours, that they have signed a joint report for presentation to their respective Governments, and that this report will be laid before Parliament in due time.

We are also pleased to hear that at the request of the Right Honourable the Secretary of State for the Colonies a delegate of Your Excellency's Government visited England last summer to confer with the Imperial authorities on the question of Copyright, and that his report will be laid before us. Your Excellency may be sure that this

subject will again receive our earnest attention.

We receive with interest Your Excellency's announcement that we shall also be asked to consider measures for the extension and development of our trade in agri-

cultural products with the United Kingdom and other markets.

Our thanks are due to Your Excellency for the information that the accounts of the past, and the estimates for the ensuing year, will be laid before us, and that the latter have been framed with every regard for economy consistent with the requirements of

We are pleased to learn from Your Excellency that the revenues of the country show a gradual and continuous increase, and that the promised equilibrium between income and expenditure on Consolidated Fund account for the current year bids fair to

be realized.

Your Excellency may rest assured that these subjects and others which may come before us shall have our earnest consideration, and Your Excellency may safely rely upon our wisdom and prudence, under the Divine guidance, to discharge with dignity and effect the high trust committed to our care.

And the Debate continuing:

Mr. Sutherland moved. That the House do now adjourn; which motion was negatived.

Mr. Casey—On Wednesday next—Inquiry of Ministry—1. Is the Honourable Minister of Agriculture aware that a copy of an Order in Council concerning the shipping of United States cattle from a Canadian port was published in some of the morning newspapers of Friday, 24th January?

2. Did he say on the afternoon of the same day, in answer to a question across the floor of the House, that he would produce that Order in Council to the House on Mon-

day 27th ult. ?

3. Is the Honourable Minister correctly reported in the official debates of Tuesday,

28th ult., as follows:-

"Mr. MONTAGUE. In answer to the hon. gentleman (Sir Richard Cartwright), I may say that he has read correctly the conversation which took place across the House, between the hon. member from North York (Mr. Mulock) and myself on Friday last.

The position which I took then was the correct one under the circumstances. At that time the Order in Council had been passed by Council but was not signed by the Governor General, and as the hon, gentleman quite well knows, I had no business to give any information to this House as to the facts which had been brought before Council, and upon which a decision had taken place, but which decision had not been communicated to His Excellency, and approved, and signed by him. As to the facts having been given to the newspapers, I may say that I was myself astounded. As the reporters in the gallery who a ked me the question upon Friday will bear me out, I refused to give them any information whatever, and I confess that the resentment of the hon. gentleman (Sir Richard Cartwright), as against this fact being given to the newspapers, was joined in most heartily by myself. I have no explanation to offer to the House. except simply to say, that I knew nothing whatever in regard to it, and I was astonished, and pained, and humiliated, when I found that it was done. * to repeat and emphasize that so far as I am concerned, the communication was not given to the public press by me, nor do I believe it was given to the public press by any of my officers, and I desire to express my humiliation that it was not given to this House before it was given to the press.

4. Has the Honourable Minister since heard that the said Order in Council was

given to the press by the Premier, and when did he hear it?

5. Has he since heard that said Order in Council was communicated to and approved and signed by His Excellency before it was given to the press, and when did he hear it?

6. Are the statements referred to in the last two questions correct?

7. If so, how did it happen that he knew nothing whatever about such dealing with an Order in Council specially concerning his own department?

8. Does he still think the course he took then was the correct one under the cir-

cumstances, in not producing the Order in the House when asked for?

9. Does he still feel that the resentment of the honourable gentleman (Sir Richard Cartwright) because the order was given to the press, is joined in most heartily by himself?

10. Is he still astounded, and pained, and humiliated, that the said Order in

Council was not given to this House before it was given to the press?

Mr. McMullen—On Wednesday next—Inquiry of Ministry—Who holds, or held the contract for carrying the mails between Spence's Bridge and Kamloops, British Columbia?

What route is or was followed, and what offices are or were supplied under such

contract between Spence's Bridge and Kamloops?

For how many months in each year is the mail carried between Ashcroft and Lillooet, British Columbia, by way of the Marble Canyon? What is paid for the said service? Was the contract for such service awarded to the British Columbia Express Company after public tenders had been asked for, and if so, what other tenders were received and amount of each?

Mr. Kaulbach—On Wednesday next—Inquiry of Ministry—As the amount of refund has been recovered in the courts and paid over to the Dominion Government on the action taken against the Government of Newfoundland for money collected from Canadian fishermen for licenses under the Newfoundland Bait Act of 1890, when will the sums due the respective claimants be paid to them?

Mr. Perry—On Wednesday next—Inquiry of Ministry—Who is the engineer that made an examination of the breakwater at Tignish, Prince Edward Island, during the season of 1895? What is the date of inspection?

Mr. Perry—On Wednesday next—INQUIRY OF MINISTRY—Is it the intention of the Minister of Public Works to take steps for the immediate repair of the breakwater at Tignish, Prince Edward Island?

Mr. Perry-On Wednesday next—Inquiry of Ministry—Is it the intention of the Government to cause further blasting of rock in Cascumpeque Harbour, Prince Edward Island, during the coming season, with a view of improving navigation in said harbour?

Sir Charles Hibbert Tupper—On Wednesday next—Bill intituled: "An Act further to amend the Dominion Elections Act."

Mr. Yeo—On Wednesday next—Inquiry of Ministry—What amount has been expended on McKie's Pier, Egmont Bay, Prince County, Prince Edward Island, during the past year? Was the work done by public contract? If not, under whose supervision was the work performed?

What depth of water is at the outer end of said pier?

Is the work completed, or is it the intention to extend it during the present year? Is it the intention to dredge the channel leading to this pier during the coming season?

3. Copies of memorials or other communications made to the Government or to any member thereof, by the same persons and interests during the winter of 1892-93 and since, complaining of the excessive governmental dues and charges levied on ocean steamships, and on British traffic via the St. Lawrence route, when compared with similar charges at ports in the United States with which Montreal is in keen competition.

Mr. Mills (Bothwell)—On Monday next—Order of the House for a Return showing the amount of money paid to each of the several parties who have received a bounty during the year 1895 from the appropriation to encourage the production of the beet-

Mr. McShane—On Monday next—Inouiny of Ministry—1 Has the Government from time to time received memorials from the Montreal shipping interests and Board

of Trade, praying for the abolition of the tonnage tax known as hospital dues?

2. Is the Government aware that the imposition of this tax in the ports of Quebec and the Maritime Provinces has led to a retaliatory tax being levied on Canadian tonnage trading with ports in the United States; that under the laws of the United States now in force, their retaliatory tax will cease to be levied so soon as Canada ceases to levy her tax; but that a Bill is at present before Congress repealing this standing offer of reciprocal freedom from taxation, thereby making their tax a permanent one?

3. Under the circumstances, and in view of the fact that this tax is peculiar to Canada, and that sick seamen are cared for in all other countries without the imposition of a tax, will the Government consider the advisability, by legislation or otherwise, of freeing the St. Lawrence route from the taxation at present levied on its shipping in the

\$1,000,000 in respect of the Levis Graving Dock?

- 3. Is it not true, as regard the port of Montreal, that no Government money has been expended on the harbour proper, all responsibility for construction and maintenance in connection therewith having been laid on the Board of Harbour Commissioners without financial aid from the Government or Parliament?
- 4. Is it not true that the appropriation made by Government to reimburse the Montreal Harbour Board for their expenditures prior to 1860, in connection with the twenty feet channel through Lake St. Peter, proved insufficient by the sum of \$295,-471.10, and that in connection with the Nearer Channel improvements, the Government exacted from the Harbour Board interest on expenditure during the construction of the works, which levies amounted in the aggregate to the sum of \$794,027.95, so that in effect the Government is at present in pocket of harbour moneys to the extent of over a million dollars?
- 5. Is it the intention of the Government to place in the Supplementary Estimates a sum sufficient to reimburse the Montreal Harbour Board for this outlay of theirs in connection with the Lake St. Peter channel?
- 6. Is it the intention of the Government to place the Montreal Harbour on the same financial footing as other harbours are placed throughout the Dominion?

2. Number of agricultural labourers or farm hands employed?

3. Value of land owned by farmers?4. Value of buildings?

6. Value of live stock?

Mr. Martin—On Monday next—Inquiry of Ministry—Whether the attention of the Government has been called to the large number of business failures, many for large amounts, which have recently occurred in Ontario and Quebec? Whether the Government propose to offer any remedy for the condition of affairs indicated by these failures?

4. What progress has been made with the investigation, and what places visited; and have the employed, as well as the employers, been asked to give information?

5. Was A. W. Wright a commissioner for the above purpose? Is he so still? If

not, when did he resign ?

6. Did he leave Ottawa lately with the alleged purpose of visiting Halifax to collect information? Was he directed by the Government to go there?

Mr. Davin—On Monday next—Inquiry of Ministry—Has the Government read the report of His Honour the Lieutenant-Governor of the North-west Territories to the Honourable the Minister of the Interior, in the Department of Interior, as follows:—

"TERRITORIAL EXHIBITION.

"The grant of \$25,000 made by Parliament during the session of 1894, towards the holding of a territorial exhibition in the North-west, promises to be fruitful of beneficial results. Up to the present time, the small district fairs have established the ability of producers to compete with those of any country in the world, so far as cattle, cereals and diversified farming are concerned. The success achieved at the World's Fair, naturally enough stimulated all classes to improve upon the prevailing methods, the consequence being that throughout Alberta, Saskatchewan and Assiniboia, a marked progress is already noticeable. In holding the proposed territorial exhibition, it was considered advisable that this initiatory object lesson of North-west products should take place at the capital, provided a suitable site could be procured. The town of Regina voted \$10,000 towards erecting suitable buildings, while the town site trustees, representing the Canada and North-west Land Company, the Canadian Pacific Railway, and the Dominion Government, agreed to give a site whereon to erect the necessary structures, the result being that a well-located and commodious plot of ground, a little west of the Territorial Assembly building north of the railway track and immediately upon the main trail, comprising fifty acres, has been secured. I am glad to say the farmers and industrial producers generally throughout the North-west are already taking an active interest in the project, and the agricultural associations have given

assurance of substantial aid. Local committees are now in course of formation: prize lists are being prepared, keeping in view the resources and distinctive capabilities of each district, and it is confidently anticipated that the first territorial exhibition, marking a decade since the last spike was driven in a railway connecting the two oceans, will meet with universal support. Alberta, Saskatchewan and Assiniboia, possessed as they are of certain distinct and well-defined advantages in cattle, horses, and small farm products, lumber and cereals, mixed farming, grain and cattle, will make such showing as will convince even the most sceptical of the advancement already achieved, as well as of their future possibilities. Long distances have, to a great extent, prevented the intermingling of the people and interchange of ideas as well as of products. This, at all times, tends to create jealousies and to jeopardize that unity, so much to be desired, in new and sparsely-settled communities. A generous rivalry will stimulate the farmers, and as the settlers are public-spirited and quite capable of accomplishing tenfold what has already been done, they only require encouragement and a recognition of their industry to bring about this much-to-be-desired result. Great satisfaction is expressed that His Excellency the Governor General has consented to open the proceedings, and many leading public men, both from Canada and the United States, have promised to be present.

To the above, Mr. Burgess refers as follows, in his report to the Honourable the

Minister :---

"With regard to the territorial exhibition to be held at Regina, and towards which Parliament, at its last session, granted the sum of \$25,000, His Honour says,

among other things :-

"The town of Regina voted \$10,000 towards erecting buildings, while the town site trustees, representing the Canada and North-west Land Company, the Canadian Pacific Railway, and the Dominion Government, agreed to give a site whereon to erect the necessary structures, the result being that a well-located and commodious plot of ground, comprising fifty acres, has been secured. I am glad to say the farmers and industrial producers generally throughout the North-west are already taking an active interest in the project, and the agricultural associations have given assurance of substantial aid."

Has His Honour the Lieutenant-Governor of the North-west Territories placed a statement of accounts due for work done and goods supplied to the Territorial

Exhibition ?

Does the Government intend to take steps to secure that the creditors of this exhibition, many of them poor men, shall be paid?

Mr. Dickey—On Monday next—BILL intituled: "The Remedial Act (Manitoba)."

Mr. Ives—On Monday next—In Committee of the Whole—Resolved, That it is expedient to further amend the Act respecting Ocean Steamship Subsidies by providing that the Governor in Council may enter into a contract, for a term not exceeding five years, for the performance of a fortnightly steamship service between a port or ports in Canada and ports in France and Belgium, on such terms and conditions as the Governor in Council deems expedient for a subsidy not exceeding \$50,000 per annum.

McFadyen, Esq., Government foreman of that work in 1893 and 1894? If not, why not?

Mr. Davin-On Friday next-INQUIRY OF MINISTRY-Whether the Hon. the Comptroller of Customs has received a petition from one or more of the Farmers' Institutes of Manitoba, containing the resolutions set out below and passed at a regular meeting of the Souris E. D. Farmers' Institute held in Melita November 22nd, 1895: -

That whereas by a "Dominion Act" certain regulations are set forth whereby the grain standards of Manitoba and the North-west Territories are adjusted by a grain standard board each successive season, the conditions being such that a great injustice may be done to farmers of this province and Territories. Said Act provides that No. 1 hard wheat shall be sound and well cleaned, weighing not less than 60 pounds to the bushel, and shall be composed of not less than two-thirds hard red Fyfe wheat.

And whereas the standard board so long as they do not conflict with the above conditions of the Act may make and frequently do make the grade of No. 1 hard wheat to weigh much over 60 pounds to the bushel, and to contain much more than two-thirds

bushel red Fyfe wheat.

And whereas we are told that said standards are based upon collection of samples made each year from various parts of Manitoba and the Territories, we hereby suggest and do believe that the collection of such samples, being largely in the hands of the dealers and purchasers of said wheat, may be, and we believe frequently are superior to the average and beyond, this season for example, the general conditions.

Such variation of standards and uncertainty resulting from such conditions year after year is to the farmer a source of very great dissatisfaction and suspicion and must also cause confusion in the English or other outside markets as to what our standards

really are.

And inasmuch as the Duluth wheat standards which regulate the grades of wheat grown in Dakota and Minnesota where No. 1 Duluth weighs only 58 pounds per measured bushel and mostly hard red Fyfe wheat where the average conditions are similar to our own are of a more permanent character and remain practically the same every year being regulated by an Act of the State of Minnesota and give general satisfaction to both producers and handlers.

Therefore be it resolved, that owing to conditions herein set forth, we the members of the Souris E. D. Farmers' Institute desire to express in the strongest terms possible our condemnation which makes it possible for such a manipulation of the grain standards

as will not give us even-handed justice.

And be it further resolved we are strongly of the opinion that the grain standard boards should be abolished and that all grading should be done under the Act, and that one hard wheat should be the same every year as now specified, 60 pounds to the bushel and two-thirds hard red Fyfe wheat, and that all other grades should be such as would meet the average crop conditions. We are also of the opinion that the lower grades, including rejected, should be capable of absorbing all frosted grain, instead of making frosted standards as now, and that all such grades should be made as permanent as possible.

Whether the Government has decided to have a standard not varying, but the

same from year to year as suggested?

No. 32.

VOTES AND PROCEEDINGS OF THE HOUSE OF COMMONS.

OTTAWA, FRIDAY, 21st FEBRUARY, 1896.

PRAYERS.

Five Petitions were brought up, and laid on the Table.

Mr. Sproule, from the Select Standing Committee on Agriculture and Colonization,

presented the Second Report of the said Committee, which is as follows:-

The Committee recommend that the House adopt such measures as may be found necessary to carry out, on the lines indicated by Mr. J. W. Robertson, Dominion Agricultural and Dairy Commissioner, before the Committee, the establishment of an export trade in chilled meats from Canada to Great Britain, so as to place Canadian meats upon the British markets as "the produce of Canada."

The Committee recommend also, that the House authorize the printing of one hundred and fifty thousand (150,000) copies for distribution, of the Dominion Agricultural and Dairy Commissioner's evidence before the Committee on the 20th and 21st of the

current month.

Mr. Mills (Annapolis), from the Select Standing Committee on Standing Orders, presented the Fifth Report of the said Committee, which is as follows:—

The Committee have examined the notices given on the Petition of Henry T. Munn and others, for an Act of incorporation under the name of the Yukon and British Col-

umbia Trading and Development Company, and find them sufficient.

The Committee have also examined the notices given on the following Petitions, and find them somewhat short in point of time, viz.:—Of the Montreal Park and Island Railway Company, for amendments to their Act of incorporation; of the Kingston, Napanee and Western Railway Company, for an Act to enable them to amalgamate with the Bay of Quinté Railway and Navigation Company, and for other purposes; and of the Bay of Quinté Railway and Navigation Company, for an Act to extend the time for the completion of their railway, and to empower them to amalgamate with the Kingston, Napanee and Western Railway Company, but as the notices will have fully matured before the Bills can be considered in Committee, the Committee recommend that they be deemed sufficient.

The Committee have also considered the Petition of the Hamilton Blast Furnace Company, for an Act of incorporation; and the Petition of the Toronto, Hamilton and Buffalo Railway Company, for an Act to amend their Act of incorporation by changing the mode of paying and discharging the debts referred to in section 10 of the said Act, and find that notice in each case has only been published for about two or three weeks, but as the necessity for the application, in both cases, only arose within the last month, and as the rights of all persons affected can be duly protected in the Bill, the Committee recommend that the 51st Rule be suspended in reference to both Petitions.

As the time for presenting Private Bills has expired, the Committee recommend that that portion of the 49th Rule which limits the time for presenting Private Bills be suspended in reference to all of the foregoing Petitions.

Mr. Foster laid before the House, by command of His Excellency the Governor General,—Report of the Minister of Agriculture for the Dominion of Canada, for the calendar year 1895.

On motion of Mr. McKay, the 51st Rule was suspended in reference to the Petition of the Hamilton Blast Furnace Company, for an Act of incorporation, and the Petition of the Toronto, Hamilton and Buffalo Railway Company, for amendments to their Act of incorporation, in accordance with the recommendation of the Select Standing Committee on Standing Orders, as contained in their Fifth Report.

On motion of Mr. Foster, it was Resolved, That the Order for the second reading of the Bill No. 58, The Remedial Act (Manitoba), be made the first Order of the Day on Tuesday, the 3rd March next, and on following days, except Mondays, until Debate thereon be completed.

Robinson and Angers to the Select Standing Committees on Public Accounts, and on Railways, Canals and Telegraph Lines; and Mr. Angers to the Select Standing Committee on Privileges and Elections.

5. By whom is the said money due, and is it secured in any way, and if so, in what manner?

Mr. Gibson—On Thursday next—INQUIRY OF MINISTRY—1. What quantity of Thorold cement was used in building and enlarging the new Welland Canal?

2. What quantity of Thorold cement was used in building the new aqueduct on the

Welland Canal at Welland, Ont.?

3. Is the Government aware that the following engineers, viz., the late John Page, W. G. Thompson and Thomas Munro expressed the following opinions regarding the quality of Thorold cement?

From the late John Page, Esq., when Chief Engineer of Canals for the Dominion

of Canada :-

June 7th, 1884.

For the past forty years the natural hydraulic cement obtained at Thorold, Province of Ontario, has been used to my knowledge on various extensive public works, and in every instance the result has proved highly satisfactory. When properly burned, ground fine and used fresh from the mill, it will compare favourably with any natural or artificial cement that I know of for building or other purposes in a moist position,

or for walls that have been built a few weeks before water has been let in on them. It is well adapted for concrete foundations, walls, drains, cisterns, or indeed for any hydraulic works. When properly prepared and mixed with two parts of clean, sharp sand to one of cement, the result will invariably give good satisfaction.

From W. G. Thompson, Esq., Engineer in charge New Welland Canal and Sault

Ste. Marie Canal :-

April 17th, 1884.

My tests of Thorold hydraulic cement have extended over a period of twenty-eight years, and have been on a large scale, as exemplified in the locks, bridges, culverts and other masonry on the Welland Canal and Welland Railway, and the record, which has been invariably satisfactory, is to be found in examination of the structures. The necessary tearing down of masonry and concrete, during the Welland Canal enlargement has afforded abundant evidence of the reliability of the Thorold hydraulic cement, both in masonry and in concrete, and above and under water. I desire no better cement for the class of work referrred to.

From Thomas Munro, Esq., Engineer in charge Soulanges Canal:—

March 25th, 1879.

About one million bushels of Thorold hydraulic cement have been used in the construction of the canal works in my charge. This experience enables me to testify to the excellence of the article, especially when carefully burnt and thoroughly ground.

4. If the Thorold cement was used in building the above Government works, why

is it not now used in building the "Soulanges" and "Trent Valley" Canals?

Mr. Bruneau—On Thursday next—Inquiry of Ministry—Whether it is the intention of the Government to accept, support and adopt the amendments to the Remedial Bill, of which the hon. member for Bagot has given notice? Do the Government intend to accept, support and adopt all the said amendments, or a part thereof only? In the latter case, which of the said amendments do they intend to accept?

Mr. McMullen—On Thursday next—Inquiry of Ministry—Whether it is the intention of the Government to further resist the claim of E. St. Louis for labour supplied to the Curran Bridge? Do they intend to pay the judgment given by the Supreme Court? What is the amount of the judgment, and also the amount of the cost?

Mr. Casey—On Thursday next—Inquiry of Ministry—1. Were any allowances for house rent, travelling expenses, or on any other account, made to Sir Charles Tupper while acting as High Commissioner without salary? If so, what amounts, at what dates, on what accounts?

2. Are any similar allowances to be made to him during the present term of the Acting High Commissionership without salary? If so, what, and on what accounts?

3. What statutory or other authority is there for the appointment of an Acting High Commissioner without salary? Is he appointed by a commission, or by Order in Council, or in what other manner?

4. Is he subject to the same instructions, and bound to perform the same duties, as were originally imposed on the High Commissioner by the Commission and instruc-

tions issued to Sir A. T. Galt in 1880?

Mr. Charlton—On Thursday next—INQUIRY of MINISTRY—1. Has the Minister of Marine and Fisheries received a petition from the fishermen of Skeena River, in the northern part of British Columbia, a large number of whom are Christian Indians; praying that the weekly close period for catching salmon, which now begins on Saturday at 6 a.m. and ends on Sunday at 6 p.m. shall hereafter begin on Saturday at noon and end on Sunday at midnight, thus enabling Christian Indians and others to observe the twenty-four hours of Sunday as a period of rest without reducing the number of hours in each week set apart as a close season?

2. Will the Government grant the reasonable and proper prayer of the said petitioners, and respect their conscientious scruples against working on Sunday, by making the required change, which will not reduce the number of hours of the close

season, but merely readjust them to meet the desire of Christians by embracing the twenty-four hours of Sunday in the close season of thirty-six hours in each week?

Mr. Davies—On Thursday next—INQUIRY OF MINISTRY—Has there been any extension of the close season with respect to the catching of smelts in the Maritime Provinces during the present winter? If so, when, and in what localities and provinces, and for what lengths of time have such extensions been made and for what reason?

Mr. Casey—On Thursday next—INQUIRY OF MINISTRY—1. Who has been entrusted with the choice of an improved rifle for the volunteers?

2. Has the choice been definitely made, and if so, what rifle has been chosen?

NOTICES OF MOTIONS.

Mr. Bain—On Monday next—Inquiry of Ministry—What was the quantity and value of butter, the product of Canada, exported to Great Britain, for the six months ending 31st December, 1894, and for the same period in the year 1895, respectively?

Also, the quantity and value of the imports of butter for consumption in the

Dominion, for the said two periods respectively?

Mr. McShane—On Monday next—INQUIRY OF MINISTRY—Is it the intention of the Government to reduce the charge for drop letters to one cent postage, which action would be a great boon to all classes all over the Dominion, and would quadruple the quantity of letters now posted?

Mr. Rider—On Monday next—INQUIRY OF MINISTRY—How much cheese of each kind, white and coloured, was made under Dairy Commissioner in Prince Edward Island, on Government account, in the months of June, July, August, September, October and November, 1895? Was the Government mark, with date and place of manufacture, stamped on each cheese? Was the make, in whole or in part, sold or offered for sale during the season of making; and what was the price realized or offered on each month's make? Were competing bids for purchase of the cheese publicly asked for during making season? Were any offers received for its purchase, in whole or in part? If for a portion only, for how much, and what were the figures offered? How much of the above make was put into cold storage in Montreal? What was the amount of freight paid? When was it put into cold storage, where stored, and upon what terms? Has the whole, or any part of the lot been since disposed of? Sir Charles Tupper—On Monday next—That, for the remainder of the Session, Government Orders shall have precedence on Mondays, after Private Bills and Questions, and on Thursdays, after Questions.

Mr. Foster—On Monday next—That it appears that for many years previous to November, 1892, Canadian cattle were allowed free entrance into the ports of the United

Kingdom, without being required to be slaughtered on landing;

That, on the 21st November, 1892, regulations were put in force by the British authorities making the slaughter of Canadian cattle obligatory upon being landed, on the assumption that the disease of pleuro-pneumonia was detected in certain animals imported from Canada;

That a Bill is now before the Imperial Parliament which proposes to make the ex-

clusion of all foreign cattle permanent;

That the most thorough investigation carried on in Canada has failed to disclose the

existence of a single case of pleuro-pneumonia:

That, in view of the foregoing facts, this Parliament, whilst not wishing to interfere in any way with legislation considered necessary in the United Kingdom, desire respectfully to protest against the permanent exclusion of Canadian cattle on the ground of the existence of pleuro-pneumonia in Canada, and to express in the strongest possible manner its belief that pleuro-pneumonia has not, in the past, and does not at the present time exist in Canada.

OTTAWA, FRIDAY, 27th MARCH, 1896.

PRAYERS.

Mr. Burnham, from the Select Standing Committee on Railways, Canals and Telegraph Lines, presented the Tenth Report of the said Committee, which is as follows:—

The Committee have had under consideration the following Bills, and have agreed

to report the same with amendments, viz. :-

Bill No. 52, to incorporate the Hudson's Bay Canal and Navigation Company. Bill No. 65, to incorporate the Manitoba and Nelson Valley Railway Company;—and

Bill No. 76, to incorporate the British American Coal and Transportation Company.

Mr. Taylor, from the Select Standing Committee on Miscellaneous Private Bills, presented the Fifth Report of the said Committee, which is as follows:—

The Committee have examined the following Bill, and have agreed to report the

same without any amendment, viz. :-

Bill No. 83, to incorporate the Manitoba and North-west Millers' Association.

On motion of Mr. McInerney, the Bill (C) No. 78, from the Senate, intituled: "An Act respecting certain female offenders in the Province of New Brunswick," was read the first time. Second reading on Monday next.

Mr. Foster moved, That it appears that for many years previous to November, 1892, Canadian cattle were allowed free entrance into the ports of the United Kingdom,

without being required to be slaughtered on landing;

That, on the 21st November, 1892, regulations were put in force by the British authorities making the slaughter of Canadian cattle obligatory upon being landed, on the assumption that the disease of pleuro-pneumonia was detected in certain animals imported from Canada;

That a Bill is now before the Imperial Parliament which proposes to make the ex-

clusion of all foreign cattle permanent;

That the most thorough investigation carried on in Canada has failed to disclose the

existence of a single case of pleuro-pneumonia:

That, in view of the foregoing facts, this Parliament, whilst not wishing to interfere in any way with legislation considered necessary in the United Kingdom, desire respectfully to protest against the permanent exclusion of Canadian cattle on the ground of the existence of pleuro-pneumonia in Canada, and to express in the strongest possible manner its belief that pleuro-pneumonia has not existed in the past, and does not at the present time exist in Canada.

Mr. Mulock moved in amendment thereto, That all the words after the word "That" be struck out and the following added instead thereof:—"in view of the repeated official declarations of the British Government of the existence of pleuro-pneumonia

amongst Canadian cattle and the serious consequences to Canadian interests from the passage of the Bill now before the British Parliament permanently to exclude Canadian live cattle from Great Britain, this House regrets that the action of the Government of Canada has not been such as to protect the cattle industry of Canada from the serious injury calculated to accrue to it from the passage of such a measure."

And a Debate arising thereon;

At Six o'clock, P.M., Mr. Speaker left the Chair, to resume the same at half-past Seven o'clock, P.M.

7.30 P.M.

(The Order for Private Bills was called under Rule 19.)

The Bill No. 28, to incorporate the Huron and Ontario Railway Company, was read the third time, and passed.

The Debate on the proposed motion of Mr. Foster, and the proposed motion of Mr. Mulock in amendment thereto, was then resumed.

And the question being put on the amendment; it was negatived on a division. And the question being put on the main motion; it was agreed to on a division.

The House resumed the adjourned Debate on the proposed motion of Sir Charles Tupper: "That Mr. Speaker do now leave the Chair for the House to go into Committee on Bill No. 58, The Remedial Act (Manitoba)."

SATURDAY, 28th March, 1896.

And the question being again proposed,

Mr. Wallace moved in amendment thereto, That all the words after the word "That" be struck out and the following added instead thereof:—"regard being had to the opinion that is entertained that the said Bill, if passed, will be absolute and irrevocable so far as the Parliament and the Legislature of Manitoba are concerned, and to the short period for which this Parliament exists, and that it is without any mandate from the electors respecting this question, it would be unwise and inexpedient to proceed with the said Bill."

And the question being put on the amendment; it was negatived on a division.

And the question being put on the main motion; it was agreed to.

The House accordingly went into Committee of the Whole on the said Bill, and progress having been made and reported,—the Committee obtained leave to sit again on Monday next.

No. 69.

VOTES AND PROCEEDINGS OF THE HOUSE OF COMMONS.

OTTAWA, WEDNESDAY, 22nd APRIL, 1896.

PRAYERS.

The Petition of Nis-quah-so, on behalf of the Kitumtchelk and other Indians, of Naas River, British Columbia; complaining that certain rights and customs enjoyed by them prior to the admission of that Province as part of the Dominion of Canada, have been interfered with or abolished; and praying that due inquiry be made into their complaints, and especially that the cherished privilege of potlach, a ceremony connected with the burial of their dead, since made illegal, may be restored to them, was read and received.

Mr. Bergin, from the Joint Committee of both Houses on the Printing of Parlia-

ment, presented the Fourth Report of the said Committee, which is as follows:-

The Committee would recommend that as there will be no further meeting of the Committee this session, the Chairman be empowered to order the printing or otherwise of any returns that may be brought down from either House, and generally to act in all other matters that come properly within the cognizance of this Committee.

Mr. Daly presented,—Return to an Order of the House of the 1st April, 1896, for copies of all correspondence between the Department of the Interior and D. J. O'Donoghue, Secretary Legislative Committee, Trades and Labour Council, Toronto, concerning the alleged misquotation in the report of the Committee on Immigration, 1895, of a certain letter relating to the success of Dr. Barnardo's boys as settlers in Canada.

On motion of Mr. Foster, the Order for consideration of amendments made by the Senate to Bill No. 4, respecting the liability of Her Majesty and public companies for labour used in the construction of Public Works, was transferred to Government Orders.

On motion of Mr. Cockburn, it was Ordered, That leave be granted the Select Standing Committee on Banking and Commerce to sit this day during the time in which the House is in session, from one to two o'clock, P.M.

Mr. Sproule, from the Select Standing Committee on Agriculture and Colonization, presented the Third Report of the said Committee, which is as follows:-

The investigations of the Committee have been conducted under two divisions, viz.:

Agriculture and Colonization.

On the first named, Agriculture in relation to its scientific methods and productions, the Committee have had before them the several officers of the Central Experimental Farm, viz.: Mr. William Saunders, Director of the Dominion Experimental Farms; Mr. James W. Robertson, Agricultural and Dairy Commissioner; Mr. John Craig, Horticulturist; Mr. James Fletcher, Entomologist and Botanist; Mr. Frank T. Shutt, Chief Chemist; Mr. A. G. Gilbert, Poultry Manager; and Mr. John Fixter, Farm Foreman.

In addition to these were heard before the Committee Mr. William Johnston, Mr. D. Derbyshire, Brockville; and a paper was communicated by Mr. R. F. Holterman, Brantford.

The evidence and examination of Mr. Robertson, Agricultural and Dairy Commissioner, related largely to the natural resources of Canada for the production of animals and their products, including manufactures of the Dairy; and the importation of these

lines of Agricultural products by Great Britain.

Mr. Robertson laid before the Committee the details of a scheme to establish a trade in the exportation of chilled meat to the English markets, in order to give farmers a market alternative to the export of live animals. His proposal on this project was that the business be conducted for a time under the auspices of the Government in order to overcome existing obstacles which traders feel unequal to combat, but which, in his opinion, could be removed by the prestige of the Government, and that with the trade once established, commercial men would take the business solely into their own hands. His estimates in reference to this proposal will be found in the evidence before the Committee on the 20th and 21st February.

In regard to operating winter creameries, the Commissioner stated that the progress in this branch of dairying, though not discouraging, was yet slower than could be wished, owing to causes which he stated, but still causes which, by a small measure of judicious aid, would speedily disappear, and, to some extent, had already done so, but others still remained; while he submitted proofs of the gratifying fact that first-class Canadian creamery butter, of the export of 1895–6, took well in England, and that this commodity is now being inquired for by dealers there. The advances made and the prices received in England for butter exported by the Government in 1895 will be

seen by reference to his annexed evidence.

Another point which the Commissioner emphasized is the absolute necessity of cold storage for the preservation of perishable food products, such as meats, poultry, eggs and fruits, particularly where such products enter into export, in order to place them upon the markets of Great Britain in that unimpaired condition which alone can render them acceptable to the purchasing consumers of that country. This cold storage, he insisted, should be systematized by commencing at the places of production, as feeders to cold-storage warehouses at leading points of shipment, supplemented by refrigerator cars over the railways, and cold-storage apartments on board of ocean-going ships; and, finally, cold-storage receiving warehouses at the trans-Atlantic points of delivery and sale. In reference to trans-oceanic export on board steamships, the Commissioner gave it as his opinion that the Government should subsidize such ships as would provide ample cold storage by paying them for the space occupied by the chilled compartments.

The Committee adopted a resolution recommending to the notice of the Government, Mr. Robertson's proposal for the establishing of a trade in chilled meats; and also a resolution recommending to the favourable consideration of the Government for providing a system of cold-storage for the preservation of perishable food products intended to be placed upon the markets. These recommendations will be found amongst the resolutions of the Committee, immediately following the evidence contained in this

report.

The whole matter of the Commissioner's evidence will be found of material importance in the consideration of how best to stimulate the productions of Canadian farmers, and the mutual relations that exist between Agricultural industry, and the commerce

arising from the supplying of these products to both home and foreign markets.

Mr. William Saunders, Director of the Dominion Experimental Farms, was before the Committee on two occasions, and his evidence will be found to convey very much valuable information to the practical farmer in relation to the best methods of cultivation for realizing paying crops, and the maintaining of the fertility of the soil. As a primary and leading element towards securing these desirable ends, he has presented in tabulated form the results derived from experiments with the application of barn-yard manures in different conditions, applied in the raising of various kinds of crops. The results obtained from experiments under similar conditions are nearly uniform, yet with some interesting variations according to the crop experimented with.

The Director states in reference to the oat crop of Canada, as a gratifying fact that this country is ahead of her two chief competitors, the United States and Russia, in the average yield per acre, yet our average production is considerably less than that of some European countries, named in the comparison. The yield per acre at the several Dominion Experimental Farms is furnished and also the twelve most prolific varieties of oats grown at the Central Farm, and also a similar list for each of the branch farms.

The work of distribution of three-pound packages of seed grain of various kinds to farmers for experiment, commenced in 1889 has been continued ever since. distribution has amounted to 38,000 three-pound samples of oats which have been sent

out to farmers, and the results reported back have been highly satisfactory.

The series of experiments with varieties of wheat, as furnished by the Director will be found equally interesting, and the experiments conducted for a series of years with both these serials, now furnish reliable data to guide farmers all over the Dominion as to the species best adapted to each province and territory.

The experiments with varieties of barley have also been persistently followed up on the Experimental Farms, and the results obtained will be found in Mr. Saunders'

evidence.

The pea, a valuable product, has been the subject of equally patient experiment. and the results recorded. The pea worm, which has in many parts been found to be a serious detriment to the raising of peas, has been overcome, and the treatment to this end is furnished.

The experiments conducted by the ploughing under of clovers and other legumes and green crops reveal a valuable source from which to supply fertility to the soil, especially where barn-yard manure is in quantity short of the requirements of the farmer.

The other lines of experiment furnished by the Director as having been worked out on the Experimental Farms are equally instructive and valuable to every branch of

special and general farming.

Mr. A. G. Gilbert, manager of the poultry branch at the Central Farm, was heard in reference to the best methods of rearing fowls for profit, the best breeds for given purposes and the best methods for placing eggs upon the market in fresh and unchanged condition.

The manager's directions for the treatment of laying fowls to secure eggs for marketing in the winter months, when prices are highest, form a feature of special

Mr. John Craig, horticulturist, presented gratifying evidence of increasing interest among farmers in regard to horticulture as a paying branch of agriculture when intelligently pursued. His experimental labours in the cultivation of apples has enabled him to furnish tolerable reliable data as to the various kinds best adapted to profitable cultivation in the several provinces of the Dominion, according to climatic conditions; and like remark applies to his observations upon both large and small fruits. His statements bear testimony to the success that has attended the experiments of the past six years, for the destruction of fungus diseases in fruit-bearing trees, shrubs and vines, by the timely application of spraying compounds, and in this connection he presented to the Committee some striking object lessons on the value of systematic spraying.

The Horticulturist bears testimony, also to the excellent work being accomplished

by provincial associations of fruit growers.

Mr. James Fletcher, Dominion entomologist and botanist was also before the Committee, and his evidence goes to show that for all the fungus and insect pests that have yet appeared in this country, there have been found successful methods of treatment, for their extermination. He described the life habits of several household insect pests and the best methods of combatting them, such as the clothes moth, and the destructive pest designated the "Carpet Beetle" which appeared in force in several localities The evidence of the Entomologist will be found a valuable comin Ontario last year. pendium for the treatment of field and household pests; his evidence is also emphatic as to the care which farmers should exercise in keeping down noxious weeds, some kinds of which threaten noxious consequences to agriculture unless prompt and decisive measures are adopted for their extermination.

Mr. Fletcher informed the Committee that he was conducting some interesting experiments in connection with the apiary recently establis ed at the Central Farm. One of these experiments is being conducted in the direction of ascertaining the best methods for keeping bees through the winter, but the experiments are not yet sufficiently advanced to be presented as reliable data.

Mr. John Fixter, foreman of the Central Farm, supplemented Mr. Fletcher's evi-

dence with a statement of the product derived for the experimental apiary.

Mr. R. F. Holterman, President of the Bee-keepers' Association, of Ontario, contri-

buted a paper on bee apiculture and management.

Mr. Holterman, who has had extensive experience and opportunities of observation for a number of years points to the importance to the production of honey as an adjunct to other farm industries on the grounds that with proper management it is profitable, while it does not lessen or interfere with any other branch of agricultural production.

The Committee have incorporated this paper into the evidence annexed, and believe it will be found to contain valuable directions to those about to enter upon bee-keeping,

or such as may already have started in this line.

Mr. D. Derbyshire, Brockville, President of the Ontario Creamery Association, was heard before the Committee on the 2nd April current. He informed the Committee that the object of his colleagues in the Association, and himself, in coming to Ottawa, was to press for assistance from the Government to place Canadian Winter-made Creamery butter upon the markets of Great Britain. He pointed out the ample market open there for Creamery butter of a fine grade, and he stated his belief, derived from past experience; that with the assistance of a bounty on Winter Creamery butter exported, that Canadians would gain possession of that market. Mr. Derbyshire's evidence, annexed, will be found a valuable epitome of the progress of the Dairy industry of the Dominion, heretofore, and also of the available markets for yet larger increase of butter production.

On the matter of the second part of this Report the Committee have heard the evidence of Mr. A. M. Burgess, Deputy Minister of the Interior, who furnished details of interest which give a retrospect of the immigration expenditure for a series of years;

also immigrant arrivals and settlement in Canada.

The Deputy Minister furnished details of the agencies at present employed in the United Kingdom, for attracting immigrants to Canada, and the various means utilized to impart to the people of the British Islands and other European countries, information on the resources of the Dominion. The subject of Juvenile immigration promoted by associations and individuals is also referred to.

It is gratifying to find by this evidence that the accommodation provided for immigrants on their arrival at Quebec, is not surpassed in excellence, anywhere, in point of promoting health and comfort, and that the immigrants are well cared for by the agents of the department, from the time of their arrival until their destination for settlement

is reached.

The Deputy Minister informed the Committee that the efforts of the immigration branch are handicapped by the recent large reduction in the appropriation for immigration, and he urged the importance of restoring the present grant of \$130,000, to its former amount of \$200,000, as the minimum upon which the Department can continue to prosecute the work of immigration with vigour.

A perusal of the whole of the evidence furnished by Mr. Burgess, and annexed hereto, will show it to be a concise statement of the salient points of the immigration to Canada, from 1867-8, down to 1894-5. The details of the last year's immigration are

fully furnished.

After which His Excellency the Governor General was pleased to close the Sixth Session of the Seventh Parliament of the Dominion with the following Speech:—

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

I am glad to be able to relieve you from further attendance in Parliament.

I desire to express my regret that the mission which my Government recently despatched to confer with the local authorities of Manitoba has been unproductive of any immediate result, and that the question relating to schools in that province still awaits settlement.

I thank you for the appropriation which you have made towards providing for the

better arming and equipment of the Militia Forces of the country.

The powers with which you have endowed the Commissioners appointed under the Behring Sea Claims Convention will, I trust, facilitate the investigations of that tribunal and hasten a just settlement of these long standing claims.

Gentlemen of the House of Commons:

I have to thank you for the Supplementary provision you have made for carrying on the services of the current year.

Honourable Gentlemen of the Senate;

Gentlemen of the House of Commons:

Inasmuch as in the opinion of my advisers it is desirable that the judgment of the people upon the questions which now engage public attention should be obtained at an early day, I have to announce my intention of causing this Parliament to be immediately dissolved.

THE SPEAKER of the Senate then said:

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

It is HIS EXCELLENCY THE GOVERNOR GENERAL'S will and pleasure, that this Parliament be prorogued until Tuesday, the second day of June next, to be here held, and this Parliament is accordingly prorogued until the second day of June next.
